[2] 1981-1985 and 1986 (Jan-March) fatalities to employees, the self-employed and the non-employed reported to the Health and Safety Executive or other appropriate enforcing authority under, and as defined in the Notification of Accidents and Dangerous Occurrences Regulations (NADOR).

[3] Figures for 1981 and 1985 have been recently corrected and vary slightly from previously published figures.
[4] Year commencing 1 April 1986 when the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR) came into force.
[5] Includes the 56 people killed in the Bradford Football Club disaster.
[6] Provisional.
[7] First quarter.

Oil Industry (North Sea)

Mr. Meacher: To ask the Secretary of State for Employment what action he proposes to take to prevent workers being blacklisted by the oil industry in the North sea; and what evidence is available to him on the extent of this practice.

Mr. Nicholls: I have no evidence of such blacklisting and no proposals for action. Employers are free to employ whoever they feel is best suited to the job, provided they do not discriminate unlawfully on grounds of race or sex.

Opencast Coal Mining (Medical Surveys)

Mr. Win Griffiths: To ask the Secretary of State for Employment if he has received a copy of the medical surveys in Kent linking high levels of serious illness with dust from opencast coal mining; and if he will carry out similar surveys in other areas of England where there is opencast coal mining and other activities generating significant levels of dust.

Mr. Nicholls: I am not aware of any authoritative medical surveys on this issue or of proposals for any to be carried out.

Child Care

Mrs. Mahon: To ask the Secretary of State for Employment from what age, under the training for employment scheme, child care costs for sole parents up to £50 a week are available for children.

Mr. Lee: *[holding answer 22 July 1988]:* Help with the costs of necessary child care of up to £50 per week per child is available to lone parents (or guardians) who are eligible to enter employment training. The payments can be made in respect of children of all ages up to 16 where arrangements for their care have been made with a child minder, day nursery or creche registered with the local authority.

Mr. Hinchliffe To ask the Secretary of State for Employment, if he will provide a breakdown of annual long-term unemployment rates for the United Kingdom, showing the number out of work for six months and over, in the years 1978 to 1988.

Mr. Lee: Direct comparisons of unemployment by duration since 1978 are not possible because of changes in the coverage of the count. Following is the available information which is also in the library. Table *(a)* shows the percentage of unemployed registrants in the United Kingdom who had been unemployed six months or more for each year from 1979 to 1982. Table *(b)* shows corresponding figures according to the percentage of unemployed claimants from 1983 to 1987.

Table (a)
Percentage of unemployed registrants in the United Kingdom unemployed over six months

	Percentage of total registrants
1979	42·2
1980	35·1
1981	45·1
1982	54·6

Table (b)
Percentage of unemployed claimants in the United Kingdom unemployed over six months

	Percentage of total claimants
1983	56·0
1984	58·3
1985	59·1
1986	59·2
1987	60·0

Note: Figures based on the average for January, April, July and October of each year.

ENERGY

North Sea Oil and Gas Rigs (Safety)

12. **Mr. Jessel:** To ask the Secretary of State for Energy what representations he has received about the safety of North sea oil rigs.

Mr. Parkinson: I have received a number of representations about the safety of offshore installations. The Government continue to attach paramount importance to all safety matters.

14. **Mr. Prescott:** To ask the Secretary of State for Energy if he will make a statement on the trend in serious accidents and dangerous occurrences in the offshore oil and gas industry over the last five years; and if he has any plans to seek to improve the safety record of the industry.

Mr. Parkinson: The number of serious accidents and dangerous occurrences rose between 1983 and 1986, but fell between 1986 and 1987 to around 1984 levels. The upward trend between 1984 and 1986 partly reflects improved reporting procedures. The safety of offshore workers is of paramount importance and we are determined to continue to find ways to improve the industry's safety record.

29. **Mr. Rooker:** To ask the Secretary of State for Energy how many unpublished reports of investigations into explosions and fires on North sea installations his Department holds.

Mr. Peter Morrison: The information is not available in the form requested. However, in broad terms the Department carries out over 200 inspections and between 25 and 30 accident investigations annually.

33. **Mr. Haynes:** To ask the Secretary of State for Energy if he has called for a safety report on all platforms operating in the British sector of the North sea.

Mr. Parkinson: All platforms operating in the British sector of the North sea are subject to regular and systematic safety assessments involving inspection by the appropriate certifying authority, the Department of Transport and my own Department.

38. **Mr. Knapman:** To ask the Secretary of State for Energy what access offshore oil and gas workers have to *(a)* trades unions and *(b)* the safety inspectorate.

Mr. Peter Morrison: Offshore oil and gas workers have full access to both trade unions and the safety inspectorate.

Under a memorandum of understanding between the unions and the United Kingdom Offshore Operators Association there is free access by union officials to offshore installations, where they can talk freely and confidentially to the work force.

The manager of an offshore installation is also under a duty to ensure that the telephone number of a representative of the safety inspectorate is posted in a conspicuous place on the installation so that people working on rigs can make direct contact with the inspectorate if they feel it necessary to do so.

Mr. Meacher: To ask the Secretary of State for Energy how many fires have been reported during each month in the current year on each of the North sea oil and gas rigs.

Mr. Peter Morrison: In total 16 fires on offshore installations in the United Kingdom continental shelf have been reported to my Department so far this year. The number of fires for each month is as follows:

1988	*Number*
January	3
April	1
May	5
June	2
July	5

Mr. Meacher: To ask the Secretary of State for Energy, pursuant to his reply of 14 July, *Official Report*, column *367*, if he will publish such information as is available to him on the number of inspectors employed by certifying authorities on safety inspection work in the North sea in each year since 1965.

Mr. Peter Morrison: The certifying authorities estimate that in aggregate 250 man years are currently devoted to the survey of offshore installations. Comparable information for earlier years is not available.

Mr. Prescott: To ask the Secretary of State for Energy how many full-time and part-time inspectors were employed by his Department in the offshore industry inspectorate; and how many vacancies there were for each year since 1979.

Mr. Peter Morrison: The number of full-time inspectors employed and the number of vacancies since 1980 is set out in the table.

Date	*Complement*	*Staff in post*	*Vacancies*
1980 (June)	28	25	3
1981 (July)	33	31	2
1982 (March)	35	32	3
1985 (October)	33	27	6
1987 (March)	44	36	8
1988 (July)	46	37	9

No part-time inspectors are employed. Figures are available only for the dates shown.

The number of staff in post has risen significantly since 1980 but has not fully kept pace with increases in complement. However, recruitment initiatives since the beginning of 1988 will substantially reduce the nine vacancies outstanding in the near future. Recruitment efforts will continue.

Mr. Prescott: To ask the Secretary of State for Energy what evidence his Department has about the level of inspection, maintenance and repair work carried out on offshore installations for each year since 1979; and by how much it has increased or reduced over this period.

Mr. Peter Morrison: Operators are required under the Offshore Installations (Operational Safety, Health and Welfare) Regulations 1976 (SI 1976/1019) to maintain the safety of installations and their equipment and to establish a scheme providing for their regular examination, maintenance and testing. My inspectors are responsible for checking that the regulations are complied with. Details of the level of maintenance and repair work can be gathered only at disproportionate cost.

North Sea Oil and Gas

31. **Mr. Hannam:** To ask the Secretary of State for Energy when he next plans to meet the United Kingdom Offshore Operators Association to discuss North sea oil developmemt.

Mr. Peter Morrison: My right hon. Friend and I meet the United Kingdom Offshore Operators Association from time to time to discuss matters of mutual interest.

North Sea Installations

Mr. Doran: To ask the Secretary of State for Energy for how many oil and gas installations in the United Kingdom sector of the North sea each inspector is responsible.

Mr. Peter Morrison: Inspectors are not allocated to particular installations. Each installation is subject to inspection by inspectors of different disciplines to ensure as wide a spread of expertise as possible.

Mr. Doran: To ask the Secretary of State for Energy if he will list those bodies and agencies which receive copies of the reports of his Department's inspections of oil and gas installations in the United Kingdom sector of the North sea.

Mr. Peter Morrison: Copies of my inspector's reports are not sent to outside agencies. Any lessons to be learnt are immediately communicated to the petroleum industry by means of safety notices. An inspector will ensure that any action required is carried out by the companies concerned.

Mr. Doran: To ask the Secretary of State for Energy (1) to which body the certifying authorities for oil and gas installations in the United Kingdom sector of the North sea report; and what is the status of their reports;

(2) what powers the certifying authorities have to enforce adequate safety standards; and on what occasions these powers have been used and in respect of which oil and gas installations;

(3) what criteria his Department applies in its appointment of companies to act as certifying authorities for safety purposes of oil and gas installations in the United Kingdom sector of the North sea;

(4) to whom copies of the reports of the inspections by certifying authorities of oil and gas installations in the United Kingdom sector of the North sea are made available.

Mr. Peter Morrison: There are six approved independent certifying authorities appointed under the Offshore Installations (Construction and Survey) Regulations 1974 (SI.1974/289). These are:

Lloyd's Register of Shipping;
American Bureau of Shipping;
Bureau Veritas;
Det Norske Veritas;
Germanisher Lloyd; and
Offshore Certification Bureau.

The first five listed were appointed in 1974 and are internationally respected ship classification societies. The sixth, formerly known as Halcrow, Ewbank Partnership, was appointed in 1976 and comprised a group of internationally respected British consultants. Each certifying authority was appointed only after an in-depth study by specialists in my Department. These studies involved analysis of each authority's management, structure, staff and methodology in applying their experience as ship classification societies to offshore installations.

Whilst they are required to be independent, the authorities are subjected to continuous reassessment by my Department to ensure that their technical and managerial quality is maintained. These reassessments involve further detailed studies of the methodology applied by the authorities to ensure that they comply with the law; that the most up-to-date standards are being applied in certification procedures and that they are correctly interpreting design and construction guidance notes issued by my Department which document technology relevant to offshore installations which is not readily available already in published form.

Before issuing a certificate of fitness, the certifying authorities are required to examine plans, drawings, specifications, reports and other documents submitted by the owners of offshore installations. The certifying authorities must also carry out, or ensure that there has already been carried out, an independent assessment of the design and method of construction of each installation. They also carry out an initial major survey of each installation.

Only when satisfied that it is proper to do so can a certifying authority issue a certificate of fitness. This is valid for up to five years, after which a further major survey must be carried out before a subsequent certificate is issued. Annual surveys of installations are also required.

Certifying authorities and owners can agree that offshore installations should be subject to continuous assessment instead of subsequent major surveys. Under this procedure annual surveys continue to take place but additionally the installation is continuously surveyed and the need for a separate major survey every fifth year is therefore removed.

If a certifying authority considers that a particular installation is no longer fit for its intended purpose it is required to notify the owner and me so that I can take appropriate action including if necessary the withdrawal of a certificate of fitness. The certifying authorities may, as part of their powers, impose limitations on the location, operation and movement of offshore installations. They may also decline to issue a certificate of fitness.

While the certifying authorities are independent and liaise directly with offshore operators, the authorities are, under the terms and conditions of their appointment, required to send me an annual report of their activities together with any report that they have prepared or obtained in carrying out their duties which I may require. Certifying authorities are not required to copy these reports to any other organisations.

The Certifying authority for Piper Alpha was *Lloyd's Register of Shipping*.

Mr. Doran: To ask the Secretary of State for Energy if he will list the occasions when his Department has issued a safety notice to an operator of an oil and gas installation in the United Kingdom sector of the North sea requiring the operator to improve safety standards on an installation; and to which operators and in respect of which installation they were issued.

Mr. Peter Morrison: When an inspector of my safety directorate completes an inspection he records in the operator's logbook any matters he requires the owner or offshore installation manager to do or refrain from doing. If necessary, he also leaves a list of points for attention with the offshore installation manager, (which consists of points recorded in the logbook and minor points of detail), and sends a letter to company management at the shore base. Any safety recommendation which could be of general application is notified to all offshore operators. An inspector will ensure that companies perform the action required; time limits are specified by my inspectors when required.

Piper Alpha Disaster

13. **Mr. Dalyell:** To ask the Secretary of State for Energy if he will make a statement about the outcome of interviews with relatives of deceased crew members of Piper Alpha about alleged gas leaks reported in the period before the explosion.

Mr. Peter Morrison: The technical investigation team has already begun to interview relatives of deceased crew members. The investigation team is anxious to hear from anyone who has any information about events surrounding the explosion.

35. **Mr. Martlew:** To ask the Secretary of State for Energy if he will make a statement regarding progress in the inquiry taking place into the accident that took place on the Piper Alpha oil platform.

Mr. Peter Morrison: I refer the hon. Member to the answer given to the hon. and learned Member for Fife, North-East (Mr. Campbell) on 14 July 1988, at columns 365-66. The public inquiry, under the chairmanship of the hon. Lord Cullen, will take place as soon as practicable.

40. **Mr. Wray:** To ask the Secretary of State for Energy if he will make a statement on the results of the search for missing bodies of victims of the Piper Alpha disaster in the North sea.

Mr. Peter Morrison: Following the accident, Her Majesty's Coastguard conducted an intensive search and rescue operation until nightfall on 8 July. Sixty seven survivors were airlifted to safety. After 8 July Occidental assumed responsibility for search operations and it has informed me that 43 bodies have now been recovered. The

company is continuing to give the highest priority to recovering the remaining bodies, but the work has been made more difficult by the extent of the damage to the platform and the need not to put further lives at risk.

Mr. Prescott: To ask the Secretary of State for Energy when his Department received the report of the 1984 explosion on the Piper Alpha installation; what are the reasons for not making the report publicly available; and whether any of its recommendations were made available to employers and employees in the North sea offshore industry.

Mr. Peter Morrison: My right hon. Friend has undertaken to give the 1984 report to the public inquiry. When my right hon. Friend met the offshore unions they asked for the report to be made public as early as possible. My right hon. Friend undertook to inform Lord Cullen of the unions' views, and has now done this. It is for Lord Cullen to decide whether or when to make evidence available but my right hon. Friend has indicated to him that he has no objection to the report being made public.

As is normal in these circumstances the 1984 report was not published. However my inspector was satisfied that following the accident, Occidental took the appropriate action.

Bradwell Hall Reactor

15. **Mr. Ray Powell:** To ask the Secretary of State for Energy if he has received further information on the restart date of Bradwell Hall reactor.

Mr. Michael Spicer: The Health and Safety Executive's nuclear installations inspectorate gave consent to the CEGB on 12 July 1988 to start up reactor 1 at Bradwell nuclear power station in Essex. Reactor start up commenced on 14 July. Electricity has been delivered to the grid from 15 July.

Toronto Conference (Atmosphere Pollution)

16. **Mr. Matthew Taylor:** To ask the Secretary of State for Energy if his Department sent representatives to the Toronto conference on "The Changing Atmosphere: Implications For Global Security; and if he will make a statement.

Mr. Michael Spicer: As I stated in a written reply to the hon. Member for Devon, North (Mr. Speller) on 20 July, the United Kingdom delegation to the Toronto conference on the changing atmosphere was led by the chief scientist of the Department of the Environment and included a representative from my Department.

China

18. **Mr. Baldry:** To ask the Secretary of State for Energy what discussions he had during his visit to the People's Republic of China with the new Energy Minister and officials of the various corporations concerned with the energy industry about prospects for British industry in China

Mr. Parkinson: The Chinese energy sector has just been reorganised. I met the new Energy Minister and the presidents of each of the energy corporations. I was accompanied by a group of senior British industrialists who attended all these meetings. The Chinese expressed their great satisfaction with the contribution which United Kingdom companies are already making to the development of China's energy resources and they looked forward to expanding co-operation in future.

Hinkley Point C Inquiry

19. **Mr. Dunnachie:** To ask the Secretary of State for Energy what information he has sent to the inspector of the Hinkley Point C inquiry regarding the guidelines for the inquiry.

Mr. Michael Spicer: The terms in which my right hon. Friend complied with the requirements of the inquiry rules to set out the matters which appeared to him to be relevant to his consideration of the CEGB's application for Hinkley Point C were reported in his answer to my hon. Friend the Member for Wells (Mr. Heathcoat-Amory) on 21 March 1988, at columns 21-22.

Electricity Privatisation

20. **Mr. Butler:** To ask the Secretary of State for Energy if he will make a statement on the progress of increased access to the national grid by private generators of electricity 1983.

Mr. Michael Spicer: Although the Energy Act 1983 allowed private generators common carrier access to the electricity supply industry's transmisson and distribution system, it has not gone far enough in encouraging competition. After privatisation all generators will have fair and equal access to the transmission and distribution system.

32. **Mr. Meale:** To ask the Secretary of State for Energy if, in the light of the National Consumer Council report about his privatisation plans for the electricity industry, he will make a statement on the likely prices of electricity.

34. **Mr. Hardy:** To ask the Secretary of State for Energy what action he proposes to take in relation to prices and consumer protection, following the privatisation of the electricity supply industry.

Mr. Michael Spicer: In future, electricity prices and standards of service will reflect the benefits both of competition and of the regulation of any remaining monopolies.

36. **Mr. Wallace:** To ask the Secretary of State for Energy if there are any plans to set up a regulatory body in advance of the privatisation of the electricity supply industry.

Mr. Michael Spicer: I refer the hon. Member to the answer I gave earlier today to my hon. Friend the Member for Erewash (Mr. Rost).

South-Western Supergrid

21. **Mr. Colvin:** To ask the Secretary of State for Energy if, when he next meets the chairman of the Central Electricity Generating Board, he will raise with him the extent of the shortfall of electricity supply on the south-western supergrid in the event that no further power stations are commissioned between now and 1995; and if he will make a statement.

Mr. Parkinson: I meet the chairman of the Central Electricity Generating Board on a regular basis to discuss a number of subjects. The Central Electricity Generating Board sees a need for new generating capacity in the south-west to ensure the existing security of supply.

Alternative Energy

22. **Mr. Thurnham:** To ask the Secretary of State for Energy what recommendations for research into alternative energy sources he is currently considering; and if he will make a statement.

Mr. Michael Spicer: Energy paper No. 55 "Renewable Energy in the United Kingdom: The Way Forward", which I announced in the House on 20 June, outlines our plans for the renewable energy development programme to the year 2000.

Brindex

23. **Mr. Salmond:** To ask the Secretary of State for Energy when he last met the chairman of Brindex; and what issues were discussed.

Mr. Peter Morrison: My right hon. Friend met the chairman of Brindex on 17 May. They discussed a range of matters, including the role of independent exploration companies in the exploration and development of the United Kingdom's oil and gas reserves.

Private Sector Coal Mining

24. **Mr. Watts:** To ask the Secretary of State for Energy what recent representations he has received seeking the expansion of private sector coal mining.

Mr. Parkinson: The Government have received a number of representations seeking increases in the statutory limits on private sector mining operations, and are giving them careful consideration.

Nuclear Power Generation

25. **Mr. Teddy Taylor:** To ask the Secretary of State for Energy what proposals he has received for the building of additional nuclear-powered electricity generating plants; and if he will make a statement on the future of nuclear power generation.

Mr. Parkinson: The CEGB has applied for consent to build a PWR at Hinkley Point in Somerset. The public inquiry is expected to start on 4 October. I understand that the CEGB also intends to apply for consent for a PWR at Wylfa, on Anglesey.

There is a vital strategic need for the significant non-fossil fuel contribution that can be made by nuclear power generation.

Coal Reserves

26. **Mr. Livsey:** To ask the Secretary of State for Energy when his Department last made an estimate of coal reserves in the United Kingdom; and if he will make a statement.

Mr. Michael Spicer: Coal reserves in the United Kingdom are substantial. Responsibility for quantifying reserves in place lies with British Coal.

Electricity Supplies (Scottish Link)

27. **Mr. Home Robertson:** To ask the Secretary of State for Energy how advanced are the plans to strengthen the inter-connector link in Scotland to supply the electricity market elsewhere.

Mr. Michael Spicer: The electricity supply industry is considering the scope for strengthening the link. The Government welcome this, since use of the link should facilitate greater competition in the supply of electricity.

Electricity Supply Industry (Noxious Emissions)

28. **Mr. Simon Hughes:** To ask the Secretary of State for Energy what steps his Department is currently taking to reduce carbon dioxide and nitrogen oxide emissions by the electricity supply industry; and if he will make a statement.

Mr. Parkinson: Reductions in nitrogen oxides will follow from our agreement to the European Communities large combustion plant directive. No specific steps have been taken, or are planned, to limit emissions of carbon dioxide from power stations. However, the Government's commitment to continued diversity of fuel supply, including a sizeable non fossil fuel component, will help to limit such emissions.

Energy Market

30. **Mr. Knox:** To ask the Secretary of State for Energy if he will make a statement about progress towards the completion of the energy market in the European Community in 1992.

Mr. Parkinson: My right hon. Friend the Minister of State, Department of Energy, described in his reply of 20 June 1988, at column 411 to the hon. Member for Bolton, West (Mr. Sackville) the inability of the Energy Council to agree conclusions at its meeting on 9 June on the Commission's paper on obstacles to the completion of the internal energy market. Officials of member states are now examining the Commission's inventory of obstacles to verify that it is complete and accurate.

The Commission intends to submit specific proposals to the Energy Council on transparency of energy prices, during the second half of 1988 and on energy infrastructures before the end of 1989. I understand that it also expects to submit proposals on the electricity market by the end of June next year. It will draw up by the end of next year a further report on developments in this field.

Bradwell Nuclear Power Station

37. **Mr. Alan W. Williams:** To ask the Secretary of State for Energy what procedures the nuclear installations inspectorate have required from the Central Electricity Generating Board for checking the integrity of the welds in the coolant gas circuit and checking for fissures in the pressure vessel at Bradwell nuclear power station.

Mr. Michael Spicer: The Health and Safety Executive's nuclear installations inspectorate has required the CEGB to carry out an inspection of welds in the reactor 1 coolant gas circuit. This has been completed satisfactorily and a similar inspection programme for reactor 2 will be undertaken next year. The CEGB is also required to complete a programme of high resolution photography of certain areas of the reactor pressure vessels by the spring of 1989, which will add further confidence to the reactor pressure vessel safety case.

Fast Reactor Programme

39. **Mr. Maclennan:** To ask the Secretary of State for Energy if he will make a statement about future British participation in the European collaborative fast reactor programme.

Mr. Parkinson: I refer the hon. Member to the statement I made in the House on 21 July 1988, at column 1288.

Pressurised Fluidised Bed Combustion Project, Grimethorpe

41. **Mr. Barron:** To ask the Secretary of State for Energy what discussions he has had with British Coal on the funding of the second phase of the pressurised fluidised bed combustion project at Grimethorpe.

Mr. Michael Spicer: My officials have been kept informed of British Coal's proposals through discussions under the aegis of the International Energy Agency, and within ACORD.

Coal Industry Dispute

42. **Mr. Skinner:** To ask the Secretary of State for Energy if he will obtain from the chairman of British Coal an up-to-date report of the number of miners sacked during the 1984-85 coal strike who have now been reinstated.

Mr. Michael Spicer: No. The dismissal and re-employment of mineworkers is a matter for the management of the British Coal Corporation.

Deep-mined Coal

43. **Mr. Douglas:** To ask the Secretary of State for Energy if he will make a statement on the production of deep-mined coal in Scotland and the amount expected to be burned in power stations in Scotland during the remainder of 1988.

Mr. Michael Spicer: Output forecasts are a matter for British Coal. The extent of Scottish power station coal burn is a commercial matter for the power station operators to determine.

Radioactive Waste

44. **Mr. Speller:** To ask the Secretary of State for Energy where when the nuclear-powered generating stations at Berkeley and Bradwell are closed down, the highly radioactive content will be disposed of; and if he will make a statement.

Mr. Michael Spicer: Spent fuel from the reactors will be removed and sent to Sellafield for reprocessing. It is expected that accumulated operational wastes and other active wastes arising from decommissioning will in due course be consigned to the deep disposal facility which Nirex has been asked to investigate.

Energy Efficiency

45. **Mr. Patnick:** To ask the Secretary of State for Energy whether he will provide further information to help managers and occupiers of commercial and public buildings to improve energy efficiency.

Mr. Peter Morrison: My Energy Efficiency Office is producing a series of booklets entitled "Energy Efficiency in Buildings". Each booklet helps managers and occupiers of a given type of building assess the scope for saving money through improved energy efficiency, and suggests an action plan. Booklets are now available on schools, catering establishments, shops, health care buildings, and further and higher education buildings. A further eight titles will be published shortly.

Petroleum Coke Fuel

Mr. Bowis: To ask the Secretary of State for Energy what steps he is taking to alert the public to the dangers of burning petroleum coke fuel; and if he will make a statement.

Mr. Michael Spicer: The Government are considering what steps might be appropriate. I can confirm that all such coke manufactured in the United Kingdom is supplied solely to the metal refining industry.

Departmental Inspectors

Mr. Meacher: To ask the Secretary of State for Energy, further to his reply of 14 July, *Official Report*, column 367, how many inspectors were employed by his Department in each year since 1965.

Mr. Peter Morrison: I refer the hon. Member to the answer given to the hon. Member for Kingston upon Hull, East (Mr. Prescott) today.

AGRICULTURE, FISHERIES AND FOOD

Food Standards

Mr. Shersby: To ask the Minister of Agriculture, Fisheries and Food what information he has concerning the views of the London Food Commission on standards of food production in Britain; and if he will make a statement.

Mr. Donald Thompson: The Government's aim has always been that there should be a plentiful and varied supply of good quality, unadulterated, enjoyable food available to consumers at affordable prices. I do not see any case for a separate department to handle food issues. We already have a Minister for Food who combines those responsibilities with those for agriculture and for fisheries thus uniting the whole food chain from producer to consumer.

It is an offence under the food Acts to render any food injurious to health. Comprehensive regulations existing under the Acts provide for proper hygiene in the preparation, handling or selling of food. In addition a number of cases of food poisoning arise from lack of knowledge of appropriate handling procedures in domestic kitchens; the Government and others are in the process of developing publicity campaigns designed to provide advice in this area. Enforcement of food law is vigorously pursued by local authorities; each authority deploys its resources in this field to the extent and in the manner that best suits local circumstances. Ministers are also already required by the Acts to restrict as far as practicable the use in foods of substances of no nutritional value. We are however always prepared to examine ways of improving or simplifying the food laws when circumstances suggest it is necessary.

The food Acts require that Ministers consult with representatives of interested parties on draft regulations before these are made and laid before Parliament. Where those proposed regulations arise from advice we have received from our independent expert committees, that advice is published and public comment invited on it before any regulations are drafted. The published advice carries references to the key information the experts have considered in assembling the advice and we endeavour to ensure as far as practicable that the data which is the subject of those references is available for consultation by interested members of the public. There is distinct practical advantage in continuing the present practice of the working sessions of these committees being private, with committees free to take advice from whatever sources they consider appropriate.

The Government currently spend nearly £8 million per annum on research and monitoring of food safety and

quality. These resources are targeted at problem areas rather than being spread over areas where no difficulties are known to exist.

We are required under the Agriculture Act 1986 to seek to achieve a reasonable balance between agriculture and conservation and a range of measures have been introduced to encourage farmers to protect and enhance the environment. This is another good reason why it is sensible to link ministerial responsibilities for agriculture and food.

The harmonisation of food laws in the European Community (as part of the move to the single market by 1992) is to be done on the basis of the protection of public health, the maintenance of food safety, and the provision of adequate consumer information. Thus there will continue to be high standards of control whilst removing barriers to trade and avoiding undue burdens on business. On a world wide basis, the United Kingdom plays a prominent and active role in the development of the Codex Alimentarius (the FAO/WHO World Food standards programme) which is available to developing countries to form the basis of their own food law and consumer protection programmes.

Dairy Farmers

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food if he will detail the assistance given to dairy farmers since 1 January; and if he will make a statement.

Mr. Donald Thompson: The decision by the European Council in February to extend the operation of quotas until 1992 gives dairy farmers the assurances they need in order to be able to plan for the future. At the same time it was agreed that financial compensation for the suspension of quotas would be continued beyond 1989.

The Government secured changes in Community regulations to improve the operation of the adjustment to milk quotas to take account of changes in butterfat levels, and clarified the operation of the national rules relating to quota transfers. Changes in the conversion rate for the green pound will also lead to some increase in the support levels for dairy farmers from 1 January 1989.

ADAS continues to help farmers develop sound production and business strategies in times when output is limited by quotas and the Government are supporting a number of projects at research centres which are of relevance to dairy farmers. Dairy products are among those supported by Food from Britain and my Department is in the final stages of preparing, with the industry, a dairy product programme under EC regulation 355/77.

Direct support in the dairy sector represented over £90 per cow in 1987-88 and this together with the industry's own skill in adapting to milk production under quotas, has led to a steady rise in average dairy farm incomes over the past three years.

Green Pound

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food what information he has as to the effect on *(a)* the beef sector, *(b)* the dairy sector, and *(c)* the sheep sector of revaluations of the green pound and interest rate changes since December 1987.

Mr. MacGregor: No green pound changes have come into effect since December 1987 in the sectors concerned. I regret that information is not available on the level of farmers' borrowings in the particular commodity sectors referred to or, therefore, on the effect of interest rate changes on the beef, dairy and sheep sectors. Much will depend on the level and sources of individual farmers' borrowings.

Farm Buildings

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food what advice and assistance is given to farmers on improving the appearance of their farm and removing unsightly buildings and derelict equipment; and if he will make a statement.

Mr. Gummer: Ministry technical staff will give specialist advice on the conservation aspects of estate management matters generally, including the appearance of farm buildings in the landscape. Grants are also available to eligible farmers for the provision, replacement, improvement or alteration of buildings for agricultural use or as part of a planned diversification into other forms of rural enterprise. Where such works involve the use of vernacular materials, to improve the appearance of the building, any extra costs will be eligible for grant aid.

Agricultural Development and Advisory Service

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food whether the efficiency scrutiny review of the Agricultural Development and Advisory Service has been completed; and if he will make a statement.

Mr. Donald Thompson: No such review is being undertaken but as explained in the reply of 26 May to the hon. Member for South Shields (Dr. Clark) at column *261* a review of the first year's experience of the Agricultural Development and Advisory Service charging is currently being undertaken by senior officials.

Scottish Fishermen's Federation

Mr. Nigel Griffiths: To ask the Minister of Agriculture, Fisheries and Food when he last met representatives of the Scottish Fishermen's Federation; and which subjects were discussed.

Mr. MacGregor: I met representatives of the Scottish Fishermen's Federation on 8 July 1988, together with my right hon. Friend the Minister of State, Scottish Office, Lord Sanderson. We discussed a number of issues of importance to the United Kingdom fishing industry including the capacity of the fleet, the licensing system, rates of grant, the western mackerel fishery, North sea cod and mesh sizes.

European Community Agricultural Commissioner

Mr. John Marshall: To ask the Minister of Agriculture, Fisheries and Food when he last met the EC Agriculture Commissioner; and what was discussed.

Mr. MacGregor: I last met the EC Commissioner for Agriculture at the Agriculture Council on 18 and 19 July. I refer my hon. Friend to the reply I gave my hon. Friend the Member for Beverley (Mr. Cran) on Wednesday 20 July, at columns *633-34*.

Torry Research Station

Mr. Doran: To ask the Minister of Agriculture, Fisheries and Food when he last visited the Torry research station, Aberdeen; and if he will make a statement.

Mr. Gummer: I refer the hon. Member to my reply to the hon. Member for Paisley, South (Mr. Buchan) on 7 July at column *745*.

Coast Protection

Mr. Hinchliffe: To ask the Minister of Agriculture, Fisheries and Food what action is being considered by his Department for the coastal protection of Spurn Point; what assessment he has made of the consequences for Humberside and Lincolnshire in the event of the peninsula being swept away; whether he is considering a long-term strategy for the defence of Spurn Point; and if he will make a statement.

Mr. Gummer: The Ministry has agreed to grant aid a study of this area, which is currently under consideration by Holderness borough council (the coastal protection authority for Spurn peninsula). Any assessment of the consequences of a breach, and any long-term strategy, would be dependent upon the outcome of this study.

White Fish

Mr. Salmond: To ask the Minister of Agriculture, Fisheries and Food why he has not published white fish sectoral allocations for individual producer groups for the current year.

Mr. Gummer: Each producer organisation has been notified of its sectoral allocation for 1988. On the question of making this information more widely available, I refer the hon. Member to my reply to him of 12 July at column *136*.

Rhizomania

Mr. Bellingham: To ask the Minister of Agriculture, Fisheries and Food what action has been taken following the recent discovery of rhizomonia virus in soil attached to imported nursery stock.

Mr. Donald Thompson: Discussion have taken place between my Department and the plant health authorities in the Netherlands, and agreement has been rached that exports of nursery stock from the Netherlands to the United Kindom should come only from rhizomania-free areas. Measures have also been agreed which will reduce to a minimum the possibility of contamination of the soil in those areas by rhizomania virus originating elsewhere. My Department and the Dutch authorities will remain in close touch with each other. I am grateful to the Government of the Netherlands for the understanding they have shown of Her Majesty's Government's concern over this matter.

Set-aside

Mr. Colvin: To ask the Minister of Agriculture, Fisheries and Food how many set-aside applications have been received by his Department; and what is the acreage involved.

Mr. MacGregor: None as yet. Application forms have only just been made available, and applications are not being accepted until statutory instruments have completed their parliamentary processes.

Environment

Mr. Madden: To ask the Minister of Agriculture, Fisheries and Food what discussions he is having with the National Farmers Union about the effect of agriculture on the environment.

Mr. Gummer: I and my officials are in regular contact with the National Farmers Union on this subject.

Afforestation

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if he will place in the Library a copy of the operating instructions under which the Forestry Commission will carry out its procedures in respect of new planting in the light of the Environmental Assessment (Afforestation) Regulations 1988.

Mr. MacGregor: The commission will shortly be publishing a leaflet on the procedures to be followed in respect of environmental assessment for afforestation projects. Copies of this leaflet will be placed in the Library of the House as soon as they are available.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if, pursuant to his answer of 19 July, he will set out the ways in which the procedures to be adopted for new planting by the Forestry Commission will differ from those laid down in the Environmental Assessment (Afforestation) Regulations 1988 in respect of new planting by the private sector.

Mr. MacGregor: The procedures to be followed by the Forestry Commission in respect of its own new planting proposals differ from those set out in the regulations only in respect of those requirements which are clearly inappropriate. For example, the commission would not seek a direction from Ministers against its own decision to carry out an environmental assessment in any case.

Farmers (Planning Permission)

Mr. Ken Hargreaves: To ask the Minister of Agriculture, Fisheries and Food what guidance he intends to give to farmers who experience difficulties in obtaining planning permission.

Mr. MacGregor: I am aware of concern in the farming community about the difficulties of getting planning permission, especially now that we are encouraging more diversification on farms.

The Government have already made it clear that planning authorities should adjust their policies to the changes in the orientation of agriculture which are taking place as a result of reform of the common agricultural policy. However, farmers must also play their part by developing a proper understanding of the planning system and presenting their planning applications clearly and convincingly.

To help farmers to develop their expertise, I have decided with my right hon. Friends the Secretary of State for the Environment and the Secretary of State for Wales to produce a farmers' guide to the planning system. This will encourage farmers:

— to present their applications and plans effectively and with due regard for the character of their area;
— to think about the impact of any development on others and to try and anticipate the planning

authority's concerns,
— to emphasise the benefits, such as the number of jobs created; and
— to discuss their ideas with planning officers, local councillors and their neighbours at an early stage and be ready to show some flexibility.

I hope the guide will be available before the end of the year.

Statistical Divisions

Mr. Dobson: To ask the Minister of Agriculture, Fisheries and Food if he will list for 1979, 1984 and the most recent year the numbers of staff by grade in the statistical divisions in his Department; and if he will differentiate between staff in the statistical posts and staff in administrative posts.

Mr. Donald Thompson *[holding answer 21 July 1988]:* The information requested is as follows:

	1 April 1979	*1 April 1984*	*1 April 1988*
Chief statistician	2	2	2
Statistician	8	8	10
Senior assistant statistician	6	2	6
Assistant statistician	2	2	3
Support staff	198½	131	114½

These figures are prepared on a different basis from those in a White Paper "Government Statistical Services" Cmnd. 8236 of 1981 which covered staff outside statistics divisions engaged in statistical work.

NATIONAL FINANCE

Civil Servants (Dismissals)

80. **Mr. Tony Banks:** To ask the Chancellor of the Exchequer how many civil servants have been dismissed over the past five years.

Mr. Brooke: I refer the hon. Member to the answer I gave to my hon. Friend the Member for Langbaurgh (Mr. Holt) on 13 July 1988, at column 200.

Civil Servants (Dispersal)

81. **Mr. Holt:** To ask the Chancellor of the Exchequer what are the percentages of civil servants working outside London in the Departments of *(a)* Education, *(b)* Health and Social Security, *(c)* Defence, *(d)* Home Affairs, *(e)* Transport and *(f)* others; and if he will make a statement.

Mr. Brooke: The percentages of civil servants working outside London are:

Department	[1] *Percentage*
Education and Science	43
Health and Social Security	83
Defence	87
Home Office	74
Transport	85
Others	74

[1] The figures quoted are estimates relating to April 1988, based on returns made by Departments to the Treasury.

National Income

Mr. Frank Field: To ask the Chancellor of the Exchequer if he will update the answer given to the hon. Member for Birkenhead detailing the share of national income going to different income groups of 4 November 1986, *Official Report*, columns *412-14*.

Mr. Norman Lamont: Information for 1985-86, derived from the survey of personal incomes for that year, is as follows:

Quantile group of tax units[1,2]	*Income before tax*		*Income after tax*	
	£ billion	*per cent.*[1]	*£ billion*	*per cent.*[1]
Top 1 per cent.	12·7	6·1	7·9	4·7
Top 2 per cent.	20·4	9·8	13·3	7·9
Top 3 per cent.	25·6	12·3	17·3	10·3
Top 4 per cent.	30·8	14·8	21·3	12·6
Top 5 per cent.	36·0	17·3	25·2	15·0

[1] As in the previous answer, quantile groups of tax units and percentage shares of income are determined by reference to the population of tax units for which the Inland Revenue has records. Some of these tax units will have no liability to income tax.
[2] Single people and married couples.

Income Tax

Mr. Frank Field: To ask the Chancellor of the Exchequer if he will list the number and proportion of income tax payers in each of the following tax categories, the number and proportion claiming mortgage tax relief, the average value of relief per mortgagee, the total cost of the relief and the percentage of the total cost for each group *(a)* up to £5,000 per year; *(b)* £5,000 to £7,500 per year; *(c)* £7,500 to £10,000 per year; *(d)* £10,000 to £12,500 per year; *(e)* £12,500 to £15,000 per year; *(f)* £15,000 to £17,500 per year; *(g)* £17,500 to £20,000 per year; *(h)* £20,000 to £25,000 per year; *(i)* £25,000 to £30,000 per year; *(j)* £30,000 to £40,000 per year; *(k)* £40,000 to £50,000 per year and *(l)* over £50,000 per year.

Mr. Norman Lamont: Provisional estimates for 1988-89, based on projections of the 1985-86 survey of personal incomes and the 1985 family expenditure survey, are given in the table. The estimate of the cost of mortgage interest relief is based on the general level of mortgage interest rates in July 1988.

Number of tax units paying tax and number receiving mortgage interest relief by range of total income 1988-89

Range of total income	*Number of tax units[1] paying tax (thousands)*	*Percentage*	*Number of tax units[1] with mortgage relief[2] (thousands)*	*Percentage*	*Average value of relief per mortgagor (£)*	*Cost of relief (£ million)*	*Percentage*
Up to £5,000	2,550	12 per cent.	690	8	300	210	5
£5,001 to £7,500	3,690	18	470	5	360	170	4
£7,501 to £10,000	3,320	16	830	10	400	330	8
£10,001 to £12,500	2,890	14	1,210	14	450	550	13
£12,501 to £15,000	2,280	11	1,230	14	480	590	14
£15,001 to £17,500	1,620	8	1,020	12	490	510	12
£17,501 to £20,000	1,260	6	870	10	490	430	10
£20,001 to £25,000	1,590	7	1,110	13	510	570	13
£25,001 to £30,000	690	3	470	6	630	300	7
£30,001 to £40,000	600	3	440	5	780	340	8
£40,001 to £50,000	180	1	120	1	900	110	3
Over £50,000	230	1	140	2	1,020	140	3
Total	20,900	100	8,600	100	490	4,250	100

[1] Single persons and married couples
[2] Including about ¼ million non-taxpaying tax units

Mr. Mullin: To ask the Chancellor of the Exchequer if he will list the rates of income tax for each year from 1979.

Mr. Norman Lamont *(holding answer 21 July 1988]:* The information is in the following table:

Rates of Income Tax 1978-79 to 1988-89

Period	*Per cent.*
Reduced rate	
1978-79 to 1979-80	25
Basic rate	
1978-79	33
1979-80 to 1985-86	30
1986-87	29
1987-88	27
1988-89	25
Higher rate	
1978-79	40, 45, 50, 55, 60, 65, 70, 75, 83
1979-80 to 1987-88	40, 45, 50, 55, 60
1988-89	40
Investment income surcharge	
1978-79	10, 15
1979-80 to 1983-84	15

Mortgage Fraud

Mr. Heddle: To ask the Chancellor of the Exchequer what steps the Inland Revenue takes to identify the incidence of mortgage fraud through the operation of mortgage interest relief at source—MIRAS.

Mr. Norman Lamont: The Inland Revenue carries out regular checks on borrowers' mortgage interest relief, and on the lenders to ensure that they are operating the MIRAS arrangements correctly. These compliance procedures are kept under regular review.

Ethnic Monitoring

Mr. Janner: To ask the Chancellor of the Exchequer whether he will now carry out a monitoring exercise in accordance with the code of the Commission for Racial Equality, to ascertain how many and what percentage of people from ethnic minorities are employed in each grade in the Treasury; and if he will make a statement.

Mr. Brooke: I refer the hon. and learned Member to the reply I gave him on 29 June, at columns 255-58.

Mr. Janner: To ask the Chancellor of the Exchequer (1) what are the results of the ethnic monitoring of recruitment for the AO and AA grades in London; and whether he will place a copy of such results in the Library;

(2) if he will identify those results of the ethnic monitoring of recruitment for the AO and AA grades in London in July 1987 which suggest that the number of appointments offered to ethnic minorities is broadly in proportion to the number of eligible candidates applying from each ethnic group;

(3) how many appointments were offered to members of ethnic minorities as revealed by the survey of ethnic monitoring of recruitment for the AO and AA grades in London in July 1987; and how many such offers were accepted;

(4) how many eligible candidates from each ethnic group applied for recruitment into the AO and AA grades in London in July 1987, according to the ethnic monitoring exercise then carried out by his Department.

Mr. Brooke: The information sought is given in the table. It covers a six-month period beginning 1 July 1987.

	AOs			AAs		
	White	Black	Asian	White	Black	Asian
Total number of eligible applicants	47	14	17	107	42	43
Number offered appointment	6	2	2	27	9	9
Number appointed	6	2	—	13	6	3

Mr. Janner: To ask the Chancellor of the Exchequer in what quasi-governmental bodies or other organisations under his aegis he has authority to request or require the carrying out of ethnic monitoring exercises in accordance with the code of the Commission for Racial Equality; and what ethnic monitoring and equal opportunities exercises have been carried out by each such Department.

Mr. Brooke: Non-departmental public bodies and other bodies sponsored by the Chancellor's departments are responsible for making their own arrangements for the recruitment and personnel management of the staff they employ. Bodies are encouraged to be equal opportunities employers, and to pursue practices in the codes of the Commission for Racial Equality and the Equal Opportunities Commission. No central records are held on ethnic monitoring and equal opportunities exercises carried out by these bodies.

Gross Domestic Product

Mr. Alan Williams: To ask the Chancellor of the Exchequer what is his estimate of the gross domestic product per head in *(a)* the United Kingdom, *(b)* England, *(c)* Wales and *(d)* Scotland.

Mr. Major: I refer the hon. Member to the November 1987 issue of *Economic Trends*. The table on page 86 shows the latest estimates of regional gross domestic product per head in current prices and at factor costs. The provisional estimates for 1986 are *(a)* United Kingdom excluding the continental shelf region, £5,597; *(b)* England, £5,741; *(c)* Wales, £4,795; *(d)* Scotland, £5,234. Revised estimates for 1977-86 and provisional estimates for 1987 will be published in the November 1988 issue of *Economic Trends*.

Exchange Rates

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer if he will give the monthly figures for *(a)* United Kingdom interest rates and *(b)* the exchange rate for (i) sterling/deutschmark and (ii) sterling/ecu, together with the variation from the exchange rate mechanism of the European monetary system central rate of the pound sterling for each month over the last two years.

Mr. Lilley: I refer the hon. Member to tables 13.1 and 13.11 of "Financial Statistics" published monthly by the Central Statistical Office and the United Kingdom table of "International Financial Statistics" published monthly by the International Monetary Fund.

Overseas Debt

Mr. Tom Clarke: To ask the Chancellor of the Exchequer if he will publish a table in the *Official Report* showing for each developing country, for the latest year for which figures are available, the proportion of export earnings constituted by debt service charges.

Mr. Lilley: I refer the hon. Member to the answer I gave him on 7 June, at column 527. Similar information for 1987 is not yet available.

Income Bonds

Mr. Gale: To ask the Chancellor of the Exchequer when he expects to increase the interest rates paid on income bonds in line with interest rates in the private sector.

Mr. Lilley: The rate of interest on income bonds, like all national savings rates, is kept under review in the light of the Government's borrowing needs, as well as the trend in interest rates in the economy generally.

Industrial Dredging

Mr. David Porter: To ask the Chancellor of the Exchequer if, pursuant to his answer of 19 July, he will take steps to make available copies of the licences and guidelines issued to each industrial dredging operation by the Crown Estates Commission.

Mr. Lawson: The Crown Estate Commissioners regard dredging licences as commercial documents and as such confidential. I regret therefore that this information cannot be made available.

Taxation

Mr. Mullin: To ask the Chancellor of the Exchequer if he will state the total receipts from *(a)* value added tax, and *(b)* tax raised in Sunderland for each years from 1979 to 1988.

Mr. Norman Lamont *[holding answer 21 July 1988]:* The information is not available.

Privatisation

Mr. Gordon Brown: To ask the Chancellor of the Exchequer if he will publish in the *Official Report* a table in cash terms showing for each of the years 1979-80 to 1988-89 for each of the organisations which has been included in at least one year in the equivalent of table 4.1 of Cm. 288, those asset sales not included in Table 1.4's line for privatisation proceeds together with appropriate totals; whether these proceeds have directly accrued to the Exchequer or have remained in the relevant businesses; and, where these have been set, if he will publish the target proceeds from such asset sales which have been set in the appropriate investment and financing review.

Mr. Norman Lamont *[holding answer 18 July 1988]:* Actual or forecast receipts from asset sales included in the nationalised industries' internal resources figures shown in table 4.5 of Cm. 288 for 1979-80 to 1988-89 are shown in the table. The total amount in the 1988-89 plans is £303 million.

Proceeds from the sale of assets are a source of internally generated funds for nationalised industries and

do not directly accrue to the Exchequer although they do reduce the industries' need for external finance. Expected asset sale receipts are always taken into account when setting an industry's external financing limits in the investment and financing review, but formal disposal targets are not set.

	1979-80 £ million	1980-81 £ million	1981-82 £ million	1982-83 £ million	1983-84 £ million	1984-85 £ million	1985-86 £ million	1986-87 £ million	1987-88 £ million	1988-89 £ million

Notes:
(1) Figures individually rounded to nearest £1 million. 1987-88 figures are provisional.
(2) Where industries have been privatised, the figures given relate to the period up to privatisation.
(3) 1988-89 figures relate to industries' present estimates; due to impending privatisation figures are not shown separately for Electricity (E & W), the Scottish Electricity Boards, British Steel Corporation, Girobank and Water (E & W).

Mr. Gordon Brown: To ask the Chancellor of the Exchequer if he will list in the *Official Report* those nationalised industries and public corporations with entries appearing in table 4.1 of Cm. 288 for which privatisation proposals have been announced, citing appropriate references to ministerial statements and placing copies in the Library.

Mr. Norman Lamont *[holding answer 18 July 1988]:* The following is a list of those nationalised industries and public corporations with entries appearing in table 4.1 of Cm. 288 for which privatisation proposals have been announced, citing appropriate references to ministerial statements.

British Steel Corporation 3 December 1987. (*OR*, col. 1107).
Electricity (England and Wales) 25 February 1988 (*OR*, col. 454).
Girobank 7 June 1988 (*OR*, col. 713).
North of Scotland Hydro-Electric Board and South of Scotland Electricity Board 2 March 1988 (*OR*, col. 975).
Scottish Transport Group 27 January 1988 (*OR*, col. 311).
Water (England and Wales) 5 February 1986 (*OR*, col. 287).
Crown Agents 23 February 1984 (*OR*, col. 991).
Crown Suppliers 3 February 1988 (*OR*, col. 983).
General Practice Finance Corporation November 1987 announced in White Paper Cm. 249 (1987)

The Government have also commissioned a feasibility study into privatising *British Technology Group* 13 April 1988 (*OR*, col. 163).

The Government have also announced privatisation proposals for the following subsidiaries of nationalised industries and public corporations.

British Rail: BREL 24 November 1987 (*OR*, col. 141).
British Shipbuilders: Govan yard and other facilities 18 April 1988 (*OR*, col. 554).

Political Parties

Mr. Gordon Brown: To ask the Chancellor of the Exchequer which of the political parties are currently treated by the Inland Revenue as qualifying political parties for the purposes of section 24 of the Inheritance Tax Act 1984.

Mr. Norman Lamont *[pursuant to his reply*, 21 April 1988]: For the purposes of clarification I should add that the Liberal party and the Social Democratic party, before

and after the establishment of the Social and Liberal Democratic party, also currently qualify for the purposes of section 24 of the Inheritance Tax Act 1984.

SCOTLAND

NHS Medical Staff (Pay)

Mr. Galbraith: To ask the Secretary of State for Scotland if he will give, for each health board, their additional allocation to fund the nurses' pay award.

Mr. Andrew Welsh: To ask the Secretary of State for Scotland pursuant to his reply to the hon. Member for Tayside, North (Mr. Walker) of 5 July, *Official Report*, column *522*, how much money each health board is being allocated specifically to meet the full cost of the pay awards to doctors, nurses and other professional staff.

Mr. Michael Forsyth: The sum of £92 million is being made available in Scotland to finance the full additional costs of all review body pay awards, including those to nurses. £6 million is required to meet costs in the family practitioner service and a total of £2·567 million has been allocated to the common services agency, state hospital and the National Board for Nursing, Midwifery and Health Visiting for Scotland. £83·433 million has been added to the hospital and community health service allocations of health boards as follows:

Health board	*£ thousands*
Argyll and Clyde	5,981
Ayrshire and Arran	4,500
Borders	1,309
Dumfries and Galloway	2,159
Fife	4,206
Forth Valley	3,942
Grampian	7,700
Greater Glasgow	21,595
Highland	3,148
Lanarkshire	6,924
Lothian	13,340
Orkney	237
Shetland	291
Tayside	7,668
Western Isles	433
Total	83,433

Surplus NHS Property

Mr. Allan Stewart: To ask the Secretary of State for Scotland whether he has any plans to change the current arrangements governing the sale of surplus National Health Service property; and if he will make a statement.

Mr. Michael Forsyth: The Scottish Home and Health Department is in the course of reviewing the present procedures for the sale of surplus health service property in Scotland. The intention is to streamline the current procedures, which date largely from 1984, building upon our experience since then and upon the increased expertise of health boards, while ensuring that the disposal of surplus property continues to be made on the most favourable terms available.

Mr. Allan Stewart: To ask the Secretary of State for Scotland what representations he has recently received from the general managers of the Scottish health boards concerning the financial arrangements for the proceeds of sales of surplus National Health Service properties; and what response he has made.

Mr. Michael Forsyth: The present arrangements envisage that the full amount of the proceeds is ploughed back into health service capital investment. As a result of representations from health board general managers and others, I am reviewing the limit on the amount of the proceeds of a single sale which may at present be retained by the particular health board responsible for the property. A health board selling property which realises more than the normal limit of £250,000 (which was set in April 1986) may, at the discretion of the Scottish Home and Health Department, retain a greater sum, as an alternative to its distribution to health boards more generally, in the light of their capital expenditure plans.

Child Care

Ms. Richardson: To ask the Secretary of State for Scotland what action he is taking to implement the recommendations within his area of responsibility of the European Commission's childcare network report "Caring for Children—Services and Policies for Childcare and Equal Opportunities in the United Kingdom".

Mr. Michael Forsyth: My right hon. and learned Friend received a copy of this detailed and wide-ranging report only recently. We are considering the report's recommendations with the other Government Departments concerned.

Penal Establishments

Mr. Tom Clarke: To ask the Secretary of State for Scotland when he last met the governor of each Scottish penal establishment; and what matters were discussed in each case.

Lord James Douglas-Hamilton: My right hon. and learned Friend last met the governors in charge of all Scottish penal establishments on 25 January 1988. He delivered an address setting out his policies on penal issues and the future of the Scottish Prison Service. This formed the basis for subsequent questions and discussion.

Immigration

Mr. Tom Clarke: To ask the Secretary of State for Scotland if he will publish a table in the *Official Report*, showing for each Scottish penal establishment, the number of prisoners held under immigration legislation together with their average length of stay at the latest date for which figures are available.

Lord James Douglas-Hamilton: The number of prisoners held in Scottish penal establishments under immigration legislation on 5 July 1988 is given in the table.

Prison	*Number of prisoners*
Barlinnie	4
Edinburgh	1
Perth	1
Inverness	1
Total	7

Five of the above prisoners are no longer detained. They were held on average for 37·2 days. The other two prisoners have been held since 25 and 27 June 1988 respectively.

Disabled People (Legislation)

Mr. Tom Clarke: To ask the Secretary of State for Scotland when he last met with representatives of COSLA to discuss the implementation of the Disabled Persons (Services, Consultation and Representation) Act 1986.

Mr. Michael Forsyth: My officials have had two meetings with representatives of the convention to discuss the implications of sections of the Act which have already been implemented: the second was on 31 August 1987 and was concerned with section 13 which was brought into operation on 1 February 1988.

Prisons (Special Provisions)

Mr. Tom Clarke: To ask the Secretary of State for Scotland what arrangements are in force in Scottish prisons to provide *(a)* special diets, *(b)* religious worship facilities, *(c)* appropriate cultural facilities and *(d)* interpreter services, for ethnic minority prisoners or prisoners with special religious needs.

Lord James Douglas-Hamilton: An inmate's right to a wholesome and varied diet, and to adequate arrangements for religious observation, is protected by the Prison (Scotland) Rules 1952, which also encourage the provision of appropriate education and social facilities. Locally, governors will, where practicable, make every effort to meet reasonable requests from ethnic minority inmates for special facilities including translation.

I have recently asked Her Majesty's chief inspector of Prisons whether there are any general improvements which ought to be made to the arrangements for accommodating the small number of inmates from ethnic minorities.

Muthill Old Church

Sir Nicholas Fairbairn: To ask the Secretary of State for Scotland when work by the Scottish Development Department on the fabric of Muthill old church was begun; when it will end; and what is the estimated cost.

Lord James Douglas-Hamilton: Repair work on the tower of Muthill old church began in August 1985, but due to unexpected structural problems will not be completed until March 1989. The total cost is expected to be £42,500.

Home Helps

Mr. Tom Clarke: To ask the Secretary of State for Scotland, pursuant to the answer to the hon. Member for Monklands, West from the Secretary of State for Social Services on 13 May, *Official Report*, columns *273-74*, if he will supply similar information on the level of home help provision in Scotland by local authority area.

Mr. Michael Forsyth: The information requested is as follows:

Home help provision in Scotland number of home helps[1] per 1,000 total population

As at the first Monday in October	*Borders*	*Central*	*Dumfries and Galloway*	*Fife*	*Grampian*	*Highland*	*Lothian*	*Strathclyde*	*Tayside*	*Orkney*	*Shetland*	*Western Isles*	*Scotland*

[1] Expressed in Whole-time Equivalents

Buses

Mr. Darling: To ask the Secretary of State for Scotland if he will list the number of *(a)* prosecutions and *(b)* convictions of bus operators in respect of offences arising from, or in connection with, operation of buses in each year since 1980.

Lord James Douglas-Hamilton: Comprehensive information is not available centrally. The following information is given in the annual report of the traffic commissioner on summonses and convictions since 1980:

	Summonses	*Convictions*
1980-81	395	67
1981-82	127	52
1982-83	121	110
1983-84	201	103
1984-85	358	57
1985-86	103	75
1986-87	43	59

Stagecoach Limited

Mr. Darling: To ask the Secretary of State for Scotland if he will list the number of convictions of Stagecoach Limited of Perth arising from and in connection with their operation of buses, indicating the nature of the conviction in each case.

Lord James Douglas-Hamilton: Details about individual companies are not available centrally and could be obtained only at disproportionate cost.

Manufacturing Industry

Mr. Salmond: To ask the Secretary of State for Scotland what is his estimate, by employee, of the proportion of Scottish manufacturing industry controlled *(a)* by overseas headquartered companies and *(b)* by companies headquartered outside Scotland.

Mr. Lang: The proportion of Scottish manufacturing industry controlled by overseas-owned companies in 1987 is estimated to be 18 per cent. (by employment).

Comparable information on the proportion of Scottish manufacturing industry controlled by companies with headquarters outside Scotland, is not available.

Regional Aid

Mr. Salmond: To ask the Secretary of State for Scotland if he will publish a table showing expenditure on regional preferential assistance to industry in Scotland for each year from 1976-77 to 1987-88, at constant 1987-88 prices.

Mr. Lang: Gross expenditure on regional preferential assistance in Scotland for each year since 1976-77 at constant 1987-88 prices is given in the table.

Expenditure on regional preferential assistance to industry in Scotland
Fiscal year (at constant 1987-88 prices)

£ million

Notes:
1. From 1982-83, expenditure outside Assisted Areas, on land and factory building under the Scottish Development Agency Act has been excluded. The 1987-88 figure for land and factory building is provisional.
2. RSA is provided under the Industrial Development Act 1982 and its predecessors.
3. HIDB loans and equity are classed as non-preferential as these are deemed to be similar to non-preferential assistance outside the HIDB area.
4. HIDB expenditure on land and factory building prior to 1977-78 is not separately identifiable.
5. Assistance under the Development of Tourism Act 1969, section 4 was extended to non-assisted areas in August 1982 and is therefore no longer regarded as part of RPA.
6. Small Firms Employment Subsidy was ended in March 1980. The 1979-80 total for Small Firms Employment Subsidy excludes estimated non-regionally preferential payments.
7. Totals may not equal the sum of constituent parts due to rounding.

Trunk Roads

Mr. Home Robertson: To ask the Secretary of State for Scotland if he will make a statement on the progress of his Department's review of trunk roads south of Edinburgh.

Lord James Douglas-Hamilton: The consulting engineers undertaking this study are continuing to gather information on traffic and routes to enable them to carry out an evaluation of route options, and are on target to complete their report by 31 December 1988.

Sheriff Courts

Mr. Wilson: To ask the Secretary of State for Scotland if he will list *(a)* the number of cases disposed of and *(b)* the number of custodial sentences imposed, by each sheriff court in Scotland, for each of the past five years.

Lord James Douglas-Hamilton: The information requested is given in the table.

Cases disposed of and custodial sentences given in each Sheriff court, 1983-1987

Sheriff court	*1983*		*1984*		*1985*		*1986*		*1987*

Interim Liberation Appeals

Mr. Wilson: To ask the Secretary of State for Scotland if he will list the number of interim liberation appeals which have been *(a)* successful and *(b)* unsuccessful, by sheriff court in Scotland, for each of the past five years.

Lord James Douglas-Hamilton: I regret that the information requested cannot be obtained except at disproportionate cost.

Local Authorities (Housing)

Mr. Home Robertson: To ask the Secretary of State for Scotland if he will make a statement on the provision he proposes to make in respect of the financial consequences for local housing authorities of transfers of housing stock to housing associations or co-operatives on the basis of valuations which are less than the outstanding debt attached to the property concerned.

Lord James Douglas-Hamilton: Local authority borrowing for the purpose of capital investment in housing stock is not secured against the individual properties subject to, or resulting from, that investment. Debt redemption arising from transfers of housing stock would reduce the overall outstanding capital debt on the housing revenue account of the authority concerned. A reduction in overall outstanding capital debt would lead to a reduction in loans charges falling on the housing revenue account. Where such reductions in loans charges were insufficient to cover the assumed net loss in income arising from reduced rental income and reduced management and maintenance expenditure, the authority would receive increased housing support grant. In the case of those authorities which do not at present qualify for housing support grant, the effect might be to bring such authorities back into qualification.

Geese

Mr. Morley: To ask the Secretary of State for Scotland what licensing arrangements are being made, with respect to Greenland white-fronted geese and barnacle geese, for the winter of 1988-89.

Mr. Michael Forsyth: No decisions have as yet been taken as to licensing arrangements for shooting geese on Islay during the winter of 1988-89.

Mr. Morley: To ask the Secretary of State for Scotland (1) whether, in respect of each licence granted to shoot barnacle geese on the island of Islay, he will provide estimates of yield loss and subsequent financial loss to the respective licensees as a result of damage caused by barnacle geese; and what estimates he made of the loss which would be incurred if no killing took place;

(2) whether, in respect of each licence granted to shoot Greenland white-fronted geese on the island of Islay, he will provide estimates of yield loss and subsequent financial loss to the respective licensees as a result of damage caused by Greenland white-fronted geese; and what estimates he made of the loss which would occur if no killing took place.

Mr. Michael Forsyth: No specific estimates were made of yield loss or subsequent financial loss against each of the licences issued. Nor were such estimates made against the losses which would have occurred if no killing had taken place. In the judgment of my professional staff uncontrolled grazing by both barnacle and white-fronted geese in significant numbers causes serious damage to improved grassland and crops, with consequent financial loss to the farmers involved. The licences were issued in accordance with the provisions of the Wildlife and Countryside Act 1981 to prevent such damage.

Mr. Morley: To ask the Secretary of State for Scotland whether he will be supporting the use of a Manpower Services Commission goose-scaring team on Islay for the 1988-89 winter; and what other arrangements he will be supporting for that winter.

Mr. Michael Forsyth: No support will be available from the Manpower Services Commission for goose scaring on Islay for the 1988-89 winter. Alternative arrangements are under consideration, but no decisions have as yet been taken.

Mr. Morley: To ask the Secretary of State for Scotland if, pursuant to his reply of 21 June, *Official Report*, column *512*, he will list those areas on Islay that meet the criteria for classification as special protection areas under article 4 of EC directive 79/409 but which have not yet been designated; if he will indicate the number of Greenland white-fronted geese regularly using each area; what consultations have been held with landowners and occupiers concerning the designation of those international sites; when he intends to designate them as specially protected areas; and if such areas are notified as sites of special scientific interest.

Lord James Douglas-Hamilton: Areas which are considered by the Nature Conservancy Council to meet the selection criteria for special protection areas under article 4 of the EC directive 79/409 were listed by my right hon. Friend the Secretary of State for the Environment in a parliamentary answer on 11 May 1987. Of the eight sites identified on Islay, four—Laggan, Bridgend Flats, Loch Gruinart and Eilean na Muice Duibhe—were classified as SPAs by my right hon. and learned Friend the Secretary of State for Scotland on 14 July 1988. Two sites—Glac na Criche and Feur Lochain—have been notified as sites of special scientific interest, but have not yet been classified as SPAs. The council has consulted owners and occupiers over the proposed SPA status of these sites and have recommended them for consideration by my right hon. and learned Friend, who will announce his decision in due course.

The Rinns of Islay has also been notified as an SSSI and owners and occupiers have been advised of the council's view that the site will qualify as an SPA in due course. The required consultations are still to be completed.

The Oa has been identified by the council as meeting the selection criteria for designation as an SPA, but further survey work is required to define the boundary of the area that is of special interest. Consequently, the council is not yet in a position to propose the area as an SSSI.

The NCC estimates that the Oa and the Rinns are regularly used annually by about 1,000 and about 1,800 Greenland white-fronted geese respectively. These are average figures for the years 1983-88 and relate to birds which both feed and roost within these areas. The figures for the Rinns include the areas of Glac na Criche and Feur Lochain SSSIs. These are roosting areas used annually by between 700 and 800 birds.

Rating Reform

Mr. Tom Clarke: To ask the Secretary of State for Scotland if he will meet the principal of Glasgow university to discuss the effect of the poll tax on Scottish students.

Mr. Lang: My right hon. and learned Friend has at present no plans to do so.

Mr. Home Robertson: To ask the Secretary of State for Scotland if he will ask the Scottish agricultural wages board to take full account of the effects of the abolition of domestic rates and the introduction of the poll tax on employees living in tied housing in determining wage levels from 1 April 1989.

Mr. Michael Forsyth: I understand that the board—which is an autonomous body not subject to ministerial direction—already has under consideration the possible implications for the remuneration of agricultural workers of the introduction of the community charge.

Poisoned Bait

Mr. Morley: To ask the Secretary of State for Scotland, pursuant to his answer to the hon. Member for Glandford and Scunthorpe of 15 July, *Official Report*, columns *396-99*, what regulations govern the use of poisoned bait to control wildlife pests; and how he defines the meaning of the term wildlife pests.

Mr. Michael Forsyth: The term wildlife pest is taken to mean species of wildlife which do damage to livestock and crops and which are not protected under the provisions of the Wildlife and Countryside Act 1981. The use of poisonous chemicals for the purposes of controlling wildlife pests is governed by the Protection of Animals (Scotland) Act 1912, the Animals (Cruel Poisons) Act 1962, the Poisons Act 1972, the Wildlife and Countryside Act 1981 and the Food and Environmental Protection Act 1985.

Nursery Education

Mr. Wray: To ask the Secretary of State for Scotland (1) what proportion of the gross national product has been spent in nursery education in Scotland for each year since 1974;

(2) what was the total expenditure in nursery education in *(a)* Scotland, *(b)* Strathclyde, *(c)* Greater Glasgow and *(d)* Glasgow, Provan for each year since 1974, in 1988 moneys.

Mr. Michael Forsyth: Expenditure in Scotland and in Strathclyde region was as follows:

Total current expenditure on nursery schools and classes (1988 prices)

	(a) Scotland £ million	*(b) Strathclyde £ million*
1976-77	28·662	17·462
1977-78	28·490	16·517
1978-79	25·736	12·855
1979-80	23·026	13·220
1980-81	24·320	13·668
1981-82	25·076	14·231
1982-83	28·633	14·522
1983-84	28·055	14·866
1984-85	28·685	14·590
1985-86	29·048	15·172
1986-87	29·856	15·563
[1]1987-88	29·170	14·356

[1] Provisional.

Note: The percentage which column *(a)* represents of estimated Scottish GDP at factor cost is 0·1 for each year. Expenditure figures for *(a)* Scotland and Strathclyde region in 1974-75 and 1975-76 and *(b)* Greater Glasgow and Glasgow, Provan, are not available.

Mr. Wray: To ask the Secretary of State for Scotland what is the number of Scottish under-fives who received nursery education for each year since 1974.

Mr. Michael Forsyth: Information on pupils under five attending education authority nursery schools in September of each year is as follows:

	Number
1975	22,240
1976	25,610
1977	29,300
1978	31,230
1979	31,620
1980	32,340
1981	33,050
1982	34,490
1983	36,460
1984	37,680
1985	not available
1986	not available
1987	38,980

Information for 1974 is not readily available.

Peterhead Prison (Siege)

Mr. Meacher: To ask the Secretary of State for Scotland what was the statutory authority for the deployment of forces in the breaking up of the gaol siege at Peterhead prison on 3 October 1987.

Lord James Douglas-Hamilton: I refer the hon. Member to the reply which I gave on 30 June, at column *319*, to a question from the hon. Member of Clydebank and Milngavie (Mr. Worthington).

Opencast Mining

Mr. Win Griffiths: To ask the Secretary of State for Scotland if he will carry out surveys on the link between serious illness and dust in areas of Scotland where there is opencast coal mining or other activities generating significant levels of dust.

Mr. Michael Forsyth: I am not aware of any authoritative medical survey on this subject and there are no proposals for one to be carried out.

Islands Agriculture Programme

Mr. Morley: To ask the Secretary of State for Scotland what is his assessment of the likely effect on wildlife habitats and the environment of the measures to be introduced under the agricultural development programme for the Scottish islands.

Mr. Michael Forsyth: The land improvement measures under the agricultural development programme for Scottish islands will apply to inbye land only and will therefore have minimal effect on wildlife habitats and the environment. The programme allows for payments for the protection of sites of particular importance for the environment and was drawn up in consultation with the Nature Conservancy Council and the Countryside Commission for Scotland.

Houses in Multiple Occupation

Mr. Allan Stewart: To ask the Secretary of State for Scotland whether he intends to conduct a consultation exercise on powers relating to houses in multiple occupation in Scotland.

Lord James Douglas-Hamilton: The Scottish Development Department has published today a consultation paper on problems relating to houses in multiple occupation in Scotland. The paper is being sent to local authorities and other interested organisations in Scotland. I have also arranged for copies to be placed in the Library. The paper identifies the need to protect both the occupiers of HMOs themselves and the right to a peaceful environment of those living nearby. It also seeks views on a wide range of issues, including the possibility of establishing a licensing system for HMOs. The Government look forward to receiving comments on the proposals in the paper. This should allow the Government to tackle in a considered way the serious problems caused by HMOs in certain parts of Scotland.

Forestry

Mr. Jopling: To ask the Secretary of State for Scotland if he will estimate the percentage self-sufficiency which the United Kingdom enjoys in hard wood timber of a quality which can be grown domestically; and if he will make a statement.

Lord James Douglas-Hamilton *[holding answer 20 May 1988]:* The best estimate is in the region of 55-60 per cent.

Conservation

Mr. Galbraith: To ask the Secretary of State for Scotland which organisations have been or will be consulted by the Forestry Commission in producing the

new conservation guidelines referred to in page 7 of the new Forestry Commission booklet "Woodland Grant Scheme."

Lord James Douglas-Hamilton *[holding answer 27 May 1988]:* The Forestry Commission is consulting the Nature Conservancy Council, Timber Growers UK, the Countryside Commission and the Countryside Commission for Scotland in the preparation of these guidelines.

Crafts

Mr. Allan Stewart: To ask the Secretary of State for Scotland what representations he has received on the role of the Scottish Development Agency in promoting crafts in Scotland; and if he will make a statement.

Mr. Lang *[holding answer 18 July 1988]:* In the last two years 16 representations have been received on the funding and organisation of support for Scottish crafts. The Scottish Development Agency, which is responsible for several aspects of such support, is currently considering future arrangements and will be seeking ministerial approval for any changes in structure in due course. All those involved in the provision of support for Scottish crafts are aware of the importance of providing a viable long-term operating structure and are working towards that end.

Student Awards

Mr. Nigel Griffiths: To ask the Secretary of State for Scotland if he will give *(a)* the total number of mandatory student awards made by his Department in each academic year since 1979 and *(b)* the total value of those awards in (i) cash terms and (ii) real terms in 1988 prices.

Mr. Michael Forsyth *[holding answer 22 July 1988]:* The value of students' maintenance allowances and tuition fees paid under the students allowances scheme and the postgraduate students allowances scheme, in cash terms, and in real terms on a constant 1987-88 base (1988-89 figures are not yet available) was as follows:

Academic year	*Number of students*	*Value of awards (Maintenance etc plus tuition etc fees)*	
		Actual £ million	*At 1987-88 prices £ million*
1979-80	53,600	86·0	142·9
1980-81	55,583	106·8	154·1
1981-82	57,542	120·6	160·5
1982-83	57,863	99·1	124·1
1983-84	58,301	101·0	121·3
1984-85	59,931	99·4	113·9
1985-86	58,384	99·5	108·4
1986-87	[1]58,595	[1]103·1	108·4
1987-88	[1]60,900	[1]107·8	107·8

[1] Provisional.

Notes: (1) In session 1982-83 the rate of tuition fees was reduced.
(2) 1987-88 price equivalents are based on the average GDP deflator for the first quarter of each year (mid-academic session).

Water Charge

Mr. Nigel Griffiths: To ask the Secretary of State for Scotland what proportion of the community water charge will be payable by *(a)* students, *(b)* student nurses, *(c)* families on income support and *(d)* senior citizens on retirement pensions; and if he will make a statement.

Mr. Lang *[holding answer 22 July 1988]:* Persons undertaking a full-time course of education, as defined in the Personal Community Charge (Students) (Scotland) Regulations 1988, will be liable to pay a prescribed percentage (set in those regulations as 20 per cent.) of the personal community charge and the personal community water charge. The Government are now considering, in the light of amendments made to the Local Government Finance Bill, whether student nurses should receive a similar concession.

All other people liable to pay the personal community charge will be eligible for income related rebates or benefits, in the case of income support recipients amounting to 80 per cent. of their personal community charge liability. Community water charges will not come within the community charge rebate or benefit system. However, under the reformed social security system introduced on 1 April 1988 the minimum contribution towards rates payments, and the overall amount made available through supplementary benefit towards water charges, are taken into account in setting income support levels. Similar principles will apply from April 1989 in respect of the community charge system.

Primary Health Care

Mr. Galbraith: To ask the Secretary of State for Scotland (1) if he will make a further statement on how he plans to fund the changes in primary care in Scotland outlined in the White Paper "Promoting Good Health";

(2) if he will make a further statement on his plans to impose charges for eye examination and dental checks in Scotland.

Mr. Michael Forsyth *[holding answer 22 July 1988]:* The discussions on the Health and Medicines Bill in another place have produced no new arguments in relation to our proposals on charging for sight tests and dental examinations. We remain of the view that it is right that those who can afford to should contribute towards the cost of these examinations. Our proposals rightly exempt those whose circumstances are such that they cannot afford to pay. We do not accept that those who are not exempt will be deterred from seeking treatment. These proposals were part of a package which will make a significant contribution to the improvement of primary health care in Scotland.

Minor Operations

Mr. Maclennan: To ask the Secretary of State for Scotland what are the estimated comparative costs of a minor operative procedure performed by *(a)* a general practitioner and *(b)* a hospital registrar.

Mr. Michael Forsyth *[holding answer 22 July 1988]:* Information is not collected centrally on which to base an estimate of these costs.

Hernia Repairs and Hip Replacements

Mr. Fearn: To ask the Secretary of State for Scotland if he will give the number of hernia repairs and hip

replacement operations performed in each area, in each year since 1974 to the latest date for which figures are available.

Mr. Michael Forsyth *[holding answer 22 July 1988]*: The information requested is as follows:

Number of in-patients discharged in each health board in each year from 1974 to 1986 where the principle operation was hernioplasty (inguinal and femoral)

Health board	*1974*	*1975*	*1976*	*1977*	*1978*	*1979*	*1980*	*1981*	*1982*	*1983*	*1984*	*1985*	*1986*

HOUSE OF COMMONS

Act of Settlement 1688 (Ceremony)

Mr. Cryer: To ask the Lord President of the Council what was the cost of the ceremony commemorating the Act of Settlement 1688; and if he will make a statement.

Mr. Wakeham: Most of the costs of the ceremony on 20 July, when Addresses were presented to Her Majesty The Queen to mark the tercentenary of the revolutions of 1688-89 and of the Bill of Rights and Claim of Right, will be borne initially by the Property Services Agency. Final figures for the cost are not yet available, but provision has been included in class XX, vote 20 and class XX A, vote 1, of the Estimates for 1988-89 for the Houses of Parliament to repay approximately £40,000 to PSA for these services; this will be shared equally between the two Houses.

Facilities (Hire)

Mr. Cryer: To ask the Lord President of the Council whether the House of Commons Terrace is available for hire to outside organisations; and if he will make a statement.

Mr. Wakeham: No. Only Members and Officers of the House may sponsor functions in the Terrace Pavilion.

Mr. Cryer: To ask the Lord President of the Council if he will list the charges made for the hire of private dining rooms in the Palace at Westminster.

Mr. Wakeham: Minimum hire charges for private dining rooms are levied only when the total cost of food provided is less than the advance deposit required.

The relevant deposits are set out in the information booklet "Banqueting Department" available from the Refreshment Department.

Mr. Cryer: To ask the Lord President of the Council whether any charge is made to commercial organisations for displays in the Upper Waiting Hall; what rules govern advertising; who gives permission for displays; and if he will make a statement.

Mr. Wakeham: No charge is made for the exhibitions in the Upper Waiting Hall, which can only be mounted by a right hon. or hon. Member.

The rules governing the arrangements for these exhibitions are set out in the Serjeant At Arms' Department information leaflet "Exhibitions in the Upper Waiting Hall," which clearly states that exhibitions should not contain items of advertising or commercial interest nor material explicitly intended to further the aims of any political party or group. In accordance with the procedures approved by the Services Committee, an hon. Member wishing to book an exhibition space should submit his application to the relevant Government Department and also the Chairman of the A and A Sub-Committee for approval.

Ten-minute Bills

Mr. Amess: To ask the Lord President of the Council if he will move to refer to the Select Committee on Procedure the matter of the practice governing the giving of notice by Members of motions for leave to bring in Bills under Standing Order No. 19; and if he will make a statement.

Mr. Wakeham: This is a matter which is already within the terms of reference of the Procedure Committee. I am sure that it will have noted the representations made by my hon. Friend and other hon. Members.

TRANSPORT

West London (Schemes)

Mr. Soley: To ask the Secretary of State for Transport (1) what assumption has been made in the west London assessment study about the proposed traffic capacity of the west London corridor;

(2) what are the limits to the increase or decrease in traffic that are considered practical for testing in the west London assessment study; what level of relief in traffic levels is being sought; and what assumptions are being made about future car ownership.

Mr. Peter Bottomley: The study consultants have made an initial assessment of the impact of each option on existing traffic movement patterns. Growth and capacity assumptions and forecasting techniques will be addressed in the detailed assessment and testing of the options in the rest of stage 2.

Mr. Soley: To ask the Secretary of State for Transport what proposals he has to compensate *(a)* local authorities, *(b)* housing associations and *(c)* owner-occupiers if the western environmental improvement route is constructed.

Mr. Peter Bottomley: The usual statutory compensation provisions would apply. Copies of booklets giving details of these provisions have been placed in the Library.

Driving Licence (Welsh Language)

Mr. Gareth Wardell: To ask the Secretary of State for Transport if he will give consideration to the issue of a driving licence in the Welsh language.

Mr. Peter Bottomley: The DVLC issues a bilingual driving licence to drivers with addresses in Wales. Licences are used throughout the United Kingdom and it is not practicable for them to be wholly in Welsh.

London Underground (Fire Safety)

Mr. Dobson: To ask the Secretary of State for Transport if he will place in the Library copies of the reports of London Fire Brigade inspections of London Underground deep underground stations carried out so far in the current year.

Mr. David Mitchell: No. Reports of such fire inspections are produced by London Underground's chief fire inspector who accompanies the London fire brigade for the information of and use by London Underground Limited. The hon. Member should apply to London Regional Transport for the information he requires.

Bus Lanes (Westminster)

Mr. Marlow: To ask the Secretary of State for Transport if he will establish an inquiry into the continuing need for those bus lanes instituted by the former greater London Council in the vicinity of the Palace of Westminster on roads for which he is now responsible.

Mr. Peter Bottomley: No. The City of Westminster became responsible for this road on 1 April 1986. It commissioned studies into the effect of the then experimental bus lanes. It concluded that they were beneficial. After due consultation it decided that the bus lanes should be made permanent. It applied to the Secretary of State for approval under paragraph 5 of schedule 5 to the Local Government Act 1985 because the route is a designated road. The Secretary of State considered that there was no adverse effect on the movement of traffic on the designated road network and approved the proposal.

Taxi and Car Hire Trades (Consulation Document)

Mr. Bendall: To ask the Secretary of State for Transport whether he will consider increasing the time limit allowed for submissions on the consultation document on the taxi and car hire trades.

Mr. David Mitchell: I have written in reply to my hon. Friend's letter on this subject giving an extension to the end of September.

Nuclear Waste

Mr. Home Robertson: To ask the Secretary of State for Transport if he will make a statement on arrangements for monitoring the transport of nuclear waste material from Torness power station, and for regulating the frequency of consignments and the route to be taken.

Mr. David Mitchell: Spent nuclear fuel will be moved from Torness power station to Sellafield in strict accordance with national and international regulations which require the design of the flask to be able to withstand severe accident conditions without radiation risk. The Department is responsible for ensuring compliance with the regulations, but this does not involve controls over the routeing or frequency of consignments because safety is provided by the strength of the container.

SOCIAL SERVICES

Supplementary Benefits (Cleveland)

82. **Mr. Barry Jones:** To ask the Secretary of State for Social Services what was the cost of supplementary benefit single payments for each of his Department's local offices in the county of Cleveland in May 1985, May 1986 and May 1988; and if he will make a statement.

Mr. Portillo: I refer the hon. Member to my reply to the hon. Member for Sedgefield (Mr. Blair) on 21 July. The additional figures requested for the month of May 1988 are given in the table. The local offices shown are those situated in Cleveland but office and county boundaries are not conterminous. The figures shown are provisional and subject to amendment.

Single payment expenditure in May 1988

Office	£
Eston	6,115
Hartlepool	12,994
Middlesbrough	32,478
Redcar	6,420
Stockton	47,278

Coronary Bypass Operations

Mr. Cox: To ask the Secretary of State for Social Services what was the number of people waiting for coronary artery bypass operations in each regional health authority in June.

Mr. Newton: Waiting list information is not collected centrally by type of operation.

Pay Awards

Mr. Allen: To ask the Secretary of State for Social Services if he will make it his policy to bring pay awards forward to before the beginning of the financial year to enable regional health authorities and district health authorities to plan future annual budgets; and if he will make a statement.

Mr. Newton: We recognise the desirability of early settlements in the interests both of the staff concerned and

of bringing greater certainty into the health authority planning process. For doctors, dentists, nursing staff, midwives, health visitors and the professions allied to medicine, we expect this to be greatly assisted by the change from 1989 in the timetable for review body reports, which my right hon. Friend the Prime Minister has asked the review bodies to submit some three months earlier than hitherto. This change should also help in achieving earlier settlements for those groups whose pay and conditions of service are negotiated in the Whitley councils. The conduct of those negotiations is a matter for the respective management sides and the speed with which they can be concluded also depends on the response of the staff sides to the offers which are made.

Voluntary Organisations (Funding)

Mr. Ashley: To ask the Secretary of State for Social Services (1) if he will list the voluntary organisations who were previously receiving section 64 grants and whose applications for funding for general purposes in 1988-89 were rejected, stating in each case the number of years for which the organisation had been funded; and if he will give the reasons for the rejection in each case;

(2) what are the reasons for the decline in the total of grants made under section 64 procedure from £14,443, 694 in 1987-88 to £7,211,705 in 1988-89; and if there have been any changes in the criteria applied.

Mr. Portillo: I refer the right hon. Member to my reply to him on 27 June at columns *124-29*. The figure of £7,211,705 refers to grants awarded as at 22 June 1988. The total amount available for the 1988-89 financial year is £14,243,000. There have been no changes in the criteria for awarding grants.

Funding applications are received and decisions on grants are made at varying times during the year. Full details of applications rejected for grant aid in 1988-89 will not therefore be available until after the end of the financial year.

Postgraduate Hospitals (Beds)

Mr. Ashley: To ask the Secretary of State for Social Services if he will give the absolute and percentage change, since reorganisation, in the number of beds in each of the postgraduate hospitals, stating, in each case, whether the hospital is now a special health authority or a member of a district health authority.

Mrs. Currie: The information requested is given in the table.

Average daily number of available beds in the London post-graduate hospitals

Name of hospital	*Address*	*1982*	*1986*	*Change*	
				Number	*per cent.*
Hospital for Sick Children[1]	London WC1	307·5	294·6	−12·9	−4·2

Acton Hospital[1]	London W3	55·3	72·0	16·7	30·2
Eastmans Dental Hospital[1]	London WC1	0·0	0·0	0·0	0·0

[1] Now a special health authority.
[2] Now administered by district health authorities.
[3] Hospital closed.
[4] Ceased to be a National Health Service hospital.

Social Services Staff (Assaults)

Mr. Tom Clarke: To ask the Secretary of State for Social Services what steps he will take to collect information centrally on assaults on social services staff in the course of their duties.

Mr. Newton: The "Guidelines and Recommendations to Employers on Violence against Employees" published last year by the Association of Directors of Social Services recommended authorities to arrange for the recording and monitoring of incidents concerning the staff of social services departments. We have no plans for the national collation of such information.

Long-term Institutional Care

Mr. Tom Clarke: To ask the Secretary of State for Social Services, pursuant to the answer to the hon. Member for Monklands, West of 7 June, *Official Report*, column *564*, if he intends to collect data centrally on the outcome of patients discharged from institutional care.

Mrs. Currie: The central collection of statistics on the outcome of patients discharged from institutional care will be reviewed with the proposals of the Government to the Griffiths report, "Community Care: Agenda for Action".

Disabled People (Legislation)

Mr. Tom Clarke: To ask the Secretary of State for Social Services, pursuant to the answer to the hon. Member for Monklands, West of Tuesday 7 June, *Official Report*, column *573*, whether he has yet arranged a meeting with local authority associations on the implementation of the Disabled Persons (Services, Representation and Consultation) Act 1986; and if he will make a statement.

Mr. Scott: Officials met representatives of the local authority associations on 4 July to discuss the implementation of the remaining sections of the Act. We hope to implement section 11 soon. Of the other sections, representatives of the local authorities share our view that priority should be given to implementing section 7, and we have already started detailed work on this. The next priority is to implement sections 1, 2, and 3. The financial implications of each section must, of course, be agreed before implementation.

Attendance Allowance

Mr. Hinchliffe: To ask the Secretary of State for Social Services (1) how many applications for attendance allowance were *(a)* made and *(b)* granted in the last year for which figures are available;

(2) how many applications for attendance were disallowed, not including those granted after appeal, in the last year for which figures are available;

(3) how many claims for attendance allowance were disallowed following an initial medical report, by the attendance allowance board, but were granted attendance allowance after appeal, for the last year for which figures are available.

Mr. Scott: The information requested is in the table.

Attendance Allowance 1987

	Number
Claims Received	319,667
Claims Successful at initial stage	208,693
Claims Unsuccessful at initial stage	91,888
Claims Successful on review[1]	44,104

[1] Claims successful on review include:
(i) claims made before 1987.
(ii) claims where the allowance is awarded for the first time.
(iii) claims where the allowance awarded is increased from lower to higher rate.
(iv) claims where the allowance is awarded for a longer period.

Development Programme

Mr. Hinchliffe: To ask the Secretary of State for Social Services how he intends to monitor district health authorities' progress in implementing his Department's 2 per cent. development programme; and what action he will take to ensure that each district health authority achieves the 2 per cent. target.

Mr. Newton: No such target has been set. The provision and development of district health authority services are monitored by regions as part of a cyclical planning and review process. The Department similarly approves regional health authority plans and reviews performance annually, against the background of the broad policy aims set out in the annual planning guidelines. A copy of the latest guidelines, for 1989-90 and 1990-91 (circular HC (88) 43) is in the Library.

NHS (Cost Improvements)

Mr. Hinchliffe: To ask the Secretary of State for Social Services what is the financial value of non-cash releasing cost improvements made in the National Health Service identified by the Department in response to the Social Services Committee; what proportion of the underfunding of the Health Service identified by the Social Services Committee these non-cash releasing cost improvements constitute; and if he will make a statement.

Mr. Newton: The Government's formal response to the Committee's first two reports on the resourcing of the National Health Service was published on 22 June (Cm. 405).

The latest available information on movements in unit costs relates to 1986-87. Making no allowance for efficiency gains between 1986-87 and 1987-88 other than those attributable to cash releasing cost improvements, it can be shown that if unit costs had remained at their 1983-84 levels (apart from the effect of inflation) it would have cost nearly £900 million more to maintain 1987-88 service levels than was actually the case. About two thirds of this figure was attributable to cash releasing cost improvements.

However any estimate of efficiency gains other than cash-releasing cost improvements will necessarily be a less precise and certain figure than that for cash-releasing cost improvements, for which the savings are specifically monitored.

Health Authorities (Cuts and Closures)

Mr. Hinchliffe: To ask the Secretary of State for Social Services what action he takes to collect information on cuts and closures in individual health authorities.

Mrs. Currie: Information on health authorities' plans to change the way in which services are delivered, which may involve closures, is received through formal and informal contacts with health authorities. Major changes are outlined in short term programmes. Closures which are opposed by the community health council come to Ministers for decisions. Details of hospitals and facilities approved for permanent closure following public consultation are routinely collected centrally. Returns of hospital activity, which is the final indicator of the level of services being provided for patients, are received quarterly.

National Insurance Contributions (Refunds)

Mr. Latham: To ask the Secretary of State for Social Services how many cases are known to his Department

currently, or in the last year for which records are available, where a person has been unable to claim back excess payments of class 2 contributions, as in the case of Mr. W., a constituent of the hon. Member for Rutland and Melton, whose name is given in the letter of 7 June from Lord Skelmersdale to the hon. Member, reference PO(6) 2487/9; and whether he will seek powers to be able to make ex gratia refunds in similar cases in future.

Mr. Portillo: The Department does not separately identify this type of case in its records.

As my noble Friend explained in his letter, information on the small earnings exception is made avalable at the outset to those applying to pay national insurance contributions on a self-employed basis. I do not therefore consider that there are grounds for seeking powers to make refunds of contributions in cases where the opportunity to apply for small earnings exception is taken up later than it might have been.

Social Fund

Mr. Tom Clarke: To ask the Secretary of State for Social Services what arrangements are presently in operation for public access to expenditure information on the social fund.

Mr. Portillo: Details of individual local office expenditure on the social fund are placed in the Library at monthly intervals. Copies of this information are held at the Department's libraries where they may be viewed by appointment. Two copies are deposited with the British Library, one of which may be borrowed by other libraries for inquirers; the other copy can be consulted at the British Library. Microfiche copies may be purchased from Messrs. Chadwyck-Healey of Cambridge. In addition we expect local office managers to respond to reasonable requests to provide expenditure information as at the end of the preceding month.

Mrs. Beckett: To ask the Secretary of State for Social Services whether he will publish in the *Official Report* the social fund expenditure of each local office in Great Britain for loans and grants, respectively, and the same figures expressed as percentages of monthly profiles, for each month from April to June 1988, on the same basis as the information for Northern Ireland offices given by the Secretary of State for Northern Ireland on 13 July in his answer to the hon. Member for Redcar (Ms. Mowlam), *Official Report*, columns *249-52*.

Mr. Portillo: Details of social fund expenditure to the end of June are in the Library. Information relating to expenditure as a percentage of monthly profile for over 450 local offices in Great Britain could be provided only at disproportionate cost.

Mr. C. H. Thomas

Mr. Gareth Wardell: To ask the Secretary of State for Social Services if he will establish an internal inquiry into why Mr. C. H. Thomas, of West Cross, Swansea, who received confirmation on 29 February (Reference TX 3866481) that he satisfies the condition for the lower rate of attendance allowance, has not received payment.

Mr. Scott: Mr. Thomas' claim was finally decided on 5 May and payment was made on 11 July. I regret that processing of the claim took much longer than is usual and I am writing to the hon. Member.

Peel Report

Mrs. Ann Winterton: To ask the Secretary of State for Social Services whether the recommendations of the Peel report on the use of foetuses and foetal material have been enacted.

Mr. Newton: The code of practice recommended in the Peel report on the use of foetuses and foetal material for research has been commended to health authorities. In the private sector, places approved to carry out abortions may supply foetal material for research only in accordance with this code and with the specific approval of the Secretary of State. In view of the continued advance in medical techniques since the Peel report was published, my right hon. Friend has recently set up a committee to review its recommendations.

Social Services (London)

Mr. Tony Banks: To ask the Secretary of State for Social Services if he will publish a table in the *Official Report* showing what information he has as to social services department budgets for 1987-88 and for 1988-89, for each local authority in London.

Mr. Newton: The table shows the latest available information on London local authorities social services department budgets for 1988-89 and the equivalent figure for 1987-88.

	1987-88 £ *million*	*1988-89* £ *million*
City of London	1·785	1·940
Camden	39·146	33·596

Source: LA Return of Expenditure and Rates returns 1987 and 1988.

Dispensing Doctors

Mr. Boswell: To ask the Secretary of State for Social Services what is the proportion of all National Health

Service prescriptions written by dispensing doctors; and what proportion of all National Health Service doctors' lists the patients on dispensing doctors' lists represent.

Mr. Newton: In 1986 a total of 6 per cent. of National Health Service prescriptions in England were written and dispensed by dispensing doctors for patients on their dispensing lists. In the same year 6 per cent. of all National Health Service patients in England were patients on dispensing doctors' lists for whom those doctors can dispense.

Community Care

Mr. Tom Clarke: To ask the Secretary of State for Social Services what further representations he has received regarding the Griffiths report on community care; and if he will make a statement.

Mr. Newton: We have received 121 representations from interested individuals and organisations and will take account of them in framing our own proposals.

Chiropody

Mr. Atkinson: To ask the Secretary of State for Social Services if, pursuant to his answer of 22 April, *Official Report*, column *596*, on the future of the chiropody service and profession, he is now able to make a further statement.

Mrs. Currie: There are a number of issues which need to be resolved and discussions on these are likely to take some time. We recognise the importance of foot care for large numbers of people, particularly the elderly, and our efforts are directed towards a better and more accessible service in future.

NHS (Private Facilities)

Mr. Hinchliffe: To ask the Secretary of State for Social Services what is the full gross annual cost to the National Health Service of administering the use of private beds and private facilities within the National Health Service for the latest available year.

Mrs. Currie: Charges for the use of private facilities within the National Health Service are calculated so as to recover the full gross cost of those facilities. In 1986-87, the latest year for which information is available, the full gross cost of providing private beds and facilities is reflected by the amount of total income for that year, which was £61 million. A list of the charges in force in 1986-87 is contained in circular HC(86)6, a copy of which is in the Library.

Ward Sisters

Ms. Armstrong: To ask the Secretary of State for Social Services what advice his Department gives to local managers whose ward sisters meet seven of the 11 criteria for a grading of 'I' but do not qualify for the grading because they manage one ward only.

Mr. Newton: The guidance which the Department has issued makes clear that posts must meet the grading definitions as a whole.

Clinical Regrading

Ms. Armstrong: To ask the Secretary of State for Social Services whether the money available to health authorities for clinical regrading is intended to cover the funded establishment.

Mr. Newton: The additional money we have provided is to meet the cost of all review body pay awards. Our estimate of the total cost was based on the number of staff in post at 31 March 1988 and took account of both directly employed and agency staff.

Ms. Armstrong: To ask the Secretary of State for Social Services how many representations he has received from district health authorities regarding clarification of the guidance his Department has issued on clinical grading of nurses.

Mr. Newton: We have received a number of formal and informal representations as a result of which we issued supplementary guidance to health authorities earlier this month.

National Health Service (Regional Funding)

Mr. Tony Lloyd: To ask the Secretary of State for Social Services if he will make a statement *(a)* on the way in which money is allocated between different National Health Service regions at present and *(b)* on the way in which money would be allocated between different regions under the formula being considered by the National Health Service Management Board giving details of gains and losses.

Mr. Newton: There are two stages to the resource allocation process. The resource allocation working party formula is used to determine each region's target "fair share" of the available resources; Ministers then decide on the pace at which regions' annual allocations are to be adjusted to bring them into line with these targets.

The existing resource allocation working party formula measures the relative needs of each region by taking account of population (and the relative use made of health services by people of different age groups and sexes); morbidity as indicated by standardised mortality ratios; patient flows between regions; and higher staff costs in London and the south-east. A separate adjustment is made to account for the extra service costs associated with medical teaching.

The National Health Service management board's review of the resource allocation working party formula examined each component of the formula and made recommendations aimed at improving its measurement of relative need. Full details of the recommendations, and of the effects they would have on regions' funding targets, are contained in the final report on the review, which was published on 19 July. A copy is in the Library. Decisions on annual allocations were outside the remit of the review, and the report recommends only that the effects of any changes should be carefully phased, to avoid major disruption to health authorities' existing plans. It is not therefore possible to estimate what would be the effects of the review recommendations on regions' annual allocations.

As my right hon. Friend announced in his reply to my hon. Friend the Member for Brentwood and Ongar (Mr.

McCrindle) on 19 July at column 559, the Government will consider this report in the wider context of the National Health Service review.

Christies Hospital, Manchester

Mr. Tony Lloyd: To ask the Secretary of State for Social Services what response he has given to the request by the North Western regional health authority for an extra allocation of £200,000 to fund Christies hospital in Manchester.

Mr. Newton: I hope to respond to the regional health authority's approach shortly.

Immigrants (Pensions)

Mr. Vaz: To ask the Secretary of State for Social Services, whether arrangements have been made with the Governments of (i) India, (ii) Bangladesh and (iii) Pakistan for pensions to be updated for immigrants from those countries who return upon retirement to their countries of origin.

Mr. Portillo: No such arrangements have been made.

Perfusionists

Mr. Nellist: To ask the Secretary of State for Social Services why the management side of the professional and technical staffs B of Whitley council have not so far conceded the regrading of perfusionists; and if he will make a statement.

Mr. Newton: I understand that the grading of this particular group of staff has not been raised in the Whitley council.

Tranquillisers

Mr. Wareing: To ask the Secretary of State for Social Services what representations he has had for financial assistance to be granted to the Council for Involuntary Tranquilliser Addiction on Merseyside; what his response has been; and if he will make a statement.

Mrs. Currie: Section 64 grants are essentially for organisations providing a national resource, rather than for direct client services. The latter are generally best provided and funded locally. The Council for Involuntary Tranquilliser Addiction submitted an application for funding on 30 June. The Department is considering this application along with other candidates for grants, and we shall let the council have a decision as soon as possible.

North Staffordshire Health Authority

Ms. Walley: To ask the Secretary of State for Social Services how much money was *(a)* expected to be allocated to North Staffordshire district health authority under the resources allocation working party formula and *(b)* was actually allocated, in each of the last five years for which figures are available.

Mr. Newton: Allocations to individual district health authorities are a matter for regional health authorities. For information on North Staffordshire's allocations the hon. Member may wish to write to the chairman of the West Midlands regional health authority.

Ms. Walley: To ask the Secretary of State for Social Services what assessment he has made of the effect on *(a)* the budget of and *(b)* the services provided by North Staffordshire district health authority were the review of the resources allocation working party formula final report to be implemented.

Mr. Newton: The review's remit was confined to the national resource allocation working party formula.

Social Fund

Mrs. Beckett: To ask the Secretary of State for Social Services whether a hospital patient whose invalidity benefit on discharge from hospital will be 20p per week above the level of income support can be awarded a social fund grant to enable discharge to take place.

Mr. Portillo: Community care grants are available only to people in receipt of income support at the date of application or who, up to within six weeks of discharge from institutional or residential care will, in the opinion of the social fund officer, be likely to receive income support on discharge.

Higher Pensioner Premium

Mrs. Beckett: To ask the Secretary of State for Social Services what would be the cost of extending entitlement to the higher pensioner premium to those people aged 60 to 79 years who would have been entitled to it if the income support scheme had commenced before they were 60 years; and how many people would benefit from this change.

Mr. Scott: Information on which to base such estimates is not available for the whole of the period concerned.

Income Support Disability Premium

Mrs. Beckett: To ask the Secretary of State for Social Services whether he will extend entitlement to the income support disability premium to claimants who have, for 28 weeks, been treated as incapable of work for the purpose of exemption from the requirement to be available for employment and who do not qualify for the premium on other grounds.

Mr. Scott: We have no plans to do so.

Doctors (Disciplinary Proceedings)

Mr. Sedgemore: To ask the Secretary of State for Social Services (1) how many doctors are currently suspended pending disciplinary hearings under *(a)* HM (61) 112 procedures, *(b)* 5HM/49/1968 procedures, *(c)* HC (82) 13 procedures and *(d)* section 40 of the Whitley council; and if he will break down these figures by sex, ethnic origin, country of qualification, regions in England and Wales;

(2) how many doctors were suspended in each region in each year from 1979 to the present day;

(3) what is the average time taken to deal with disciplinary cases under *(a)* HM (61) 112 procedures, *(b)* HC (82) 13 procedures, *(c)* 5HM/49/1968 procedures and *(d)* section 40 of the Whitley council; and if he will give detail of regional variations;

(4) for how long doctors currently suspended have been suspended; and in how many of the cases there is a date set for the inquiry;

(5) what was the outcome of suspensions after the inquiry and how many doctors were dismissed, reprimanded or resigned in total and in each region for the last year for which figures are available;

(6) how many dismissed doctors went to industrial tribunals in the last year for which figures are available; and what was the outcome as regards dismissal and reinstatement;

(7) what is the estimated average annual cost to the health services of suspending doctors, taking into account salaries, legal costs, employing locums, negligence claims against authorities and doctors awarded costs for wrongful dismissal;

(8) how many doctors are currently suspended for reasons of *(a)* mental health, *(b)* physical health, *(c)* misconduct, *(d)* incompetence and *(e)* fraud, where there are disciplinary procedures pending under: (i) HM (61) 112, (ii) HC (82) 13, (iii) SHM/49/1968 and (iv) section 40 of the Whitley council.

Mr. Newton: This information is not collected centrally. We understand however that there are relatively few cases at one time.

Mr. Sedgemore: To ask the Secretary of State for Social Services how many dismissed doctors appealed under section 190 of the red book in the last year for which figures are available; what was the outcome of the appeals; and if he will break these figures down by sex and ethnic origin.

Mr. Newton: The number of doctors who appeal under paragraph 190 of the hospital medical and dental staff terms and conditions of service varies considerably from year to year. In 1986 there were four appeals: in two dismissal was confirmed and the other two the Secretary of State determined that he did not have jurisdiction. In 1987 a total of 11 appeals were made: in one case jurisdiction was declined, four others were withdrawn or settled locally, and the remaining six are still in progress. I regret that the information available centrally does not enable me to give the other breakdown.

Health Authorities (Disciplinary Procedures)

Mr. Sedgemore: To ask the Secretary of State for Social Services how his Department, regional health authorities or district health authorities monitor suspensions and disciplinary procedures.

Mr. Newton: The monitoring of suspensions and disciplinary procedures is the responsibility of the relevant health authority. Because of concern about the operation of disciplinary procedures for doctors, the then Secretary of State set up a joint working party with the profession last year to review hospital and Community doctors' and dentists' disciplinary procedures. The working party is expected to report this summer.

Supplementary Benefit

Mr. Clay: To ask the Secretary of State for Social Services if he will publish a table showing the value of supplementary benefit for a couple with two children, aged six and eight years as a percentage of average net earnings for all men and all manual men for each year since 1978 to April 1987.

Mr. Portillo: The information is in the table.

It should be noted that these figures take no account of other benefits available to either families receiving supplementary benefit or families who are in full time work. In particular, the value of housing benefit and of child benefit is excluded.

Supplementary benefit rate expressed as a percentage of average net weekly earnings

Uprating dates	*All adult males Married couple with two children per cent.*	*All male manuals Married couple with two children per cent.*
November 1978[1]	51·1	55·1
November 1979	50·5	54·8
November 1980	50·3	56·3
November 1981	50·8	57·6
November 1982	52·6	59·9
November 1983	50·9	58·2
November 1984	48·9	56·1
November 1985	48·1	55·4
July 1986	45·7	53·1
April 1987	43·0	50·7

[1] 1978—Child benefit not included, but child tax allowance is included.

Note: Net average earnings are the estimates of average gross weekly earnings less tax and national insurance contributions at the non-contracted out rate.

Coventry Family Practitioner Committee

Mr. John Hughes: To ask the Secretary of State for Social Services (1) if he will publish his reply to the letters from the Association of National Health Service Officers dated 10 June and 20 April 1988;

(2) what information he has as to breaches of the Data Protection Act by a lay menber of the Coventry family practitioner committee; what action he proposes to take; and if he will make a statement;

(3) what representations he has received from the Association of National Health Service Officers concerning threats allegedly made against a senior officer, and threats of redundancies made to a trade union official pursuing a grievance; what action he proposes to take; and if he will make a statement.

Mrs. Currie: Officials replied to the association on 20 July 1988. Publication of the correspondence is a matter for the association.

Mr. John Hughes: To ask the Secretary of State for Social Services if he will establish an internal inquiry into the allegations of misconduct by the Coventry family practitioner committee made by the hon. Member for Coventry, North-East on 10 June, *Official Report*, columns *1151-53*.

Mrs. Currie: I wrote to the hon. Member about this matter on 5 July. I understand he has accepted an invitation to discuss with the FPC chairman the matters he raised during the debate and will be meeting her today.

Unemployment and Redundancy

Mr. Austin Mitchell: To ask the Secretary of State for Social Services whether he will publish in the *Official Report*, a table showing for 1987-88 and his forecast for 1988-89 of *(a)* the total cost of benefits paid to unemployed people and *(b)* the total expenditure from the redundancy fund.

Mr. Portillo: The information requested is set out in the "Government's Expenditure Plans 1988-89 to 1990-91",

volume II, a copy of which is in the Library. The figures for *(a)* are in table 15.8 on page 267, and for *(b)* in table 7.26 on page 115.

NHS Staff

Mr. Robin Cook: To ask the Secretary of State for Social Security if he will give figures showing a total number of staff employed in each regional health authority as a total and an estimate of the costs incurred by each regional health authority, broken down into *(a)* staff salaries and *(b)* other costs; and if he will give a national total for both *(a)* and *(b)*.

Mr. Newton *[holding answer 6 May 1988]:* Such information as is available is shown in the table.

Region	*NHS Directly employed staff in post*[1] *Whole-time equivalent*	*Salaries and wages expenditure*[2] *£000*	*All other expenditure* *£000*	*Total revenue and capital expenditure* *£000*
Northern	53,510	497,185	220,167	717,352
Yorkshire	59,570	556,112	261,978	818,090
Trent	74,310	679,499	312,467	991,966
East Anglian	30,490	288,879	133,073	421,952
North-West Thames	54,810	556,905	287,419	844,324
North-East Thames	69,060	704,648	347,356	1,052,004
South-East Thames	61,860	620,021	313,585	933,606
South-West Thames	48,510	502,226	202,017	704,243
Wessex	43,520	410,178	209,973	620,151
Oxford	33,210	322,302	145,046	467,348
South-Western	52,370	485,733	232,696	718,429
West Midlands	84,230	784,783	380,210	1,164,993
Mersey	42,870	404,346	186,917	591,263
North-Western	74,080	698,112	289,913	988,025
All regions	782,400	7,510,929	3,522,817	11,033,746
Special Health Authorities[3]	10,990	128,798	90,913	219,711
Total	793,390	7,639,727	3,613,730	11,253,457

Sources: Annual census of NHS medical and non medical manpower—as at 30 September 1986. 1986-87 annual accounts submitted to the Department by regional and district health authorities in England and the special health authorities for the London postgraduate teaching hospitals.

Notes:

[1] Includes permanent paid, honorary and locum medical and dental staff; agency nursing and midwifery staff. (The figure for the South West Thames region includes London Ambulance Service staff—2,850 whole time equivalents).

[2] Excludes expenditure on categories of non-NHS staff outside the scope of the annual census of NHS medical and non-medical manpower. Such costs (totalling some £81,757,000) are however included in the figures for "all other" and "total revenue and capital expenditure".

[3] Special health authorities for the London post-graduate teaching hospitals.

AIDS

Mr. Rost: To ask the Secretary of State for Social Services (1) whether, in relation to the possible involvement of immunisation procedures in the aetiology of AIDS, there has been any effort to identify SV40 genomes in people with AIDS;

(2) what assessment he has made, in relation to the possible involvement of immunisation procedures in the aetiology of AIDS, as to whether polio vaccine used in the United Kingdom in the late 1950s or early 1960s was in part contaminated with simian virus 40; and what effects SV 40 is considered to have in its recipients.

Mr. Newton *[holding answer 7 July 1988]:* I am advised that some of the polio vaccine used in the United Kingdom at that time contained simian virus 40. However, I am also advised that there is no evidence of adverse effects on recipients. In particular, two large studies conducted in the United States have shown no evidence of adverse effects on people who were given polio vaccine containing simian virus 40 in the late 1950s or early 1960s.

Mr. Rost: To ask the Secretary of State for Social Services (1) what is the percentage of people with AIDS who are antibody-positive to HIV;

(2) what is the percentage of people with AIDS in whom HIV can be isolated.

Mr. Newton *[holding answer 7 July 1988]:* Virtually all people with AIDS in the United Kingdom are HIV antibody positive. Techniques for isolating the human immunodeficiency virus (HIV) itself are still experimental and rates of isolation from people with AIDS vary from laboratory to laboratory. Some laboratories claim to have isolated the virus in more than 80 per cent. of patients with AIDS.

Mr. Rost: To ask the Secretary of State for Social Services (1) what is the percentage of people with AIDS in whom Epstein-Barr virus or antibodies to it can be isolated;

(2) what is the percentage of people with AIDS in whom cytomegalo virus or antibodies to it can be isolated;

(3) what is the percentage of people with AIDS in whom hepatitis B virus or antibodies to it can be isolated;

(4) what is the percentage of people with AIDS in whom herpes simplex virus or antibodies to it can be isolated;

(5) what is the percentage of people with AIDS in whom Epstein-Barr, cytomegalo, or herpes simplex-viral agents has been identified where no evidence of HIV has been found.

Mr. Newton *[holding answer 7 July 1988]:* This information is not available. Tests for these viruses and for antibodies to the viruses are not routinely performed.

Mr. Rost: To ask the Secretary of State for Social Services how many individuals who have been identified as HIV positive have subsequently been found not to be so.

Mr. Newton *[holding answer 7 July 1988]:* I understand that in a very few cases, particularly in the early days of testing, individuals were identified as being HIV antibody positive but were subsequently found not to be so when improved assay systems were available.

Mr. Rost: To ask the Secretary of State for Social Services (1) what attempts have been made by his Department to investigate claims, or support research, of the health-enhancing benefits of nutritional support, non-toxic herbal anti-viral treatment and lipid therapy for AIDS/ARC patients;

(2) whether, in relation to the alternative treatment of people with AIDS/ARC, there has been any trial of the formulation known as AL 721 (active lecithin);

(3) what attempts have been made by his Department to investigate the holistic approaches to AIDS; and what specific therapies, trials and research have been supported.

Mr. Newton *[holding answer 7 July 1988]:* We are not aware of any research being funded in these areas. I am advised that in individual cases of ARC and AIDS there may be a need for specific nutritional supplementation, but for the generality of cases there is no evidence that anything other than a good balanced diet is required. For reasons of commercial confidentiality, I am unable to comment on whether any manufacturer has applied for a product licence or clinical trial certificate for lecithin or any other potential treatment for AIDS.

Mr. Rost: To ask the Secretary of State for Social Services what consideration his Department has given to suggestions that some of the symptoms of AIDS could be the result of tertiary or quarternary neurosyphilis, and to the possibility that AIDS is unrecognised, untreated and mistakenly identified syphilis.

Mr. Newton *[holding answer 7 July 1988]:* I am advised that there is no evidence to support this view although some patients with AIDS may also be infected with syphilis and the clinical manifestations of syphilis may be, in some cases, modified by immunodeficiency associated with HIV infection.

Mr. Rost: To ask the Secretary of State for Social Services what evidence is available to him on any correlation between protein patterns in Waldenstrom's macroglobulinaemia, multiple myeloma and other immune and supposedly genetic disorders, and protein patterns in people with AIDS and ARC, and the association between these and those created by SV40 and PARA visuses in experimental studies.

Mr. Newton *[holding answer 7 July 1988]:* We are aware of no such evidence.

District Nurses

Ms. Harman: To ask the Secretary of State for Social Services if he will list, for each district health authority in England, the number of people nursed by the district nursing service per 1,000 of the population.

Mr. Newton *[holding answer 14 July 1988]:* The information for 1986 is given in the table.

It should be noted that part of the variation in the figures is due to differences in demand due for example to the proportion of elderly people in the population. (Around half of patients seen by district nurses are aged 65 or over). Also some health authorities use district nurses to provide a service in health centres and on GPs' premises, which of course produces a markedly higher contact rate than is possible if the same staff are used primarily for home visiting.

Number of persons treated by district nurses during 1986

Benefits

Mr. Nicholas Brown: To ask the Secretary of State for Social Services if he will publish figures showing, for each class A national insurance benefit and for each means-tested social security benefit, the numbers and proportions of claimants who are *(a)* women and *(b)* lone parents, giving the most recent figures.

Mr. Portillo *[holding answer 18 July 1988]:* The figures, in so far as they are available, are as follows:

Benefit	Date	Recipients who are women		Recipients who are lone parents	
		Number	Percentage of all recipients	Number	Percentage of all recipients
Retirement Pension	September 1987	6,352,000	65·3	n/a	n/a
Widows' Benefits	September 1987	367,000	100	54,000	14·7
Maternity Allowance	March 1987	332,000	100	n/a	n/a
Invalidity Benefit	April 1987	214,000	22·1	n/a	n/a
Sickness Benefit	April 1987	26,000	23·6	n/a	n/a
Unemployment Benefit	November 1987	250,000	37·0	n/a	n/a
Supplementary Benefit	May 1987	2,537,000	51·8	664,000	13·6
Family Income Supplement	April 1987	91,000	41	92,000	42
Housing Benefit	Autumn 1985	n/a	n/a	[1]630,000	[1]8·8

n/a—not available.
[1] subject to revision.

Perinatal Mortality

Mr. Fearn: To ask the Secretary of State for Social Services if he will publish the perinatal mortality rate for each year since 1968 by region.

Mrs. Currie *[holding answer 22 July 1988]:* The information is shown in the tables. Health authority areas were changed in 1974: the data prior to 1974 are not threefore directly comparable with those for 1974 onwards.

Perinatal mortality rates by hospital regions in England and Wales 1968-1973

Note: Perinatal mortality = stillbirths + deaths 0-6 days.
[1] Rate per 1,000 total births.
[2] Provisional.

TRANSPORT

Crash Barriers

Mr. Bellingham: To ask the Secretary of State for Transport whether he has any plans to measure the effectiveness of the current design of crash barriers on Britain's roads; and whether he has any plans to improve that design.

Mr. Peter Bottomley: The effectiveness of existing safety fence designs has been measured in research and monitoring actual performance for over 20 years.

New designs of safety fences have been developed. The case for their deployment is now being assessed.

Mr. Bellingham: To ask the Secretary of State for Transport (1) if he will make a statement on the effectiveness of central reservation crash barriers on Britain's dual carriageways;

(2) what recent steps his Department has taken to improve the effectiveness of crash barriers on roads.

Mr. Peter Bottomley: Existing safety fencing is designed to contain a 1·5 tonne vehicle travelling at 70 mph striking the fence at an angle of 20 degrees, and to redirect it safely. Extensive research and long experience have consistently shown that it performs at least as well as, and sometimes better than, this.

Inspection and maintenance regimes are in force during the installation and throughout the useful life of each safety fence. They will shortly be supplemented with mandatory quality assurance standards for contractors engaged in supplying and erecting fences. Such measures ensure that fences perform, and continue to perform, as effectively as they are designed to do.

The Department has developed a range of higher containment safety fences. We are currently looking at the costs and benefits of deploying them. The Department continues to keep all aspects of safety fence performance under close scrutiny. We will introduce further improvements whenever they can be justified.

Whatever their effectiveness, safety fences are not a substitute for safe driving.

Felixstowe Dock (Deposit of Material)

Mr. Andrew F. Bennett: To ask the Secretary of State for Transport if, in respect of the application he has received, from the Felixstowe Dock and Railway Company, for consents under section 7 of the Felixstowe Dock and Railway Act 1988, he will state (i) the date of the application, (ii) its nature, and (iii) whether it was accompanied by appropriate information as required under article 5 of European Community Directive 85/337 on environmental assessment.

Mr. David Mitchell: My right hon. Friend the Secretary of State received the company's application for consent to the first stage of reclamation for the extension of the port on 3 June 1988. This gave particulars about the matters set out in section 7(2) of the Act. He gave his consent on 12 July. The directive on environmental assessment does not apply to projects which have been specifically approved by Parliament.

Management in Government

Mr. Fry: To ask the Secretary of State for Transport what progress he has made towards the implementation in his Department of the recommendations in the efficiency unit's report entitled "Improving Management in Government: The Next Steps"; and if he will make a statement.

Mr. Channon: I am establishing the vehicle inspectorate as an executive agency with effect from 1 August. Copies of the policy and resources framework document, setting out the inspectorate's aims, objectives and responsibilities, have been laid in the libraries in this House and in the other place.

I am appointing Mr. Ron Oliver, a qualified mechanical engineer, who is the present head of the vehicle inspectorate, to be its first chief executive. I am delegating clear responsibility for day-to-day management of the inspectorate to him and his management team. Under the policy and resources framework, local management will have enhanced responsibilities in the areas of finance, contracts and personnel management and more scope to develop new business initiatives. It intends to introduce performance incentives and other necessary changes designed to encourage staff to increase efficiency to make more productive use of public assets and thereby improve services to the public. I expect that the scope of local management freedom and responsibilities will grow over time and I shall be ready to consider modifications to this policy and resources framework to reflect and encourage that process. In particular, we shall be reviewing the inspectorate's financial regime, in order to find ways of mirroring as closely as possible the financial disciplines of a private sector business.

Publication of the framework document itself represents an enhancement of accountability to Parliament and the inspectorate will in future publish an annual business plan, as well as its annual report and accounts. In order to ensure that letters to hon. Members are dealt with as quickly and effectively as possible, I have asked hon. Members to write direct to the chief executive in the first instance on questions which concern the inspectorate's handling of constituency cases concerning operational matters. I and my hon. Friend the Minister for Roads and Traffic will continue to deal with questions of policy or with any cases where hon. Members are dissatisfied with the inspectorate's reply.

The inspectorate is already working to specific unit cost targets agreed with the Treasury for 1988-89. I have now set the chief executive a further target to improve the cost efficiency of the inspectorate's main activities by 3·7 per cent. over the two-year period from 1 April 1989 to 31 March 1991. These savings will come both from specific efficiency measures and from the development of new initiatives and performance incentives within the executive agency framework.

I am pleased that the vehicle inspectorate is the first executive agency to be established, and I wish the chief executive and his staff every success in achieving their objectives and targets.

My Department continues to work towards establishing the driver and vehicle licensing directorate as an executive agency. In addition, I have commissioned a feasibility study of establishing the transport and road research laboratory as an executive agency and have asked my Department to develop executive agency proposals for the driver testing and training organisation (which conducts driving tests) and the vehicle and component approvals division (which carries out type approval tests).

West London (Schemes)

Mr. Soley: To ask the Secretary of State for Transport Lwhich houses would need to be demolished under each of the different schemes described in the Husband report on the west London environmental improvement route; and how many blight notices *(a)* have been accepted and *(b)* are under consideration.

Mr. Peter Bottomley: At this early stage I cannot add to the estimates set out in Husband's report.

To date 11 blight notices have been accepted and a further one is under consideration.

Mr. Soley: To ask the Secretary of State for Transport if any of the options proposed in stage 2 of the west London assessment study will be subject to the European Economic Community directive on environmental impact assessment.

Mr. Peter Bottomley: The European Community's directive on environmental impact assessment applies to the assessment of the environmental effects of those public and private projects which are likely to have significant effects on the environment. Any projects which are taken forward for more detailed consideration from stage 2 of the west London assessment study and which are likely to have significant effects on the environment will be subject to the directive. The assessment of options within stage 2 of the study will include consideration of their environmental effects.

Mr. Soley: To ask the Secretary of State for Transport which houses along the proposed western environmental improvement route are affected by the safeguarding line.

Mr. Peter Bottomley: The scope of a safeguarding line is defined by the Town and Country Planning General Development Order 1977. Planning applications relating to properties within 67 m of the safeguarded line must be referred to the Secretary of State for direction. Only a small proportion of these properties is likely to be affected by the proposals for WEIR.

Mr. Soley: To ask the Secretary of State for Transport what is the latest timetable for the western environmental improvement route from timing of studies to completion of proposed project; what public consultations are proposed and at what points; and what public information exercises are envisaged.

Mr. Peter Bottomley: The study into a western environmental improvement route started in 1984. The project is unlikely to be completed before the late 1990s. We hope to hold public consultations around the end of the year. I shall make an announcement nearer the time. We shall also be consulting widely on the west London assessment study next year.

Mr. Soley: To ask the Secretary of State for Transport if a public inquiry will be held should his Department decide to build the western environmental improvement route.

Mr. Peter Bottomley: The statutory highway procedures include provision for public inquiries to be held if there are unresolved objections.

Mr. Soley: To ask the Secretary of State for Transport what assessment he has made of the implications of the re-routing proposals in the west London assessment study for the local provision of public bus services; and if he will make a statement.

Mr. Peter Bottomley: It has been made clear that the preliminary set of options, including those with bus service improvements, will be assessed in detail by the consultants during the rest of stage 2. Their conclusions will be considered when stage 2 has been completed.

Mr. Soley: To ask the Secretary of State for Transport what are the options being considered in the west London assessment study as part of the western environmental improvement route.

Mr. Peter Bottomley: All the preliminary options examined in the west London assessment study are described in the working paper produced by Sir William Halcrow and Partners. Copies have been placed in the Library.

Mr. Soley: To ask the Secretary of State for Transport what proportion of the western environmental improvement route is being considered for a tunnel; and if he will make a statement.

Mr. Peter Bottomley: Most of the proposed route is in cutting. The consultants have been asked to explore the practicablity, costs and benefits of covering sections of the route.

Mr. Soley: To ask the Secretary of State for Transport how many residents of the Kensington constituency, selected by whom, are responsible for the comments in the public consultation document (Husband's study; technical note 1, App. 1B, group discussions with residents, vol. 1B, Holland Park/north Kensington); if there are plans for further consultations; what plans there are for ensuring that the public receives further information; how many copies of the full Husband's report have been printed; and who received these copies.

Mr. Peter Bottomley: The appendix referred to was not produced by Husband and Co. It is one of the technical appendices produced by Sir William Halcrow and Partners as part of their report on problems in stage 1 of the west London assessment study. Full details of the coverage of public consultation and the methodology adopted are set out in technical note 1, copies of which have been sent to borough councis and placed in the main libraries in the study area.

Husband and Co. published in September 1987 a report on the appraisal of options for the proposed western environmental improvement route, of which 200 copies were printed. Copies were distributed as follows:

Local public libraries in the area
Local authorities in the area
Members of Parliament in the area
House of Commons and House of Lords Libraries
Executive authorities such as BR and LUL Ltd
Select Committee on Transport
London Research Library
Consultants for the West London Assessment study.

About 60 copies have been sold to individuals or groups interested in the scheme.

Additionally, 1,500 copies of a summary were produced and have been distributed to individuals and groups interested in the scheme.

I have said there will be further consultation with the public about the scheme.

Disabled People

Mr. Tom Clarke: To ask the Secretary of State for Transport what steps he intends to take to improve transport services for disabled persons.

Mr. Peter Bottomley: The Department of Transport has a firm and continuing commitment to a programme of research, technical and policy development, education and information dissemination to improve transport services for people with disabilities. In all these areas we work in close association with the Disabled Persons Transport Advisory Committee.

New Roads (Housing Proximities)

Mr. Soley: To ask the Secretary of State for Transport what figure his Department uses as the minimum desirable distance between houses and a new major road; and what guidance or regulations have been issued on this subject.

Mr. Peter Bottomley: In planning roads the distance from houses is determined on the basis of careful assessment of all the relevant safety and environmental factors.

In practice, people object if a road comes within half a mile and apply for permission to build up to the highway boundary.

Channel Tunnel

Mr. David Porter: To ask the Secretary of State for Transport what studies his Department has carried out into likely road usage in Suffolk and Norfolk after the opening of the Channel tunnel; and if he will make a statement.

Mr. Peter Bottomley: The effects on road usage in Suffolk and Norfolk after the opening of the Channel tunnel are not likely to be significant.

London (Traffic Congestion)

Mr. French: To ask the Secretary of State for Transport what representations he has received from motoring organisations about ways of reducing traffic congestion in London; and if he will make a statement.

Mr. Peter Bottomley: None recently. We work to reduce traffic congestion in London by progressing the trunk road programme, supporting the boroughs with their transport policies and programmes, promoting better traffic management, encouraging better parking controls and working with BR and LRT to improve the quality of their services.

Mr. French: To ask the Secretary of State for Transport if he will commission a study into the provision of underground tunnels in London to reduce traffic congestion.

Mr. Peter Bottomley: I have no plans to commission a special study. In addition to the measures already in hand to reduce traffic congestion in London, consultants for the London assessment studies are developing a range of options for relieving problems in the four study areas. Some of these options could include proposals for tunnels to relieve traffic congestion.

East London River Crossing

Mr. Cartwright: To ask the Secretary of State for Transport what representations he has received about the incorporation of a Docklands light railway extension to Thamesmead into the proposed east London river crossing scheme; and if he is considering such a proposal.

Mr. Channon: Such proposals were put forward during and after the public inquiries into the east London river crossing scheme. My right hon. Friend the Secretary of State for the Environment and I are considering all these proposals. We hope to announce our decisions very shortly.

M1 Traffic Flows

Mr. Marlow: To ask the Secretary of State for Transport what is the current average hourly flow at junction 12 of the M1 in both directions; and what estimate he has of these flows immediately subsequent to the completion of the M40.

Mr. Peter Bottomley: The latest information available, for 1987, shows an average hourly two-way flow immediately north of junction 12 of 4,040 vehicles.

After completion of the M40 extension, expected in 1992, it is estimated that the hourly flow will be in the range 3,730 to 3,910 vehicles. This represents a reduction of between 540 and 630 vehicles per hour.

A6 Disley Bypass

Mr. Tony Lloyd: To ask the Secretary of State for Transport under what circumstances he will *(a)* publish or *(b)* make available to Derbyshire county council the reports by the landscape advisory committee and the report of the consulting engineers on the A6 Disley bypass.

Mr. Peter Bottomley: In accordance with the policy set out in the "Report on the Review of Highway Inquiry Procedures 1978" (Cmnd. 7133), the Department will make the reports available for inspection by objectors to any orders published under the Highways Acts.

Mr. Tony Lloyd: To ask the Secretary of State for Transport if he will make a statement on his recent meeting with Derbyshire county council to discuss the A6 Disley bypass.

Mr. Peter Bottomley: It explained its reservations about the "brown route"—in particular its opinion of effects on the landscape; the severance problems and the difficulties for Swizzells Matlow in New Mills; and the likely high cost of the scheme due to unusual geological features in the area. I explained the environmental reasons for putting forward the brown route. I undertook to consider all the county council's comments and suggestions for alternatives before making decisions on whether a scheme should be added to the roads programme and on choice of route. I explained that if the scheme were added to the programme the standard procedure would be for all objections and representations to be aired before an independent inspector, who would make recommendations to my right hon. Friends the Secretaries of State for Transport and for the Environment.

P and O Ferries

Mr. Tony Lloyd: To ask the Secretary of State for Transport (1) if he will make a statement of the condition of the P andO ferry European Clearway;

(2) if he will make a statement on the recent fire on board the ferry European Clearway.

Mr. David Mitchell: One of my Department's marine surveyors is investigating the circumstances surrounding the fire on the European Clearway and he will be completing his report as soon as possible.

Mr. Tony Lloyd: To ask the Secretary of State for Transport if he will arrange for an independent inquiry into operational safety aboard P and O cross-Channel ferries.

Mr. David Mitchell: No. My marine surveyors are monitoring safety standards on all cross-Channel ferries.

North Sea Oil and Gas (Safety)

Mr. Meacher: To ask the Secretary of State for Transport how many safety inspectors were employed by his Department on the inspection of North sea oil and gas installations and related equipment in each year since 1965.

Mr. David Mitchell: The figures are not available in the form requested. However, since 1976 an average of around 12 to 15 surveyor years per annum have been devoted to the survey of fire-fighting equipment and life-saving appliances on those installations.

M4 (Traffic)

Dr. Glyn: To ask the Secretary of State for Transport what estimate he has made of the increased traffic on the M4 as a result of the authorisation to use Heathrow for charter flights.

Mr. Peter Bottomley: My right hon. Friend the Secretary of State does not expect road traffic volumes to be significantly affected. The concession allowing the use of Heathrow airport by whole plane charter services is designed to apply only in exceptional circumstances, where holidaymakers would otherwise face unacceptable delay. The concession will end on 30 September. This relaxation in our air traffic distribution policy for the London airports will offer a useful measure of flexibility in dealing with the difficult travel circumstances such as we have seen over recent weekends.

Written Answers to Questions

Tuesday 26 July 1988

EDUCATION AND SCIENCE

Recruitment Monitoring

Mr. Janner: To ask the Secretary of State for Education and Science when he expects the monitoring exercise on recruitment begun in July 1987 to be completed; and whether he will then place a copy of the result in the Library.

Mrs. Rumbold: The recruitment monitoring exercise which began in July 1987 is part of a central initiative co-ordinated by the OMCS. The figures for the initial stage of the exercise from July to December 1987 were submitted to the OMCS earlier this year; the next batch of figures should be compiled by the end of this year.

The results for the Civil Service as a whole will be collated by OMCS; it will therefore be for the Minister for the Civil Service to decide in what form the results are published.

Ethnic Monitoring

Mr. Janner: To ask the Secretary of State for Education and Science in what quasi-governmental bodies or other organisations under his aegis he has authority to request or require the carrying out of ethnic monitoring exercises in accordance with the code of the Commission for Racial Equality; and what ethnic monitoring and equal opportunities exercises have been carried out by each such department.

Mrs. Rumbold: My right hon. Friend does not prescribe the day-to-day personnel management policy of the non-departmental public bodies sponsored by the Department. Nevertheless, he would expect them to bear in mind the code of practice for the elimination of racial discrimination and the promotion of equality of opportunity in employment as recommended by the Commission for Racial Equality.

Mr. Janner: To ask the Secretary of State for Education and Science (1) how many of those who responded to his recent ethnic origin survey and stated that they were in grades 1 to 7 were in grades 1, 2, 3, 4, 5, 6 and 7, respectively;

(2) how many of those who responded to his recent ethnic origin survey were senior executive officers and higher executive officers, respectively.

Mrs. Rumbold: The survey was conducted on the undertaking that anonymity would be preserved. Any further breakdown from that given to the hon. and learned Member on 23 June could identify individuals and I am unable therefore to provide the information requested.

Equal Opportunities

Mr. Janner: To ask the Secretary of State for Education and Science how many of the equal opportunities officers appointed for his Department are *(a)* women, *(b)* from ethnic minorities, or *(c)* both.

Mrs. Rumbold: There are two equal opportunities officers for the Department; one is male, one is female, neither is from ethnic minorities.

Schoolchildren (Qualifications)

Mr. McGrady: To ask the Secretary of State for Education and Science if he will list the percentages of the total post-primary school population in England and Wales who have attained passes in qualifications such as City and Guilds and B Tec certificates in each of the years 1985, 1986 and 1987.

Mrs. Rumbold: The information is not available. Information for Wales is the responsibility of my right hon. Friend the Secretary of State for Wales.

Mr. McGrady: To ask the Secretary of State for Education and Science if he will list the percentages of the total post-primary school population, in England and Wales who have attained passes at each grade level, including upgraded status, in CSE and GCE O and A-level in each of the years 1985, 1986 and 1987.

Mrs. Rumbold: Information in the form requested is not available. Information for Wales is the responsibility of my right hon. Friend the Secretary of State for Wales.

Members' Correspondence

Mr. Tom Clarke: To ask the Secretary of State for Education and Science what is the average length of time taken by his Department to respond to right hon. and hon. Members' correspondence during the summer recess.

Mrs. Rumbold: Information is not available for the period of the summer recess alone. However, during the period July to October 1987 the Department received over 5,000 letters which required a ministerial reply. Much the greater part of these were from right hon. and hon. Members. The average time taken for replies was 25 days.

Schools (Inspections)

Mr. Andrew Mitchell: To ask the Secretary of State for Education and Science (1) whether Her Majesty's Inspectorate reports on the quality of teachers in schools which it inspects;

(2) how many schools in the Gedling constituency have been inspected by Her Majesty's inspectors in the last two years and have been the subject of a written report;

(3) how many schools per year Her Majesty's Inspectorate inspects; and on how many of these a written report is produced;

(4) how many years at present rates of progress it will take for Her Majesty's Inspectorate of Schools to produce a written report on all British schools.

Mrs. Rumbold: Her Majesty's Inspectorate always issued reports after formal inspections, and since 1983 those reports have been published. In addition, many other informal visits to schools are made by Her Majesty's

Inspectorate in the course of its day-to-day work which do not result in published reports. Arising from inspections of schools begun in 1986 and 1987, a total of 187 and 144 reports have been published to date respectively. These exclude the reports of surveys involving more than one school, a number of which have also been published. In each of these years Her Majesty's Inspectorate visited some 5,000 schools.

Given that there are over 23,000 schools in England, not including special schools and units, and that there are only about 350 schools Her Majesty's inspectors, the inspectorate does not set out to inspect and produce a report on every school on a regular basis. However, on average each primary school in England is visited informally every six years, and each secondary school every two years.

The selection of schools for formal inspection is determined by the need to retain on a simple basis a national overview, and for Her Majesty's Inspectorate to report in a timely and useful fashion on specific matters of national interest such as the GCSE or the TVEI.

No schools have been formally inspected in the Gedling constituency within the last two years. Reports were, however, issued on Gedling comprehensive school in January 1986 and on Arno Vale junior school in July 1985, and informal visits have been made to three primary and two secondary schools in the last year.

Her Majesty's Inspectorate reports include judgments about the general quality of teaching observed in schools, but not about individual teachers.

Nursery Education

Mr. Wray: To ask the Secretary of State for Education and Science (1) what is the number of under-fives who received nursery education in the whole of the United Kingdom for each year since 1974;

(2) what information he has as to the proportion of education expenditure dedicated to nursery education in percentages in *(a)* Belgium, *(b)* Canada, *(c)* Denmark, *(d)* France, *(e)* the Federal Republic of Germany, *(f)* the Netherlands, *(g)* Portugal, *(h)* Spain, *(i)* the United Kingdom and *(j)* Sweden;

(3) what information he has on the per capita expenditure on nursery education for each year since 1974, in *(a)* Belgium, *(b)* Canada, *(c)* Denmark, *(d)* France, *(e)* the Federal Republic of Germany, *(f)* the Netherlands, *(g)* Portugal, *(h)* Spain, *(i)* the United Kingdom and *(j)* Sweden.

Mrs. Rumbold *[holding answer 25 July 1988]:* The forms of pre-compulsory provision vary between and within countries, as does practice in the age and times of year at which children are admitted to compulsory education. For the United Kingdom this is five years of age, whereas for other countries it is six or even seven. For the United Kingdom, available data for pupils aged under five in education are as follows:

The numbers of children aged under 5[1] benefiting from pre-compulsory education—United Kingdom

	1975-76	*1984-85*	*1985-86[2]*	*1986-87[3]*
Total pupils[4] (thousands)	576·0	676·4	670·7	680·7
Participation rate[5] per cent.	34·5	46·4	46·7	47·6

Source: Education Statistics for the United Kingdom, 1988 Edition Table 16.
[1] Ages at 31 December.
[2] Includes 1984-85 data for Scotland.
[3] Includes 1987-88 data for Scotland.
[4] Part-time pupils counted as one.
[5] As a percentage of all children aged 3 or 4.

For maintained schools in England, pupils aged under five can be provided by the three types of schooling as follows:

The numbers of children aged under 5 benefiting from pre-compulsory education—England

Thousands

	1975-76	*1984-85*	*1985-86*	*1986-87*
Pupils[1] in nursery schools and nursery classes in primary schools	157·6	266·9	272·5	276·2
Other pupils aged under 5 in infant classes in primary schools	282·4	245·6	236·1	240·6
All pupils	440·0	512·6	508·6	516·8
Participation rate[2] per cent.	32·0	43·2	43·3	43·8

Source: Statistical bulletin 4/88, Table 2.
[1] Part-time pupils counted as one.
[2] As a percentage of all children aged 3 or 4.

Data for intermediate years are published in previous editions of education statistics for the United Kingdom; for England, "Statistics of Education—Schools"; their associated statistical bulletins (latest 1/88, 6/88 respectively); and 4/84. These publications are available in the House of Commons Library.

The information in the tables excludes day-care nurseries and playgroups which are registered with local health authorities.

Information on per capita expenditure on pre-compulsory education is not available. The percentages of public expenditure allocated to pre-compulsory education in the overseas countries mentioned are as follows:

Public[1] sector current expenditure on pre-compulsory education as a percentage of all current public expenditure

Country[2]	*Year*	*Age at which compulsory schooling starts*	*Percentage pre-school level*	*Percentage not distributed by level*
France[3]	1982	6	8·4	5·5
Germany, Federal Republic of	1984	6	3·5	4·3
Netherlands	1984	6	5·2	7·1
Portugal	1983	6	0·1	4·5
Spain	1979	6	3·5	2·6
United Kingdom	1984	5	2·6	9·0
Sweden	1984	7	0·1	7·9

Source: UNESCO Statistical Yearbook.

[1] It should be noted that in some countries the division between public and private sectors can be blurred, as some Governments may subsidise private arrangements.

[2] Expenditure on pre-school education is not separately identified for Belgium, Canada and Denmark.

[3] Metropolitan France.

ATTORNEY-GENERAL

Japanese War Criminals

Mr. Ashley: To ask the Attorney-General if the Lord Chancellor will make it his policy to release all hitherto unreleased material at the Public Record Office relating to the Soviet trial of suspected Japanese war criminals at Khabarovsk on charges arising from bacteriological warfare and illegal medical experiments on human beings.

The Attorney-General: The full reports from the British embassy in Moscow on the Soviet trial at Khabarovsk in December 1949 are among Foreign Office records which have already been released to the Public Record Office, Kew, where they are available for inspection.

Hon. Member for Edinburgh, Leith (Prosecution)

Mr. Ron Brown: To ask the Attorney-General what was the cost to public funds associated with the action by the Director of Public Prosecutions in taking over and subsequently discontinuing the private prosecution brought recently against the hon. Member for Edinburgh, Leith at Telford Crown court.

The Solicitor-General: The action taken by the Director of Public Prosecutions added less than £10 to the normal departmental running costs of the Crown Prosecution Service.

House Sales

Mr. Michael: To ask the Attorney-General what consideration he has given to introducing to England and Wales, in whole or in part, the Scottish system of house sales; what consultations he has had on this possibility; and if he will make a statement.

The Attorney-General: The advantages and disadvantages of using Scottish house purchase procedures in England and Wales were recently considered fully by the conveyancing standing committee at the Law Commission. Such procedures are available for use in England and Wales without the need for amending legislation. The committee has produced an explanatory guide for conveyancers and their clients showing how such procedures may be used.

Mr. Michael: To ask the Attorney-General what proposals he has to end the practice known as gazumping; and whether he will make a statement.

The Attorney-General: I refer the hon. Member to the reply which I gave to my hon. Friend the Member for Mid-Staffordshire (Mr. Heddle) on 30 June, at column *295*.

TRADE AND INDUSTRY

Manufacturing

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster what was the annual increase or decrease in *(a)* world trade in manufacturing, and *(b)* the British share of world trade in manufacturing, for each year since 1979.

Mr. Alan Clark: Information based on the exports of the main manufacturing countries is in the table:

Exports of manufactures—volume (main manufacturing countries)

	Changes on previous year	
	MMC Exports	*United Kingdom Share*
	percentage	*percentage*
1979	5·3	−5·7
1980	4·8	−3·6
1981	2·7	−8·4
1982	−2·6	4·5
1983	2·6	−2·9
1984	9·8	−0·4
1985	4·8	1·3
1986	1·4	1·4
1987	4·4	3·7

Sources: United Kingdom—Department of Trade and Industry; Others—OECD; UN.

Soviet Union

Sir Dudley Smith: To ask the Chancellor of the Duchy of Lancaster what new opportunities of trade with the Soviet Union have arisen since the announcement of the new policies of Mr. Gorbachev; and if he will make a statement.

Mr. Alan Clark: The economic reforms announced by Mr. Gorbachev are bringing fundamental changes to the management of Soviet foreign trade. Responsibility has been decentralised and a number of industrial ministries and state enterprises have been granted foreign trade rights, providing opportunities for stronger links between foreign suppliers and end users. Higher priority has been given to imports of equipment which will modernise and increase the efficiency of Soviet industry, assist import

substitution and increase Soviet exports. Joint ventures and technical co-operation agreements are now actively encouraged. Banking reforms are creating opportunities for more flexible financing arrangements. None the less, the Soviet Union remains short of hard currency, and companies should be prepared to be flexible in their negotiations.

Aerosols

Mr. McCartney: To ask the Chancellor of the Duchy of Lancaster if he will make a statement on progress in drawing up a code of practice on reducing chlorofluorocarbons and halon emissions from new aerosols' sources in order to fulfil recommendations of the ozone group of scientists.

Mr. Atkins: As my hon. Friend the Parliamentary Under-Secretary of State for the Environment announced on 14 June, at columns *137-38*, the Government will be studying the second report of the stratospheric ozone review group as soon as it is available. We have taken very careful note of the executive summary, but will examine the points raised in their fullest context.

House of Fraser (Holdings) plc

Mr. Tim Smith: To ask the Chancellor of the Duchy of Lancaster when he now expects the inspectors appointed to investigate the affairs of House of Fraser (Holdings) plc to report.

Mr. Maude *[pursuant to his reply, 25 May 1988, c. 179.]:* The report of the inspectors appointed to investigate the affairs of House of Fraser Holdings plc was received on Saturday 23 July and is being studied.

PRIME MINISTER

Shetton on Dunsmore

Q108. **Mr. Pawsey:** To ask the Prime Minister if she has any plans to visit Shetton on Dunsmore, near Rugby.

The Prime Minister: I have at present no plans to do so.

Canada

Q131. **Mr. Cryer:** To ask the Prime Minister when she next expects to pay an official visit to Canada.

The Prime Minister: I have at present no plans to do so.

National Health Service

Q170. **Mr. Harry Ewing:** To ask the Prime Minister if, following her visit to Aberdeen on Friday 8 July, she will indicate what role she envisages for the National Health Service in situations when there has been a major disaster.

The Prime Minister: In the United Kingdom the response to most peacetime emergencies, whether natural or man-made, is based on the principle that those best placed to decide what needs to be done and then to manage the remedial action are people at the site of the emergency who know both the problems and the resources available. Consequently, for the immediate response there is heavy reliance on contingency plans made by local emergency services, health and local authorities, public utilities and the operators of industrial and other sites.

The health services' special role is to get injured people to the nearest hospital offering the particular services they need as quickly as possible. Guidance on major incident planning, which is constantly reviewed, has been issued to the health services by the Department of Health and Social Security and the territorial Departments. This guidance stresses the need for the plans of health authorities to be as flexible as possible, since no two major accidents are identical. Nor can it be foreseen how any particular situation may develop. It also advises that plans should be reviewed regularly with the other emergency services in the light of local discussions and circumstances.

Mine Clearance (Gulf of Suez)

Mr. Mates: To ask the Prime Minister whether an award is to be made to members of the armed forces and civilians who were engaged in mine clearance in the Gulf of Suez in 1984.

The Prime Minister: In recognition of outstanding service, and with special regard to the hardships and dangers which accompanied duty there, for both service men and Merchant Navy personnel, Her Majesty the Queen has graciously approved the award of the General Service Medal 1962 with "Mine Clearance—Gulf of Suez" clasp. A Command Paper (Cm. 436) is being laid before the House today.

Advisory Committee on Business Appointments

Sir Peter Blaker: To ask the Prime Minister if she will make an announcement about the chairmanship of the advisory committee on business appointments.

The Prime Minister: My right hon. and noble Friend the Lord Carlisle of Bucklow, QC, has accepted my invitation to succeed the right hon. and noble Lord Diamond as chairman of the advisory committee on business appointments with effect from November 1988. I wish to express the Government's appreciation of Lord Diamond's service as chairman of this committee under successive Governments since its inception in 1975.

Efficiency Unit

Mr. Tim Smith: To ask the Prime Minister what topics have been covered in the efficiency unit's scrutiny programme in the last financial year.

The Prime Minister: The 1987-88 programme of scrutinies carried out in association with Sir Robin Ibbs and the efficiency unit included:

Ministry of Agriculture, Fisheries and Food
Enforcement of Milk and Dairy Regulations

Her Majesty's Customs and Excise
The London Problem

Ministry of Defence
Arrangements for financing the British Forces in Germany
Non-nuclear Research Establishments as an agency

Department of Employment
Enterprise Allowance Scheme

Department of the Environment
Planning enforcement appeals

Foreign and Commonwealth Office

FCO/DS administration and support services
Local budgets

Department of Health and Social Security
Social Security Regional Organisation

Inland Revenue
Procedures in the Enforcement Office
Scheme for the sub-contractors in the construction industry

Department of Health and Social Services (Northern Ireland)
Social security fraud

Scottish Office
Historic buildings and monuments

Department of Transport
Management of property purchased for road schemes
Local roads capital expenditure

Welsh Office
Cash releasing cost improvement programme in the NHS in Wales

Several of these are continuing. Further topics for scrutinies are being discussed with Departments.

Other scrutinies are being conducted alongside the central programme according to scrutiny disciplines and with guidance from the efficiency unit. These are:

Department of Health and Social Security
Printing and publications (postponed from 1986-87)

Metropolitan Police
Traffic wardens
Staff suggestions
Special Constabulary

Engagements

Mr. Cran: To ask the Prime Minister if she will list her official engagements for Tuesday 26 July.

Mr. Barry Jones: To ask the Prime Minister if she will list her official engagements for Tuesday 26 July.

Mr. Stern: To ask the Prime Minister if she will list her official engagements for Tuesday 26 July.

Mr. Pike: To ask the Prime Minister if she will list her official engagements for Tuesday 26 July.

The Prime Minister: This morning I had meetings with ministerial colleagues and others. In addition to my duties in the House, I shall be having further meetings later today, including one with Mr. Paul Obeng, chairman of the committee of secretaries of Ghana.

Religious Discrimination

Mr. Wray: To ask the Prime Minister what information she has as to which European countries by law prevent (i) Roman Catholic citizens and (ii) citizens of any other Christian denomination from holding *(a)* the position of Head of State, *(b)* the position of Head of Government and *(c)* other high public functions.

The Prime Minister *[holding answer 14 July 1988]:* Outside the United Kingdom, in Denmark, Sweden and Norway Roman Catholics are prevented from becoming Head of State because of the constitutional requirement that the monarch must profess the Protestant faith. The Holy See is of course a special case. There are no European countries in which Roman Catholic citizens or citizens of any other Christian denomination are prevented by law from occupying the position of Head of Government or other high public functions. This is also the formal position in the Communist countries of Eastern Europe, but in practice nearly all senior posts are held by Communist party members. This effectively precludes from high office those who openly profess a religious belief.

TRANSPORT

Traffic Flow (Greater London)

Mr. Spearing: To ask the Secretary of State for Transport if he will place in the Library any map in his possession which shows *(a)* the maximum daily or hourly flow of vehicles on the major roads in Greater London and *(b)* the locations of current congestion and the periods over which it generally takes place.

Mr. Peter Bottomley: No maps showing maximum flows are available. I refer the hon. Member to the Department's "Statistics Bulletin" (87)37, which shows average daily flows for trunk roads.

This publication also includes charts showing average speeds on the strategic network. More recent information on the central area is given in "Statistics Bulletin" (87)41. I also refer the hon. Member to the stage 1 reports of the four London assessment studies.

I am placing in the Library maps showing locations of congestion identified by the Metropolitan police in 1987 on an adjoining trunk road for morning, evening and inter-peak periods.

Ministerial Duties (Rail Travel)

Mr. Steinberg: To ask the Secretary of State for Transport how many times in the last six months in the course of his ministerial duties he has travelled by rail; and what has been the cost to public funds of delay or diversion interrupting his ministerial duties on such journeys.

Mr. Channon: Since the beginning of this year I have made 11 journeys by rail in the course of my ministerial duties. None suffered delays or diversions involving public expenditure.

London Underground

Mr. Steinberg: To ask the Secretary of State for Transport what information he has as to the average time taken by London Underground to replace an escalator.

Mr. Channon: This is a management matter for the board of London Underground Limited.

Members' Correspondence

Mr. Tom Clarke: To ask the Secretary of State for Transport what is the average length of time taken by his Department to respond to correspondence from right hon. and hon. Members during the summer recess.

Mr. Peter Bottomley: A recent review of ministerial correspondence in the Department of Transport (September 1987) showed that 86 per cent. of such letters are replied to with an average response time of 15 working days. Ministerial colleagues and I aim to deal with all inquiries in three weeks. Some complex questions do inevitably take longer.

It takes the same length of time for the Department of Transport to respond to right hon. and hon. Members' correspondence during the summer recess as in Session time.

Road Traffic Law

Mr. Heathcoat-Amory: To ask the Secretary of State for Transport what progress the Government have made in considering the recommendations of the North report on road traffic law.

Mr. Channon: The Government have taken an initial look at all the report's 137 recommendations and have sought comments from all the main interested organisations. We need to take account of the considered views of others and do more detailed work before reaching final decisions.

We have been able to form a view in principle on much of the report.

We recognise the importance of taking forward further work urgently, given the vital role of road traffic law in efforts to reduce the continuing high level of road casualties.

The Existing Structure

We accept the conclusion of the review that the present reckless driving offences do not operate satisfactorily in England and Wales and are interpreted differently in Scotland. Change is required.

There are a number of options. We will want to consider the views of others before deciding whether to adopt the detailed approach recommended by the review.

We support the review's emphasis on a proportionate response to offences, marking out serious criminal behaviour and recognising the nature of more minor offences.

In particular we support the full use of alternatives to prosecution—for example, the greater use of roadside warnings—and have sought opinions on the detailed recommendations.

Drinking and Driving

Society takes an increasingly serious view of the driver who drinks and drives.

We accept the review's basic conclusion that a way must in particular be found to ensure that convictions can be secured and that appropriate penalties are available to the courts for people who drink and drive with tragic consequences.

We are considering whether the review's detailed recommendation for a new offence of causing death when over the legal limit for alcohol is the best means of securing this aim. Other recommendations also have a bearing on this major problem.

We agree that insurance policies against disqualification are undesirable. My right hon. Friend the Secretary of State for Trade and Industry is discussing with the insurance industry how the offering of such policies might best be brought to an end.

The practicability of the review's proposal that licensing authorities should take account of evidence of licensees persistently serving alcohol to customers committing drink-driving offences needs further study.

The Government will continue to support the constructive and successful initiatives we have seen recently by brewers and licensees, promoting non-alcoholic and low-alcoholic drinks.

The Bail Acts may be used to impose conditions on an accused which appear necessary to secure that an offence is not committed while on bail. If the court perceives a real risk of an offence being committed whilst an accused is on bail, it could impose conditions which precluded driving.

We have sought further views on the review's proposals to encourage the use of the Bail Acts in this way for some drink-drive offenders.

Disqualification

We agree with the conclusion that disqualification from driving is a proper response to irresponsible behaviour on the roads, including drink-related driving offences.

The review stresses the importance of improving the effectiveness of disqualification as a penalty. On the possibility of using more short periods of disqualification, we have asked for views and are investigating the administrative changes needed if disqualifications of two months or less were imposed more widely.

Failure to Stop After an Accident

Convictions for the offences of failure to stop after or report an accident have become more common in recent years.

There are grounds for believing that this increase may be linked to attempts to avoid prosecution for drinking and driving. We are considering the review's proposal that this offence should be imprisonable.

We intend, as quickly as possible under regulations, and as part of a number of penalty points changes, to increase the level of penalty points for the offence to a new, higher range of eight to 10.

Penalty Points

We accept the review's conclusion that a major restructuring of the penalty points system is not necessary.

We accept in principle the recommendations for court discretion to impose more points in serious cases of speeding.

We accept in principle the suggestion that a period of disqualification should no longer remove all previously imposed penalty points from the offender's licence.

We have decided that the points for the offence of driving without insurance should be six to eight instead of the present four to eight. For careless driving the range should change from two to five to three to nine. These are changes which will be made now.

Retesting and Retraining

We accept the principle in the report that retesting of driving offenders should be more widely used. We will want to consider further the suggested criteria for retesting; the type of test which would be suitable; and the implications for the driver testing organisation.

We accept that retraining of motoring offenders is an option that ought to be properly investigated to test its effectiveness in reducing reoffending. The time scale for such an experiment is long.

We are exploring the practicalities of undertaking some useful experimental schemes in advance of the legislation which will be needed.

Condition of Vehicles, Driving Licensing

We accept in principle the recommendations relating to restructuring offences on the condition and use of vehicles and to widening powers to prohibit the movement of dangerous vehicles. These should simplify the law and improve enforcement.

The proposals to clamp dangerous vehicles, and to use clamping in certain other circumstances, will need further careful consideration in the context of policy on vehicle clamping more generally. We agree that the driver licensing offences need to be restructured to simplify them and to reflect the relative seriousness of the different offences. The details will be addressed in further work.

Availability of Information

The review suggests that the Government should investigate ways of providing police officers on patrol with faster access to existing information about drivers and their vehicles. We support this aim.

Detailed work, some of which depends on the introduction of more advanced information technology, will be undertaken as part of the development and implementation of the second stage police national computer.

We shall need to satisfy ourselves that the resultant benefits will justify additional costs.

We have sought detailed views on the proposal that there should be a charge for checking a driving licence at a police station in order to encourage people to carry their driving licences.

Enforcement Technology

Technology has an important role to play in enforcement. We endorse the review's conclusion in principle that the use of cameras to detect speeding and red light offences is acceptable, and that satisfactory procedures can be developed for using the evidence from such devices.

We intend to press ahead with testing the equipment in consultation with the police, and examining its costs and benefits in order to assess the extent to which such equipment might be used and the timing of its introduction.

We accept the recommendation for a more co-ordinated approach to research between Government Departments in co-operation with the police in this field.

Knowledge of The Law

The Government recognise the importance of increasing public knowledge and understanding of traffic law. Preparation of a new layman's guide which the review recommended must await completion of the primary legislation which will be needed to implement the main changes to road traffic law which are now envisaged. The Government will consult widely on its content.

The report contains a number of other recommendations on which we are at present consulting. We shall continue to work on all the recommendations with a view to announcing our conclusions on the report as a whole early in the new year.

PSO Grant

Mr. Fallon: To ask the Secretary of State for Transport if he will make an announcement about the public service obligation grant to the British Railways Board for 1988-89.

Mr. Channon: The public service obligation grant, which constitutes the central Government support for British Rail's services on the Network SouthEast and provincial sectors, will be £572·5 million for 1988-89. The settlement will, as usual, be subject to adjustment for certain factors to be settled with the British Railways Board.

P and O Ferries

Mr. David Shaw: To ask the Secretary of State for Transport if he will make a statement about his Department's investigation into the allegations that the P and O ferry, Free Enterprise II sailed with her bow doors open in November 1987.

Mr. Channon: My Department has carried out a thorough investigation into the alleged incident. As I informed the House on 16 May, at column 659, the ship was not sailing from port but moving from one berth to another within the confines of the harbour. The investigation concluded that the manoevre did not present any danger to the ship or to anyone on board. Moreover, there was no contravention of the statutory requirements and no offence was committed.

Mr. Tony Lloyd: To ask the Secretary of State for Transport if he will make a statement about radio communication aboard the P and O ferry European Trader.

Mr. Portillo *[holding answer 25 July 1988]:* A qualified radio officer is required on board this vessel, and the radio communications equipment fully complies with statutory requirements.

Vehicle Batteries

Mr. Alton: To ask the Secretary of State for Transport how many people were injured by exploding vehicle batteries in the last year for which figures are available.

Mr. Peter Bottomley *[holding answer 25 July 1988]:* No statistics are available. I understand that accidents of this kind are likely to be very rare in this country.

I shall be replying shortly to the hon. Member's correspondence about vehicle batteries.

London Underground (Fire Safety)

Mr. Dobson: To ask the Secretary of State for Transport on what date his Department received London fire brigade inspection reports on the London Underground deep underground stations in 1987 and in each of the preceding five years.

Mr. Portillo *[holding answer 25 July 1988]:* None was received in 1987. The last report received from the London fire brigade of one of its inspections of London Underground stations was dated 10 May 1983 and was received on 16 May 1983. After that date the system of reporting the results of fire inspections changed and

reports were no longer sent to the railway inspectorate. London Underground Limited took on the task of recording the results of fire inspections. It did not initially adopt the practice of sending copies of its own reports to the railway inspectorate. Subsequently, as part of its investigations into the fire at Green Park, the inspectorate asked that the fire reports should again be sent to it. Those for the intervening period were received in bulk and thereafter as each report arises.

Small Cars (Exhaust Fumes)

Mr. Thurnham: To ask the Secretary of State for Transport what representations he has received about proposals to limit toxic exhaust fumes from small cars; if his Department is studying proposals being considered by the European Community; and if he will make a statement.

Mr. Peter Bottomley *[holding answer 25 July 1988]:* The vehicle manufacturers were closely consulted over the proposals. They made it clear to the Government that they regarded an early settlement on the basis of these proposals as preferable to a delay in agreement.

My hon. Friend the Parliamentary Under-Secretary of State for the Environment announced on 30 June, at column 368, that a political agreement by qualified majority, and subject to a United Kingdom parliamentary scrutiny reserve, was reached at the 28 June Environment Council. More complete details of the proposal and the agreement are in the supplementary explanatory memorandum 4637/88, COM(87)706 dated 8 July 1988.

NATIONAL FINANCE

Lord Chancellor's (Pension)

Mr. Campbell-Savours: To ask the Chancellor of the Exchequer what is the level of pension and the lump sum paid in respect of the previous Lord Chancellor; and what remuneration he receives in his ex-officio capacity as a Lord of Appeal in Ordinary.

Mr. Brooke: Under the terms of the Parliamentary and other Pensions Act 1972, Lord Havers receives a pension of £36,015. Retiring Lord Chancellors do not receive lump sum payments.

Former Lord Chancellors do not receive salaries in respect of their service on the Appellate Committee. They are, however, entitled to a daily fee when they sit. Between November 1987 and February 1988 Lord Havers received a total of £4,760 in such fees.

Public Expenditure

Mr. Nicholas Baker: To ask the Chancellor of the Exchequer whether he proposes to make changes to the definition of the public expenditure planning total.

Mr. Major: The Government's objective for public spending is that it should decline as a proportion of national income. This objective relates to the total spending of central and local government and is expressed in terms of general Government expenditure (excluding privatisation proceeds). The Government seek to achieve this objective by controlling expenditure within the targets for the public expenditure planning total, which are set for three years ahead in the public expenditure survey.

Hitherto the planning total has included not only Government's spending on their own programmes but also the total spending of local authorities. In a White Paper published today, "A New Public Expenditure Planning Total" Cm. 441, the Government propose that when the new arrangements for local government finance come into operation in England and Wales the coverage of the planning total should be changed. In future, it will include spending on their own programmes, grants paid to local authorities, the credit approvals they issue for local authority borrowing for capital expenditure, the payments to local authorities from the proceeds of the national non-domestic rate, and the external financing limits of public corporations. Thus the new planning total will include those elements for which central Government are responsible and exclude spending which local authorities determine and finance themselves.

Redefining the planning total to include only the expenditure for which central Government are responsible will make it a more effective instrument for planning and control of central Government's operations. In combination with the disciplines on local authority spending introduced by the reform of local government finance, it will help to achieve the Government's wider spending objective, which will continue to be directed towards total Government expenditure. Distinguishing the spending for which central Government are responsible from that which results from local authorities' decisions will also enhance local accountability, thereby reinforcing the changes brought about by the introduction of the community charge.

One feature of the proposals is that plans for grants and credit approvals will be set out for three years ahead rather than one as at present. This will assist local authorities in their expenditure planning.

It is proposed to bring the new planning total into operation from 1 April 1990, the date of introduction of the community charge in England and Wales. This means that the 1989 public expenditure survey, the results of which will be announced in the 1989 Autumn Statement, will be conducted on the new basis.

These changes are designed to improve planning and control of public spending. They do not represent any dilution in the Government's determination to reduce the size of the public sector or to restrict total public spending, whether by central or local government.

Value Added Tax

Mr. John Hughes: To ask the Chancellor of the Exchequer if he has any plans to impose value added tax on the sale of used goods; what representations he has received on this matter from Oxfam and other charities; and what assessment he has made of the implications of such a move for the work of major international charities.

Mr. Lilley *[holding answer 25 July 1988]:* My right hon. Friend the Chancellor of the Exchequer has no plans to alter the present zero rating for goods donated to charity shops. My right hon. Friend has received a number of representations from Oxfam and its supporters about the implications for this zero rate of the EC Commission's proposals for tax approximation by 1992. My right hon. Friend has made it clear that, while the Government are committed to the completion of the single market, they do

not believe tax approximation to be a necessary part of that process and will reject any proposals which restrict the United Kingdom's ability to retain zero rates.

Statistical Divisions

Mr. Dobson: To ask the Chancellor of the Exchequer if he will list for 1979, 1984 and the most recent year the numbers of staff by grade in the statistical divisions in his Department; if he will differentiate between staff in the statistical posts and staff in administrative posts; and if he will give separate figures for *(a)* Customs and Excise and *(b)* the Inland Revenue.

Mr. Brooke *[holding answer 21 July 1988]:* The numbers of staff in the statistical divisions in Her Majesty's Treasury, Customs and Excise and the Inland Revenue are:

Staff in statistical divisions (staff in post, 1 April)

	Her Majesty's Treasury	*Inland Revenue*	*Customs and Excise*
1979[1]

[1] The numbers for 1979 can be disaggregated by grade only at disproportionate cost.
[2] The difference between 1979 and 1984 reflects the transfer of some functions from the Civil Service Department to the Treasury.

Statisticians working outside statistical divisions are excluded from these figures.

WALES

"Promoting Better Health"

Mr. Roy Hughes: To ask the Secretary of State for Wales what representations he has received concerning the White Paper, "Promoting Better Health"; and if he will make a statement.

Mr. Grist: We have received a variety of representations from professional and other organisations in Wales, together with a number of comments from individuals. These have confirmed my view that the development of primary care is essential to the maintenance of effective Health Service provision for the Principality.

House Sales

Mr. Michael: To ask the Secretary of State for Wales (1) what proposals he has to end the practice known as gazumping in Wales; and whether he will make a statement;

(2) what proposals he has under consideration to slow house price rises in Wales; what consultations he intends to undertake; and whether he will make a statement.

Mr. Grist: I do not consider that Government intervention in the market for owner-occupation would improve the situation.

Public Appointments

Mr. Ron Davies: To ask the Secretary of State for Wales if he will provide a list of all public appointments, paid and unpaid, made by him since June 1987.

Mr. Peter Walker: I shall write to the hon. Gentleman and place a copy of my letter in the Library of the House.

Water Pollution

Ms. Walley: To ask the Secretary of State for Wales how many incidents of water pollution by farm wastes were recorded in each of the years 1980 to 1987, and in 1988 to date, in Wales; how many of these incidents were attributable to pollution by silage effluent, and by slurry; how many of these incidents were the subject of warning letters and prosecutions; and how many prosecutions were successful.

Mr. Peter Walker: The information is as follows:

	1985	*1986*	*1987*
Number of Incidents[1]	462	404	716
of which caused by Silage Effluent	127	76	212
of which caused by Slurry	162	129	186
Number of prosecutions	14	19	59

[1] In area covered by the Welsh Water Authority.

These details are not available for the years prior to 1985 and are not yet available for 1988.

AGRICULTURE, FISHERIES AND FOOD

Great Yorkshire Agricultural Show

Mr. Redmond: To ask the Minister of Agriculture, Fisheries and Food why no Minister from his Department attended the Great Yorkshire Agricultural Show.

Mr. MacGregor: My noble Friend the Parliamentary Secretary was due to attend the Great Yorkshire Agricultural Show to represent my Department on Wednesday 13 July, but was prevented from doing so at short notice by parliamentary business. Unfortunately at that stage no other Minister was available to take over this engagement.

Farm Animal Welfare Council

Mr. Greg Knight: To ask the Minister of Agriculture, Fisheries and Food when he last met members of the Farm Animal Welfare Council; and what subjects were discussed.

Mr. Donald Thompson: My right hon. Friend last met members of the Farm Animal Welfare Council on 26 October 1987 to discuss religious slaughter. I last met council members on 17 May 1988 to discuss the council's new studies on enforcement of farm animal welfare regulations and codes, new husbandry systems and equipment, and promotion of farm animal welfare.

Environmental Protection

Mr. Wareing: To ask the Minister of Agriculture, Fisheries and Food what he is doing to promote environmentally sensitive agriculture throughout England.

Mr. Ryder: The Government promote environmentally sensitive agriculture through a wide range of measures. In particular, under the environmentally sensitive areas scheme, 10 areas have now been designated in England. The agriculture improvement scheme has since 1985 encouraged farmers to invest in environmentally beneficial items, such as hedges, shelter belts, dry stone walls and farm waste control. A major objective of my new farm woodland scheme which comes into operation on 1 October 1988 is to enhance the environment.

We have taken a number of initiatives to reduce the risk of agricultural pollution. These include controls on the use of pesticides and the issue, free of charge, of the code of good agricultural practice.

In addition to those measures, my Department's Agricultural Development and Advisory Service provides farmers with free advice on environmental matters on request.

Green Pound

Mr. Barry Field: To ask the Minister of Agriculture, Fisheries and Food what progress he has made in the European Economic Community on negotiations over the green pound.

Mr. MacGregor: On 18-19 July the Agriculture Council formally confirmed, as part of the price-fixing agreement, that as the next stage in dismantling MCAs by 1992 the green pound will be devalued on 1 January 1989 so as to reduce United Kingdom MCAs by 3·2 points in all sectors except beef, for which decisions on green rates are to be taken later. It was also agreed that the Commission should now examine the measures to adopt for future stages. These were issues for which the United Kingdom, however, had particularly pressed.

Sheep

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what has been the percentage reduction in the respective sheep premium payments in the current year as a result of the European Community sheepmeat stabiliser; and if he will make a statement.

Mr. Donald Thompson: The sheepmeat stabiliser came into effect on 23 May this year. An immediate reduction of 3 per cent. was applied to the guide price used for calculating payments of sheep variable premiums in Great Britain. The basic price which will be used to establish the level of 1988 annual ewe premiums has been reduced by 1·85 per cent. in Great Britain and 1·23 per cent. in the rest of the Community (reflecting the lower rate of stock expansion there); levels of actual payments are dependent upon market prices.

Set-aside Scheme

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what is his latest estimate of the net cost to Great Britain of his set-aside scheme.

Mr. MacGregor: I do not expect there to be a net cost, since the value of incentive payments should be outweighed by savings on CAP support costs.

Environmentally Sensitive Areas

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food how many farmers have entered each tier of an environmentally sensitive area agreement in each of the following areas, and if he will list the total area of land involved in each case: *(a)* Somerset levels, *(b)* Norfolk and Suffolk Broads and *(c)* Breckland.

Mr. Ryder: The information is not yet complete, as agreements resulting from applications received in 1988 have not yet been finalised. I will be including the information in my report to Parliament on the operation of the scheme later in the year.

Water Pollution

Ms. Walley: To ask the Minister of Agriculture, Fisheries and Food how many incidents of water pollution by farm waste were recorded in each of the years 1980 to 1987, and in 1988 to date, in England; how many of these incidents were attributable to pollution by silage effluent, and by slurry; how many of these incidents were the subject of warning letters and prosecutions; and how many prosecutions were successful.

Mr. Ryder: Water pollution incidents from farm waste in England and Wales, excluding the Welsh water authority area, have been as follows:

Year	*1985*	*1986*	*1987*
Total incidents	3,048	3,023	3,174
—of which caused by silage effluent	879	516	791
—of which caused by slurry	719	735	736
Number of related prosecutions	145	109	166

Information on incidents in the year 1988 to date, in years prior to 1985, and on numbers of warning letters and successful prosecutions is not readily available.

Potatoes

Mr. Alexander: To ask the Minister of Agriculture, Fisheries and Food if he will make a statement about the Government's future support policy for potatoes.

Mr. MacGregor: Revised support arrangements were introduced for potatoes in Great Britain on 1 July 1985. They are due to be reviewed before 30 June 1990, to enable decisions to be taken on the form of any subsequent support. To give time for a thorough debate and give the industry as much notice as possible of any changes, we must make an early start to the review. The Secretaries of State for Scotland and for Wales and I will, therefore, be issuing a consultation paper in the autumn seeking comments from all interested parties.

It seems unlikely on present indications that any changes as a result of the review would take effect before 1 July 1991. In so far as this would necessarily involve an extension of the support arrangements financed jointly by the Government and the Potato Marketing Board beyond 30 June 1990, during the review the Government will be exploring with the farmers unions and the board ways of reducing their financial commitment after that date.

Wildlife

Mr. Morley: To ask the Minister of Agriculture, Fisheries and Food (1) what assessment he has made of the way in which wildlife habitats and the landscape in upland areas would be affected by the implementation of current proposals for the reform of the sheepmeat regime of the common agricultural policy;

(2) what assessment he has made of the way in which wildlife habitats and the environment would be affected by the implementation of budgetary stabilisers in the cereals, beef, dairy and sheep sectors.

Mr. Ryder *[holding answer 25 July 1988]:* The potential impact on the environment of upland areas is one of the factors which I shall be taking into account in the continuing negotiations in Brussels on reform of the sheepmeat regime. It is too soon to form any assessment of what, if any, effects on the environment can be identified following the introduction of stabilisers earlier this year.

Thames Barrier

Mr. Bowis: To ask the Minister of Agriculture, Fisheries and Food if he will review the future effectiveness of the Thames barrier in the light of the impact of pollution and the greenhouse effect on Thames water levels.

Mr. Ryder *[holding answer 25 July 1988]:* I am satisfied that the Thames barrier will continue to provide effective flood protection even if the most extreme predictions for sea level rise materialise. The barrier's design allows for increased sea levels of 0·75 m by the year 2030 and a further rise of up to 1 m could be accommodated. Engineers from Thames Water, who are responsible for the barrier, and MAFF are closely monitoring the evidence emerging about rising sea levels, but no special action is necessary at the present time.

Food Poisoning

Mr. Shersby: To ask the Minister of Agriculture, Fisheries and Food what information he has concerning a

campaign by the Food and Drink Federation to educate the public about ways to avoid food poisoning by improving domestic hygiene; whether the campaign has the support of his Department; and if he will make a statement.

Mrs. Currie: I have been asked to reply.

The Food and Drink Federation's campaign is a very welcome initiative by the food industry to help people improve food hygiene in their houses and kitchens. It has the support of both the Department and the Ministry of Agriculture, Fisheries and Food.

This initiative complements the pilot phase of a separate food hygiene education campaign run jointly by the Department, MAFF and the Health Education Authority. The results of this pilot phase will be used to decide how future phases, in 1989 and beyond, can best inform and educate the general public about good food hygiene practice. Copies of the FDF booklet and our pilot leaflet have been placed in the Library, together with a MAFF report "Food Hygiene—Report on a Consumer Survey" used in the preparation of the leaflet.

SCOTLAND

Rating Reform

Mr. Allen: To ask the Secretary of State for Scotland which categories of hospitalised war veterans he proposes to exempt from payment of poll tax in Scotland; and if he will make a statement.

Mr. Lang: War veterans who are solely or mainly resident as patients in a hospital, residential care home, nursing home or hostel as defined in paragraphs 8 and 9 of schedule 1A to the Abolition of Domestic Rates Etc. (Scotland) Act 1987, proposed to be inserted by paragraph 34 of schedule 12 to the Local Government Finance Bill, will be exempt from personal community charge liability.

Mr. Wilson: To ask the Secretary of State for Scotland if he will list those salmon fishings which in the current financial year are liable for non-domestic rates, as a result of being within existing district salmon board areas and separately entered in the valuation roll, and which will cease to be so liable as a result of the Local Government Finance Bill; and if he will state the current rateable value of each such fishing.

Mr. Lang: The information requested is not available centrally.

Mr. Tom Clarke: To ask the Secretary of State for Scotland if he intends to meet the principal of Strathclyde university to discuss the effect of the poll tax on Scottish students.

Mr. Lang: My right hon. and learned Friend has at present no plans to do so.

Technical Drawing

Mr. Kirkwood: To ask the Secretary of State for Scotland whether the Government will publish the evidence made available to the committee set up to review the future of O-grade technical drawing.

Mr. Michael Forsyth: The review group which was set up by the Scottish Consultative Council on the Curriculum (SCCC) to review the future of O-grade technical drawing and O-grade engineering had access to and took account of extensive correspondence received from teachers of technical education, representatives from industry, teacher organisations and hon. Members. Evidence was not sought, however, on the basis that it would be published and in the circumstances publication would not be appropriate.

Mr. Kirkwood: To ask the Secretary of State for Scotland whether he will make a statement on the Government's response to the ad hoc committee's recommendation that O-grade and higher grade technical drawing should be phased out.

Mr. Michael Forsyth: My right hon. and learned Friend and I are considering the review group's recommendations. An announcement of our conclusions will be made shortly.

Nurses

Mr. Galbraith: To ask the Secretary of State for Scotland if he will give the number of nurses per 10,000 of the population for each health board.

Mr. Michael Forsyth: The whole-time equivalent number of qualified nurses per 10,000 population for each health board and for Scotland at 30 September 1987 is set out in the table.

	Number
Scotland	69
Argyll and Clyde	55
Ayrshire and Arran	51
Borders	60
Dumfries and Galloway	74
Fife	60
Forth Valley	64
Grampian	67
Greater Glasgow	85
Highland	73
Lanarkshire	58
Lothian	68
Orkney	72
Shetland	66
Tayside	87
Western Isles	67

Members' Correspondence

Mr. Tom Clarke: To ask the Secretary of State for Scotland what is the average length of time taken by his Department to respond to correspondence from right hon. and hon. Members during the summer recess.

Mr. Rifkind: Precise information in the form requested could be obtained only at disproportionate cost.

Gartcosh Steel Strip Mill

Mr. Tom Clarke: To ask the Secretary of State for Scotland what steps have been taken to estimate the number of small businesses which became bankrupt as a result of the closure of the Gartcosh steel strip mill; and if he will make a statement.

Mr. Lang: The information required to produce such an estimate is not readily available, and could not be derived from regularly available statistical sources.

Mr. Tom Clarke: To ask the Secretary of State for Scotland what account was taken when setting the rate support grant to Strathclyde regional council and Strathkelvin district council of the effects of the closure of the Gartcosh steel strip mill.

Mr. Lang: Local authorities are compensated for any loss of rate income resulting from a plant closure through the resources element of rate support grant.

Forestry

Mr. John M. Taylor: To ask the Secretary of State for Scotland what cost benefit analysis will be undertaken before commercial conifer forestation is approved for grant-aid under the woodland grant scheme.

Lord James Douglas-Hamilton: No cost-benefit analysis is undertaken, since the decision whether or not to plant under the woodland grant scheme is a commercial one for each owner to take, altough the Forestry Commission would withhold grant-aid for any planting proposals which were not silviculturally sound or eventually capable of producing a crop of utilisable timber.

Mr. Ron Davies: To ask the Secretary of State for Scotland whether new afforestation proposals made by the Forestry Commission fall within the scope of the Environmental Assessment (Afforestation) Regulations 1988; and if he will make a statement.

Lord James Douglas-Hamilton: Forestry Commission planting does not fall within the scope of these regulations, but I refer the hon. Member to the reply given to him on 19 July, at column *586*, by my right hon. Friend the Minister of State, Ministry of Agriculture, Fisheries and Food.

Mr. Ron Davies: To ask the Secretary of State for Scotland whether an environmental statement will normally be required in accordance with the Environmental Assessment (Afforestation) Regulations 1988 in respect of afforestation proposals made under the woodland grant scheme which would affect a site of special scientific interest or an area meeting the criteria for designation as a special protection area under European Community directive 79/409/EEC.

Lord James Douglas-Hamilton: The Forestry Commission will shortly be publishing guidance on the application of these regulations which will include an indication of the circumstances in which an environmental assessment is most likely to be required.

Mr. Ron Davies: To ask the Secretary of State for Scotland why the Forestry Commission will not consult voluntary bodies, local groups or other non-statutory agencies about new afforestation proposals; and if he will ask the Commission to publicise, by way of notices in local newspapers or the *London* or *Edinburgh Gazette*, applications made under the woodland grant scheme for new afforestation over 5 hectares.

Lord James Douglas-Hamilton: As stated by my right hon. and learned Friend in his reply of 10 December 1987, *Official Report*, columns *251-54*, to a question from my hon. Friend the Member for Dumfries (Sir H. Monro), we take the view that the Forestry Commission's present consultation arrangements strike broadly the right balance between wider public involvement and the risk of increased bureaucracy and administrative costs. The statutory authorities consulted by the commission are encouraged to consider the views of voluntary bodies and others in commenting on forestry applications.

My right hon. and learned Friend does not consider that it would be reasonable or practical to ask the commission to publicise all applications under the woodland grant scheme for new planting over 5 hectares.

Disabled People

Mr. Tom Clarke: To ask the Secretary of State for Scotland if he intends to meet representatives of disability organisations to discuss the implementation of the Disabled Person's Act 1986.

Mr. Michael Forsyth: I have no plans to do so at present.

Prisons (Racial Harassment)

Mr. Tom Clarke: To ask the Secretary of State for Scotland what further measures he intends to take to tackle the problem of racial harassment in Scottish prisons.

Lord James Douglas-Hamilton: I refer the hon. Member to the measures I announced in my speech to the House on 8 July 1988, when I also made it clear that there was no evidence that racial harassment in Scottish prisons was a widespread problem.

Language Teaching

Mr. Allan Stewart: To ask the Secretary of State for Scotland what his policy is for the teaching of languages other than English in Scottish schools.

Mr. Rifkind: The teaching of foreign languages in our secondary schools has for long been an important element in the education of the ablest pupils. Against the background of achievement and expansion in other areas of the curriculum in recent years, it is right that the position of languages should now be more clearly defined.

A modern foreign language is currently studied by some 40 per cent. of each year cohort in S3 and S4 and by less than 10 per cent. thereafter. These figures are too low.

A modern foreign language is already a core element for pupils in S1 and S2, but all pupils, not just the more able, should continue their experience of at least one modern foreign language beyond this level. Recent developments in language teaching make this increasingly capable of achievement and my aim is that by 1992 it should be the norm for pupils to study at least one modern foreign language throughout the compulsory years of secondary school. I intend to ask education authorities to give priority to this. I would also expect a modern secondary foreign language to be provided in those years for pupils who wished it and to see an increased proportion of pupils continuing the study of languages into S5 and S6.

For long the principal foreign language taught in our schools has been French and this is unlikely to change in the foreseeable future. But other languages, particularly those of our main European partners, have strong claims to be more widely studied and I shall be asking education authorities to consider how opportunities for the study of these languages can be increased.

The study of Latin and Greek has declined in recent years in face of the expanding curriculum. The classical languages, none the less, represent an important part of our heritage and provide a valuable educative experience. It is right that opportunities for their study should continue to be available and encouraged. I shall therefore be asking education authorities to ensure that some schools in each area continue to offer these languages in addition to the study of a modern foreign language.

Currently, the teaching of foreign languages takes place only in the secondary school. Attempts to introduce language teaching in primary school have not previously met with success. Nevertheless, I intend to consider how progress can be made towards introducing the study of foreign languages at the primary stage.

I turn now to Gaelic and Asian languages. Gaelic is a living part of the Scottish heritage and culture and I reaffirm our general policy of support for the learning and teaching of the Gaelic language and the teaching of other subjects through Gaelic where these facilities can be provided and where there is demand for them. Difficulties can arise in fitting Gaelic along with a modern European language into an already crowded timetable, but new courses and materials, for learners and native speakers alike, should help in overcoming these difficulties and ensuring a healthy uptake of the subject.

Asian languages are the heritage of a significant number of our population and it is right that these languages and the traditions they represent should be respected and fostered. At the same time, it is important to impart to all our children a good knowledge of English and in the primary school those languages have a particular role in acting as a bridge to proficiency in English. In the secondary school the considerations which apply to Gaelic are again relevant, but the scarcity of trained teachers and teaching materials are particular limiting factors.

In formulating these policies I have taken account of the statement of position by the Scottish Consultative Council on the Curriculum entitled "The Provision of Languages other than English in Primary and Secondary Schools in Scotland". I am arranging for a copy to be placed in the Library.

I shall shortly ask education authorities to put in hand the action necessary to implement the policies I have outlined. These have implications for the management of schools, and because they must be implemented within planned provision will involve a gradual switch of resources to language departments from other departments. The pace of implementation will depend on local circumstances, but in the majority of cases resources should allow these policies to be implemented within the time scale envisaged.

For too long we have lagged behind our European partners and competitors in the matter of linguistic competence. In view of our growing links with Europe and the advent of the single European market in 1992 it is time to arrest and reverse that trend. A major effort will be required and I ask education authorities, teachers and all concerned with educational provision to join me in ensuring that rapid progress is made.

Bail

Mr. Worthington: To ask the Secretary of State for Scotland how many people were placed on bail in Scotland in the year ended December 1987.

Lord James Douglas-Hamilton: I regret that the information requested is not available.

Water Supplies

Mr. Clay: To ask the Secretary of State for Scotland if he will publish a table showing how many people were disconnected from their water supplies for each year between 1978-79 and the latest date available.

Lord James Douglas-Hamilton: This information is not held centrally. A water authority (regional or islands council) would disconnect a domestic household's supply only for operational reasons. These would include repairing leaks in household plumbing systems or in the authority's mains, making connections or lining pipes.

Water Pollution (Farm Waste)

Ms. Walley: To ask the Secretary of State for Scotland how many incidents of water pollution by farm waste were recorded in each of the years 1980 to 1987, and in 1988 to date, in Scotland; how many of these incidents were attributable to pollution by silage effluent, and by slurry; how many of these incidents were the subject of warning letters and prosecutions; and how many prosecutions were successful.

Mr. Michael Forsyth: The numbers of water pollution incidents in Scotland arising from farm waste in each of the years 1982 to 1987 are as shown in the table. Cases within those totals involving silage effluent and slurry are shown separately. Complete data are not available for 1980, 1981, or 1988 to date. Statistics on numbers of warning letters issued by river purification boards are not held centrally.

Type of incident	*Number of incidents*	*Number of successful prosecutions*	*Number of unsuccessful prosecutions*
1982			
Total farm waste	263	2	—
Silage effluent	86	—	—
Slurry	51	2	—
1983			
Total farm waste	414	16	1
Silage effluent	232	9	—
Slurry	73	3	1
1984			
Total farm waste	330	12	—
Silage effluent	116	4	—
Slurry	71	6	—
1985			
Total farm waste	763	13	—
Silage effluent	503	10	—
Slurry	88	2	—
1986			
Total farm waste	478	7	1
Silage effluent	241	2	1
Slurry	70	0	—
1987			
Total farm waste	713	17	1
Silage effluent	428	6	—
Slurry	88	5	—

Teachers Superannuation Scheme

Mr. Allan Stewart: To ask the Secretary of State for Scotland when he will lay before Parliament the Government Actuary's report on the actuarial inquiry into the teachers superannuation scheme (Scotland) for the quinquennium 1 April 1981 to 31 March 1986.

Mr. Rifkind: I have today laid this report before Parliament (House of Commons No. 552) and arrangements have been made for its publication tomorrow.

Registered Establishments Act

Mr. Bill Walker: To ask the Secretary of State for Scotland when he expects to implement the Registered Establishments (Scotland) Act 1987.

Mr. Michael Forsyth: The Act will come into force on 17 October 1988. It empowers local authorities to charge fees for their work on the registration and inspection of voluntary and private residential establishments for the elderly and other client groups subject to prescribed limits. It also provides for the joint registration with the health boards of establishments providing both nursing and residential care and for the making of conditions for regulation subject to right of appeal. Limits on fees which my right hon. and learned Friend proposes to prescribe for the purpose of the Act have been the subject of recent consultation.

I believe the charging of registration fees will be useful in enabling local authorities to further their efforts to secure and maintain the same standards of care as they would be expected to provide in their own establishments.

Complaints (Common Defender)

Sir Hector Monro: To ask the Secretary of State for Scotland what steps are being taken to improve availability in Scotland of an effective judicial remedy for a number of individuals with similar complaints against a common defender.

Lord James Douglas-Hamilton: The Scottish Law Commission has agreed to accept a formal reference from my noble and learned Friend the Lord Advocate under section 3(1)(e) of the Law Commission Act 1965, in the following terms:

a. To consider the desirability and feasibility of introducing in Scottish civil court proceedings arrangements to provide a more effective remedy in situations where a number of persons have the same or similar rights;
b. to consider how such arrangements might be funded; and
c. to make recommendations.

Prison Officers

Mr. Tom Clarke: To ask the Secretary of State for Scotland what procedures for monitoring the background of prison officers exist to ensure the recruitment of a suitable proportion of staff from ethnic communities in Scotland.

Lord James Douglas-Hamilton *[holding answer 25 July 1988]:* Application to join the Scottish prison service is open to anyone who can satisfy the basic entrance standards in height, eyesight and age. Ethnic origin is not a factor which is taken into account.

However, the new initial recruit training course includes a module whose specification aims to make "students fully aware of their role and responsibilities with regard to the custody and care of inmates from different ethnic backgrounds".

The same module will be used by staff training officers attached to individual establishments for the training of serving staff, a process which has already started.

Agriculture (Subsidies)

Mr. Morley: To ask the Secretary of State for Scotland what was the approximate total value of all direct public subsidies to agriculture in Scotland in each year between 1980 and 1987, distinguishing between direct grants from national and European Community schemes, and price support provided under the common agricultural policy.

Mr. Michael Forsyth *[holding answer 25 July 1988]:* The information requested is as follows:

	National and EC schemes (gross expenditure) £ million	*Price support under CAP £ million*
1980-81	132	70
1981-82	116	70
1982-83	124	115
1983-84	133	150
1984-85	141	150
1985-86	143	180
1986-87	137	115

Health Care Projects

Mr. Galbraith: To ask the Secretary of State for Scotland if he will give the number of specialists consulted since 1980 in order to supplement the in-house expertise in the Scottish Development Agency in the evaluation of health care projects.

Mr. Lang *[holding answer 28 March 1988]:* The number of specialists consulted by the agency since 1980 in connection with the evaluation of health care product development projects is 64. Specialists include scientists, clinicians, medical practitioners and management consultants. For private medical projects, health boards and social work departments are consulted as appropriate.

Mr. Galbraith: To ask the Secretary of State for Scotland if he will list those individuals in the Scottish Development Agency, with their functions, who provide in-house expertise in the evaluation of health care projects, giving their relevant qualifications, including medical qualifications.

Mr. Lang *[holding answer 28 March 1988]:* Health care projects fall into two main categories: private medical projects, and health care product development projects. The agency's involvement with the former calls for expertise in company finance and property development, which is provided by staff of the appropriate agency divisions. For health care product developments, the agency's health care and biotechnology division provides in-house expertise in evaluating market demand, any relevant technical factors and the skills and experience of those engaged in management. The division is staffed by four project executives with relevant management and

technical experience who consult external experts as appropriate. No member of the staff of the division has medical qualifications.

Private Medical Projects

Mr. Galbraith: To ask the Secretary of State for Scotland if he will list those individuals and medical bodies the Scottish Development Agency is consulting in connection with the eight private medical projects currently being considered for support.

Mr. Lang *[holding answer 28 March 1988]:* Of the eight private medical projects which are currently being considered for support, seven involve the setting up of nursing or residential homes for elderly people and would have only local impact. In each of these cases the agency will ensure that health board and social work department licensing requirements are met.

The remaining project is Health Care International. In this case my right hon. and learned Friend's approval was required. Before giving his approval he consulted, through the Scottish Home and Health Department, a wide variety of interested parties. In addition, the Scottish Development Agency helped the company to meet and discuss the project with a number of individuals and organisations in the medical and political fields—including the hon. Member for Strathkelvin and Bearsden.

Mr. Galbraith: To ask the Secretary of State for Scotland if he will list those individuals and medical bodies the Scottish Development Agency has consulted since 1980 when considering support for private medical projects.

Mr. Lang *[holding answer 28 March 1988]:* No private medical projects were supported by the Scottish Development Agency before 1983. In taking forward such projects it is standard practice for the agency to ensure that appropriate health board or social work department registration requirements are met. Where appropriate, further consultations take place with individuals and organisations.

East Kilbride Development Corporation

Mr. Ingram: To ask the Secretary of State for Scotland, pursuant to the answer given on 24 June to the hon. Member for East Kilbride, if he will give the dates of each of the occasions in the last 12 months the Minister of State, the hon. Member for Galloway and Upper Nithsdale (Mr. Lang), met officials of the East Kilbride development corporation; and whether the housing policies of the development corporation were discussed on any of those occasions.

Mr. Lang *[holding answer 7 July 1988]:* I have met officials of East Kilbride development corporation on a number of occasions in the last 12 months. Details are as follows:

1 September 1987—Visit to Motorola during tour of factories in Glasgow area.

16 October 1987—East Kilbride 40th anniversary dinner.

27 November 1987—Informal lunch with chairmen, chief executives and managing directors of the five new town development corporations.

3 June 1988—Informal dinner with chairmen, chief executives and managing directors of the five new town development corporations.

7 June 1988—Motorola press conference to announce opening of design centre.

The only occasions when housing policies were discussed were my meetings with chairmen, chief executives and managing directors on 27 November 1987 and 3 June 1988. As the hon. Member is aware, I have also met representatives of SLANT (Scottish Local Authorities with New Towns) and with the hon. Members representing four of the five new towns on 15 June, when we discussed, among other things, housing policy for the Scottish new towns.

NORTHERN IRELAND

Housing Revenue Accounts

Mr. Worthington: To ask the Secretary of State for Northern Ireland if he will publish in the *Official Report* a summarised housing revenue account, consistent with table 18.1 of Cm. 288-II, for each of the years 1982-83 to 1990-91 for *(a)* local authorities, *(b)* the Northern Ireland Housing Executive, *(c)* the new town development corporations in Northern Ireland and *(d)* Housing Corporation-financed housing in Northern Ireland.

Mr. Needham: The relevant figures for *(b)* the Northern Ireland Housing Executive's revenue account and for *(d)* support to the voluntary housing movement are given in the table. All housing functions of *(a)* Northern Ireland local authorities and *(c)* new town development corporations were taken over by the Housing Executive before 1975. The Housing Corporation does not operate in Northern Ireland: the voluntary sector is supervised direct by the Department of the Environment (NI).

Social Services (Down)

Mr. McGrady: To ask the Secretary of State for Northern Ireland why the Eastern health and social services board's recent advertisement for an assistant director of social services in the Lisburn unit of management, indicated that similar duties in the Down unit of management would be within the postholder's ambit of responsibility.

Mr. Needham: This is a matter for the Eastern health and social services board. The board had advised that in advertising this post it said that for an interim period the successful candidate may be required to undertake similar duties in Down unit of management. The assistant director of social services, post in Down unit of management, will become vacant from 1 September 1988. The board is taking this opportunity to examine the need for organisational changes. The assistant director of social services Lisburn unit of management would assume responsibility for Down pending completion of such a review.

Mr. McGrady: To ask the Secretary of State for Northern Ireland what is the current position with regard to the post of assistant director of social services in the Down unit of management, Downpatrick, County Down.

Mr. Needham: This is a matter for the Eastern health and social services board. The board has advised that the assistant director of social services post in Down unit of management will become vacant from 1 September 1988. The need for the post is being reviewed.

Gaelic

Mr. Alton: To ask the Secretary of State for Northern Ireland what representations he has received on the position of Gaelic within the core curriculum in Northern Ireland; and if he will make a statement.

Dr. Mawhinney *[holding answer 21 July 1988]:* A substantial number of the responses to the Government's consultative paper on education reform have referred to the position of Irish in the curriculum. No decisions on this or any other aspect of the reform proposals have yet been taken.

Incomes

Mr. Nigel Griffiths: To ask the Secretary of State for Northern Ireland (1) how many children for each year since 1979 in Northern Ireland were living in families *(a)* below, *(b)* at and *(c)* up to 140 per cent. of income support or supplementary benefit level classified by employment status; whether they were in one, or two-parent families on the latest basis, and on a basis comparable with 1979; what proportion of these children made up the total number of children; and whether they were in families of one, two, three, four or more children;

(2) if he will estimate for each year since 1979 the number of people in Northern Ireland who had incomes *(a)* below, *(b)* at and *(c)* up to 140 per cent. of the income support or supplementary benefit level on the latest basis and on a basis comparable with 1979; what percentage of the population they represented in each case; what his estimate is of the number of children living in such households; and what percentage of total children they represent in each.

Mr. Needham *[holding answer 22 July 1988]:* Information in the form requested is not readily available and could be compiled only at disproportionate cost.

Home Helps

Mr. Tom Clarke: To ask the Secretary of State for Northern Ireland, pursuant to the answer to the hon. Member for Monklands, West from the Secretary of State for Social Services on 13 May, *Official Report*, columns *273-74*, if he will supply similar information on the level of home help provision in Northern Ireland.

Mr. Needham *[holding answer 25 July 1988]:* The information requested is given in the following table:

As at 30 September	*Home helps (wte) per thousand population (all ages)*
1979	2·52
1980	2·52
1981	2·63
1982	2·54
1983	2·46
1984	2·35
1985	2·29
1986	2·11

FOREIGN AND COMMONWEALTH AFFAIRS

Southern Africa

Sir John Biggs-Davison: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a further statement about Her Majesty's Government's efforts to secure peace in southern Africa.

Mrs. Chalker: We welcomed the announcement on 20 July of agreement to principles for a settlement in Angola and Namibia by the Governments of Angola, Cuba and South Africa. The Government have consistently called on all parties involved to follow the path of negotiation, not conflict. We also welcome recent signs of improved relations between South Africa and Mozambique.

Women Workers

Mr. Tom Clarke: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will publish a table in the *Official Report* showing for each member of the United Nations in ranked order in index form, with the United Kingdom = 100, the proportion of the female population who were economically active for the years 1960, 1979, 1980 and the latest year for which figures are available; and if he will make a statement concerning Her Majesty's Government's policies in the light of this information.

Mrs. Chalker: Statistics on the percentage of women active in the economy in more that 140 member countries of the United Nations are available in the "World Demographic Estimates and Projections, 1950-2025" (United Nations document ST/ESA/SER/.R/79), a copy of which is available in the Library of the House.

St. Helena

Dr. Marek: To ask the Secretary of State for Foreign and Commonwealth Affairs if he plans to take any initiative to increase the number of electors who are registered to vote in St. Helena in advance of the forthcoming elections.

Mrs. Chalker: The St. Helena Government are planning a comprehensive publicity campaign and a door-to-door delivery of the registration forms in advance of the forthcoming elections.

Falkland Islands (Housing)

Dr. Marek: To ask the Secretary of State for Foreign and Commonwealth Affairs if, pursuant to his answer of 19 July, the guidelines for housing standards set by the Executive Council of the Falkland Islands have been met in the case of migrant workers and others; and if he will make a statement.

Mrs. Chalker: The vast majority of expatriate contract workers on the Falkland Islands, who come mainly from Britain and St. Helena, are housed at Mount Pleasant airport in permanent buildings which conform to the building guidelines adopted by the Falkland Islands Government.

Most of those housed elsewhere in the islands live in modular structures—for example, Portakabins—purchased from the Ministry of Defence and which conform broadly to British standards.

Passports

Mr. Worthington: To ask the Secretary of State for Foreign and Commonwealth Affairs how many full-time permanent staff were employed in the passport office in each year from 1979 to when his Department ceased to be responsible for the office.

Mrs. Chalker: Responsibility for the passport office was transferred to the Home Office on 1 April 1984. The number of staff employed in the passport office between 1979 and 1983 was:

Financial Year	*Number*
1979-80	945
1980-81	1,004
1981-82	972
1982-83	1,005
1983-84	1,005

These figures included messengerial and other support staff who also served other branches of the FCO.

Foreign Affairs Council

Mr. Sims: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will publish in the *Official Report* a statement on the outcome of the Foreign Affairs Council held on 25 July.

Mrs. Chalker: I attended the Foreign Affairs Council in Brussels on 25 July.

The Council discussed the community's relations with Eastern Europe at an important juncture, following signature of the EC/CMEA joint declaration, the initialling of a trade and co-operation agreement with Hungary, and in the light of the Soviet wish to explore the possible scope of an EC-Soviet agreement. The Council agreed that the Community could play a positive role in the development of relations between East and West Europe, but that the pace of reform in Eastern Europe would be largely dictated by internal developments. The Council also agreed that the Community should continue to give priority to agreements with individual CMEA states rather than CMEA itself; that each country should be treated according to its individual economic and political circumstances; and that all agreements must be firmly based on mutual advantage.

The presidency and the Commission reported on their plans for handling follow-up to the Hanover summit.

The Council resolved the main issue which has delayed the establishment of a court of first instance. It decided that the jurisdiction of the new court will cover competition, coal and steel, and staff cases, and that a review after two years will consider whether anti-dumping cases should also be included. In a conference of representatives of member states, Ministers considered and provisionally accepted nominations to the Court of Justice and agreed to finalise the procedure in September.

Representatives of the presidency troika and Portugal met a delegation from the European Parliament to discuss the dates for the 1989 elections. It has since been confirmed that these will be 15-18 June.

HOME DEPARTMENT

Civil Defence

Mr. Thorne: To ask the Secretary of State for the Home Department (1) what booklets and information are currently available to the general public about home defence and civil protection;

(2) what current efforts are being made to increase public awareness of home defence and civil protection; and what plans he has for any future campaign.

Mr. John Patten: In 1985 we published the emergency planning guidance to local authorities which provides detailed planning advice on wartime and other emergencies. It is accompanied by handbooks on communal shelter, protective qualities of buildings and emergency feeding. Work is in hand on new handbooks on communications and environmental health. A booklet entitled "Domestic Nuclear Shelters—Technical Guidance", published in 1981, is still in print.

The booklet and video entitled "Civil Protection", published in 1986, give a general introduction to the subject of civil defence and emergency planning. There are no immediate plans to revise this material. The quarterly magazine "Civil Protection" provides information on matters of current interest. Copies of all publications are in the Library.

Mr. Thorne: To ask the Secretary of State for the Home Department how many local authorities have been required to draw up an emergency plan; which have complied and which have not; and if he will make such plans available to the general public.

Mr. John Patten: All 54 county councils and fire and civil defence authorities in England and Wales are required to draw up emergency plans under the Civil Defence (General Local Authority Functions) Regulations 1983. Monitoring of their performance in doing so will not be completed until the end of 1989, but none is refusing to meet its statutory obligations. The Government encourage the publication of plans, but this is a matter for individual local authorities. Additionally, local authorities have responsibilities under the Control of Industrial Major Accident Hazards Regulations 1984 in relation to the preparation of plans to deal with any off-site consequences of accidents at certain major installations in their areas.

Mr. Thorne: To ask the Secretary of State for the Home Department if he will make a statement on the financial arrangements with local authorities for the funding of works in connection with home defence and civil protection; and if he will set out the sums expended to the present date.

Mr. John Patten: Grant-aid is payable towards the cost of the discharge by local authorities' of their statutory civil defence functions, including works in connection with the establishment of emergency control centres for use in the event of hostile attack or its threat. There is central funding of some works connected with communications. The Civil Protection in Peacetime Act 1986 allows civil defence resources to be used in response to peacetime emergencies. The expenditure figures do not specifically identify the funding of works. Overall local authority expenditure which attracted civil defence grant was as follows:

	£ million
1983-84	11·20
1984-85	13·27
1985-86	15·25
1986-87	16·90
1987-88	[1]21·26

[1] estimated

Mr. Redmond: To ask the Secretary of State for the Home Department what practical equipment has been supplied to the South Yorkshire fire and civil defence forces for combating the after effects of a possible nuclear attack or accident.

Mr. John Patten: The Home Office has supplied radiation monitoring equipment and communications equipment to the South Yorkshire fire and civil defence authority for civil defence purposes. Information about equipment obtained from other sources is a matter for the authority to provide.

Prison Service (Graduates)

Mr. Cox: To ask the Secretary of State for the Home Department what was the number of graduates who entered the prison service in each of the last three years; at what grade such people enter the service; and if he will make a statement.

Mr. Douglas Hogg: All prison officer recruits enter at unified grade VIII. An accelerated promotion scheme has recently been introduced under which selected graduates and other exceptionally able candidates may progress swiftly to the senior ranks. Across the service as a whole, staff are recruited to a wide range of disciplines. Information about the numbers who are graduates is not readily available, and could be obtained only at disproportionate cost.

Women Prison Governors

Mr. Cox: To ask the Secretary of State for the Home Department what is the number of women prison governors employed within the prison service; and if he will list the prisons of which they are governors.

Mr. Douglas Hogg: There are 82 women in prison service unified grades V to I, which broadly speaking, correspond to the previous governor and assistant governor grades. The six establishments listed currently have female governors.

Her Majesty's Prison Blundeston
Her Majesty's Prison Brixton
Her Majesty's Prison Bullwood Hall
Her Majesty's Youth Custody Centre Hewell Grange
Her Majesty's Youth Custody Centre Hollesley Bay
Her Majesty's Prison Kingston

Prison Officers

Mr. Cox: To ask the Secretary of State for the Home Department (1) what is the number of male prison officers employed in female prisons in England and Wales;

(2) what is the number of women prison officers employed in male prisons in England and Wales.

Mr. Douglas Hogg: On 9 May, the latest date for which information is available, 67 male prison officers, prison service unified grades VI to VIII were employed in female establishments. One hundred and one female officers were employed in male establishments. A further 919 men and 234 women were employed in establishments which accommodate both men and women.

Animal Welfare

Mr. Redmond: To ask the Secretary of State for the Home Department what assessment he has made of the necessity of the experiments on animals using Dithienon and Lindane carried out under licences granted to Hazleton United Kingdom; and until what date these licences run.

Mr. Douglas Hogg: It is not our practice to give information either on whether licences have been granted for the performance of work at particular establishments or on the terms of particular licences.

Police Manpower

Mr. Robert Banks: To ask the Secretary of State for the Home Department when he expects to announce further details of increases in police manpower.

Mr. Douglas Hogg: We are not yet in a position to say.

Prison, Saltney Ferry, Clwyd

Mr. Barry Jones: To ask the Secretary of State for the Home Department if he has any proposals to build a prison at Saltney Ferry, Clwyd, north Wales; if he is considering any other sites in the county of Clwyd; and if he will make a statement.

Mr. Douglas Hogg: The construction of a prison at Wrexham was included in the prison building programme in 1986. Clwyd county council has recently proposed two sites in other parts of the county, of which Saltney Ferry is one. No decisions have been taken about these sites, which are said to be discussed shortly with the county council.

Prisoners (AIDS)

Mr. John Marshall: To ask the Secretary of State for the Home Department how many of those presently incarcerated in Her Majesty's prisons have been diagnosed as HIV positive.

Mr. Douglas Hogg: On 22 July 1988 the prison population of England and Wales included 62 inmates reported as having been identified as HIV antibody positive.

Data Protection

Mr. Cohen: To ask the Secretary of State for the Home Department what account of the work at the committee independently reviewing the workings of the Data Protection Act he expects the Data Protection Registrar to take in his comprehensive survey.

Mr. Renton: The Data Protection Registrar, who is independent of the Government, is consultant and adviser to the interdepartmental committee reviewing the Data Protection Act. He will attend meetings of the committee and will therefore be aware of its work.

Blair Peach

Mr. Sedgemore: To ask the Secretary of State for the Home Department if he will instruct the Commissioner of Police of the Metropolis to waive privilege in respect of the Cass inquiry documents covering the Blair Peach case and allow solicitors acting for Mr. Peach's family to release to the public their contents.

Mr. Douglas Hogg: I understand that the Commissioner of Police of the Metropolis regards the use of the documents supplied in the Blair Peach case for purposes outside those for which they have been disclosed on discovery as a matter for the courts.

Mr. Sedgemore: To ask the Secretary of State for the Home Department if the documents of the Cass inquiry concerning the Blair Peach case identify or help to identify any person involved in the killing of Blair Peach.

Mr. Douglas Hogg: The Director of Public Prosecutions considered the report of the investigation into the circumstances surrounding the death of Mr. Peach and decided that the available evidence was insufficient to justify any criminal proceedings against any officer.

Mr. Sedgemore: To ask the Secretary of State for the Home Department if he will call for a report from the Commissioner of Police of the Metropolis as to why he refused consent to hearings in the Blair Peach litigation taking place in open court.

Mr. Douglas Hogg: I understand from the Commissioner of Police of the Metropolis that the plaintiffs appealed against an order to give security for costs and applied for the appeal to be heard in open court. The judge in chambers decided that it was not appropriate to hear the appeal relating to security of costs in open court. Counsel for the Metropolitan police opposed the application on the grounds that publication of the matters which would be raised might prejudice a fair hearing of the later trial for which a date had been fixed.

Lotteries

Mr. Fry: To ask the Secretary of State for the Home Department what representations he has received concerning the proposed national lottery to raise funds for the National Health Service from the National Bingo Game Association Ltd., and what response he has made.

Mr. John Patten: The chairman of the National Bingo Association Ltd. wrote to my right hon. Friend on 31 May about the question of a national lottery for the National Health Service. A reply has been sent thanking him for his letter.

Mr. Fry: To ask the Secretary of State for the Home Department if he will bring forward amendments to the Gaming Act 1968 to enable licensed bingo halls to sell on their premises tickets for any future national lottery.

Mr. John Patten: The arrangements for the sale of tickets would no doubt be one of the matters for consideration if it were proposed to bring forward legislation to enable a national lottery to take place.

Nationality

Mr. Cox: To ask the Secretary of State for the Home Department what was the number of applications received for registration under the Nationality Act on 30 June.

Mr. Renton: This information is not readily available, and could be obtained only at disproportionate cost.

Ethnic Monitoring

Mr. Janner: To ask the Secretary of State for the Home Department how many and what percentage of the membership of the Police Complaints Authority are from ethnic minorities.

Mr. Douglas Hogg: The Police Complaints Authority at present has 13 members, including a chairman and two deputy chairmen. Of the 13, three (or 23 per cent.) are from ethnic minorities. There is one vacancy.

Mr. Janner: To ask the Secretary of State for the Home Department how many complaints the Police Complaints Authority has received during the last 12 months for which records are available; and how many and what percentage of such complaints are from people known to belong to ethnic minorities.

Mr. Douglas Hogg: In the 12 months to 30 June 1988 the authority dealt with 12,347 complaints. The ethnic origins of complainants are not known.

Bedford Prison

Mr. Irving: To ask the Secretary of State for the Home Department how many prisoners at Bedford prison were locked up for an average of 20 hours or more a day in the most recent convenient week.

Mr. Douglas Hogg: In the seven-day period ended 16 July 1988, five prisoners were locked in their cells for an average of 20 hours or more a day. All five had been segregated under rule 43 for reasons of good order and discipline.

Mr. Irving: To ask the Secretary of State for the Home Department how many hours' association prisoners at Bedford prison receive per week.

Mr. Douglas Hogg: Currently, prisoners at Bedford are allowed about eight hours of association per week.

Crime Statistics

Mr. Knowles: To ask the Secretary of State for the Home Department what information he has about the levels of crime in other countries in relation to the levels in the United Kingdom.

Mr. John Patten: The only readily available information is that compiled by Interpol, whose latest figures are for 1984 and are given in the following two tables. The figures show that rising crime is a feature common to most Western European countries. United Kingdom recorded crime rates are relatively low for homicide and attempted murder and rape, relatively high for burglary, robbery and wounding and particularly high for car theft. However, these figures are unlikely to be comparable between countries: definitions and counting procedures may differ, as may levels of reporting and recording.

Table 1 Interpol statistics on the levels of offences recorded by the police in certain countries

Asylum Seekers

Mr. Tom Clarke: To ask the Secretary of State for the Home Department if he will publish a table in the *Official Report*, showing, for each month since January 1986, the number of people held in detention, while awaiting the result of an application for political asylum, who injured themselves or attempted suicide.

Mr. Renton: No statistical information is maintained relating specifically to detailed political asylum applicants who have injured themselves or attempted suicide. I shall write to the hon. Member with such information as we can make available.

Mr. Tom Clarke: To ask the Secretary of State for the Home Department if he will publish a table in the *Official Report* showing, for each year since 1979, the number of people who were held in detention while awaiting a decision on a request for political asylum and the proportion they constituted of the total numbers of people seeking asylum.

Mr. Renton: The information readily available about detention was given in response to a question from the hon. Member for Kingston upon Hull, West (Mr. Randall) on 12 July, at column 106. Figures for the number of applications received for refugee status or

asylum were given in table 1 of of the Home Office statistical bulletin, "Refugee Statistics, United Kingdom", 1987, issue 16/88, copies of which are in the Library.

Mr. Tom Clarke: To ask the Secretary of State for the Home Department what criteria are used to decide whether or not an applicant for United Kingdom political asylum is held in detention until a decision is made.

Mr. Renton: Consideration is given to the grant of temporary admission, or temporary release in respect of illegal entrants, in all cases where a person is liable to be detained under the provisions of the Immigration Act 1971. The power to detain is used sparingly and temporary admission or release is readily granted where the immigration officer is satisfield that the person will comply with its terms. The need for detention is kept under regular review.

Mr. Tom Clarke: To ask the Secretary of State for the Home Department what steps are taken to assess the psychiatric condition of applicants for political asylum.

Mr. Renton: There is no routine psychiatric assessment of asylum seekers, but any known medical factors are taken fully into account in the consideration of their application. When an asylum applicant is detained there is access to medical care where necessary at all times.

Members' Correspondence

Mr. Tom Clarke: To ask the Secretary of State for the Home Department what is the average length of time taken by his Department to respond to correspondence from right hon. and hon. Members during the summer recess.

Mr. Hurd: Information is not available in the form requested, but the average turn-round time of ministerial correspondence in my Department during the third quarter of 1987 was 45 days.

Prisoners (Condoms)

Mr. Cohen: To ask the Secretary of State for the Home Department what further consideration has been given to the possibility of prisoners being allowed confidential access to condoms in the wake of the conclusions and recommendations of the advisory council on the misuse of drugs in its report on "Aids and Drug Misuse".

Mr. Douglas Hogg: I refer the hon. Member to the answer given by my right hon. Friend the Minister for Health to a question from the hon. Member for Mid-Worcestershire (Mr. Forth) on 29 March, at columns *452-54*.

Prisoners (Drugs)

Mr. Cohen: To ask the Secretary of State for the Home Department what action he has taken to protect drug misusers in prison from the risk of contracting the HIV virus.

Mr. Douglas Hogg: The education and counselling of prisoners, including drug misusers and other risk behaviour groups, is given high priority. Central initiatives have included the wide distribution of printed material and a video film which stress the high risk from sharing needles and syringes. Governors have been urged to use such material to the best effect, and encouraged to develop local educative initiatives. A comprehensive education package with unequivocal messages both for prisoners in general and for specific target groups is in preparation.

Measures taken to combat the misuse of drugs in establishments have included increasing the number of dogs specially trained in drug detection work, training dogs in the detection of heroin and cocaine as well as cannabis, improving staff training on drugs, the issue of further guidance aimed in particular at the prevention of smuggling by visitors and by prisoners returning from home leave, and abolition of the privilege whereby unconvicted prisoners were permitted to have food and drink sent in to them, thereby closing a significant avenue for smuggling.

Mr. Cohen: To ask the Secretary of State for the Home Department what measures have been taken to encourage drug misusers in prison to identify themselves; and what steps are taken to reduce or eliminate their drug dependency, and ensure that controlled drug intake arrangements free from AIDS infection are available for those requiring them.

Mr. Douglas Hogg: As I announced in answer to a question from my hon. Friend the Member for Warwick and Leamington (Sir D. Smith) on 31 March, at columns *681-82*, the possibility of a history of drugs misuse is one of the factors medical officers inquire into during the course of their examination of inmates being received into prison custody. Where drug dependency is identified help in withdrawing is offered, its nature determined by the medical officer's clinical assessment of the individual case. Additionally, at a number of establishments personal support continuing after withdrawal is provided by members of staff or drug counselling agencies from the community.

Guidelines prepared in discussion between the prison department and probation service for the introduction at all establishments of a more co-ordinated response to drug misusers were issued on 25 September 1987 and copies were placed in the Library. These describe the responsibility of the prison governor to ensure the development of a coherent system and the complementary roles of medical and probation officers in the provision of care and support. The use of suitable drug counselling agencies from the community is encouraged. The expectation is that as these through-care arrangements develop, rather than seek to conceal their habit, inmates will increasingly be inclined to identify any need of help on or shortly after reception. This and concurrent action to combat the entry into prison of illicit drugs will be especially valuable where they are in HIV high-risk behaviour groups.

Immigration Act 1988

Mr. Madden: To ask the Secretary of State for the Home Department if he will list the names of persons and organisations invited to his office to mark the Royal Assent being given to the Immigration Act 1988; if he will list the names of persons and organisations who declined his invitation; and at what he estimates the cost of the hospitality provided on this occasion.

Mr. Hurd: As in the past, I have invited the Chairman and members of the Standing Committee and officials

closely involved in the Bill to attend a small party to mark its completion. Eighteen hon. Members and 21 officials have been invited. Acceptances have been received from eight hon. Members and from 15 officials. I expect the cost to be about £20.

Murder and Manslaughter

Mr. Amess: To ask the Secretary of State for the Home Department how many persons convicted of *(a)* murder and *(b)* manslaughter have been convicted of (i) murder and (ii) manslaughter after release from prison, in each year since 1965.

Mr. John Patten *[holding reply 22 July 1988]:* The total number of suspects convicted of murder or manslaughter who had previously been convicted of murder or manslaughter, including those who commit the second offence before release from prison or hospital, is published annually in table 4.10 of "Criminal Statistics, England and Wales", copies of which are available in the Library. The number of persons who have been convicted of a second homicide after release from prison or hospital is given in the following table:

Persons convicted of murder or manslaughter in England and Wales and released on licence or termination of sentence and convicted again of murder or manslaughter.

	Previous conviction for murder		Previous conviction for manslaughter	
	Convicted for murder	Convicted for manslaughter	Convicted for murder	Convicted for manslaughter

[1] Provisional figures.

Mr. Amess: To ask the Secretary of State for the Home Department how many persons were murdered in each year since 1958.

Mr. John Patten *[holding answer 22 July 1988]:* The number of offences decided at court to be murder is published annually in table 4.2 of "Criminal Statistics, England and Wales", copies of which are in the Library: the figures for 1958-86 are given in the following table. Each offence relates to a separate victim. The corresponding figures for 1987 are not yet available.

Offences initially recorded by the police as homicide and later decided by the courts to be murder[1]

England and Wales

Year	Murder
1958	26

DNA Testing

45. **Mr. Janner:** To ask the Secretary of State for the Home Department whether he will make a statement concerning the use of DNA testing in disputed immigration and natonality cases.

Mr. Hurd *[holding answer 21 July 1988]:* I have today placed in the Library the report of a pilot trial by the Home Office and Foreign and Commonwealth Office of the use of DNA profiling in immigration casework. Copies of the report are being sent to all—including right hon. and hon. Members—with known interests in the outcome. Further copies are available on request.

The Government are grateful for the assistance they have received from Professor Jeffreys of Leicester university, ICI Cellmark Diagnostics, Professor Dodd and Dr. Lincoln of the London hospital medical college, and its independent scientific adviser, Professor Sir David Weatherall of Oxford university.

The main findings of the trial are that DNA profiling is viable and, with the use of the single locus probe, appears to be the most accurate method now available for determining parentage in immigration cases. The Government will therefore continue for the present to accept the validated results of commercial testing under the interim procedures issued by the Home Office last year. It follows that, where applicants can show through a validated DNA test result a qualifying relationship with both parents, and where the other requirements of immigration law are met, their claims will be accepted and the Home Office will not contest outstanding appeals.

The pilot was a scientific trial to test procedures and not a statistical investigation based on a properly constructed representative sample. It follows that, from the limited data available, no valid statistical inferences may be drawn about how far different decisions on admission would have been reached in the past if DNA testing had been available, or on the extent to which future applications are likely to be successful.

We are considering whether DNA testing should continue to be left to private initiative or organised under a centrally run scheme. The Government are clear that the cost of any such schemes should not fall on the taxpayer. We do not consider that a scheme should be either automatic for all settlement applicants or compulsory, though reasonable inferences could be drawn from refusal to take a test. We shall announce our final conclusions in due course.

Copies of the report may be obtained, free of charge, from Room 905, Home Office, Lunar house, Wellesley road, Croydon CR9 2BY.

EMPLOYMENT

Training Scheme

Mr. Alton: To ask the Secretary of State for Employment how much will be paid in total during the first year of implementation to trainees on the employment training scheme, over and above their unemployment benefit.

Mr. Nicholls: In the first full year of employment training the Training Commission plans to spend around £800 million on training allowances of which some £190 million is for the lead over benefit and other allowances.

The Training Commission and training managers are also jointly funding a training bonus scheme. Trainees will receive a bonus for completing their action plan of three months or more and a higher bonus for achieving a vocational qualification or a credit towards one.

Training managers or practical training providers may also choose to give additional financial support to trainees.

Factory Inspectors

Mr. Redmond: To ask the Secretary of State for Employment how many vacancies there are in the Factory Inspectorate; what has been the total number of vacancies by year from 1979 to date; by what region; and if he will make a statement.

Mr. Nicholls: On 1 July 1988 there were 40 vacancies in the Factory Inspectorate. Recruitment competitions were organised in the period 1979 to 1988 to fill the following number of vacancies.

Year	Number of vacancies
1979	90
1980	0
1981	0
1982	0
1983	0
1984	45
1985	30
1986	75
1987	70
1988	35

It is not possible to break down the total number of vacancies geographically. A further recruitment competition for factory inspectors is planned for the autumn of 1988.

Employment Training

Mr. Leighton: To ask the Secretary of State for Employment what is the average weekly amount available on employment training excluding supplementary grants to purchase training.

Mr. Nicholls: Excluding supplementary grants of up to £40 per trainee per week, a basic grant of £17·50 per trainee per week and an initial administration fee of £15 for each trainee will be paid to training managers under employment training.

Training managers would also expect to receive contributions of about £5 per day from employers offering practical training placements and also contributions from patrons of some projects. The Training Commission is also

making separate grants available for training providers' staff, for special help for people with disabilities, for assessment and certification and for higher and technical level skill training.

Leave

Mr. Grocott: To ask the Secretary of State for Employment whether his Department monitors the extent to which extended leaves are available to employees.

Mr. Nicholls: No. Terms and conditions of employment are a matter for employers and employees or their representatives to determine.

Members' Correspondence

Mr. Tom Clarke: To ask the Secretary of State for Employment what is the average length of time taken by his Department to respond to right hon. and hon. Members' correspondence during the summer recess.

Mr. Nicholls: The Department of Employment took an average of about one month to respond to right hon. and hon. Members' correspondence received during the 1987 summer recess.

Labour Statistics

Mr. Nellist: To ask the Secretary of State for Employment if he will give for the latest available most nearly comparable dates the number of unemployed workers in Coventry and the number of vacancies at *(a)* the jobcentre and *(b)* the careers office, broken down into (i) full-time jobs, (ii) part-time jobs, and (iii) places on various Government schemes, by title and duration of scheme.

Mr. Lee *[holding answer 22 July 1988]:* Following is the available information. On 9 June 1988 the number of unemployed claimants in the Coventry local authority district was 17,572. At Coventry jobcentre, which covers an area nearly corresponding to Coventry local authority district, the level of unfilled vacancies, excluding community programme vacancies, registered on 3 June 1988 was 595, of which 420 were full-time and 175 part-time. The numbers of vacancies on Government training programmes registered at the jobcentre on the same date were 486 community programme places, of which 98 were full-time and 388 part-time. In addition, there were three voluntary project programme places and 18 job training scheme places.

At Coventry careers office there were 132 unfilled vacancies registered on 3 June 1988; these are not separately identified as full-time and part-time vacancies. Also some of these vacancies could have been notified to a jobcentre as well as a careers office.

In the Coventry local authority district the number of YTS places planned for first and single year trainees in the current financial year is 2,436, of which 1,069 were unfilled on 3 June 1988.

SOCIAL SERVICES

Elderly People

Mr. Andrew Bowden: To ask the Secretary of State for Social Services what change there has been in the numbers of long-stay hospital beds for elderly people provided by each regional health authority over the last five years.

Mrs. Currie: I regret that information is not collected in the form requested. The latest figures for the average daily available geriatric beds are shown in the table.

Average daily available geriatric beds in all NHS hospitals, England, 1982-1986

Regional Health Authority	*Year*					*Percentage change 1982-1986*
	1982	*1983*	*1984*	*1985*	*1986*

[1] In-patient cases treated per available bed.

Pensions

Mr. Frank Field: To ask the Secretary of State for Social Services if he will detail the overall increase in the real value of national insurance pensions over *(a)* the period 1974 to 1979 and *(b)* the period 1979 to the present date.

Mr. Scott: The information requested is in the table. The upratings shown are those which applied for most of 1974 and 1979.

Real terms increase in retirement pension

	Single person	*Married couple*
(a) October 1973 to November 1978	20·1	19·1
(b) November 1978 to April 1988	2·4	2·5

White Hart Training Centre, Harrogate

Mr. Robert Banks: To ask the Secretary of State for Social Services what consideration has been given to offering the White Hart training centre in Harrogate to the private sector; and if he will make a statement.

Mrs. Currie: The National Health Service Training Authority is actively considering the future role of its two training centres and all options for their future use are being considered. The authority hopes to reach a conclusion on this by early 1989.

Cholesterol Screening

Mr. Simon Coombs: To ask the Secretary of State for Social Services what plans he has to introduce cholesterol screening.

Mrs. Currie: We are inviting the Standing Medical Advisory Committee to advise on the cost-effectiveness of wider cholesterol testing in the prevention and treatment of heart disease.

Health Education Authority

Mr. Simon Coombs: To ask the Secretary of State for Social Services if he will make a statement on the work of the Health Education Authority, listing its achievements since its formation.

Mrs. Currie: The Health Education Authority was set up in April 1987 as an integral part of the National Health Service to advise Ministers on health education issues and to take forward its health education campaigns. The authority is carrying forward its health education work in 10 main areas—smoking, heart disease, AIDS, dental health, alcohol and drug misuse, family and personal health, young people, adult and community, the elderly and professional development. In many cases it is developing work undertaken by the former Health Education Council. Issues such as women's health and ethnic minority health are also being addressed.

The main new developments have been in two major areas, AIDS and the "Look After Your Heart" campaign. Following its assumption of responsibility for development of the mass media aspects of the public education on AIDS, the authority has since run separate campaigns aimed at the general public, in particular young sexually active adults, and holiday and business travellers. These have been supported by the publication of new leaflets giving information about AIDS and HIV infection.

The authority has also worked closely with the Department to launch and take forward the joint "Look After Your Heart" campaign. This activity, together with the wide range of other health education work, is continuing.

St. George's Hospital, Tooting

Mr. Cox: To ask the Secretary of State for Social Services what is the present estimated costs of the complete rebuilding of St. George's hospital, Tooting; and if he will make a statement.

Mrs. Currie: Including building, engineering, fees and equipment, the cost of rebuilding phases I, II, IIA and IIG2 and F of St. George's hospital, Tooting, with the new accident and emergency unit currently under construction, is £125·5 million.

Coronary Heart Disease

Mr. Bell: To ask the Secretary of State for Social Services what is the proportion of deaths from coronary heart disease; and what equivalent information he has for other members of the European Community.

Mrs. Currie: The latest available information is shown in the table. Data have, with the exception of those for the United Kingdom and England and Wales, been taken from the 1987 edition of World Health Organisation "World Health Statistics" annual; for Belgium, the data were obtained from the "UN Demographic Year Book 1986".

Proportion of total deaths which have ischaemic heart disease[1] as underlying cause

Country	*Year*	*Percentage of total deaths*
Belgium	1984	13·3
Denmark	1985	28·7
Federal Republic of Germany	1986	19·3
France	1985	9·9
Greece	1985	11·0
Ireland	1984	26·6
Italy	1983	14·3
Luxembourg	1986	14·8
Netherlands	1985	20·9
Portugal	1986	8·5
Spain	1981	9·8
United Kingdom[2]	1987	27·8
England and Wales[2]	1987	27·5

[1] International Classification of Disease (9th revision) code 410-414.
[2] Provisional. Source OPCS.

Note:
There may be differences in the assignment of underlying cause between countries. Direct comparisons should therefore be made with care.

Occupational Pensions

Mr. Kirkwood: To ask the Secretary of State for Social Services if he will estimate the savings made by the change introduced in paragraphs 5 to 9 and 12 of schedule 4 to the Social Security Act 1988 which require that occupational pensions paid to dependents should now be treated as earnings in assessing claimant's income.

Mr. Scott: The estimated savings in a full year are £3 million.

Council Expenses

Mr. Martyn Jones: To ask the Secretary of State for Social Services why council travelling and subsistence expenses are classed as income for income support purposes; and if he has any plans to change this situation.

Mr. Scott: Any payment to councillors solely to enable them to carry out their duties is disregarded. Payments to councillors for travelling and subsistence which are not made wholly, exclusively and necessarily in respect of expenses incurred in the course of their duties, represent a reward for their services and are therefore treated as earnings in income support. When added to any other earnings, they attract a weekly disregard of £5, or £15 in certain circumstances. There are no plans to change these arrangements.

Income Support

Mr. Martyn Jones: To ask the Secretary of State for Social Services how many people received supplementary benefit at the latest available date; and how many currently receive income support in *(a)* Clwyd South-West, *(b)* Wales and *(c)* Great Britain.

Mr. Scott: The constituency of Clwyd, South-West is served by the local offices at Rhyl, Wrexham and (from 18 April 1988) Deeside. The boundaries are not conterminous.

The information requested is as follows:

	Clwyd South-West	*Wales*	*Great Britain*
People in receipt of supplementary benefit at 17 November 1987	34,107	287,978	5,056,102
People in receipt of income support at 31 May 1988	30,524	258,789	4,431,409

The figures relating to income support are provisional and subject to amendment.

Source: 100 per cent. count of cases in action. These figures may however, overstate the number of people receiving supplementary benefit. The footnote to the reply given to my hon. Friend, the Member for Hyndburn, (Mr. Hargreaves) on 31 March 1988, at columns *660-61*, refers.

Severe Weather Payments

Mr. Cox: To ask the Secretary of State for Social Services if he will give the number of people who during the last winter were able to claim under the severe weather heating allowance.

Mr. Scott. Information is not available in the form requested. The provisional number of payments made under last winter's exceptionally cold weather scheme is 99,783.

Civil Defence

Mr. Thorne: To ask the Secretary of State for Social Services if he will set out his plans for emergency medical care in time of war—or national emergency; and if he will make a statement.

Mrs. Currie: The Department has recently issued revised civil defence planning guidance to the National Health Service. It replaces the existing guidance issued in 1977 and takes account of changes in the Government's planning assumptions and in management and structure within the NHS.

The guidance is designed to assist health authorities and others to plan the various phases of putting the NHS on a crisis footing in the event of war, however unlikely that may be. A copy has been placed in the Library.

Members' Correspondence

Mr. Tom Clarke: To ask the Secretary of State for Social Services what is the average length of time taken by his Department to respond to correspondence from right hon. and hon. Members during the summer recess.

Mr. Moore: The average length of time taken to respond to correspondence from right hon. and hon. Members during the last summer recess was 31 calendar days.

Transplants

Mr. Hannam: To ask the Secretary of State for Social Services if he has completed his consideration of the Hoffenberg report on the supply of transplant organs; and if he will make a statement.

Mrs. Currie: Further to my reply to my hon. Friend the Member for Tynemouth (Mr. Trotter) on 18 December 1987, at column *934*, we have recently issued for consultation a draft health circular on the provision of donor organs for transplantation. This implements the key recommendation of the Hoffenberg report. Health authorities, medical organisations and others with a particular interest in the subject have been invited to comment by 30 September 1988.

Patients (Treatment)

Ms. Harman: To ask the Secretary of State for Social Services if he will estimate for each specialty group the percentage of patients *(a)* nationally and *(b)* by region who are treated outside the district within which they live.

Mrs. Currie: I shall let the hon. Member have the available information which can be provided without incurring disproportionate costs as soon as possible.

Institutional Care (Discharges)

Mr. Tom Clarke: To ask the Secretary of State for Social Services if he will increase funding to local authorities to enable an improvement in the monitoring of patients discharged from long-term institutional care.

Mrs. Currie: When determining the level of grant to local authiorities for future years, the Government will take into account all responsibilities falling on social services departments, including those which will arise in relation to patients discharged from long-term hospital care when section 7 of the Disabled Persons (Services, Consultation and Representation) Act 1986 is implemented.

Marriage Breakdown

Mr. Carrington: To ask the Secretary of State for Social Services if he will estimate the annual cost to public funds of providing support to people whose problems are attributable to marriage breakdown.

Mr. Scott: Information about benefits paid to people in this situation is not available in the form requested. The latest published information shows that supplementary benefit in payment to divorced and separated women at February 1986 amounted to £619 million a year. This takes account of maintenance paid by the liable relative to the Department or direct for divorced or separated women claimants totalling £115 million per annum at February 1986.

Abortions

Mrs Ann Winterton: To ask the Secretary of State for Social Services what information he has concerning the number of abortions performed in England and Wales in the latest year for which figures are available which were performed on pregnancies arising out of the use of in vitro fertilisation techniques; and what were the grounds for those abortions.

Mrs. Currie: Information on the method of fertilisation is not required to be collected on the abortion notification form, and it is therefore not possible to provide the data requested.

In Viro Fertilisation

Mrs. Ann Winterton: To ask the Secretary of State for Social Services what information he has concerning the frequency of major handicap in babies conceived through in vitro fertilisation techniques.

Mrs. Currie: I understand that the Medical Research Council is currently funding a study of data on children conceived by in vitro fertilisation, and the results will be available next year.

Housing Benefit (Non-dependants' Income)

Mr. Buchan: To ask the Secretary of State for Social Services for what reasons it is considered necessary to ask for the precise income, instead of whether over or under £49·20, of a non-dependant in regulation 63(1) of the Housing Benefit Regulations, April 1988.

Mr. Scott: The threshold below which deductions in respect of non-dependants in remunerative work are made at a lower rate is subject to regular review. It would not be practicable to renew stocks of claim forms each time the threshold was reviewed. Moreover, it would be inevitable that some old stocks would remain in circulation after the rate had been changed, thus misleading claimants and necessitating additional inquiries.

Disabled People

Mr. Alfred Morris: To ask the Secretary of State for Social Services, pursuant to the answer of 21 July, if he will name the seven local authorities which failed to provide returns concerning services they provided for people with disabilities for 1986-87; and what action he is taking.

Mr. Scott: The local authorities concerned are: Cleveland, Wolverhampton, Westminster, Kingston-Upon-Thames, Kent, Devon and the Isles of Scilly. Several reminders have been sent.

Patient Registration Data

Mr. Fearn: To ask the Secretary of State for Social Services (1) if he will list the organisations asked to comment on his Department's consultation document on DHA use of family practitioner committee patient registration data; what representations have been received; and of those, how many were for or against the proposals;

(2) when the Government expect to respond to representations received regarding the consultation document on DHA use of patient registration data; and if he will make a statement.

Mrs. Currie: Copies of the consultation document were sent by the Department to the following bodies in England:

Regional Health Authorities (14)
District Health Authorities (191)
Family Practitioner Committees (90)
Special Health Authorities for London Teaching Hospitals (8)
Community Health Councils (191)
Health Service Commissioner
General Medical Council
General Medical Services Committee
Joint Consultants' Committee
Community Medicine Consultative Committee
British Medical Association
Royal College of General Practitioners

English National Board for Nursing, Midwifery and Health Visiting
Joint Committee of Professional Nursing, Midwifery and Health Visiting Associations (England)
Royal College of Nursing
Royal College of Midwives
Health Visitors' Association
Data Protection Registrar
Society of FPCs
Society of Administrators FPS
National Association of Health Authorities
Inter-Regional Secretariat for Health Authorities
Association of Community Health Councils for England and Wales
Royal Institute of Public Administration
Institute of Health Service Managers
British Computer Society
Pharmaceutical Society of Great Britain
General Whitley Council (Staff Side Secretary)
National Council for Voluntary Organisations
National Association of Citizens' Advice Bureaux
Consumers' Association
Patients' Association
National Council for Civil Liberties
National Consumer Council.

The document was publicised in the reply given to my hon. Friend the Member for Ludlow (Mr. Gill) on 25 November 1987, at column *243*, and in a press release on the same day.

Over 400 responses were received. The great majority of responses recognised that there would be additional benefit to patient care if DHAs could use patient registration data, and supported such use on condition that questions about the extent and nature of proper safeguards were resolved. We are considering all the issues arising from the process of consultation and will bring forward proposals as soon as we are in a position to do so.

Mentally Ill and Handicapped and Elderly Patients

Mr. Fearn: To ask the Secretary of State for Social Services if he will give the number in each region of *(a)* hospital beds, *(b)* local authority and health authority day places, and *(c)* places in sheltered accommodation, for (1) the mentally handicapped (2) mentally ill and (3) elderly patients.

Mrs. Currie: Figures for 1986, the latest year for which statistics are readily available centrally, have been published and are in the Library.

Figures for the number of available staffed beds at 31 December 1986 in National Health Service mental illness and mental handicap hospitals and units in England are in table 2·1 of booklets 9 and 10 respectively of the series, "Mental Health Statistics for England".

The table gives the estimated average number of daily occupied beds during 1985 for the elderly in National Health Service non-psychiatric hospitals in England; later estimates for the elderly are not currently available.

Average number of beds occupied daily by patients aged 65 years and over in NHS non-psychiatric hospitals in England, 1985

Region	*Number*
Northern	6,080
Yorkshire	8,108
Trent	8,500
East Anglian	3,658
North West Thames	6,886
North East Thames	8,643
South East Thames	7,394
South West Thames	4,783
Wessex	4,581
Oxford	3,731
South Western	5,816
West Midlands	10,911
Mersey	5,331
North Western	8,173
Special health authorities	442
England, total	93,037

Figures for day patients, other than out-patients, attending National Health Service mental illness and mental handicap facilities in England during 1986 are also contained in the two booklets mentioned.

Figures for people attending day centres within local authorities are contained in the Department's publication A/F 86/8, "Adult Training Centres for Mentally Handicapped People and Day Centres for Mentally Ill, Elderly and Younger Physically Handicapped People, at 31 March 1986, England", by local authority area.

Figures on "sheltered accommodation" are not centrally available by regional health authority. However, figures by local authority area are available for certain categories of accommodation in publications A/F 86/11, "Homes and Hostels for Mentally Ill and Mentally Handicapped People, at 31st March 1986, England", and RA/86/2, "Residential Accommodation for Elderly and for Younger Physically Handicapped People: All Residents in Local Authority, Voluntary and Private Homes, Year ending 31 March 1986, England".

No reliable figures for day patients attending other National Health Service facilities specifically for the elderly are collected centrally.

Independent Living Fund

Mr. Hannam: To ask the Secretary of State for Social Services if he will announce the names of the chairman and vice-chairman of the Independent Living Fund.

Mr. Scott: At their last meeting the trustees elected Mrs. Winifred Tumin as their chairman and Miss Pauline Thompson as vice-chairman. They also elected Mr. Stewart Lyon as treasurer.

Miss Sharon Campbell

Mr. Robert G. Hughes: To ask the Secretary of State for Social Services whether he will make a statement about the inquiry into the care and after-care of Miss Sharon Campbell.

Mrs. Currie: We received the report of the independent committee of inquiry, chaired by Mr. John Spokes, QC, on 22 June 1988. It is being published in full today and copies are being placed in the Library.

The Government are very grateful to Mr. Spokes and his colleagues, Dr. Michael Pare and Mr. George Royle, for their work. Their extremely helpful report examines the care provided for a young woman, Miss Sharon Campbell, by health and local authorities between 1980 and 1984. It examines her treatment as a psychiatric in-patient at Bexley hospital, and subsequent out-patient treatment and the care provided by two social services authorities when she was living in the community in Lewisham. It considers also the circumstances in which she killed her former social worker, Miss Isabel Schwarz, and examines the responses to earlier threats and incidents of violence by Miss Campbell.

The report draws attention to the dedicated care and treatment given to Miss Campbell by many professional staff. It identifies also a number of shortcomings in co-ordination and liaison; inadequate supervision of staff; and regrettable omissions by some individuals. It is, however, clear from the committee's findings that Miss Campbell received a generally good level of attention from the caring services and that, although her behaviour was unpredictable and, at times, threatening, her action in killing Isabel Schwarz was of a wholly different order from that which characterised earlier violence or threats by her.

The report makes recommendations for the care of mentally disordered people in the community; record-keeping by, and communications between, health and local authorities, professional staff and others; the safety, training and supervision of social workers; and other related matters. Ministers are considering those recommendations which are addressed specifically to the Secretary of State and some others which may call for action or consideration by the Department. We shall take action to implement any changes that are necessary. We expect that the health and local authorities directly concerned in the care of Sharon Campbell will also consider the report's findings with particular care and act upon them as necessary.

Officials are in touch with the Royal College of Psychiatrists and other professional bodies about a recommendation that they might co-operate in preparing a report on discharge and after-care procedures for mentally ill patients. The report also contains recommendations which will be of value to health and local authorities in their service planning, the delivery of good

quality patient and client care, and the safety and security of staff. Copies are being sent today to all health and local authorities in England.

Violence to Staff

Mr. Stevens: To ask the Secretary of State for Social Services whether he will publish the report of his advisory committee on violence to staff.

Mrs. Currie: I am grateful to the members of the committee for their assistance in producing a most useful report. Copies of the committee's report, which I am placing in the Library, are today being sent to health authorities, family practitioner committees, local social services authorities and to managers within the Department of Social Security. I hope it will be of particular value to those who are locally responsible for the provision of health and personal social services and for the operation of the social security system.

We continue to be very concerned about violence against staff by members of the public, and we take seriously our duty to protect those who work for us all.

DEFENCE

Saudi Arabia

2. **Mr. Tim Smith:** To ask the Secretary of State for Defence if he will make a statement on the recently announced arms deal with Saudi Arabia.

36. **Mr. Chapman:** To ask the Secretary of State for Defence if he will make a statement about the recent contract for the sale of Tornados to Saudi Arabia.

82. **Mr. Corbyn:** To ask the Secretary of State for Defence if he will make a statement on the latest arms sales to Saudi Arabia.

Mr. Colvin: To ask the Secretary of State for Defence if he will make a statement on the recently announced arms deal between the United Kingdom and Saudi Arabia.

Mr. Younger: The recently announced signature of a formal understanding with the Saudi Arabian Government provides for an enhancement to the project Al Yamamah involving the supply of additional aircraft, specialised naval vessels and a construction programme. I believe the agreement is of considerable importance and benefit to both countries.

24. **Mr. John M. Taylor:** To ask the Secretary of State for Defence if he will give details of the implications for west midlands industry of the recent major arms contracts with Saudi Arabia.

Mr. Sainsbury: Employment consequences for individual regions cannot yet be assessed, but it is clearly excellent news for British industry and has the potential to help support and sustain jobs in a wide range of companies and regions.

26. **Mr. Cran:** To ask the Secretary of State for Defence what estimate he has as to the number of jobs that will be created or protected among British firms as a result of the signing of the recent arms deal with Saudi Arabia.

Mr. Sainsbury: It is too early to assess the employment consequences.

NATO Defence Ministers (Meeting)

7. **Mr. Hunter:** To ask the Secretary of State for Defence when he will next meet the Defence Ministers of European North Atlantic Treaty Organisation countries; and what subjects he will discuss with them.

Mr. Younger: I will next meet Defence Ministers of European NATO countries at an independent European programme group meeting in September. We will discuss a wide range of defence matters.

Gibraltar

9. **Mr. Matthew Taylor:** To ask the Secretary of State for Defence what is the annual cost of maintaining a British military presence in Gibraltar.

Mr. Freeman: The estimated cost of maintaining a British military presence in Gibraltar in 1988-89 is £71 million.

British Bases

18. **Mr. Sumberg:** To ask the Secretary of State for Defence what has been the cost over the last five years of employing manpower to protect British bases from unauthorised incursions, and the threat of criminal damage, by protesters.

Mr. Sainsbury: Activities by protesters and the threat of such activities produce a considerable increase in the task of protection of military units and MOD establishments in the United Kingdom. However, it is not possible to identify that part of the total cost of protection which is attributable to the activity of protesters. In addition, there will have been costs incurred by local constabularies.

Cruise Missiles

19. **Mr. Andrew F. Bennett:** To ask the Secretary of State for Defence what proposals have been received from the United States Administration for Upper Heyford and Lakenheath to be used as bases for United States F111 aircraft armed with air-launched cruise missiles.

23. **Mr. James Lamond:** To ask the Secretary of State for Defence what proposals have been received from the United States Administration for Upper Heyford and Lakenheath to be used as bases for United States F111 aircraft armed with air-launched cruise missiles.

60. **Dr. Reid:** To ask the Secretary of State for Defence what proposals have been received from the United States Administration for Upper Heyford and Lakenheath to be used as bases for US F111 aircraft armed with air launched cruise missiles.

76. **Ms. Primarolo:** To ask the Secretary of State for Defence what proposals have been received from the United States Administration for Upper Heyford and Lakenheath to be used as bases for US F111 aircraft armed with air-launched cruise missiles.

Mr. Younger: No proposals have been received from the United States Administration. The redeployment to Europe of dual capable aircraft currently based in the United States is one force restructuring option currently under consideration within NATO, but no decisions on

this or any other option have yet been taken. There would in any case be no question of the redeployed aircraft being armed with strategic air-launched cruise missiles (ALCMs).

28. **Mr. McFall:** To ask the Secretary of State for Defence what is the role in current North Atlantic Treaty Organisation strategy of long-range sea-launched cruise missiles; and what changes in the role are currently being considered.

40. **Mr. Madden:** To ask the Secretary of State for Defence what is the role in current North Atlantic Treaty Organisation strategy of long-range sea-launched cruise missiles; and what changes in the role are currently being considered.

72. **Ms. Short:** To ask the Secretary of State for Defence what is the role in current North Atlantic Treaty Organisation strategy of long-range sea-launched cruise missiles; and what changes in this role are currently being considered.

Mr. Archie Hamilton: Sea-launched cruise missiles (SLCMs), which the United States navy has been deploying since 1984, provide a flexible and survivable addition to the US sea-based nuclear deterrent. Their specific role is to hold at risk fixed targets on land. SLCMs are not formally assigned to NATO.

41. **Ms. Ruddock:** To ask the Secretary of State for Defence what recent discussions he has had with his United States counterpart about the possibility of F111s stationed in the United Kingdom carrying air-launched cruise missiles.

66. **Mr. Litherland:** To ask the Secretary of State for Defence what recent discussions he has had with his United States counterpart about the possibility of F111s stationed in the United Kingdom carrying air-launched cruise missiles.

Mr. Younger: I refer the hon. Members to the answer I gave earlier today to the hon. Member for Sunderland, South (Mr. Mullin).

NATO (Conventional Stability Talks)

20. **Mr. Michael Welsh:** To ask the Secretary of State for Defence what discussions North Atlantic Treaty Organisations Defence Ministers have had concerning a mandate for the North Atlantic Treaty Organisation negotiators at the forthcoming conventional stability talks.

65. **Mr. Lewis:** To ask the Secretary of State for Defence what discussions North Atlantic Treaty Organisations Defence Ministers have had concerning a mandate for the North Atlantic Treaty Organisation negotiators at the forthcoming conventional stability talks.

69. **Mr. Anthony Coombs:** To ask the Secretary of State for Defence what further progress has been made in conventional force reductions in Europe.

Mr. John Evans: To ask the Secretary of State for Defence what consultations have taken place between North Atlantic Treaty Organisation Defence Ministers on reaching a common position on the forthcoming conventional stability talks.

Mr. Younger: I refer the hon. Members to the reply I gave earlier today to the hon. Members for Falkirk, East (Mr. Ewing) and for Glasgow, Shettleston (Mr. Marshall).

Trident

21. **Mr. Strang:** To ask the Secretary of State for Defence when he last discussed Britain's Trident programme with his United States counterpart; and if he will make a statement.

Mr. Sainsbury: My right hon. Friend the Secretary of State and Mr. Carlucci, the United States Secretary for Defence, last discussed the Trident programme, together with a number of other subjects, when they met in April of this year.

Glenmoriston Estate (Sale)

22. **Mr. Kennedy:** To ask the Secretary of State for Defence if he is yet in a position to assess the defence implications of the proposed sale of Glenmoriston Estate, Inverness-shire; and if he will make a statement.

Mr. Freeman: I have written to the hon. Member, explaining that it has been decided not to seek to acquire part of the Glenmoriston estate for Army training purposes.

Warsaw Pact/NATO Conventional Forces

25. **Mr. Bill Michie:** To ask the Secretary of State for Defence if he will give the latest estimate of the conventional balance between the Warsaw pact and the North Atlantic Treaty Organisation; and if he will make a statement.

30. **Mr. Parry:** To ask the Secretary of State for Defence if he will give the latest estimate of the conventional balance between the Warsaw pact and the North Atlantic Treaty Organisation; and if he will make a statement.

45. **Mr. Wareing:** To ask the Secretary of State for Defence if he will give the latest estimate of the conventional balance between the Warsaw pact and the North Atlantic Treaty Organisation; and if he will make a statement.

68. **Dr. Moonie:** To ask the Secretary of State for Defence if he will give the latest estimate of the conventional balance between the Warsaw pact and the North Atlantic Treaty Organisation; and if he will make a statement.

Mr. Archie Hamilton: The latest estimate of the balance of NATO and Warsaw pact conventional forces in Europe was published in chapter 6 of the "Statement on the Defence Estimates 1988". As the statement makes clear, the Warsaw pact enjoys huge numerical superiority and its forces are deployed so as to enable them to initiate surprise attack and large-scale offensive action. The Warsaw pact also has the potential to bring forward massive land-based reinforcements across relatively short distances. By contrast, NATO is faced with the need for many of its reinforcements to cross the Atlantic.

NATO Ships (Nuclear Weapons)

27. **Mr. Patchett:** To ask the Secretary of State for Defence if he has any plans to review with his colleagues

in the North Atlantic Treaty Organisation the number of nuclear weapons carried by NATO ships; and if he will make a statement.

49. **Mr. Battle:** To ask the Secretary of State for Defence if he has any plans to review with his colleagues in the North Atlantic Treaty Organisation the number of nuclear weapons carried by North Atlantic Treaty Organisation ships; and if he will make a statement.

53. **Mr. Wilson:** To ask the Secretary of State for Defence if he has any plans to review with his colleagues in the North Atlantic Treaty Organisation the number of nuclear weapons carried by North Atlantic Treaty Organisation ships; and if he will make a statement.

Mr. Younger: I refer the hon. Members to the reply I gave earlier today to the hon. Member for Glasgow, Hillhead (Mr. Galloway).

COD Donnington (Fire)

29. **Mr. Grocott:** To ask the Secretary of State for Defence how many witnesses have so far been interviewed by the Ministry of Defence team inquiring into the fire at COD Donnington.

Mr. Freeman: The board of inquiry into the fire at COD Donnington has so far taken evidence from 27 witnesses.

Strategic Defence Initiative

31. **Mr. Vaz:** To ask the Secretary of State for Defence what account Her Majesty's Government take, in deciding whether to maintain their support for the strategic defence initiative, of the latest information and evidence on the technical feasibility of the project; and if he will make a statement.

56. **Miss Lestor:** To ask the Secretary of State for Defence what account Her Majesty's Government take, in deciding whether to maintain their support for the strategic defence initiative, of the latest information and evidence on the technical feasibility of the project; and if he will make a statement.

80. **Mr. Illsley:** To ask the Secretary of State for Defence what account Her Majesty's Government take, in deciding whether to maintain their support for the strategic defence initiative, of the latest information and evidence on the technical feasibility of the project; and if he will make a statement.

Mr. Harry Barnes: To ask the Secretary of State for Defence what account Her Majesty's Government take, in deciding whether to maintain their support for the strategic defence initiative, of the latest information and evidence on the technical feasibility of the project; and if he will make a statement.

Mr. Sainsbury: The aim of the strategic defence initiative research programme remains to determine the feasibility of effective ballistic missile defences, and it would be inappropriate to prejudge the outcome of such work. Accordingly, the Government continue to support the strategic defence initiative research programme and the involvement in it of United Kingdom entities.

Front-line Aircraft

32. **Mr. Martlew:** To ask the Secretary of State for Defence what is his estimate of the current proportion of the RAF front-line aircraft which are not fully operational.

70. **Mr. Morgan:** To ask the Secretary of State for Defence what is his estimate of the current proportion of the RAF's front-line aircraft which are not fully operational.

Mr. Archie Hamilton: I refer the hon. Members to the reply I gave earlier today to the hon. Members for Hemsworth (Mr. Buckley) and for Hammersmith (Mr. Soley).

Mr. O'Neill: To ask the Secretary of State for Defence why the Hawk aircraft referred to on page 23 of the "Statement on the Defence Estimates" are not included in the list of front-line RAF units given on page 76 of the same document.

Mr. Archie Hamilton: Annex C of volume 1 of the "Statement on the Defence Estimates 1988" is primarily concerned with front-line units. The Hawk aircraft mentioned on page 23 are not included because their primary role is training.

Nuclear Weapons

33. **Mr. Cryer:** To ask the Secretary of State for Defence if he has any plans to improve safeguards against accidental use of nuclear weapons; and if he will make a statement.

Mr. Archie Hamilton: We are fully confident that appropriate safeguards exist to prevent the accidental use of the United Kingdom's nuclear weapons. We keep our safeguarding arrangements under constant review.

Submarine Technology

34. **Mr. Ingram:** To ask the Secretary of State for Defence what is the current level of expenditure on conventional submarine technology.

Mr. Sainsbury: The majority of expenditure on conventional submarines is currently directed towards the introduction into service of the type 2400 upholder class. As stated in table 3.2 of the 1988 "Statement on the Defence Estimates", volume 2, the current commitment of funds to this programme is £620 million.

Destroyers and Frigates

35. **Mr. Douglas:** To ask the Secretary of State for Defence if he will make a statement on the current numbers of destroyers and frigates available for operational purposes in the Royal Navy.

Mr. Archie Hamilton: Following HMS Coventry joining the fleet earlier this month, there are currently 48 destroyers and frigates in service with the Royal Navy, of which 41 are available for operational deployment immediately or within a short period.

Aircraft Recognition

37. **Mr. Boateng:** To ask the Secretary of State for Defence if he will review the effectiveness of the technology

currently used by the Royal Navy to distinguish between oncoming civilian and military aircraft; and if he will make a statement.

51. **Mr. Frank Cook:** To ask the Secretary of State for Defence if he will review the effectiveness of the technology currently used by the Royal Navy to distinguish between oncoming civilian and military aircraft; and if he will make a statement.

55. **Mr. Tony Banks:** To ask the Secretary of State for Defence if he will review the effectiveness of the technology currently used by the Royal Navy to distinguish between oncoming civilian and military aircraft; and if he will make a statement.

83. **Mr. Galbraith:** To ask the Secretary of State for Defence if he will review the effectiveness of the technology currently used by the Royal Navy to distinguish between oncoming civilian and military aircraft; and if he will make a statement.

Mr. Archie Hamilton: The effectiveness of technology used by the Royal Navy is kept under regular review.

Identity Cards

38. **Mr. Favell:** To ask the Secretary of State for Defence how many people for whom he has responsibility carry an identity card.

Mr. Sainsbury: This information is not held centrally and could be obtained only at disproportionate cost. However, idendity cards are carried by all regular members of Her Majesty's forces and by most reservists. Various MOD civilian staff also carry identification cards, mainly when serving in service establishments or with Her Majesty's forces afloat or overseas. Dependents of service and MOD personnel serving overseas may also carry identity cards. Security passes, warrants and other documents are also issued to service and civilian personnel as required for the execution of their duties.

Defence Establishments (Dispersal)

39. **Mr. Fallon:** To ask the Secretary of State for Defence what further consideration is being given to moving defence establishments to the northern region.

Mr. Sainsbury: I have nothing to add at present to the reply I gave to my hon. Friend the Member for Stockton, South (Mr. Devlin) on 30 June, at column *319*.

Persian Gulf

42. **Sir John Biggs-Davison:** To ask the Secretary of State for Defence if he will make a statement about the current situation with regard to British and Allied patrolling of the Gulf.

Mr. Archie Hamilton: The British Government welcome the current moves towards a settlement of the Iran-Iraq conflict, but it would be premature to modify the current pattern of operations of the Armilla patrol or the tri-national United Kingdom/Netherlands/Belgium mine countermeasures until the threat to merchant shipping in the Gulf has clearly been seen to have diminished.

Tornado Aircraft

43. **Mr. Sedgemore:** To ask the Secretary of State for Defence what percentage of the RAF's Tornado allocation is currently flying with ballast in the nose cone to compensate for the absence of radar systems found to be not fully functional.

63. **Ms. Walley:** To ask the Secretary of State for Defence what percentage of the RAF's Tornado allocation are currently flying with ballast in the nose cone to compensate for the absence of radar systems found to be not fully functional.

77. **Mr. Skinner:** To ask the Secretary of State for Defence what percentage of the Royal Air Force's Tornado allocation are currently flying with ballast in the nose cone to compensate for the absence of radar systems found to be not fully functional.

Mr. Sainsbury: There are no front-line Tornado F3 aircraft flying with ballast.

Stonehenge

44. **Ms. Abbott:** To ask the Secretary of State for Defence if he will call for a report from the chief constable of the Ministry of Defence police as to the powers under which members of that force were recently deployed at Stonehenge on land not owned by his Department; and if he will make a statement.

Mr. Tony Lloyd: To ask the Secretary of State for Defence if he will call for a report from the chief constable of the Ministry of Defence police as to the powers under which members of that force were recently deployed at Stonehenge on land not owned by his Department; and if he will make a statement.

Mr. Sainsbury: I refer the hon. Members to the reply I gave to the hon. Member for Leyton (Mr. Cohen) on 30 June, at column *324*.

Wormhoudt

46. **Mr. Rooker:** To ask the Secretary of State for Defence if his Department has yet completed its consideration of requests for posthumous awards for bravery at Wormhoudt in May 1940.

Mr. Freeman: Awards and medals for battles and operations which took place during the second world war were examined in detail in 1946. It was judged that no further awards should be instituted after that date. This decision was approved by His Majesty King George VI, and the ruling remains in force today. I am therefore unable to recommend the grant of any posthumous awards for actions during the second world war.

Gallantry medals are awarded on the basis of recommendations put forward at or near the time of the incident. They are then subjected to selection by the appropriate chain of command. Although great care was taken during the 1946 review to consider those who deserved gallantry awards, there must inevitably have been very many acts of individual bravery which have not been formally recognised. This does not detract from the bravery shown by the individuals concerned.

I accept that there will inevitably be a sense of injustice that the great courage and self-sacrifice shown by Capt. James Frazer Lynn-Allen, CSM Augustus Jennings and Sgt. Stanley Moore, in the face of the brutality of their captors at Wormhoudt in May 1940, was not officially recognised. Captain Lynn-Allen first remonstrated with

the SS guards before being killed while assisting a wounded man to escape to safety. CSM Jennings and Sgt. Moore died smothering grenades with their bodies. Their actions deserve our highest praise and admiration and are, I know, a source of pride and comfort to the survivors of the massacre, their regiment and their relatives.

Mr. Rooker: To ask the Secretary of State for Defence what is his policy towards the citing by authors and researchers of the war crimes interrogation unit's reports of the Wormhoudt massacre to which they have been given access in military museums.

Mr. Freeman *[holding answer 6 July 1988]:* I would expect access to public records in military museums to be in accordance with the criteria laid down in the public records lists.

Mr. Rooker: To ask the Secretary of State for Defence if he has any proposals to withdraw copies of war crimes interrogation unit's reports of the Wormhoudt massacre from military museums.

Mr. Freeman *[holding answer 6 July 1988]:* I have no present plans to do so.

Mr. Rooker: To ask the Secretary of State for Defence if he will publish a list of titles of the documents relating to the Wormhoudt massacre which his Department is making available to the relevant authorities in the Federal Republic of Germany.

Mr. Freeman *[holding answer 6 July 1988]:* We will make all the evidence we have available to the relevant authorities in the Federal Republic of Germany. Once German legal proceedings are concluded, consideration will be given to opening, for public inspection, all the files so made available.

Mangusta Programmes

47. **Mr. Duffy:** To ask the Secretary of State for Defence when he next expects to have talks about the EH101 and A129 Mangusta programmes.

Mr. Sainsbury: My right hon. Friend regularly takes stock with his European colleagues of progress on important collaborative projects, such as the Anglo-Italian EH101 helicopter programme and the proposed A129 light attack helicopter, which is being studied by the United Kingdom, Italy, Spain and the Netherlands.

Spare Parts (Labelling)

48. **Mr. Latham:** To ask the Secretary of State for Defence what progress has been made by the Chief of Defence Procurement in introducing a labelling scheme for spare parts, following his recent statement to the Public Accounts Committee.

Mr. Sainsbury: The great majority of defence contractors are now co-operating with the Ministry's spares price-labelling requirements. The proportion of price-labelled stocks is steadily increasing in service depots.

Royal Dockyards

50. **Mr. Flynn:** To ask the Secretary of State for Defence if, in the light of the projected redundancies at Devonport and Rosyth, he will reconsider the balance between the core programme and unallocated work for the royal dockyards.

81. **Mr. Ted Garrett:** To ask the Secretary of State for Defence if, in the light of the projected redundancies at Devonport and Rosyth, he will reconsider the balance between the core programme and unallocated work for the royal dockyards.

Mr. Sainsbury: I refer the hon. Members to the answer I gave earlier today to the hon. Members for Burnley (Mr. Pike) and for Ogmore (Mr. Powell).

RAF Aircraft (Demonstrations)

52. **Mr. Bellingham:** To ask the Secretary of State for Defence if he will outline current Royal Air Force practice with regard to the organisation of commercial demonstrations of different aircraft in service.

Mr. Freeman: The Defence Export Services Organisation considers requests from industry for assistance in the organisation of commercial demonstrations of defence equipment in service. The Royal Air Force, in turn, like the other services, makes every effort to provide the required facilities.

Nuclear Test Site (Nevada)

54. **Mr. Macdonald:** To ask the Secretary of State for Defence what assessment he has made of the likely continued availability of Nevada as a test site for British nuclear weapons and as to the factors which will influence this.

64. **Mrs. Wise:** To ask the Secretary of State for Defence what assessment he has made of the likely continued availability of Nevada as a test site for British nuclear weapons and as to the factors which will influence this.

71. **Mr. Doran:** To ask the Secretary of State for Defence what assessment he has made of the likely continued availability of Nevada as a test site for British nuclear weapons and as to the factors which will influence this.

Mr. Sainsbury: I refer the hon. Members to the answer I gave earlier today to the hon. Member for Liverpool, Walton (Mr. Heffer).

Radar Tracking Techniques

57. **Mr. Ian Taylor:** To ask the Secretary of State for Defence whether there are any plans to review the radar tracking techniques used on British warships in the light of recent events in the Gulf.

Mr. Archie Hamilton: Operating procedures on Her Majesty's ships are kept under constant review.

Procurement Policy

58. **Mr. Wigley:** To ask the Secretary of State for Defence what measures his Department operates to ensure that its procurement policy takes account of regional economic development needs.

Mr. Sainsbury: I have nothing to add to the answer I gave to the hon. Member on 24 June, at column *739*.

ALARM

59. **Dr. Godman:** To ask the Secretary of State for Defence what is his latest estimate of the time and cost overruns on the ALARM anti-radar missile programme.

61. **Mr. Meale:** To ask the Secretary of State for Defence what is his latest estimate of the time and cost overruns on the ALARM anti-radar missile programme.

Mr. Sainsbury: I have nothing to add to the reply given to the hon. Member for Rhondda (Mr. Rogers) on 29 April, at column *309*.

Low Flying

62. **Mr. Ieuan Wyn Jones:** To ask the Secretary of State for Defence when he last met representatives of countryside and farming organisations to discuss problems associated with low-flying military exercises.

Mr. Freeman: Neither I nor my right hon. Friend have attended any such meetings recently. However, officials, during the course of normal business, are in fairly regular contact with representatives of countryside and farming organisations with regard to low-flying military exercises and other matters.

Mr. Canavan: To ask the Secretary of State for Defence what is the frequency of low-level RAF flights *(a)* in Scotland and *(b)* in the United Kingdom.

Mr. Freeman: A low-level training sortie or flight covers on average 2·5 low-flying areas and the number of flights that take place entirely within Scotland is not separately recorded. A comparison in terms of aircraft movements can be made, although available statistics cover all British military users, not just the RAF. On this basis, in 1987 there were 24,679 movements in Scotland and 262,948 movements in the United Kingdom as a whole.

Mrs. Margaret Ewing: To ask the Secretary of State for Defence if United States Air Force B-52 aircraft are permitted to use the Highlands restricted area for terrain following radar low flying.

Mr. Freeman *[holding answer 16 June 1988]:* Normally only RAF and United Kingdom-based USAF aircraft are allowed to conduct low-flying training with terrain following radar in the Highlands restricted area, although an exception has been made in the past for USAFE C-130 aircraft based in the Federal Republic of Germany.

Mrs. Margaret Ewing: To ask the Secretary of State for Defence which types of United States military aircraft are permitted to fly at less than 250 ft in the three tactical training areas in the United Kingdom.

Mr. Freeman *[holding answer 16 June 1988]:* Use of the three tactical training areas (TTAs) in the United Kingdom is not formally limited to certain aircraft types, although in practice approval to operate in a TTA would normally be sought only on behalf of aircraft whose operational role required such low-level flights. All requests to operate in a TTA are considered on their merits; no requests have been received from the United States air force.

Defence Commitments (Review)

67. **Mr. Wallace:** To ask the Secretary of State for Defence if he has any plans to institute a review of Britain's defence commitments; and if he will make a statement.

Mr. Archie Hamilton: I refer the hon. Member to the reply which my hon. Friend the Member for Hertfordshire, North (Mr. Stewart) gave to my hon. Friend the Member for Northampton, North (Mr. Marlow) on 27 April, at column *144*.

NATO (Expenditure)

73. **Mrs. Mahon:** To ask the Secretary of State for Defence when he next expects to discuss with North Atlantic Treaty Organisation colleagues the relative share of military expenditure borne by individual countries within the Alliance.

78. **Mr. Cohen:** To ask the Secretary of State for Defence when he next expects to discuss with North Atlantic Treaty Organisation colleagues the relative share of military expenditure borne by individual countries within the Alliance.

Mr. Haynes: To ask the Secretary of State for Defence when he next expects to discuss with North Atlantic Treaty Organisation colleagues the relative share of military expenditure borne by individual countries within the Alliance.

Mr. Younger: I refer the hon. Members to the answer I gave earlier today to the hon. Member for Sunderland, North (Mr. Clay).

Military Equipment Sales (Middle East)

74. **Mr. Dykes:** To ask the Secretary of State for Defence if he is now able to review the potential of further high technology military equipment sales to middle eastern countries following the recent announcement of major new defence contracts with the kingdom of Saudi Arabia.

Mr. Sainsbury: We, of course, keep under constant review the potential for defence sales to the middle east as elsewhere. We therefore support the companies concerned in their pursuit of all potential sales opportunities where these are consistent with Government policy, which takes into account political, strategic, security and humanitarian factors.

Chemical Weapons

75. **Mr. Graham:** To ask the Secretary of State for Defence what new confidence building measures are proposed in the area of chemical weapons, following the recent exchange of visits by British and Soviet scientists to their respective facilities.

84. **Mr. Darling:** To ask the Secretary of State for Defence what new confidence building measures are proposed in the area of chemical weapons, following the recent exchange of visits by British and Soviet scientists to their respective facilities.

Mr. Archie Hamilton: We are currently making a detailed assessment of the recent exchange of visits between the Chemical Defence Establishment, Porton Down, and the Soviet military chemical facility at Shikhany. When the outcome of this assessment is available, we will consider what further steps might be taken in this field.

Arms Sales

79. **Mr. Hind:** To ask the Secretary of State for Defence if he will make a further statement on the progress of DESO in the promotion of arms sales in 1987-88.

Mr. Sainsbury: I refer my hon. Friend to the reply I gave him on 28 June 1988.

Listed Military Buildings

Miss Widdecombe: To ask the Secretary of State for Defence when he expects to announce disposal plans for the redundant listed buildings recently visited by the advisory committee on listed military buildings.

Mr. Freeman: The Historic Military Buildings Committee most recently visited three sites in Gosport in May. The disposal of RNAD Priddy's Hard is being planned for mid-1989 and we hope to announce further details later this year. The future of Fort Rowner is currently being discussed with the local authorities concerned. St. George's barracks will be released in due course for sale when new accommodation for the present occupants has been completed.

The committee has also visited Woolwich. The future of the majority of historic buildings on the Woolwich Arsenal west site is inextricably linked with the future location of the Directorate General of Defence Quality Assurance. It is now clear, however, that the riverside area will not be required, and although the precise boundaries have still to be defined it will be possible to release for other purposes a substantial area of land including the Grand Store, New Laboratory Square, Riverside Guardroom and Mallets Mortar. Once the boundaries have been determined we will seek discussions with the planning authorities at an early date.

Information Technology

86. **Mr. Simon Coombs:** To ask the Secretary of State for Defence how much his Department spends on information technology to assist in the control of Ministry stocks.

Mr. Sainsbury: We estimate that some £16·3 million will be spent in the financial year 1988-89 on information technology to assist, directly or indirectly, in the control of Ministry stocks. This figure includes the acquisition of new hardware, the replacement of life-expired hardware and ongoing commitments for maintenance and software licences.

Territorial Army

87. **Mr. Tredinnick:** To ask the Secretary of State for Defence what steps he intends to take to improve Territorial Army recruitment.

Mr. Freeman: The Government continue to make every effort to improve Territorial Army recruitment through local and national recruiting campaigns, and we keep under careful review pay and conditions of service of volunteers. Results have so far been satisfactory, but we are not complacent and continue to look for new sources of recruitment to tap. The Government have also taken a number of measures to improve retention, including measures to improve the quality of training. In addition we are about to launch a campaign recommended by the national employer liaison committee to promote public awareness of the value of the Territorial Army and the other reserve forces.

Property Services Agency

88. **Mr. Brazier:** To ask the Secretary of State for Defence what steps his Department is taking to prepare for the untying of the exclusive contractual relationship with the Property Services Agency.

Mr. Freeman: A small team has been established within MOD to plan the arrangements for dealing with works services after 1 April 1990. They have completed preliminary consultations and commenced their detailed work.

Overseas Students

89. **Mr. Andrew Mitchell:** To ask the Secretary of State for Defence how many overseas students were trained at defence establishments in 1987.

Mr. Freeman: I refer my hon. Friend to the answer I gave to my hon. Friend the Member for Batley and Spen (Mrs. Peacock) on 1 July 1988, at column *223*.

Film-making (Public Relations)

90. **Mr. Summerson:** To ask the Secretary of State for Defence what steps the services' public relations departments take to assist and advise film and television programme makers in the preparation of items of military history or interest.

Mr. Archie Hamilton: All requests for assistance and advice are considered on their merits. In general, assistance is given when it is compatible with the interests of the Department to do so, subject to suitable resources being available.

Frigates and Destroyers (Orders)

91. **Dr. Michael Clark:** To ask the Secretary of State for Defence what progress he has made in achieving better value for money from his frigate and destroyer orders for the Royal Navy.

Mr. Sainsbury: The progress that is being made is demonstrated in the recent order for three type 23 frigates, where the average unit cost of each is about £10 million less than the average of the last three ordered in 1986.

Shipbuilding Industry

92. **Mr. Couchman:** To ask the Secretary of State for Defence what estimate he has made of how many jobs have been secured directly and indirectly in the shipbuilding industry by orders for ships for the Royal Navy in the last 12 months.

Mr. Sainsbury: Orders placed in the last 12 months for three Duke class type 23 frigates, one auxiliary oiler replenishment vessel and four Sandown class single role minehunters (together with some other minor contracts) are estimated to have secured an average of 13,000 to 14,000 jobs directly and indirectly over the next four years or so. The order for a Vanguard class SSBN placed this year will secure jobs for about 5,000 over a similar period.

Combined Cadet Force

Mr. Harry Greenway: To ask the Secretary of State for Defence how many branches of the Combined Cadet Force are currently functioning in *(a)* maintained and *(b)* independent schools; what numbers of pupils are involved in each case and at what annual cost; and if he will make a statement.

Mr. Freeman: There are currently 254 detachments of the CCF, of which 58 are in maintained schools, with 6,579 pupils. There are 196 detachments in independent schools, with 38,158 pupils. I regret that it is not possible to provide a cost breakdown between the two categories. Additionally, there are 143 detachments of the ACF in schools, with 4,016 cadets; over one third of these are "closed" detachments limited to pupils of the school.

The CCF is part of the national youth movement and provides a great many young people with the opportunities to develop qualities of good citizenship and the spirit of service. The Government are very conscious of their value and will continue to encourage their well-being.

Home Service Force

Mr. Thorne: To ask the Secretary of State for Defence what is the current composition of the Home Service Force in terms of (i) its establishment, (ii) numbers currently recruited and (iii) what weapons and equipment are issued; and what are his plans for expanding the Home Service Force.

Mr. Freeman: The current establishment of the Home Service Force is 4,497; recruited personnel numbered approximately 3,157 as at 31 May 1988. The Home Service Force is issued with standard Army weapons and equipment appropriate to its operational role. It is planned to increase the establishment of the Home Service Force to 5,000 by 1990.

Mr. Thorne: To ask the Secretary of State for Defence what criteria led to the formulation of the tasks of the Home Service Force; what assessment was made as to the numbers and establishment of a Home Service Force necessary to be able to perform such tasks; and what are the age limits for membership of the Home Service Force.

Mr. Freeman: The Home Service Force is intended to draw on the pool of manpower who have had some prior military training and who therefore can fulfil a useful role with a minimum of training. It was decided that such personnel would best be suited to the home defence role, thus releasing Regular Army and other manpower for other tasks. The establishment selected reflects the numbers that it was assessed, on the basis of the trial conducted in 1982, might be available. Enlistment to the Home Service Force is between the ages of 20 and 50, with a maximum retention age of 60.

Contracts (Profit Formula)

Mr. Patrick Thompson: To ask the Secretary of State for Defence if he will make a statement on the report by the review board on its third annual review of the profit formula for Government non-competitive contracts.

Mr. Younger: The Government accept the principal recommendation by the review board in its report that there should be no change in the existing profit formula which has been in operation since 1 July 1987—*Official Report*, 24 July 1987, column 602. Discussions are already taking place between officials and the CBI on other aspects of the board's report. Copies of the report have been placed in the Library.

Members' Correspondence

Mr. Tom Clarke: To ask the Secretary of State for Defence what is the average length of time taken by his Department to respond to correspondence from right hon. and hon. Members during the summer recess.

Mr. Younger: The average length of time taken to respond to correspondence from right hon. and hon. Members during the summer recess should not differ greatly from our normal practice of answering within three weeks. However, allowance must be made for some slight delays owing to summer leave arrangements.

Nuclear Test Victims

Mr. Hinchliffe: To ask the Secretary of State for Defence (1) what action he is taking to investigate the claims of the British Nuclear Test Veterans Association that they have discovered malformity in 700 children born to test veterans; and if he will make a statement;

(2) if he will instruct the National Radiological Protection Board to expand the range of medical conditions included in its next report, for the 10 years commencing January 1984, into the incidence of disease and conditions affecting British nuclear test veterans; if he will ensure that cases of skin disease, depression, genetic disorders, infant mortality, sterility, deformity, miscarriage and still birth will be considered for investigation; and if he will make a statement;

(3) what action he is taking to investigate the causes of infant mortality, deformity, miscarriages and still birth amongst the families of ex-service men who served in the Pacific during the 1950s;

(4) what action he is taking to investigate medical conditions, not related to mortality and cancer, which may have arisen due to ex-service men's exposure to radioactivity during their military service in the Pacific in the 1950s;

(5) what action has been taken to investigate cell scarring in thyroid, liver and intestinal tissues, the reduction of lymphoid cells in blood, overgrowth of lymph tissues in lymph glands and premature aging, as conditions arising from over exposure to ionising radiation among British nuclear test veterans serving in the Pacific during the 1950s;

(6) what action has been taken to investigate cases of temporary or permanent sterility, reduced fertility and hereditary changes in later generations due to changes in chromosome and gene formation, as conditions arising from over-exposure to ionising radiation, among British nuclear test veterans serving in the Pacific during the 1950s;

(7) what action has been taken to investigate cases of bone cell inflammation and bone cell death, as conditions arising from over exposure to ionising radiation, among British nuclear test veterans serving in the Pacific during the 1950s;

(8) what action has been taken to investigate cases of eye cataracts and eye surface burns, as conditions arising over-exposure to ionising radiation, among British nuclear test veterans serving in the Pacific during the 1950s;

(9) what action has been taken to investigate cases of varicose veins as a condition arising from over-exposure to ionising radiation among British nuclear test veterans serving in the Pacific during the 1950s;

(10) what action has been taken to investigate cases of redness, blistering, baldness, ulceration and scarring of the skin, as conditions arising from over-exposure to ionising radiation, among British nuclear test veterans serving in the Pacific during the 1950s.

Mr. Sainsbury: When the National Radiological Protection Board (NRPB) was commissioned to undertake its recent study, the conduct of that study was left as a matter for the professional judgment of the NRPB, in consultation with other experts, such as the Imperial Cancer Research Fund. The board decided to rely primarily on mortality as an indicator of health and also used the readily available cancer registration data. In choosing these reliable sources the NRPB recognised the impracticability of attempting to obtain comprehensive data about the wide range of other diseases, the records relating to which are much less complete. None the less, it was recognised from the outset that, if the findings showed cause for concern, other investigations might prove to be necessary.

In the event, the conclusion of the report is that participation has not had a detectable effect on the expectation of life of the participants nor on their total risk of developing cancer. This overall conclusion stands despite the observed higher incidence of certain leukaemias and multiple myelomas in the participants as opposed to the control group, not least because this higher incidence was more marked among participants not present at the time of detonation.

The Government do not therefore accept that there is any justification for further investigation other than the follow-up of mortality and cancer registration data recommended by the NRPB to investigate the incidence of disorders referred to in the questions.

Mr. Hinchliffe: To ask the Secretary of State for Defence in how many cases the service medical records of former military personnel who served in the Pacific during the British nuclear tests in the 1950s have been released to their general practitioners.

Mr. Sainsbury: General practitioners are not required to state the specific purpose for which such records are required; thus the information requested is not available.

Mr. Hinchliffe: To ask the Secretary of State for Defence how many service men who took part in British nuclear tests in the 1950s have been consulted and examined by the National Radiological Protection Board as part of their report of the incidence of mortality and cancer in British nuclear test veterans.

Mr. Sainsbury: The mortality and cancer incidence information which was analysed by NRPB was obtained from records held by Office of Population, Censuses and Surveys (OPCS), National Health Service (NHS) central registers and other official records. Individual service men were neither consulted nor examined. As the report acknowledges, a valuable contribution to checks of the validity and completeness of the study was made by various groups and ex-service organisations who supplied lists of names of participants.

Mr. Hinchliffe: To ask the Secretary of State for Defence if the crew of ships which took part in the Monte Bello tests in 1952 were included in the National Radiological Protection Board report into the mortality and cancer incidence in United Kingdom participants in United Kingdom atmospheric nuclear weapon tests and experimental programmes; and if he will make a statement.

Mr. Sainsbury: All the Royal Navy ships that participated in the nuclear test programme were identified and their crews included in the NRPB study. It was estimated that a 99 per cent. coverage of Royal Naval personnel had been achieved, as shown in table 5.5 of the NRPB report.

Mr. Hinchliffe: To ask the Secretary of State for Defence what action has been taken to investigate the complaints of aborigines at Wallatina station who claim that the Totem 1 blast in 1953 which took place at Emu field was the cause of mass sickness and fatalities; and if he will make a statement.

Mr. Sainsbury: The evidence presented on behalf of Her Majesty's Government to the Australian Royal Commission, which included substantial new work on theoretical modelling of the path of the fallout, does not support the contention that harm could have been caused to aborigines at Wallatima by the Totem 1 explosion in 1953. The decision to embark on any further investigation is a matter for the Australian Government.

Mr. Hinchliffe: To ask the Secretary of State for Defence what would be the estimated average mortality rate due to multiple myeloma for the British nuclear test veterans as investigated by the National Radiological Protection Board for the 10 years 1984 to 1994.

Mr. Sainsbury: In the study (on page 86, section 10) the NRPB estimates that during the 10-year period 1984 to 1994 about 30 deaths would be expected from leukaemia and multiple myeloma in the participants and a similar number in the controls, if the men experienced the normal national mortality and cancer rates in England and Wales. Of these 30 deaths, approximately one third are expected to be from multiple myeloma. Of course, some assumptions have been made in obtaining these figures and they are provisional estimates.

Mr. Hinchliffe: To ask the Secretary of State for Defence if he will take steps to compensate fully British nuclear test veterans and their families who are suffering from, and have lost relatives due to, multiple myeloma and leukaemia, other than chronic lymphatic leukaemia, following the publication of the National Radiological Protection Board's investigation into the mortality and cancer incidence in United Kingdom participants in United Kingdom atmospheric nuclear weapon tests and experimental programmes; and if he will make a statement.

Mr. Sainsbury: Former service men or their next-of-kin who believe that their health may have suffered as a result of participation in the United Kingdom nuclear test programme are already entitled to apply to the

Department of Social Security for consideration of a war pension or gratuity. The decision concering the award is one for the Department of Social Security, but it is not necessary for the applicant to prove negligence, and the Department of Social Security will accept claims if it is satisfied that there is reliable evidence of reasonable doubt that the disability suffered is attributable to service.

Maralinga (Radioactivity)

Mr. Hinchliffe: To ask the Secretary of State for Defence what is the extent of contamination at Maralinga, in square acres, to the present date; what weight of plutonium is buried there, whether he has received representations from the Australian Government to decontaminate Maralinga and to remove the plutonium; and if he will make a statement.

Mr. Sainsbury: The area at Maralinga where residual levels of surface radioactivity have been measured extends to about 200 square kilometres (50,000 acres). The amount of plutonium in the burial pits does not exceed 20kg and may be much less. The Australian Government have made no request for the United Kingdom to participate in any clean-up operation, but we are providing technical advice and assistance on an agreed basis.

Mr. Hinchliffe: To ask the Secretary of State for Defence what are the current conditions and contamination level of the Monte Bello Islands, Emu and Maralinga; and if he will make a statement.

Mr. Sainsbury: Recent surveys of the Monte Bello Islands show that some small areas of low surface radioactivity remain, and that the minor access restrictions that apply now can probably be removed totally within the next 30 years. I understand that the Australian Government intend to return control of the islands to the Western Australian Government, who have plans to designate the area a nature reserve and marine park. The current condition of the Emu field area is that low levels of surface radioactivity extend to an area of about 10 square kilometres. The highest levels there are considerably lower than the highest levels at Maralinga.

Chemical Warfare Research

Mr. Ashley: To ask the Secretary of State for Defence what information is available to those currently engaged in chemical warfare research on the extent and implications of Japanese research programmes into bacteriological warfare using prisoners of war during the war of 1941 to 1945.

Mr. Freeman: Those engaged in chemical defence research have access to all such information held by the Government.

Mr. Ashley: To ask the Secretary of State for Defence if he will set up an inquiry into the alleged use by the Japanese of prisoners of war for research programmes into bacteriological warfare during the war of 1941 to 1945.

Mr. Freeman: Allegations that British prisoners of war held by the Japanese were used in bacteriological warfare experiments between 1941 and 1945 have been the subject of lengthy and exhaustive investigation. No evidence to substantiate them has been found and there are therefore no plans to institute a further inquiry.

United Kingdom Mobile Force

Mr. O'Neill: To ask the Secretary of State for Defence what is the current provision for logistical support for the United Kingdom mobile force; and how much of it is currently provided by the Danish Government.

Mr. Archie Hamilton: The United Kingdom mobile force is a self-contained force which incorporates its own logistic support group. Current plans provide for some additional logistic support to be provided for the United Kingdom mobile force by the Danish Government. Details of the plans and amounts of support provided are, however, classified.

Western European Union

Mr. O'Neill: To ask the Secretary of State for Defence whether the Western European Union has been used as a forum for co-ordinating policy on any other out-of-area issues, apart from mine clearance operations in the Gulf.

Mr. Archie Hamilton: Western European Union consultation on out-of-area issues has been confined to matters relating to the Gulf, which includes co-ordination of the joint Belgium/Netherlands/United Kingdom mine countermeasures force. However, one of the objectives of the United Kingdom presidency of the Western European Union is to develop the Western European Union as a forum for co-ordinating European approaches to out-of-area issues generally.

Abbot Self-propelled Howitzer

Mr. O'Neill: To ask the Secretary of State for Defence when companies were asked to bid for the contract to replace the Abbot self-propelled howitzer; how many bids were received; when the last bid was received; and when he expects to announce the replacement order.

Mr. Sainsbury: A request for quotations for 155 mm self-propelled howitzers was issued to industry in December 1986. Responses were received last year from four companies, but it was necessary to seek further information and revised proposals from some of the companies involved. These revised proposals were received in January this year. Regarding the way ahead, I would refer the hon. Member to the answer I gave to my hon. Friend the Member for Berkshire, East (Mr. MacKay) on 8 June 1988, at column *586*.

Main Battle Tank

Mr. O'Neill: To ask the Secretary of State for Defence what discussions have taken place between his Department and other North Atlantic Treaty Organisation Defence Ministries concerning the collaborative producton of a new main battle tank.

Mr. Sainsbury: There are no current discussions with our NATO allies on any proposals for collaborative production of a new main battle tank. However, we are looking jointly with some allies at the characteristics of tank main armament that may be required in the future.

DROPS

Sir Ian Gilmour: To ask the Secretary of State for Defence, pursuant to the answer of 15 July, *Official*

Report, column *377*, what information he has about civilian injuries caused by the DROPS vehicle overturning on 17 June.

Mr. Sainsbury: I have no knowledge of any MOD or other civilian being involved in the incident.

ENVIRONMENT

Planning Inquiries (Kent)

Mr. Gale: To ask the Secretary of State for the Environment if he will list all the inquiries into planning applications relating to Kent conducted since 9 June 1987.

Mr. Ridley: Since 9 June 1987 inquiries have been held into the following planning applications, which I have called in for my decision:

Local planning authority	*Proposed development*
1. Dartford Borough Council	Business Park, hotel, residential development, nature reserve and Dartford Northern Bypass on land at Dartford Marshes; joint inquiry into mixed development scheme south east of River Cray and Thames Road
2. Dartford Borough Council	Office development at Hawkley Road/Darenth Road, Dartford
3. Dartford Borough Council	Business Park and residential development in North West Sector, Dartford
4. Dartford Borough Council	Residential development at Darenth Park Hospital
5. Maidstone Borough Council	Motorway service area at M20 at Hollingbourne
6. Rochester upon Medway District Council	Industrial building and airship for the manufacture and testing of microlight aircraft at The Paddock, Borroughs Lane, Middle Stoke
7. Sevenoaks District Council	Two motorway service areas at Pedham Place and West Kingsdown
8. Sevenoaks District Council	Residential development at Croft Road, Westerham
9. Sevenoaks District Council	Residential development at Bowsers Meadow, Westerham
10. Sevenoaks District Council	Industrial and warehousing development at M20/M25 junction, Swanley
11. Sevenoaks District and Tonbridge and Malling Borough Councils	Service area on A21 at Kennards Farm and Barrets Wood, Leigh
12. Shepway District Council	Marina and associated residential development at Princes Parade, Hythe
13. Shepway District Council	Windsurfing centre at New Romney Pit, Greatstone
14. Thanet District Council	Access road to Ramsgate Harbour and associated development
15. Thanet District Council	Retail development at Margate Road, Broadstairs

Planning Applications

Mr. Colvin: To ask the Secretary of State for the Environment if he will publish in the *Official Report* a table showing *(a)* the number and percentage of planning applications refused, *(b)* the number and percentage of refused planning applications going to appeal and *(c)* the number and percentage of appeals upheld by his Department for the district council areas of Cotswold, New Forest and Test Valley boroughs over each of the last five years.

Mr. Ridley: The information readily available is given in the tables.

	Planning applications			*Planning appeals*			
	Received	*Refused*	*Percentage*	*Received*	*Decided*	*Allowed*	*Percentage*
Cotswold District Council							
1984-85	1,365	245	17·9	61	40	13	32·5
1985-86	1,412	254	18·0	51	36	11	30·6
1986-87	1,489	256	17·2	46	38	14	36·8
1987-88				69	35	13	37·1
New Forest District Council							
1984-85	2,277	437	19·2	133	112	36	32·1
1985-86	2,204	414	18·8	141	104	41	39·4
1986-87	2,279	421	18·5	180	141	53	44·7
1987-88				201	168	62	36·9
Test Valley District Council							
1984-85	1,359	180	13·2	57	62	19	30·6
1985-86	1,369	192	14·0	73	54	26	48·1

	Planning applications			Planning appeals			
	Received	Refused	Percentage	Received	Decided	Allowed	Percentage
1986-87	1,581	285	18·0	109	75	37	49·3
1987-88				123	119	48	40·3

Waste Imports

Mr. John Evans: To ask the Secretary of State for the Environment if he will state the quantity of toxic waste substances, arising from energy industries, which was imported into the United Kingdom in the last five years for detoxification treatment.

Mr. Moynihan: This information is not held centrally.

Channel Tunnel

Mr. Soley: To ask the Secretary of State for the Environment if he will make it his policy to call in any application for planning permission for the construction of a Channel tunnel terminal at the White City.

Mr. Trippier: The White City is one of several sites being considered by BR for a second terminal. I cannot give any commitment in advance of planning applications, if any, that might be submitted to the local planning authority.

Princes Dock, Liverpool

Mr. Parry: To ask the Secretary of State for the Environment when he expects to reach a decision on the planning application of Erril Holdings for the development of Princes dock, Liverpool; and if he will make a statement.

Mr. Trippier: This planning application is with Liverpool city council. If Liverpool wished to approve it the council would require special authorisation from the Secretary of State for the Environment as there are proposals to extend the Merseyside Development Corporation which include the site in question. The rights of the applicant to appeal against non-determination or refusal remain intact.

Liverpool Docklands

Mr. Parry: To ask the Secretary of State for the Environment how many planning applications have been made for the development of Liverpool docklands at the latest date.

Mr. Trippier: Statistics on planning applications are not collected for an area known as Liverpool docklands. For the period 1983-88, the Merseyside Development Corporation has approved 165 applications.

London Docklands (Roads)

Mr. Spearing: To ask the Secretary of State for the Environment if he will place in the Library a map showing those roads planned or projected in or adjacent to the area of the London Docklands Development Corporation that are *(a)* to be built and owned by the corporation and *(b)* to be constructed and owned by a local authority or the Department of Transport; and if he will make a statement on the arrangements he expects to make for those in category *(a)* in respect of their servicing and maintenance.

Mr. Trippier: A plan showing LDDC's road proposals will be placed in the Library shortly. The corporation will service and maintain its own roads, until such time as they may be adopted by an appropriate highway authority. Roads constructed by the Department of Transport and the local highway authorities are matters for my right hon. Friend the Secretary of State for Transport, and for the relevant local authorities, respectively.

Housing and Planning Act 1986

Sir Geoffrey Finsberg: To ask the Secretary of State for the Environment which sections of the Housing and Planning Act 1986, remain to be brought into force; and if he will list the dates on which he intends to make them operative.

Mr. Ridley: The following provisions of the Housing and Planning Act 1986 remain to be brought into force: sections 5, 7, 8, 30-38, 42, and 43 and certain minor and consequential amendments and repeals.

These provisions will be brought into force as appropriate, when the necessary preparatory work, including the making of statutory instruments, has been completed. However, the current Housing Bill includes provision to repeal section 7.

Council House Sales

Mr. Simon Hughes: To ask the Secretary of State for the Environment if he will publish in the *Official Report* the number of council-owned dwellings sold under the right to buy for each year since 1980 in *(a)* each London borough and *(b)* England as a whole.

Mr. Ridley: I shall write to the hon. Member.

Mr. Matthew Taylor: To ask the Secretary of State for the Environment how many council houses and flats in Devon and Cornwall have been sold by each local authority since the Housing Act 1980.

Mr. Ridley: Sales reported by the local authorities are given in the table:

	Houses	Flats
Devon		
East Devon[1]	1,237	38
Exeter	1,218	68
Mid Devon[1]	1,179	4
North Devon	1,080	4
Plymouth[1]	3,818	181
South Hams[1]	922	27
Teignbridge	1,347	18
Torbay[1]	993	10
Torridge	755	13
West Devon[1]	646	8
Cornwall		
Caradon	837	12
Carrick[1]	964	7
Kerrier	749	13
North Cornwall	1,029	11
Penwith[1]	658	20
Restormel	1,001	29
Isles of Scilly[1]	9	2

[1] incomplete data.

Housing (Devon and Cornwall)

Mr. Matthew Taylor: To ask the Secretary of State for the Environment whether he has any information regarding the number of people on housing association waiting lists in each local authority area in Devon and Cornwall.

Mr. Ridley: This information is not collected by my Department.

Mr. Matthew Taylor: To ask the Secretary of State for the Environment if he will list the projected building of council accommodation over the next five years in each local authority in Devon and Cornwall.

Mr. Ridley: The only projections centrally available at present are the figures of starts and completions for the years up to 1989/90 provided by the authorities in their 1987 housing investment programme HIP2 returns; these are available in the Library.

Mr. Matthew Taylor: To ask the Secretary of State for the Environment (1) if he will list the total number of people currently on the council housing waiting lists of each district authority in Devon and Cornwall;

(2) if he will list the total number of empty council housing units in each local authority area in Devon and Cornwall, dividing housing into houses, flats and caravans;

(3) if he will list the total stock of council accommodation currently owned by each district authority in Devon and Cornwall dividing the accommodation into houses, flats and caravans.

Mr. Ridley: The latest available information on the number of households on waiting lists for council housing is for April 1987 and was provided by local authorities in their 1987 housing investment programme returns; the figures appear in column B51 in the "HIP1 All items print", which is available in the Library. Local authorities' criteria for inclusion of names on the waiting lists are not uniform and the frequency of reviewing the lists varies.

The numbers of dwellings owned by each authority in Cornwall and Devon and, of these, the numbers vacant, including any awaiting demolition, appear in columns A11 and A81, respectively, of the same document.

The numbers of houses, flats and bungalows built for each authority with one, two or three bedrooms but not four-bedroomed or other dwellings, appear in "Housing Rents Statistics at April 1987", published by the Chartered Institute of Public Finance and Accountancy, which is also available in the Library.

Mr. Matthew Taylor: To ask the Secretary of State for the Environment if he will list the number of council houses and flats that have been built per year in each local authority in Devon and Cornwall since 1979.

Mr. Ridley: I shall write to the hon. Member.

Poor Housing

Mr. Frank Field: To ask the Secretary of State for the Environment whether he has yet allocated the additional £3 million which he announced on 17 June would be made available to areas of poor quality private sector housing; and if he will make a statement.

Mr. Ridley: Letters will be sent shortly to the leaders of the following local housing authorities informing them of the Government's intention to make available additional capital allocations for 1988-89 to assist them tackle their worst areas of private sector housing:

	£ million
Allerdale	0·20
Birmingham	0·40
Blackburn	0·40
Bolton	0·20
Hyndburn	0·20
Pendle	0·10
Rochdale	0·20
Sheffield	0·40
Stoke-on-Trent	0·25
Wirral	0·50

The additional expenditure is expected to be targeted on area schemes involving a mix of clearance, renovation, new build and environmental improvements in partnership with the private sector, housing associations and other agencies. These schemes will complement other Government initiatives, such as Estate Action and housing action trusts, to improve conditions in rundown urban areas, and it is intended that additional resources will continue to be made available in subsequent years, subject to satisfactory progress, to enable programmes to be completed. Discussions are continuing with other housing authorities with a view to expanding the number of schemes next year.

Members' Correspondence

Mr. Tom Clarke: To ask the Secretary of State for the Environment what is the average length of time taken by his Department to respond to correspondence from right hon. and hon. Members during the summer recess.

Mr. Ridley: Precise information in the form requested could be obtained only at disproportionate cost. A random sample taken during the 1984 summer recess suggested that the average time taken to reply to right hon. and hon. Members was then approximately 25 days.

Waste Disposal

Mr. David Porter: To ask the Secretary of State for the Environment what assessment his Department has made of the availability of landfill sites for disposal of household, industrial and toxic waste to the end of the century; and if he will make a statement.

Mr. Moynihan: At present rates of mineral extraction and waste disposal by landfill, rather more void space is created each year than is required for landfill. Not all voids are suitable for use or landfill and they are unevenly spread throughout the country. In general, however, we do not expect there to be a shortage of void space for the disposal of United Kingdom waste.

Local Authorities (Finance)

Dr. Cunningham: To ask the Secretary of State for the Environment what was the total of loans outstanding on capital account for local authorities in England and Wales at 31 March in each year from 1980-81 to 1987-88.

Mr. Ridley *[holding answer 25 July 1988]:* The figures are based on capital outturn returns submitted by local authorities and relate to England and Wales. Returns for 31 March 1988 are not yet available.

Outstanding Loan Debt for all services on Capital Account

	£ billion
31 March 1981	33·9
31 March 1982	35·9
31 March 1983	38·2
31 March 1984	40·9
31 March 1985	42·2
31 March 1986	44·7
31 March 1987	45·6

Dr. Cunningham: To ask the Secretary of State for the Environment if he will list for each year from 1980-81 to 1987-88 *(a)* the local authority borrowing requirement and *(b)* the public sector borrowing requirement.

Mr. Ridley *[holding answer 25 July 1988]:* The figures requested are as follows. They relate to the United Kingdom.

£ million

	Local authority borrowing requirement	*Public sector borrowing requirement*
1980-81	2,120	12,519
1981-82	−225	8,622
1982-83	87	8,935
1983-84	1,206	9,717
1984-85	2,386	10,100
1985-86	1,670	5,654
1986-87	238	3,436
1987-88	1,465	−3,486

Stray Dogs

Mr. Steinberg: To ask the Secretary of State for the Environment what is his estimate of the number of unwanted stray dogs destroyed in 1987; and whether he will seek to explore the costs and benefits of free subsidised sterilisation for all dogs whose owners wish it.

Mr. Douglas Hogg: I have been asked to reply.

No central record is kept of the number of stray dogs seized by the police, local authorities or others, and so it is not possible to estimate the number of unwanted stray dogs destroyed.

As regards the introduction of free subsidised sterilisation for dogs, we have at present no evidence of any general agreement on the need for such a measure or of any widespread public demand for it.

Written Answers to Questions

Wednesday 27 July 1988

ATTORNEY-GENERAL

Mortgage Fraud

Mr. Heddle: To ask the Attorney-General what discussions he has had with the chief land registrar with a view to reducing the incidence of mortgage fraud.

The Attorney-General: I have had no discussions with the chief land registrar about mortgage frauds. Such frauds occur in areas of the conveyancing process with which the Land Registry is not directly involved.

Magistrates (Hertfordshire)

Mr. Robert B. Jones: To ask the Attorney-General whether he will list the new magistrates appointed in June 1988 to the Hertfordshire bench, Dacorum division, together with their ages and occupations.

The Attorney-General: Five new justices were appointed by the Lord Chancellor in May 1988 to the dacorum Bench. They were:

Mr. N. G. Crispin, aged 44, a school teacher;
Mrs. C. M. Dogherty, aged 44, a pharmacist;
Mrs. M. Morris, aged 51, a nurse not presently employed;
Mr. D. A. D. Smith, aged 52, a company director; and
Mr. H. K. Wilson, aged 40, a principal scientific officer with the Health and Safety Executive

Social Security Commissioners

Mr. Wigley: To ask the Attorney-General how many inquiries have been raised by personal attendance *(a)* at the London office of the social security commissioners in (i) English cases, (ii) Welsh cases and *(b)* Edinburgh office of the social security commissioners.

The Attorney-General: This information is not recorded.

Mr. Wigley: To ask the Attorney-General what assessment he has made of the implications of the proposed transfer of the central DHSS administration to Wales for his Department's policy towards having a resident social security commissioner in Cardiff; and if he will make a statement.

The Attorney-General: My noble and learned Friend the Lord Chancellor is responsible for the administration of the office of the social security commissioners. Any changes to the central administration of the DHSS or its location would not affect directly the current administrative arrangements for the commissioners in Cardiff or elsewhere.

Mr. Wigley: To ask the Attorney-General how many appeals to the social security commissioners have been heard in Cardiff during 1988; and how many cases from Wales have been dealt with during the same period without an oral hearing.

The Attorney-General: During the first six months of 1988, 26 oral appeals were heard by social security commissioners in Cardiff. Of that number, 22 were appeals by Welsh residents; the claimants in the other four appeals were resident outside Wales but within reasonable travelling distance of Cardiff. During the same period, 37 cases from Wales were disposed of without an oral hearing.

Mr. Wigley: To ask the Attorney-General how many staff of the social security commissioner's office are employed in Cardiff permanently to assist visiting commissioners.

The Attorney-General: None. Social security commissioners visiting Cardiff are accompanied and assisted by a member of staff from the office of the social security commissioners in London.

Mr. Wigley: To ask the Attorney-General how many social security commissioners are permanently resident in the Edinburgh office; and what is the total number of staff employed in that office.

The Attorney-General: There are three social security commissioners resident in Edinburgh and seven staff employed in the Edinburgh office.

EDUCATION AND SCIENCE

16 to 18-year-olds

Mr. Grocott: To ask the Secretary of State for Education and Science, in the latest year for which figures are available, what proportion of young persons between the ages of 16 and 18 years were in full-time education; and what were the corresponding figures for France, West Germany, Japan and the United States of America.

Mr. Butcher: The readily available information for 16 to 18-year-olds is shown in the table. Rates for part-time students, including the youth training scheme for the United Kingdom, are shown where available as they form an important element in certain countries. It is planned to have more timely statistics available later in the year.

Participation in education and training[1] of 16 to 18-year-olds, 1981
Percentage of age group

Country	*Full-time[2]*	*Part-time[1]*	*All education and training*
France	58	8	66
Germany, Federal Republic of	45	[3]40	84
Japan[4, 5]	69	3	73
USA[5]	79	—	79
United Kingdom[6]			
(1981)	32	32	63
(1987)	31	33	64

Source: Statistical Bulletin 10/85.
Education Statistics for the United Kingdom.
[1] Including apprenticeships, YOPs, YTS and similar schemes.
[2] Including higher education for some 18-year-olds.
[3] Including compulsory part-time education for 16 and 17-year-olds in Germany.
[4] Estimated from new entrant and enrolment data; excludes some 18-year-olds, in "special training schools"—which provide certain types of vocational training for those aged 18 and above.
[5] Including private sector higher education.
[6] Includes estimates for those studying only in the evening. Includes private sector full-time further education and training, estimated as 6 per cent.

Chess Associations

Mr. Andrew Welsh: To ask the Secretary of State for Education and Science if he will indicate total value of grants made by his Department to chess associations in England and Wales in each of the last five years; and what he expects it to be in current financial year.

Mr. Jackson: The Department of Education and Science pays grant to the British Chess Federation to assist with its administrative costs and with expenditure incurred in participating in international competitions. The total grants made in the last five financial years are as follows:

	£
1983-84	31,123
1984-85	27,256
1985-86	31,492
1986-87	35,273
1987-88	36,349

The grant allocation for the current financial year is £37,300.

My right hon. Friend the Secretary of State for Wales is responsible for chess associations in Wales.

Training Allowance

Mr. Grocott: To ask the Secretary of State for Education and Science what would be the cost of extending the training allowance payable under the YTS to all those between the ages of 16 and 18 years currently engaged in full-time education, net of the cost of child benefit.

Mrs. Rumbold: After deducting child benefit, the annual cost of paying an allowance at the same rate as YTS training allowances to all 16 to 18-year-olds currently in full-time education is estimated to be £800 million.

National Advisory Council for the Youth Service

Mr. David Nicholson: To ask the Secretary of State for Education and Science when he expects to reach and publish conclusions on the future of the National Advisory Council for the Youth Service; and what representations he has received on this subject; and if he will make a statement.

Mr. Jackson: My right hon. Friend has received no formal representations about the future of the National Advisory Council for the Youth Service. He expects to make an announcement before the end of the year.

Grenoble Reactor

Dr. Thomas: To ask the Secretary of State for Education and Science if, pursuant to the reply to the hon. Member for Meirionnydd Nant Conwy, *Official Report*, 14 June, column *106*, on the ILL multilateral high flux test reactor at Grenoble, the inspection to which it makes reference covers both *(a)* safety issues and *(b)* safeguards issues.

Mr. Jackson: The inspection covers both safety and safeguard issues.

Polytechnics and Colleges

Mr. Pawsey: To ask the Secretary of State for Education and Science whether he has decided which additional institutions to bring into the polytechnics and colleges sector from 1 April 1989; and if he will make a statement.

Mr. Kenneth Baker: Subject to the passage of the Education Reform Bill and any further representations that may be made before I reach a final decision, I have provisionally decided to exercise the power conferred by clause 120(1) to incorporate Buckinghamshire college of higher education, Cambridgeshire college of arts and technology, Salford college of technology and Luton college of higher education as higher education corporations within the polytechnics and colleges sector.

I have provisionally decided not to exercise that power in respect of two other institutions which made provisional applications: Harrow college of higher education and Gloucestershire college of arts and technology.

TRANSPORT

Crash Barriers

Mr. Bellingham: To ask the Secretary of State for Transport how many people have died in the past five years because of the absence of a system of separation between the carriageways on dual carriageways.

Mr. Peter Bottomley: The absence of a system of safety fencing is not in itself a cause of accidents.

The accident report forms used by the police do not record causes of accidents. Even if details of all candidate accidents were readily available, the number of cases in which fatal consequences would have been avoided had a system of safety fencing been present could only be a matter of speculation.

Mr. Bellingham: To ask the Secretary of State for Transport (1) when he expects the A1 and A74 dual carriageways to receive complete crash barrier protection;

(2) what extent of the A1 and A74 dual carriageways are protected by crash barriers.

Mr. Peter Bottomley: Some 115 miles, 53 per cent., of the A1 is already protected by central reserve safety fencing. A programme of installing central reserve safety fencing on the A1 is under way. It will be completed by the early 1990s.

The A1(M) and the A74 in England have full central reserve safety barrier protection.

Mr. Bellingham: To ask the Secretary of State for Transport (1) if he was further plans to increase the extent of crash barrier cover on dual carriageways;

(2) what is his policy on enforcing the erection of crash barriers when planning new dual carriageways.

Mr. Peter Bottomley: Yes.

A programme to provide central reserve safety fencing on most existing and new dual carriageway trunk roads was announced on 17 December 1986, at column *537*. Safety fencing on existing and new non-trunk road dual carriageways is a matter for local highway authorities.

Mr. Bellingham: To ask the Secretary of State for Transport what is *(a)* the total mileage of dual carriageways covered by crash barriers and *(b)* the percentage that represents the total mileage.

Mr. Peter Bottomley: Some 598 miles of trunk road dual carriageway are protected by central reserve safety fencing. This represents 37 per cent. of the total mileage of trunk road dual carriageways.

Mr. Bellingham: To ask the Secretary of State for Transport what distance of dual carriageway is not covered by any form of crash barriers.

Mr. Peter Bottomley: Some 1,036 miles of trunk road dual carriageway are now not covered by central reserve safety fencing.

Drunk Driving

Mr. Grocott: To ask the Secretary of State for Transport, in the latest year for which figures are available, how many persons have had their driving licence returned to them after a conviction for driving while under the influence of alcohol and, of those, how many were required to produce evidence of education or treatment for alcoholism; and how many were refused the restoration of their licence because of their inability to produce such evidence.

Mr. Peter Bottomley: This information is not available.

Public Expenditure

Mr. Worthington: To ask the Secretary of State for Transport if he will publish a table in the *Official Report*, in the same format as the written reply of 7 July, *Official Report*, columns *687-81*, on receipts classified as charges in respect of his programme expenditure over the years 1982-83 to 1990-91, indicating the receipts in respect of running costs expenditure together with a supplementary analysis indicating, separately, the amounts of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mr. Peter Bottomley: The table shows receipts in respect of running costs expenditure, none of which is estimated to have been met from other public expenditure programmes. None of the receipts in respect of programme expenditure, which were shown in the written reply of 7 July, at columns *693-94*, is estimated to have been met from other public expenditure programmes.

Receipts in the Department of Transport programme in respect of running costs expenditure

£ million

	1982-83	*1983-84*	*1984-85*	*1985-86*	*1986-87*	*1987-88*	*1988-89*	*1989-90*	*1990-91*
Central Government									
Licensing and testing schemes (receipts from the driver testing and training organisation and from the vehicle inspectorate for support services)	4	5	5	6	7	7	8	8	8
Research and development (receipts in respect of research carried out at the Transport and Road Research Laboratory on repayment terms)	2	2	1	2	1	2	2	2	2
Driver and vehicle licensing (mainly fees for transfer of cherished marks and for duplicate licences)	4	6	6	7	9	10	10	10	11

Notes:
(1) None of these receipts was in respect of payments included in other Departments' running costs.
(2) Figures in the table are consistent with Cm 288.

Infrastructure Investment

Mr. Flynn: To ask the Secretary of State for Transport when he next intends to meet private sector firms to discuss transport infrastructure investment.

Mr. Peter Bottomley: The Secretary of State and I met 40 private sector firms on 18 July and will continue to take forward this initiative.

Association of County Councils

Mr. John Evans: To ask the Secretary of State for Transport when he last met the Association of County Councils; and what was discussed.

Mr. Peter Bottomley: My right hon. Friend the Secretary of State and I met representatives of the Association of County Councils at the national annual consultative meeting on 5 July. A wide range of matters relating to roads was discussed. A joint approach for the reduction of road casualties was agreed.

Hell's Angels, Kent

Mr. Speed: To ask the Secretary of State for Transport if he will make a statement on the recent ministerial visit to the Hell's Angels gathering in Kent; and if he will publish the subsequent ministerial correspondence about this event.

Mr. Peter Bottomley: Yes. I visited the Hell's Angels 10th Kent custom bike show at Snargate on 8 July. I enjoyed the show and the opportunity to talk to Dr. Maz Harris and the other Hell's Angels who organised the event.

I congratulate the Hell's Angels on raising £2 for charity from every person attending the show.

In my letter to Dr. Harris of 13 July, I said:

"We clearly share much common ground on motor cycle safety even if we don't see eye to eye on all areas. I believe the rest of the weekend went well. If all road users behaved as sensibly and safely as the motor cyclists I saw coming to the Kent show on Friday the roads would be safer for us all.

I was impressed with the smooth running of the event—organisers of major sporting events might have something to

learn from you. I told *The Times* on Friday night that I expected neither arrest nor trouble from the 20,000 bike enthusinsts. I was told 'That's a rash statement .' It was not.

I am giving this letter a fairly wide circulation.

An idea: why don't you approach David Evans MP of Luton Football Club for a Hell's Angel charity game against MPs?"

Dr. Harris, in his reply of 19 July, said:

"The show did indeed go off entirely trouble free and succeeded, with the aid of the Elham Valley Lions Club, in raising over £30,000 for local charities. Nearly 25,000 bikers enjoyed themselves in fine style, their behaviour throughout the event being lauded and applauded by newspapers throughout the area.

I feel strongly that the continuing success of the Kent Custom Bike Show proves that motor cyclists are more than capable of behaving themselves in public if treated with the same degree of respect that is accorded to other groups in our society. One wonders whether or not the trouble which erupts from time to time at the British Grand Prix and similar motor cycle sporting events is not precipitated by the high-handed attitude of the organisers of those events whose sole aim seems to be to fleece their customers as heavily as possible and give them as little as possible in return.

I'm none too impressed with conspiracy theory, but isn't it odd that no motor cycle magazines, apart from Back Street Heroes, publicise the success of the Kent Show as Britain's —or should I say mainland Britain's—premier biking event?

As for your suggestion about arranging a charity football match between a team of Hell's Angels and a team of MPs, I must say that the idea appeals and will follow it up at the earliest opportunity.

Once again, many thanks for your encouraging comments about our show. I look forward to talking to you in the future."

Radioactive Materials (Transit)

Dr. Thomas: To ask the Secretary of State for Transport why information on the incidence of radioactive materials lost in transit over the period 1979 to 1982 is not kept.

Mr. Peter Bottomley: It was not kept centrally. It has been since 1982.

Dr. Thomas: To ask the Secretary of State for Transport if he will list by date, radioactive content, quantity and transport route each of the six occasions on which medical isotopes have been lost in transit from 1983 to the present.

Mr. Peter Bottomley: The radiological consequence of these six losses of medical and industrial isotopes since 1983 is considered to have been minimal. The details are as follows:

1987, an americium-241 source of 11 GBq was lost possibly from a bonded warehouse near Heathrow airport.

1987, a carbon-14 source of 12 MBq was reported by Lufthansa German Airlines to have gone astray at Heathrow airport.

1986, an iodine-125 source of 2·25 GBq was reported by Lufthansa German Airlines to have been lost at its cargo terminal at Heathrow airport.

1985, an iron-55 source of 200 kBQ went missing from a scientific instrument despatched from Clandon Scientific Limited, Aldershot, to its parent company in Finland via Heathrow airport.

1985, five sources were stolen from a locked car in a car park in Lancaster. The items stolen were mainly static eliminators comprising:

(i) Model 703 static meter containing 7400 MBq of tritium.

(ii) Model 210 static eliminator containing 880 MBq of polonium-210.

(iii) Model 315 static eliminator containing 440 MBq of polonium-210.

(iv) Model 205 spot eliminator containing 370 MBq of polonium-210.

(v) Model 902F ionising air gun containing 370 MBq of polonium-210.

1984, a consignment of four industrial sources was washed overboard from an offshore support vessel going from Aberdeen to Dundee Kings North drilling rig. The details of the sources lost were:

(i) An americium-241/beryllium source of 590 GBq.

(ii) An americium-241/beryllium source of 18·5 GBq.

(iii) Two caesium-137 sources each of 55·5 GBq.

Dr. Thomas: To ask the Secretary of State for Transport if any nuclear materials designated by *(a)* his Department or *(b)* the Environment Directorate General of the European Commission, as nuclear waste are transported within United Kingdom national boundaries by air.

Mr. Peter Bottomley: No.

Motorways (Vehicle Use)

Mr. Amess: To ask the Secretary of State for Transport if he will estimate how many vehicles used each of Britain's motorways in each of the last five years; and if he will express the figures by class of registration.

Mr. Peter Bottomley: The figures requested could be provided only at disproportionate cost.

Motorways (Access)

Mr. Jack: To ask the Secretary of State for Transport if he will state his policy for allowing direct access to motorways.

Mr. Peter Bottomley: Our policy on motorways is against allowing direct access to the main carriageway or slip roads from any development other than service areas and related facilities. This was set out in my answer to a question from the the hon. Member for Stretford (Mr. Lloyd) on 16 November 1987, at columns *405-6*.

Exceptions are made for motorway service areas on land owned by the Department and for maintenance depots. In addition, special consideration may be given to major transport infrastructure requirements, such as airports. Local planning authorities will be directed to refuse planning permission for unacceptable developments.

This policy recognises the importance of special roads as high-speed through routes and the heavy investment in them. It is essential, if they are to realise their design potential, that they should be kept free of accesses, apart from road junctions and the other exceptions stated. In this way, traffic flows and speeds may be maintained and the risk of accidents and interruptions to traffic flow minimised.

Woolwich Ferry

Mr. David Evans: To ask the Secretary of State for Transport if he is now satisfied that the Woolwich ferry will now be able to provide a regular and reliable service; and if he will make a statement.

Mr. Peter Bottomley: I am happy to say that the staff have now agreed the new working arrangements arising from the management review of the ferry. These provide

more efficient staffing and operating schedules. They have now been implemented. A reliable and cost-effective service should now be maintained.

Road Hump Regulations

Mr. Burt: To ask the Secretary of State for Transport if he will review the current road humps regulations; and if he will make a statement.

Mr. Peter Bottomley: We are currently reviewing the regulations to make a greater diversity of road humps and locations available to local highway authorities. We want to adopt a common sense approach to these regulations so that maximum benefits can be gained from the use of these cost-effective accident reduction measures. We intend to begin consultations with local authorities and other interested organisations in early autumn of this year.

Bridges (Damage)

Mr. Watts: To ask the Secretary of State for Transport what consideration his Department has been giving to the problems of damage caused to bridges by overheight road vehicles; and if he will make a statement.

Mr. Peter Bottomley: These problems have been considered by a departmental working party. A copy of its report, "A Strategy for the Reduction of Bridge Bashing," has been placed in the Library.

The working party points out that the bridges mainly at risk are some 3,400 rail over road bridges of less than 16' 6" (5·03 m) in height, most of them on local roads. Bridge strikes can cause not only road casualties, but also death and injury to rail users in cases where the track is dislodged by the strike. In addition, substantial damage to property can occur.

The working party notes that in 1987 an average of some 23 bridge strikes a month were recorded, most of these not having serious consequences. This represents a substantial reduction on the rate 15 years ago. So far, road casualties in the United Kingdom from bridge strikes have been few, and there have been no rail casualties. None the less, there have been a number of bridge strikes which could have led to more serious consequences, and the working party's assessment is that the risk of a strike causing loss of life from a train derailment is of the order of one in 10 years. They identify a package of possible measures for consideration, assuming that it was desired to reduce substantially over five years the incidence of the more serious categories of bridge strike. These include:

(1) improved road signing, including replacement of advisory bridge height signs with mandatory ones, and in particular cases where justified by the risk, installation of infra-red systems which detect overheight vehicles in advance, and trigger display of a sign to the driver;

(2) structural measures to increase the clearance at certain vulnerable trunk road bridges (in the context of the general bridge strengthening programme already announced);

(3) procedures for notifying local highway authorities and the police of movements of vehicles above certain heights;

(4) extensions of requirements for display in drivers' cabs of the height of vehicles, and installation of warning devices on certain vehicles to show when lifting gear is raised;

(5) consideration by British Rail of the installation of emergency telephones in certain cases;

(6) further development of facilities for offering route plans for movements of high vehicles;

(7) advice to licensing authorities to take into account bridge bashing incidents when administering licensing of heavy goods vehicles and their drivers;

(8) legislation to permit erection at bridges of beams and other devices not forming part of their structure which are designed to arrest an overheight vehicle, although the working party considers the practical problems and cost of such devices make them unattractive, at least in the short term.

It will never be possible to eliminate the risks of bridge bashing. The basic problem is one of driver awareness and driver error. The need is to consider ways of increasing this awareness, and reducing the scope for error. The working party's report is a useful contribution to this. We intend in the light of it to improve road signing at our lower trunk road bridges, and to assess case by case whether the risks warrant installation of an infra-red detector system. We intend to consult the local authority associations on the analogous action which local highway authorities might take in relation to local road bridges. An amendment will be made as soon as possible to the Traffic Signs Regulations and General Directions 1981 to enable mandatory instead of warning signs to be installed at bridges without the expense of a traffic regulation order.

The Department also invites licensing authorities to take into account bridge bashing incidents in the exercise of their functions, in so far as this is possible under the present law.

We are already consulting industry on the question of installing warning devices on skips and tipper lorries and will similarly consult bodies representing manufacturers and users on the working party's recommendations for an extension of the requirements for displaying height in vehicle cabs. In addition, the Department will want to seek the views of representatives of users, local authorities and the enforcement authorities about a system of notification for movement of high vehicles. Any new regulatory measures will be taken only if they are justified in the light of both their benefits and the financial burdens they impose on industry, local authorities and regulatory bodies. Decisions on any notification system will need to be considered particularly carefully from this standpoint.

My right hon. Friends the Secretaries of State for Scotland and Wales will carry out separate, parallel consultations on the working party's recommendations with local authorities in Scotland and Wales. In addition to consulting specific organisations on the working party's recommendations (copies of the report are being sent to them) we would very much welcome other views and suggestions. These should be addressed to: Highways Maintenance Branch, Department of Transport, 2 Monck Street, London SW1P 2BQ. Copies of the report are available from Her Majesty's Stationery Office, priced £6.

Trunk Roads (London)

Mr. Robert G. Hughes: To ask the Secretary of State for Transport whether accident investigation and prevention techniques are being used to reduce casualties on trunk roads in London; and if he will make a statement.

Mr. Peter Bottomley: In 1987-88, using systematic AIP analysis, the Department identified over 100 sites on trunk roads in London where casualties could be reduced by low-cost engineering solutions. It is now organising remedial measures, including anti-skid surfacing, new or improved signs and road markings, better lighting and different signal timings. The estimated first year rate of return for the first 100 sites is 312 per cent.: an estimated reduction of 325 casualties every year.

The systematic AIP approach reveals the common factors in accidents at a location. It also provides a flow of work suitable for bulk purchase contracts.

Last year the savings on such a contract for anti-skid surfacing were approximately £300,000 and effectively halved the cost of treating each site.

Shipping Companies (Crew Relief Costs)

Sir David Price: To ask the Secretary of State for Transport what arrangements he is making to use the power in the Merchant Shipping Act 1988 enabling him to provide financial assistance to shipping companies in respect of their crew relief costs.

Mr. Channon: I am placing in the Library a document entitled, "A Scheme for Department of Transport Assistance with Crew Relief Costs," which outlines the assistance scheme I am introducing under powers contained in the Merchant Shipping Act which received Royal Assent on 3 May.

I am fully aware that the shipping companies face a powerful financial incentive to employ cheaper Third-world crews. It is important for the continuing capacity of the United Kingdom merchant fleet to carry out its vital functions in time of emergency that sufficient United Kingdom ships are manned by British seafarers. The Merchant Shipping Act 1988 contains a provision which enables me to provide assistance towards the cost of flying out and repatriating crews of United Kingdom, Isle of Man or Channel Islands registered ships operating outside the limited European trading area (roughly from Bergen to Cadiz). From 1 September, ship operators will receive reimbursement of approximately half the cost of such journeys undertaken on or after 4 July by seafarers who are ordinarily resident in the United Kingdom, the Isle of Man, the Channel Islands or the Irish Republic.

The availability of assistance should make it more attractive to employ British crews, and I hope that shipping companies will take this into account in reaching decisions on the crewing and flagging of their vessels.

Registration Numbers (Sale)

Mr. Jack: To ask the Secretary of State for Transport what were the results of his Department's public consultation exercise on proposals for the sale of registration numbers; and whether he will make a statement.

Mr. Channon: The consultation exercise on the sale of attractive registration numbers ended on 31 May, and most major consultees have now responded. Consultation papers were made widely available to the public and special interest groups: 210 responses were received from motoring organisations, motor traders and their representatives, historic vehicles clubs, police representatives and members of the public. Some 80 per cent. of the responses, including almost all of those received from trade and motoring interests, supported the idea of sale in principle. Some 3 per cent. contained objections. In the light of these responses and the general favourable public interest in the consultation exercise, I propose to continue to develop the proposals with a view to the necessary legislation being introduced in due course.

Many respondents, however, expressed reservations about the idea of selling previously issued numbers. This has strengthened my view that the scheme should, initially at least, be restricted to unissued numbers—of which there are more than adequate supplies.

Arundel Bypass

Mr. Michael Marshall: To ask the Secretary of State for Transport whether, pursuant to his answer to the hon. Member for Arundel of 12 April, *Official Report*, column 81, a decision has been reached on the possibility of constructing the Crossbush section of the Arundel bypass in advance of the rest of the scheme.

Mr. Peter Bottomley: I am pleased to say that we are going ahead. The case for proceeding with the Crossbush section in advance of the main scheme is acceptable. The necessary work is now under way for publication of draft orders under the Highways Act this autumn.

London Airspace

Mr. Soames: To ask the Secretary of State for Transport what information he has as to how many times in the last year the helilanes into London airspace have been closed without warning to those using them.

Mr. Peter Bottomley *[pursuant to his reply, 23 May 1988, c. 56]:* I want and need to make a correction. Wrong information was given. I apologise.

Advance notice was not given in each of the closures mentioned in my earlier answer. The closures were the subject of telephoned advice at the time of closure.

Only 13 of them were preceded by warning through notices to airmen (NOTAM). The NOTAM action gave very little advance warning.

OVERSEAS DEVELOPMENT

Overseas Aid

Mr. Harry Greenway: To ask the Secretary of State for Foreign and Commonwealth Affairs what is the value of overseas aid in the current year in real and money terms; and if he will make a statement.

Mr. Chris Patten: The current year cash planning figure for the aid programme, not including aid administration, is £1,307 million.

Southern Africa

Mr. Matthew Taylor: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the level of aid to front-line states in the light of recent developments in southern Africa.

Mr. Chris Patten: I refer the hon. Member to the answer which my right hon. Friend the Minister of State, Foreign and Commonwealth Office, gave the hon. Member for Eccles (Miss Lestor) on 13 May at column *250*. We shall continue to maintain aid to the countries of the region at a substantial level.

Overseas Development Administration Annual Review

Mr. Maples: To ask the Secretary of State for Foreign and Commonwealth Affairs when he expects to publish the latest edition of the Overseas Development Administration's annual review.

Mr. Chris Patten: The 1987 annual review, which for the first time includes articles from the business and voluntary sectors, is being published today. Copies have been placed in the Library of the House.

PRIME MINISTER

Ministers (Advisers)

Dr. Cunningham: To ask the Prime Minister if she will publish in the *Official Report* the terms and conditions of service attaching to political and special advisers to *(a)* herself, *(b)* Secretaries of State and *(c)* Ministers, with particular reference to political activity outside their paid duties.

The Prime Minister: Special advisers are civil servants. They have the same conditions of service, except as regards superannuation and severance, and are subject to the same rules of conduct as other civil servants, with the exception of the rules governing the acceptance of outside appointments after resignation or retirement and certain aspects of the rules on political activities. All the other provisions of the Civil Service pay and conditions of service code therefore apply to them.

There are two areas of political activity where special advisers may be allowed more freedom than other civil servants. With the approval of the Minister they may *(a)* attend party functions and maintain contact with party members; and *(b)* take part in policy reviews organised by the party.

In addition, and subject to the approval of the Minister, special advisers are permitted to undertake all forms of local political activity provided they observe the rule of discretion applicable to civil servants. This does not include local activites in support of national politics.

Political advisers are not civil servants and are not paid from public funds. Although the provisions of the Civil Service code are not generally appropriate, political advisers are required to avoid conflict of interest between their work for Ministers and their private and business affairs.

National Engineering Laboratory

Mr. Ingram: To ask the Prime Minister if she has received any letters in support of the privatisation of the National Engineering Laboratory, East Kilbride; and if she willmake a statement.

The Prime Minister: To date I have received no letters in support of the privatisation of the National Engineering Laboratory, East Kilbride.

EMPLOYMENT

Small Businesses

Mr. David Shaw: To ask the Secretary of State for Employment if he will make a statement on the achievements of his Department and his policies in helping small businesses over the last 12 months compared with the previous 12 months; and if he will publish the performance indicators by which his Department monitors those achievements and the statistical results of such monitoring.

Mr. Fowler *[holding answer, 19 July 1988]:* I am pleased to announce that in 1987 the number of businesses registered for VAT increased by 45,000. This is the largest increase since 1979. In the period 1979 to 1987 the number of businesses registered for VAT has increased on average by more than 500 per week. In 1987 nearly 900 additional businesses were created each week.

Between 1979 and 1987 the number of self-employed people increased by 50 per cent. to 1·9 million. From 1986 to 1987 alone there was an increase of 230,000 self-employed people. These figures show clearly the strength of the small business sector, which has resulted both from the encouragement given to it by the Government and others and from the willingness of individuals to take advantage of the opportunities that exist in the United Kingdom today.

I set out below some of the measures for which my Department has been responsible over the past year.

The Small Firms Service

The small firms service offers advice, information and counselling to small businesses. During 1987-88 the SFS continued to maintain emphasis on counselling established businesses and on supporting and working with other small business advisory services.

On 5 July my right hon. Friend, the Minister of State announced that the national reference book, a database of information sought by small firms used and developed by the small firms service inquiry staff, is now available to other advisory services upon subscription. Statistics about the work of the service in England are set out below:

	1986-87	*1987-88*
Inquiries	283,537	266,174
New counselling cases	27,158	27,259
Counselling sessions	38,210	39,138

The small firms service annual report which was published on 5 July provides further information. Copies are held in the House of Commons Library.

Local Enterprise Agency Support

The Local enterprise agency grant scheme was introduced on 1 April 1986. This is a five year scheme of financial assistance designed to establish a network of viable self-supporting enterprise agencies. In 1986-87 £2,359,960 was paid in grants to 168 agencies. A further £2,713,856 was paid to 186 agencies in 1987-88.

Enterprise Allowance Scheme

Over the past year the scheme has continued to expand. The number of entrants in 1986-87 was 86,715 rising to 106,305 in 1987-88. Provision has been made for 110,000 entrants in 1988-89.

The scheme continues to encourage the formation of viable businesses with the potential for growth and job generation. The most recent survey of applicants showed that of those who received the allowance for a full year, 65 per cent. are still trading three years after start up and, at that point, for every 100 businesses still trading 114 additional jobs have been created.

Loan Guarantee Scheme

This scheme was extended for a further three years in 1986, with the premium payable reduced from 5 per cent. to 2·5 per cent. An evaluation of the scheme has recently been carried out by consultants who are due to report shortly. In addition a telephone survey of current users of the scheme is taking place.

In 1987-88 1,234 loans to a value of £46·23 million were issued. This compares with 1,050 loans to a value of £40·37 million in 1986-87.

In January 1988 simplified administrative procedures were introduced for loans up to £15,000. Since then the rate of applications has increased and is now running at around 200 a month.

Business Expansion Scheme

This scheme was introduced in 1983 and has played an important part in improving the flow of equity finance to small companies. It offers individual taxpayers the opportunity to offset the value of new equity investments of up to £40,000 a year in qualifying unquoted companies against their liability to tax.

In his Budget statement my right hon. Friend the Chancellor of the Exchequer announced a ceiling of £500,000 on investments under the BES in any one company in any period of 12 months. This will encourage prospective investors to examine smaller companies and gives a clear indication to smaller companies, investors and advisors that the BES is aimed at providing equity finance for smaller businesses.

The Prince's Youth Business Trust

The Department has agreed to match private sector donations to the trust. In 1987-88 £1·5 million was paid to the trust. The Department's contribution is to be used to provide loans to young people setting up in business or expanding an existing business.

Training

Expenditure by the Training Commission (previously the Manpower Services Commission) on small firms training was increased from £18·6 million in 1986-87, benefiting 67,000 people, to £19·3 million, benefiting 107,000 people, in 1987-88.

In April this year the Department published a series of booklets aimed at encouraging graduates into the small firms sector by either starting up their own business or taking up employment in an existing small firm. The Department has continued its support for the Shell technology enterprise programme, placing undergraduates with small firms during the summer holidays.

Inner Cities

As part of the Government's action for cities programme announced on 7 March, new initiatives have been introduced to extend the wide range of help available to new and existing small businesses in inner-city areas and to make services to small firms more accessible.

New offices for the small firms service are planned in Sheffield, Middlesbrough, Blackburn, Wolverhampton, Leicester and Derby; those in Sheffield and Middlesbrough are now open. A new local enterprise agency project scheme commenced on 1 July, establishing a fund of £0·6 million to support local enterprise agency projects to provide special help to inner-city businesses. On 22 June, a raised Government guarantee of 85 per cent. on loans to firms in the 16 inner-city task forces became available under the loan guarantee scheme. New initiatives are also being introduced to promote self-employment and provide extra training and advice for participants on the enterprise allowance scheme.

ACAS

The Advisory Conciliation and Arbitration Service produced a guide for small businesses entitled "Employing People" which received a Plain English award in 1987.

Health and Safety

The Health and Safety Commission's small firms working group has special responsibility for the interests of small firms. A number of publications aimed specifically at small firms have been produced and distributed by the Health and Safety Executive. The most recent is "Essentials of Health and Safety at Work" a handbook giving practical advice on health and safety problems.

Purchasing from Small Firms

There are regular contacts with other Departments at ministerial and official level to encourage purchasing from small firms. My Department has agreed to fund a post in the central unit on purchasing to promote the opportunities available for small firms. We publish a booklet "Tendering for Government Contracts" which gives guidance on what Government Departments seek to buy and the names and addresses of the relevant contact. My Department also produces its own leaflet "Selling to the Department of Employment" which is widely distributed through DE's small firms centres and regional enterprise units.

YTS (London)

Mr. Cox To ask the Secretary of State for Employment what is the number of *(a)* men and *(b)* women living in the Greater London area, up to the age of 18 years, who are on YTS.

Mr. Cope: On 30 June 1988, there were 7,743 males and 4,820 females under the age of 18 years participating in YTS in Greater London.

Apprenticeships

Mr. Cox: To ask the Secretary of State for Employment what was the number of industrial apprenticeships taken up in 1987; and if he will make a statement.

Mr. Nicholls: Information from the youth cohort study indicates that some 94,000 young people in England and Wales who reached minimum school-leaving age in the academic year 1985-86 were undertaking an apprenticeship in spring 1987. This is probably an under-estimate, as those who were unsure of their apprenticeship status have not been included. YTS is now the normal route into work for over two thirds of 16 year old school leavers in Great Britain, and is the basis for many modernised apprenticeships. About 393,000 young people are currently benefiting from the structured, quality training programmes offered under YTS.

Labour Statistics

Mr. Grocott: To ask the Secretary of State for Employment using the same definitions as in the 1981 census, what proportion of men aged 60 to 64 years are economically active, retired and permanently sick, respectively; and what proportion of those economically active are unemployed according to the latest figures which are available.

Mr. Lee: Estimates from the 1987 labour force survey, using as far as is possible the same definitions as in the 1981 census of population, are shown in the table:

Men aged 60-64 years
Great Britain Spring 1987

	Per cent.	Per cent.
All persons	100·0	—
of which:		
economically active	54·6	100·0
retired from paid work[1]	18·4	—
long-term sick or disabled[1]	18·3	—
unemployed[2]	—	10·3

[1]Main reason given for not looking for work in the reference week.
[2]Great Britain labour force definition.

Mr. Grocott: To ask the Secretary of State for Employment what, according to the latest estimates, will be the size of the labour force in each of the next 10 years in absolute numbers and as a proportion of the total population.

Mr. Lee: My Department's latest projections of the civilian labour force were published in an article in the March 1988 edition of "Employment Gazette" (pages 117-129), a copy of which is in the Library. This contains projections up to 1995 of the size of the labour force in different age groups, in absolute numbers and as a percentage of the population (the activity rates). Projections beyond 1995 are not available.

Ms. Armstrong: To ask the Secretary of State for Employment (1) how many people aged 50 to 54 years, inclusive, have been unemployed for longer than six months *(a)* nationally, *(b)* in the north-east region and *(c)* in the Durham, North-West constituency;

(2) how many people over 55 years have been unemployed for longer than six months *(a)* nationally, *(b)* in the north-east, and *(c)* in the Durham, North-West constituency.

Mr. Lee: The following information is in the Library. The table shows the number of unemployed claimants in the requested age groups who had been unemployed more than six months in the United Kingdom, the north-east (the counties of Cleveland, Northumberland and Tyne and Wear) and the parliamentary constituency of Durham, North-West on 14 April 1988.

Claimants unemployed six months and over—14 April 1988

	Aged 50-54 years	Aged 55 years and over
United Kingdom	149,767	236,578
North-East	10,996	16,156
Durham, North-West constituency	325	519

Mr. Knapman: To ask the Secretary of State for Employment how many young people aged 18 to 25 are currently unemployed; what were the comparable figures in January 1986; and if he will make a statement.

Mr. Lee: The following information is in the Library. On 14 April 1988 (the latest available date) the number of unemployed claimants aged 18 to 25 years in the United Kingdom was 697,718. The corresponding figure for January 1986 was 1,060,136. This comparison will be affected by seasonal factors. Unemployment among 18 to 25-year-olds has fallen by 30 per cent. over the past two years since April 1986.

Family Statistics

Mr. Squire: To ask the Secretary of State for Employment how many children aged *(a)* under 16 years and *(b)* under 19 years lived in families where the head of the household was long-term unemployed in 1979 and at the latest date available.

Mr. Lee: Information from the labour force survey indicates that in spring 1987 there were an estimated 723,000 dependent children under 16 and 766,000 under 19 in Great Britain in households whose head was unemployed and had been seeking work for at least a year. In spring 1981, the earliest date for which the corresponding information is available, there were an estimated 330,000 dependent children under 16 and 343,000 under 19 in such households.

Dock Workers

Mr. Jacques Arnold: To ask the Secretary of State for Employment what was the ratio between the number of staff employed by the National Dock Labour Board and the number of registered dock workers in the *(a)* Cumbrian, *(b)* Fleetwood, *(c)* Hull and Goole, *(d)* Bristol and Severn, *(e)* Aberdeen, *(f)* west Scotland, *(g)* east Scotland, *(h)* London, *(i)* south coast, *(j)* Cornwall, *(k)* Plymouth, *(l)* Liverpool, *(m)* Manchester, *(n)* south Wales, *(o)* Middlesbrough and Hartlepool, *(p)* Grimsby and Immingham, *(q)* East Anglia, *(r)* Tyne and Wear and *(s)* Wash ports board areas for each year since 1979.

Mr. Nicholls: I regret the information requested is not readily available and could be obtained only at disproportionate cost.

Jobcentres and Benefit Offices

Mr. Wilson: To ask the Secretary of State for Employment if there are any plans to reduce the number of jobcentres and unemployment benefit offices in towns and rural areas.

Mr. Meacher: To ask the Secretary of State for Employment what plans he has to close jobcentres and unemployment benefit offices; how many he expects to close in each of the next five years; what criteria he uses to decide on closure; and what will be the staffing consequences.

Mr. Lee *[holding answer 25 July]:* The network of offices is kept under continuous review. Any proposal to close an office or change the level of service provided in an individual office is put to the Minister responsible for the employment service for approval. In these cases, the Member of Parliament and local interests are given the opportunity to comment.

Mr. McLeish: To ask the Secretary of State for Employment if he will give the total number of staff employed in jobcentres and unemployment benefit offices in each of the standard economic regions.

Mr. Lee *[holding answer 25 July]:* The information is available only on the basis of employment services regions, which are not the same as standard economic regions. Details of the actual numbers of permanent staff employed in local offices at 1 July 1988 in each ES region are given in the table.

Region	Full time	Part-time
Northern	1,811	330
Yorkshire and Humberside	2,741	389
East Midlands and Eastern	2,555	391
London and South East	7,052	850
South-West	1,880	250
Wales	1,551	283
West Midlands	2,660	314
North West	4,278	564
Scotland	3,490	441

Note: These figures include some specialist staff not engaged in local office work.

Mr. McLeish: To ask the Secretary of State for Employment if he will give the total number of jobcentres and unemployment benefit offices in *(a)* June 1979 and *(b)* now, for each standard economic regon of the United Kingdom; and if he will give the total number of job-centres and unemployment benefit offices opened in each standard economic region in each of the years 1979 to June 1988, inclusive.

Mr. Lee *[holding answer 25 July]:* The information required is not available by standard economic region. However, the numbers of jobcentres and unemployment benefit offices by employment service region on 1 April 1988 are as follows:

Region	Jobcentres	Unemployment benefit offices
Northern	60	66
Yorkshire and Humberside	84	99
East Midlands and Eastern	100	105

The information for 1979 is not available.

Mr. McLeish: To ask the Secretary of State for Employment if he has any plans for the closure of jobcentres and unemployment benefit offices; and if he will make a statement.

Mr. Lee *[holding answer 25 July 1988]:* The network of offices is kept under continuous review. Any proposal to close an office or change the level of service provided in an individual office is put to the Minister responsible for the Employment Service for approval. Where a closure or reduced level of service is proposed the Member of Parliament and local interests are given the opportunity to comment.

Mr. McLeish: To ask the Secretary of State for Employment whether consideration of the future of jobcentres and unemployment benefit offices will involve consultation with local right hon. and hon. Members.

Mr. Lee *[holding answer 25 July 1988]:* It is normal practice in the case of a proposal to close a particular jobcentre or unemployment benefit office or to alter the level of service provided there to give local right hon. and hon. Members the opportunity to comment.

Mr. Tony Lloyd: To ask the Secretary of State for Employment if he will give details of those jobcentres in the Greater Manchester area which are presently being considered for closure; and if he will make a statement.

Mr. Lee *[holding answer 25 July 1988]:* The network of offices is kept under continuous review; any proposals to close an office or change the level of service provided in an individual office are put to the Minister responsible for the employment service for approval. In these cases the Member of Parliament and local interests are given the opportunity to comment. I have no proposals to put to the hon. Member at present.

Mr. Meacher: To ask the Secretary of State for Employment if he has any plans to seek additional funds to keep existing jobcentres open.

Mr. Lee *[holding answer 25 July 1988]:* My right hon. Friend will continue to ensure that all the activities which this Department needs to carry out are adequately funded.

HOME DEPARTMENT

Police Vehicles (Unleaded Petrol)

Mr. Redmond: To ask the Secretary of State for the Home Department if he will list for each police authority for which he has authority the number of motor vehicles held by each, and the number that have been converted to run on unleaded petrol.

Mr. Douglas Hogg: The total number of vehicles, excluding launches and aircraft, held by each force in England and Wales at 31 December 1987 was as follows:

Force	Number of vehicles
Avon and Somerset	668
Bedfordshire	198
Cambridgeshire	283
Cheshire	428
City of London	68
Cleveland	217
Cumbria	283
Derbyshire	264
Devon and Cornwall	609
Dorset	236
Durham	278
Dyfed-Powys	197
Essex	578
Gloucestershire	254
Greater Manchester	1,138
Gwent	160
Hampshire	805
Hertfordshire	381
Humberside	409
Kent	715
Lancashire	520
Leicestershire	354
Lincolnshire	258
Merseyside	704
Norfolk	289
Northamptonshire	262
Northumbria	561
North Wales	295
North Yorkshire	325
Nottinghamshire	371
South Wales	564
South Yorkshire	520
Staffordshire	338
Suffolk	253
Surrey	342

Force	Number of vehicles
Sussex	637
Warwickshire	222
West Mercia	510
West Midlands	1,057
West Yorkshire	937
Wiltshire	240
Metropolitan[1]	3,972
Total	21,700

[1] As at 31 March 1988.

Records of police vehicles using unleaded fuel are not held centrally and could be obtained only at disproportionate cost.

Equal Opportunities

Mr. Janner: To ask the Secretary of State for the Home Department how many and what percentage of the part-time members of staff and 21 sets of job sharers employed in his Department are women; and how many and what percentage are from ethnic minorities.

Mr. Hurd: There are 1,213 part-time members of staff in the Home Office, of whom 953 (78·6 per cent.) are women. All 21 sets of job sharers are women. Of the part-time staff who responded to the ethnic surveys, 26 (3 per cent.) described themselves as members of an ethnic minority.

Mr. Janner: To ask the Secretary of State for the Home Department how many and what percentage of the members of staff in his Department who are on flexible working hours are women and from ethnic minorities, respectively.

Mr. Hurd: The information requested is not available centrally and could be obtained only at disproportionate cost.

Mr. Janner: To ask the Secretary of State for the Home Department what details of his equal opportunities policies related to staff were given to the National Association of Community Relations Councils and when; and whether he will place a copy of the document containing such details in the Library.

Mr. Hurd: Information about the equal opportunities policy was given orally to the National Association of Community Relations Councils at a meeting at the Immigration and Nationality Department in January. A representative of the NACRC has since visited IND and has discussed a number of subjects, including our equal opportunities policy.

Mr. Janner: To ask the Secretary of State for the Home Department which members of ethnic minorities have addressed internal training courses in his Department; and when.

Mr. Hurd: Records of individuals who have addressed training events are not kept in a way which identifies their ethnic origins. However, over the past 12 months, more than 20 courses or seminars are believed to have been addressed by ethnic minority speakers from outside the Department. More than that have been addressed by ethnic minority members of staff but only a minority of them in connection with equal opportunities.

Mr. Janner: To ask the Secretary of State for the Home Department in what quasi-governmental bodies or other organisations he has authority to request or require the carrying out of ethnic monitoring exercises in accordance with the code of the Commission for Racial Equality; and what ethnic monitoring exercises have been carried out by each such department.

Mr. Hurd: Those non-departmental public bodies and other organisations sponsored by the Home Office which are responsible for the recruitment and personnel management of the staff they employ are encouraged to be equal opportunities employers, and to pursue practices in accordance with the codes promulgated by the Commission for Racial Equality and the Equal Opportunities Commission. No central records are held of ethnic monitoring and equal opportunities exercises carried out by them. Those bodies which are staffed by Home Office personnel have been included in the Civil Service regional surveys.

Mr. Janner: To ask the Secretary of State for the Home Department whether the equal opportunities officer for the prison service and for the rest of his Department, respectively, is female or a member of an ethnic minority or both.

Mr. Hurd: The equal opportunities officer for the prison service is male; the others, for the rest of the Department, female. Both are white.

Mr. Janner: To ask the Secretary of State for the Home Department which advertisements have been placed by his Department in the ethnic or local press; and when.

Mr. Hurd: Over the past few years my Department has placed a range of advertisements, seeking clerical and specialist staff, immigration officers and prison officers, in papers likely to have a high ethnic minority readership.

Mr. Janner: To ask the Secretary of State for the Home Department by whom the continuous examination of recruitment, training and promotion is being carried out to see what further steps might usefully be taken to ensure equal opportunities; when formal meetings have been held in respect thereof; and where and with whom.

Mr. Hurd: Staff in the establishment department and prison department directorate of personnel and finance will continue to assess the results of the monitoring exercises and to consider, with others responsible for recruitment, the scope for further action. Meetings within the Home Office on the monitoring exercises have included discussion in the equal opportunities sub-committee of the departmental Whitley Council. Monitoring methods, the use of data, and action likely to promote equal opportunities, have also been discussed with other Departments, and at the joint working party on race relations.

Ethnic Monitoring

Mr. Janner: To ask the Secretary of State for the Home Department what meetings have been held with ethnic minority community and church leaders in connection with his efforts to promote greater racial equality employment within his Department; and when.

Mr. Hurd: Members of staff with responsibility for race relations have continuing contacts with black-led

Churches and other ethnic minority communities. These provide occasions for discussion about employment in the Civil Service. The prison department has had meetings in 1986 and 1987 with Church and community leaders.

Mr. Janner: To ask the Secretary of State for the Home Department how many and what percentage of the respondents to his monitoring exercises who stated that they were of ethnic minority origin were in grades 1, 2, 3, 4, 5, 6 and 7, respectively.

Mr. Hurd: Thirty members of staff in these or equivalent grades, mainly at the lower end of the range, described themselves as of ethnic minority origin. This is nearly 2 per cent. of the respondents in these grades.

Recruitment

Mr. Janner: To ask the Secretary of State for the Home Department what were the results of each of his Department's recruitment schemes since October 1987; by whom these are being assessed; when he expects to reach firm conclusions; and if he will make a statement.

Mr. Hurd: We aim to reach initial conclusions on the basis of the first year's experience on monitoring recruitment schemes by the end of the year.

Prisons

Mr. Steinberg: To ask the Secretary of State for the Home Department if he will take action to ensure that prisoners at Durham prison get clean underwear more than once every four weeks.

Mr. Douglas Hogg: At Durham prison prisoners are issued with two sets of clean underwear each week. I understand that difficulties with supplies have occasionally resulted in clean underwear not being available immediately after bathing, but in that event prisoners have been able to collect a change of underwear within a few days.

Mr. Steinberg: To ask the Secretary of State for the Home Department how many long-term prisoners are there in Durham prison; and what is the maximum number laid down in the relevant regulation.

Mr. Douglas Hogg: On Friday 22 July Durham prison held 149 adult male prisoners who had been sentenced to over four years' imprisonment and 36 female prisoners and 20 young offenders who had been sentenced to over three years' imprisonment. The number of long-term prisoners held in the prison is not governed by regulation.

Mr. Steinberg: To ask the Secretary of State for the Home Department how many toilets are there in the prison wings at Durham; how many prisoners and staff they cater for; how many toilets there are in the new administration block; and how many they cater for.

Mr. Douglas Hogg: The information requested is as follows:

Wing facilities

	WCs	*Urinals*
For inmates	47	47
For staff	8	5

As at 22 July 1988, there were 1,138 inmates in Durham prison and 200 members of staff were engaged on wing duties.

Administration unit facilities

	WCs	*Urinals*
Female	3	—
Male	3	3

As at 22 July 1988, there were 41 staff employed in the administration unit.

Mr. Irving: To ask the Secretary of State for the Home Department how many baths, showers, toilets and urinals are available for inmates at Bedford prison.

Mr. Douglas Hogg: The information requested is as follows:

Facilities	*Numbers available to inmates and in use*
Baths	9
Showers	18
WCs	37
Urinals	31

Forensic Science Service

Mr. Alex Carlile: To ask the Secretary of State for the Home Department if he will give details of his proposals for restructuring the Home Office forensic science service, including *(a)* the grading of director posts, *(b)* the number of senior scientists at grade seven level, *(c)* the average grade of assistant court going officers, and *(d)* whether there are likely to be any compulsory redundancies; and if he will make a statement.

Mr. Douglas Hogg: The Department is discussing with the Institution of Professional Civil Servants a wide range of proposals for enhancing the effectiveness of the forensic science service and improving its efficiency. We expect to receive these proposals shortly and my noble Friend will write to the hon. and learned Member when we have considered them.

Citizenship

Mr. Darling: To ask the Secretary of State for the Home Department what is the average time between the arrival of an application for British citizenship at Lunar house, Croydon, and its being opened.

Mr. Renton: Applications for citizenship are currently being opened within three working days of receipt. On 25 July there were 90 packages containing applications for citizenship waiting to be opened which had been received since 22 July.

Mr. Darling: To ask the Secretary of State for the Home Department what is the average time taken to deal with applications for British citizenship made to his Department.

Mr. Renton: I refer the hon. Member to the reply I gave to a question from the hon. Member for Bradford, West (Mr. Madden) on 20 July 1988 at column *650*.

Mr. Darling: To ask the Secretary of State for the Home Department how many applications for British citizenship have been received by his Department; how many applications were outstanding as at 30 June; and if he will make a statement.

Mr. Renton: I refer the hon. Member to my replies to the hon. Member for Bradford, West (Mr. Madden) on 20 July, at column *650*, and to the hon. Member for Monklands, West (Mr. Clarke) on 25 July.

Immigration (Edinburgh Airport)

Mr. Darling: To ask the Secretary of State for the Home Department how many immigration cases were dealt with at Edinburgh airport in each year from 1981 to 1987.

Mr. Renton: The information is not available in the form requested.

Immigration Officers

Mr. Ieuan Wyn Jones To ask the Secretary of State for the Home Department if he will list the numbers of immigration officers employed at each point of entry into the United Kingdom.

Mr. Renton: The number of immigration officers, including management grades, employed at each point of entry into the United Kingdom as at 1 July 1988 was as follows:

District and Port	*Assistant Chief Inspector*	*Inspector*	*Chief Immigration Officer*	*Immigration Officers*
Heathrow				
Terminal 1	1	4	17	81·50
Terminal 2	—	4	20	128
Terminal 3	1	6	30	199

Incident (Kensal Green)

Mr. Austin Mitchell: To ask the Secretary of State for the Home Department if he will call for a report from the Commissioner of Police of the Metropolis as to what steps have been taken to identify the owners and whereabouts of the cars referred to in the article by Jonathan Taylor on page 27 of the issue of *The Independent* dated 21 July; and whether those concerned in the affair have been apprehended.

Mr. Douglas Hogg: I understand from the Commissioner of Police of the Metropolis that at the time of the incident the victims were unable to provide descriptions of the alleged assailants or registration numbers of their cars. However, the police are contacting Mr. Taylor to see whether he has information which might assist the investigation.

Pentonville Prison

Mr. Alex Carlile: To ask the Secretary of State for the Home Department how many unconvicted prisoners have been held in Pentonville prison for more than two years; and if he will make a statement.

Mr. Douglas Hogg: On 31 March 1988 one unconvicted prisoner in Pentonville prison had been held there for more than two years.

Hong Kong (Death Penalty)

Mr. Alex Carlile: To ask the Secretary of State for the Home Department if he will make it his policy, before approving the extradition of any person to Hong Kong, to seek an assurance from the Governor of Hong Kong that the death penalty will not be carried out on that person; and if he will make a statement.

Mr. John Patten: Section(4) of the Fugitive Offenders Act 1967 provides discretion to refuse the surrender of a fugitive accused or convicted of an offence not punishable with the death penalty in Great Britain, if the death penalty could be imposed in the requesting Commonwealth country or dependency. It is the policy in such cases to seek an assurance, before surrendering the fugitive, that the death penalty will not be carried out. In the case of the return of a fugitive to Hong Kong such an assurance would be sought from the Governor.

Broadcasting Standards Council

Mr. Oppenheim: To ask the Secretary of State for the Home Department when he plans to announce the appointment of the deputy chairman and members of the Broadcasting Standards Council.

Mr. Hurd: I am pleased to be able to confirm that Miss Jocelyn Barrow, OBE, has agreed to become the deputy chairman of the Broadcasting Standards Council. She will take up the appointment later in the year, following her departure from the BBC board of governors.

I am also pleased to confirm that Dr. Jean Curtis-Raleigh, the Rt. Rev. W. J. Westwood, Bishop of Peterborough, Mr. Richard Baker, OBE, Mr. Alf Dubs and Dr. R. Brinley Jones have all agreed to become members of the council.

I shall announce details of the complete membership of the council as soon as possible.

Hungerford (Shootings)

Sir Michael McNair-Wilson: To ask the Secretary of State for the Home Department, whether he has received the report of Her Majesty's inspector of constabulary on the Hungerford incident; and if he will make a statement.

Mr. Hurd: I have received the report of Her Majesty's Inspector of Constabulary and I have today placed in the Library a summary of it which includes all his conclusions and recommendations. Most of these are for chief officers to consider and Her Majesty's Chief Inspector of Constabulary will be bringing them to the attention of the Association of Chief Police Officers for this purpose. Some of the recommendations in relation to communications will be pursued by the Home Office police department science and technology group. Recommendations concerning firearms law are being considered in the context of the legislative changes proposed in the Firearms (Amendment) Bill. The recommendations which touch on the police use of firearms and in particular the use of armed response units will be considered by the Home Office working party on police use of firearms.

Civil Defence College

Mr. Sayeed: To ask the Secretary of State for the Home Department whether he has reached any conclusions on the review of the Civil Defence College.

Mr. Hurd: Yes. A document has today been placed in the Library setting out the ground covered by the review and the decisions which I have taken as a result.

The college will have a greater analytical and developmental role in civil defence policy, within the framework of Home Office policy objectives. It will concentrate on training at senior level. The numbers of general courses will be reduced and replaced by workshops for civil defence planners. The college will continue to advise and assist local authorities with their training at local level. Some limited development in planning for peacetime emergencies within the framework established by the Civil Protection in Peacetime Act 1986 will be initiated. There will be new arrangements for liaison and advisory groups on which the local authorities and their staff will be represented. The co-ordination of volunteer effort in civil defence will be further examined.

The work of implementing these changes will now be taken forward by my officials. There will be full discussions with the local authority associations, the professional organisations and the trade union side of the Home Office departmental Whitley council as the work progresses.

WALES

Housing

Mr. Worthington: To ask the Secretary of State for Wales if he will publish in the *Official Report* a summarised housing revenue account consistent with table 17.1 of Cm. 288-II, for each of the years 1982-83 to 1990-91 for *(a)* Welsh local authorities, *(b)* new town development corporations in Wales and *(c)* housing corporation-financed housing in Wales.

Mr. Grist: For Welsh local authorities for the years 1982-83 to 1985-86 the requested information can be found at table 63 of "Welsh Housing Statistics 1987", a copy of which can be found in the Library of the House. Revised figures for 1986-87 and provisional figures for 1987-88 on the same basis are as follows. Figures for later years are not available.

The information for new town development corporations and the Housing Corporation for the same years can be found at table 64 of the same publication which shows expenditure from 1982-83 to 1985-86. Revised figures for 1986-87 and provisional figures for 1987-88 are also shown in the following table:

Housing Revenue Account: Income and Expenditure

(£ thousands)

	1986-87	*[1]1987-88*
Income		
Unrebated rent of dwellings	227,098	232,744
Net rent of land and building other than dwellings	2,314	2,376
Government subsidy	8,698	11,762
Contributions from other local authorities	239	250
Mortgage interest from former tenants	13,311	12,426
Interest from unapplied capital receipts	19,205	18,843
Contributions from the General Rate Fund	2,318	2,369
Administration of rent rebates scheme	2,998	3,970
Other (excluding rent rebates)	11,815	11,823
Other income—Total	287,996	296,563
Expenditure		
Supervision and management:		
General	25,385	28,083
Special	15,999	17,844
Repairs and maintenance	88,213	92,754
Debt charges:		
Repayment of principal	23,481	25,452
Interest on outstanding loan debt	122,578	132,638
Capital expenditure met from revenue:		
Revenue contributions to capital outlay / Other	4,453	4,016
Transfers to General Rate Fund	1,448	1,516
Other Expenditure	4,405	5,135
Total	285,962	307,438
Dwelling in HRA at end of March	253,000	248,000

[1] Provisional.

Public expenditure on housing

(£ million)

	1986-87	*[1]1987-88*
Housing corporation:		
Gross loans and grants to housing associations	51·5	64·5
Receipts	−5·1	−7·1
Total net Housing Corporation expenditure	46·4	57·4
New towns:		
Gross expenditure:		
Land	—	—
New dwellings	0·6	0·1
Renovations	—	—
Total new towns gross expenditure	0·6	0·1
Receipts:		
Sales	−1·4	−5·5
Repayment of sums outstanding on sales of dwellings	−0·5	−0·2
Total new towns receipts	−1·9	−5·7
Total new towns expenditure	−1·3	−5·6

[1] Provisional.

Lliw Valley Borough Council

Mr. Gareth Wardell: To ask the Secretary of State for Wales if he will give consideration to the designation of part or the whole of the area of Lliw valley borough council as an inner urban area.

Mr. Grist: The status of all Welsh districts is kept under regular review. At present, however, there is not sufficient justification to designate Lliw valley.

Hospices

Mr. Barry Jones: To ask the Secretary of State for Wales if he will list hospices for the terminally ill in Wales, by county, indicating the amount of public money paid to these in the last five years.

Mr. Grist: This information is not held centrally.

Mr. Barry Jones: To ask the Secretary of State for Wales if he will make further funds available to health authorities in Wales for the provision of hospices for the terminally ill; and if he will make a statement.

Mr. Grist: Within their overall financial allocations it is for individual health authorities to decide on the resourcing of services in the light of specific local need.

Social Science Research

Mr. George To ask the Secretary of State for Wales how much has been spent by his Department in each of the

past five years on social science research; what percentage this constitutes of total departmental expenditure and of the Department's research budget; and how much of the research has been undertaken *(a)* within his Department, *(b)* by universities and polytechnics and *(c)* by independent research organisations.

Mr. Peter Walker: I shall write to the hon. Gentleman and place a copy of my letter in the Library of the House.

Nurses' Pay

Mr. Barry Jones: To ask the Secretary of State for Wales (1) if he will allocate more funds to Clwyd health authority to enable the authority to meet the nurses' wages awards; and if he will make a statement;

(2) if he will publish his latest estimate of the likely full percentage overall pay increase for the nurses' pay award for each of the health authorities in Wales; and if he will make a statement;

(3) if he will meet Clwyd area health authority to discuss the financial implications of the nurses' pay award; if he will grant the Welsh area health authorities £10 million extra cash to meet the nurses' pay award; and if he will make a statement.

Mr. Grist: Responsibility for implementing the new nurses' clinical grading structure rests with health authorities; until the outcome of that exercise is completed the percentage increase for each authority cannot be known for certain. The review body estimated that the overall effect would be to add 14·5 per cent. to the pay bill. This, together with the costs of implementing the other review bodies' awards (for doctors, dentists and professions allied to medicine) is estimated to be £33·366 million—after taking account of the allowance for pay and price inflation already in health authorities' allocations for this year.

I cannot comment on the need for additional funds until the implementation of the new grading structures has been completed.

Airey and Unity Houses

Mr. Barry Jones: To ask the Secretary of State for Wales (1) how many *(a)* Airey type and *(b)* Unity type houses exist in Alyn and Deeside District council area; what is the estimated cost of reconstituting each of them by type; and if he will make a statement as to when he expects these houses to be repaired;

(2) if he will increase grants to local authorities in Wales to ensure the priority repair of Unity and Airey type houses; and if he will make a statement;

(3) if he will increase the amount of grants to Alyn and Deeside council to enable the housing authority to meet its commitment to repair Airey houses and Unity type houses under part XVI of the Housing Act 1985; how much has already been granted for the years 1987-88, 1988-89 and 1989-90; and if he will make a statement;

(4) what is the average grant given to reconstitute Airey type houses in Alyn and Deeside; and if he will make a statement.

Mr. Grist: I understand that there is a total of 54 Unity and 39 Airey dwellings in the public and private sectors in Alyn and Deeside. For those dwellings in the private sector the provisions of part XVI of the Housing Act 1985 makes assistance available for eligible owners by way of reinstatement grant or repurchase. Such assistance will be available for eligible owners of Airey and Unity dwellings until 30 November 1994. Average costs for the repair of such dwellings are not held centrally but national expense limits for eligible owners have recently been reviewed and are currently set at:

	£
Unity one storey	17,000
Unity two storey	23,000
Airey	27,000

For those dwellings in the public sector we have agreed with the local authorities that it should be for them to determine the priority and form of treatment they think most appropriate.

For the private sector we have to date made available more than £30 million to assist local authorities with their obligations under part XVI of the Housing Act 1985.

For the financial years 1985-86 and 1986-87 all bids for such resources were met in full. For 1987-88 one half of such bids were met. This represented £50,000 for Alyn and Deeside district council. A reserve was, however, held against which further bids could be made by those local authorities which could demonstrate contractual commitments. For the current financial year authorities facing exceptional difficulties have again been able to take advantage of a reserve held, over and above main allocations. Alyn and Deeside district council has not made any bids against these resources. In common with all other Welsh local authorities, Alyn and Deeside district council will shortly be submitting its 1989-90 housing strategy and investment programme to the Department, which will be considered in the light of resources available. I cannot at this stage anticipate what allocation will be made for next year.

Small Businesses

Mr. David Shaw: To ask the Secretary of State for Wales if he will make a statement on the achievements of his Department and his policies in helping small businesses over the last 12 months compared with the previous 12 months; and if he will publish the performance indicators by which his Department monitors those achievements and the statistical results of such monitoring.

Mr. Peter Walker *[holding answer 19 July 1988]:* This Department attaches high priority to the promotion of enterprise and to helping small businesses; a number of specific local initiatives have been directed at this. Both the Department and its sponsored bodies monitor and evaluate their programmes in order to assess their effectiveness. Performance indicators contribute to this process and some of these appear in the public expenditure White Paper and the annual reports of sponsored bodies:

Number of clients other than those attending start up courses provided with assistance

	Number
Start-Up Clients	
1986-87	1,600
1987-88	1,900
Drive Projects	
1986-87	[1]28
1987-88	[2]48

	Number
Mid Wales development grants	
1986-87	[3][4]29
1987-88	[3][5]34

[1] Total assistance offered £215,000.
[2] Total assistance offered £278,000.
[3] Mostly small businesses.
[4] Total grants offered £641,337.
[5] Total grants offered £1,102,180.

Training Commission

The Training Commission in Wales continues to focus its adult training programme to take account of small firms training needs. In 1987-88 financial year the commission spent £1,026,399 in Wales in assisting 6,816 people from September this year. Employment training, which is shortly to absorb the present training programmes for unemployed adults, will provide a comprehensive and flexible training programme aimed at providing the skills unemployed people need and employers want.

Advice and Information

We have made it a priority to improve the help available to small businesses and the self-employed through the small firms service, local enterprise agencies, jobcentres, and the many other public and private-sector sources of advice. Last October we launched the Gateway Network as a means of bringing together all these bodies to work co-operatively; last month we announced that the major banks in Wales had joined the Network. Work is in hand to establish a pilot "one-stop shop" in the Merthyr Tydfil area to facilitate the dealings that new businesses have to undertake because of regulatory requirements.

Small Firms Service

The Welsh Development Agency (WDA) administers the small firms service in Wales, which has continued to respond to a high level of inquiries. The figures for the latest two financial years are:

	1986-87	*1987-88*
(i) Enquiries	38,808	42,869
(ii) Business counselling—first interviews	7,698	8,365
(iii) Business counselling—total interviews	8,689	9,924

Local Enterprise Agencies

The Department takes an active role in encouraging the development of local enterprise agencies and provides funding via the WDA for core activities and special projects. As part of my recently announced programme to revitalise the South Wales valleys, the Department will seek to strengthen the network of enterprise agencies and to provide for all parts of the area to be served by one. Moreover, the intention is to ensure that these agencies are of the highest quality and constitute the best enterprise agency system in the United Kingdom.

Local Link: Local Investment Initiative

We have just launched this new experimental scheme in the Bridgend area. It aims to increase the links between small firms looking for investment and investors who are willing to put money into business ventures in their own community.

Regional Enterprise Grant

This scheme, launched in April 1988, aims to encourage very small firms employing fewer than 25 people to invest and innovate. It has been generally well received. Despite a slow start the number of applications has picked up and is now showing an encouraging upward trend. The total number of applications received to date is 63 and they have a total value of approximately £710,000.

The Business Improvement Services Scheme

This was launched in 1984 and is directed at smaller companies—those employing 200 or less. It aims to encourage the development of new and existing businesses in those areas of Wales affected by the rundown in the steel industry. The scheme is a European regional development fund initiative with a total of about £9·2 million being allocated to Wales (of which £2·4 million is from the United Kingdom Government) for the period between December 1984 and December 1988. The scheme provides grants of between 55 per cent. and 70 per cent. to encourage eligible firms (which may be involved in most manufacturing and some service sector activities) to obtain specialist consultancy advice, develop new products and processes or research new markets. Over 850 offers of grant totalling nearly £3 million were made in the 12 months to 30 June 1988. This compares with just under 600 offers totalling £1·5 million in the 12 months to June 1987.

Enterprise Initiative Consultancy Scheme

Small businesses are the main target of the enterprise initiative consultancy scheme (administered by the Welsh Development Agency) which was launched in January of this year. There has been a very healthy response to the scheme in Wales. By 8 July, 472 applications had been received, of which 243 had been referred to the scheme contractors for allocation to consultants. There are of course no directly comparable figures for last year. The progress of the consultancy scheme is carefully monitored according to the guidelines established by the Department of Trade and Industry.

Regional Selective Assistance, Regional Development Grant

Small businesses have also taken advantage of the help available under more general industrial support schemes, principally regional selective assistance and regional development grants (applications for which ceased to be accepted after 31 March 1988). Between 1 July 1987 and 30 June 1988, 86 offers of assistance worth £6,248,000 were made to businesses and organisations employing fewer than 200 under the regional selective assistance scheme, compared to 78 offers worth £5,719,000 during the previous 12 months. For regional development grants, the equivalent figures were 1,088 offers worth £27,831,000 for 1 July 1987 to 30 June 1988 and 900 offers worth £26,167,000 for the previous 12 months.

The Valleys: A Programme for the People

The new programme for the South Wales valleys launched on 14 June 1988 includes a 15-point programme designed to encourage new and small businesses in the area. This covers additional investment support including two new loan schemes introduced by the WDA for small and very small businesses, the provision of more small factories and workshops, strengthened provision for enterprise training, improved advisory services and action to improve the standard of retailing.

The Craft Initiative

This initiative is designed to provide a comprehensive, professional and effective means of promoting the Welsh craft industry and its products and ensuring that

craft-oriented businesses, both large and small, play their full part in the economic regeneration of Wales. The new co-ordinated package of assistance now available to Welsh craft businesses is head and shoulders above that available elsewhere.

Wales Tourist Board

In 1987-88 the Wales Tourist Board offered some £2·5 million of assistance towards 114 projects, estimated to generate £17·1 million private sector investment and create 417 new jobs. The greater part of such assistance was offered to small businesses, with the board offering streamlined processing for small projects. This facility is of particular value to small and new businesses, as are the advisory and marketing support offered by the board within the Principality.

The board has recently launched its framework development strategy highlighting opportunities for development for businesses of all sizes within the Principality, and further extending special schemes of assistance of particular value to small businesses.

Mid Wales Development (MWD)

MWD provides assistance to small businesses within its area; achievement for the years 1986-87 and 1987-88 are as follows:

Start-up courses—Number attending

Year	*Number*
1986-87	339
1987-88	631

Enterprise Allowance Scheme

The enterprise allowance scheme in Wales continues to be a success. The number of entrants in the last two financial years were as follows:

Year	*Number*
1986-87	5,639
1987-88	6,500

It is estimated that some 7,000 people will enter the scheme in the 1988-89 financial year. The results of a survey in March 1988 showed that of those that received an allowance for a full year, 74 per cent. were still trading 18 months after start-up, and for every 100 of these businesses, 71 additional jobs have been created.

NATIONAL FINANCE

Borrowing

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing for each year since 1970 the public sector borrowing requirement, the increase in the private sector borrowing requirement and the amount of new money created by the lending institutions and the public sector, respectively.

Mr. Lilley: Figures for the public sector borrowing requirement (PSBR) are published in *Financial Statistics*, table 2.6. Chart 2.3 of the Financial Statement and Budget Report shows private borrowing as a percentage of GDP since 1974-75, where private borrowing is defined along similar lines to the PSBR. Recent figures for bank and building society lending, and public sector counterparts to broad money, are available in table 11.7 of *Financial Statistics*. Figures for earlier years are available from the Bank of England on request.

Rents

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer what is his forcast of *(a)* the increase in rent income in 1989-90 as a result of the relaxation of rent controls, *(b)* the amount which will be subject to tax and the expected yield and *(c)* the extra amount which the Exchequer will pay out to tenants by way of rent relief.

Mr. Trippier: I have been asked to reply.

What the difference will be between rents of lettings to which rent regulation no longer applies and rents for lettings on regulated tenancies is too uncertain at this stage for worthwhile forecasts to be made of the additional tax yield and additional expenditure on housing benefit.

Life Insurance and Pensions

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* figures for each year since 1979 the net increase in the amounts available for investment of life assurance and pension schemes to the nearest £ million; and if he will provide a forecast for 1987 and for 1988.

Mr. Maude: I have been asked to reply.

Figures for total net investment by the long-term funds of insurance companies and self-administered pension funds (excluding net investment by pension funds in insurance-managed funds) are as follows for the years 1979 to 1987:

	£ million
1979	10,100
1980	11,744
1981	13,533
1982	15,201
1983	15,957
1984	17,668
1985	18,089
1986	20,027
1987	21,086

Note: There are some breaks in the series due to definitional changes. The main ones are between 1983 and 1984 and between 1984 and 1985.

A forecast for 1988 is not available.

Credit Control

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will make it his policy to impose selective controls on credit by requiring banks and other lending institutions to deposit non-interest bearing cash into the Bank of England as a proportion of their advances for specified purposes or for other than specified purposes.

Mr. Lilley: No.

TRADE AND INDUSTRY

British Steel Corporation

Mr. Fallon: To ask the Chancellor of the Duchy of Lancaster when the Monopolies and Mergers Commission report on the British Steel Corporation will be published.

Mr. Maude: The report is published today.

The Monopolies and Mergers Commission was asked to investigate and report whether the British Steel Corporation could improve its efficiency and reduce its costs, except in so far as that question related to, or might involve consideration of, strategy decisions agreed with Her Majesty's Government in relation to the corporation.

The commission concentrated its investigation on the corporation's two largest operating groups, Strip Products Group and General Steels Group, which together contain the five integrated steelworks where the bulk of the corporation's steel production takes place.

The commission noted that the corporation had moved from a net loss of over £1 billion in 1980-81 to a profit of £38 million in 1985-86. In commending this very considerable achievement, the commission said that it had been secured partly by reductions in capacity and manpower but more significantly by more than doubling manpower productivity over that period. The corporation had re-established its position in the world steel industry, with a range of products which for the most part compared well with that of its competitors. The commission found that the corporation was thus in a new situation. Furthermore, the European Commission ended state aid for steel on 31 December 1985, with the result that all future financial requirements carried interest at market rates. While observing that this had to be seen in the context of the strategy decisions which inevitably affected the corporation's capacity utilisation and hence its efficiency, the commission noted that the strategy still left the corporation with a wide discretion to improve its efficiency. Stock control, maintenance and monitoring of quality performance were identified in particular by the commission as subjects meriting closer attention.

The commission made 48 recommendations for improving the corporation's performance and attached priority to those concerning the determination of the investment programme; the review of stocks; the study of maintenance procedures; quality standards and delivery performances. Notwithstanding its other comments and proposals, the commission observed that the corporation was right to be proud of the efforts of its work force and management in moving from the period of massive losses to the profitabilty achieved in 1985-86, and sensed a determination at all levels in the corporation to continue to improve performance.

In view of the delay in publication I am asking the corporation to respond to the commission's findings as quickly as possible.

Military Exports

Mr. Martyn Jones: To ask the Chancellor of the Duchy of Lancaster how many applications have been made for the export of military equipment for each year from 1979; and how many of these have been *(a)* granted and *(b)* refused.

Mr. Alan Clark: The following are the numbers of licence applications received for exports of military equipment controlled under the Export of Goods (Control) Order:

Export licence applications received

Year	*Number*
1979	8,668
1980	6,882
1981	6,968
1982	6,851
1983	6,931
1984	6,871
1985	9,350
1986	9,406
1987	11,222

Records of the numbers of export licences granted and refused could only be provided at disproportionate cost.

Software Industries

Mr. Simon Coombs: To ask the Chancellor of the Duchy of Lancaster what studies his Department has undertaken into the ability of the United Kingdom software industry to compete with the French, West German and Italian software industries after 1992; and if he will arrange for copies of such studies to be placed in the Library.

Mr. Forth: The Department commissioned a report entitled "Computing Services Industry 1986-1996 a decade of opportunity" from Coopers and Lybrand Associates which was published in April 1987. The study predicts future trends in the industry and includes a comparison of the United Kingdom industry with those of its major competitors—France, West Germany, the United States of America and Japan.

Copies of the report are available from the Library.

Copyright

Mr. Neale: To ask the Chancellor of the Duchy of Lancaster what information he has received from the Government of Indonesia relating to their intentions to grant equal status to copyright works of United Kingdom citizens to those granted to citizens of the United States; and if he will make a statement.

Mr. Forth: Her Majesty's Government are currently negotiating an agreement with the Government of Indonesia for the mutual protection of copyright works. This will enlarge on the protection which is already available for sound recordings. I understand that a United States-Indonesia agreement is also being negotiated.

Mr. Neale: To ask the Chancellor for the Duchy of Lancaster (1) what information he has received from the Government of Korea relating to their intentions to grant equal status to copyright works of United Kingdom citizens to those granted to citizens of the United States of America; and if he will make a statement;

(2) what representations he has made to the Republic of Korea about British books being pirated there on a large scale; and if he will make a statement;

(3) what representations have been made to him by Macmillan publishers relating to the pirating in the Republic of Korea of the multi-volume work of reference published under the title "The New Palgrave Dictionary of Economics"; and if he will make a statement.

Mr. Forth: Since the accession of the Republic of Korea to the universal copyright convention in October 1987, British books published have been protected in that

country. It is, therefore, open to publishers to take action in Korea in respect of the piracy of such works, for example, the Palgrave dictionary. The Community negotiated with Korea to obtain protection for older works and to obtain certain benefits in respect of patents; all of these rights had been granted to the United States and the Community was therefore seeking parity of treatment. The negotiations broke down and as a result the Community suspended Korea's benefits under the generalised system of preferences, where the matter now stands.

English Estates

Mr. Page: To ask the Chancellor of the Duchy of Lancaster whether he envisages any changes in the activities of English Estates; and if he will make a statement.

Mr. Newton: As the White Paper, "DTI—the department for Enterprise", Cm. 278, made clear, the activities of English Estates are an important instrument of our policies which seek to support economic development and encourage enterprise in the regions and inner cities. The recently launched programme aimed at increasing the supply of managed workspace in the inner cities has added an important new dimension to its role.

In the assisted areas the essential role of English Estates is to seek to ensure that suitable premises and sites are available to meet the needs of new and growing businesses, which would not otherwise be met. It does this in a variety of ways including the development of factories, workshops and offices either in advance of demand or to meet the needs of specific customers. It also actively facilitates provision by private sector developers, investors and owner occupiers.

Improving economic conditions have enabled English Estates in recent years to achieve successive annual improvements in the amount of floorspace let and sold. There is, nevertheless, an unsatisfied demand for premises which, combined with rising rental levels and the prospects of continuing economic growth, is leading to renewed interest by the private sector in providing industrial and commercial floorspace in some parts of the assisted areas. If the property needs of industry and commerce are to be met it is essential that this interest should be further encouraged. This requires a suitable response on the part of English Estates. We have, therefore, been considering with the board of the corporation how the planning and execution of its assisted areas programmes should be developed.

On the basis of advice from the board we have concluded that in order to reinforce existing market trends English Estates should adopt fresh approaches designed to secure increased private sector activity wherever possible.

This will affect English Estates' policies towards rental levels and sale prices. Hitherto, the general requirement has been that these should be set at the maximum level the market would bear. For the future, English Estates will have the specific objectives of endeavouring to increase rents and sale prices to levels which will make equivalent developments attractive to the private sector.

The emphasis of English Estates' development strategy will also change substantially with the aim of securing increased private sector activity. Thus, English Estates role as a facilitator will assume much greater significance through the marketing of development opportunities, the preparation and disposal of serviced sites, joint ventures and the sale of completed schemes to investors. English Estates will use its own development funding only in the areas and for the products where private sector provision remains inadequate and where it will not impede the return to a properly functioning property market.

Thus in considering the shape of its future programme in the assisted area, English Estates will have regard to three categories of area and types of property. In the first, the presumption will be that the private sector will be meeting demand without the involvement of English Estates. In the second, it is likely that English Estates will need to participate in some form of joint venture in some types of development if private sector involvement is to be triggered. We shall consider with English Estates the cost-effectiveness of particular arrangements which may be necessary to encourage appropriate private sector provision. In the third, where there is no immediate prospect of private sector provision, English Estates will continue to act as a funder and developer, but on the basis of the rentals and sales policy outlined above.

In future I shall be determining the size of English Estates' annual development programme on the basis of advice from the board about market demand, the likely level of private sector provision and the availability of public sector resources. I shall also take into account the need to balance the demand for resources between the assisted areas programme and the new inner-city managed workspace programme as the latter develops. Decisions about which developments are to be undertaken will remain the responsibility of the board acting within the framework I have just described. I have asked the board to take steps to publish regularly a programme describing the projects planned to be pursued in each region in particular financial years. I shall expect the geographical boundaries of that programme to narrow significantly over time as they take full account of changing rental levels and development costs.

Disabled Persons (Accessibility)

Mr. Ashley: To ask the Chancellor of the Duchy of Lancaster (1) what information he has as to which areas and buildings in recently revitalised inner-city areas remain inaccessible for people in wheelchairs, following redevelopments;

(2) whether he will set up a consultative body to monitor the extent to which the access needs of disabled people are being met in the revitalisation of the inner cities; and if he will make a statement;

(3) what consultations he has had with national and local disability organisations on the subject of disabled people's access needs in the revitalisation of the inner cities;

(4) what consultations he has had with the Access Committee for England, the Centre for the Environment for the Handicapped, and Business in the Community on the subject of disabled people's access needs in the revitalisation of the inner cities; and if he will make a statement.

Mr. Newton: We have had no consultations on these lines, but seek to ensure that the representations we have received from RADAR, and any others we may receive, are appropriately reflected in the development or redevelopment of the inner cities.

I am not convinced that further formal consultation machinery would contribute materially to this aim, or that it would be practicable to gather systematic information about the accessibility of buildings in inner-city areas. I would, however, expect city action teams and inner-city task forces to give positive consideration to the needs of the disabled people in their work, and of course to conform to the provisions on access for disabled people contained in building regulations. Equally, I hope that organisations of and for disabled people, and in particular local access groups, will ensure that their views and suggestions are made known to the teams and task forces.

"Disabled People and The Inner Cities"

Mr. Ashley: To ask the Chancellor of the Duchy of Lancaster what response he has had from the local task forces and city action teams to the paper written by the Royal Association for Disability and Rehabilitation, RADAR, "Disabled People and The Inner Cities".

Mr. Newton: The city action teams and inner city task forces continue to take account of the needs of the disabled as set out in the recent paper by the Royal Association for Disability and Rehabilitation, "Disabled People and the Inner Cities". In particular, the task forces have supported a range of inner-city projects which specifically benefit the disabled. Projects include:

Middlesbrough: support through task force and community programme for project converting cars for the disabled.

Handsworth: support for community glass business to enable it to take on disabled workers.

Spitalfields: installation of a lift for the disabled in Toynbee hall, Gunthorpe street workshops to enable disabled people to have access to facilities, including job club.

Nottingham: support for 80 place computer training project for the disabled.

Coventry: requirement that conversion projects supported by task force should make provision for disabled access.

Leeds: disabled care service project, in conjunction with New Testament Church.

Rochdale: support for disabled places in woodcraft and needlework training.

North Peckham, Southwark: support for 30 place community industry sewing workshop which makes clothes specially tailored for the disabled; support for Southwark environment trust conversion of old stables into workshops, including one made available to the Southwark association for the disabled.

Doncaster: support to Concorde centre for development of training places for the disabled; support for residential course for disadvantaged Youth Training Scheme trainees, including disabled.

In addition, the interdepartmental urban programme supports some 200 projects worth about £6·5 million per annum, which directly benefit the disabled.

Mr. Ashley: To ask the Chancellor of the Duchy of Lancaster if he will issue a White Paper on how the access needs of disabled people will be met in the revitalisation of the inner cities; and if he will make a statement.

Mr. Newton: We have no plans to do so.

Mr. Ashley: To ask the Chancellor of the Duchy of Lancaster if he will outline the interdepartmental co-ordination that exists to ensure that access needs for disabled people in the inner cities are not overlooked.

Mr. Newton: The main instruments for interdepartmental co-ordination are the city action teams, which include the regional directors of my Department, the Department of the Environment and the Department of Employment. They are based in Birmingham, Leeds, Liverpool, the inner-city partnership areas of London, Manchester-Salford, Newcastle-Gateshead and Nottingham. Outside city action team areas there are similar but less formal links between Departments. The city action teams are responsible for co-ordinating and focusing major Government programmes in inner city areas, including the urban programme, city grant, the enterprise initiative and employment programmes, working with local authorities, the private sector and other local organisations. These programmes already take account of the needs of the disabled inner-city areas, and the valuable contribution which they can make to inner-city regeneration, and further advice has recently been issued to the city action teams on these lines, drawing on useful background material provided by the Royal Association for Disability and Rehabilitation.

European Community (Gaseous Fuel Appliances)

Mr. David Nicholson: To ask the Chancellor of the Duchy of Lancaster what representations he has received on the draft directive on the harmonisation of the laws of member states relating to appliances burning gaseous fuels; and what representations he has made to the European Commission on this subject.

Mr. Forth: We have received a number of written representations on this subject from member companies of the Society of British Gas Industries and my hon. Friend the Member for Coventry South-West, (Mr. Butcher) the then Parliamentary Under-Secretary of State for Industry and Consumer Affairs, recently met a delegation drawn from its membership. In addition, views have been canvassed more widely from the gas supply and manufacturing industry as part of the normal consultation process.

Detailed representations to the Commission which reflect to a large extent the technical concerns expressed by industry have been made through the participation of officials in the Commission working party of experts set up to examine this draft directive.

Financial Services Act 1986

Mr. Bowis: To ask the Chancellor of the Duchy of Lancaster if he will review the provision of the Financial Services Act 1986 and other related legislation and regulation on small investors and independent intermediaries, with regard to compliance cost assessment.

Mr. Maude: The Secretary of State and the chairman of the Securities and Investments Board have agreed to take stock on a regular basis to assess the development of the new regulatory regime and its impact on investment businesses.

Import-Export Statistics

Mr. Alex Carlile: To ask the Chancellor of the Duchy of Lancaster (1) what was the value of imports from and exports to Malaysia in each of the years 1979 to 1988; and if he will make a statement;

(2) what was the value of imports from and exports to the Republic of Liberia in each of the years 1979 to 1988; and if he will make a statement.

Mr. Alan Clark: The information is as follows:

United Kingdom trade with Malaysia and the Republic of Liberia 1979—May 1988

Value in £ millions

	Imports	*Exports*
Malaysia		
1979	221·7	187·6
1980	186·9	223·9
1981	188·3	196·2
1982	185·2	210·6
1983	222·5	248·3
1984	319·5	283·1
1985	383·9	281·7
1986	349·9	226·9
1987	397·1	258·0
[1]1988	197·6	122·4
Liberia		
1979	14·3	84·3
1980	8·7	46·4
1981	6·0	24·3
1982	8·2	14·1
1983	7·2	13·9
1984	7·2	31·0
1985	6·0	16·0
1986	7·6	22·1
1987	7·3	13·5
[1]1988	6·4	5·0

[1] January to May.
Source: Overseas Trade Statistics
Note: Figures for 1987 and January—May 1988 are provisional

Figures for 1988 should be treated with more than the usual caution because of major changes to customs procedures introduced in January 1988, details of which were given in a reply to my hon. Friend the Member for Hertfordshire, South-West (Mr. Page) on 7 December 1987 at column *34-35*.

Malaysia

Mr. Alex Carlile: To ask the Chancellor of the Duchy of Lancaster if he will give details of all meetings between the chairman of the British Overseas Trade Board, and the Prime Minister and Deputy Prime Minister of Malaysia since April 1983 concerning Malaysia's policy towards imports from the United Kingdom and Malaysia's relations with Hong Kong.

Mr. Alan Clark: Irrespective of whether such meetings have taken place it is not normally the practice to disclose details of confidential discussions.

National Engineering Laboratory, East Kilbride

Mr. Ingram: To ask the Chancellor of the Duchy of Lancaster if the experimental nuclear reactor at the National Engineering Laboratory, East Kilbride will remain on Crown property following the privatisation of the laboratory.

Mr. Forth: The position of the land on which the experimental nuclear reactor is built will be determined by an agreement that is signed between the Department and a purchaser of the East Kilbride site.

Mr. Ingram: To ask the Chancellor of the Duchy of Lancaster who will have the responsibility for decommissioning the experimental nuclear reactor on site at the National Engineering Laboratory, East Kilbride; and if he will make a statement.

Mr. Forth: The responsibility for any decommissioning of the reactor would lie with the operator, taking account of any requirement of the relevant regulatory bodies, namely the Scottish Development Department and the nuclear installations inspectorate.

Ivory Imports

Mr. Tony Banks: To ask the Chancellor of the Duchy of Lancaster what information he has on imports into the United Kingdom of worked ivory, by weight and value, in each year since 1979.

Mr. Alan Clark: The information is given in the table:

United Kingdom Imports of Worked Ivory 1979-1987

	m/tonnes	*£000*
1979	22·8	382
1980	17·2	487
1981	3·0	238
1982	4·6	263
1983	4·7	311
1984	2·9	455
1985	1·1	267
1986	1·8	252
1987	0·8	241

Source: Overseas Trade Statistics.
Note: 1987 figures provisional.

House Prices

Mr. Michael: To ask the Chancellor of the Duchy of Lancaster what proposals he has under consideration to slow house price rises; what consultations he intends to undertake; and whether he will make a statement.

Mr. Trippier *[holding answer 26 July 1988]:* I have been asked to reply.

I refer the hon. Member to the reply given by the then Parliamentary Under-Secretary of State, my hon. Friend the Member for Broxbourne (Mrs. Roe) to the hon. Member for Edinburgh, Central (Mr. Strang) on 4 November at column *736*.

Members' Correspondence

Mr. Tom Clarke: To ask the Chancellor of the Duchy of Lancaster what is the average length of time taken by his Department to respond to right hon. and hon. Members' correspondence during the summer recess.

Mr. Maude *[holding answer 26 July 1988]:* The information is only available at a disproportionate cost. However, my Department always aims to answer right hon. and hon. Members' correspondence as soon as possible, although some delays may occur during a recess.

James Ferguson (Holdings) plc

Mr. Neil Hamilton: To ask the Chancellor of the Duchy of Lancaster how many interviews the inspectors appointed to inquire into the affairs of James Ferguson (Holdings) plc have given to the press since their appointment.

Mr. Maude *[holding answer 26 July 1988]:* None.

ENERGY

Oil Rigs (Safety)

Mr. Meacher: To ask the Secretary of State for Energy if, further to his answer of 14 July, *Official Report*, column *368*, he will now supply the figures on safety inspections of gas and oil rig installations which are available as near as possible to the form originally requested.

Mr. Peter Morrison: The figures requested could be supplied only at disproportionate cost.

Mr. Meacher: To ask the Secretary of State for Energy if he will list the inspections and accident investigations carried out since 1 January 1987 into the safety of North Sea oil and gas installations; what were they, respectively, minor and major recommendations for action in each case; and which have so far been carried out and which have not.

Mr. Peter Morrison: The figures requested could be provided only at disproportionate cost.

Piper Alpha Platform

Mr. Meacher: To ask the Secretary of State for Energy why, further to his reply of 14 July, *Official Report*, column 366, he will not make the inquiry into the explosion of the Piper Alpha platform in 1984 available to Parliament now.

Mr. Peter Robinson: The 1984 report will form only part of my Department's evidence to the inquiry. It will be for Lord Cullen, as chairman of the inquiry, to decide how much, if any, of the evidence submitted should be released. It would be wrong for me to pre-empt his decision.

Mr. Doran: To ask the Secretary of State for Energy if he will meet the costs of legal representation of survivors and the relatives of those who died in the Piper Alpha tragedy at the forthcoming public inquiry to be chaired by Lord Cullen.

Mr. Peter Morrison: I have nothing to add to my right hon. Friend's reply to the hon. Member on 25 July 1988 at column 7.

Mr. Doran: To ask the Secretary of State for Energy if he will extend the terms of reference of the public inquiry into the Piper Alpha tragedy to consider the establishment of a no-fault liability compensation scheme; and if he will make a statement.

Mr. Peter Morrison: It will be for Lord Cullen to decide, if requested, whether the establishment of a no-fault liability compensation scheme should be considered at the public inquiry.

Public Expenditure

Mr. Worthington: To ask the Secretary of State for Energy if he will publish a table in the *Official Report*, in the same format as his written reply of 7 July, *Official Report*, columns *664-66*, on receipts classified as charges in respect of his programme expenditure over the years 1982-83 to 1990-91, on a basis consistent with the reply of 27 May, *Official Report*, Volume 134, columns *375-76*, indicating the receipts in respect of running costs expenditure together with a supplementary analysis indicating, separately, the amounts of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mr. Parkinson: Receipts in respect of my Department's running cost expenditure over the years 1982-83 to 1990-91 are as follows:

	£ million
1982-83 outturn	−3·2
1983-84 outturn	−3·2
1984-85 outturn	−4·0
1985-86 outturn	−4·0
1986-87 outturn	−4·0
1987-88 estimated outturn	−4·3
1988-89 plans	−4·3
1989-90 plans	−4·4
1990-91 plans	−4·6

The amounts of receipts in respect of programme expenditure and running costs expenditure estimated to have been met from other public expenditure programmes are as follows:

£ million

	Programme	*Running costs*	*Total*
1982-83 outturn	−59·8	−2·0	−61·8
1983-84 outturn	−70·4	−1·7	−72·1
1984-85 outturn	−56·1	−2·1	−58·2
1985-86 outturn	−64·8	−2·1	−66·9
1986-87 outturn	−3·7	−2·3	−6·0
1987-88 estimated outturn	−5·1	−1·7	−6·8
1988-89 plans	−4·7	−1·6	−6·3
1989-90 plans	−4·3	−1·7	−6·0
1990-91 plans	−4·3	−1·7	−6·0

Acid Rain

Dr. Thomas: To ask the Secretary of State for Energy what recent communication he has had with the Forestry Commission concerning environmental surveys conducted in Hertsmere in Hertfordshire, evaluating the effects of acid rain pollution on the *(a)* arboreal and *(b)* aquatic environment in the area; and if he will make a statement.

Mr. Michael Spicer: Following receipt of a tree health survey which was undertaken in April by Greenpeace and which identified a number of individual damaged trees in the constituency of Hertsmere, my right hon. Friend sought the Forestry Commission's professional advice. Two scientists from the commission's research division visited the constituency on 1 June and examined a number of the sites recorded by Greenpeace. They confirmed the existence of damaged trees. However many were at sites with local problems, including soil disturbance and waterlogging. The commission pointed out that damage can be influenced by a wide variety of factors of which air pollution is only one. Air pollution can also derive from a number of different sources: neither the commission nor Greenpeace were able to determine the precise cause of the damage in this area.

Magnox Reactors (Decommissioning)

Dr. Thomas: To ask the Secretary of State for Energy if he will set out the details of the economic appraisal developed by his Department to calculate the likely cost of decommissioning of each of the Magnox reactors.

Mr. Michael Spicer: This is a matter for the Central Electricity Generating Board, and I have asked the chairman to write to the hon. Member.

Dr. Thomas: To ask the Secretary of State for Energy if he will make it his policy during the first phase of decommissioning the Central Electricity Generating Board's Berkeley-Magnox nuclear reactors, to ensure that when bundles of fuel rods are withdrawn from the core containing low burn-up spent fuel, these are appropriately labelled for a special reprocessing regime at Sellafield to retain the high purity of the plutonium content in the spent fuel discharged in a separate plutonium store account.

Mr. Michael Spicer: The Central Electricity Generating Board and British Nuclear Fuels plc plan to manage the dispatch and reprocessing of the final cores of the Berkeley reactors no differently from the fuel from other CEGB magnox power stations. The fuel and the extracted uranium and plutonium will at all times be subject to Euratom safeguards and to the terms of the UK/Euratom/IAEA safeguards agreement.

Dr. Thomas: To ask the Secretary of State for Energy how the decommissioning costs of *(a)* Berkeley and *(b)* other commercial Magnox reactors will be apportioned after privatisation of the electricity supply industry.

Mr. Michael Spicer: Decommissioning provisions for Magnox stations are made throughout their operating lives and are reflected in the prices charged to customers at the time.

Nuclear Waste

Dr. Thomas: To ask the Secretary of State for Energy if the mixed oxide nuclear fuel pin discovered at the Drigg nuclear waste dump site on 11 July was accounted for under the nuclear fuel pin material accountancy arrangement set out by the then Minister of State for Energy, the hon. Member for Eddisbury (Mr. Goodlad) in reply to the hon. Member for Carrick, Cumnock and Doon Valley (Mr. Foulkes), *Official Report*, 4 March 1987, column *596*.

Mr. Michael Spicer: I await the report mentioned in my reply to the hon. Member for Copeland (Dr. Cunningham) on 15 July 1988 at column *430*.

Dr. Thomas: To ask the Secretary of State for Energy if, pursuant to the reply to the hon. Member for Meirionnydd Nant Conwy, *Official Report*, 14 June, column *101*, on nuclear waste safeguards, he will state when the discussions to which he makes reference began; how many meetings have taken place; how many departmental officials have been involved; and when he expects agreement on arrangements for safeguarding nuclear wastes bearing civil fissile materials to be reached.

Mr. Michael Spicer: Discussions have been continuing for some months. It is not yet possible to estimate the completion date.

Sellafield

Dr. Thomas: To ask the Secretary of State for Energy (1) what changes and extensions to current emergency evacuation plans for British Nuclear Fuels Ltd. at Sellafield nuclear complex will be necessitated by the plan announced by British Nuclear Fuels plc, on 13 July, to make Sellafield a package tour centre;

(2) whether the plans announced by British Nuclear Fuels Ltd. on 13 July to encourage a further influx of tourists to Sellafield have any implications for advice given by his Department on coping with evacuations under civil emergencies, particularly regarding accidents at nuclear installations.

Mr. Michael Spicer: It is for the operator of a nuclear site to satisfy the Health and Safety Executive's nuclear installations inspectorate of the adequacy of its emergency arrangements, as part of the licensing procedures. Such plans take account of the population densities and distribution within the detailed planning zone.

Atomic Energy Safeguards

Dr. Thomas: To ask the Secretary of State for Energy if, pursuant to the reply to the hon. Member for Meirionnydd Nant Conwy, *Official Report*, 14 June, column *101*, on atomic energy safeguards, he will set out the basis for his conclusion that there is not likely to be any significant difference between the general conclusions of the 1986 International Atomic Energy Agency safeguards implementation report (SIR) and the 1987 United Kingdom Atomic Energy Authority safeguards implementation report.

Mr. Michael Spicer: The draft 1987 report has been discussed by the IAEA board of governors of which the United Kingdom is a member. A summary of the report's findings will be published in the agency's annual report in September.

Dr. Thomas: To ask the Secretary of State for Energy if, pursuant to his reply to the hon. Member for Meirionnydd Nant Conwy on atomic energy safeguards, *Official Report*, 14 June, column *100*, he will set out details of the specific United Kingdom funded substantial safeguards support programme to which he makes reference; with what organisations contracts are lodged to carry out this programme; and if the results of this research support programme are published in publicly available literature.

Mr. Michael Spicer: The safeguards R and D support programme funded by the Department of Energy is carried out by the United Kingdom Atomic Energy Authority. A summary of this programme, amongst others, was placed in the Library on 23 July 1987.

Uranium Imports

Dr. Thomas: To ask the Secretary of State for Energy what policy considerations underlie *(a)* his willingness to reply in full to questions on coal imports, by amount and country of source and *(b)* his unwillingness to give details of amounts and country of source for uranium imports.

Mr. Michael Spicer: In replying to questions about imports, it is my policy to be as open as possible subject to considerations of commercial sensitivity.

Magnox Reactors, Dungeness

Dr. Thomas: To ask the Secretary of State for Energy what are the financial and future safety implications of the discovery of corrosion faults during the recent statutory annual safety overhaul of the Central Electricity Generating Board Magnox reactors at Dungeness.

Mr. Michael Spicer: The statutory inspection of reactor 2 at Dungeness A station is still in progress and has revealed some corrosion damage in the reactor and boilers. The full extent of these problems and their safety significance are being assessed. It is too early to estimate the financial implications from the loss of generation but every effort is being made to return the reactor to service as soon as possible, subject to the agreement of the station's nuclear safety committee and the consent of the Health and Safety Executive's nuclear installations inspectorate.

Magnox Reactors

Dr. Thomas: To ask the Secretary of State for Energy if he will update to 31 March *(a)* the information on thermal energy generated and spent fuel discharged and *(b)* the information on the allocation of plutonium produced in each of the Central Electricity Generating Board Magnox reactors as given in his reply to the hon. Member for Meirionnydd Nant Conwy, 24 July 1987, *Official Report*, columns *515-16*.

Mr. Michael Spicer: I refer the hon. Member to the reply which I gave him on 20 July 1988 at column 666.

UKAEA (Energy Technology Support Unit)

Dr. Thomas: To ask the Secretary of State for Energy if he will make it his policy to institute management arrangements to separate the energy technology support unit from the United Kingdom Atomic Energy Authority.

Mr. Michael Spicer: I am satisfied with the current management arrangements for the energy technology support unit, which ensure its impartiality, and I have no plans to change these arrangements.

Nuclear Materials (Exports)

Dr. Thomas: To ask the Secretary of State for Energy if, pursuant to the reply to the hon. Member for Meirionnydd Nant Conwy, 14 June, *Official Report*, column 99, on nuclear materials exports, he will set out the reasons why information on the dates and quantities of exports to which he makes reference are confidential.

Mr. Michael Spicer: Information on the dates and quantities of exports of nuclear materials is commercially confidential to the parties involved. Additionally, there may be security considerations.

Nuclear Power Stations (Report)

Mr. Strang: To ask the Secretary of State for Energy how many organisations and individuals have submitted comments on the draft document "The Tolerability of Risk from Nuclear Power Stations"; and when he expects a response to be made to these comments.

Mr. Parkinson: Twenty four organisations and individuals have sent comments to the Health and Safety Commission. The commission has also received advice from the advisory committee on the safety of nuclear installations. The chairman of the commission wrote to my right hon. and learned Friend the Secretary of State for Scotland and to me on 26 July setting out the commission's response, and a copy of this letter has been placed in the Library of the House. The commission agrees with ACSNI's view that the levels of risk proposed for new power stations should be tolerable for the present and proposed PWR programme, provided that strict and comprehensive systems of regulation continue in force. I understand that the commission is arranging for publication of all comments in due course.

Offshore Oil and Gas Safety

Mr. Doran: To ask the Secretary of State for Energy (1) if he will list those establishments which are authorised to issue safety certificates to employees in the offshore oil and gas industry;

(2) what instructions or guidance his Department gives with regard to offshore safety certificates;

(3) how many employees on Piper Alpha on 7 July held full and valid offshore safety certificates; and if he will make a statement;

(4) what is his Department's policy with regard to the issue of offshore safety certificates for employees in the offshore oil and gas industries.

Mr. Peter Morrison: Safety certificates for personnel working offshore are not required, although some specialists require certificates of competence for the work on which they are employed. Regulations require the operator to appoint competent persons to be responsible for the control and safety of the installation and its equipment.

Mr. Doran: To ask the Secretary of State for Energy if he will list the guidance notes and instructions issued by his Department in respect of all aspects of the offshore oil and gas industry, with dates and details of any supplementary or additional guidance notes or instructions.

Mr. Peter Morrison: My Department issues guidance on a number of subjects including the following:

Design and Construction
Life-Saving Appliances
Fire-Fighting Equipment
Continental Shelf Operation Notices
Safety Memoranda
Training and Survival
Crane Operators
Ballast Control Operators
Radio Telephone Operators
Helicopter Landing Officers
Submarine Pipelines Guidance Notes
Guidelines for the specification and operation of dynamically positioned diving support vessels and drilling vessels
Emergency Shut-Down Systems
Guidelines for air range diving support vessels

In addition, video training guides have also been issued and numerous technology reports have been published by HMSO on behalf of my Department.

Mr. Doran: To ask the Secretary of State for Energy what is his Department's policy with regard to fire training for employees in the offshore oil and gas industry; and if he will make a statement.

Mr. Peter Morrison: The Offshore Installations (Fire-Fighting Equipment) Regulations 1978 (SI 1978/611) require offshore operators to provide approved fire-fighting equipment. Training in the use of this equipment is a matter for the operator in accordance with section 2 of the Health and Safety at Work etc. Act 1974 which places a duty on employers to provide such training as necessary to ensure as far as practicable, the health and safety of their employees.

Mr. Doran: To ask the Secretary of State for Energy what is his policy with regard to the issue of immersion suits for employees in the offshore oil and gas industry *(a)* as regards the employees of platform operators and *(b)* as regards the employees of subcontractors of platform operators.

Mr. Peter Morrison: Operators are required to supply employees with protective clothing on every offshore installation.

Mr. Doran: To ask the Secretary of State for Energy what guidance or instruction is issued by his Department to those establishments providing offshore safety training and issuing offshore safety certificates.

Mr. Peter Morrison: The guidance notes listed in my reply to the hon. Member today are available to estalishments providing offshore safety training.

Mr. Doran: To ask the Secretary of State for Energy (1) what is the relationship between his Department and those establishments providing offshore safety training and issuing offshore safety certificates;

(2) whether those establishments providing offshore safety training and issuing offshore safety certificates are subject to approval, licence or supervision by him or any other Government or public agency.

Mr. Peter Morrison: There is no statutory relationship between my Department and those establishments providing offshore safety training. By agreement, one of my officials has a seat on the board of the offshore petroleum industry training board. I have had regular meetings with the chairman of the offshore petroleum industry training board to discuss matters of mutual interest.

Mr. Doran: To ask the Secretary of State for Energy how many staff in his Department are employed in supervising the work of the certifying authorities appointed by him in terms of the Offshore Installation (Construction and Survey) Regulations 1974; and what are their qualifications.

Mr. Peter Morrison: The certifying authorities are internationally recognised independent bodies. My Department does not supervise their work, although the authorities' method of working is monitored by my Department. Three inspectors, who are either chartered engineers or graduates with at least five years' experience of the oil industry, are assigned to this task. In addition all my inspectors, as part of their enforcement duties, observe the work of the certifying authorities and liaise with them as necessary.

Mr. Doran: To ask the Secretary of State for Energy if he will introduce legislation to extend the provisions of the Occupiers Liability Act 1960 to offshore oil and gas installations.

Mr. Peter Morrison: No.

National Nuclear Corporation

Mr. Hind: To ask the Secretary of State for Energy if he will make an announcement on the future of the United Kingdom Atomic Energy Authority shareholding in the National Nuclear Corporation.

Mr. Parkinson: An understanding has been concluded today for the General Electric Company plc to purchase the UKAEA's 35 per cent. minority shareholding in the National Nuclear Corporation. The Government, on whose behalf the UKAEA has owned these shares, has agreed to a purchase price of £14 million. It is the intention to sign a contract for sale in the near future.

I believe this development, which will give GEC a majority shareholding, will remove uncertainty about the Corporation's future.

Amersham International

Mr. Michael Brown: To ask the Secretary of State for Energy whether he intends to exercise his option, under the articles of association, to require Amersham International plc to redeem on 31 March his special rights preference share in the company.

Mr. Parkinson *[pursuant to his reply, 29 March 1988]:* The special rights preference share has offered Amersham International plc protection against take-over during adjustment to the private sector following privatisation in February 1982. Under the articles of associaton I have been able to require redemption of the special share at any time on or after 31 March 1988.

I think it no longer necessary for the protection to continue and have therefore decided to exercise the option open to me and to redeem the special share forthwith.

NORTHERN IRELAND

Short Brothers plc

Mr. Alton: To ask the Secretary of State for Northern Ireland what representations he has had concerning the possible sell-off of Short Brothers; and if he will make a statement.

Mr. Viggers: I refer the hon. Member to the statement I made to the House on 21 July at columns 1298-306. I will carefully consider any representations which may be made to me.

Anglo-Irish Agreement

Mr. Parry: To ask the Secretary of State for Northern Ireland if he will make a statement on any planned renegotiations of the Anglo-Irish Agreement.

Mr. Tom King: We have no plans for any negotiations. However, the two Governments will be reviewing the working of the Intergovernmental Conference, under the terms of article 11 of the Anglo-Irish Agreement, later this year.

Members' Correspondence

Mr. Tom Clarke: To ask the Secretary of State for Northern Ireland what is the average length of time taken by his Department to respond to right hon. and hon. Members' correspondence during the summer recess.

Mr Tom King *[holding answer 26 July 1988]:* The average length of time taken by my Department to respond to Members' correspondence during the summer recess is 10 working days.

Migration

Mr. Alton: To ask the Secretary of State for Northern Ireland what are the most recent figures on the out-migration of young people from Northern Ireland; and if he will make a statement.

Mr. Needham *[holding answer 21 July 1988]:* The most recent figures are those derived from the 1987 mid-year estimates of population. These show that in the period 1 July 1986 to 30 June 1987 around 10,500 persons between the ages of 15 and 24 migrated from Northern Ireland.

Harland and Wolff

Mr Alton: To ask the Secretary of State for Northern Ireland what representations he has received on the takeover of Harland and Wolff; and if he will make a statement.

Mr. Viggers *[holding answer 21 July 1988]:* My right hon. Friend the Secretary of State has received a letter from the hon. Member for Leicester, South (Mr. Marshall) seeking information about the Government's intention to privatise Harland and Wolff.

Radiotherapy Staff

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what was the number of physicists and technicians in the radiotherapy department in Belvoir park hospital, Purdysburn on 30 June 1987 and 30 June 1988.

Mr. Needham *[holding answer 22 July 1988]:* The information is as follows:

Year	*Physicists*	*Technicians*
June 1987	6	15
June 1988	6	12

Planning

Mr. John D. Taylor: To ask the Secretary of State for Northern Ireland if he proposes to amend article 31/7 of the Planning (Northern Ireland) Order 1972 to provide adequate protection to objects and structures within the curtilage of listed buildings; and if he will make a statement.

Mr. Needham *[holding answer 25 July 1988]:* No. For the reasons set out in my previous answer I am satisfied that the provisions of article 31(7) of the Planning (NI) Order 1972 provide the protection required.

Animal Carcases (Residues)

Mr. McGrady: To ask the Secretary of State for Northern Ireland if he will introduce legislation to control the presence of residues in animal carcases at the point of retail sale or at point of manufacture into meat products and if he will make a statement.

Mr. Viggers *[holding answer 25 July 1988]:* United Kingdom-wide legislation introduced on 7 June 1988 provides a statutory framework for the monitoring and control of residues in animals and meat. The Animals and Fresh Meat (Examination for Residues) Regulations 1988 provide for mandatory sampling of animals and fresh meat, the detention of suspect animals and the prevention of sale for human and, in some cases, animal consumption of contaminated farm animals or carcases. The Animals and Fresh Meat (Hormonal Substances) Regulations 1988 contain specific provisions in relation to the control of hormones. Legislation to provide controls on other substances will be introduced in accordance with EC requirements. These regulations provide a means of control at the farm and at the slaughterhouse and so prevent carcases with residues from entering the animal or human food chain. Controls on meat and meat products at the point of retail sale in Northern Ireland are imposed under the Food and Drugs Act (NI) 1958 which, inter alia, requires that food should be fit for human consumption and not rendered injurious to health and should be of the nature, substance and quality demanded by the consumer. Consultations have taken place about the introduction of maximum residue levels for certain pesticides in food, including meat and preparations of meat and regulations are in the process of being made.

Planning

Mr. John D. Taylor: To ask the Secretary of State for Northern Ireland how objects and structures referred to in article 31/7 of the Planning (Northern Ireland) Order 1972, are protected when they are not included in the charge registered in the stututory charges register as outlined in red on the statutory charges map; and how protection is enforced when the listing encumbrance is not recognisable as being registered.

Mr. Needham *[holding answer 27 July 1988]:* The fact that objects and structures referred to in article 31(7) of the Planning (Northern Ireland) Order 1972 are not included in the charge registered in the statutory charges register as outlined in red on the statutory charges map does not lessen their protection under the order.

The entry in the statutory charges register which indicates that a building has been entered on a list of buildings of special architectural or historic interest compiled under article 31 of the order draws the attention of the public to the provisions of article 31 including paragraph 7.

In order to make the position as clear as possible, two changes were made in listing documentation some 18 months ago. The first was a specific note referring to the purport of article 31(7) of the order which is available for public inspection. Secondly, a similar note was added to the notice of listing sent to each owner.

The operation of the listed building enforcement procedures contained in the 1972 order falls to the Department as the listing authority to form a judgment whether specific objects or stuctures fall within the ambit of article 31(7).

AGRICULTURE, FISHERIES AND FOOD

BSE-infected Cattle

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food (1) how many compensation payments he has made to farmers with BSE-infected cattle; how many claims he has received; and how much has been paid in total so far;

(2) if he will introduce a scheme of full compensation to farmers with BSE-infected cattle; and if he will make a statement;

(3) what evidence he has as to whether existing compensation levels for farmers with BSE-infected cattle could be failing to encourage farmers to await diagnosis of BSE and encouraging premature submission of cattle for slaughter;

(4) what steps he is taking to prevent the products of BSE-infected cattle entering the food chain;

(5) if he will give details of the method by which his Department is calculating the compensation due to farmers with BSE-infected cattle.

Mr. Donald Thompson: Bovine spongiform encephalopathy (BSE) was made a notifiable disease on 21 June. Compensation is not yet payable for affected cattle. However, as the Government announced on 7 July, compulsory slaughter with compensation will be introduced very shortly. The carcases of affected animals will be destroyed. Compensation for an affected animal will be at 50 per cent. of market value of the animal, valued as if healthy, up to a ceiling.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if he will give the numbers of BSE-infected cattle notified thus far by *(a)* county and *(b)* region in the United Kingdom.

Mr. Donald Thompson: Since BSE was first identified the number of confirmed cases in Great Britain as at 22 July is as follows. BSE has not occurred in Northern Ireland.

	Number
Eastern	
Bedfordshire	4
Cambridge	6
Essex	1
Lincolnshire	8

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if he has figures to show the number of slaughtered BSE-infected cattle, the products of which entered the food chain.

Mr. Donald Thompson: No, but since the disease was made notifiable on 21 June all the heads of affected animals entering a slaughterhouse have been compulsorily retained by the Ministry in order to examine brain tissue for a definitive diagnosis.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what advice he is giving farmers on early recognition of the symptoms of the disease bovine spongiform encephelopathy.

Mr. Donald Thompson: Advice to farmers, based on the current state of knowledge about the disease, is being provided through the local animal health offices and veterinary investigation centres of the Ministry's state veterinary service. There have also been a number of Ministry scientific presentations, publications and general articles on the subject including in particular one in the *Farmers Weekly* of 15 July.

Water Pollution

Mr. Tony Lloyd: To ask the Minister of Agriculture, Fisheries and Food what steps he is taking to reduce water pollution from farm sources; and if he will make a statement.

Mr. Ryder: My Department offers free initial advice to farmers on pollution avoidance, and now provides free of charge the code of good agricultural practice. Capital grants are available at high rates to farmers investing in new waste storage or treatment facilities. Research is being carried out into improved construction and management of these facilities. We have fully backed water authorities in stepping up prosecutions.

Civil Defence

Mr. Thorne: To ask the Minister of Agriculture, Fisheries and Food if he will set out his plans for emergency feeding arrangements in time of war and/or national emergency; and if he will make a statement.

Mr. Donald Thompson: Under the Civil Defence (General Local Authority Functions) Regulations 1983 (SI 1983 No. 1634) it is local authorities' responsibility to plan for emergency feeding in their areas in the event of a hostile attack. MAFF holds stocks of basic food and of emergency feeding equipment for release to local authorities as necessary. The Ministry has issued advice on planning emergency feeding to local authorities in "Emergency Planning Guidance Handbook 3—Emergency Feeding," copies of which are held in the Library of the House.

Fishing Vessels (Licensing)

Mr. Wallace: To ask the Minister of Agriculture, Fisheries and Food whether he has any plans to significantly alter the system of licensing of fishing vessels engaged in catching pressure stock species; and if he will make a statement.

Mr. Donald Thompson: I hope shortly to announce a major consultation with the fishing industry which will review the existing licensing arrangements.

Research and Development

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food what representations he has received regarding agricultural research and development funded by his Ministry; and if he will make a statement.

Mr. Donald Thompson: I have received a number of representations from interested individuals and organisations about agricultural research and development funded by my Ministry, and consultations about transfer of near market work to industry funding are now taking place with the sectors concerned following the recent internal review of expenditure by the Agriculture Departments on R and D. No conclusions have yet been reached.

Anglers Co-operative Association

Mr. Onslow: To ask the Minister of Agriculture, Fisheries and Food if his Department has considered an application for an exhibition relating to the Anglers Co-operative Association to be displayed in the Upper Waiting Hall.

Mr. Donald Thompson: I understand that arrangements have been made with the authorities of the House for the exhibition to be held in the Upper Waiting Hall from 12 December 1988 to 16 December 1988.

Bass Fishery

Miss Emma Nicholson: To ask the Minister of Agriculture, Fisheries and Food whether he has yet reached any decision on measures for the long-term management and conservation of the Bass fishery following his proposals announced on 29 February, *Official Report*, columns *476-77*; and if he will make a statement.

Mr. Donald Thompson: On 29 February 1988, at column *476*, my right hon. Friend the then Minister of State, Ministry of Agriculture, Fisheries and Food, announced that he and my right hon. Friend the Secretary of State for Wales planned to introduce measures for the long-term management and conservation of the bass fishery. The proposed measures, on which comments from interested parties were invited by 31 May, provided for an increase from 1 January 1989 in the national minimum landing size for bass from 32 to 36 cm; a prohibition from 1 January 1990 on the use of gill and other specified nets with a mesh size between 60 and 99 mm; and the establishment of some 24 nursery areas in inshore waters where restrictions on certain forms of fishing would protect juvenile bass stocks.

After careful consideration of the many responses to these proposals, we have decided to proceed with these measures subject to certain changes to take account of points that have arisen out of the consultations with interested parties. We shall soon be introducing regulations to increase the national minimum landing size for bass throughout Great Britain from 32 to 36 cm and to prohibit the carriage of bass under 36 cm by British vessels but delaying the operation of these measures until 1 January 1990 to coincide with the introduction of mesh size controls and to allow fishermen a further year in which to adjust their fishing practices. The prohibition from the same date on the use of gill and other specified nets will now be limited to those nets with a mesh size between 65 and 89 mm to limit the impact of this measure on the fishery for other species such as grey mullet, sole, red mullet, herring and other pelagic species. The restrictions will apply to nets used by British fishing vessels within British fishery limits, south of lines of latitude drawn through Donna Nook in Lincolnshire and Haverigg Point in Cumbria. Within this area there will also be a ban on the carriage of such nets unless properly lashed and stowed in such a way that they cannot readily be used. An exception will, however, be made for the carriage use of attended drift nets, beach seines and ring nets along the south coast within the three-mile limit between Rame Head in Cornwall and Beachy Head in Sussex. The mesh size controls will not apply to the waters off Scotland, north-east England, Cumbria and Northern Ireland where the numbers of bass taken are negligible.

The principle of establishing nursery areas has met with much support but it is clear from the response that we have received that further consideration has to be given to the extent of these areas and the restrictions on fishing to operate within them. We have therefore asked officials to

undertake further and detailed consultations with local interests before decisions on establishing individual nursery areas are taken.

The measures outlined above, and those we envisage for nursery areas, are designed to safeguard the bass fishery by protecting juvenile bass. While we are aware of the concerns over the exploitation of adult bass in the offshore fishery, we have no evidence at present to support the introduction of conservation or management controls. This, however, is a matter that we are continuing to keep under review. Finally, as announced last February, we shall be seeking a corresponding increase in the EC minimum landing size for bass.

Fishing Capacity

Mr. Mans: To ask the Minister of Agriculture, Fisheries and Food whether he is able to announce the results of the study of measures of effective fishing capacity, foreshadowed in his announcement of 30 April 1987.

Mr. Donald Thompson: The Fisheries Departments have completed their study and copies of it are being circulated to representative organisations today. We are also circulating proposals for further changes to the restrictive licensing scheme which would tighten up arrangements for the transfer of licences between vessels with a view to containing the total capacity of the fleet. This is necessary in order to curb the pressure on the fishing opportunities available to our fleet and to meet the reductions in fleet size set out in the multi-annual guidance programme agreed with the European Commission in December 1987.

The consultation paper puts forward for comment by the industry four basic options for changes to the licensing scheme;

(i) the introduction of additional length bands at the top end of the vessel size range;
(ii) the introduction of smaller length bands throughout the size ranges;
(iii) a restriction on capacity using a new "capacity" formula which takes into account the size of vessel and its engine; and
(iv) a simple restriction on any increase in gross registered tonnage and engine size.

Comments on these proposals are being invited by not later than 21 September 1988. Copies of both documents have been placed in the Library.

In order to avoid the balance between our fleet's capacity and its fishing opportunities deteriorating while the consultations are being completed, we are also as from today introducing, in addition to existing rules on licence transfers, a temporary ban on transfers of licences except where the applicants satisfy us that the transfer will not lead to an increase in tonnage or engine power. This ban includes a ban on increasing the tonnage or engine power of a currently licensed vessel. Special consideration will be given to cases where the immediate application of this ban would cause hardship as a result of enforceable financial commitments already entered into.

Detailed arrangements for administering the extra restrictions on licence transfers have been placed in the Library of the House.

Farm Diversification Grant Scheme

Mr. Butler: To ask the Minister of Agriculture, Fisheries and Food what progress there has been in processing applications for the farm diversification grant scheme.

Mr. Ryder: Since the farm diversification grant scheme was introduced on 1 January this year, a total of 649 applications have been received in England. Of these, 530 have been acknowledged, which means a farmer can, if he wishes, make a start on the proposed work before approval of his application is given; 303 applications have so far been approved and 66 rejected or withdrawn.

FOREIGN AND COMMONWEALTH AFFAIRS

Public Expenditure Survey

Mr. Worthington: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will publish a table in the *Official Report*, in the same format as the reply of 7 July, *Official Report*, columns *683-84*, on receipts classified as charges in respect of his programme expenditure over the years 1982-83 to 1990-91, but consistent with the reply of 27 May, *Official Report*, Volume 134, columns *375-76*, indicating the receipts in respect of running costs expenditure together with a supplementary analysis indicating, separately, the amounts of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mrs. Chalker: The breakdown of receipts in respect of running costs expenditure for the Foreign and Commonwealth Office is set out in the table. Receipts in respect of programme expenditure were given in the Parliamentary Under-Secretary of State's written answer of 7 July 1988, at columns *683-84*.

	1982-83 outturn	*1983-84 outturn*	*1984-85 outturn*	*1985-86 outturn*	*[1]1986-87 outturn*	*1987-88 outturn*	*1988-89 plans*	*1990-91 plans*	*£ million 1991-92 plans*
Receipts in respect of running costs included in other public expenditure programmes	1·45	2·40	2·62	2·67	7·24	7·47	8·26	7·56	7·75
Other running cost receipts	10·65	13·22	12·15	17·32	23·95	34·18	33·47	35·78	36·67
TOTAL	12·10	15·62	14·77	19·99	31·19	41·65	41·73	43·34	44·42

[1] With effect 1986 total includes receipts from ODA for services of DS officers and locally engaged staff administrating full-time aid work overseas.

Katyn Massacre

Mr. Atkinson: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on his progress of his Department's studies of Soviet involvement in the Katyn massacre.

Mrs. Chalker: Successive British Governments have made clear their shock and repugnance at the Katyn massacre. There is substantial circumstantial evidence pointing to Soviet responsibility for the killings. We look to the Polish-Soviet commission which is studying Katyn to settle the question once and for all.

South Africa

Mr. Allen McKay: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will give details on the representations he or his Department have received relating to Her Majesty's Government's action and policy towards The Promotion of Orderly Internal Politics Bill in South Africa.

Mrs. Chalker: My right hon. and learned Friend met a delegation of South African Church leaders on 23 May. My hon. Friend the Minister of State, Home Department met representatives of the South African Catholic Bishops' Conference on 13 April and I met British charitable organisations active in South Africa on 21 April. Officials received a delegation from the British Council of Churches on 18 May. In addition we have received letters from MPs, charities, political organisations, Churches, trades unions and members of the public.

Mr. Allen McKay: To ask the Secretary of State for Foreign and Commonwealth Affairs what action he proposes to take in the light of the South African Government's proposed legislation restricting the activities and funding of peaceful opposition groups in South Africa; and if he will make it his policy to support the EEC special programme for the victims of apartheid.

Mrs. Chalker: We support wholeheartedly the European Community's special programme for the victims of apartheid and are committed to its future success. As a consequence of our repeated representations, both bilaterally and jointly with our European partners, the South African Government are in no doubt as to our opposition to the draft "Promotion of Orderly Internal Politics" Bill.

Saudi Arabia (Social Insurance Contributions)

Mr. David Nicholson: To ask the Secretary of State for Foreign and Commonwealth Affairs what developments he can report towards the refunding of contributions to British citizens by the General Organisation for Social Insurance in the kingdom of Saudi Arabia following the March 1987 Saudi royal decree removing expatriates from the social insurance system; and if he will make a statement.

Mrs. Chalker: The refund of the General Organisation for Social Insurance (GOSI) contributions is a matter for the Saudi Arabian authorities. HM ambassador in Saudi Arabia is doing everything he properly can to hasten the refund of these contributions. He (and other ambassadors there) call periodically on the Saudi Minister responsible for the GOSI matters to underline our wish to see that these claims are settled as soon as possible.

Nuclear Safety

Dr. Thomas: To ask the Secretary of State for Foreign and Commonwealth Affairs, pursuant to the reply to the hon. Member for Meirionnydd Nant Conwy, *Official Report*, 14 June, columns *122-123* whether the European Commission report to which he makes reference has now been published; what was the basis on which he came to the understanding that no breach of the ECC safeguards regime had taken place; and what steps he took to reach the conclusion that the investigation was thorough.

Mrs. Chalker: The European Commission report has not yet been published. On the question of lack of breach of EEC safeguards I refer the hon. Gentleman to the reply my hon. and learned Friend the Member for Putney (Mr. Mellor), gave to the hon. Member for Bradford, South (Mr. Cryer) on 10 February 1988 at column *234*.

The commission investigation has involved numerous visits by a team of experts to nuclear installations, site inspections, round table discussions and examination of records. We see no reason to doubt its thoroughness.

Prisoners (China)

Mr. Alex Carlile: To ask the Secretary of State for Foreign and Commonwealth Affairs what action he has taken in the light of the recent all-party parliamentary report on ill-treatment of prisoners in Chinese prisons, a copy of which has been sent to him; whether he has made special representations on behalf of prisoners to be transferred to China in 1997 from Hong Kong; and if he will make a statement.

Mrs. Chalker: We have not received a copy of the document described. But as for Hong Kong, the Sino-British joint declaration and the draft Basic Law both make clear that the legal and judicial systems in the future Hong Kong special administrative region will be separate from those of the People's Republic of China; and that the laws currently in force in Hong Kong will remain basically unchanged, save for any that contravene the Basic Law.

Any prisoners held in Hong Kong gaols in 1997 will become the responsibility of the Hong Kong special administrative region, not of China.

Diplomats (Removal)

Mr. Alex Carlile: To ask the Secretary of State for Foreign and Commonwealth Affairs what is his policy with regard to seeking the removal from the United Kingdom of diplomats detained by the United Kingdom authorities and who have been appointed to permanent missions in the United Kingdom; and if he will make a statement.

Mrs. Chalker: Where it is alleged that a member of the staff of a diplomatic mission has committed a criminal offence, we follow the policy laid down in paragraphs 57 to 73 of the White Paper "Diplomatic Immunities and Privileges" (April 1985; Cmnd. 9497).

Diplomatic Immunity

Mr. Alex Carlile: To ask the Secretary of State for Foreign and Commonwealth Affairs what guidance is issued to members of the diplomatic corps with regard to the precise point at which their diplomatic immunity takes effect in relation to a particular posting.

Mrs. Chalker: None. The point at which immunity takes effect is covered by the provisions of article 39 of the Vienna convention on diplomatic relations, which will be known to the sending state.

Malaysia

Mr. Alex Carlile: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list all meetings which Dr. Mahathir Mohamad, Prime Minister of Malaysia, or his staff, have had with officials of his Department, since March 1983 together with the persons attending and the substance thereof; and if he will make a statement.

Mrs. Chalker: My right hon. and learned Friend's most recent meetings with Dr. Mahathir were in July 1987 (during Dr. Mahathir's visit to the United Kingdom) and in April 1988 (during my right hon. and learned Friend's visit to Malaysia). I met Dr. Mahathir during the September 1987 CPA conference in Malaysia.

We have regular contact with the Malaysian Government on a wide range of issues, both in London and through our high commission in Kuala Lumpur. It is not our practice to give details of confidential exchanges with foreign Governments.

Mr. Alex Carlile: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list all representations since January 1981 of Her Majesty's Government to the Government of Malaysia concerning the Malaysian Government's "Buy British Last" policy; and if he will make a statement.

Mrs. Chalker: We took all suitable opportunities to impress on the Malaysians our concern about the "Buy British Last" policy. We were delighted when Dr. Mahathir ended the policy in April 1983, and have been gratified by the subsequent development of bilateral trade and all-round improvement in our relations.

Diplomatic Relations

Mr. Alex Carlile: To ask the Secretary of State for Foreign and Commonwealth Affairs what guidance is issued to members of the diplomatic corps with regard to the application of article 39 of the 1961 Vienna convention on diplomatic relations; and if he will make a statement.

Mrs. Chalker: None. The provisions of article 39 of the Vienna convention on diplomatic relations will be known to sending states.

China (Extradition)

Mr. Alex Carlile: To ask the Secretary of State for Foreign and Commonwealth Affairs what stage his consultations have reached with the Government of the People's Republic of China about an extradition treaty; and if he will make a statement.

Mrs. Chalker: Officials have discussed the possibility of an agreement on judicial assistance to cover civil and commercial matters, with Chinese officials. We have not for the time being considered an agreement on extradition, or discussed this with the Chinese Government.

China (Death Penalty)

Mr. Alex Carlile: To ask the Secretary of State for Foreign and Commonwealth Affairs if he has sought any assurances from the Government of the People's Republic of China that the death penalty will not be carried out after 1 July 1997 on any fugitive returned to Hong Kong prior to 30 June 1997; and if he will make a statement.

Mrs. Chalker: The Sino-British joint declaration and the draft Basic Law both make clear that the legal and judicial systems in the future Hong Kong special administrative region will be separate from those of the People's Republic of China; and that the laws currently in force in Hong Kong will remain basically unchanged, save for any that contravene the Basic Law. Under Hong Kong's laws the commutation of a death sentence is irrevocable. This applies to all death sentences passed in Hong Kong prior to 1997, but commuted by the Governor of Hong Kong. After 1997, these matters will fall within the high degree of autonomy to be enjoyed by the Hong Kong special administrative region government under the joint declaration and the Basic Law.

Endangered Species (Hong Kong)

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs what additional measures aimed at educating the public are currently being considered by the Hong Kong authorities in respect of responsibilities under the convention on international trade in endangered species.

Mrs. Chalker: The Hong Kong Government, in conjunction with the World Wild Life Fund for Nature (Hong Kong), are intensifying their publicity and educational efforts by displaying more posters at entry points—for example, train stations and the airport—and other public places; by distributing more leaflets to schools, travel agents and the general public; by issuing more press releases and making more radio and television announcements; by organising more exhibitions and seminars; and by producing an audio-slide programme for presentation in all country park visitors' centres.

Ivory Products (Hong Kong)

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will seek to establish a ban by the Hong Kong authorities on the import of all ivory products; and if he will make a statement.

Mrs. Chalker: Ivory trade is permissible under CITES and the CITES secretariat has set up an ivory unit to co-ordinate the trade. It is not necessary to ban the import of ivory into Hong Kong. The Hong Kong authorities will only permit imports of ivory products from legal and CITES approved sources.

Animals and Animal Products (Hong Kong)

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs how many prosecutions have been initiated by the Hong Kong authorities arising from the seizure of illegally imported animals and animal products in each year since 1979.

Mrs. Chalker: The Hong Kong authorities do not maintain separate statistics relating to prosecutions for illegal imports of animals and animal products. The following statistics include prosecutions in respect of

illegal imports, illegal exports and illegal possession of endangered species since 1979. Relevant statistics for 1988 are not yet available.

	Number
1979	109
1980	170
1981	154
1982	248
1983	58
1984	103
1985	294
1986	192
1987	366

Ivory Sales (Hong Kong)

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs what information he has about the ultimate destination and use of *(a)* the 638 pieces of elephant ivory tusk. *(b)* the 239·2 kg of elephant ivory cut pieces and *(c)* the 81·2 kg of elephant ivory scraps sold at auction in Hong Kong on 26 February.

Mrs. Chalker: None.

Illegal Animal Products (Hong Kong)

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will seek to establish a policy in Hong Kong that in future all seized items of illegally imported animal tusks, skins and antler are burned.

Mrs. Chalker: The Hong Kong authorities dispose of confiscated specimens in accordance with the convention on international trade in endangered species (CITES) guidelines. Under these guidelines the Hong Kong authorites normaly dispose of animal tusks, skins and antlers by auction (in the case of the less endangered species listed in CITES appendix II) or for educational or scientific purposes (in the case of the most endangered species listed in CITES appendix I). We see no reason to alter these arrangements.

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs what was the total amount raised at the auction in Hong Kong on 26 February of illegally imported animals tusks, skins and antlers seized by the authorities; to what purpose the revenue raised has been put; and if he will make a statement.

Mrs. Chalker: The total amount raised at the auction was HK $2,022,103. The proceeds have been credited to the general revenue of the Hong Kong Government, who provide the funds to the Agriculture and Fisheries Department, which is the management authority responsible for the enforcement and administration of CITES.

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs if any auctions are impending in Hong Kong of illegally imported animal tusks, skins and antlers which have beeen confiscated.

Mrs. Chalker: The Hong Kong authorities have no plans for any such auctions at present.

Tristan da Cunha

Dr. Marek: To ask the Secretary of State for Foreign and Commonwealth Affairs whether his Department requires to be furnished with information or has received information on *(a)* the beneficial interest and ownership of companies trading in or with Tristan da Cunha and *(b)* the beneficial interest of shares held by directors of those companies; and if he will make a statement.

Mrs. Chalker: My Department has been given the following information by companies trading in or with Tristan da Cunha:

(a) Tristan Investments (Pty) Ltd., responsible for operating the fishing concession at Tristan da Cunha, is a South African registered wholly owned subsidiary of the Bermuda registered company South Atlantic Islands Development Corporation Ltd. The Bank of Butterfield and Son Ltd., Bermuda, holds 75 per cent. of the Corporation's issued shares to the order of financial institutions. Of these shares, a British/Swiss Financial institution, SG Warburg Bank AG, holds 7000 of the Corporation's shares (equivalent to 70 per cent. of the issued capital).

(b) Table Bay Marine (Pty) Ltd., which acts as a buying agent for general merchandise for the Islands, is a wholly owned subsidiary of Palinauris Investments Ltd., a Bermuda registered trading company. The majority shareholding in Palinauris Investments is held by Field Nominees Ltd. of Bermuda.

SCOTLAND

Convention of Scottish Local Authorities

Mr. Andrew Welsh: To ask the Secretary of State for Scotland when he next expects to meet representatives of the Convention of Scottish Local Authorities; and what subjects he expects to discuss.

Mr. Rifkind: I hope next to meet representatives of COSLA around mid-November, to discuss the distribution of revenue support grant for 1989-90.

Denominational Single Sex Schools, Strathclyde

Mr. Allan Stewart: To ask the Secretary of State for Scotland what representations he has received concerning the future of denominational single sex schools in Strathclyde region; and if he will make a statement.

Mr. Michael Forsyth: We received over 400 letters about the proposed closure of Our Lady and St. Francis school and over 3,000 about the proposed closure of Notre Dame high school, Glasgow. Both are denominational girls' schools. In the case of Notre Dame the Secretary of State refused consent to the proposal; but the proposal to close Our Lady and St. Francis was not one which required his consent.

Gaelic Language (Television Programmes)

17. **Sir Russell Johnston:** To ask the Secretary of State for Scotland what discussions he has had with BBC Scotland and the independent television companies on the role of television in the field of Gaelic language learning; and if he will make a statement.

Mr. Michael Forsyth: My right hon. and learned Friend meets representatives of the broadcasting authorities from

time to time to discuss Scottish broadcasting matters in general, including Gaelic television broadcasting. The most recent occasion was in January this year, when he met the senior management of Scottish Television and the topics covered included Gaelic television. We have consistently encouraged the broadcasting authorities to provide a reasonable range of Gaelic programmes.

24. **Mrs. Ray Michie:** To ask the Secretary of State for Scotland if he will make a statement on his policy on the level of Gaelic programming, including educational programming, on television in Scotland.

Mr. Michael Forsyth: My right hon. and learned Friend has encouraged the BBC and the IBA to provide a reasonable level of television broadcasting in the Gaelic language and we will continue to do so. The content of Gaelic programmes is, however, a matter for the broadcasting authorities in discussion with those representing the Gaelic community. We understand that Grampian Television is preparing a series of programmes for standard grade Gaelic courses which are to be introduced in the next session.

26. **Mr. Macdonald:** To ask the Secretary of State for Scotland what is his policy towards the encouragement of Gaelic language programming on television.

Mr. Michael Forsyth: As indicated in my reply to the hon. Gentleman on 10 May, at column *94*, we appreciate the contribution which television can make to encouraging the preservation of the Gaelic language. Our support for a reasonable level of Gaelic programmes has been made known to the television companies and we have encouraged the organisations representing the Gaelic community to discuss their needs with the broadcasters. The amount of programming time devoted to such programmes is, however, for the companies to decide, taking account of demand and available resources.

Housing (Scotland) Bill

18. **Dr. Godman:** To ask the Secretary of State for Scotland if he will seek to amend the Housing (Scotland) Bill so as to protect the rights of public sector housing tenants to remain in the public sector if they so choose; and if he will make a statement.

Lord James Douglas-Hamilton: Amendments to the Housing Bill will be brought forward to ensure that adequate consultation with tenants is undertaken where transfer to a private sector landlord is proposed by the local authority and to require my right hon. and learned Friend to withhold his consent to such a disposal if it appears to him that a majority of tenants involved do not wish the disposal to proceed.

Nurses (Pay)

19. **Mr. Ernie Ross:** To ask the Secretary of State for Scotland if he will give for each health board the cost of funding the recent nurses' pay award.

Mr. Michael Forsyth: The overall increase in the nurses' pay bill as a result of this year's pay award was estimated by the review body to be 15·3 per cent. It is this estimate that has been used in determining the amount of additional funding to be provided to meet the costs of the award. Details of the total allocations provided to individual health boards were given in my answer to my hon. Friend the Member for Tayside, North (Mr. Walker) on 5 July.

54. **Mr. Wilson:** To ask the Secretary of State for Scotland when he expects to know the final cost of the recent nurses' pay award.

Mr. Michael Forsyth: When the new clinical grading structure is in place. It is expected to be completed by the end of October.

Rating Reform

20. **Mr. Canavan:** To ask the Secretary of State for Scotland what recent communications he has had with poll tax registration officers about progress with the registration process; and if he will make a statement.

Mr. Lang: There have been no formal discussions. Informal contacts with registration officers indicate that the registration process is going smoothly.

Scottish Council

21. **Mr. Salmond:** To ask the Secretary of State for Scotland when he next expects to meet representatives of the Scottish Council (Development and Industry); and what subjects are expected to be discussed.

Mr. Lang: My right hon. and learned Friend has accepted an invitation to address the council's international forum at Aviemore in October, which will focus on Scotland's future in Europe and the implications of the single European market.

Ravenscraig Steelworks

22. **Mr. Foulkes:** To ask the Secretary of State for Scotland what assessment his Department has made of the effect of closure of the Ravenscraig steelworks on employment in other areas of the Scottish economy.

38. **Mrs. Fyfe:** To ask the Secretary of State for Scotland what calculation has been made of the loss of non-steel industry jobs in the short term and in the long term, consequent upon Ravenscraig being closed.

Mr. Lang: The British Steel Corporation has given an assurance, based on commercial judgment, that there will be a requirement for steel making at Ravenscraig for at least seven years from last December. I see, therefore, no need at present for such an assessment.

25. **Dr. Bray:** To ask the Secretary of State for Scotland whether he will pay an official visit to the Ravenscraig hot strip mill; and if he will make a statement.

Mr. Lang: My right hon. and learned Friend has no immediate plans to visit Ravenscraig. The chairman of the British Steel Corporation has recently confirmed to my right hon. and learned Friend that there is no reason for the corporation at present to make plans to close the Ravenscraig hot strip mill.

31. **Mr. Harry Ewing:** To ask the Secretary of State for Scotland if he will meet the Scottish Trades Union Congress to discuss the future of Ravenscraig hot strip mill.

Mr. Lang: My right hon. and learned Friend has not received any request from the Scottish Trades Union Congress for such a meeting. If a meeting is sought, consideration will be given to the request at the time.

47. **Dr. Reid:** To ask the Secretary of State for Scotland what specific steps he proposes to take to ensure that his undertakings in respect of the future of the hot strip mill at Ravenscraig are fulfilled; and if he will list the references in the *Official Report* where such undertakings were made.

Mr. Rifkind: The undertakings referred to are assurances given by the British Steel Corporation based on its own commercial judgment and are reflected in the statement made by my right hon. Friend the Chancellor of the Duchy of Lancaster on 3 December 1987, at column 1107.

This statement, that there would be a continued need for steel-making at all of the integrated plants, including Ravenscraig, for a period of at least seven years, subject to market conditions, and that there would be continued operation of the hot strip mill at Ravenscraig until at least 1989, has been referred to many times during the passage of the British Steel Bill and in other proceedings. The references could be listed only at disproportionate cost.

Power Station Coalburn

23. **Mr. Eadie:** To ask the Secretary of State for Scotland if he will make a statement on coalburn in power stations, in the light of meetings he has had with representatives of the South of Scotland Electricity Board and British Coal.

Mr. Lang: I refer the hon. Gentleman to the reply I gave to the hon. Member for Dunfermline, West (Mr. Douglas) on 13 June, at column *37*.

I have been advised by the South of Scotland Electricity Board that, as part of its coal supply arrangements for the financial year 1988-89, it has now agreed with British Coal to take deliveries at a rate which will result in a total for the year of up to 3·5 million tonnes.

This agreement has been reached on the basis of commercial negotiations between the parties and there is no question of the Government having intervened in the discussions.

"The Scottish Office and its Activities"

27. **Mr. McTaggart:** To ask the Secretary of State for Scotland what was the cost to his Department of preparing the booklet, "The Scottish Office and its Activities."

Mr. Rifkind: The cost to my Department of preparing the booklet was £321.

Electricity Privatisation

28. **Mr. Darling:** To ask the Secretary of State for Scotland if he has made an assessment of the likely demand for shares in a privatised electricity industry from *(a)* private individuals resident in Scotland and *(b)* institutional and corporate investors.

Mr. Lang: We are giving careful consideration to this aspect of the privatisation, and are confident that individual and institutional investors in Scotland will take up a significant proportion of the shares.

Rate Support Grant Clawback

30. **Mr. Dunnachie:** To ask the Secretary of State for Scotland if he will take steps to ensure that no Scottish local authority is penalised by rate support grant clawback in the year 1989-90; and if he will make a statement.

Mr. Lang: There will be no grant penalties in respect of authorities' budgeted expenditure in 1989-90.

Single Market (Electronics Industry)

32. **Mr. McLeish:** To ask the Secretary of State for Scotland if he will make a statement about the employment implications for the electronics industry in Scotland of the European single market.

Mr. Lang: The removal of the remaining barriers to trade between member states is expected to offer considerable new business opportunities to electronics companies. In particular the harmonisation of technical standards will provide new export opportunities in markets where previously they have represented constraints.

Committee on the Constitution (Report)

33. **Mr. Steel:** To ask the Secretary of State for Scotland what representations he has received on the report of the committee on the constitution, "Claim of Right for Scotland."

Mr. Rifkind: None.

Average Earnings

34. **Mr. Favell:** To ask the Secretary of State for Scotland what position Scotland held in the United Kingdom in terms of average earnings in 1979; and what position it now occupies.

Mr. Lang: Information from the new earnings surveys shows Scotland ranking fifth among the United Kingdom standard regions in 1979, and third in 1987.

44. **Mr. Riddick:** To ask the Secretary of State for Scotland what are the latest average male earnings figures available; and what were the comparable figures in 1986 and 1979.

Mr. Lang: The following information comes from the Department of Employment's new earnings survey.

Average gross weekly earnings of full-time male employees whose earnings were not affected by absence—Scotland

April	*On adult rates*[1] *£ per week*	*Aged 21 or over*[2] *£ per week*
1979	n/a	101·2
1986	201·3	204·2
1987	214·6	218·2

[1] This is the basis currently used in the new earnings survey reports.
[2] This is the basis used previously.

Employment Opportunities (Glasgow)

35. **Mr. Michael J. Martin:** To ask the Secretary of State for Scotland if he will make a statement on the recent steps he has taken to increase employment opportunities in the Glasgow area.

Mr. Lang: Government policies aimed at controlling inflation and stimulating economic growth offer the best prospect for creating permanent new employment opportunities in the Glasgow area. However, a number of Government measures have been aimed specifically at

improving the city's infrastructure and stimulating new enterprise and development. These measures include assistance made available through the Scottish Development Agency and its support for local projects such as the Glasgow garden festival, Glasgow opportunities and the east end executive.

Home Improvement Grants

36. **Mr. Buchanan-Smith:** To ask the Secretary of State for Scotland what plans he has for the future of home improvement grants; and if he will make a statement.

Lord James Douglas-Hamilton: In May, my right hon. and learned Friend issued the consultation paper, "Private Housing Renewal: The Government's Proposals for Scotland." The paper explains and expands on the reform proposals which were outlined in the Scottish housing White Paper, published last November. The Government are confident that the proposals for streamlining the private home improvement system and targeting grant on those who need it most will make a major contribution to improving the condition of the private sector housing stock throughout Scotland.

Gaelic Language

37. **Mr. Bowis:** To ask the Secretary of State for Scotland if he is contemplating any further measures to secure the future of the Gaelic language.

Mr. Michael Forsyth: In the current financial year some £198,000 will be provided as grant aid under the provisions of the National Heritage (Scotland) Act 1985 to bodies which support Gaelic; £500,000 will be spent to bring forward projects under the specific grant scheme for Gaelic education. The Scottish Arts Council has allocated approximately £120,000 and the Highlands and Islands Development Board some £195,000 in support of Gaelic projects.

Education (Scotland) Act 1981

39. **Mr. Michael Brown:** To ask the Secretary of State for Scotland how many parents have exercised their right under the Education (Scotand) Act 1981 to choose which school their child attends.

Mr. Michael Forsyth: Between 15 February 1982 and 31 July 1987 116,409 placing requests were made under the terms of the Education (Scotland) Act 1981, of which 109,213 (93·8) per cent. were granted.

Industrial Progress

40. **Sir Hector Monro :** To ask the Secretary of State for Scotland if he has any plans to meet the Confederation of British Industry in Scotland to discuss industrial progress.

49. **Mr. Cran:** To ask the Secretary of State for Scotland when he next intends to meet the chairman of the Confederation of British Industry in Scotland; and what matters he proposes to discuss.

Mr. Rifkind: I refer my hon. Friend to the reply by my hon. Friend the Minister of State to the hon. Member for Angus, East (Mr. Walsh) on 27 June, at column 79.

Privatisation

41. **Mr. Gerald Howarth :** To ask the Secretary of State for Scotland if he will list all those concerns in Scotland which have been privatised since 1979; and if he will estimate the consequent increase in share ownership in Scotland.

Mr. Lang: No public sector body which had a separate Scottish existence in 1979 has been transferred to private ownership since then.

The privatisations of the South of Scotland Electricity Board, the North of Scotland Hydro-Electric Board and the Scottish Bus Group are in preparation.

No separate estimates have been made of the increase in share ownership in Scotland due to the privatisation of Great Britain bodies.

Steel Industry

42. **Mr. Tom Clarke:** To ask the Secretary of State for Scotland when he next expects to meet Strathclyde regional council and the district councils in Lanarkshire, to discuss the future of the Scottish steel industry; and if he will make a statement.

Mr. Lang My right hon. and learned Friend has no immediate plans to do so.

Devolution

43. **Mr. Kirkwood:** To ask the Secretary of State for Scotland what is his policy towards devolution for Scotland, in the light of the report entitled "A Claim of Right for Scotland" published by the Campaign for a Scottish Assembly, a copy of which has been sent to him; and if he will make a statement.

Mr. Rifkind: In this House, and elsewhere, I have made my views on devolution very clear. These views are not changed by this report, and I have no plans to make a statement.

50. **Mr. Malcolm Bruce** To ask the Secretary of State for Scotland what representations he has received from the Campaign for a Scottish Assembly seeking a meeting to discuss its recent report entitled "A Claim of Right for Scotland".

Mr. Rifkind: I have received no request for a meeting from the Campaign for a Scottish Assembly since its report, "A Claim of Right for Scotland", was published.

Labour Statistics

45. **Mr. Ron Brown:** To ask the Secretary of State for Scotland how many people are currently unemployed in Scotland; and if he will make a statement.

Mr. Lang: On 9 June 1988 there were 288,792 unemployed claimants in Scotland.

This is the lowest level of unemployment since 1981 and is further evidence of the success of the Government's economic policies.

Confederation of British Industry

46. **Mr. Oppenheim:** To ask the Secretary of State for Scotland when he last met representatives of the Confederation of British Industry (Scotland); and what matters were discussed.

Mr. Lang: I refer my hon. Friend to my reply to my hon. Friend the Member for Eastwood (Mr. Stewart) on 27 April, at column *188*.

Civil Service Relocation

51. **Mr. Ingram:** To ask the Secretary of State for Scotland what steps he has taken to encourage the relocation of the Civil Service posts from London-based departments to Scotland.

Mr. Rifkind: My right hon. and learned Friend and I are keen to encourage further relocation of Government offices from London and the south-east to Scotland. Some 2,000 posts have been moved to Scotland since 1979, including over 400 in the move of the Overseas Development Administration to East Kilbride. I have arranged for the recent report on the Overseas Development Administration dispersal, which provides clear evidence of the benefits of such moves to the national and local economies, to be brought to the attention of Departments which are currently reviewing their location of work under arrangements announced by my right hon. Friend the Paymaster General on 31 March, at columns *610-11*.

Tourists (Air Traffic Control Delays)

52. **Mr. David Marshall:** To ask the Secretary of State for Scotland what effect air traffic control delays are having on the numbers of tourists arriving at Scottish airports from abroad; and whether he has prepared any estimate of the likely impact of reduced tourist arrivals on consumer spending in Scotland.

Mr. Lang: Recent air traffic control difficulties are unlikely to have had any significant impact on the number of foreign visitors to Scotland this year. Expenditure by these visitors is also unlikely to have been affected.

Forestry Policy

53. **Mr. Key:** To ask the Secretary of State for Scotland what steps the Forestry Commission takes to co-ordinate forestry policy as between its own plantations and military land; and if he will make a statement.

Lord James Douglas-Hamilton: It is the Forestry Commission's practice to co-operate with the military authorities wherever possible to meet their training requirements. Extensive use is made of commission land for this purpose, the most recent notable example being exercise Purple Warrior in south-west Scotland.

Public Spending

55. **Mr. Marlow:** To ask the Secretary of State for Scotland what is the level of public spending per capita per annum for Scotland at the latest available date.

Mr. Rifkind: The latest available figures are in the reply which my right hon. Friend the Chief Secretary to the Treasury gave on 23 October 1987, at columns 901-2.

Scottish Development Agency

56. **Mrs. Margaret Ewing:** To ask the Secretary of State for Scotland when he next expects to meet representatives of the Scottish Development Agency; and what subjects are expected to be discussed.

Mr. Lang: My right hon. and learned Friend and I meet the chairman, board and chief executive of the agency as necessary to discuss issues of mutual interest. There are, however, no plans at present for such a meeting in the immediate future.

Economic Growth (Report)

57. **Mr. Watts:** To ask the Secretary of State for Scotland what action he proposes to take in the light of the recent Fraser of Allander Institute quarterly economic commentary, a copy of which has been sent to him, concerning the relative growth of the Scottish economy vis-à-vis the rest of the United Kingdom; and if he will make a statement.

Mr. Lang: The "Fraser of Allander Institute Quarterly Commentary" concludes that

"both short-term and long-term prospects for the Scottish economy continue to be favourable".

I wholeheartedly agree with the commentary that growth in the Scottish economy this year and in the years ahead is likely to match that of the United Kingdom as a whole.

Health Boards

Mr. Galbraith: To ask the Secretary of State for Scotland if he will list, by health board, the people appointed to area health boards in Scotland, together with the date and source of nomination of their appointment for every year since 1983.

Mr. Michael Forsyth: This information is not readily available in the precise format requested. Listed are (1) details of the present members of health boards together with their original date of appointment and source of nomination and (2) details of those members appointed since 1983 who are no longer serving members together with their original date of appointment, date of termination and source of nomination.

Argyll and Clyde health board

Cattle Semen

Mr. Kirkwood: To ask the Secretary of State for Scotland what steps he proposes to take to protect the outlying areas, smaller herds, and minority breeds from increased costs as a result of the proposals to deregulate the system of licences for the supply of cattle semen.

Mr. Michael Forsyth: The current consultation by the Agricultural Departments is designed to bring out and examine such concerns but there are no plans to discontinue the special arrangements under which holders of farm storage licences in the remote areas of Scotland obtain their supplies of semen. No final decisions will be made without thorough consideration of all the responses.

Mr. Kirkwood: To ask the Secretary of State for Scotland (1) what steps will be taken to protect animal health in the suggested scheme to deregulate the system of licences to supply cattle semen;

(2) how he proposes to guarantee the quality of semen within a deregulated distribution when the system of licences to supply cattle semen is deregulated.

Mr. Michael Forsyth: Our proposals for a more liberal approach to the number of suppliers of cattle semen and the zoning of supply areas do not imply any relaxation of the current licence conditions. Supply centres will remain under the day-to-day supervision of an approved veterinary surgeon in addition to inspections at regular intervals from the state veterinary service. There will be no reduction in the rigorous animal health standards which licence holders currently have to meet but the quality of their product, in respect of its genetic merit and viability, remains a matter for commercial judgment.

Mr. Kirkwood: To ask the Secretary of State for Scotland (1) how he intends to police the system of artificial insemination in his proposals to deregulate the system of licences to supply cattle semen;

(2) what proposals he has to guarantee the facility to trace and control the movement of semen for artificial insemination under his proposals to deregulate the system of licences to supply cattle semen;

(3) what proposals he has to guarantee veterinary and statistical security in his proposals to deregulate the system of licences to supply cattle semen.

Mr. Michael Forsyth: Organisations currently holding licences for the supply of cattle semen do so under specific conditions designed to protect the health of the national herd under effective veterinary supervision. There is no proposal to change or dilute these arrangements.

It will continue to be a condition of licence that records are kept which allow the movement of semen to be traced and to provide veterinary and statistical security. If it is decided to allow farm storage licence holders to sell surplus straws to a similar licenceholder the proposed record keeping system will ensure the semen can be traced.

Mr. Kirkwood: To ask the Secretary of State for Scotland if he will publish in the *Official Report* a list of all parties responding to suggested changes in the deregulation of licences to supply cattle semen, indicating how many were favourable and how many adversely disposed to the proposals.

Mr. Michael Forsyth: Seven interested organisations in Scotland have been invited to comment by the end of the month. Of the responses received so far AI Breeders Services Ltd. is in favour while the three Milk Marketing Boards have reservations concerning a possible risk to animal health and supplies to remote areas.

Scottish Chess Association

Mr. Andrew Welsh: To ask the Secretary of State for Scotland (1) if he will make a statement regarding his Department's funding of the Scottish Chess Association;

(2) what was his Department's total grant to the Scottish Chess Association in each of the last five years; and what he expects it to be in the current financial year.

Mr. Michael Forsyth: The Scottish Chess Association has received grant as follows:

	£
1983-84	[1]8,500
1984-85	[2]8,500
1985-86	[3]8,750
1986-87	[4]9,000
1987-88	4,730
1988-89	4,730

[1] Of which £6,550 was for travel costs.
[2] Of which £6,550 was for travel costs.
[3] Of which £5,775 was for travel costs.
[4] Of which £5,775 was for travel costs.

In the special circumstances pertaining in the current year my right hon. and learned Friend has offered the association an additional grant of up to £4,300 towards the cost of sending competitors to the World Olympiad and the World Junior Championship.

Health Authorities (Revenue)

Mr. Kirkwood: To ask the Secretary of State for Scotland if he will list the health boards which, under the Scottish health authorities revenue equalisation formula, lose a proportion of their allocation annually because of revenue equalisation; if he will give details of the original percentage of overfunding of these health boards as defined by the Scottish health authorities revenue equalisation formula; and if he will give details for each of these health boards in percentage terms, of the amounts they lose annually; and how much, in percentage terms, each health board still has to lose.

Mr. Michael Forsyth: The SHARE process for allocating revenue expenditure among health boards does not involve the best financed boards losing any of their allocations. In general, progress to revenue equalisation is achieved by giving the best financed boards smaller percentage increases in allocation each year than less well financed boards. When the SHARE formula was introduced the following boards were "overfinanced" against their objectively determined targets:

Board	*Percentage overfinanced*
Tayside	15·33
Lothian	3·52
Highland	2·14
Greater Glasgow	1·13

Highland health board is no longer overfinanced in SHARE, and the 1988-89 position of the other boards is as follows:

Board	*Percentage overfinanced*
Greater Glasgow	4·11
Tayside	2·36
Lothian	0·35

It is not possible to state with accuracy likely changes in boards' allocations in future years as allocations depend upon each board's SHARE target. Targets are recalculated afresh each year to take account of changes in the relative health care needs of each board.

School Meals

Mr. Darling: To ask the Secretary of State for Scotland if he will publish a table showing the comparative uptake

of school meals served to pupils, in percentage terms, in primary and secondary schools by each education authority for 1979-80.

Mr. Michael Forsyth: The information from the annual school meals census undertaken in January 1980 is as follows:

Region, division or island authority	*Total uptake of school meals as a percentage of pupils present*	
	Primary	*Secondary*
Border	57·5	35·5
Central	44·3	28·9
Dumfries and Galloway	66·1	43·8
Fife	45·5	39·4
Grampian	52·4	32·7
Highland	59·0	30·1
Lothian	48·3	34·6
Strathclyde	49·9	31·1
Argyll and Bute	66·6	38·3
Ayr	54·9	43·2
Dumbarton	48·5	23·6
Glasgow	50·8	28·8
Lanark	43·3	26·3
Renfrew	51·1	36·2
Tayside	50·5	28·0
Orkney	72·4	42·8
Shetland	83·3	33·9
Western Isles	71·8	21·4
Scotland	50·5	32·2

Mr. Darling: To ask the Secretary of State for Scotland if he will publish the price of school meals in primary and secondary schools in each region and division where appropriate, and island education authority as at 31 January; and what was the average amount spent on cafeteria meals in each case.

Mr. Michael Forsyth: The information taken from the 1988 annual school meal census is as follows:

Region division or Island authority	*Charge for fixed priced school meals (pence)*	*Average amount spent on cafeteria meals (pence)*
Borders	50	52
Central	58	42
Dumfries and Galloway	61	32
Fife	50	49
Grampian	[1]60	53
	[2]70	
Highland	65	62
Lothian	[1]50	44
	[2]55	
Strathclyde		
Argyll and Bute	63	50
Ayr	63	50
Dumbarton	63	41
Glasgow (City)	63	45
Lanark	63	57
Renfrew	63	50
Tayside	60	40
Orkney	60	60
Shetland	60	[3]
Western Isles	65	70

[1] Primary.
[2] Secondary.
[3] No cafeteria service.

Note:
Charges for fixed price meals are the same in primary and secondary schools in all regions except Grampian and Lothian.

Mr. Darling: To ask the Secretary of State for Scotland if he will publish a table showing *(a)* the total number of staff employed in the school meals service in January in each region or division or island authority in Scotland and *(b)* the number of staff employed for (i) 30 or more hours per week and (ii) less than 30 hours per week.

Mr. Michael Forsyth: The information taken from the 1988 annual school meals census is as follows:

Region division or island authority	*Number of Staff Employed*		
	More than 30 hpw	*Less than 30 hpw*	*Total*
Borders	30	176	206
Central	282	330	612
Dumfries and Galloway	112	387	499
Fife	176	608	784
Grampian	326	743	1,069
Highland	173	447	620
Lothian	534	1,166	1,700
Strathclyde	1,781	3,996	5,777
Argyll and Bute	58	168	226
Ayr	292	709	1,001
Dumbarton	100	607	707
Glasgow (City)	711	1,017	1,728
Lanark	374	709	1,083
Renfrew	246	786	1,032
Tayside	273	633	906
Orkney	31	40	71
Shetland	52	49	101
Western Isles	42	93	135
SCOTLAND	3,812	8,668	12,480

Mental Officers

Mr. Strang: To ask the Secretary of State for Scotland if the criteria used in the appointment procedures of mental officers has changed; and if he will make a statement.

Mr. Michael Forsyth: The original guidance issued in March 1985 referred to formal assessment by the Central Council for Education and Training in Social Work of training undergone by candidates for appointment as mental health officers. Revised guidance issued in December 1986 excluded reference to formal assessment and required local authorities to be satisfied as to the competence of candidates to be appointed before 1 April 1988. The same requirement was prescribed for subsequent appointments in a circular issued in March 1988, which also consolidated the earlier guidance. A copy is available in the Library.

Air Traffic Control

Mr. Allen Adams: To ask the Secretary of State for Scotland what estimate he makes of the effect of air traffic control difficulties on tourism in Scotland.

Mr. Lang: Recent air traffic control difficulties are unlikely to have any significant impact on Scottish tourism.

Companies (Local Taxation)

Mr. Maclennan: To ask the Secretary of State for Scotland what consultations he has had about the local taxation of companies; and if he will make a statement.

Mr. Lang: I refer the hon. Member to the reply which I gave earlier today to the hon. Member for Clydebank and Milngavie (Mr. Worthington).

Forestry

Mr. Ron Davies: To ask the Secretary of State for Scotland how many *(a)* grant and *(b)* felling licence applications were referred to the regional advisory committee for each Forestry Commission conservancy in each year from 1984, and what were the results.

Lord James Douglas-Hamilton *[pursuant to his reply, 8 March 1988, c. 148-50]:* The revised figures to year-end 31 March are as follows:

Conservancy	*Number referred to Regional Advisory Committees*	*Number resolved by voluntary withdrawal or amendment of application*	*Number referred by Regional Advisory Committees to Forestry Commissioners*

Mr. Ron Davies: To ask the Secretary of State for Scotland how many *(a)* grant and *(b)* felling licence applications were received by the Forestry Commission in each year from 1984; how many were referred to regional advisory committees; and what proportion of the annual total this represented.

Lord James Douglas-Hamilton *[pursuant to his reply, 8 March 1988, c. 148]:* The revised figures to year-ended 31 March are as follows:

Year (to 31 March)	Number received	Number and percentage of cases referred to Regional Advisory Committees	
		Number	per cent.
Grant Scheme Applications			
1984	2,000	7	0·4
1985	2,296	14	0·6
1986	3,736	9	0·2
1987	5,362	17	0·3
Felling Licence Applications			
1984	1,923	3	0·2
1985	1,767	5	0·3
1986	2,078	5	0·2
1987	2,367	2	0·1

Crossroads (Scotland)

Mrs. Ray Michie: To ask the Secretary of State for Scotland what consideration he has given to the provision of funding for Crossroads (Scotland) from a source other than the Manpower Services Commission.

Mr. Michael Forsyth *[holding answer 22 July 1988]:* I refer the hon. Member to the reply I gave to the hon. Member for Clydebank and Milngavie (Mr. Worthington) on 28 June, at column *177*. I understand that a number of Crossroads schemes are negotiated with the Training Commission about participation in employment training and I hope that others will follow suit.

Poll Tax

Mrs. Fyfe: To ask the Secretary of State for Scotland what representations he has had from pensioners concerning the poll tax register; and if he will take steps to ensure that the register will not display birth dates for public inspection.

Mr. Lang *[holding answer 25 April 1988]:* My right hon. and learned Friend has received a number of representations from pensioners and others on this subject. Under section 20(2)(a) of the Abolition of Domestic Rates Etc. (Scotland) Act 1987, only the names, addresses and (in certain cases) the collective community charge multipliers contained in the community charges register are to be available for public inspection.

Dental Hospital, Edinburgh

Mr. Malcolm Bruce: To ask the Secretary of State for Scotland what estimate he has of the cost of building a dental hospital in Edinburgh in the event of the University Grants Committee working party's proposals for rationalising Edinburgh and Dundee dental schools going ahead.

Mr. Michael Forsyth *[holding answer 21 April 1988]:* Current plans are to build a replacement dental hospital in Edinburgh for about £5·5 million. No firm estimate has been prepared of the cost of expanding the proposed dental hospital to take account of the working party's proposals for a larger student intake to the Edinburgh dental school than that accommodated in the current hospital plans.

Tenants' Rights (Counsel's Opinion)

Mr. Home Robertson: To ask the Secretary of State for Scotland if he will place in the Library a copy of the opinion of senior counsel concerning the right of tenants of public sector housing which may be transferred to private landlords which was referred to by the Minister of State, Scottish Office, *Official Report*, column 344 of the *Official Report* of the House of Lords debates for 6 July.

Lord James Douglas-Hamilton *[holding answer 26 July 1988]:* I refer the hon. Member to my reply to the hon. Member for Dundee, East (Mr. McAllion) on 18 July at columns *511-12*.

ENVIRONMENT

Rating Reform

Mr. Vaz: To ask the Secretary of State for the Environment if he will list the number and names of local authorities which have written to him objecting to the poll tax.

Mr. Howard: A summary of the 1,217 responses received by 31 October 1986, when the consultation period on the Green Paper ended, was placed in the Library on 15 December 1986. 124 of the local authorities who commented did not support the community charge. Taking respondents as a whole, those favouring abolition of domestic rates outnumbered those favouring retention by 21. A clear majority of them preferred the community charge to all other alternatives and six times as many respondents supported the community charge as supported a combination of rates and local income tax.

Since June 1987 my Department has received some 11,000 letters, the majority of which are from private individuals, containing a variety of comments on specific aspects of our proposals or requesting further information. The letters do not readily lend themselves to an analysis of correspondents' views.

Equal Opportunities

Mr. Janner: To ask the Secretary of State for the Environment when he appointed equal opportunity officers; and how many and what percentage of these are women, from ethnic minority groups or both.

Mr. Ridley: My Department appointed two equal opportunity officers in 1984, one from central DOE and one from the PSA. Both posts are occupied by white, male staff.

Ethnic Monitoring

Mr. Janner: To ask the Secretary of State for the Environment in what quasi-governmental bodies or other organisations under his aegis he has authority to request or require the carrying out of ethnic monitoring exercises in accordance with the code of the Commission for Racial Equality; and what ethnic monitoring and equal opportunities exercises have been carried out by each such Department.

Mr. Ridley: Non-departmental public bodies and other bodies sponsored by my Department are responsible for arrangements for recruitment and personnel management of staff they employ. Organisations are encouraged to be equal opportunities employers, and to pursue practices in the codes of the Commission for Racial Equality and the Equal Opportunities Commission. No central records are held of ethnic monitoring and equal opportunities exercises carried out by these bodies.

Warrington Runcorn (Factory Space)

Mr. Butler: To ask the Secretary of State for the Environment if he will publish figures available to him showing the progress of Warrington Runcorn new town development corporation is constructing, allocating and filling factory space.

Mr. Trippier: I refer my hon. Friend to the reply given by my hon. Friend the Member for Broxbourne (Mrs. Roe) on 28 March at columns *299-300*. In addition, for the current financial year to date, 106,730 sq ft of factory floor space has been completed, and 450,540 sq ft occupied; 260,000 sq ft is at present under construction. I am considering the corporation's proposals for a very limited number of further schemes of advance factory building.

Heveningham Hall

Mr. Faulds: To ask the Secretary of State for the Environment if he will make a statement about the latest position on the developments concerning Heveningham hall.

Mr. Moynihan: I am glad to say that we understand that the owner intends to open Heveningham hall to the public daily between 31 July and 1 September this year. It remains my right hon. Friend's hope that the restoration of the fire-damaged wing will proceed. My right hon. Friend has also, in a decision issued on 25 July, upheld the recommendation of both his inspectors not to confirm the footpath diversion order made by the Suffolk Coastal district council relating to land at Heveningham.

Local Authority Tenants

Mr. Soley: To ask the Secretary of State for the Environment whether he has any proposals to give guidance to local authorities on the organisations which are permitted to arrange ballots for local authority tenants being transferred to other organisations; and if he will make a statement.

Mr. Ridley: No. My hon. Friend the then Minister for Housing and Planning made it clear that he expected authorities who are seeking to dispose of their tenanted housing to follow the procedures set out in section 6 and schedule 1 of the Housing and Planning Act 1986. Authorities themselves have the primary responsibility for ensuring that any ballot which is held is conducted, and is seen to be conducted, without any suggestion of impropriety.

Under our proposals for tenants' choice, it would be the applicant rather than the local authority who would have responsibility for arranging the ballot.

Local Authority Housing Transfers

Mr. Soley: To ask the Secretary of State for the Environment how the guidelines on the transfer of local authority housing drawn up in conjunction with clause 47

of the Housing Bill differ from the guidance given to local authorities proceeding with transfers under other legislation; and if he will make a statement.

Mr. Ridley: In issuing guidelines on large scale voluntary transfers of local authority housing to private bodies to English local authorities on 8 June, I made it clear that I would apply the guidance issued in circular 6/88 "Consultation with Secure Tenants before Disposal to Private Sector Landlord: Commencement of Section 6 of the Housing and Planning Act 1986" in the case of all large-scale voluntary transfers to tenanted local authority housing.

No guidelines have been issued to local authorities on the transfer of their housing under parts III and IV of the Housing Bill.

Urban Development Corporations (Disability Adviser)

Mr. Ashley: To ask the Secretary of State for the Environment (1) if he will make it his policy that a local disability adviser is appointed to each urban development corporation; and if he will make a statement;

(2) if he will outline the measures that are being taken to ensure that urban development corporations are made aware of the access needs of disabled people in the revitalisation of the inner cities; and if he will make a statement.

Mr. Trippier: As development control authorities, urban development corporations receive planning circulars and advice. This includes DOE circular 10/82 which draws attention to the Disabled Persons Act 1981 and reminds authorities of the importance of bearing in mind the needs of disabled people. As employers, the corporations receive and are expected to follow the Government's own code of practice "Employment of disabled people".

House Purchase Statistics

Mr. David Nicholson: To ask the Secretary of State for the Environment what were the total numbers of *(a)* private home purchases and *(b)* purchases by first-time buyers, in each of the years 1976 to 1987, and what was the proportion represented by *(b)* of *(a)*.

Mr. Trippier: The available information is as follows:

Mortgage loans for house purhase: United Kingdom

	All[1]	*of which, to first time purchasers*	
	thousands	*thousands*	*percentage of all*
1976	739	373	50
1977	760	374	49
1978	829	404	49
1979	750	358	48
1980	691	332	48
1981	736	364	50
1982	861	468	54
1983	1,107	555	50
1984	1,187	596	50
1985	1,227	605	49
1986	1,446	666	46
1987	1,298	588	45

[1] Mortgage completions by building societies; from 1976 to 1980 by local authorities (excluding council house sales) in England and Wales; and from 1983 to 1987 mortgage approvals by banks.

The numbers of loans to first-time purchasers is not reported by insurance companies or, from 1981, by local authorities. The annual average number of loans for house purchase by insurance companies in 1976 to 1987 was 20,000. The numbers of loans by local authorities in Great Britain are as follows, including those for council house sales in England almost all of which are to sitting tenants.

	All	*For council house sales*
1981	73,000	70,000
1982	111,000	83,000
1983	47,000	40,000
1984	36,000	31,000
1985	23,000	20,000
1986	12,000	10,000
1987	10,000	8,000

Cornerstone Housing Association

Mr. McCartney: To ask the Secretary of State for the Environment what representations he has received about the activities of the Cornerstone Housing Association Ltd. and Mr. Frans Robey.

Mr. Trippier: None.

Private Landlords (Property Maintenance)

Mr. McCartney: To ask the Secretary of State for the Environment what measures he proposes to take to ensure that private landlords carry out routine maintenance on properties in their ownership in a satisfactory way.

Mr. Trippier: Section 11 of the Landlord and Tenant Act 1985 implies into leases of seven years or less a convenant obliging a landlord to keep in repair the structure of a rented dwelling and certain installations in it. This provision will apply to assured and shorthold tenancies granted under the Housing Bill. The Bill extends section 11 to cover the structure and common parts of buildings containing flats. Also we have tabled amendments to the Bill to strengthen the powers of local authorities to require private landlords to carry out repairs and themselves to carry out the works where the landlord fails to do so and to recover the costs.

Private Tenants (Temporary Housing)

Mr. McCartney: To ask the Secretary of State for the Environment what measures he proposes to take to ensure proper protection for private tenants offered temporary rehousing while works are carried out to their homes.

Mr. Trippier: Under sections 214 and 215 of the Housing Act 1985 a local authority may not serve an improvement notice until it is satisfied that the housing arrangements for affected occupants are satisfactory. Otherwise, it is for private tenants who are offered temporary rehousing while works are carried out to their homes to negotiate with their landlords to preserve their rights. We have amended the Housing Bill so that existing protected tenants who are rehoused by their landlords will continue to have protected tenancies.

Subsidies and Benefits

Mr. Austin Mitchell: To ask the Secretary of State for the Environment whether he will publish in the *Official*

Report his estimate of the amount paid out in 1987-88 in *(a)* subsidies to local authorities and new town housing and *(b)* cost of housing benefit to, respectively, tenants of local authorities and private landlords, including rate rebates; and if he will add a forecast for the current and for the next financial year together with an estimate of the increase in a full year as a result of the abolition of rent control.

Mr. Trippier: Payments of housing subsidy to local authorities in 1987-88 amounted to £473,511,743 and to new towns £82,839,556. Questions on income support, including housing benefit, are for my right hon. Friend the Secretary of State for Social Security.

Waste Control

Mr. Alton: To ask the Secretary of State for the Environment if he will prohibit the importation of United States waste into the United Kingdom under section 100 of the Control of Pollution Act 1974.

Mr. Moynihan: I am considering whether further controls on the import of waste are necessary.

United Nations Clean-up Campaign

Dr. Thomas: To ask the Secretary of State for the Environment if, in the light of the problems imposed on Senegal, Guinea-Bissau, Guinea, Benin, Equatorial Guinea, Nigeria, Gabon and Congo by the disposal of toxic and hazardous wastes from EEC countries, he will make it his policy to secure additional United Kingdom donations to the United Nations environment programme special clean-up campaign.

Mr. Moynihan: The Government are increasing its financial support for UNEP by 25 per cent. For 1988 the United Kingdom's contribution to UNEP's environment fund will be £1·25 million.

Nuclear Waste

Dr. Thomas: To ask the Secretary of State for the Environment (1) when his Department first learnt from British Nuclear Fuels Ltd. that a canister containing plutonium had been found at the Drigg dump site, as announced by British Nuclear Fuels Ltd. to the media on 13 July;

(2) pursuant to his reply to the hon. Member for Meirionnydd Nant Conwy, 14 June, *Official Report*, columns *142-43*, whether the table included the radioactive content of the canister of plutonium bearing nuclear fuel found at the Drigg dump site as announced by British Nuclear Fuels Ltd. on 13 July.

Mrs. Virginia Bottomley: As my right hon. Friend the Secretary of State for Energy stated in his reply to a question by the hon. Member for Copeland (Dr. Cunningham) on 15 July 1988, *Official Report*, column *430*, this matter is currently subject to a joint investigation by the Health and Safety Executive and Her Majesty's inspectorate of pollution who will report their findings shortly.

Hazardous Waste

Dr. Thomas: To ask the Secretary of State for the Environment what is his policy towards the United Nations environment programme project to establish a global convention on the regulation of international transfrontier shipment and disposal of toxic, hazardous and radiotoxic waste.

Mr. Moynihan: We shall continue to participate actively in the development of the UNEP global convention.

Dr. Thomas: To ask the Secretary of State for the Environment, pursuant to the reply to the hon. Member for Meirionnydd Nant Conwy, 14 June, *Official Report*, column *142*, on export of toxic wastes from the European Community, if he will make a statement on any initiatives taken at the EC Environment Council on the matter.

Mrs. Virginia Bottomley: The subject of export of toxic waste from the Community to developing countries was discussed at the EC Environment Council on 16 and 28 June but no conclusion was reached. Further discussions are under way.

Access Land (Sales)

Mr. Tony Banks: To ask the Secretary of State for the Environment if he will introduce legislation to control the sale of random strips of land required by private house builders for access to services; and if he will make a statement.

Mr. Howard: No. Depending upon the location of a particular site for development, a wide variety of matters relating to neighbouring land may need to be dealt with by those who propose to develop the site and it is for them to ensure that they have made any arrangements for land acquisition, easements, and so on, that may be necessary for development.

County Hall, London

Mr. Dykes: To ask the Secretary of State for the Environment if he will hold discussions with the London residuary body on the case for holding a public exhibition and consultation over the plans for future use of county hall, after its eventual disposal from the public sector.

Mrs. Virginia Bottomley: No. This will be a matter for the new owners of country hall.

Mr. Dykes: To ask the Secretary of State for the Environment if he will estimate the amount of delay incurred by the London residuary body in the possible disposal of county hall, to allow time for the abolition of the Inner London education authority.

Mrs. Virginia Bottomley: No delay attributable to the abolition of the Inner London education authority is expected in the disposal of county hall.

Mr. Dykes: To ask the Secretary of State for the Environment if he will discuss with the London residuary body its sources of expert advice on the architectural and historical aspects of the proposal to convert county hall from public use to hotel use.

Mrs. Virginia Bottomley: No. Any development of county hall will be subject to the usual planning and listed building procedures. It is for the applicants themselves, whoever they may be, to take what expert advice they consider necessary in preparing their proposals.

Mr. Dykes: To ask the Secretary of State for the Environment if he will take steps to ensure that full and leagthy public consultation will take place and that all the appropriate national and Greater London bodies and agencies will be fully consulted in regard to the disposal of county hall.

Mrs. Virginia Bottomley: There are no grounds for placing such an obligation on the London residuary body in view of its statutory duty to dispose of all surplus GLC property.

London Residuary Body

Mr. Dykes: To ask the Secretary of State for the Environment if he will list the current full salary and total expenses, allowances and other emoluments and payments in kind of the chairman and all other board members, and the three senior non-board officials of the London residuary body.

Mrs. Virginia Bottomley: The current salaries of the chairman and board members of the London residuary body are as follows:

	£ per annum[1]
Chairman (full-time appointment):	
Sir Godfrey Taylor	56,320
Members (part-time appointments):	
Mr. Alan Blakemore, CBE Mr. Jack Esling Mr. Jack Wolkind, CBE	13,608
Mr. Wallace Mackenzie, OBE	17,010
Mr. Michael Roberts	20,412
Councillor Sir Peter Bowness, CBE	6,804

[1] From 1 April 1988.

Remuneration is subject to abatement, if applicable, in respect of public sector pension received.

Information on the total expenses paid to the chairman and board members during 1986-87 is contained in the residuary body's annual report and accounts for that financial year, which were laid before Parliament on 27 January. No emoluments were paid otherwise than in cash. The salaries and expenses of officials are a matter for the LRB. The 1986-87 report and accounts indicate that the emoluments for that year of the three most senior officials were in the range £35,000 to £40,000.

Mr. Dykes: To ask the Secretary of State for the Environment if he will estimate the amount of office space required by the London residuary body for its work between 1988 and 1990, and from 1990 onwards; and which locations have been selected provisionally or finally for these activities.

Mrs. Virginia Bottomley: The London residuary body's requirements for office space in connection with winding up the affairs of the Greater London council will reduce progressively from its present floor space needs of about 30,000 sq m as its functions diminish before 31 March 1990. Accommodation in connection with winding up the residual affairs of the Inner London education authority will depend upon the number and complexity of the functions it may have to undertake.

Public House Tenants (Tenure)

Mr. Fraser: To ask the Secretary of State for the Environment if he will introduce legislation to amend the Landlord and Tenant Act 1954 to provide security of tenure for the tenants of public houses selling alcohol.

Mr. Trippier: I refer the hon. Member to the reply given to my hon. Friend the Member for Romsey and Waterside (Mr. Colvin) on 6 May at column *613* by the then Minister for Housing and Planning, my hon. Friend the Member for Bristol, West (Mr. Waldegrave).

Mineral Supplies

Sir Trevor Skeet: To ask the Secretary of State for the Environment if he will make a statement on the limitations imposed by the planning system on the supply of minerals from quarries.

Mr. Trippier: If the mineral operator has been granted a planning permission and does not subsequently contravene any planning conditions attached to that consent, the minerals may be worked and sold without further statutory constraint. It is not the Government's policy to intervene in these arrangements.

It is generally the case that purchasers of minerals may seek to obtain the supplies they need, from whatever source they so choose, without the need to consider any further statutory provision. However, public bodies do have a duty under section 11 of the Countryside Act, 1968, to have regard to the desirability of conserving the natural beauty and amenity of the countryside in exercising their functions relating to land.

Listed Buildings (Painting)

Mr. Boswell: To ask the Secretary of State for the Environment if he has any plans to issue guidance on the extent to which painting or repainting of listed buildings requires listed building consent.

Mrs. Virginia Bottomley: The Department of the Environment has today issued a new circular (DOE circular 18/88) drawing attention to a recent High Court judgment relating to the painting or repainting of listed buildings. The court held that painting or repainting is capable of being an alteration for which listed building consent is required. The critical question in each case is whether the character of the building is affected. Only where the character is affected will consent be needed. Whether consent is needed in any particular instance must therefore depend upon the facts of the individual case.

Landlord and Tenant Act 1987

Mr. David Martin: To ask the Secretary of State for the Environment whether he will now bring the remaining sections of the Landlord and Tenant Act 1987 into force.

Mr. Ridley: I and my hon. Friend the Parliamentary Under-Secretary of State for Wales have now made the third commencement order for the Landlord and Tenant Act 1987, covering all the sections not already covered by earlier orders. The provisions in sections 41, 43 and 44 dealing respectively with the strengthening of tenants' rights on variable service charges, insurance and consultation on the appointment of managing agents will

come into force on 1 September 1988. There are transitional provisions for section 41 to deal with situations where action is already in hand or where the accounting period has already started before 1 September 1988. Section 42, dealing with the handling of service charge contributions will come into force on 1 April 1989, together with an order under section 42(5) dealing with the investment of service charge funds held in trust.

Under a separate order, the prescribed amounts above which a landlord must consult his tenants about works will be raised on 1 September 1988 to £1,000 or £50 per dwelling whichever is the greater.

This completes the implementation of the Landlord and Tenant Act 1987, which has siginificantly strengthened the rights of people living in flats, and, as regards the payment of variable service charges and insurance, people living in houses and other dwellings also.

Local Authority Housing

Mr. Baldry: To ask the Secretary of State for the Environment when he will publish his proposals for a new financial regime for local authority housing; and if he will make a statement.

Mr. Ridley: My right hon. Friend the Secretary of State for Wales and I are issuing a consultation document today on a new financial regime for local authority housing in England and Wales. The paper has been placed in the Library and is available in the Vote Office. Copies will be sent today to local authorities and their associations.

A pattern has developed of major inconsistencies between authorities in the contributions to housing costs made by rent, rate and tax payers, and subsidies are not always being directed towards those authorities and their tenants who most need them. Also, although many authorities have for years pursued sound policies, anomalies in the system of different sources of subsidy have given rise to distortions in the incentives to efficiency and good management. Subject to approval of proposed legislation by Parliament, the new arrangements will take effect from 1 April 1990. These will require authorities to maintain a new-style housing revenue account which will reinforce the distinction between the provision of housing and other local authority functions. A new housing revenue account subsidy will replace a number of existing central Government subsidies and also local rate fund contributions from that date.

We intend that the new financial regime will make council landlords more accountable to their tenants and put tenants themselves in a position of greater equity as compared to tenants in other authorities.

Rain Forests

Mr. Wray: To ask the Secretary of State for the Environment what relevant scientific conclusions his Department has accepted as a valid basis for a policy regarding the rain forests and their impact on the world environment; and if he will list the different measures which his Department considers should be taken at national and international level so as to protect the rain forests in the *(a)* short, *(b)* medium and *(c)* long term.

Mrs. Virginia Bottomley *[holding answer 21 July 1988]:* We recognise that tropical forests are an important element in the global environment and we encourage the good management of their resources through the tropical forest action plan and by our support of the international tropical timber agreement.

Sporting Events (Ministerial Visits)

Mr. Menzies Campbell: To ask the Secretary of State for the Environment what international sporting events the Minister with responsibility for sport, the hon. Member for Lewisham, East (Mr. Moynihan) intends to visit in the next 12 months; and what is the anticipated cost to public funds.

Mr. Moynihan *[holding answer 25 July 1988]:* Listed in the table are the principal international sporting events overseas which I am at present planning to visit in the next 12 months and anticipated cost to public funds.

13 August—Moscow Marathon, Moscow. No cost to public funds.

16 September—3 October—Summer Olympics, Seoul, South Korea. Estimated cost to public funds, £5,080.

20-25 October—Paralympics, Seoul, South Korea. No cost to public funds.

Water Authorities (Prosecutions)

Mr. Allen: To ask the Secretary of State for the Environment if he will make it his policy to use those statutory powers available to him to prosecute water authorities which do not comply with EEC directives.

Mr. Moynihan: The Government will use whatever means are necessary to ensure that European Community directives on water are complied with. As I said in reply to a question from the hon. Member on 11 July, *Official Report*, column *40* where the Government are aware that the obligations of directives are not currently being fully met, water authorities are instructed to take steps to remedy the position and, where necessary, to agree programmes with the Department.

DEFENCE

Military Lands Act 1892

Mr. Cohen: To ask the Secretary of State for Defence what inquiries of local authorities he made in relation to rights of way and rights of common for byelaws made under the Military Lands Act 1892 since 1979; and how many rights of way have been stopped-up since 1979 at each site covered by byelaws made under the Military Lands Act 1892.

Mr. Freeman: Before any byelaws are made, the Property Services Agency, acting on behalf of my right hon. Friend the Secretary of State, undertakes inquiries with the relevant local authorities to establish the existence and extent of any rights of way and rights of common over the subject land.

It is not possible without disproportionate effort to identify how many rights of way have been stopped up since 1979 at those sites covered by byelaws made under the Military Lands Acts 1892.

Ministry Establishment, Shoeburyness

Mr. Teddy Taylor: To ask the Secretary of State for Defence when he next intends to visit the Ministry of Defence establishment in Shoeburyness.

Mr. Sainsbury: My right hon. Friend has no plans at present to visit the MOD establishment at Shoeburyness.

Saudi Arabian Orders

Mr. Stern: To ask the Secretary of State for Defence when he next expects the detailed procurement aspects of the latest Saudi Arabian orders to be available.

Mr. Sainsbury: Precise requirements have still to be specified by the customer and discussed and agreed in detail. Some discussions are starting now but it is not yet possible to determine how long this process will take. In any event the wishes of the customer, in regard to commercial confidentiality, will need to be respected.

Trident Submarines (VSEL)

Mr. Campbell-Savours: To ask the Secretary of State for Defence whether the contract between his Department and VSEL for Trident submarines includes arrangements for compensation to be paid or penalty clauses to be exercised in case of industrial action at the VSEL plant.

Mr. Sainsbury: Normally, contractual arrangements between MOD and its supplier would be regarded as commercial-in-confidence. However, I can say that there are no penalty clauses in these Ministry of Defence contracts; nor do any arrangements exist in either of the two current Vanguard class SSBN contracts for compensation to be paid in the event of industrial action. However, contractors are expected to mitigate the effects of industrial action to the maximum extent possible.

There will also, of course, be a progressive impact on the company's cash flow as a result of their inability to claim payments under these contracts for scheduled work which is not being achieved.

RBS-70 Surface-to-air Missiles

Mr. Cohen: To ask the Secretary of State for Defence what order his Department has placed with Bofors of Sweden for the supply of RBS-70 surface-to-air missiles; for whose eventual use these missiles are intended; what provision has been made in his Department's estimates for this purchase; and if he will make a statement.

Mr. Sainsbury: None.

Seabed Operations Vessel Challenger

Mr. Cohen: To ask the Secretary of State for Defence if he will make a statement on problems which have arisen with the seabed operations vessel Challenger; by how much the work on this vessel has overrun in *(a)* time and *(b)* cost in relation to the original specification; and what claims and counter-claims for compensation have been made by his Department and the contractors, respectively.

Mr. Sainsbury: Reasons for the increases in cost to the sea bed operations vessel and delays to its operational date have been detailed in evidence given by the Ministry of Defence to the Public Accounts Committee and published in its 35th report 1984-85 Session and 31st report 1987-88 Session. The appraisal and cost implications of the further slippage mentioned in the latter report are still under consideration.

With regards to claims for compensation, whilst negotiations are continuing with contractors on these, details are commercially confidential.

Low Flying

Dr. Thomas: To ask the Secretary of State for Defence what proportion of complaints about low flying received in 1987 were made initially to RAF air bases and other military-installations as opposed to his Department.

Mr. Freeman: The information requested could not be provided without disproportionate effort.

Mr. Ingram: To ask the Secretary of State for Defence (1) during which hours of the day low flying at 100 ft above the ground is permitted in the Borders tactical training area;

(2) if flying at 100 ft is permitted in the vicinity of *(a)* Chapelton, *(b)* Caldermill, *(c)* Drumclog and *(d)* Auldhouse, Strathclyde;

(3) what consultations have been held with *(a)* East Kilbride district council and *(b)* Strathclyde regional council prior to the establishment of low flying at 100 ft in the constituency of East Kilbride;

(4) if the use of afterburners is permitted by aircraft flying at 100 ft above the ground;

Mr. Freeman: I shall write to the hon. Member as soon as possible.

Mr. Ingram: To ask the Secretary of State for Defence what research is being conducted by his Department on the medical effects of exposure to the noise levels associated with military jet aircraft flying at 100 ft off the ground.

Mr. Freeman: The MOD is represented on the NATO working group and will also attend a major international meeting on aircraft noise in Stockholm this summer.

Dr. Thomas: To ask the Secretary of State for Defence what recent representations he has received concerning low-flying military exercises in Wales.

Mr. Freeman: During June 1988 the Ministry of Defence received 86 inquiries or complaints from Wales about low-flying military aircraft.

Borders Tactical Training Area

Mr. Ingram: To ask the Secretary of State for Defence (1) on what date the expansion of the Borders tactical training area into the East Kilbride constituency took effect;

(2) if he will place in the Library a map showing the newly enlarged Borders tactical training area.

Mr. Freeman: I will write to the hon. Member as soon as possible.

Nuclear Materials Requirements

Dr. Thomas: To ask the Secretary of State for Defence, pursuant to his reply to the hon. Member for Meirionnydd Nant Conwy, *Official Report*, 14 June, column *119*, on uranium and plutonium, if he will set out the reasons relating to each set of nuclear materials requirements, a-e, why he will not make it his policy to publish them in subsequent defence estimates.

Mr. Sainsbury: The reason in each case is that it would not be in the national interest.

Sirius Hull Design

Mr. Woodcock: To ask the Secretary of State for Defence whether the inquiry into the Sirius hull design has been completed; and if he will make a statement.

Mr. Younger: In November 1986 I commissioned *Lloyd's Register of Shipping* to undertake a special inquiry into claims that the Sirius concept developed by Thornycroft, Giles and Associates could be the basis for destroyer and frigate designs offering cost and other advantages over conventional designs. Investigation of these claims had been urged by an unofficial committee chaired by Admiral of the Fleet Lord Hill-Norton.

I have today placed in the Library of the House copies of the report of the inquiry, which was led by Mr. R. H. MacLeod. The work has been professional, thorough and impartial, and especial care has been taken to give Thornycroft, Giles and Associates full opportunity both to give evidence and to comment on the report before publication. The report's main conclusion is that, for the Royal Navy's stated requirements in the destroyer and frigate roles, vessels based on the Sirius concept would cost more than conventional designs like the Type 23, without offering commensurate advantage in other ways. I accept this outcome.

The report was not required, and does not seek, to comment on the possible use of the Sirius concept in other applications.

Royal Ordnance plc (Agreement)

Mr. Gerald Howarth: To ask the Secretary of State for Defence when, pursuant to his answer of 28 June, *Official Report*, column *232*, he expects to announce his decision regarding the agreement between his Department and British Aerospace for the supply by Royal Ordnance of explosives and propellants; and if he will make a statement.

Mrs. Ann Winterton: To ask the Secretary of State for Defence (1) why he has not hitherto been prepared to implement the heads of agreement signed between his Department and British Aerospace in April 1987 concerning the establishment of an agreement with Royal Ordnance plc for the supply of explosives, propellants and related products;

(2) whether it remains his policy to invest £12 million in assisting Royal Ordnance plc with its productivity improvement programme, as envisaged in the heads of agreement for the supply of explosives, propellants and related products signed in April 1987.

Mr. Heathcoat-Amory: To ask the Secretary of State for Defence if he will make a statement on progress on negotiations between his Department and Royal Ordnance plc over an EP (REP) agreement to supply explosives and propellants.

Mr. Coombs: To ask the Secretary of State for Defence when he anticipates completing the explosives and propellants and related end product agreement with Royal Ordnance; and if he will make a statement on the progress of negotiations.

Mr. Allen: To ask the Secretary of State for Defence what is the position regarding the award to Royal Ordnance of an EP(REP) agreement.

Mr. Sainsbury *[pursuant to his replies, 28 June 1988, c. 105 and 7 July 1988, c. 703.]:* I can now advise the House that subject to final contract negotiations an agreement has been reached with Royal Ordnance plc under which the company will supply some 80 per cent. of the Ministry's requirements for specified explosives, propellants and ammunition at annually reducing prices for the period to 31 March 1993. The cumulative value of the contracts under the agreement is of the order of £400 million and represents something under 50 per cent. of the Ministry's anticipated requirements for ammunition, mines and explosives over the period concerned.

The undertaking to enter into discussion of a long-term contract of this nature was disclosed to the House by my right hon. Friend the Secretary of State on 2 April 1987 in relation to his announcement of the sale of Royal Ordnance plc to British Aerospace. We are satisfied that the prices negotiated under the arrangement, which also subsume the £12 million investment referred to by my hon. Friend the Member for Congleton (Mrs. Winterton) represent good value for money for the taxpayer as well as ensuring continuation of supply of these important stores to the armed services.

The new agreement, which will take effect from 1 April this year, will terminate the current agreement between the Ministry of Defence and Royal Ordanance plc for the exclusive supply of most explosives and propellants also referred to by my right hon. Friend on 2 April 1987. This measure, together with the substantial proportion of Ministry of Defence requirements not covered by the new agreement, should be of assistance to other companies seeking to develop their capabilities in this sector of the market.

Greenham Common

Mr. David Shaw: To ask the Secretary of State for Defence if he will make a further statement on allegations of strip searching at Greenham Common.

Mr. Archie Hamilton: My predecessor wrote to the hon. Member for Stalybridge and Hyde (Mr. Pendry) on 19 July explaining the circumstances of the answer given to him by my right hon. Friend the Member for Tonbridge and Malling (Sir J. Stanley) on 24 May 1984. A copy of his letter was placed in the Library on 21 July; the text is as follows:

"John Wakeham promised on Thursday 7 July that a Defence Minister would be writing to you about the Point of Order that you raised on 6 July concerning the Answer 'no such strip searches have been carried out at RAF Greenham Common' given by my predecessor John Stanley on 24 May 1984.

Prior to 1 January 1986 (when the relevant provisions of the Police and Criminal Evidence Act came into effect), i.e. at the time of the alleged incident involving Ms. Mann-Cairns and at the time your original question was answered, there was no formal definition of a 'strip-search', personal searches being undertaken according to the judgment of the police officer concerned, as to what was reasonably necessary, and on the basis of common law and relevant statutory provisions. However, at that time, MOD would have taken the expression 'strip-search' to mean a requirement to remove all clothing including underclothing. A requirement to remove all clothing other than underclothing would not have been taken to constitute a 'strip-search'.

The Answer given by John Stanley to your original question was based on the outcome of an investigation by the MOD Police into a specific allegation that women had been strip-searched at RAF Greenham Common. That investigation had found no evidence to support the allegation and I

consider that, on the basis of the understanding of the term at that time and of all the available information, your question was properly and correctly answered.

I should add that the Crown's agreement to settle in Ms. Mann-Cairns' recent case in the Newbury Crown Court resulted from the fact that, due to the emigration of a key police witness, the defence was not in a position to bring evidence to refute evidence given on oath by the plaintiff of facts which were a possible indication of liability. We therefore agreed to a settlement by way of a "judgment by consent". That, however, does not amount to an admission by the Ministry of Defence of any of the allegations made against it and the settlement does not imply acceptance by the MOD that Ms. Mann-Cairns had been strip-searched.

I am sending a copy of this letter to John Wakeham and Frank Dobson."

As the letter explained, at the material time, so far as the Ministry of Defence was concerned, the term "strip search" meant a requirement to remove all clothing. To the best of our knowledge, the practice at the time did not include a requirement to remove underclothing and the inquiries of my right hon. Friend the Member for Tonbridge and Malling discovered no evidence that such strip searches had taken place. On the basis of the understanding of the term and all the available evidence, the hon. Member for Stalybridge and Hyde's question was correctly and properly answered.

In the case of Ms. Mann-Cairns, I have since received a copy of a letter from the hon. Member for Stalybridge and Hyde in which he says that he does not accept that the recent judgment at Newbury County Court means anything other than that his former constituent was strip-searched. I have today replied to him, and the following is the text of my letter:

"Thank you for sending me a copy of your letter of 26 July to John Wakeham. It falls to me to reply.

I cannot accept your view that the recent judgment at Newbury County Court means that your former constituent was strip searched. She herself did not claim that she was required to remove all her clothing, including underclothing, as would have constituted a strip search as the term was understood at the time, nor did the judgment of the Newbury County Court imply that this had been the case. We did take the view that there appeared to have been procedural errors during her arrest and that, on the basis of the evidence now available, the balance of probability lay in favour of Ms. Mann-Cairns having been required unlawfully to remove her clothing down to her underpants.

You say that the evidence of WPC Ford, who had emigrated between the time of the incident and the case coming to court, supported Ms. Mann-Cairns' contention that strip searches took place. In her statement given in December 1984, WPC Ford estimated that she had carried out about 750 personal searches. However, she stated that she would ask the women being searched to remove their clothing 'up to their underwear'. Nakedness was not, of course, required by the Ministry of Defence Police conducting the search. She could not recall the events of the night when Ms. Mann-Cairns was arrested, but she concluded that this particular duty was routine. She added that, as many did not wear underwear, they would be naked in the search room.

I should like to take this opportunity of offering your former constituent an apology for the treatment to which she was subjected and the distress which the circumstances of her arrest must have caused her. She has of course received damages consequent upon a Consent Order to that effect given in Newbury County Court.

I am copying this letter to John Wakeham, Ian Stewart, Sir John Stanley and Frank Dobson."

I should also make clear that the present practice of the Ministry of Defence Police in searching persons in police custody follows the same requirements as are imposed on other police forces in England and Wales by the Police and Criminal Evidence Act 1984. Section 54(6) of the Act is the authority for searching a person in police custody "to the extent that the custody officer considers necessary". A "strip-search" is now defined in the Home Office codes for the detention, treatment and questioning of persons by police officers which were issued under section 66 of the Act, and which took effect on 1 January 1986, as a "search involving the removal of more than outer clothing". The custody officer, who will normally be a police sergeant, is required to inform the person of the reason for the search and to record the reason for all personal searches and their results in the custody record. Guidance is available to all MOD police officers who each have a personal copy of the Home Office codes of practice, and in detailed instructions based on the Police and Criminal Evidence Act 1984 set out in force standing orders which are distributed to every MOD police station.

SOCIAL SERVICES

Child Health

Ms. Harman: To ask the Secretary of State for Social Services (1) what plans he has to improve the information available on child health by computerising information about surveillance and preventive procedures on the lines of the standard child health system developed by the National Health Service computing committee; and if he will make a statement;

(2) what plans he has to ensure that systems of computerised information about child health surveillance and preventive procedures become compatible throughout the country within the next 10 years.

Mrs. Currie: Computer-based systems for child health have been available to health authorities in England since the late 1960s. The first such were provided by local authorities, but from the early to mid-1970s health authorities began to develop their own requirements. The main purpose is to provide call and recall systems for vaccination and immunisation, and statistical information useful for epidemiological research into population drift, epidemics and so on. Facilities more recently offered include provision of pre-school developmental assessment, full screening for school children, for example, rubella, sight, hearing, dental fitness and so on, and more sophisticated statistics packages for management and epidemiological purposes.

The main recent development has been the national child health computer system, originally funded by DHSS and Welsh Office, as one of the major elements in the standard systems programme. It is now administered by a consortium of user authorities and the development work is undertaken by the Welsh Health Computer Services Agency and the South Western regional health authority on behalf of the users in England and Wales.

It is in use in some 132 health districts in 11 English health regions, and in nine districts in Wales, with others indicating their interest. The cost to each health authority taking the system is around £3,500 per annum to include support and software updates. Although originally developed for use on ICL equipment (hence it has been limited to those health regions with a traditional ICL expertise), a recent development, in collaboration with South Western RHA, has been to produce some software to allow health authorities with DEC/MUMPS equipment to make use of the system. There are also facilities to allow a wider range of other computer equipment to be connected to the system, thus expanding its potential

marketability to virtually every health authority. The system has also attracted much interest from overseas health services.

Decisions about the introduction of computer systems are matters for individual health authorities to determine within their own priorities and resources, However, the Department is exploring with health authorities the best way to achieve integrated community health care information systems, using recently available computing technologies, but building on the infrastructure created via the national child health computer system. This may fairly be describe as a success story in the history of NHS computing development.

AIDS (Needle Exchange)

Mr. Redmond: To ask the Secretary of State for Social Services what has been the effect of the 15 pilot needle exchange schemes set up in 1987 to counter the spread of AIDS; whether he intends to extend this scheme; and whether he intends to include the free supply of condoms to intravenous drug abusers.

Mrs. Currie: Our view of the benefits of the pilot needle exchange schemes was given in the reply of my right hon. Friend on 11 July to the hon. Member for Edinburgh, East (Mr. Strang) at column *57*. I understand that the majority of these schemes have condoms available for supply free of charge to injecting drug misusers.

Abortion

Mr. Alton: To ask the Secretary of State for Social Services what are the implications for his policy on abortion of the rise in the number of abortions shown in the 1987 abortion statistics.

Mrs. Currie: Like their predecessors of both parties this Government do not take a collective view about abortion beyond ensuring that the law is properly applied.

Ms. Richardson: To ask the Secretary of State for Social Services whether he will list the numbers of non-National Health Service abortions performed under agency arrangements on National Health Service patients resident in each regional health authority and in each district health authority in England and Wales in 1987, and the estimated numbers of women aged 15 to 44 years resident in each regional health authority and district health authority in England and Wales in mid-1987.

Mrs. Currie: The available information is given in the table. Population estimates for regional and district health authorities by sex and age have not yet been computed for mid-1987.

Number of notifications of abortions carried out under the Abortion Act 1967, non-National Health Service 'Agency'[1] by Regional Health Authority and District Health Authority of usual residence, residents of England and Wales
England and Wales 1987

[1] Operations carried out under 'Agency' arrangements in non-National Health Service premises on National Health Service patients.

Nurses (Leicestershire)

Mr. Vaz: To ask the Secretary of State for Social Services how many nurses have left the Leicestershire health district under retirement age in the latest period for which figures are available; and if he will make a statement.

Mrs. Currie: I regret that the information is not held centrally. The hon. Member may therefore wish to contact the chairman of the Leicestershire district health authority.

Health Authorities (Resources)

Mr. Greg Knight: To ask the Secretary of State for Social Services what advice he has given to health authorities over the past 12 months regarding the efficient use of resources.

Mrs. Currie: Ministers and the National Health Service Management Board are committed to ensuring that health authorities continue to improve the efficiency with which they manage and provide services so as to maximise the resources available for patient care. This objective has most recently been reinforced in the 1989-90 planning guidelines (Circular HC(88) 43), which was issued to authorities on 19 July. A copy has been placed in the Library.

The guidelines highlight a number of ways in which health authorities could seek to improve their use of resources. The provision of advice is, however, a continuous process, and more detailed information has been given to authorities through the year on areas of particular potential for improving efficiency, on ways of structuring value for money initiatives, and general good practice.

Hospitals (Derby)

Mr. Greg Knight: To ask the Secretary of State for Social Services (1) what is the maximum number of in-patients treated at any one-time during each of the past five years at Kingsway hospital, Derby; and what is the overall in-patient capacity of that hospital;

(2) what is the maximum number of in-patients treated at any one time during each of the past five years at Pastures hospital, Derby; and what is the overall capacity of that hospital;

(3) what is the maximum number of in-patients treated at any one time during each of the past five years at the Manor hospital in Derby; and what is the overall in-patient capacity of that hospital.

Mrs. Currie: The available information is given in the table. In 1968 the daily average number of occupied beds for Kingsway, Pastures and Manor hospitals was 715·2, 971·9 and 368·8 respectively. Details of the maximum number of patients treated at any one time is not available centrally, and my hon. Friend may wish to write to the chairman of the Southern Derbyshire district health authority who may be able to supply this information.

The Manor hospital closed in May 1988 with patients being transferred mainly to new or upgraded facilities at the Derbyshire royal infirmary and Ilkeston community hospital.

In-patient activity for Kingsway, Pastures and Manor Hospitals for the years 1982 to 1986

Year	Daily average number of available beds	Daily average number of occupied beds	Discharges and deaths
Kingsway hospital			
1982	480·0	449·6	794
1983	470·8	419·8	804
1984	440·5	302·7	762
1985	431·0	319·4	756
1986	405·0	343·5	995
The Pastures hospital			
1982	725·4	629·2	1,019
1983	720·5	596·1	1,012
1984	655·2	583·7	1,047
1985	672·2	570·3	1,107
1986	651·7	539·6	1,023
The Manor hospital			
1982	276·4	244·8	1,398
1983	276·1	238·0	1,725
1984	262·7	224·3	1,753
1985	245·9	226·2	1,645
1986	266·5	233·8	1,897

Income Support

Mr. Dunnachie: To ask the Secretary of State for Social Services (1) if he will make estrangement from home and family sufficient grounds for a young person to qualify for income support;

(2) what discretion is given to local offices to pay benefit to 17-year-olds forced to live away from home as a result of sexual abuse and unable to undertake a YTS placement as a result of psychological problems;

(3) what provision is made for young persons to receive benefit where they have been thrown out of their homes by their parents;

(4) what are the criteria under which a 17-year-old made homeless is entitled to income supplement.

Mr. Scott: I assume that the hon. Member is referring to the situation after 12 September when young people aged under 18 will no longer be eligible for income support, except in prescribed circumstances.

Income support will continue for those who are estranged from their parents and who are in full-time education, and also for those who are (either physically or psychologically) so ill or so disabled that they will not be capable of work or training under the Youth Training Scheme within a year.

Income support will be payable for a period—from 12 September to the end of the year for summer school leavers and for 12 weeks after child benefit normally ends for Christmas and Easter leavers—to young people living away from home because of the risk of physical or sexual abuse, those who are in care or prison immediately before their 16th birthday and those who entered accommodation away from home as part of a programme of rehabilitation or resettlement under the guidance of social services or the probabtion service. Such young people will have to be registered for a job or for the Youth Training Scheme. In addition, income support may be payable at the direction of the Secretary of State where failure to pay would cause severe hardship.

A young person who is estranged from his parents but is not continuing in full-time education will not qualify for income support on grounds of estrangement alone; benefit will depend on his being in one of the eligible categories described above. Similarly a 16 or 17-year-old who is homeless or who has been thrown out by his parents will not receive benefit unless he is in one of the eligible groups.

Foetuses (Research)

Sir John Biggs-Davison: To ask the Secretary of State for Social Services if he will publish the composition and terms of reference of the committee set up to review the code of practice on the use of foetuses and foetal material for research; and if he will make a statement.

Mrs. Currie: The committee is chaired by the Rev. Dr. J. Polkinghorne, FRS, Dean of Trinity Hall, Cambridge, and its membership comprises Sir Raymond Hoffenberg, president of the Royal College of Physicians of London, Professor Ian Kennedy, professor of medical law and ethics, King's college London and Dr. Sally Macintyre, director MRC medical sociology unit, university of Glasgow.

Its terms of reference are:

In the light of recent developments in the field of human tissue transplantation, and other relevant medical research, to review the Report of the Advisory Group on the Use of Foetuses and Foetal Material for Research (the "Peel Report"), and in particular to consider whether any modifications or additions should be made to the Recommended Code of Practice in that Report.

National Insurance

Mr. Austin Mitchell: To ask the Secretary of State for Social Services (1) whether he will publish in the *Official Report* a table showing the latest estimated income of the national insurance fund from national insurance contributions in the current financial year, the income which would accrue if the upper earnings limit on all contributions was removed and the income which would be lost in each case if *(a)* the contributions rate for single persons was reduced to 5·5 per cent., *(b)* the rate for married persons was dropped to 4 per cent., *(c)* £3,000 were deducted from earned income for contribution purposes, rising to £6,000 for a contributor with a non-earning spouse and *(d)* if the reductions in *(a)* to *(c)* were in operation at the same time;

(2) whether he will publish in the *Official Report* a table showing for those below and those above pensionable age the estimated number of earned incomes subject to employers' national insurance contributions in steps of £1,000 between £15,000 and £25,000 and in £5,000 steps thereafter, showing single persons and one-earner and two-earner married couples together with the amount collected;

(3) whether he will bring up to date for the current financial year the information given in his answer of 10 December 1986, *Official Report*, column *204*, to the hon. Member for Great Grimsby concerning the distribution of incomes and national insurance contributions, adding *(a)* the saving on the abolition of the reduced rate contribution and *(b)* the numbers contracted-in and contracted-out together with their contributions;

(4) whether he will publish in the *Official Report* a table showing for those contracted in and for those contracted out, the national insurance contributions rates, including the class 2 and class 4 contributions and the reduced rate, in 1988-89, together with *(a)* the total number in each category, their sex and their marital status and *(b)* the aggregate contributions in each category and the earnings to which they relate;

(5) what is the current reduced rate of national insurance contributions for *(a)* married women and *(b)* widows; how many are still paying contributions at this rate; what is his forecast for 1990-91; how many would otherwise be paying at the rate of 5 per cent. and 7 per cent.; and what is the estimated cost to the national insurance fund in the current financial year in each case;

(6) what has been the increase in the number and annual value of national insurance contributions since 1986 as a result of the reduction in unemployment; and what is the division between full-time and part-time employment;

(7) whether he will publish in the *Official Report* a table showing the number of nationally insured male and female workers in manufacturing and non-manufacturing, respectively, together with his estimate of average earnings in each case in 1987-88 and his forecast for 1988-89.

Mr. Scott: I will write to the hon. Member.

Körner Exercise

Mr. Dobson: To ask the Secretary of State for Social Services (1) if he will list the collections of statistical data which will become regularly available as a result of the Körner exercise giving in each case *(a)* the date on which the first collection was made available or the estimated date on which it will become available and *(b)* the regularity with which the updated statistics will be made available and the points in the year at which he expects this to happen;

(2) if he will list the collections of statistical data which will no longer be available as a result of the Körner exercise, identifying in each case the information which will be made available instead.

Mrs. Currie: I will write to the hon. Member.

Hospital Closures

Mr. Dobson: To ask the Secretary of State for Social Services, pursuant to the answer of 8 December 1987, *Official Report*, column *139-40*, why the list of hospital closures included in deposited paper 3399 does not include Barrowmare hospital, Chester, Davenham hospital, Norwich; Princess Mary's hospital, Margate, Dover eye unit; Liverpool psychiatric day hospital, Pemberton day hospital, together with others listed in the answer to the hon. Member for Holborn and St. Pancras on 8 December 1986, *Official Report*, columns *49-64*.

Mrs. Currie: The bulk of facilities listed in the answer of 8 December 1986 but not included in deposited paper 3399, were day or out-patient facilities with no loss of beds, including the Liverpool and Pemberton day units. Barrowmore hospital, Chester and Davenham hospital, Northwich were both omitted in error and Princess Mary's hospital, Margate and Dover eye unit were proposed changes of use, not closures and should be deleted from the 1986 list.

Mr. Dobson: To ask the Secretary of State for Social Services if, pursuant to the answer of 8 December 1987, *Official Report*, column *139-40* relating to information on hospital closures deposited in the Library, he will give the address and main specialty of *(a)* Harnwood hospital, Wiltshire, *(b)* St. Mary's hospital, Oxfordshire, *(c)* Westbury maternity hospital, Milton Keynes, *(d)* Greenham hospital, Plymouth, *(e)* Tadley hospital, Chester, *(f)* Heswall hospital, Liverpool, *(g)* Crossley (West) hospital, Holton, *(h)* Hawscroft free discharge clinic, Bolton *(i)* Ashton on Mersey hospital, Trafford, and *(j)* Delaunays hospital, North Manchester.

Mrs. Currie: The information requested is as follows:

		Specialty
(a)	Salisbury General Hospital, Harnwood Branch, Salisbury, Wilts.	Long stay mental illness
(b)	Wantage Road, Wallingford, Oxon	Geriatric
(c)	Wolverton Road, Newport Pagnell, MK16 8HY	Maternity
(d)	Greenbank, Plymouth	Acute medical/surgical
(e)	Tabley Superior, Knutsford, Cheshire	Mental handicap
(f)	Telegraph Road, Heswell, Wirral	Children's hospital
(g)	Kingswood, Warrington	Psychiatric
(h)	Havercroft Unit, Victoria Road, Bolton, BL1 5AU	Mental illness rehabilitation
(i)	Sandiway Road, Sale, near Manchester	Geriatric
(j)	Delaunays Road, Manchester, M8 6RB	Geriatric

Mr. Dobson: To ask the Secretary of State for Social Services if, pursuant to the answer of 8 December 1987, *Official Report*, columns *139-40* relating to information on hospital closures deposited in the Library, he will give *(a)* the month in which St. Mary's, Newham in City and East London area health authority was approved for closure in 1981 and *(b)* the month in 1986 in which; *(a)* Brunswick house, North East Essex and (ii) Dagenham hospital, Redbridge were approved for closure.

Mrs. Currie: The information requested is as follows:

(a) October

(b) (i) September, (ii) October

Mr. Dobson: To ask the Secretary of State for Social Services if he will place in the Library a list of hospital closures for 1987 as set out for previous years in deposited paper 3399.

Mrs. Currie: Information on hospital facilities involving the closure of beds approved for closure in 1987 is currently being collated and will be available shortly. I will inform the hon. Member when I am in a position to place a table in the Library as he has requested.

Mr. Dobson: To ask the Secretary of State for Social Services if, pursuant to the answer of 8 December 1987, *Official Report*, columns *139-40* relating to information on hospital closure deposited in the Library, he will give the address of the Garrett Anderson maternity home in Camden and Islington area health authority.

Mrs. Currie: The Garrett Anderson maternity home, which was approved for closure in September 1979, was situated at 40 Belsize Grove, London NW3 4TS.

Homeless Persons

Mr. Wray: To ask the Secretary of State for Social Services what support is given under the new regulation to young people made homeless, with no priority for crisis loans, during the two weeks they must wait for an arrears payment.

Mr. Scott: Young homeless people can apply for a social fund crisis loan. A social fund officer must decide whether a crisis loan is the only means of preventing serious risk to the health and safety of an applicant. Relative priority is not a condition generally applied to applications for crisis loans.

Unemployed people do not necessarily have to wait two weeks for their first payment of income support as benefit for each day since the date of claim can be paid in the first week. Such payments can include a full week's board and lodging charge where this falls due in the part-week.

Listeriosis

Mrs. Dunwoody: To ask the Secretary of State for Social Services how many cases of listeriosis were notified in 1987; in how many of these deaths occurred; and if he will list the number of cases of listeriosis notified to the Government for the previous three years.

Mrs. Currie: Listeriosis is not a notifiable disease under either the Public Health (Control of Disease) Act 1984 or the Public Health (Infectious Diseases) Regulations 1968.

In 1987, there were 17 deaths at ages 28 days and over registered in England and Wales where the underlying cause of death was assigned as listeriosis (international classification of diseases ICD 9th revision 027.0). There were a further three deaths occurring in the neonatal period (first 28 days of life) where congenital listeriosis (ICD (9) 771.2 (part)) was mentioned on the death certificate.

St. James Hospital, West Norfolk

Mr. Dobson: To ask the Secretary of State for Social Services if, pursuant to the answer of 8 December 1987, *Official Report*, columns 139-40, relating to information on hospital closures deposited in the Library, he will give the month and year in which St. James hospital in west Norfolk and Wisbech health authority was approved for closure.

Mrs. Currie: The hospital referred to was formally approved for closure in May 1978 but did not finally close until September 1986 when phase II of the new Queen Elizabeth hospital opened.

Infant Feeding

Dame Jill Knight: To ask the Secretary of State for Social Services when he expects publication of the report on the infant feeding survey by the Office of Population Censuses and Surveys; and if he will make a statement.

Mrs. Currie: The report of the third survey of infant feeding practice, "Infant Feeding 1985", produced by the Office of Population Censuses and Surveys (OPCS) is being published today. We welcome this report. This scientific survey of infant feeding practice is part of the Government's continuous monitoring of the health of the population. It is unique to this country, and produces valuable evidence for health professionals.

Key points in the report are:

No improvement in breast feeding "starts" between 1980 and 1985, with some decline among particular groups of mothers; overall, 65 per cent. down to 64 per cent. Some decline amongst particular groups of mothers; among mothers of first babies, 74 per cent. to 69 per cent.; and among such mothers who left school aged 16 or less, 65 per cent. to 58 per cent.

Little change in duration of breast feeding since 1980. Only half of all babies are breast-fed for as long as two weeks; only a quarter of four months or more.

Highest incidence of breast feeding is among mothers of first babies:

in higher social classes;
educated beyond 18;
living in London and South-east;
on maternity leave.

There is no evidence to show that mothers who return to paid employment six weeks after the birth are any less likely to begin breast feeding than mothers not in paid employment.

Although breast feeding may have reached its maximum among higher social class mothers at around 85 per cent., there is ample scope to encourage other mothers but they will need advice and support.

Giving infant formula in the first week is associated with ceasing to breast feed within two weeks.

Mothers likely to stop breast feeding early are those who do not put the baby to breast within the first few hours of life.

The surveys also provide the factual basis for the reports from the chief medical officer's Committee on Medical Aspects of Food Policy (COMA). The COMA report based on this survey and entitled "Present day practice in Infant Feeding: Third Report" was published in February.

Carers National Association

Mr. John Marshall: To ask the Secretary of State for Social Services if he will be providing grant aid to the newly formed Carers National Association; and if he will make a statement.

Mrs. Currie: The merger of the Association of Carers and the National Council for Carers and their Elderly Dependents was effected on 14 May 1988 with the creation of the Carers National Association. We have today approved the award of a grant of £77,000 to the new organisation in the current financial year.

The Government have consistently recognised the essential work of carers in looking after disabled people at home, and have supported the proposals for a single national body to take a stronger lead in representing their interests to Government, and to assist and advise their members throughout the country.

We are particularly keen to see the development of support networks and groups, set up by carers and those working with them, and hope to see more of them in future.

Discretionary Payments

Mr. Dunnachie: To ask the Secretary of State for Social Services, what criteria in respect of discretionary payments are used to define severe hardship; and what guidelines are issued to his Department's local offices.

Mr. Scott: An announcement will be made in due course.

Young Persons (Severe Hardship)

Mr. Wray: To ask the Secretary of State for Social Services what guidelines he has issued regarding the cases to which severe hardship applies, according to the new rules, to young people aged 16 and 17 years.

Mr. Scott: The announcement will be made in due course.

Hospital Research

Mr. Fearn: To ask the Secretary of State for Social Services what action he proposes to take, inthe light of the published results of the research work of Shortell and Hughes, concerning the consequences of competitive economic pressures on hospitals, a copy of which has been sent to him; and if he will make a statement.

Mrs. Currie *[holding answer 15 July 1988]:* I have noted the contents of the article by Shortell and Hughes published in the *New England Journal of Medicine* on 28 April. It is often difficult to draw direct lessons from overseas experience with health care markets; especially if, as in this case, the hospital markets concerned and the forms of Government regulation studied have no immediate parallel in this country.

Nurses' Pay

Mr. Allen: To ask the Secretary of State for Social Services what were the data on which he based his allocation to Trent regional health authority of additional resources to meet the full cost of the nurses' pay award; what representations he has received on the adequacy of the sum allocated; what changes there have been to those data; if he will meet the chairman of the regional health authority to discuss the funding of the pay award; and if he will make a statement.

Mrs. Currie *[holding answer 18 July 1988]:* Health authorities generally have welcomed this year's review body pay awards and the additional funds made available. Both have been discussed in the course of the regular meetings Ministers have with regional chairmen.

The additional sums provided were to meet the cost of the recommendations made by the pay review bodies for nurses and midwives, doctors and dentists and the

professions allied to medicine. The sum available to regional health authorities has been allocated in proportion to their 1988-89 initial revenue cash limits and in the form of a single cash limit adjustment. Trent regional health authority's share of this extra funding was £43·1 million.

Mr. Alfred Morris: To ask the Secretary of State for Social Services what estimate he has of the possible shortfall in funding of the nurses' pay award in the North Western regional health authority as a result of the distribution of the sums allocated by his Department; and if he will make a statement.

Mrs. Currie *[holding answer 18 July 1988]:* The clinical regrading exercise, which forms a major part of this year's pay award to nurses and midwives, will not be completed until 31 October. It is too early to predict the final outcome for any individual health authority.

Community Care

Mr. Tom Clarke: To ask the Secretary of State for Social Services when he intends to make his response to the Griffiths report on community care; and if he will make a statement.

Mrs. Currie *[holding answer 26 July 1988]:* Work is in hand to take forward consideration of Sir Roy Griffiths' recommendations. The Government will bring forward their own proposals in due course.

Social Work Qualification

Mr. Tom Clarke: To ask the Secretary of State for Social Services when he will meet the director of the Central Council for Education and Training in Social Work to discuss the rejection of its plans for a three-year social work qualification.

Mrs. Currie *[holding answer 26 July 1988]:* My right hon. Friend the then Minister for Health had already met the chairman and director of the Central Council for Education and Training in Social Work and discussed the Government's decision not to fund three-year qualifying training. The Government's objectives of better-trained social workers are reflected in the recent announcement about the extra provision to CCETSW of up to £1 million this year to improve planning and co-operation between the colleges and employers and to review teaching standards.

We feel that more in-service training directed at a substantial number of key staff in the field will more rapidly achieve its purpose than a further year of initial training. Hence the introduction this year of a £10 million training support grant (including £7 million funding from the Department of Health) for local authority staff working with elderly people and the proposed introduction next year of a £10 million training support grant for staff working in the child care field.

Trasidrex

Mr. Skinner: To ask the Secretary of State for Social Services if he will make further inquiries into the drug Trasidrex with respect to its association with bronchospasm and dyspnoea; and if he will make a statement.

Mrs. Currie: Reports of suspected adverse reactions to all drugs marketed in the United Kingdom, including Trasidrex, are routinely monitored by the Committee on Safety of Medicines. As my right hon. Friend's reply on 12 July, at column *152*, made clear, appropriate warnings concerning bronchospasm already appear in the manufacturer's data sheet for Trasidrex. We are not aware of any grounds for further inquiries.

Benefits

Mrs. Beckett: To ask the Secretary of State for Social Services how many men and how many women were receiving invalidity benefit and severe disability allowance at the latest date for which figures are available.

Mr. Scott: I refer the hon. Member to my reply to the hon. Member for Birkenhead (Mr. Field) on 15 July, at column *389*.

Written Answers to Questions

Thursday 28 July 1988

TRADE AND INDUSTRY

Japanese Cars

Mr. Teddy Taylor: To ask the Chancellor of the Duchy of Lancaster if Her Majesty's Government agree with the proposals of the EEC Commission to curb the import of Japanese cars; if the issue will be determined by majority vote; and if he will make a statement.

Mr. Alan Clark: The Commission has not yet put forward proposals for future policy towards imports of Japanese cars into the Community. If and when it does so, the Government will study the proposals carefully.

Imports

Mr. Grocott: To ask the Chancellor of the Duchy of Lancaster if, using 1980 as the base year, he will publish an index of the degree of import penetration in each major industrial grouping for each subsequent year, using both of the ratios normally used to measure such penetration.

Mr. Alan Clark: The information is as follows:

Import Penetration
Ratio 1 (Imports/Home demand)
1980 = 100

	1980	*1981*	*1982*	*1983*	*1984*	*1985*	*1986*	*1987*

West Lancashire District Council

Mr. Hind: To ask the Chancellor of the Duchy of Lancaster (1) what was the total amount awarded to firms in the West Lancashire district council area in regional development grants and regional selective assistance in 1987-88;

(2) how many regional development grants and grants of regional selective assistance were made to firms in the West Lancashire district council area in 1987-88.

Mr. Atkins: The information requested is as follows:

	RDG[1]	*RSA*[4]
Number	165[2]	15
Value (£ million)[3]	6·1	1·1

[1] Data are only available for the revised RDG scheme, introduced on 29 November 1984.
[2] Approvals.
[3] Amount expected to be paid if the projects proceed as planned.
[4] Offers of industrial grants.

Manufactures

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster whether he will bring up to date the figures on direct investment in manufacturing in table 9 of the evidence submitted by Her Majesty's Government to the Treasury and Civil Service Committee on the financial and economic consequences of United Kingdom membership of the European Communities (page 25 of HC57-II Session 1984-85).

Mr. Maude: The available information is given in the tables:

United Kingdom net direct investment in manufacturing in the EC[1 2]
Table 9

	United Kingdom inward direct investment in manufacturing	*United Kingdom outward direct investment in manufacturing*	*Net outward investment in manufacturing*
1960	4	21	17
1961	n/a	n/a	n/a
1962	−2	16	18
1963	4	24	19
1964	12	22	9
1965	10	15	6
1966	4	35	30

[1] Figures for 1960-1963 exclude oil companies.
[2] EC includes Denmark, Irish Republic, Greece, Spain and Portugal in all years.
[3] United Kingdom joined EC.
Source: Overseas Transactions Inquiry.

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster what assessment he has made of the causes of the fall in the unit value of imports of finished manufactures in terms of the pound sterling in May; and what effect this has had on the volume of imports.

Mr. Alan Clark: The type of assessment sought by the hon. Member is hardly appropriate to a movement over such a short period.

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster whether he will publish in the *Official Report* a table showing for *(a)* the United Kingdom, *(b)* West Germany, *(c)* Japan, *(d)* France, *(e)* Italy and *(f)* the United States of America information on imports of finished manufactures as a percentage to one place of decimals (i) gross product and (ii) manufacturing output in 1986 and in 1987; and if he will provide the same information for exports.

Mr. Alan Clark: Data on international trade in finished manufactures and on manufacturing output are not available on a common basis, and no valid comparison is possible. Information on imports and exports of finished manufactures in relation to gross domestic product is in the following table:

Trade in Finished Manufactures[1] *as a Proportion of Gross Domestic Product*

Per cent

	Imports		*Exports*	
	1986	*1987*	*1986*	*1987*
United Kingdom	10·4	10·9	9·1	9·7
Federal Republic of Germany	8·6	8·8	15·9	15·1
Japan[2]	1·1	1·3	8·4	7·7
France[2]	7·5	8·2	7·4	7·5

United States of America	5·2	5·5	2·7	2·9

[1] Standard International Trade Classification Sections 7 and 8.
[2] Imports, but not exports, valued inclusive of insurance and freight charges.
Sources: OECD, National sources.

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster what was the change in the volume of imports of finished manufactures in the latest three months; what was the average change per month for 1987; what assessment he has made of the causes of the change; and what further change he anticipates as a result of the increase in the real exchange rate for the pound sterling since the fourth quarter of 1987.

Mr. Alan Clark: The volume of imports of finished manufactures rose by 11 per cent. between the first and second quarters of 1988. The average monthly rate in 1987 was +1 per cent.

There are of course many factors which may lead to a rise in import volume, such as a strong and growing economy, but no formal assessment of these various factors has been made by my Department.

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster what is his estimate of the United Kingdom share of the volume of trade in manufacturers by the main manufacturing countries in each quarter of 1986 and 1987; what is his forecast of the share in the first two quarters of the current year; and what assessment he has made of the causes of the changes in the trend.

Mr. Alan Clark: The Department does not make such forecasts. Data for 1986 and 1987 are in the following table.

United Kingdom volume share of main manufacturing countries' exports of manufactures (1980 prices)

	United Kingdom share Per cent.
1986	
1	8·8
2	9·2
3	9·0
4	9·7
1987	
1	9·6
2	9·4
3	9·6
4	9·6

The figures suggest that the volume share of the United Kingdom has remained broadly stable over this period.

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster by how much he expects investment by manufacturing industry in new plant and machinery to exceed allowances for depreciation in the current year; and if he will give comparable figures for each of the past 10 years.

Mr. Atkins: No assessment has been made for the current year. 1986 is the most recent year for which figures of net domestic fixed capital formation are available. Details for the 10 years 1977-1986 are shown in the following table:

Net domestic fixed capital formation (NDCF) in plant and machinery by manufacturing industry 1977-1986 (at 1980 prices)

Year	*NDCF in plant and machinery £ million*	*Year*	*NDCF in plant and machinery £ million*
1977	1,122	1982	−570
1978	1,297	1983	−588
1979	1,477	1984	90
1980	879	1985	763
1981	−385	1986	336

Note: Figures include assets leased to manufacturers from the financial industries.
Source: Central Statistical Office.

Hourly Earnings

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster what effect changes in hourly earnings in the internationally tradeable goods industries have had on the level of competitiveness since the fourth quarter of 1986.

Mr. Alan Clark: Earnings in manufacturing increased by 8·4 per cent. between the fourth quarters of 1986 and 1987, a larger increase than in most competitor countries. Rising productivity offset much of the increase in earnings in the United Kingdom, but in some of our major competitors, unit labour costs fell.

Airbus

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster, pursuant to the written reply dated 6 May 1987, *Official Report*, column *417*, on aid to Airbus Industrie, what steps Her Majesty's Government have taken to satisfy themselves that the projects have sound prospects of economic and commercial viability; whether they expect to earn a market rate of interest on the loan throughout its life; and when they expect to receive a real rate of return on its investment, including a return on any interest forgone.

Mr. Atkins: Before agreeing to provide British Aerospace with launch aid in respect of the Airbus A320 and A330/340 programmes, the Government undertook a detailed appraisal of the economic and commercial prospects of the programmes. Details of these appraisals, and of the rates of return and repayment profiles of launch aid contracts must remain commercially confidential between the Government and the company.

Companies Act Inquiries

Mr. Gould: To ask the Chancellor of the Duchy of Lancaster what representations he has received on his Department's record in completing inquiries under section 432, section 466 and section 442 of the Companies Act; if he has any proposals to speed them up; and if he will make a statement.

Mr. Maude: A number of representations have been received in the past about the length of time taken by inspectors appointed in major Companies Act investigations to complete their inquiries. As my right hon. and noble Friend announced on 11 May, a review of existing investigation powers and procedures was conducted in 1987 with a view to ensuring that investigations are

undertaken as effectively and as quickly as is compatible with a fair inquiry and, as a result of that review, a number of new measures were announced.

Mr. Gould: To ask the Chancellor of the Duchy of Lancaster (1) when he expects his inquiries under section 432 of the Companies Act into the Animal Defence Society Limited to be completed;

(2) when he expects his inquiries into Bremner plc under section 442 of the Companies Act to be completed;

(3) when he expects his inquiries under section 442 of the Companies Act into Consolidated Gold Fields plc to be completed;

(4) when he expects his inquiries into Pennine Commercial Holdings Limited under section 432 of the Companies Act to be completed;

(5) when he expects his inquiries into Bank Street Securities Limited under section 432 of the Companies Act to be completed;

(6) when he expects his inquiries into Link Service Stations Limited under section 432 of the Companies Act to be completed;

(7) when he expects his inquiries into Graylaw Holdings Limited under section 432 of the Companies Act to be completed;

(8) when he expects his inquiries in Signal Life Assurance Co., Ltd. under section 432 of the Companies Act to be completed;

(9) when he expects his inquiries into WMD Underwriting Agencies Ltd. under section 432 of the Companies Act to be completed;

(10) when he expects the inquiries under section 432 of the Companies Act into Minet Holdings to be completed;

(11) when he expects the inquiries into Guinness plc under sections 437 and 442 of the Companies Act to report.

Mr. Maude: The investigations into the companies mentioned continue, and I am unable to say when they will be completed.

Mr. Gould: To ask the Chancellor of the Duchy of Lancaster when he expects his inquiries into Sumrie Clothes plc under section 466 and section 442 of the Companies Acts to be completed.

Mr. Maude: The inspectors were appointed under sections 442 and 446 of the Companies Act 1985. They submitted their report to the Secretary of State on 11 July, and it is currently being considered.

Mr. Gould: To ask the Chancellor of the Duchy of Lancaster when he expects the inquiries under section 432 of the Companies Act into House of Fraser Holdings plc to be completed.

Mr. Teddy Taylor: To ask the Chancellor of the Duchy of Lancaster when he expects to receive the report of the inspectors studying the circumstances in which House of Fraser and Harrods were acquired; and if he will make a statement.

Mr. Maude: I refer the hon. Member and my hon. Friend to the reply I gave to my hon. Friend the Member for Beaconsfield (Mr. Smith) yesterday.

Estate Agents

Mr. Heddle: To ask the Secretary of State for the Duchy of Lancaster if he will now implement section 22 of the Estate Agents Act 1979.

Mr. Forth: I have no immediate plans to do so.

Stainless Steel (Competition)

Mr. Speller: To ask the Chancellor of the Duchy of Lancaster if he will make it his policy that before British Steel is privatised, the current anti-competitive policies in relation to stainless steel practised by the Sendzinir Club will be revoked.

Mr. Atkins: Alleged violations of European Community competition rules are a matter for the European Commission. The Commission is currently investigating allegations of anti-competitive arrangements among certain European producers of stainless cold rolled flat products, but has not yet made its findings known.

Rover Group

Mr. Hoyle: To ask the Chancellor of the Duchy of Lancaster, pursuant to his reply of 18 July, *Official Report*, column *446*, for what purpose he proposes to exchange documents with the European Commission in relation to the Rover Group after the company has been transferred to full private ownership.

Mr. Atkins: The Government are required, as a condition of the state aid approval, to supply six-monthly reports to enable the Commission to monitor the implementation of Rover Group's corporate plan.

Bosphorus Bridge

Mr. Morgan: To ask the Chancellor of the Duchy of Lancaster how much financial assistance he has offered to provide to the Trafalgar House-led consortium in connection with its bid to win the contract for the third Bosphorus bridge.

Mr. Alan Clarke: The extent of financial assistance by the Department of Trade and Industry to companies pursuing major projects overseas must remain confidential between the company and the Department.

Feature Films

Mr. Cryer: To ask the Chancellor of the Duchy of Lancaster if he will list the number of feature films classified as British and produced in each year since 1974.

Mr. Atkins: Before the passing of the Films Act 1985, films released for public exhibition in cinemas had to be registered by my Department. The 1985 Act, however, removed these registration requirements with effect from 23 May 1985, and there are no official statistics of films since that date. The information available on British feature films (that is, those with a playing time of over 72 minutes) is as follows

	Over 72 minutes
1974	78
1975	70
1976	64
1977	42

	Over 72 minutes
1978	51
1979	40
1980	41
1981	32
1982	29
1983	36
1984	37
[1]1985	18

[1]To 23 May.

Industrial Research and Development

Mr. Ieuan Wyn Jones: To ask the Chancellor of the Duchy of Lancaster what measures are being undertaken by his Department to encourage industrial research and development expenditure in the regions of the United Kingdom.

Mr. Forth: The Government have created the right climate to enable industry to invest more in research and development in all parts of the United Kingdom. Within my Department's enterprise initiative, particular attention is given to the needs of the regions. In the assisted areas and urban programme areas, support of up to two thirds of the cost of consultancy projects is available, rather than half elsewhere. We have also introduced a special scheme —regional enterprise grants—to help firms in the development areas, with fewer than 25 employees, to finance their innovation projects and have expanded SMART (small firms merit award for research and technology), reserving 20 awards for the urban programme areas. Applications for this year are currently being assessed.

European Single Market

Mr. Thurnham: To ask the Chancellor of the Duchy of Lancaster if he will make a statement about preparations for competing in Europe in 1992.

Mr. Maude: Over 80 per cent. of British businesses are now aware of the 1992 target date for completing the single European market. This is an excellent base from which to launch the next stage of DTI's "Europe Open for Business" campaign to encourage action in firms throughout the country to prepare for the single market.

Engineering Industry

Mr. Adley: To ask the Chancellor of the Duchy of Lancaster when he last met representatives of the engineering industry; and what matters were discussed.

Mr. Newton: I have not yet had the opportunity to meet representatives of the engineering industry in my new capacity.

Departmental Programmes

Mr. George: To ask the Chancellor of the Duchy of Lancaster how much has been spent by his Department in each of the past five years on the evaluation of Department programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mr. Forth: Evaluation of departmental programmes is carried out principally by specialist staff and consultants. Many of the staff concerned are also engaged on other work, so it is not possible to give precise figures for the cost of evaluation. The following figures give an approximate indication:

£

	1985-86	1986-87	1987-88
DTI specialist staff	440,000	440,000	430,000
Consultants	109,000	52,000	131,000
Total	549,000	492,000	561,000

These figures do not take account of the contribution to evaluation of staff concerned with programme management in the relevant line divisions, or of the cost of consultancy studies financed from line divisions' budgets. Such costs, and costs for years before 1985-86, cannot be separately identified without disproportionate cost.

My Department does not have a separate allocation of funds for evaluation work. The objective is for evaluation generally not to cost more than 0·5 per cent. of the total expenditure of the programme under evaluation. The proportion of total expenditure for which my Department has policy responsibility, represented by the above figures is as follows:

	Per cent.
1985-86	0·03
1986-87	0·02
1987-88	0·05

Securities and Investments Board

Mr. Hanley: To ask the Chancellor of the Duchy of Lancaster whether he has received a report from the Securities and Investments Board on the exercise of its functions under the Financial Services Act.

Mr. Maude: I have today laid before Parliament a copy of the board's report, made in accordance with section 117 of the Act. The report covers the period from 1 April 1987 to 30 June 1988.

Export Credits Guarantees

Mr. Andrew MacKay: To ask the Chancellor of the Duchy of Lancaster if he will make a statement on the accounting treatment of the Export Credits Guarantee Department's comprehensive external trade and comprehensive bank guarantee facilities.

Mr. Alan Clark: The comprehensive external trade facility insured United Kingdom companies trading in goods shipped directly from one overseas country to another on short terms of payment. It was discontinued in July 1987 because losses accumulated on confirming house business and no viable basis could be found for continuing cover for that sector. Cover for multi-sourcing business of manufacturers and merchants continues to be available under the comprehensive short term facility.

The comprehensive bank guarantee facility, which guaranteed banks against non-repayment of advances made to exporters in respect of insured short-term export contracts, was discontinued in October 1985, as the original need for the scheme no longer existed and demand had fallen because alternative sources of such finance were

available to viable companies. Residual claims payments and recovery action are likely to continue on the facility for several years.

At 31 March 1987, the ECGD had incurred cumulative cash flow deficits of £135·8 million (CBG) and £340·0 million (CET). These figures include notional interest on the borrowings from the Consolidated Fund. These deficits would continue to grow at an accelerating rate as notional interest accrued, thereby becoming a burden on the ECGD's other trading activities. It has therefore been decided that these facilities should properly be accounted for as public expenditure programmes and the losses incurred to date written out of the ECGD's trading account. The transfer will not affect the Government's aim to minimise the ultimate losses on the facilities.

The necessary changes will be made in the ECGD's 1987-88 trading accounts. Their precise effect will not be known until those accounts have been finalised, but the best current estimate is that reserves reported at 31 March 1987 will be increased by £360 million, reflecting trading losses accumulated in previous years. Retrospective adjustments to public expenditure for the years 1982-83 to 1988-89 will be made as follows:

	£ million
1982-83	58·0
1983-84	45·6
1984-85	84·7
1985-86	36·8
1986-87	17·7
1987-88	[1]12·7
1988-89	[2]—4·4

[1] provisional.
[2] estimate.

These figures represent the net annual cash payments to exporters. They do not include notional interest, administration expenses and accrued income and expenditure.

Trade Descriptions

Mr. Oppenheim: To ask the Chancellor of the Duchy of Lancaster when the repeal of the Trade Descriptions Act 1972 and the successor arrangements will come into force.

Mr. Forth: I have today laid before Parliament a draft order to bring into force section 48(2)(a) of the Consumer Protection Act 1987, which repeals the Trade Descriptions Act 1972. Subject to parliamentary approval, the repeal of the 1972 Act will come into force on 31 December 1988.

We propose to replace the 1972 Act with an order under section 8 of the Trade Descriptions Act 1968, which would require an indication of the place of production of goods to be given if the goods are presented in such a way that potential purchasers are likely to be misled about where the goods were produced. Consultations on a draft order for this purpose were carried out earlier this year.

In the light of the responses to the consultation, a number of amendments designed to clarify and strengthen the draft order have been made. In particular, the core provision of the order (article 2(1)) have been simplified; a requirement to indicate country of production if the place of origin could be misleading has been introduced; and the provisions dealing with the use of trade marks and language have been redrafted to make it clear that these factors are to be taken into account in assessing whether the presentation of goods is misleading as to their origin but they are not by themselves necessarily to be regarded as indicative of origin. These amendments should ensure that the order provides effective protection against misleading indications of origin.

Copies of the revised draft Trade Descriptions (Place of Production) (Marking) Order have been placed in the Libraries.

As required by section 38 of the Trade Descriptions Act 1968, I shall tomorrow advertise formally in the press and the London and Edinburgh Gazettes my intention to make this order. A period of at least 28 days during which representations may be made must then elapse before the order can be made. This will allow us to lay the final order before Parliament in good time before the necessary debates on the draft commencement order takes place.

Research and Development

Mr. George: To ask the Chancellor of the Duchy of Lancaster what has been the total expenditure over the past five years by Her Majesty's Government on research and development; what has been the total expenditure on social science research; and what figures he has for other member states of the European Community.

Mr. Forth *[holding answer 27 July 1988]:* The available information relates to central Government expenditure, net of receipts, on research and development in total and on R and D for social science and humanities. Comparable information from international sources is not available. The information is given in the table:

Net central Government expenditure on R and D—social science and humanities and total £ million

	1982-83	*1983-84*	*1984-85*	*1985-86*	*1986-87*
Social Science and Humanities	214·7	214·5	223·8	236·6	236·9
TOTAL	3,689·8	3,986·9	4,262·7	4,575·7	4,589·2

Satellite Television (Dish Installations)

Mr. French: To ask the Chancellor of the Duchy of Lancaster (1) if he has received any representations on the safety implications of faulty installations of roof-top dishes capable of receiving television programmes broadcast by satellite; and if he will make a statement;

(2) if he has any plans to introduce a licensing system for installers of roof-top dishes capable of receiving television programmes broadcast by satellite; and if he will make a statement.

Mr. Atkins *[holding answer 27 July 1988]:* I am aware of no such representations. The industry operates a code of practice on the installation of satellite dishes, and I see no need to introduce a licensing system.

It is a criminal offence to supply goods which do not comply with the general safety requirement imposed by the Consumer Protection Act 1987, and where a defective dish or faulty installation gives rise to damage or injury there may be grounds for a claim for damages for negligence or for breach of contract.

Steel

Mr. Salmond: To ask the Chancellor of the Duchy of Lancaster if he will publish a table showing the number of employees employed by the British Steel Corporation in *(a)* Scotland, *(b)* Wales and *(c)* England in (i) 1979, (ii) 1982, (iii) 1985 and (iv) June 1988.

Mr. Atkins *[holding answer 25 July 1988]:* The following table gives the total number employed by the British Steel Corporation at the end of September for the 1979, 1985 and for 1987, the latest date at which the total was broken down as follows:

	1979	*1982*	*1985*	*1987*
Scotland	18,970	11,250	7,970	6,110
Wales	50,630	22,310	19,060	18,610
England	114,040	58,550	37,130	26,680

The average weekly number of employees in the United Kingdom as a whole was 53,720 during the financial year 1987-88.

National Engineering Laboratory

Mr. Ingram: To ask the Chancellor of the Duchy of Lancaster if he will list the organisations which have submitted a bid to take over the National Engineering Laboratory, East Kilbride; and if he will make a statement.

Mr. Forth *[pursuant to the reply, 25 July 1988, c. 23.]:* I can now disclose that bids and proposals were received on 22 July from:

The Management of NEL
Production Engineering Research Association (PERA)
British Maritime Technology Group
British Hydro-Mechanics Research Association (BHRA) joint with Strathclyde University
YARD (a subsidiary of CAP Group plc)
Cranfield Institute of Technology
RAPRA Ltd. (a proposal also involving other companies)
SGS Moore Barrett and Redwood Limited
A partial bid for the Internal Combustion Engines Development Unit of NEL from the staff there.

Initial Training

Mr. Terry Lewis: To ask the Chancellor of the Duchy of Lancaster if, pursuant to his answer to the hon. Member for Worsley of 20 July, he will now list in the *Official Report* all exempted categories of persons in the Manpower Services Commission initial training scheme.

Mr. Cope: I have been asked to reply.

Further to my reply to the hon. Member on 20 July, the Training Commission is planning to introduce initial training as part of YTS, to provide a short period of preparation and assessment for young people who are not ready to enter a vocational training course, and need help to overcome special problems.

There are no predetermined categories of young people who would be excluded from initial training and anyone will be eligible if it is considered that they will benefit from this training provision.

OVERSEAS DEVELOPMENT

Ethiopia

Mr. John Evans: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on aid to Ethiopia.

Mr. Chris Patten: I refer the hon. Member to the answer I gave my hon. Friend the Member for Kingswood (Mr. Hayward) on 11 July 1988 at column *10*. Since that date, in view of the serious plight of Sudanese and Somali refugees in Ethiopia, we have made available additional relief assistance totalling £444,000, together with a further contribution of £1·5 million to the United Nations High Commissioner for Refugees. In addition to relief aid, we provide technical co-operation and famine rehabilitation, currently running at around £1·5 million a year.

Southern Africa (Front-line States)

Mr. Simon Hughes: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on his Department's policy towards aid to the front-line states in southern Africa.

Mr. Chris Patten: I refer the hon. Member to the reply I gave him on 5 July, at column *503*.

Sub-Saharan Africa

Miss Lestor: To ask the Secretary of State for Foreign and Commonwealth Affairs what was the total United Kingdom bilateral aid given to the whole of sub-Saharan Africa in each year from 1979 to the latest available year.

Mr. Chris Patten: The information is as follows:

Gross bilateral aid to sub-Saharan Africa 1979 to 87

	£ thousand
1979	212,504
1980	243,894
1981	278,706
1982	234,760
1983	225,899
1984	249,808
1985	285,497
1986	267,489
1987	283,720

Poverty Alleviation

Miss Lestor: To ask the Secretary of State for Foreign and Commonwealth Affairs how much, and what proportion of the British aid programme in 1986 was spent directly on poverty alleviation.

Mr. Chris Patten: I am currently reviewing the extent of our activities on direct poverty alleviation. The conclusions of this review will be available in the autumn.

ATTORNEY-GENERAL

Staff Surveys

Mr. Janner: To ask the Attorney-General what is the phased programme of surveys of staff being carried out by and within the Treasury Solicitor's Department and the Lord Chancellor's Department, respectively; what are the

phases and when each will be completed; and whether on completion he will place copies of such results in the Library.

The Solicitor-General: Both Departments have completed their programme of surveys of ethnic origins of serving staff. Results of east and west midlands, north-west and Avon, and London and the south-east have been published by the Cabinet Office and copies are in the Library.

Recruitment Schemes

Mr. Janner: To ask the Attorney-General what surveys of applicants have been carried out in recruitment schemes by the Treasury Solicitor's Department and the Lord Chancellor's Department, respectively, in respect of the sex and race of applicants and of those appointed; and with what results.

The Solicitor-General: Since the beginning of this year, applicants in all local recruitment schemes carried out by the Treasury Solicitor's Department and the Lord Chancellor's Department have been asked to complete an ethnic origin form. This information is being analysed on a servicewide basis by the Cabinet Office (Office of the Minister for the Civil Service).

Departmental Staff

Mr. Janner: To ask the Attorney-General whether he proposes to take any positive action measures in accordance with the code of the Commission of Racial Equality by reason of there being at present no black or Asian members of staff in the Law Officers' Department.

The Solicitor-General: All members of staff in the Law Officers' Department are seconded from other Government Departments, who recruit in accordance with the code of practice of the Commission for Racial Equality. The Law Officers' Department has no recruitment function.

Ethnic Monitoring

Mr. Janner: To ask the Attorney-General how many new entrants to the Lord Chancellor's Department and the Treasury Solicitor's Department, respectively, were from ethnic minority groups in the year ended 31 May.

The Solicitor-General: In the year ending 31 May 1988, of those new entrants to the Lord Chancellor's Department and the Treasury Solicitor's Department who responded to the ethnic origin survey, the numbers who were from ethnic minority groups were 83 and eight respectively.

Mr. Janner: To ask the Attorney-General in what quasi-governmental bodies or other organisations under his aegis he has authority to request or require the carrying out of ethnic monitoring exercises in accordance with the code of the Commission for Racial Equality; and what ethnic monitoring and equal opportunities exercises have been carried out by each such Department.

The Solicitor-General: There are no such bodies or organisations under the aegis of the Attorney-General.

Mr. Janner: To ask the Attorney-General when he expects the full result of the survey of ethnic origin of staff to become available; and whether he will then place a copy in the Library.

The Solicitor-General: The results of the survey are being collated and analysed by the Cabinet Office (Office of the Minister for the Civil Service) on a servicewide basis.

Departmental Programmes

Mr. George: To ask the Attorney-General how much has been spent by his Department in each of the past five years on the evaluation of Department programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

The Solicitor-General: The process of evaluation of my Department's programmes is part of the work itself. It is therefore not possible to identify separately the resources involved.

AGRICULTURE, FISHERIES AND FOOD

Milk Marketing Board

Mr. Ieuan Wyn Jones: To ask the Minister of Agriculture, Fisheries and Food when he last met the chairman of the Milk Marketing Board; and what matters were discussed.

Mr. MacGregor: I met the chairman of the Milk Marketing Board on 9 June, when we discussed various issues affecting the dairy industry.

Farming Unions

Mr. Wigley: To ask the Minister of Agriculture, Fisheries and Food when he last met representatives of the farming unions; and what matters were discussed.

Mr. MacGregor: I meet representatives of the farming unions frequently to discuss agriculture matters. I last met members of the National Farmers Union on the 11 July, when we discussed sheepmeat and beef.

Agriculture Ministers (Meetings)

Dr. Thomas: To ask the Minister of Agriculture, Fisheries and Food when he last met his counterparts from the other European Community states; and what matters were discussed.

Mr. MacGregor: I last met my counterparts from other European Community states at the Agriculture Council on 18-19 July. I refer the hon. Member to the reply I gave to my hon. Friend the Member for Beverly (Mr. Cran) on Wednesday 20 July, at columns *633-34*.

Public Expenditure

Mr. Worthington: To ask the Minister of Agriculture, Fisheries and Food if he will publish a table in the *Official Report*, in the same format as the written reply of 7 July, *Official Report*, columns *751-52*, on receipts classified as charges in respect of his programme expenditure over the years 1982-83 to 1990-91, indicating the receipts in respect of running costs expenditure together with a supplementary analysis indicating, separately, the amounts of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mr. MacGregor: For receipts in respect of programme expenditure I refer the hon. Member to the reply I gave him on 7 July 1988, at columns 751-52. Receipts in respect of running costs expenditure for which the Ministry of Agriculture, Fisheries and Food has responsibility are given in the table. In no year did receipts in respect of running costs included in other Government Departments' running costs exceed £½ million.

	Running costs receipts
1982-83 outturn	8
1983-84 outturn	8
1984-85 outturn	9
1985-86 outturn	9
1986-87 outturn	10
1987-88 outturn	20
1988-89 plans	23
1989-90 plans	29
1990-91 plans	31

Note: Figures for the Intervention Board for Agricultural Produce are de minimis.
The Forestry Commission has no running costs receipts.

EC (Membership Consequences)

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food whether he will bring up to date the figures in table D of the evidence submitted by Her Majesty's Government to the Treasury and Civil Service Committee on the financial and economic consequences of United Kingdom membership of the European Communities (page 67 of HC57-II Session 1984-85).

Mr. Donald Thompson: This information will take some time to prepare. I shall write to the hon. Member when it is available.

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food whether he will bring up to date the figures in annex V of the evidence submitted by Her Majesty's Government to the Treasury and Civil Service Committee on the financial and economic consequences of United Kingdom membership of the European Communities (pages 53-4 of HC57-II Session 1984-85).

Mr. Donald Thompson: I shall write to the hon. Member.

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food whether he will bring up to date the figures in tables 4(e)2 and 4(e)3 of the evidence submitted by Her Majesty's Government to the Treasury and Civil Service Committee on the financial and economic consequences of United Kingdom membership of the European Communities (pages 37 to 38 of HC57-II Session 1984-85).

Mr. Donald Thompson: The most recent information corresponding to that in table 4(e)2 is set out in the Commission publication "The Agricultural Situation in the Community—1987 Report", page T/38. Table 4(e)3 is updated by the Eurostat publication "Agricultural Income 1987", page 98. Copies of these publications are in the Library of the House.

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food whether he will bring up to date the figures in table 4(e)1 including figures for Spain and Portugal, of the evidence submitted by Her Majesty's Government to the Treasury and Civil Service Committee on the financial and economic consequences of United Kingdom membership of the European Communities (pages 35-36 of HC57-II Session 1984-85)

Mr. Donald Thompson: Information on yields of agricultural products in the European Community is contained in the Commission publication "The Agricultural Situation in the Community—1987 Report", pp T/168, T/169, T/188, T/193, T/221 and T/282. A copy is in the Library of the House. The latest readily available information for the non-Community countries is shown in the table.

Yields of selected agricultural products: 1986

	United States of America	*Japan*	*Australia*	*Canada*
Wheat (tonne/ha)	2·31	3·57	1·55	2·24
Barley (tonne/ha)	2·74	3·21	1·55	3·03
Sugar beet (tonne/ha)	51·29	53·99	n.a.	42·00
Oilseed rape (tonne/ha)	n.a.	1·68	1·12	1·40
Potatoes (tonne/ha)	32·69	29·23	25·22	25·12
Milk (kg/cow)	6,048·00	5,000·00	3,395·00	4,837·00

Source: FAO Production Year Book.
n.a.—not available.

Milk Quotas

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food whether he will publish in the *Official Report* the highest recorded price per 1,000 litres on the sale of a United Kingdom milk quota, the capital value in terms of a cow with a representative milk yield and a representative price for the cow itself.

Mr. Donald Thompson: My Ministry does not collect this information.

Cotton

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food whether he will publish in the *Official Report* a table showing for the years 1985 to 1987 and the estimate for the current year the guide and minimum prices for cotton under the common agricultural policy, the average world price, the cost of support to the EEC budget, the tonnage qualifying under the arrangement and the amount of aid per tonne, and production imports and exports of cotton in the EEC.

Mr. Donald Thompson: The information requested is contained in the table. Institutional prices and rates of aid,

as laid down in the EC regime for cotton, relate to cotton in the unginned state. Estimates for the current year are given where available.

	1985	1986	1987	1988
Guide price[1] (ECU/100 kg)	96·02	96·02	96·02	96·02
Minimum price[1 2] (ECU/100 kg) before adjustment under MGQ system	91·23	91·23	91·23	91·23
Average world price (approximately)[1 3] (ECU/100 kg)	29·00	28·00	29·00	
Aid payable[1 2] (by weighted average) before adjustment under MGQ system (ECU/100 kg)	63·22	70·1	65·3	
Quantity in receipt[1 2] of aid (tonnes) (In effect, EC production)	561,555	947,000	[4]870,000	
Imports of cotton into the EEC (ginned; tonnes) *Source:* Nimexe	808,166 (EC of 10)	1,054,536	1,119,309	
Exports of cotton from the EC (ginned, tonnes) *Source:* Nimexe	46,425	24,343	56,742	
EC expenditure on[1] aid (in million ECU)	355	587	519	

[1] Prices, aid and quantities are for the marketing year beginning in the year of harvest, and relate to a standard quality.
[2] Production in excess of the maximum guaranteed quantity attracts a proportionate reduction in rates of aid and minimum price and possible reduction in the MGQ the following year. In 1986/87 marketing year the deduction was 8 ECU/100 kg (approximately) and in 1987/88 it was 5·761 ECU/100 kg.
[3] World prices are for unginned cotton and are calculated from recorded prices for ginned cotton.
[4] Provisionally estimated.

Agricultural Production

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food whether he will publish in the *Official Report* a table showing his estimate of the contribution to agricultural production of each of the four categories of holding, by size of business, given in table 4 of the annual review (Cm. 299).

Mr. Donald Thompson: The information requested is given in paragraph 6 (page 2) and table 4 of the "Annual Review of Agriculture 1988" (Cm. 299).

SOEC Index (Statistics)

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food what is the SOEC index of real agricultural net value added at factor cost per person engaged in British agriculture in each of the years 1984-87 based on 1979-81 = 100.

Mr. Donald Thompson: The latest available estimates are:

	Number
1984	119·1
1985	96·8
1986	103·8
1987	100·8

These estimates are shown in table A.18 (page 89) of the Eurostat publication "Agricultural Incomes 1987", a copy of which is in the Library of the House.

Farmgate Prices

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food what was the average farmgate price in the United Kingdom for the principal common agricultural policy products in 1987; what was the average price in real terms in 1967-68 to 1970-71; and if he will state the quantities produced in each period.

Mr. Donald Thompson: I shall write to the hon. Member.

Support Costs

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food what is his estimate of the total cost of EEC/Exchequer support for United Kingdom agriculture per acre of arable crops and per head of cattle, sheep and pigs.

Mr. Donald Thompson: Expenditure in the United Kingdom on market regulation under the CAP (excluding structural measures) in 1987-88 was:

	Expenditure
Arable crops[1]	£87/ha
Cattle	£50/head
Sheep	£7/head
Pigs[2]	−£0·2/head

[1] Excludes grasses more than four years old and rough grazing.
[2] Receipts from MCA levies on exports of pigmeat exceed expenditure.
Source: "Annual Review of Agriculture 1988" (Cm. 299)—tables 3 and 34.

Supply Estimates

Mr. Patnick: To ask the Minister of Agriculture, Fisheries and Food if he will describe the net effects on Supply Estimates of the decisions on agricultural prices for 1988-89.

Mr. MacGregor: The voted provision of £558·855 million for the Intervention Board for Agricultural Produce is not expected to be reached. Since the Supply Estimates were prepared a number of changes have taken place in market prices, levels of production, exchange rates and trade volume. These changes, which include a revised reassessment of the effects of earlier policy measures, are substantially greater than the £9·5 million estimated net Exchequer cost of the price decisions. The settlement of the

price negotiations (including changes to market management measures to offset the cost to the Community budget) is forecast to add £12·968 million to expenditure, mainly because of the devaluation of the green pound. Additional receipts are forecast at £3·464 million. These forecasts allow for a delay in Community funding of approximately two months (so that additional expenditure incurred after January will not be reimbursed until the 1989-90 financial year) and for the fact that the new cane sugar refining aid agreed as part of the price fixing is only partly funded by the Community.

A token winter Supplementary Estimate will be submitted seeking parliamentary approval for the provision of the cane sugar refining aid.

Food Aid

Sir John Biggs-Davison: To ask the Minister of Agriculture, Fisheries and Food if he will publish the list of organisations designated to participate in the European Community free food scheme; and what advice he is circulating on the distribution of such food.

Mr. Ryder: I refer my hon. Friend to the answer given by my right hon. Friend the then Minister of State to my hon. Friend for Cambridgeshire, North-East (Mr. Moss) on 21 April, at column *566*.

EC Budget

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food whether he will bring up to date the information on the EEC agricultural budget and outturn given in his written reply dated 7 May 1986, *Official Report*, column *176*; and if he will include the supplementary budgets, the conversion factor for the pound sterling, the United Kingdom contribution and receipts and his forecasts for 1988 and 1989.

Mr. MacGregor: The information requested is set out in the table. The United Kingdom contributes to the budget as a whole rather than to individual components, so the figures shown for the United Kingdom contribution are notional.

	Original budget (excluding supplementary budgets)	*Supplementary budget*	*Outturn*	*Notional United Kingdom contribution*	*United Kingdom receipts*	*Conversion rate*
	mua	*mua*	*mua*	*mua*	*mua*	*1 ua = £*
1973	3,263	—	3,786	333	152	0·416667
1974	3,839	—	3,228	355	279	0·416667
1975	4,306	—	4,914	668	848	0·416667
1976	5,490	717	5,793	939	517	0·416667
1977	6,581	934	6,964	1,340	422	0·416667
	mecu	*mecu*	*mecu*	*mecu*	*mecu*	1 ecu = £
1978	9,131	—	9,000	1,386	480	0·663759
1979	10,022	725	10,880	1,904	593	0·649236
1980	11,878	—	11,943	2,484	941	0·605540
1981	13,401	−1,070	11,581	2,490	1,198	0·556891
1982	14,533	—	13,077	3,165	1,357	0·557801
1983	14,786	1,763	16,637	3,677	1,849	0·586581
1984	17,288	1,848	19,092	4,166	2,244	0·583969
1985	20,755	—	20,549	4,011	2,016	0·588051
1986	23,104	—	23,028	3,340	2,074	0·647851
1987[1]	24,174	−73	23,996	n.a.	1,839	0·719320
1988[2]	29,003	—	n.a.	n.a.	n.a.	0·671141
1989[3]	30,153	—	n.a.	n.a.	n.a.	0·671141

Source: EC budgets, EAGGF financial reports, EC Court of Auditors reports, implementation of the budget reports.

Notes: Before 1978, Community expenditure was expressed in units of account. As this unit had a different basis from the present ecu the figures for 1973-77 are not directly comparable with those for later years.

[1] Covers expenditure on market support for first 10 months only.

[2] Covers expenditure on market support from November 1987 to 15 October 1988. In addition, the budget contains provision of 1,240 mecu for depreciation of old stocks and a monetary reserve of 1,000 mecu.

[3] Covers expenditure on market support from 16 October 1988 to 15 October 1989. In addition the PDB contains 640 mecu for depreciation of old stocks, 800 mecu for reimbursement of butter disposals in 1987-88 and a monetary reserve of 1,000 mecu.

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food whether he will publish in the *Official Report* a revision of the table on pp 38-39 of Cm. 288-II to take account of what was agreed at the European Economic Community summit meeting on financing the European Economic Community budget and the current year's budget settlement, together with *(a)* a note of any other significant consequential changes in the forecast of his Department's expenditure and *(b)* a forecast for this year's expenditure on common agricultural policy support on the same basis as in table 4.7 on page 44.

Mr. MacGregor *[holding answer 2 July 1988]:* Revised figures for planned expenditure on agriculture, taking account of the European Council's agreement, will be published in the Chancellor's Autumn Statement. The estimated expenditure on CAP market support for 1988-89 is set out in the Supply Estimates, class IV, vote I.

Cattle and Sheep (Prices)

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food when he expects to publish target prices for cattle and sheep for January 1989; and if he will make a statement.

Mr. Donald Thompson: I published the target price scale for the beef variable premium scheme and the seasonal scale of weekly guide prices for the sheep variable price scheme on 22 July. The tables published included figures for January 1989, but, as explained in the press notices,

those for beef are provisional and depend upon the extension of the existing BVPS after its expiry at the end of 1988, while those for sheep will be reduced in due course by the operation of the 1989 sheepmeat stabiliser, the level of which is still to be decided by the EC Commission.

Silage and Slurry Facilities

Ms. Walley: To ask the Minister of Agriculture, Fisheries and Food what measures he will introduce to provide for the regular safety inspections of new, existing and extended silage and slurry facilities.

Mr. Donald Thompson: Responsibility for farm safety rests with the Health and Safety Executive. During the course of its regular routine visits and inspections, HSE's agricultural inspectorate examines all aspects of health and safety including, where appropriate, machinery systems and plant such as slurry stores, silage tanks, and so on.

Departmental Programmes

Mr. George: To ask the Minister of Agriculture, Fisheries and Food how much has been spent by his Department in each of the past five years on the evaluation of departmental programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mr. Donald Thompson: The process of evaluation of my Department's programmes is part of the work itself. It is therefore not possible to identify separately the resources involved.

Export Refunds

Mr. Boswell: To ask the Minister of Agriculture, Fisheries and Food how he will compensate exporters of agricultural and food products for the extra costs they have incurred as a result of the current year's delays in export refund payments by the Intervention Board for Agricultural Produce.

Mr. Donald Thompson: I regret that export refund payments have been subject to particular delays since the new Customs and Community documentation came into effect at the beginning of this year as a result of the intervention board's associated computer problems. I recognise that these delays have meant additional costs for many traders, especially when they have extended beyond the period of two months, which I am advised is reasonable by analogy with the express provisions of Community law relating to monetary compensatory amounts. I have therefore authorised the Intervention Board for Agricultural Produce to pay compensation at a varying rate equal to base rate plus one point on export refund claims, including exporter pays MCAs where applicable, paid on or after 1 January 1988 after an interval of more than two months from the day of deposit with Her Majesty's Customs or the board of sufficient supporting documents. The compensation will be paid on the net amount due after appropriate charges on the claim such as MCA levies have been taken into account. Parliamentary approval for payments will be sought in a winter Supplementary Supply Estimate for IBAP's market support vote (class IV, vote 1). Pending that approval, urgent expenditure estimated at up to £5 million will be met by repayable advances from the Contingencies Fund. Details of the arrangements will be announced by the intervention board as son as possible, with the first payments under the scheme being expected to be made in the autumn.

Plant Variety Testing and Seed Certification

Mr. Strang: To ask the Minister of Agriculture, Fisheries and Food whether he will make it his policy that no decision will be taken in the parliamentary summer recess on the recommendations in the report on plant variety testing and seed certification systems in the United Kingdom.

Mr. Donald Thompson: I cannot give such an undertaking.

River Pollution

Sir Bernard Braine: To ask the Minister of Agriculture, Fisheries and Food (1) whether he has yet received the report from the Anglian water authority regarding the effect of the extension of the Southend on Sea sewage outfall on the quality of river water generally; and whether there has been any increase in levels of pollution off Canvey Island's beaches;

(2) if he will detail the arrangements for continuous monitoring of all sewage outfalls and beaches in the Thames estuary.

Mr. Donald Thompson *[holding answer 27 July 1988]:* I refer my right hon. Friend to the reply he received on 22 July from my hon. Friend the Parliamentary Under-Secretary of State for the Environment, at column *857*.

PRIME MINISTER

Middle East

Q29. **Mr. Dykes:** To ask the Prime Minister if she has any plans to visit the middle east in the near future.

The Prime Minister: I hope to stop over briefly in the Gulf on the way to and from Australia, but have no plans at present to pay an official visit.

Scotland

Q66. **Mr. Harry Ewing:** To ask the Prime Minister if she has any plans to make an official visit to Scotland during the summer recess.

The Prime Minister: Yes.

Maidstone

Q125. **Miss Widdecombe:** To ask the Prime Minister if she has any plans to pay an official visit to Maidstone.

The Prime Minister: I have at present no plans to do so.

Invoices (Payment)

Mr. Nicholas Bennett: To ask the Prime Minister what action is being taken by Government Departments to ensure that invoices are paid promptly, especially where the debt is owed to a small business.

The Prime Minister: Government Departments are advised in "Government Accounting" that payment should be made as soon as possible after authorisation, subject to Departments taking, at their discretion, advantage of any supplier credit. Departments should not postpone payment to avoid an excess on a vote nor for any other reason. Copies of the booklet "Prompt Payment Please" prepared by the Department of Employment and a number of other organisations, which emphasises the need for fair dealing with small suppliers, have been sent by that Department to other Government Departments.

Mr. Raoul Wallenberg

Mr. Amess: To ask the Prime Minister (1) if, when she next meets the President of the Union of Soviet Socialist Republics, she will raise the case of Mr. Raoul Wallenberg; and if she will make a statement;

(2) when she last discussed the case of Mr. Raoul Wallenberg with the Swedish Government; and if she will make a statement;

(3) what discussions she has held with other EEC Heads of Government concerning the case of Mr. Raoul Wallenberg; and if she will make a statement;

(4) when she last discussed the case of Mr. Raoul Wallenberg with the Head of the Government of the Union of Soviet Socialist Republics; and if she will make a statement.

The Prime Minister: Mr. Wallenberg's nationality is Swedish. His disappearance is therefore primarily for the Swedish Government to pursue. Since 1957, the Soviet authorities have said that Mr. Wallenberg died in prison in 1947.

Over the years, there have been many reports that he was alive and in prison in the Soviet Union considerably later than that, but there has been no conclusive proof. We have frequently pressed the Soviet Union for a full account of Mr. Wallenberg's fate, and shall continue to do so as long as there is doubt as to whether he did in fact die, and if so, how. Increasing openness in Soviet society, particularly as regards matters of history, and indications that glasnost may possibly be extended to cover international tragedies such as the Katyn massacre, suggest that it may be possible before too long to establish the truth about Mr. Wallenberg.

I have not discussed Mr. Wallenberg's fate with other EC Governments or with the Swedish Government. I know that there is widespread international interest in this tragic case, and I am sure that all concerned are as anxious as we are to find out the truth.

Small Businesses

Mr. Amess: To ask the Prime Minister if she will list those Government measures of particular help for small businesses since 1979.

The Prime Minister: In 1979 responsibility for the small firms sector resided with the Department of Industry. Responsibility was transferred from the amalgamated Department of Trade and Industry to the Department of Employment on 3 September 1985. Government policy throughout has been to create a climate in which small firms can flourish and to tackle the particular disadvantages faced by people setting up a new business or wishing to expand an existing small firm.

The principal Government measures of particular help for small businesses include the small firms service which provides information and business counselling to new and established firms; the business improvement initiative launched by the DTI in January 1988 which offers access to specialised consultancy in a number of key business areas; the rural development commission, which provides advice and technical services to small firms in rural areas; a range of tax changes to improve the incentives and rewards for successful small business owners; the loan guarantee scheme introduced in 1981; the business expansion scheme introduced in 1983; the enterprise allowance scheme introduced in 1983; a range of training programmes operated by the Training Commission which take account of new and established small firms' business training needs.

Mr. S. Clinton Davis

Mr. Winnick: To ask the Prime Minister if she will give the reasons for not renewing the nomination of Mr. S. Clinton Davis as a member of the European Commission; and if she will make a statement.

The Prime Minister: I have written to Mr. Clinton Davis expressing gratitude for his work as a member of the Commission and explaining that I thought as a general rule that people should not serve as commissioners for too long.

European Council

Mr. Teddy Taylor: To ask the Prime Minister if she will raise at the next meeting of the European Council the responsibility for allocating responsibilities within the European Commission; and if she will make a statement.

The Prime Minister: No. The allocation of portfolios is a matter for the Commission.

EC Commissioners

Mr. Cryer: To ask the Prime Minister what are the salary, expenses, pension, period of office, and criteria for the appointment of a European Economic Community commissioner.

The Prime Minister: The basic annual salary of a commissioner is BFr 5,592,708 (at the present exchange rate about £86,000) with certain allowances payable depending on personal circumstances; travel and hotel expenses are paid on a reimbursement basis plus a subsistence allowable for travel; pensions are calculated at 4·5 per cent. of last annual salary per year of service. The period of office is four years.

As to the criteria, I have nothing to add to the reply I gave to the hon. Member for Linlithgow (Mr. Dalyell) on 20 July at column *607*.

Teachers (Pay Award)

Mr. Barry Jones: To ask the Prime Minister what factors have determined the decision to award teachers a pay increase of *(a)* 4·25 per cent. in England and Wales and *(b)* 6 per cent. in Scotland; and if she will make a statement.

The Prime Minister: The pay increase for teachers in England and Wales in 1988, which is worth about 4·75 per

cent. on average, resulted from a report of the Interim Advisory Committee on School Teachers' Pay and Conditions. My right hon. Friend the Secretary of State for Education and Science implemented in full the committee's recommendations on pay. The pay increase of 6 per cent. in Scotland was conceded by the Scottish local authorities within the Scottish Joint Negotiating Committee for Teaching Staff in School Education. My right hon. and learned Friend the Secretary of State for Scotland made clear the Government's view that this settlement was excessive and unjustifiable.

Members' Salaries

Mr. Pendry: To ask the Prime Minister if she has anything to add to her statement of 28 April, *Official Report*, column *506*, in reply to a question by the hon. Member for Stalybridge and Hyde, with specific reference to the current value in real terms of Members' salaries in relation to their salaries in 1964.

The Prime Minister: Yes. In 1964, Members were required to pay for secretarial assistance from their own resources. Since 1969, the secretarial allowance has been available to defray the cost of secretarial expenses, and if this is taken into account Members are undoubtedly better off. In addition, parliamentary salaries will be increased by 6·9 per cent. from £22,548 to £24,107 from 1 January 1989 in accordance with the Resolution of 21 July 1987.

Engagements

Mr. Stern: To ask the Prime Minister if she will list her official engagements for Thursday 28 July.

Mr. Harry Greenway: To ask the Prime Minister if she will list her official engagements for Thursday 28 July.

Mr. Tony Lloyd: To ask the Prime Minister if she will list her official engagements for Thursday 28 July.

Mr. Cran: To ask the Prime Minister if she will list her official engagements for Thursday 28 July.

The Prime Minister: This morning I presided at a meeting of the Cabinet and had meetings with ministerial colleagues and others. In addition to my duties in the House, I shall be having further meetings later today.

HOUSE OF COMMONS

Legislation (Statistics)

Mr. Amess: To ask the Lord President of the Council (1) if he will publish in the *Official Report* a list of the sponsors of private Members' Bills which have failed to complete their report stage in the House of Commons in each Session since 1958;

(2) if he will publish in the *Official Report* a list of private Member's motions, including prayers against statutory instruments, which have been debated in parliamentary time provided by the Government in each Session since 1959;

(3) if he will publish in the *Official Report* a list of Government Bills which failed to complete their report stage in the House of Commons since 1958;

(4) if he will publish in the *Official Report* a list of private Members' Bills which failed to complete their report stage in the House of Commons in each Session since 1959;

(5) how many ten-minute Bills were introduced in each Session since 1959.

Mr. Wakeham: It has not been possible to provide this information in the time available without disproportionate cost.

Divisions

Mr. Amess: To ask the Lord President of the Council what was the total number of Divisions on *(a)* Government business, *(b)* private Members' business, *(c)* private business and *(d)* other public business in each Session since 1959.

Mr. Wakeham: The information requested could be provided only at disproportionate cost.

Visitors

Mr. Amess: To ask the Lord President of the Council if he has any plans to review the present line of route; and if he will make a statement.

Mr. Wakeham: I have no such plans. I refer my hon. Friend to the reply I gave my hon. Friend the Member for Hyndburn (Mr. Hargreaves) on 12 May at column *234*.

Mr. Amess: To ask the Lord President of the Council if he will raise with the Services Committee the possibility of levying charges for tourists visiting the Palace of Westminster during the summer recess; and if he will make a statement.

Mr. Wakeham: I have no plans to do so. This matter was most recently considered and rejected by the Accommodation and Administration Sub-Committee in January 1987. Successive Administrations have accepted that the costs of the Palace of Westminster, which include the cost of controlling visits, are a legitimate charge on public funds.

Mr. Amess: To ask the Lord President of the Council what was the total number of visitors to the Palace during the summer recess in 1987; how many were tourists; and what were the figures for each year since 1983.

Mr. Wakeham: The total number of all visitors during each summer recess since 1983 is as follows:

	Number
1983	12,751
1984	17,502
1985	19,290
1986	20,462
1987	20,449

It is not possible to differentiate between tourists and other visitors.

Mr. Amess: To ask the Lord President of the Council what representations he has received requesting him to raise with the Services Committee the levying of charges for tourists visiting the Palace of Westminster during the summer recess; and if he will make a statement.

Mr. Wakeham: I have received no such representations during this Parliament. However, I am aware that my hon. Friend raised this matter in the debate on tourism on 17 June.

Mr. Amess: To ask the Lord President of the Council if he will raise with the Services Committee the possibility of opening the line of route for visitors on Saturdays and throughout the summer recess; and if he will make a statement.

Mr. Wakeham: I have no plans to do so.

Mr. Amess: To ask the Lord President of the Council what is his estimate of the cost of providing visitors to the Strangers Gallery with copies of documents relating to the business under discussion; and if he will make a statement.

Mr. Wakeham: Given the wide range of subjects discussed and the variation in size and price of documents, it is not possible to provide a reliable estimate. However, the value of Order Papers and guides for visitors to the gallery, which are already provided to visitors free of charge, amounts to some £450,000 annually.

Mr. Amess: To ask the Lord President of the Council if he will raise with the Services Committee the possibility of making certain parliamentary publications available for sale to visitors to the Palace of Westminster; and if he will make a statement.

Mr. Wakeham: I have no plans to do so. Visitors to the Gallery are already provided with the "Guide for Visitors to the Gallery" and with a copy of the relevant Order Paper free of charge. On leaving the Gallery, they may also obtain from the Admission Order Office, an order form for a copy of the relevant Hansard, which will be supplied by Her Majesty's Stationery Office on receipt of the order form and payment.

The new parliamentary building (phase I) will include a parliamentary bookshop, which will offer a full range of parliamentary publications to the public. It is expected that this bookshop will be open in late 1990.

EDUCATION AND SCIENCE

School Discipline

Mr. Ashley: To ask the Secretary of State for Education and Science when he now expects to receive the report of the committee of inquiry into discipline in schools; and when he hopes to publish it.

Mrs. Rumbold: I refer the right hon. Member to my right hon. Friend's reply to the Member for Blackburn (Mr. Straw) on 29 April at columns *281-84*.

Mr. Ashley: To ask the Secretary of State for Education and Science which bodies were specifically asked by the committee of inquiry into discipline in schools to answer questions other than those which featured in the public advertisement; and what questions these bodies were asked.

Mr. Rumbold: All those invited to submit evidence were asked to address the four questions in the public advertisement. Additional, more specific, questions were addressed to all local education authorities and all institutions providing teacher training in England and Wales. The additional questions for local education authorities were as follows:

Prevalence

Do you have any statistical (or other) evidence indicating prevailing levels of misbehaviour by pupils? (e.g. records of suspensions and exclusions and the reasons for them, truancy etc.)

Can any local trends be identified from this evidence? If so, what are they?

Policies

Does your authority have a stated policy on school discipline? (If it has, a copy would be very useful.)

Are schools encouraged to publish such policies? (Examples of school policies would also be very valuable.)

Does your authority provide schools with guidelines covering criteria to be used when considering the exclusion of a pupil? (If it does, a copy would be helpful.)

In-service training

Are teachers in your authority involved in any in-service training specifically related to classroom control? (Some details of courses and numbers involved would be helpful.)

Alternative provision for disturbed/disturbing pupils

What alternative provision (support teams, on or off-site units etc.) is made by your authority for such pupils?

How many pupils are involved in such provision compared with your mainstream primary secondary school population?

What criteria are used to identify pupils requiring such provision?

What would your assessment be of the costs and benefits of this provision for your authority?

The additional questions for institutions providing teacher training were as follows:

Initial Teacher Training

Do your current courses deal with issues of behaviour and discipline through:

specific core units or modules?
optional units or modules?
the permeation of the whole course?
the school experience component of the course?
a combination of these?

Do you provide guidelines for staff and/or students on these issues? If so, what form do they take?

What methods are used to help students develop skills and attitudes which will be effective in promoting good behaviour and preventing disruptive behaviour by pupils? Please give examples.

Is it possible to distinguish the course time spent on this from that spent on the development of more general classroom management skills? If so, please quantify it in relation to total course hours.

Do courses contain practical advice on how to handle disruptive incidents? If so, what form does it take?

Does a specific member of staff have responsibility for advising on and monitoring training in these areas?

Do any arrangements exist for students to gain experience of schools and classes in which pupils' behaviour may be difficult? If so, what are they?

How are students prepared for and supported through such situations if they are encountered in their school experience?

Are students helped to understand the perspectives of parents in relation to their children's behaviour? If so, how is this achieved.

How are students made aware of the range of professional support available within schools and from outside agencies to help in managing the behaviour of pupils?

In-service Training

Does your college/department currently run or contribute to INSET courses specifically related to the management of pupil behaviour? If it does, please give details of course content, teaching methods and participants.

Mr. Ashley: To ask the Secretary of State for Education and Science how many individuals have submitted evidence to the committee of inquiry into discipline in schools.

Mrs. Rumbold: The committee has received 360 letters from individuals, including groups of staff within schools and social service departments. Nine letters were signed by more than one individual. The total number of signatories is 465.

Mr. Ashley: To ask the Secretary of State for Education and Science if he will list the organisations which have submitted evidence to the committee of inquiry into discipline in schools.

Mrs. Rumbold: The organisations which have submitted evidence to the committee are:

City Technology Colleges

Ms. Ruddock: To ask the Secretary of State for Education and Science what is his policy regarding the year-on-year revenue funding of city technology colleges, having regard to future fluctuations in spending by local education authorities of maintained schools.

Mrs. Rumbold: Decisions on public expenditure on the revenue funding of city technology colleges will take into account funding levels on LEA-maintained schools in similar areas.

Mr. Anthony Coombs: To ask the Secretary of State for Education and Science what factors he will take into account in deciding proposals published by local education authorities to close schools in order that city technology colleges or city colleges for the technology of the arts might be established in their place.

Mr. Kenneth Baker: All proposals which fall to me to be decided under the provisions of section 12 of the Education Act 1980 are treated strictly on their merits and in the light of the individual circumstances. In reaching my decision I weigh carefully the case presented by the local education authority and the comments made by any objectors to the proposals. I also take careful account of my published education policies. My Department has given detailed guidance to local education authorities in circular 3/87 on some general considerations against which I judge rationalisation proposals.

If section 12 proposals should be put to me which included as an objective making premises available to the promoters of a city technology college (CTC) or a city college for the technology of the arts (CCTA), I would consider them against the same criteria. In addition I would need to satisfy myself that the plans formulated by the promoters were sufficiently clear, considered and developed; that they fitted the criteria of the CTC programme; and that agreements in principle had been reached, subject to my approval of the section 12 proposals, on the terms of a proposed funding agreement with the promoters. I should need to be satisfied that the necessary agreement in principle had been reached between those persons and the local education authority; and that sufficient schools would continue to be available for pupils in the area of the authority, taking account, where appropriate, of the facilities to be provided by the CTC or CCTA. I should also need to satisfy myself that full details of the plans had been made available to all those with an interest in the matter at the appropriate time during the consultation process, in line with the guidance set out in circular 3/87.

Student Loans

Mr. Amess: To ask the Secretary of State for Education and Science what representations his Department has received about the introduction of student loans; and if he will make a statement.

Mr. Jackson: The student support review group has received written evidence from 106 organisations and individuals, nine of which have also given oral evidence. In addition, since the beginning of 1987, the Department has received seven petitions, signed by a total of 1,300 people, and well over 1,500 letters.

Mr. Amess: To ask the Secretary of State for Education and Science if he will place in the Library copies of the representations he has received concerning the introduction of student loans; and if he will make a statement.

Mr. Jackson: Copies of written evidence received by the student support review group were placed in both Libraries of Parliament in April 1987. It would not be appropriate to do the same with all the correspondence —not usually intended for publication—addressed to my right hon. Friend and myself.

Mr. Amess: To ask the Secretary of State for Education and Science if he will list in the *Official Report* those *(a)* individuals and *(b)* organisations who made representations to his Department concerning the introduction of student loans.

Mr. Jackson: The following organisations and individuals submitted written evidence to the student support review group:

Alliance Party of Northern Ireland
Association for Student Counselling
Association of Accommodation and Welfare Officers
Association of British Chambers of Commerce
Association of Charity Officers
Association of County Councils
Association of Directors of Education in Scotland
Association of Heads of Polytechnic Student Services

Mr. M. I. J. Woodward, Headmaster, Holsworthy Community College
Women Returners Network
World University Service (UK)

Oral evidence was received from the following organisations:

Association of County Councils
Association of Metropolitan Authorities
Association of University Teachers
Committee of Directors of Polytechnics
Committee of Principals and Directors of Scottish Central Institutions
Committee of Vice-Chancellors and Principals of the Universities of the United Kingdom
Conservative Collegiate Forum
Convention of Scottish Local Authorities
National Union of Students

Mr. Amess: To ask the Secretary of State for Education and Science what recent representations his Department has received concerning automatic membership of student unions; and if he will make a statement.

Mr. Jackson: Since the end of May we have received 13 letters from hon. Members and members of the public about membership of local unions and a further 10 letters about membership of the National Union of Students.

Mr. Amess: To ask the Secretary of State for Education and Science what information his Department has on the services of student unions available to their members; and if he will make a statement.

Mr. Jackson: I refer my hon. Friend to the answer given by my right hon. Friend to my hon. Friend the Member for

Thurrock (Mr. Janman) on 18 April at column *292*, in which he indicated that it was intended to collect the information requested as part of a fact-finding survey of student unions. A questionnaire is due to be sent to a sample of institutions in the near future.

Public Expenditure

Mr. Worthington: To ask the Secretary of State for Education and Science if he will publish a table in the *Official Report*, in the same format as his written reply of 15 July, *Official Report*, columns *373-74*, on receipts classified as charges in respect of his programme expenditure over the years 1982-83 to 1990-91, indicating the receipts in respect of running costs expenditure, together with a supplementary analysis indicating, separately, the amounts of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mrs. Rumbold: Receipts against DES running costs expenditure are as follows:

	£ million
1982-83 outturn	1
1983-84 outturn	2
1984-85 outturn	2
1985-86 outturn	2
1986-87 outturn	1
1987-88 estimated outturn	1
1988-89 plans	1
1989-90 plans	1
1990-91 plans	1

None of these receipts is included in other Department's running costs. The remaining information requested is not readily available in respect of local education authority receipts; details of research council receipts are published in the annual appropriation accounts.

Mr. Worthington: To ask the Secretary of State for Education and Science if he will publish in the *Official Report* an analysis for the years 1982-83 to 1990-91, consistent with his reply of 15 July, *Official Report*, columns *373-74*, of receipts for *(a)* schools' expenditure, analysed by (i) meals, (ii) milk sales, (iii) rents, (iv) fees and charges and (v) grants, *(b)* further and higher education expenditure, analysed by (i) fee income, (ii) examination fees, (iii) research and consultancy income, (iv) rents and charges and (v) grants, *(c)* miscellaneous expenditure, analysed by (i) income of youth and other educational services and (ii) other fees and charges and *(d)* research councils' expenditure, analysed by (i) charges for commissioned research and (ii) other.

Mrs. Rumbold: The handbooks of education unit costs published by the Chartered Institute of Public Finance and Accountancy for each of the financial years 1982-83 to 1985-86 set out a full analysis of revenue income received by local education authorities in England, both by sector of the education service and by type of income, compiled from LEAs' returns to the Department of the Environment of revenue outturn. A handbook giving similar information for the 1986-87 financial year will be published soon. A detailed breakdown of LEA receipts beyond 1986-87 is not available. Details of research council receipts for the years 1982-83 to 1986-87 have been published in the annual appropriation accounts.

Mr. Worthington: To ask the Secretary of State for Education and Science if he will publish in the *Official Report* a table bringing together on the same basis the totals for receipts on his programme in 1985-86 and 1986-87 implied by his answer of 15 July, *Official Report*, columns *373-74*, with the corresponding totals in the answer of 27 May, *Official Report*, columns *375-76*.

Mrs. Rumbold: The totals for receipts for 1985-86 and 1986-87 implied by my answer of 15 July at columns *373-74*, are, respectively, £1,077 million and £1,224 million; the comparable figures of £999 million and £1,144 million given in my right hon. Friend's answer on 27 May, at columns *375-76*, incorporated part, but not all, of the relevant receipts accruing to the research councils.

Departmental Programmes

Mr. George: To ask the Secretary of State for Education and Science how much has been spent by his Department in each of the past five years on the evaluation of departmental programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mrs. Rumbold: Evaluation can take many forms, including the work of Her Majesty's inspectorate, research projects and ad hoc investigations. A separate costing of the evaluation component of these is not available, but total spending on relevant activities has been:

£ million

	1986-87	*1987-88*	*1988-89*
Her Majesty's Inspectorate (recurrent costs)	18·1	19·9	21·8
Research and development (total)	13·8	14·1	15·6
Total	31·9	34·0	37·4
The DES programme, including central and local government expenditure, has been	15,691·0	17,169·0	17,971·0

University Extra-mural Departments (Funding)

Mr. Nicholas Bennett: To ask the Secretary of State for Education and Science if he will make a statement on the transfer of funding responsibility for extra-mural departments in English universities to the Universities Funding Council.

Mr. Jackson: The Universities Funding Council will assume responsibility for funding extra-mural departments in English universities from the beginning of the next financial year. An official working party has considered the implications of a transfer and copies of its report are being sent today to the chairmen of the Committee of Vice-Chancellors and Principals and the University Grants Committee. My right hon. Friend will commend the report to the UFC, when it is established.

Haberdashers' Aske's Hatcham Girls School

Ms. Ruddock: To ask the Secretary of State for Education and Science what was the purpose of the visit by

an architect in his Department to the Haberdashers' Aske's Hatcham girls school in Deptford on Tuesday 5 July; and if he will make a statement.

Mrs. Rumbold: An occasional professional assistant working for architects and buildings branch at the Department visited the Haberdashers' Aske's Hatcham girls school in Deptford on Tuesday 5 July. The visit followed a request from the governors for advice on possible modifications to the school buildings.

University Grants

Mr. Pawsey: To ask the Secretary of State for Education and Science whether he will list the grants made available to universities in Great Britain in the financial year 1987-88 on the advice of the University Grants Committee and the Computer Board.

Mr. Jackson: The information requested is as follows:

1987-88

Other payments				903[3]
TOTAL	14,767	3,716	109,144[2]	15,300

[1] The sums provided from Subhead A2, earmarked for individual universities as shown, were transferred to a Deposit Account with the Paymaster General from which issues were made as required towards meeting the costs of furniture and equipment. The balance remaining in the Deposit Account at 31 March 1988, which is not liable to surrender to the Consolidated Fund, was £15,997,000. This sum includes £1,163,000 in respect of the Engineering and Technology Programme.
[2] In addition a further £1,178,000 was transferred to the Deposit Account to meet expenditure by Universities for the Engineering and Technology Programme.
[3] Other payments comprise £345,000 fees paid to the Central Computer and Telecommunications Agency (CCTA) for negotiating contracts and £558,000 paid to the Rutherford and Appleton Laboratories (SERC) for networking projects.

1987-88

Grants and loans for long-term capital projects: universities etc., (subhead A1(1))

FOREIGN AND COMMONWEALTH AFFAIRS

Mr. Jonas Savimbi

Mr. Anderson: To ask the Secretary of State for Foreign and Commonwealth Affairs whether Mr. Jonas Savimbi met any of his Department's officials during his recent visit.

Mrs. Chalker: A Foreign and Commonwealth Office official met Mr. Savimbi informally at a private social occasion.

Africa (Visits)

Mr. Anderson: To ask the Secretary of State for Foreign and Commonwealth Affairs which countries he intends to visit in the autumn of this year.

Mrs. Chalker: In accordance with normal practice, details of my right hon. and learned Friend the Secretary of State's plans will be announced shortly before the visit.

South Africa (Visas)

Mr. Anderson: To ask the Secretary of State for Foreign and Commonwealth Affairs what information he has on the specific requirements relating to occasions when British citizens need visas to visit South Africa.

Mrs. Chalker: Visa requirements for South Africa are a matter for the South African Government. We understand that British citizens do not require a visa to visit South Africa except in certain specific cases about which the South African authorities will be able to advise.

Soviet Union

Mr. Bowis: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps he is taking to encourage cultural, scientific and academic exchange between the United Kingdom and the Soviet Union.

Mrs. Chalker: Cultural, scientific and academic exchanges between the United Kingdom and the Soviet Union are increasing. Such exchanges are provided for in the memorandum of understanding signed during my right hon. Friend the Prime Minister's visit to the Soviet Union last year and in the biennial British/Soviet cultural agreement which was signed in January 1987 for the period 1987-89. The staffing of the cultural department in the British embassy in Moscow was strengthened in 1987.

Mr. Raoul Wallenberg

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) when he last raised the case of Mr. Raoul Wallenberg with the Government of the Union of Soviet Socialist Republics; and if he will make a statement;

(2) if he will make further representations to the Government of the Union of Soviet Socialist Republics concerning Mr. Raoul Wallenberg; and if he will make a statement;

(3) if he will list those countries that are known to his Department to have made representations to the Government of the Union of Soviet Socialist Republics about the case of Raoul Wallenberg; and if he will make a statement.

Mrs. Chalker: Mr. Wallenberg's nationality is Swedish. His disappearance is therefore primarily for the Swedish Government to pursue. Since 1957 the Soviet authorities have said that Mr. Wallenberg died in prison in 1947. Over the years there have been many reports that he was alive and in prison in the Soviet Union considerably later than that, but there has been no conclusive proof. We have frequently pressed the Soviet Union for a full account of Mr. Wallenberg's fate, and shall continue to do so as long as there is doubt as to whether he did in fact die, and if so, how. Increasing openness in Soviet society, particularly as regards matters of history and indications that glasnost may possibly be extended to cover international tragedies such as the Katyn massacre, suggest that it may prove possible before too long to establish the truth about Mr. Wallenberg.

We have not discussed Mr. Wallenberg's fate with other EC Governments or with the Swedish Government. We know that there is widespread international interest in this tragic case, and we are sure that all concerned are as anxious as we are to find out the truth.

Gibraltar Shootings

Mr. Mullin: To ask the Secretary of State for Foreign and Commonwealth Affairs if the statement made by Mr. Victor Adams to the special branch regarding the Gibraltar shootings has been made available to the Gibraltar coroner.

Mrs. Chalker: The task of collecting statements falls to the Gibraltar coroner. We understand that the West Yorkshire police have taken a statement from Mr. Adams, in connection with the shooting, on the coroner's behalf.

Nicaragua

Mrs. Mahon: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) if he will make representations to the United States Government concerning the implications for the possibility of a peaceful settlement in Nicaragua of the Administration's policy of support for the contras while that organisation remains committed to the use of violence; and if he will make a statement;

(2) if he will make representations to the United States administration urging them not to resume lethal aid to the contras in Nicaragua.

Mrs. Chalker: We have regular discussions with the United States administration on a wide range of issues including Central America. They are well aware of our support for a peaceful negotiated solution to the region's problems.

Mrs. Mahon: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make representations to the United States Administration urging them to remove economic sanctions against Nicaragua.

Mrs. Chalker: United States economic policy towards Nicaragua is a matter for the two Governments concerned. We have normal economic relations with Nicaragua.

India

Mr. Bowis: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps he is taking to encourage cultural, scientific and academic exchanges between the United Kingdom and India.

Mrs. Chalker: Cultural, scientific and academic exchanges with India are many. The British Council has four offices in India and is involved with FCO and ODA programmes as well as its own, which have recently included, on the arts side, a major Henry Moore exhibition. Scientific and academic links feature prominently in the council's work and are promoted through the ODA's bilateral technical co-operation programme, under which about £8 million per year is devoted to exchange of persons, consultancies, longer-term training in Britain and the supply of equipment in support of these links. Funds are being made available to increase the number of awards for Indians to study in Britain.

Local Authorities (Twinning)

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs what information his Department has as to the number of local authorities which twin with towns abroad; and if he will make a statement.

Mrs. Chalker: Some 830 local authorities in the United Kingdom are currently twinned with communities abroad.

Mr. Amess: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will publish in the *Official Report* a list of local authorities which are known by his Department to have twinned with towns abroad together with the names of those towns.

Mrs. Chalker: A list of all twinnings, including those between local authorities and communities abroad, is held in the Library of the House.

Turkey

Mr. Wallace: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations were made to the President of Turkey during his recent state visit, regarding Cypriots who went missing following the Turkish invasion of northern Cyprus in 1974; and if he will make a statement.

Mrs. Chalker: None. We believe that this matter is best dealt with by the intercommunal committee set up for the purpose under United Nations General Assembly resolution No. 32/128.

Mr. Wallace: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations were made to the President of Turkey regarding human rights in Turkey during the recent state visit; and if he will make a statement.

Mrs. Chalker: During President Evren's recent state visit, my right hon. and learned Friend raised the subject of human rights with the Turkish Foreign Minister, and expressed the hope that the progress made in this field in Turkey in recent years would continue.

HOME DEPARTMENT

Licensing Hours

Mr. David Atkinson: To ask the Secretary of State for the Home Department when he expects that licencees of public houses will be able to implement the hours of opening allowed for under the Licensing Act 1988.

Mr. Douglas Hogg: The necessary amendments to secondary legislation will be in place on Monday 22 August and section 1 of the Licensing Act 1988, revised licensing hours, along with sections 3, 5, 9, 11, 13 and 14, will come into force on that date. The commencement date for the remaining sections 12 and 15 will be 1 March 1989.

Prisons

Mr. Steinberg: To ask the Secretary of State for the Home Department if he will take action to solve the prison officer staff shortages at Durham prison.

Mr. Douglas Hogg: Ten staff have been allocated to Her Majesty's prison Durham from the training courses which finish in August. At the same time, in common with all establishments, Durham is working to ensure that the best use is made of its staff resources under fresh start.

Mr. Irving: To ask the Secretary of State for the Home Department how many prisoners at Bedford prison are *(a)* two to a cell and *(b)* three to a cell.

Mr. Douglas Hogg: On 10 July, the most recent date for which this information is readily available, 58 prisoners were accommodated two to a cell and 195 prisoners were accommodated three to a cell in cells designed for one prisoner at Her Majesty's prison Bedford.

Forensic Science Service

Mr. Alex Carlile: To ask the Secretary of State for the Home Department if he has any proposals for improving the effectiveness of the Home Office forensic science service; and if he will make a statement.

Mr. Douglas Hogg: Work to this end is in hand in the following main areas:

(i) The relationship between the service and its users
User boards have been established at each laboratory, chaired by a chief constable, to improve the relationship between the laboratory and the police forces and courts which it serves.

(ii) Longer-term planning of the future of the service
Each laboratory is drawing up a strategy plan, covering the next three years, in consultation with its user board. These will be considered by the national police advisory board which includes representatives of the police, local authorities and the courts.

(iii) The staffing of the service
Proposals are under discussion for a new structure for the operational laboratories of the service aimed at enhancing their ability to meet the demands on them by increasing the number of officers reporting cases to court and enabling the service to recruit and train the staff it needs. A new director-general is to be appointed shortly.

Mr. Alex Carlile: To ask the Secretary of State for the Home Department what was the cost of *(a)* the staff inspection of the Chepstow forensic science laboratory, *(b)* the work management exercise at the Birmingham laboratory, *(c)* the staff inspection at the Birmingham laboratory and *(d)* the review of senior staff; and if he will make a statement as to the value for money of these reviews.

Mr. Douglas Hogg: The information requested is as follows:

	£
Staff inspection, Chepstow forensic science laboratory	21,752
Work measurement exercise/staff inspection,[1] Birmingham forensic science laboratory	73,283

[1] The work measurement exercise and staff inspection at Birmingham forensic science laboratory were closely related, and their costs cannot readily be separated.

The review of the senior staff of the service included a staff inspection of the senior posts in the operational laboratories, at a cost of £3,197. Other costs of the review cannot readily be identified separately.

These exercises have provided useful information about the staffing and complementing arrangements of the service and have contributed to the development of new proposals aimed at enhancing its effectiveness and improving its efficiency.

Civil Defence

Mr. Thorne: To ask the Secretary of State for the Home Department what is his present policy in relation to protection of the public in the event of hostilities *(a)* by evacuation, *(b)* by shelter in situ or *(c)* by a combination of both; and if he will make a statement.

Mr. John Patten: I refer my hon. Friend to the replies I gave to his earlier questions on 25 July.

Mr. Thorne: To ask the Secretary of State for the Home Department what powers are available to him to use against local authorities to compel them to meet their statutory civil defence duties; what action he has taken so far; and if he will make a statement.

Mr. John Patten: Paragraph 4 of the Civil Defence (General) Regulations 1949 (SI 1949 No. 1432) empowers the designated Minister to discharge the functions himself or to require another authority or person to do so, in either case in the name and at the expense of the authority failing or refusing properly to do so. It has not been necessary to use these powers in recent years.

Mr. Thorne: To ask the Secretary of State for the Home Department if he will set out a schedule of his planned programme for implementation of civil defence and protection regulations giving priorities and target dates for specific achievements; how this planned programme is being monitored; what success there has been so far; and if he will make a statement.

Mr. John Patten: The planned programme for implementation of the Civil Defence (General Local Authority Functions) Regulations 1983 was introduced in October 1986. Initial priority was given to the development by local authorities of detailed operational plans. The programme for the first three years up to October 1989 was set out in Home Office circular No. ES 1/1986, a copy of which is in the Library. Analysis of the returns by local authorities is a continuing process, but our interim judgment is that replies are generally satisfactory and indicate progress in many areas. Progress remains patchy, however, and all authorities still have some way to go.

Mr. Thorne: To ask the Secretary of State for the Home Department what are his plans and method for keeping the public informed about civil defence and protection measures *(a)* during a period of increased international tension, *(b)* after hostilities have commenced and *(c)* after nuclear or chemical attack.

Mr. John Patten: Guidance on information services in a war emergency is contained in section 6 of the "Emergency Planning Guidance to Local Authorities", a copy of which is in the Library. Arrangements for issuing information to the public are kept under review, method and content would depend on circumstances at the time.

Mr. Thorne: To ask the Secretary of State for the Home Department if he will make a statement about the current progress in local authorities' surveys in their areas into what public buildings could in a crisis be rapidly converted into a measure of protection for the public in time of hostilities.

Mr. John Patten: Comprehensive information on progress in planning for shelter is unlikely to be available centrally until the end of 1989, in line with the monitoring arrangements set out in the Government's planned programme for implementation (PPI) of the Civil Defence (General Local Authority Functions) Regulations 1983. Supplementary guidance on planning shelter surveys was issued in June following pilot studies undertaken jointly by the Home Office and a number of local authorities.

Drink Driving

Mr. Grocott: To ask the Secretary of State for the Home Department in the latest year for which figures are available, how many people were convicted of driving with excess levels of alcohol; and in how many cases this was a second, third, fourth, fifth, sixth or, seventh or more than seventh conviction.

Mr. John Patten: In 1986, out of a total of about 107,100 findings of guilt for offences of driving and so on after consuming alcohol or taking drugs, 87,600 offences were of driving with alcohol in the blood, breath or urine above the prescribed limit. This information is published in table 5 of "Offences Relating To Motor Vehicles, England and Wales 1986, Supplementary Tables", copies of which are in the Library. The figure for 1987 will be published later this year. Information on previous convictions of these offenders is not available centrally.

Child Abuse

Mr. Redmond: To ask the Secretary of State for the Home Department what are the figures for each of the last five years, broken down by sex, of persons convicted of child abuse, and of the sentences given by the courts, in England and Wales.

Mr. John Patten: I will write to the hon. Member.

Illegal Abortions

Ms. Richardson: To ask the Secretary of State for the Home Department what was the total number of convictions in England and Wales for procuring an illegal abortion in 1987.

Mr. John Patten: Information for 1987 is not yet available, but records held centrally show that there were two such convictions in 1986.

Summer Time

Mr. Rathbone: To ask the Secretary of State for the Home Department whether he is yet in a position to announce his conclusions on consultation about harmonising summer time with other members of the European Community.

Mr. Douglas Hogg: The Government's recent survey was directed towards gathering factual information about three options for summer time. The Government would not wish to reach conclusions without wider debate on the data collected which reflect differing views on the economic and social effects of any change.

Prisons (Ethnic Surveys)

Mr. Redmond: To ask the Secretary of State for the Home Department what proportion of Her Majesty's prison officers have refused to fill in ethnic survey forms; and if he will make a statement.

Mr. Douglas Hogg: At 1 May 1988, the latest figures available, about 70 per cent. of prison service unified grades VI to VIII has not responded to ethnic surveys. A further questionnaire will be sent shortly to those who have not responded. This has been publicised in office notices and in the "Prison Service News".

Police (Assaults)

Mr. Flynn: To ask the Secretary of State for the Home Department if he will publish the figures collected by police forces in *(a)* Gwent, *(b)* South Wales and *(c)* North Wales on the frequency of assaults on police in each of the most recent five years available.

Mr. Douglas Hogg: The numbers of assaults on police officers during 1983 to 1987 as published in the annual reports of the chief constables of Gwent and North Wales are as follows:

Assaults on police officers

	1983	*1984*	*1985*	*1986*	*1987*
Gwent	135	130	139	166	195
North Wales	81	60	76	91	207

Statistics of assaults on police officers in South Wales during this period are not available.

Kent Fire Brigade

Mr. Gale: To ask the Secretary of State for the Home Department what information he has on the contributions made by *(a)* Eurotunnel Limited and *(b)* Transmanche Limited to Kent county council for equipment and services provided by Kent fire brigade.

Mr. John Patten: Any arrangements between the county council and the other bodies named in respect of contributions for equipment and services provided by Kent fire brigade are a matter for them to decide. We do not have information about the size of any such contributions. Under the Fire Services Act 1947 the county council is precluded from requiring payment for firefighting services.

Illegal Immigrants

Ms. Ruddock: To ask the Secretary of State for the Home Department if he will set out the criteria used when

considering applications to remain in the United Kingdom from persons who have been continuously in the United Kingdom for at least 10 years and *(a)* who are illegal entrants and *(b)* against whom a deportation order has been issued.

Mr. Renton: Each such case is considered on its own merits.

Risley Remand Centre

Mr. Hoyle: To ask the Secretary of State for the Home Department what disciplinary action has been taken against those staff responsible for the management failure identified in his answer of 21 July, in relation to Risley remand centre.

Mr. Douglas Hogg: Disciplinary action was not called for, but as indicated in my reply of 21 July, at column 775to an earlier question from the hon. Member, suitable steps have been taken to remedy the management failures identified at Risley.

Mr. Hoyle: To ask the Secretary of State for the Home Department what was the Civil Service grade of Mr. David Thompson while he was governor of Risley remand centre; and what is his current grade.

Mr. Douglas Hogg: Mr. David Thompson was a member of prison service unified grade 1 whilst he was governor of HMRC Risley and remains in that grade in his new post.

Mr. Churchill: To ask the Secretary of State for the Home Department how many remand prisoners currently held at Risley remand centre have been held without bail for *(a)* six to eight months, *(b)* nine to 11 months, *(c)* 12 to 14 months, *(d)* 15 to 17 months and *(e)* 18 months or more; what are the comparable figures for the United Kingdom as a whole; and what steps he proposes taking to rectify it.

Mr. Douglas Hogg *[holding answer 19 July 1988]:* The readily available information is given in the following table. Following the experimental introduction of statutory time limits for custody, my right hon. Friend extended them last April to apply to all of Wales and 13 English counties, including Cheshire and Greater Manchester. We hope that custody time limits will be in force throughout England and Wales by 1990. Other measures we are taking are described in the Green Paper "Private Sector Involvement in the Remand System" (Cm. 434, July 1988).

Estimated population of untried and convicted unsentenced prisoners in Prison Department establishments in England and Wales on 30 June 1987;
by length of time since first remand into a Prison Department establishment

Length of time since first remand into Prison Department establishments[2]	*Estimated population*[1] *Risley*[3]	*England and Wales*[3,4]
Up to 6 months	806	9,530
Over 6 up to 9 months	43	800
Over 9 up to 12 months	10	220
Over 12 up to 15 months	2	90
Over 15 up to 18 months	—	20
Over 18 months	—	15
TOTAL[5]	861	[5]10,670

[1] Based on records held centrally which are approximate: detailed checking of individual cases would involve disproportionate cost.
[2] Excludes any time spent in prison cells before reception on remand into a Prison Department establishment; includes any subsequent time that may have been spent on bail.
[3] Provisional figures.
[4] Rounded estimate; the components do not add up to the total because they have been rounded independently.
[5] Excludes 580 prisoners held in police cells.

Leeds Prison

Mr. Fatchett: To ask the Secretary of State for the Home Department if he will list the number of suicides and attempted suicides at Her Majesty's prison, Leeds, in the period August 1987 to June 1988.

Mr. Douglas Hogg: There have been two apparent suicides, yet to be confirmed as such at inquests, and five recorded incidents of attempted suicide at Her Majesty's prison Leeds in the period August 1987 to June 1988.

Mr. Fatchett: To ask the Secretary of State for the Home Department what steps he will take to ensure that procedures for identifying potential suicides can be carried out effectively in Her Majesty's prison, Leeds, as set out in F1996; and if he will make a statement.

Mr. Douglas Hogg: All inmates received at Leeds prison are screened on the day of arrival in order to identify those who may be at risk of suicide.

Mr. Fatchett: To ask the Secretary of State for the Home Department what were the number of prisoners in Her Majesty's prison, Leeds on 19 July; and how many were *(a)* young, *(b)* long term and *(c)* remand prisoners.

Mr. Douglas Hogg: On July 19, 1,407 persons were held in Her Majesty's prison, Leeds. The latest available information on the type of prisoner held is given in the following table:

Population of Her Majesty's prison, Leeds, on 30 June 1988

	Number
Remand	
aged 21 and over	461
aged under 21	276
all remand	737
Sentenced	
Young offenders sentenced to	
Up to 3 years	42
Over 3 years	6
Adults sentenced to	
Up to 4 years	412
Over 4 years	166
All sentenced	626
Civil prisoners	4
All	1,367

Prisoners (Psychiatric Treatment)

Mr. Grocott: To ask the Secretary of State for the Home Department what proportion of the prison population received psychiatric treatment in each of the last five years.

Mr. Douglas Hogg: The number of inmates who have received psychiatric treatment is not recorded centrally.

Amusement Machines

Mr. Gorst: To ask the Secretary of State for the Home Department what conclusion he has reached on research into the use by young people of amusement-with-prizes machines; what action he now proposes; and if he will make a statement.

Mr. John Patten We have now considered the report of the Home Office research and planning unit (RPU) on the research which my right hon. Friend announced in answer to a question from Mr. Geoff Lawler, the then Member for Bradford, North, on 6 May last year, at column *436*. We have also considered the report which the chairman of the Gaming Board arranged at the request of my right hon. Friend. That report has been prepared by inspectors of the board on their findings following a number of visits to amusement arcades. In addition, the Department has been greatly assisted by reports and other comments which the interested organisations have submitted.

Copies of the reports of the RPU and the Gaming Board inspectorate have today been placed in the Library. The RPU report concludes that, although many young people spend money on amusement machines, there is almost no evidence of dependency, and that there is no reliable evidence at all of a causal link between playing machines and delinquency. The overall findings of the Gaming Board inspectorate, though inevitably more tentative because of the nature of their survey, are consistent with the RPU report.

The Government recognise the concern felt about cases where dependency, though most exceptional, does occur. We also recognise the concern felt about the effect on amenities of the presence of amusement machines, mainly in arcades but also in other premises. We have concluded in the light of the research that further legislative controls are not justified. There is, however, a need to consider how best to warn young people of the potential hazards of excessive use of amusement machines and to provide help to those at risk. We should also seek ways in which parents of any children running into serious trouble might be helped.

The Government therefore propose to take the following steps:

To enter into consultation at once with all the interested organisations and other bodies on how we can best deal with the few cases of genuine dependency.

To pursue with the British Amusement Catering Trades Association and others the possibility of guidance which might be prominently displayed near the entrance to all arcades and possibly other premises with machines.

To consult the local authority associations about the contribution which the education and youth services may make.

With a view to making fuller use of the existing powers to protect amenity interests we shall seek comments from the local authority and trade associations on draft model bye-laws controlling, among other things, the opening hours of amusement arcades; and we will remind local authorities of the considerable powers available to ban amusement-with-prizes machines in premises other than amusement arcades, such as fish-and-chips shops.

Haverigg and Lindholme Prisons

Mr. Summerson: To ask the Secretary of State for the Home Department whether he has received any report on the disturbances at Her Majesty's prison, Haverigg and Her Majesty's prison, Lindholme; and if he will make a statement.

Mr. Hurd: I have today received a report of the inquiries conducted by Mr. Gordon Lakes CB MC, the deputy director general of the prison service, into the serious disturbances at HMP Haverigg on 5-6 June 1988 and at HMP Lindholme on 15-16 July 1988.

Mr. Lakes has examined the circumstances and analysed the issues arising from both incidents and finds that there are no simple explanations for what occurred. In both cases small numbers of determined troublemakers were able to exploit opportunities to create serious unrest and cause damage to property.

At Haverigg 12 members of staff sustained minor injuries and three prisoners were injured, none seriously. At Lindholme no violence was directed at the staff and none was injured but 18 prisoners reported minor injuries.

Mr. Lakes has made a large number of detailed recommendations for remedial action at both establishments including local operational improvements, enhanced contingency plans and revised security procedures. He has also identified a number of wider issues which require further review including physical aids to internal control in converted camps, refined allocation procedures and improved monitoring of prisoner populations.

The prison service has already acted upon a number of the recommendations and I shall ensure that all lessons to be learnt are promulgated through line management channels without delay.

I will place a summary of the results of these inquiries in the Library in due course.

Asylum

Mr. Janman: To ask the Secretary of State for the Home Department what is his policy on the granting of settlement to asylum seekers who are given exceptional leave to remain in the United Kingdom and on the admission of their families; and if he will make a statement.

Mr. Hurd: Policy in this area has recently been reviewed. In many cases settlement will not be at issue since those granted exceptional leave will return to their own countries when circumstances allow. In the remainder a person given exceptional leave will normally be granted settlement on application after seven years' residence in the United Kingdom, subject to the general provisions of paragraphs 97 to 100 of the immigration rules. In certain circumstances settlement may be granted earlier than, or withheld after, seven years. Exceptional leave will normally be granted in stages of one year, three years and three years, although this pattern may also be varied. Applications from the spouse and minor children of a person on exceptional leave to join him or her will usually be granted after four years, subject to the general requirements of the immigration rules on the admission of spouses and dependants. An application for family reunion may be granted at an earlier point if there are compelling compassionate circumstances.

Turkish President (Visit)

Mr. Corbyn: To ask the Secretary of State for the Home Department if he will call for a report from the Commissioner of Police of the Metropolis on the arrival of

General Evren on 12 July giving (i) the total cost of policing the event, (ii) the number of officers involved and (iii) the number of persons arrested or held by the police.

Mr. Douglas Hogg *[holding answer 18 July 1988]:* I understand from the Commissioner of Police of the Metropolis that the additional costs of policing the arrival of General Evren amounted to about £25,000; 1,981 police officers were assigned to duties in connection with the event, and 10 arrests were made.

Animals (Experiments)

Mr. Andrew Smith: To ask the Secretary of State for the Home Department if he will list the benefits, either for humans or animals, which have come about as a direct result of Professor Ian Steele-Russell's brain damage experiments on rats, rabbits and monkeys over the last 25 years.

Mr. Douglas Hogg *[holding answer 24 March 1988]:* I wrote to the hon. Member on 26 July. A copy of the letter has been placed in the Library.

WALES

Child Care

Ms. Richardson: To ask the Secretary of State for Wales what action he is taking to implement the recommendations within his area of responsibility of the European Commission's childcare network report "Caring for Children—Services and policies for Childcare and Equal Opportunities in the United Kingdom."

Mr. Grist: The conclusions and recommendations of this report cover a wide range of issues in the areas of child care, equal opportunities education and training, employment, taxation and public expenditure, some of which go beyond the Department's responsibilities. Officials will be studying the report and considering its implications.

Ports (Employment)

Mr. Ieuan Wyn Jones: To ask the Secretary of State for Wales how many people were employed in ports, and in associated employment, in Wales in *(a)* 1958, *(b)* 1968, *(c)* 1978 and *(d)* 1988.

Mr. Peter Walker: Data for Wales are not held in the format requested but the following information is available.

1968 Standard Industrial Classification—1978

	Number
Sea transport	2,994
Port and inland water transport	4,242
Miscellaneous transport services (includes other forms of transport)	3,959

1980 Standard Industrial Classification—1984

	Number
Sea transport	896
Supporting services: sea transport	2,976

Source: Census of Employment.

RNAD Milford Haven

Mr. Nicholas Bennett: To ask the Secretary of State for Wales what assessment he has made of the implications for the Welsh economy of the proposed closure of Milford Haven royal naval arms depot; and if he will make a statement.

Mr. Peter Walker: As the hon. Gentleman knows, the Ministry of Defence has released its consultative document which proposes the closure of RNAD Milford Haven. My right hon. Friend, the Secretary of State for Defence will, however, consider all representations received from the work force, trades unions, local authorities and other interested parties before a final decision is taken. I am, of course, aware of the impact which closure of the depot would have on the area and if a decision is taken to close RNAD Milford Haven my Department will be discussing the future of the site with the Ministry of Defence and the public authorities concerned.

Chernobyl Fallout (Cancer Deaths)

Mr. Flynn To ask the Secretary of State for Wales, pursuant to the answer of 25 July to the hon. Member for Newport, West, if he will provide details of the form in which statistics for the calculation of future cancer deaths from Chernobyl fallout in Wales are available.

Mr. Grist: I shall write to the hon. Gentleman and place a copy of my letter in the Library of the House.

Historic Buildings

Mr. Wigley: To ask the Secretary of State for Wales if he will publish a table showing *(a)* the number and *(b)* the corresponding cost of historic buildings purchased by his Department, or by CADW, in order to preserve them and safeguard them in each year since 1979.

Mr. Wyn Roberts: No historic buildings have been purchased on behalf of the Secretary of State for Wales since 1979. But, the following ancient monuments have been acquired for the purpose of their preservation in that period:

Monument	*Date acquired*	*Purchase price* £
Natatio Site, Caerleon	2 October 1981	2,000
Haverfordwest Priory	31 January 1982	Gift
Penyrwrlodd Long Cairn	7 December 1982	2,000
Caerwent (Basilica, Forum and Amphitheatre site)	15 March 1984	44,000
Segontium, Cae Mawr	30 July 1984	8,500
Caerwent Wall (part)	9 April 1987	4,000

In addition, the following ancient monuments have been taken into the guardianship of the Secretary of State, while remaining in other ownership since 1979:

Monument	*Date taken into guardianship*
Careg Coetan Burial Chamber	30 September 1981
Caer Gybi Roman Wall	27 April 1982
Carswell Old House	31 December 1982

Homeless People

Mr. Wigley: To ask the Secretary of State for Wales what is his latest estimate of the number of people who are homeless in Wales as a result of mortgage default.

Mr. Grist: Current information on the number of homeless persons is not held centrally. However, during 1987 2,833 persons were accepted as homeless by local authorities due to mortgage default.

Migration

Mr. Ieuan Wyn Jones: To ask the Secretary of State for Wales what was the rate of inward and outward migration in each district authority area in Wales during 1987-88.

Mr. Grist: Information at a county district level is not available. However, movements as recorded by the registration of patients with NHS doctors in different family practitioner committee areas, which correspond in Wales to the administrative counties, are given in the following table:

Rate[1] of movement between each FPC and the rest of the United Kingdom year ended December 1987

	Inward	*Outward*
Clwyd	34	27
Dyfed	38	29
Gwent	21	21
Gwynedd	41	33
Mid Glamorgan	18	21
Powys	51	36
South Glamorgan	39	34
West Glamorgan	21	22

[1] Rate is the number of movements recorded per 1,000 population resident mid 1987. Movements within each FPC area are not included.

Source: NHSCR and Office of Population Censuses and Surveys.

Sewage Works

Ms. Walley: To ask the Secretary of State for Wales if he will list for each year since 1974 the percentage of Welsh water authority sewage treatment works that have failed to meet their effluent discharge standards.

Mr. Grist: The figures for the most recent years are as follows:

Year	*Percentage failure*
1985-86	19
1986-87	18
1987-88	17

Prior to this the annual performance measurement specified in consents differed and comparable figures are therefore not available.

Ms. Walley: To ask the Secretary of State for the Home Department if he will list the names of those Welsh water authority sewage treatment works that failed to meet their effluent discharge standards in 1987, the measures that are proposed for each of these works to bring them up to standard, and the year by which it is anticipated they will have been brought up to standard.

Mr. Grist: The works concerned are listed in the table. The Welsh water authority has a rolling programme covering improvements to works. This programme is kept under continual review by the Department.

Press Releases

Mr. Flynn: To ask the Secretary of State for Wales how many press releases have been issued by his Department in the 12 months beginning in July 1987 and in each of the previous five years.

Mr. Peter Walker: The number of Welsh Office press releases issued by my Department in the 12 months beginning in July 1987 and in each of the previous five years was:

	Number
July 1987-June 1988	904
July 1986-June 1987	759
July 1985-June 1986	720
July 1984-June 1985	618
July 1983-June 1984	549
July 1982-June 1983	489

Departmental Programmes

Mr. George: To ask the Secretary of State for Wales how much has been spent by his Department in each of the past five years on the evaluation of departmental programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mr. Peter Walker: All programmes for which I am responsible are evaluated, but the costs of evaluation are not separately identified.

Eye Malformations

Mr. Gwilym Jones: To ask the Secretary of State for Wales if he will make a statement about the study that has been carried out by the steering committee of the small area health statistics unit in relation to eye malformations in Torfaen.

Mr. Grist: Following receipt of detailed proposals for the conduct of such a study the views of the steering committee were invited. Their advice has recently been received. After careful consideration the steering committee concluded that this matter should not be subject to further examination by the unit. In reaching this view the steering committee took account of intrinsic difficulties in obtaining reliable data and on the absence of any evidence associating eye malformations with incinerator emissions. In the light of that and of the overall results of the valuable and substantial researches that Professor Laurence has carried out in the past for the Department, on congenital malformations in Torfaen, we have taken the view that investment in such a further study is not justified at this time.

However, the Department routinely monitor a variety of data on human health problems including the incidence of congenital malformations. If this monitoring suggests that there are grounds for proceeding with a study at any stage that we shall ensure that appropriate measures are put in hand to determine what further investigations might be useful.

Cancer (North Wales)

Sir Anthony Meyer: To ask the Secretary of State for Wales if Professor Hubert Campbell has not completed his investigation of the data relating to the incidence of cancer on the north Wales coast for the period 1974 to 1983; and if he will make a statement.

Mr. Grist: Professor Campbell has provided an analysis of the results of his investigation. He makes it clear that in his view there is nothing new in the reported incidence of cancers in north Wales; he notes that the high incidence has been known for at least 70 years.

As a result of his examination of the data for all cancer registrations, covering the period 1974-83 Professor Campbell finds there was an excess of 5 per cent. in cancer registrations over the whole period on the north Wales coast when compared with the whole of Wales. The greater part of these registrations were in women and the sites involved were the lung, colon, rectum, stomach, breast and uterus. Professor Campbell considers that this pattern is the same as that which was known to affect north Wales many years ago; it is his view that it would be impossible to identify an actiological agent.

Professor Campbell gave special attention to the data relating to thyroid cancers and leukaemias. It appears that there were 28 more cases than would be expected by reference to the whole of Wales of thyroid cancer amongst women of the age of 25 years and over, resident in Clwyd in the five years from 1974-78. Professor Campbell considers that this is something which should be investigated. As far as leukaemias are concerned Professor Campbell identifies 65 more cases than would be expected by reference to the whole of Wales over the period 1974-83 on the north Wales coast. He indicated that these cases were confined to people over the age of 65. He considers a number of hypotheses to explain this. Save in two cases, which might be amenable to long-term research, he identifies no grounds for action. It is however, Professor Campbell's view that the most likely explanation for the raised incidence of leukaemias, might be found in the diagnostic practice amongst clinicians in north Wales. He recommends that this hypothesis be examined. Secondly Professor Campbell considers that a study of genetic factors might also be worthy of further long-term research.

I am very grateful to Professor Campbell for the work he has done and I shall be asking the steering committee for the small areas health statistics unit, under whose auspices Professor Campbell's investigation was undertaken, for its advice on what further work should now be commissioned in the light of Professor Campbell's analysis and recommendations, and specifically in relation to the three studies he suggests.

I shall place a copy of the report of Professor Campbell's work in the Library of the House.

Public Expenditure

Mr. Worthington: To ask the Secretary of State for Wales if he will publish a table in the *Official Report*, in the same format as the written reply of 7 July, *Official Report*, columns *687-81*, on receipts classified as charges in respect of his programme expenditure over the years 1982-83 to 1990-91, indicating the receipts in respect of running costs expenditure together with a supplementary analysis indicating, separately, the amounts of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mr. Peter Walker The information is estimated to be as follows:

£ million

	1982-83	*1983-84*	*1984-85*	*1985-86*	*1986-87*	*1987-88*	*1988-89*	*1989-90*	*1990-91*
Receipts in respect of Departmental Running Costs[1]	−0·6	−0·7	−1·1	−1·0	−1·2	−0·9	−0·9	−1·0	−1·0
Receipts met from other expenditure programmes[2]									

	1982-83	1983-84	1984-85	1985-86	1986-87	1987-88	1988-89	1989-90	1990-91
(i) Programme expenditure (mainly EC receipts)	−29·0	−36·0	−32·9	−39·3	−59·9	−70·3	−51·0	−53·6	−56·1
(ii) Departmental Running Costs	−0·4	−0·6	−0·7	−0·7	−0·9	−0·7	−0·7	−0·8	−0·9

[1] Including refunds of VAT.
[2] Excluding refunds of VAT and including receipts from the National Insurance Fund in respect of the Medical Reference Service.

House Sales

Mr. Michael: To ask the Secretary of State for Wales what consideration he has given to the likely benefits to Welsh people that might follow the introduction to England and Wales, in whole or in part, of the Scottish system of governing house sales; what discussions he has had on this possibility; and if he will make a statement.

Mr. Grist *[holding answer 26 July 1988]:* I have not considered or discussed such a possibility; reform of the legal system, which is common to England and Wales, is primarily a matter for my right hon. noble and Learned Friend the Lord Chancellor.

Valleys Programme

Mr. Ron Davies: To ask the Secretary of State for Wales if he will list those indicators which led him to conclude that Caerphilly should be included within the boundaries of the area benefiting from the valleys programme, but that Bedwas and Machen should be excluded.

Mr. Peter Walker *[holding answer 26 July 1988]:* I refer the hon. Gentleman to the replies I gave him on 21 June and 19 July.

Slurry Tank, Ciliau Moor Common

Mr. Ron Davies: To ask the Secretary of State for Wales by what authority he gave retrospective consent to the siting of a slurry tank on Ciliau moor common.

Mr. Grist *[holding answer 21 July 1988]:* In deciding whether to give my consent under section 23 of the National Trust Act 1971 to the siting of a slurry tank on Ciliau moor common I was not prevented from giving consent despite the fact that the works had commenced.

Mr. Ron Davies: To ask the Secretary of State for Wales whether work on the construction of a slurry tank on Ciliau moor common progressed during the time in which planning consent was being sought.

Mr. Grist *[holding answer 21 July 1988]:* No planning consent was sought. I am informed by the local authority that no specific permission is required because permission is deemed to have been given under class 6 of the General Development Order 1977. I am unable to say whether work was in progress during the time I was considering the application under section 23 of the National Trust Act 1971 for consent to the siting of the slurry tank on Ciliau moor common.

CIVIL SERVICE

Ethnic Monitoring

Mr. Janner: To ask the Minister for the Civil Service (1) whether he will now institute an ethnic monitoring procedure through to the appointment stage, in accordance with the code of the Commission for Racial Equality, in respect of all the schemes for recruitment run by the Civil Service Commission;

(2) whether he has instituted an ethnic monitoring procedure within the Civil Service Commission, in accordance with the code of the Commission for Racial Equality;

(3) whether he will now institute ethnic monitoring procedure in accordance with the code for racial equality so that he may in future be able to give the numbers and percentages of ethnic minorities among permanent appointments to the Civil Service at grade 7 level or above.

Mr. Luce: The Commission for Racial Equality's code of practice recommends that employers should regularly monitor the effects of selection decisions in order to assess whether equal opportunity is being achieved. The code recognises that the need for detailed information and the methods of collecting it will vary according to circumstances.

The Civil Service Commission currently monitors through to the appointment stage all its major schemes of recruitment. In specialist areas, where recruitment schemes frequently attract small, sometimes very small, applicant fields, the commission has adopted a more selective procedure. It has used the results of comprehensive monitoring of applications to identify those schemes where there are sufficient applicants of known ethnic origin, and within that sufficient ethnic minority applicants, for monitoring through to appointment to produce useful results. The results of the first year's monitoring were set out in the Civil Service Commissioners' annual report for 1987.

The results of monitoring are being used to help the commissioners set priorities for improving equality of opportunity in recruitment. The commissioners are currently considering to what extent, within available resources and consistent with their priorities for further action, they can extend monitoring through to appointment. I shall write to the hon. and learned Member once they have completed their consideration.

Mr. Janner: To ask the Minister for the Civil Service which quasi-governmental or other organisations which come under the aegis of the Cabinet Office and of the Office of the Minister for the Civil Service, respectively, have instituted procedures for ethnic monitoring, in accordance with the code for racial equality; and which have not.

Mr. Luce: Two advisory bodies come under the aegis of the Cabinet Office and seven under the OMCS. These advisory bodies do not employ staff on their own account. Their secretariats are provided by the Cabinet Office and are subject to departmental ethnic monitoring procedures.

Mr. Janner: To ask the Minister for the Civil Service in which grades the two people from ethnic minorities specified as grades 1 to 7 in his Department are; and whether either or both of these people are women.

Mr. Luce: The two are a senior medical officer (grade 5 equivalent) and a grade 7 (statistician). They are both male.

Mr. Janner: To ask the Minister for the Civil Service in which grades the people from ethnic minorities specified as employed SEO or HEO in his Department from ethnic minorities are; and whether either or both of these people are women.

Mr. Luce: They are both HEOs, one male and one female.

Mr. Janner: To ask the Minister for the Civil Service in which grades the people from ethnic minorities specified as EO in his Department from ethnic minorities are; and whether either or both of these people are women.

Mr. Luce: The three EOs are two males and one female.

Equal Opportunities

Mr. Janner: To ask the Minister for the Civil Service whether he will now update policy statements on equal opportunities issued in 1984.

Mr. Luce: I see no need to update policy statements at this stage.

Mr. Janner: To ask the Minister for the Civil Service what practical evidence there is in his Department of the increase in awareness at all levels of potential problems of equal opportunity and of the willingness to overcome them resulting from the policy statements issued in 1984.

Mr. Luce: By the increased understanding shown by staff at all levels when these matters are raised and discussed and the more ready acceptance of adaptations to working practices such as part-time working.

Mr. Janner: To ask the Minister for the Civil Service by what methods his Department is constantly looking for ways to develop and improve its equal opportunities programme.

Mr. Luce: By reference to examples of best practice and other published information, by attendance at seminars involving both public and private sector organisations, and by discussion and consultations within the Department.

Mr. Janner: To ask the Minister for the Civil Service who is carrying out current initiatives to develop and improve his Department's equal opportunities programme in connection with alternative working patterns and recruitment reviews, respectively.

Mr. Luce: The Cabinet Office personnel services branches.

Departmental Monitoring Exercises

Mr. Janner: To ask the Minister for the Civil Service what study his Department is making of the results of the monitoring exercises of recruitment, promotion and training; and whether he will place copies of the results of those exercises in the Library.

Mr. Luce: My Department is studying the results of the monitoring exercises in order to assess whether equal opportunity is being achieved. I will consider whether to place the results of the exercises in the Library.

THE ARTS

Admissions

Mr. Butler: To ask the Minister for the Arts what information he has on total admissions to arts events and institutions in the latest available year.

Mr. Luce: For the performing arts, the Policy Studies Institute's research publication "The Economic Importance of the Arts in Britain" provides an estimate of some 49 million attendances at theatres and concerts in 1984-85. Information held on the Museums Association database suggests that some 73 million visits were made to museums and galleries in 1986.

Employment

Mr. Butler: To ask the Minister for the Arts what information he has on direct employment in the arts sector of the economy in the latest available year.

Mr. Luce: Figures published this year by the Policy Studies Institute suggest that some 189,000 people were directly employed in the arts in 1986. There were also considerable numbers who were in employment ancillary to the arts, or self-employed on arts work.

Horniman and Geffrye Museums

Mr. Bowis: To ask the Minister for the Arts if he will make a statement on his negotiations with the Horniman and Geffrye museums on their future funding and constitutions.

Mr. Luce: The Government have announced that the Horniman and the Geffrye museums will be established as independent charitable trusts able to take full advantage of all sources of funding and with an assurance of Government support following the abolition of the inner London education authority. Discussions on future arrangements for the museums are under way.

Sponsorship

Mr. Bowis: To ask the Minister for the Arts what information he has on the amount of sponsorship of the arts provided by *(a)* private sector firms, *(b)* public sector organisations other than local authorities, *(c)* local authorities, *(d)* trade unions and *(e)* private individuals.

Mr. Luce: Private sector firms currently contribute some £30 million annually by way of sponsorship. The most recent figure available for local authority spending on arts, museums and galleries is £202·2 million, in 1983-84. Information is not held centrally on sponsorship by public sector organisations (other than local authorities); by trades unions; or by private individuals.

Museum Education Service

Mr. Bowis: To ask the Minister for the Arts if he will make a statement on the future of the museum education service in London following the abolition of the Inner London education authority.

Mr. Luce: On the abolition of the Inner London education authority, each inner London borough will become responsible for the education service in its area.

Boroughs, individually and jointly, are discussing with the ILEA and the Department of Education and Science a number of areas where cross-borough provision may continue to be appropriate.

Scottish Arts Council (Funding)

Mr. Robert Hughes: To ask the Minister for the Arts if he will list separately in the *Official Report*, the total funding by the Scottish Arts Council to local authorities, and groups operating from within the boundaries of local authorities in Aberdeen, Glasgow, Edinburgh and Dundee, in each of the last 10 years.

Mr. Luce: I shall write to the hon. Member and place a copy of the letter in the Library.

Books (VAT)

Mr. Bowis: To ask the Minister for the Arts if he will give the latest estimates of the cost to national and local libraries of value-added tax on books at the current standard rate.

Mr. Luce: The British Library and local authority libraries in England are the only libraries for which I have responsibility. If books were subject to value added tax at the current standard rate, the approximate annual cost to the British Library based on current expenditure would be £550,000. There would be no cost to public libraries because, under present arrangements, local authorities are able to reclaim value added tax incurred in respect of their library activities.

Radical Scotland

Mr. Allan Stewart: To ask the Minister for the Arts if he will set out the criteria under which the Scottish Arts Council disburses grants; and how these criteria have been applied in the case of grants to Radical Scotland.

Mr. Luce *[holding answer 21 July 1988]:* The two main criteria which the Scottish Arts Council uses in the assessment of an arts body are the artistic quality of its work and the efficiency of its management. The council satisfies itself that these criteria are met by all arts organisations to whom a grant is made. I am drawing my hon. Friend's concern about Radical Scotland to the attention of the chairman of the Scottish Arts Council.

Mr. Allan Stewart: To ask the Minister for the Arts what is the current level of grant from the Scottish Arts Council to Radical Scotland.

Mr. Luce *[holding answer 21 July 1988]:* The current Scottish Arts Council grant to Radical Scotland is £900 for the literary content of six issues of the publication.

Scottish Arts Council

Mr. Allan Stewart: To ask the Minister for the Arts what guidance he has issued to the Scottish Arts Council on the criteria under which they disburse grants to magazines and similar publications; and if he will make a statement.

Mr. Luce *[holding answer 21 July 1988]:* I do not issue any guidance. The Scottish Arts Council and the Arts Council of Great Britain have similar criteria for grant allocation.

ENVIRONMENT

Licensed Premises

Sir John Farr: To ask the Secretary of State for the Environment if he will consider issuing guidance to planning committees faced with applications to change licensed premises into a private residence.

Mr. Chope: No. Local planning authorities should be able to decide such proposals, on the planning merits of the particular case, in the usual way against the background of the relevant planning policies.

Sports Facilities (Safety)

Ms. Armstrong: To ask the Secretary of State for the Environment what plans his Department has to ensure that adequate safety standards are maintained in any changes in management in sports and leisure centres, arising from the recent statement.

Mr. Moynihan: Under the Government's proposals to bring compulsory competitive tendering to the management of local authority sport and leisure facilities, local authorities would be responsible for drawing up the tender specifications setting out, amongst other things, what safety requirements must be met. Moreover, the Health and Safety at Work etc., Act 1974 already imposes a general duty to take reasonable measures with respect to health and safety on those who are, to any extent, in control of non-domestic premises, which include public sports and leisure facilities. This general duty is enforceable by the Health and Safety Executive and would continue to apply regardless of whether a facility was managed by a local authority's own employees or by a contractor. With regard to the safety of spectators at sports facilities, the requirement of the Safety of Sports Grounds Act 1975 and the Fire Safety and Safety at Places of Sport Act 1987 would not be affected by the competitive tendering proposals.

British Coal Properties (Sales)

Mr. Lofthouse: To ask the Secretary of State for the Environment what public subsidy was made available for the purchase of former British Coal properties by housing associations or local authorities; and what steps have been taken to monitor the identities of the purchasers of these properties.

Mr. Trippier Earlier this year, £1·25 million was paid by the Housing Corporation to a consortium of registered housing associations purchasing British Coal properties in Nottinghamshire. No specific Exchequer subsidy has been made available for similar purchases by local authorities. The identity of those to whom properties are sold is a matter for British Coal, but under the Landlord and Tenant Act 1985, all tenants have the right to know who their landlord is.

Water Charges

Mr. Redmond: To ask the Secretary of State for the Environment if he will make a statement on his proposals for the regulation of water charges.

Mr. Moynihan: The arrangements for the regulation of charges are described in a policy letter dated 3 March 1988 (reference WRP1), copies of which have been placed in the Library.

District Councils (Rate Support Grant)

Mr. Redwood: To ask the Secretary of State for the Environment if he will list all district councils in England and Wales which will receive no rate support grant in respect of the 1988-89 financial year.

Mrs. Virginia Bottomley: All district councils will receive domestic rate relief grant. The following English district councils are not expected to receive any block grant on the basis of the most recent estimate made under section 66(1) of the Local Government, Planning and Land Act 1980:

South Bedfordshire
Wokingham
South Buckinghamshire
Chiltern
Milton Keynes
Wycombe
Basildon
Harlow
Thurrock
Hart
Redditch
St. Albans
Stevenage
Three Rivers
Welwyn Hatfield
Selby
Bassetlaw
Oxford
Epsom and Ewell
Guildford
Reigate and Banstead
North Warwickshire
Crawley

The position in Wales is a matter for my right hon. Friend the Secretary of State for Wales.

Ivory Imports

Mr. Tony Banks: To ask the Secretary of State for the Environment if he will make it his policy to introduce a total ban on the import of all worked ivory into the United Kingdom.

Mrs. Virginia Bottomley: A total ban on the import of all worked ivory would be a matter for discussion with our EC partners. Import is strictly controlled under EC regulation 3626, which implements the convention on international trade in endangered species in the Community.

Local Authority Direct Labour Organisations

Mr. Heathcoat-Amory: To ask the Secretary of State for the Environment what plans he has to review the competition rules for local authority direct labour organisations' building and maintenance work.

Mrs. Virginia Bottomley: My right hon. Friend has today published a consultation paper proposing that all building and maintenance work other than highways and sewerage work should be subject to competition from next April, and that the present exemption for direct labour organisations with not more than 30 employees should be reduced to five employees. The present regulations, made under part III of the Local Government, Planning and Land Act 1980, have been in force since 1983 and the Government feel that there is no longer a case for any competition-free allowance for this work. Some authorities already expose all their maintenance and minor construction work to competition. We estimate that an extra £400 million of work would be exposed to compulsory competition each year. A 30-employee de minimis threshold no longer seems justified. This could allow an authority to carry out work worth £600,000 a year without competition.

Copies of the paper are being distributed widely, including to all local authorities, and have been placed in the Library.

Rates

Mr. Blunkett: To ask the Secretary of State for the Environment what are the average rate bills for 1988-89 for each of the following categories *(a)* all households whose head is on income support, *(b)* all households whose head is aged 25 or more and on income support and *(c)* all households whose head is aged less than 25 and on income support for each region of England and Wales and for Scotland.

Mrs. Virginia Bottomley: The information requested is not available.

Council House Sales

Mr. Amess: To ask the Secretary of State for the Environment if he has any plans to review the implementation by local authorities of the right-to-buy provisions of the Housing Act 1980; and if he will make a statement.

Mr. Trippier: The Department keeps a close watch on complaints from tenants experiencing difficulty or delay in exercising the right to buy. Eleven local authorities where there have been serious shortcomings are required to report monthly on their performance.

Richmond Yard

Mr. Hoyle: To ask the Secretary of State for the Environment, pursuant to his answer of 21 July, what is the precise nature of the internal management purposes to which he refers in relation to the Property Services Agency's valuation of Richmond yard.

Mr. Chope: Planning and managing the disposition of in-house resources.

Arts Organisations (Rate Revenue)

Mr. Bowis: To ask the Secretary of State for the Environment what has been the revenue from arts organisations to local government rates for each of the past 10 years.

Mrs. Virginia Bottomley: Based on rateable values for libraries, museums, art galleries etc. and theatres and music halls in England gross rate yields from these organisations are estimated as follows:

	£ million
1979-80	10
1980-81	12
1981-82	16

	£ million
1982-83	18
1983-84	19
1984-85	21
1985-86	23
1986-87	26
1987-88	27
1988-89	29

Local authorities have the power to reduce or remit the payment of rates chargeable in respect of organisations whose main objects are concerned with education, social welfare, science, literature or the fine arts. The amount actually paid in rates by these organisations may therefore be less than the figures quoted.

Ordnance Survey

Mr. Worthington: To ask the Secretary of State for the Environment if he will publish in the *Official Report* a reconciliation of *(a)* the turnover of the Ordnance Survey in 1986-87 as shown by note 2 to its trading accounts (HC 380 of 1987-88) with *(b)* the analysis of receipts in the 1986-87 Appropriation Accounts for class XX, vote II (HC 107-XII of 1987-88).

Mr. Moynihan: The information requested is as follows:

	£'000s	£'000s
Trading accounts turnover		31,199
Add VAT	2,135	
Non trading receipts	421	
		2,556
Less increase in debtors	44	
Decrease in copyright in advance	3	
		47
Appropriation account receipts		33,708

Turnover is explained in note 1(h) to the 1986-87 trading accounts and is exclusive of VAT.

Appropriation of account receipts are sums actually received by the Department. It is therefore necessary in reconciling the turnover and receipts to allow for movements in debtors and copyright in advance.

Trees

Mr. Baldry: To ask the Secretary of State for the Environment what further assistance he will provide to promote the replacement planting of amenity trees lost in the storm of 15-16 October 1987.

Mr. Amess: To ask the Secretary of State for the Environment how many trees were planted in each month since September 1987.

Mrs. Virginia Bottomley: We estimate that £1·4 million was spent on aiding the planting of approximately 500,000 amenity trees under the initial task force trees programme (including site preparation and certain other costs) and a similar sum on grant-aiding tree surgery to some 30,000 trees. Other amenity planting took place in this period under the existing programme of aid administered by the Countryside Commission, and planting in woodlands where it was grant aided, or undertaken directly, by the Forestry Commission.

Complete figures are not available, and it is not possible to give a breakdown by month. However, much planting has also been undertaken by private individuals, voluntary bodies and local authorities at their own expense.

Mr. Amess: To ask the Secretary of State for the Environment if he will make a further statement on the progress of measures his Department has taken to replace trees destroyed in the October 1987 hurricane.

Mrs. Virginia Bottomley: The Government have already made substantial sums available for the replacement planting of amenity trees, both in rural and in urban areas, through a special unit of the Countryside Commission, task force trees. In 1987-88 £3 million was allocated for this purpose and in January my noble Friend the Minister of State announced that a further £800,000 would be provided for the current financial year to supplement the commission's regular programme of assistance for planting.

At that time, my noble Friend also said that the Government would make a further statement of their intentions in good time for the start of the next planting season. Accordingly, following detailed discussions with the Countryside Commission, we have decided to make available to task force trees an additional allocation of £2·5 million to implement the next phase of restoration. Of this, £200,000 is to be spent in the current financial year and the remainder in 1989-90.

We see this additional aid as part of a longer-term programme of restoration, of which further details will be announced in due course.

The Government are conscious of the damage caused by the storm to historic parks and gardens, and both English Heritage and task force trees are providing appropriate assistance. For 1989-90, in addition to the further resources for task force trees, we shall be making available £500,000 to English Heritage to enable it to continue its programme of grant assistance for the clearance and replanting of parks and gardens of outstanding architectural or historic interest.

Housing Association Hostels

Mrs. Gorman: To ask the Secretary of State for the Environment when he expects to announce his proposals for the future funding of housing association hostels.

Mr. Trippier: My Department has published today a consultation paper on the future funding of housing association hostels and special needs projects. Comments from all interested organisations and individuals will be welcome by 30 September.

Planning Enforcement

Mr. Baldry: To ask the Secretary of State for the Environment what are the arrangements for the review of planning enforcement powers which he announced recently.

Mr. Ridley: I am pleased to announce that Mr. Robert Carnwath QC has agreed to prepare a report for me on this subject. His terms of reference are:—

"To examine the scope and effectiveness of provisions, in Part V and XII of the Town and Country Planning Act 1971, relating to enforcement of planning control, including appeals to the Secretary of State, and to make recommendations for improvements to the present provisions or for alternative provisions."

I have asked that the report be completed by early in 1989.

Mr. Carnwath will be seeking views from representative bodies on the matters included in the terms of reference. Anyone wishing to offer such views should do so in writing to Planning and Development Control Division 2, Tollgate house, Houlton street, Bristol BS2 9DJ.

Crown Suppliers

Mr. Page: To ask the Secretary of State for the Environment if he will make a statement about the privatisation of the Crown Suppliers.

Mr. Chope: I announced on 3 February the Government's intention to sell those of the Crown Suppliers' businesses which can be undertaken on a normal commercial basis. Such businesses can be carried out more efficiently in the private sector and should provide an improved source of competitive supplies for the public sector. I have excluded from the package for sale only those of TCS activities which are not run on commercial lines; which raise questions of security; or which, because of the very specialised nature of the business, exceptionally provide better value for money within the public sector.

The package for sale will therefore include the Crown Suppliers' businesses of selling furniture, furnishings, floor coverings, domestic appliances, electrical, mechanical and laboratory equipment, building materials and vehicles, together with its associated repair, design and technical services. It will also include the transport hire business and the interdepartmental dispatch service between Government Departments. All these are businesses which are commonly carried out by private firms with which I hope the Crown Suppliers will be able successfully to compete.

For security reasons, I have decided to exclude from the sale the design and procurement of security furniture and equipment and the car service which transports Ministers and senior officials in London.

On value-for-money grounds, the Crown Suppliers' fuel business will not be sold. I accept that the extremely specialised nature of fuel procurement is such that the Crown Suppliers, once privatised, would be unlikely to be able or willing to secure as low prices as it can at present. The business will therefore be retained in Government, and the possibility of establishing it as an executive agency will be examined.

Also on value-for-money grounds, I envisage that the expertise necessary to procure those few highly specialised items of equipment where the Property Services Agency is the only customer and there is a single supplier should be retained in the agency, since in these circumstances there are no additional cost advantages to be gained fron using the Crown Suppliers to find sources of supply or to purchase in bulk for a number of customers.

Finally, the special unit in the Crown Suppliers which provides services to the Palace of Westminster and other royal palaces and civil residences in Whitehall and elsewhere is not presently run on strictly commercial lines; it is not therefore suitable for inclusion in this sale, although I would not wish to rule out contracting out part of the work of the section in due course.

When the Crown Suppliers is sold, staff working on the activities being privatised will be protected by the Transfer of Undertakings (Protection of Employment) Regulations 1981 which, inter alia, provide for the automatic transfer of staff with their jobs to the new employer. Staff in those groups for whom there may be prospects of alternative employment within the Civil Service will be asked whether or not they wish to remain in the Civil Service or stay with the Crown Suppliers. We shall use our best endeavours to meet their wishes where they are consistent with the smooth transfer of functions, but I cannot guarantee that we shall be able to satisfy all preferences.

I shall now be consulting the trade unions on these proposals and working up detailed plans for the sale. A number of efficiency improvements are being made so that the Crown Suppliers will be structured and ready for the challenge of privatisation.

Red List Substances

Mr. Baldry: To ask the Secretary of State for the Environment when he will publish detailed proposals for controlling red list substances in relation to the aquatic environment, first announced last November and outlined to Environment Ministers at the second international conference on the North sea.

Mr. Ridley: The Government have today published a consultation paper setting out its detailed proposals for tightening controls over the input of the most dangerous substances to water—the so-called red list. The consultation paper explains the selection scheme developed by my Department to identify those substances which are thought to pose the greatest threat to our water environment and the system of controls through which it is proposed to minimise the amounts of these substances reaching our inland and coastal waters. The initial red list contained 26 substances selected on the basis of their toxicity, persistence and capacity for bio-accumulation.

Industrial processes discharging significant amounts of red list substances will be prescribed for control by Her Majesty's inspectorate of pollution and will have to satisfy the inspectorate that the process will be operated using best available technology not entailing excessive cost in order to minimise the amounts of these substances discharged. In addition, discharges will continue to have to satisfy environmental quality objectives which water authorities set for the receiving waters.

Where these substances reach water from indirect or diffuse sources, the Government will be asking water authorities to initiate more rigorous environmental monitoring, and will be seeking ways of applying existing controls over their marketing and use more effectively.

These proposals represent a further move in United Kingdom policy towards a more precautionary approach to the protection of the aquatic environment and will constitute a key element in our implementation of the measures agreed by Ministers at last November's second international conference on the North sea. Although these proposals relate primarily to the water environment, they are consistent with the wider policies for integrated pollution control, which are the subject of a separate consultation paper also being published today. The Government also see the proposals as having general implications for the development of European policy on the control of dangerous substances to water. The Government hope to start implementing these proposals on an interim basis during the second half of 1989.

The consultation paper is being sent to the CBI, the Chemical Industries Association, the Water Authorities

Association, representation of various trade organisations and other interested parties. Copies are available from the Vote Office and in the Library.

Pollution Control

Mr. Baldry: To ask the Secretary of State for the Environment what proposals he has for legislation to fulfil the remit given to Her Majesty's inspectorate of pollution in the action plan following the "Scrutiny Report Inspecting Industry: Pollution and Safety" to develop an integrated approach to pollution control.

Mr. Ridley: I have today issued a consultation paper which sets out proposals for a new statutory framework which gives expression to the cross-media approach to pollution control which underlay the creation of HMIP in April 1987. They also reflect the concept of "best practicable environmental option" developed by the Royal Commission on environmental pollution, notably in its fifth and 12th reports. The Government will take account of views expressed during consultations before reaching conclusions on these proposals.

Hazardous Waste

Mr. Baldry: To ask the Secretary of State for the Environment when he will implement the directive on transfrontier shipment of hazardous waste.

Mrs. Virginia Bottomley: It is unfortunately not possible, as we had wished, to apply the transfrontier directive to all special wastes as defined in the Control of Pollution (Special Waste) Regulations 1980. The 1980 regulations control the movement of a wider range of difficult wastes than the minimum required by European law and it appears that there is no basis in United Kingdom law to apply the transfrontier directive other than to that minimum.

I accordingly intend to lay in the next few weeks regulations to implement the transfrontier directive in respect of special wastes containing polychlorinated biphenyls and those substances listed in the annex to directive 78/319 (toxic and dangerous waste), except organic and chlorinated solvents which are specifically excluded from the transfrontier directive. This will implement the transfrontier directive in full. Details of the revised basis of implementation are being sent to local authority associations, industry and other interested parties.

Imports of other special wastes will continue to be subject to the special waste regulations but I am investigating the possibility of further measures under United Kingdom law to tighten the controls applicable to such imports.

East London River Crossing

Mr. Colvin: To ask the Secretary of State for the Environment when he intends to announce his decision on the planning application for the line of the road and the east London river crossing; and if he will make a statement on its relationship with the London City airport.

Mr. Channon: I have been asked to reply.

I am pleased to announce that, in conjunction with my right hon. Friend the Secretary of State for the Environment, I have decided that the A406 east London river crossing will be built with a new bridge across the Thames. This follows our consideration of the report from the inspector who conducted local public inquiries between September 1985 and December 1986.

The inspector recommended that the Department of Transport's scheme, including a new cable-stayed bridge across the Thames, should be built. He rejected alternative tunnel options.

We have decided to defer a decision on the design of the bridge. The inspector considered that a dual three-lane standard would eventually be needed. With the design originally proposed, it would not be possible to provide three full-width lanes. We also accept the inspector's recommendation that the design should incorporate a segregated cycleway. We considered late objections, forwarded to us by the inspector without comment, from Eurocity Express and the Air Transport Users Committee. These objections concerned the height of the towers of the proposed Thames bridge, which would limit options for future use of London City airport.

I am therefore asking the consultants for the scheme to investigate whether there is an alternative design for the bridge which would be practicable, acceptable and within the broad order of costs of the Department's proposed bridge, and which would satisfy the objectives of the scheme, and keep open options for future use of the airport.

The inspector recommended a number of modifications to the Department's proposals. One of these was his proposal to provide about 400 m of cut-and-cover tunnel through part of Oxleas wood and to delete the south-facing slip roads at the Shooters hill interchange. Having carefully weighed the advantages and disadvantages of the inspector's proposal, we are not satisfied that the additional cost of the tunnel and the loss of benefits from deletion of the slip roads are justified. We have decided not to accept this recommendation.

Those parts of the orders relating to the line and most of the side road orders will now be made. The inspector also recommended that the draft compulsory purchase orders should be made, and that the three certificates for exchange land should be granted. We have deferred decisions on these.

Copies of the inspector's report and our decision letter are being placed in the Library.

Homeless People

Mr. Soley: To ask the Secretary of State for the Environment if he is planning to issue any guidance to local authorities concerning the sale of accommodation for homeless people to developers; and if he will make a statement.

Mr. Trippier *[holding answer 27 July 1988]:* Local authorities are well aware of the rules governing sale or disposal of housing land and property. The general consents of 2 June 1981 gave local authorities powers to make certain disposals without reference to this Department; and other disposals require special consent under sections 32 to 34 of the Housing Act 1985. Whether a particular sale of accommodation used for homeless people needs the Secretary of State's consent would depend upon the terms of disposal.

Ordnance Survey (Bristol Railway)

Mr. Redmond: To ask the Secretary of State for the Environment if the railway line omitted from the current Ordnance Survey maps for the Bristol area, but which is visible to travellers on the M5 south of that town, will be included in the next printing; and if he will make a statement.

Mr. Moynihan: The decision to omit such features is made by the owning authority for reasons of security. The need to impose restrictions on published material is regularly reviewed to ensure that detail is not unnecessarily withheld. As a result of a recent review, following the privatisation of the royal ordnance factories, it has been decided that this railway line will be shown on the next edition of the Ordnance Survey maps of the area.

Planning Consents

Mr. Steinberg: To ask the Secretary of State for the Environment what guidance he has issued to local planning authorities regarding the degree of change to the terms of an original consent, or the degree of flexibility in those terms that many allow before requiring a new consent.

Mr. Chope: I take it that the hon. Member is referring to changes to proposals before the grant of full planning permission. My Department's circular 22/80 "Development Control—Policy and Practice" advises local planning authorities that provided that the amendments do not materially change the character of the development proposed, it is sensible and time-saving to allow applicants to amend applications for approval of reserved matters, or small details of full applications for planning permission, thus avoiding the need for a fresh planning application.

Mr. Steinberg: To ask the Secretary of State for the Environment how many planning applications to change a scheme which had already received planning consent were notified in 1987; and what percentage of these were successful *(a)* at local authority level and *(b)* on appeal to the Secretary of State.

Mr. Chope: The information requested is not available centrally.

Mr. Steinberg: To ask the Secretary of State for the Environment what percentage of all planning applications in 1987 were successful *(a)* at local authority level and *(b)* on appeal to him.

Mr. Chope: In 1987, local planning authorities granted permission for 85 per cent. of planning applications decided by them. The number of cases in which permission was granted on appeal to the Secretary of State in 1987 was equivalent to 1·4 per cent. of planning applications decided by local planning authorities in that year.

Tenanted Residential Property (Planning Permission)

Mr. McCartney: To ask the Secretary of State for the Environment what steps he proposes to take to *(a)* prevent applicants for planning permission for works to tenanted residential property from making false statements about their intentions for the future of the tenants and *(b)* provide tenants with rights to safeguard their position during the planning process.

Mr. Chope: A grant of planning permission cannot remove the legal rights of any tenant of the land to which the permission relates, nor is protection of those rights a function of the planning system. A tenant may make representations to the local planning authority about the land use planning implications of a planning application and the authority may impose planning conditions giving effect to the applicant's undertakings in so far as they relate to land-use planning matters.

Football Supporters (Membership Scheme)

Mr Amess: To ask the Secretary of State for the Environment how many representations he has received concerning the proposed compulsory membership scheme for football supporters; and if he will list the organisations in favour of, and opposed to, the scheme.

Mr. Moynihan: I have received 130 representations about the national membership scheme from members of the public, nine from organisations. I have also received a large number of proposals to implement the scheme from computer companies and others. I could not list those who have written in by name without their consent to do so.

Mr. Amess: To ask the Secretary of State for the Environment which organisations he has consulted or proposes to consult in connection with the compulsory membership scheme for football supporters.

Mr. Moynihan: I am chairing a working party to examine the details of the proposed national membership scheme for football supporters. The Football League, the Football Association, the police, the Central Computer and Telecommunications Agency and other Government Departments are represented on it. I have asked the National Federation of Football Supporters Clubs to let me have in writing any points it would like the working party to take into account. I will shortly be issuing a similar invitation to the Football Supporters Association.

It is our intention to bring proposals to Parliament for legislation to give statutory backing to the scheme.

Common Land

Dr. Cunningham: To ask the Secretary of State for the Environment if, in the light of the report of the Common Land Forum of September 1986, he will bring forward legislation to amend the law on common land; and if he will make a statement.

Mr. Ridley: I announced on 29 January 1987 that the Government accept the case for legislation based broadly on the forum's report and intend to introduce a comprehensive commons Bill at a suitable opportunity when parliamentary time permits.

General Development Order

Dr. Cunningham: To ask the Secretary of State for the Environment when he proposes to publish the revised and consolidated town and country planning General Development Order.

Mr. Ridley *[holding answer 27 July 1988]:* We propose to lay a revised and consolidated General Development Order in time for it to come into effect later this year.

Empty Properties

Mr. Soley: To ask the Secretary of State for the Environment what is his estimate of the number of properties for rent which are empty in each of the categories of *(a)* local authority housing, *(b)* housing association housing and *(c)* Government Department housing; and what is his estimate of the percentage that this represents of the total number of properties in each such group.

Mr. Ridley *[holding answer 26 July 1988]:* Estimates derived from local authorities' annual housing investment programme returns for 1987 are as follows:

Vacant dwellings[1] at 1 April 1987: England
Number and percentage of stock

	000's	*Percentage*
Local authorities[2]	108·6	2·5
Housing associations	12·9	2·7
Other public sector[2]	15·6	5·8

[1] Excluding dwellings subject to demolition or closing orders.
[2] Local authorities vacant housing in overspill estates is included in the host authorities under "other public sector" which also includes housing owned by new towns, county councils, Government departments, nationalised industries and other public bodies. Many of these are vacant because of operational requirements, notably those owned by the Ministry of Defence, and others have been acquired for demolition (for example, by the Department of Transport). Government is encouraging the sale of housing which is not required and many of those that are vacant are in the process of disposal.

SCOTLAND

Supply Estimates

Mr. Galbraith: To ask the Secretary of State for Scotland if he will give details of the miscellaneous items covered in the proposed increase for 1988-89 of class XVI, vote 14, N9(7) miscellaneous.

Mr. Michael Forsyth: The provision for N9(7) miscellaneous expenditure in the current year is £2,902,000 compared with £601,000 in 1987-88. This increase is due mainly to the inclusion of £2·199 million to provide for expenditure on centrally financed AIDS-related projects.

Mr. Galbraith: To ask the Secretary of State for Scotland if he will give details of the additional printing and stationery envisaged by the projected increase in expenditure under Supply Estimates 1988-89, class XVI, vote 14, (N9.6 stationery, printing, etc.)

Mr. Michael Forsyth: The provision for N9(6) stationery, printing, and so on in the current year is £100,000 compared with £55,000 in 1987-88. This increase is to cover the estimated costs of producing and issuing to all general medical practitioners a consolidated version of the regulations governing general medical practitioners' terms and conditions of service and the revised drug tariff which will be issued to all general practitioners. Provision has also been made for the recurring costs of a large number of other health-related publications.

Housing Revenue Account

Mr. Worthington: To ask the Secretary of State for Scotland if he will publish in the *Official Report* a summarised housing revenue account, consistent with table 16.1 of Cm. 288-II, for each of the years 1982-83 to 1990-91 for *(a)* Scottish local authorities, *(b)* the Scottish Special Housing Association housing and *(c)* new town development corporations in Scotland.

Lord James Douglas-Hamilton: The information requested for the years 1982-83 to 1988-89 is shown in the tables. Projections of housing revenue account income and expenditure are not available for 1989-90 and 1990-91.

Table 1—Scottish local authority summarised housing revenue accounts

	[1]*1982-83* £ million	[1]*1983-84* £ million	[1]*1984-85* £ million	[1]*1985-86* £ million	[2]*1986-87* £ million	[2]*1987-88* £ million	[3]*1988-89* £ million
Loan charges	416	399	414	431	424	435	469

[5] Totals may not add up due to rounding.

Table 3—Scottish new town development corporations summarised housing revenue accounts

	1982-83[1] *£ million*	*1983-84*[1] *£ million*	*1984-85*[1] *£ million*	*1985-86*[1] *£ million*	*1986-87*[1] *£ million*	*1987-88*[2] *£ million*	*1988-89*[3] *£ million*
Loan charges	48	49	51	52	53	47	49
Non-Loan charges[5]	18	19	19	20	21	23	23
Total expenditure[4]	66	68	70	72	74	70	72
Rents	33	35	36	38	40	42	44
Subsidy	32	33	32	33	33	27	28
Other income	1	1	1	1	1	1	1
Total income[4]	66	68	70	72	74	70	72

Notes:
[1] Figures for 1982-83 to 1986-87 are based on audited accounts.
[2] Figures for 1987-88 and 1988-89 are estimates.
[3] The main item of expenditure is management and maintenance.
[4] Totals may not add up due to rounding.

Illegal Abortions

Ms. Richardson: To ask the Secretary of State for Scotland what was the total number of convictions in Scotland for procuring an illegal abortion in 1987.

Lord James Douglas-Hamilton: None.

Wild Birds

Mr. Tony Banks: To ask the Secretary of State for Scotland, pursuant to his reply to the hon. Member for Newham, North-West of 18 July, *Official Report*, columns *510-11*, if he will indicate in respect of the total number of bird deaths reported to his Department between 1 January 1979 and 30 June 1988, the percentage represented by those known to have been killed by the use of poisoned bait.

Mr. Michael Forsyth: 75 per cent.

Mr. Tony Banks: To ask the Secretary of State for Scotland, pursuant to his reply to the hon. Member for Newham, North-West of 18 July, *Official Report*, columns *510-11*, if he will indicate for each species of bird listed those cases reported to his Department by owners or occupiers of land and those reported by other parties.

Mr. Michael Forsyth: The information asked for is not available, in that reports are very often made at second hand and the records held by my Department's wildlife incident investigation service do not always contain information as to the persons making the first report of the finding of carcases of birds.

Training (Expenditure)

Mr. McLeish: To ask the Secretary of State for Scotland if he will provide an estimate of the expenditure by industry on training in each of the years 1979 to 1987, inclusive.

Mr. Lang: This information is not collected.

Labour Statistics

Mr. McLeish: To ask the Secretary of State for Scotland if he will give the total number of people classified as employees in employment for each quarter December 1986 to March 1988 inclusive, as defined prior to the introduction of the concept of the civilian work force in employment in June 1988.

Mr. Lang: The table gives the latest estimates of the number of employees in employment, the definition of which has not been affected by the introduction of the concept of the civilian work force in employment.

Employees in employment

Thousands

Scotland	*Unadjusted for seasonal variation*	*Seasonally adjusted*
1986		
December	1,874	1,874
1987		
March	1,862	1,876
June	1,886	1,880
September	1,879	1,871
December	1,877	1,878
1988		
March	1,868	1,882

Mr. McLeish: To ask the Secretary of State for Scotland if he will estimate the impact of the new work force definition of including training scheme participants as employees on *(a)* the monthly percentage unemployment rate and *(b)* the number of employees in employment.

Mr. Lang: For Scotland as a whole the unemployment rate on the work force basis is, on average, 0·2 percentage points lower than the unemployment rate calculated on the previous basis, which did not include participants on work-related Government training programmes in the denominator. The definition of employees in employment has not been changed.

Mr. McLeish: To ask the Secretary of State for Scotland if he will give an estimate of the impact the new adult training programme and withdrawal of general entitlement to benefit for young people under 18 years, will have on the monthly unemployment figures, claimant count, after November.

Mr. Lang: Plans are for some 41,000 filled places under employment training in Scotland, in comparison to some 35,000 under existing adult programmes. It will of course take some time for employment training to become fully established.

As regards income support changes, there are currently around 21,000 claimants aged under 18 on average

included in the count for Scotland, of whom some 14,000 are school leavers who are already excluded from the seasonally adjusted series. The majority of these will no longer be entitled to benefit.

Heatwise, Glasgow

Mr. Allan Stewart: To ask the Secretary of State for Scotland what representations he has received from Heatwise, Glasgow, concerning the employment training programme; and what response he has given.

Mr. Ian Lang: I visited Heatwise in Glasgow on 11 July and am fully aware of the serious problems the company faces as a consequence of the decision by Glasgow district council not to participate in employment training. For the sake of the long-term unemployed I hope that Glasgow district council, and other local authorities which have adopted a similar stance, will reconsider their position and join the new programme.

Apprenticeships

Mr. McLeish: To ask the Secretary of State for Scotland if he will give the total number of apprenticeships in Scotland in each of the years 1979 to 1987, inclusive.

Mr. Lang: I regret that the information is not available in the precise form requested. The table shows the number of apprentices and other trainees in manufacturing industry in Scotland since 1981. In 1988, as a percentage of all manufacturing employees, the number of apprentices and other trainees was higher in Scotland than in any other Great Britain region.

Apprentices and Trainees in Scottish Manufacturing Industries 1981-1988

Year	*Apprentices (000s)*	*Other trainees (000s)*	*All trainees (000s)*
1981	13·6	4·2	17·8
1982	12·3	4·8	17·1
1983	11·9	2·8	14·7
1984	8·3	2·6	11·0
1985	8·3	2·8	11·1
1986	6·3	2·7	9·0
1987	5·8	2·8	8·6
1988	6·1	4·9	11·0

Notes:

1. The figures refer to March of each year.
2. Many of those receiving initial skills training under YTS, specifically those without a contract of employment, are not counted as employees and so do not appear in the above table.
3. With the move away from traditional apprentice training in many industries some long duration schemes of a type which previously could have involved apprenticeships may now be classified as "other training".

Training Programmes

Mr. McLeish: To ask the Secretary of State for Scotland if he will give the total number of people included in "Employers in Employment" who were participating in Government training programmes for each quarter from December 1986 to March 1988 inclusive, prior to the introduction of the concept of the civilian work force in employment.

Mr. Lang: I assume that the hon. Member is referring to employees in employment.

Estimates of the number of people participating in Government training programmes included in the employees in employment statistics for Scotland for each quarter from December 1986 to March 1988 inclusive are shown in the table.

	Number
December 1986	41,000
March 1987	40,000
June 1987	39,000
September 1987	41,000
December 1987	40,000
March 1988	41,000

Road Accidents

Mr. Salmond: To ask the Secretary of State for Scotland how many cases of culpable homicide were prosecuted under sections 1, 2 and 3 of the Road Traffic Act in 1987.

Lord James Douglas-Hamilton: In 1987, 30 people were prosecuted under section 1 of the Road Traffic Act 1972 for causing death by reckless driving. Since, under sections 2 and 3 of the Act, the consequences of the driving do not form part of the charge, no information is available in the criminal statistics on whether or not charges under these sections arose out of an incident in which a death occurred. However, cases of reckless driving involving a death are almost invariably prosecuted under section 1 rather than section 2 or 3.

Mr. Salmond: To ask the Secretary of State for Scotland if he will list in the *Official Report* the number of *(a)* fatalities and *(b)* serious injuries caused by road traffic accidents in (i) each regional authority, (ii) each district authority and (iii) each parliamentary constituency in Scotland for the years 1985, 1986 and 1987.

Lord James Douglas-Hamilton: The information requested for 1985 and 1986 is included at tables 23 and 26 of "Road Accidents Scotland", for 1985 and 1986 respectively, copies of which are available in the Library. The figures for 1987 are as follows:

Region/district	*Fatal*	*Serious*	*Slight*	*Total*
Borders	23	282	430	735
Tweeddale	1	46	54	101

Mr. Salmond: To ask the Secretary of State for Scotland how many fatal accident inquiries were held in connection with road traffic accidents in 1987; and if he will give a breakdown by region.

Lord James Douglas-Hamilton: Figures are available only for the number of fatal accident inquiries so far instructed in road traffic deaths occurring in 1987. Thirty two such fatal accident inquiries have been instructed. The regional breakdown is set out in the table.

Number of fatal accident inquiries instructed as a result of road traffic deaths occurring in 1987

Region	Number
Highland	2
Grampian	5
Tayside	6
Fife	1
Lothian	7
Central	1
Borders	2
Dumfries and Galloway	1
Strathclyde	7
Orkney	0
Shetland	0
Western Isles	0

Walter Howden

Mr. Ron Brown: To ask the Secretary of State for Scotland what recent correspondence he has received from Walter Howden, an inmate of Saughton prison, about his term of imprisonment; and if he will make a statement.

Lord James Douglas-Hamilton: Mr. Howden petitioned my right hon. and learned Friend on 4 May 1988 and was given a reply on 16 June. A review of Mr. Howden's suitability for release on life licence is in train.

East Craigs Seed Testing Station

Mr. Ron Brown: To ask the Secretary of State for Scotland what recent representations he has received from trades unions about the future of East Craigs seed testing station, Edinburgh; and if he will make a statement.

Mr. Michael Forsyth: The Scottish branch of the Institution of Professional Civil Servants formally submitted comments on the report on "The Plant Variety Testing and Seed Certification Systems in the United Kingdom" on 18 July. These comments will be fully taken into account by the agriculture Ministers in deciding on their response to the many recommendations contained in the report.

Forestry Commission

Mr. Amess: To ask the Secretary of State for Scotland what was the total staff complement of the Forestry Commission in each year since 1973.

Lord James Douglas-Hamilton: The figures were as follows:

Year	Number of Staff in Post
1973	8,527
1974	8,298
1975	8,304
1976	8,252
1977	8,077
1978	8,168
1979	8,323
1980	8,129
1981	7,952
1982	7,545
1983	7,249
1984	6,836
1985	6,273
1986	5,967
1987	5,798
1988	5,528

Departmental Programmes

Mr. George: To ask the Secretary of State for Scotland how much has been spent by his Department in each of the past five years on the evaluation of departmental

programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mr. Rifkind: Evaluation is an integral part of the process of managing programmes. It is therefore not possible to identify separately the resources involved.

Education (Expenditure)

Mr. McLeish: To ask the Secretary of State for Scotland if he will give the total expenditure on secondary education in Scotland in each of the years 1979 to 1987 inclusive, in cash and real terms and by central Government and the local education authority section.

Mr. Michael Forsyth: The available information is given in the following table:

Expenditure on secondary education

£ million

Year	Central Government		Local Authorities	
	At outturn prices	*At 1987-88 prices*	*At outturn prices*	*At 1987-88 prices*
1979-80	1·8	3·2	342·9	602·2
1980-81	3·2	4·8	415·2	614·9
1981-82	3·3	4·4	471·9	636·0
1982-83	3·9	4·9	506·4	637·1
1983-84	4·3	5·1	534·4	642·1
1984-85	4·1	4·8	549·3	632·0
1985-86	4·4	4·7	565·3	613·8
1986-87	4·9	5·1	608·9	639·5
1987-88	5·5	5·5	653·6	653·6

Notes:

1. The figures shown are for current expenditure only. Information on capital expenditure by local authorities cannot be split between primary and secondary.
2. The outturn figures have been revalued to 1987-88 prices by application of the GDP deflator.
3. The 1987-88 outturn figures are estimated. For other years actual outturn figures have been given.
4. The central Government expenditure relates mainly to the assisted places scheme and in earlier years to assistance to grant-aided schools.

Mr. McLeish: To ask the Secretary of State for Scotland if he will give an estimate of the amount of finance given to local authority secondary education section in Scotland by industry and commerce in each of the years 1979 to 1987, inclusive.

Mr. Michael Forsyth: I regret that this information is not available.

Mr. McLeish: To ask the Secretary of State for Scotland if he will give the total amount of expenditure on non-advanced further education in Scotland in each of the years 1979 to 1987, inclusive.

Mr. Michael Forsyth: It is not possible to distinguish between expenditure by further education colleges on non-advanced courses and on advanced courses (higher national certificate and higher national diploma). Information on total further education expenditure is as follows:

	£ million
1979-80	82·6
1980-81	102·0
1981-82	115·3
1982-83	134·2
1983-84	151·7
1984-85	158·0
1985-86	155·6
1986-87	161·4
1987-88	181·0

Health Authorities (Revenue)

Mr. Kirkwood: To ask the Secretary of State for Scotland if he will estimate how long it will take to achieve revenue equalisation, as envisaged by the Scottish health authorities revenue equalisation formula.

Mr. Michael Forsyth: The timetable will depend upon a number of factors, notably the movement in boards' SHARE targets, themselves dependent upon other changes, for example in population.

City Technology Colleges

Mr. McLeish: To ask the Secretary of State for Scotland (1) what are the education and training objectives of the city technology concept in Scotland;

(2) if he has any proposals to introduce city technology colleges in 1988-89, 1989-90 and 1990-91;

(3) if he will give the estimated expenditure for the development of city technology colleges in 1988-89, 1989-90 and 1990-91;

(4) when he last met representatives of the Convention of Scottish Local Authorities, the Confederation of British Industry, the Scottish Trades Union Congress or Strathclyde regional council to discuss the setting up of city technology colleges;

(5) if he has met representatives of private sector industry about the setting up of city technology colleges;

(6) whether any public finance will be used to meet the capital or revenue costs of city technology colleges;

(7) if any private individuals or private sector organisations have agreed to contribute finance to the setting up of city technology colleges; and if he will make a statement.

Mr. Michael Forsyth: My right hon. and learned Friend and I wish to encourage the establishment with private sector sponsorship of technology colleges in Scotland, and are giving close consideration to proposals to achieve this objective.

Secondary Schools

Mr. McLeish: To ask the Secretary of State for Scotland how many pupils obtained O-grades or higher certificate in secondary schools in each of the years 1979 to 1987, inclusive.

Mr. Michael Forsyth: Details of pupils obtaining SCE higher grade and published annually in the Scottish Examination Board report, copies of which are held in the House of Commons Library. The report also contains information on numbers of S4 pupils obtaining ordinary/standard grades.

Mr. McLeish: To ask the Secretary of State for Scotland how many pupils sat O-grades or higher certificate in secondary schools in each of the years 1979 to 1987, inclusive.

Mr. Michael Forsyth: The information requested is published annually in the Scottish Examination Board report, copies of which are held in the House of Commons Library.

Mr. McLeish: To ask the Secretary of State for Scotland how many pupils attended secondary school in each of the years 1979 to 1987, inclusive.

Mr. Michael Forsyth: The number of pupils attending education authority and grant-aided secondary schools is as follows:

	Number
1979	421,970
1980	419,370
1981	415,760
1982	410,050
1983	401,420
1984	387,200
1985	361,210
1986	344,930
[1]1987	327,800

[1] provisional figures.

Mr. McLeish: To ask the Secretary of State for Scotland if he will give the total number of pupils in years 4, 5 and 6 in secondary schools in Scotland in each of the years 1979 to 1987, inclusive.

Mr. Michael Forsyth: The number of pupils in years 4, 5 and 6 in education authority and grant-aided secondary schools is given in the table.

	S4	*S5*	*S6*	*Total*
1979	92,050	40,210	13,970	146,230
1980	91,060	43,300	14,790	149,150
1981	92,220	47,380	17,270	156,880
1982	87,210	52,330	18,980	158,520
1983	85,810	50,950	19,970	156,730
1984	81,260	50,550	19,130	150,940
[1]1985	78,650	47,380	17,900	143,930
[1]1986	77,250	48,410	17,670	143,330
[2]1987	70,940	48,970	18,650	138,560

[1] Education authority only, stage totals estimated.
[2] Provisional figures.

Students

Mr. McLeish: To ask the Secretary of State for Scotland (1) if he will give the total number of students in Scotland who obtained ordinary national certificates, higher national certificates and city and guilds examination awards in each of the years 1979 to 1987, inclusive;

(2) if he will give the total number of students in Scotland presented for ordinary national certificates, higher national certificate and city and guilds in each of the years 1979 to 1987, inclusive.

Mr. Michael Forsyth: This information is not readily available.

Mr. McLeish: To ask the Secretary of State for Scotland if he will give the total number of students in local authority further education colleges in Scotland in each of the years 1979 to 1987, inclusive.

Mr. Michael Forsyth: The information is shown in the following table:

Students in local authority further education colleges

Session	*Number*
1979-80	161,300
1980-81	182,000
1981-82	173,600
1982-83	184,600
1983-84	193,800
1984-85	202,200
1985-86	186,900
1986-87	196,800

This information includes full-time and part-time students on advanced and non-advanced courses in day colleges and evening centres.

Hip Replacement Operations

Mr. Maclennan: To ask the Secretary of State for Scotland what is the number of those awaiting a hip replacement operation in each of the health board areas.

Mr. Michael Forsyth: This information is not available centrally; information is collected only on individual specialties—in this case orthopaedic surgery.

Mr. Maclennan: To ask the Secretary of State for Scotland what is the average waiting time for a hip replacement operation in each of the health board areas.

Mr. Michael Forsyth: The mean waiting times for a hip replacement operation in each health board are as follows. These relate to patients who were treated and discharged in 1986, and are the latest available.

	Mean waiting time (days)
Argyll and Clyde	127·1
Ayrshire and Arran	182·5
Borders	138·0
Dumfries and Galloway	179·6
Fife	196·9
Forth Valley	165·9
Greater Glasgow	126·9
Grampian	214·5
Highland	270·8
Lanarkshire	151·1
Lothian	184·2
Orkney	—
Shetland	—
Tayside	252·9
Western Isles	—

I expect the longest waiting times to be reduced by the additional allocation which I have made for this purpose.

School Leavers

Mr. McLeish: To ask the Secretary of State for Scotland if he will give the total number of pupils in Scotland leaving S4 with no certificate in each of the years 1979 to 1987 inclusive.

Mr. Michael Forsyth: The total number of pupils in Scotland leaving S4 with no Scottish Examination Board certificate is as follows: data for 1986-87 are not yet available.

	Number
1978-79	24,450
1979-80	23,720
1980-81	20,900
1981-82	18,990
1982-83	16,380
1983-84	16.040
1984-85	14,140
1985-86	11,320

Mr. McLeish: To ask the Secretary of State for Scotland if he will give the total number of pupils in Scotland leaving S4, S5 and S6 in each of the years 1979 to 1987 inclusive.

Mr. Michael Forsyth: The total number of pupils in Scotland leaving S4, S5 and S6 is as follows:

	S4	S5	S6	Total
1978-79	51,200	25,970	14,560	91,740
1979-80	49,720	26,530	15,480	91,720
1980-81	44,100	27,000	16,380	87,480
1981-82	40,090	29,370	19,140	88,610
1982-83	36,590	33,470	20,930	90,990
1983-84	35,340	32,670	21,730	89,740
1984-85	32,260	32,680	20,890	85,820
1985-86	31,000	31,410	20,660	83,080
1986-87	28,530	31,230	20,580	80,340

Mr. McLeish: To ask the Secretary of State for Scotland if he will give an estimate of the number of pupils leaving S4, S5 and S6 in secondary schools in Scotland in the years 1988-89, 1989-90 and 1990-91.

Mr. Michael Forsyth: The estimates requested are as follows:

Projected number of secondary school leavers

Thousands

	S4[1]	S5	S6	Total
1988-89	26·9	26·7	19·4	73·0
1989-90	25·4	24·7	18·3	68·4
1990-91	24·7	23·4	17·1	65·2

[1] includes a small number from S3

Charities

Mr. Foulkes: To ask the Secretary of State for Scotland what action he is taking in the light of the recommendations of the report, "Efficiency Scrutiny of the Supervision of Charities," relating to the establishment of a register of charities in Scotland.

Lord James Douglas Hamilton: My right hon. and learned Friend intends to issue in the next few days a consultative memorandum seeking views on a range of options, including the possibility of establishing a register of charities, to improve the supervision of charities in Scotland.

Forestry

Mr. Ron Davies: To ask the Secretary of State for Scotland, pursuant to his answer of 8 March, *Official Report*, column *148*, if he will list the names, locations and areas of all of the grant scheme applications which were referred by regional advisory committees to the forestry commissioners in the four years to 31 March 1987; and if he will list in each case *(a)* whether the commissioners gave approval for forestry grant aid, *(b)* the area of land approved and *(c)* the consultee sustaining an objection to the application.

Lord James Douglas-Hamilton *[holding answer 18 July 1988]:* The information is set out in the following table.

Applications referred to the Forestry Commissioners in the four years to 31 March 1987

Name	County/Region	Area of Original Application Gross Area (Hectares)	Area Proposed for Planting (Hectares)	Approved by Commissioners	Refused by Commissioners	Area Approved for Planting (Hectares)	Objectors
Marmers Wood	Cambridgeshire	1·5	1·5		Refused		Cambridgeshire County Council

Mr. Ron Davies: To ask the Secretary of State for Scotland how many applications for forestry grants were referred to the regional advisory committee for each Forestry Commission conservancy in the year to 31 March; how many were resolved by voluntary withdrawal or amendment; how many were referred to the forestry commissioners; and how many of those were awarded grant approval by the forestry commissoners.

Lord James Douglas-Hamilton *[holding answer 18 July 1988]:* The information is contained in the following table for the year ended 31 March 1988:

Conservancy	Number of applications referred to Regional Advisory Committees	Number of applications resolved by voluntary withdrawal or amendment of application	Number of applications referred by Regional Advisory Committees to Forestry Commissioners: Applications approved	Applications refused	Applications still under consideration
North England	3	—	—	1	2
East England	—	—	—	—	—
West England	—	—	—	—	—
Wales	5	—	1	2	2
North Scotland	24	5	4	1	14
Mid Scotland	8	2	5	—	1
South Scotland	3	2	—	—	1
Totals	43	9	10	4	20

Mr. Ron Davies: To ask the Secretary of State for Scotland what species of birds will be displaced by the afforestation of 1,029 hectares of land recently approved for planting in Caithness and Sutherlnd; whether any of those species are listed in annex I of the European Community directive, 79/409/EEC, on the conservation of wild birds; and what advice he received from the Nature Conservancy Council with regard to the afforestation of this land.

Lord James Douglas-Hamilton *[holding answer 26 July 1988]:* The birds most likely to be displaced on the 1,059 hectares recently cleared for planting by my right hon. and learned Friend are common moorland species such as skylarks, meadow pipits and curlews. As far as is known, the only species of bird listed in annex I of the European Community directive 79/409/EEC which will be affected is golden plover. The numbers of golden plover are relatively low in the areas to be planted and more abundant on the 1,426 hectares to be left unplanted as a result of my right hon. and learned Friend's decision. The Nature Conservancy Council's advice was that all the land should be left unplanted because of its ecological importance.

In reaching his decision my right hon. and learned Friend gave careful consideration to the council's advice and to the implications for employment, in accordance with his interim views on the balance between nature conservation and forestry in Caithness and Sutherland as set out in his answer to my hon. Friend the Member for Dumfries (Sir H. Monro) on 25 January 1988, at columns *71-73.*

Small Business

Mr. David Shaw: To ask the Secretary of State for Scotland if he will make a statement on the achievements of his Department and his policies in helping small businesses over the last 12 months compared with the previous 12 months; and if he will publish the performance indicators by which his Department monitors those achievements and the statistical results of such monitoring.

Mr. Lang *[holding answer 19 July 1988]:* In recognition of the important role that small firms play in the Scottish economy the Government have introduced a number of schemes of support available from the Scottish Development Agency, the Highlands and Islands Department Board and from the Industry Department for Scotland, where policy responsibility lies. In addition to providing services specific to Scotland, the SDA, HIDB and the Industry Department for Scotland are responsible for the delivery and monitoring in Scotland of United Kingdom services on behalf of other Departments, including the Department of Employment and the Department of Trade and Industry. 1987 saw the achievement of a net increase in the number of registered companies in Scotland by over 2,500 and VAT returns indicate that during the period 1980-85 there was a net increase of nearly 10,000 in the number of new businesses operating in Scotland.

The following describes the services available to small firms in Scotland during the periods 1986-87 and 1987-88 and some of their achievements.

Regional Assistance

IDS made offers to small firms in Scotland of regional selective assistance of £7 million in 1986-87 and £4 million in 1987-88. Under the revised regional development grant scheme, approvals to small firms in 1986-87 amounted to £47 million and £48 million in 1987-88. Information on the grant offered to small firms under the original RDG scheme is not available.

Better Business Services and Better Technical Services Schemes

During the periods in question, the BBS scheme was administered by IDS, SDA and the HIDB. The scheme allows small companies to have access to subsidised professional business advice and in 1986-87 some 7,947 offers of assistance were made with an associated value of £3 million. In 1987-88 some 9,597 offers of assistance were made with an associated value of £2·9 million. The BTS scheme was available in Strathclyde and parts of Tayside region and allowed small companies to have access to subsidised professional advice of a technical nature. In 1986-87 some 1,295 offers of assistance were made with an associated value of £0·75 million. In 1987-88 1,720 offers were made with an associated value of £1 million. Support under the BTS scheme ceased on 31 March 1988.

Scottish Development Agency

SDA support for small business includes the provision of financial assistance, premises and a wide range of advisory services, including the small firms service in Scotland and the administration of DTI's consultancy initiatives, under the enterprise initiative. During 1986-87 the SDA had contact with 21,682 small companies. Some £2 million was invested in 716 small firms creating or safeguarding some 670 jobs. In addition, some 845 small companies received assistance with the costs of attending promotional events. Sixty four small companies were provided with technical advice, while 36 received assistance with market research studies. In the year 1987-88, the agency had contact with 19,125 small firms. Some £2·7 million was invested in 692 small firms creating or safeguarding 800 jobs. In addition, 875 small companies received assistance with the 16costs of attending promotional events. Sixty small firms were provided with technical advice while 30 companies received assistance with market research studies.

Highlands and Islands Development Board

As well as delivering the small firms service in its area, the HIDB undertakes a wide range of activities in support of businesses, most of which are small, to help them overcome the difficulties of operating in this peripheral and rural part of the UK. The measures taken include financial support to business, provision of factories and assistance with business advice and training. In 1986-87, the board approved 1,247 offers of financial assistance with an associated value of £19·2 million. This generated private sector investment of some £57·8 million and created or safeguarded 2,400 jobs. For the period 1987-88 the board approved 1,063 offers of financial assistance with an associated value of £14·4 million. This generated private sector support of £44·4 million and created or safeguarded 2,700 jobs. In the period 1986-87, the HIDB completed 2,777 sq m of factory floor space. In this period some 2,654 jobs were housed in HIDB factories. In the period 1987-88, the HIDB completed 6,409 sq m of factory floor space. In this period, some 2,920 jobs were housed in HIDB factories.

Local Enterprise Trusts

Local enterprise trusts have proved to be an important feature of the various schemes of support on offer to small businesses in Scotland. The Government have recognised the important contribution which they make in local communities and, in partnership with the private sector, the Scottish Development Agency gave financial support amounting to £0·56 million to 36 enterprise trusts in 1986-87, the latest year for which figures are available. This represented some 20 per cent. of the total funds employed by the trusts. During 1986-87 the 36 trusts had, between them, contact with 20,000 clients from which 2,500 new small businesses were formed. Companies assisted by enterprise trusts created some 6,000 new jobs and some 5,000 jobs were supported or maintained. The SDA bases its financial assistance on its appraisal of each trust's annual management plan which contains details of the previous year's projects and objectives for the future year.

Deregulation

The Scottish Office is participating fully in the deregulation initiative. This has resulted in an improved awareness within the Scottish Office of the needs of business and has led to the introduction of a more systematic approach to assessing the financial and other pressures imposed on business by regulation. Scotland will be the first area of the United Kingdom to set up a pilot project which will provide small businesses with a single access point for advice on Government regulations. The pilot will commence on 1 August.

Public Purchasing

In each of the last two financial years, IDS has organised a number of seminars for small businesses to increase awareness of the opportunities that exist for selling their goods and services to the public service, and how to go about it. These were attended by several hundred small Scottish companies.

Departmental Advertising

Mr. Dobson: To ask the Secretary of State for Scotland what is the latest figure for the estimated expenditure by his Department on press and public relations during 1988-89.

Mr. Rifkind *[holding answer 21 July 1988]:* The estimated running cost of the Scottish information office in 1988-89 is £1·8 million.

Gartcosh Steel Mill

Mr. Tom Clarke: To ask the Secretary of State for Scotland if his Department is now in a person to assess the economic impact on central Scotland of the closure of the Gartcosh steel strip mill.

Mr. Lang *[holding answer 25 July 1988]:* Comprehensive information on the economic consequences for central Scotland of the closure of the Gartcosh cold rolling mill is not available and could not be derived from regularly available statistical sources. However, I note with satisfaction that over the period June 1987 to June 1988 the numbers of unemployed in Lanarkshire fell by over 5,000. This amounted to a drop in the unemployment rate of more than three percentage points, which is even more substantial than the decline for Scotland as a whole.

Court and Escort Duties

Mr. Worthington: To ask the Secretary of State for Scotland whether he has proposals to reduce the amount of time that police and prison officers spend on court and escort duties.

Lord James Douglas-Hamilton *[holding answer 26 July 1988]:* The Scottish Home and Health Department, in consultation with the Crown Agent, the Scottish Courts Administration and the police, is currently considering whether the resources devoted by the police and prison services to these duties could be reduced without damage to the administration of justice and the security of prisoners. Among the aspects being studied are the scope for civilianisation of court posts and the arrangements for citing police officers as witnesses.

Housing

Mr. Wray: To ask the Secretary of State for Scotland if he will list the kind of centrally held information gathered by his Department regarding *(a)* homelessness in general, *(b)* young homeless people, *(c)* housing for the disabled and *(d)* housing and the elderly.

Lord James Douglas-Hamilton *[holding answer 27 July 1988]:* Information on homelessness is gathered by the Scottish Development Department from local authorities on a case return basis for each applicant household. This details category of priority need; reasons for loss/threatened loss of accommodation; whether temporary accommodation pending inquiries was provided; circumstances of the household; and type of accommodation secured. Age of applicant households is not collected. Information on homeless households in short stay accommodation is collected quarterly from local authorities.

Statistical returns collected annually from local authorities give the level and type of provision at 31 March each year, both of special needs housing and bed spaces for the elderly and disabled.

Shareholdings

Mr. Redwood: To ask the Secretary of State for Scotland if he will list all shareholdings in public and private companies still held by his Department or by the Scottish Development Board.

Mr. Lang *[holding answer 12 July 1988]:* No shares are held by the Scottish Office. Shareholdings held by the Scottish Development Agency and the Highlands and Islands Development Board are as follows:

Press and Public Relations

Mr. Dobson: To ask the Secretary of State for Scotland what was the total spending by his Department on press, public relations and advertising, respectively, in 1987-88.

Mr. Rifkind *[holding answer 21 July 1988]:* The running cost of the Scottish information office in 1987-88 was £2·1 million, of which the paid publicity cost was £1 million. A breakdown of cost in the form requested is not available.

Scottish Film Council

Mr. Tom Clarke: To ask the Secretary of State for Scotland, pursuant to the reply of 27 January, *Official Report*, column *296*, concerning the proposed amalgamation of the Scottish Film Council with the Scottish Arts Council, if he has now reached a conclusion on this matter.

Mr. Allan Stewart: To ask the Secretary of State for Scotland when he expects to respond to the representations received on his consultative paper on the future constitution of the Scottish Film Council; and if he will make a statement.

Mr. Michael Forsyth *[holding answers 13 May and 20 July 1988]:* I shall write to the hon. Member and my hon. Friend.

Crossroads (Scotland) Care Attendant Schemes

Mr. Worthington: To ask the Secretary of State for Scotland if he or his Ministers have met or intend to meet representatives of Crossroads (Scotland) care attendant schemes to discuss continued central Government funding for their schemes.

Mr. Forsyth *[holding answer 22 June 1988]:* Officials of the Scottish Office and the Training Commission met representatives of Crossroads on 20 July. There are at present no plans for further meetings.

Medical Clinical Research

Mr. Wray: To ask the Secretary of State for Scotland when he last discussed the state of medical clinical research in Scotland and its priorities with representatives in Scotland of *(a)* the British Medical Association, *(b)* the Medical Research Council, *(c)* the Medical Academic Staff Committee, *(d)* Scottish universities and *(e)* medical students and researchers.

Mr. Michael Forsyth *[holding answer 30 June 1988]:* My right hon. and learned Friend has not met any of these groups to discuss that topic in particular, but the subject of university medical teaching and research was touched on in the course of a discussion he had with representatives of the British Medical Association on 6 June. I met representatives of the British Medical Association on 25 July. The Scottish Home and Health Deaprtment has also had discussions with the principals of Scottish universities with medical schools on the common interest between the universities and the Health Service, in which the research interest was mentioned, and regularly meets the Medical Research Council to discuss priorities for research.

Lennox Castle Hospital

Mr. Galbraith: To ask the Secretary of State for Scotland what information he has as to the current bed occupancy of wards 7 and 8 at Lennox Castle hospital.

Mr. Michael Forsyth *[holding answer 18 July 1988]:* I have had inquiries made of the Greater Glasgow health board.

At present five of the 24 places in wards 7 and 8 are occupied. Revenue funds for the full use of these wards have been made available by the board, but the board is making a careful assessment of patients to ensure that residents who stand to benefit most from the new wards are allocated to them. A clinical exercise of this nature takes time, and the board expect that full occupancy of wards 7 and 8 will be achieved by mid-September and December respectively.

Teachers

Mr. Wray: To ask the Secretary of State for Scotland what is the number of teachers in (i) mathematics, (ii) history, (iii) English, (iv) sciences and (v) physical education in *(a)* Scotland, *(b)* Glasgow and *(c)* Strathclyde, for each year since 1974.

Mr. Michael Forsyth *[holding answer 14 July 1988]:* The full-time equivalent numbers of teachers in education authority secondary schools are given in the table. Information for 1974 to 1978 is not readily available.

Teacher full-time equivalent

EMPLOYMENT

Public Expenditure

Mr. Worthington: To ask the Secretary of State for Employment if he will publish a table in the *Official Report*, in the same format as his written reply of 7 July, *Official Report*, columns *697-98*, on receipts classified as charges in respect of his programme expenditure over the years 1982-83 to 1990-91, indicating the receipts in respect of running costs expenditure together with a supplementary analysis indicating, separately, the amounts of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mr. Cope: The following tables supplement the information on programme expenditure given in the reply to the hon. Member on 7 July 1988, at columns *697-98*. For the years 1982-83 to 1990-91 they give a breakdown of receipts received and expected by the Department of Employment group: table 1 shows receipts in respect of running costs which originate as departmental running costs and table 2 gives other receipts in respect of running costs.

Table 1—Receipts against running costs which originate as departmental running costs (£ million)

Note:

Because of rounding the sum of the components does not always equate with the totals.

Discrimination

Mr. Grocott: To ask the Secretary of State for Employment whether he has any plans to introduce *(a)* legislation forbidding or *(b)* guidelines discouraging discrimination in employment on the grounds of age; and if he will make a statement.

Mr. Nicholls: The Government do not believe that legislation of this nature would be beneficial or practical, and there are no plans to issue official guidelines at the present time.

Chief Inspector of Factories

Mr. Strang: To ask the Secretary of State for Employment when he last met with the new chief inspector of factories; and what subjects were discussed.

Mr. Nicholls: My right hon. Friend the Secretary of State has not met the chief inspector of factories designate.

Single European Market (Tourism)

Mr. Harry Greenway: To ask the Secretary of State for Employment if he will make a statement on the effect upon tourism of the completion of the European market in 1992.

Mr. Lee: The completion of the European single market in 1992 is likely to have a significant impact on tourism. Increased liberalisation of intra-Community transport will present great opportunities for travel between member states. The removal of internal barriers should encourage United Kingdom operators to expand into the European market as well as European companies to operate in the United Kingdom. This should further stimulate tourism within the Community.

Factory Inspectors

Mr. Cryer: To ask the Secretary of State for Employment if he will provide a breakdown of the number of factory inspectors now in post as between the general and specialist categories.

Mr. Nicholls: On 1 July 1988 (the last date for which figures are available) the Health and Safety Executive employed 596 factory inspectors and 211 specialist inspectors in the technology division which now gives technical support to HSE as a whole.

Labour Statistics

Mr. Jack: To ask the Secretary of State for Employment if he will make a statement on current levels of unemployment in the north-west.

Mr. Lee: In June 1988 seasonally adjusted unemployment excluding school leavers was 331,200 in the north-west, compared with 398,900 in June 1987, a fall of 67,700 over the last 12 months.

Mr. Meacher: To ask the Secretary of State for Employment what has been the reduction in unemployment each month since May 1986; and what has been the increase in the number of persons in employment for each of these months.

Mr. Lee: Following is the available information. Table A shows the level of seasonally adjusted unemployed claimants, excluding school leavers, in the United Kingdom for each month together with the change over the previous month from May 1986. Estimates of total employment are not available monthly. Table B gives the quarterly numbers and changes in the work force in employment in the United Kingdom for each quarter month since June 1986.

Table A
Unemployed claimants in United Kingdom: May 1986 to June 1988
Seasonally adjusted excluding school leavers

thousands

	Number	*Change over month*
1986

Table B
Workforce in employment in United Kingdom: June 1986 to March 1988
Seasonally adjusted

thousands

	Workforce in employment[1]	*Change since previous quarter*
June 1986	24,746	+50
September 1986	24,883	+137
December 1986	24,982	+99
March 1987	25,080	+98
June 1987	25,291	+211
September 1987	25,449	+158
December 1987	25,578	+129
March 1988	25,697	+119

[1] The work force in employment comprises employees in employment, the self-employed, Her Majesty's Forces and participants in work-related Government training programmes. This last group is not seasonally adjusted.

Channel Tunnel

Dr. Thomas: To ask the Secretary of State for Employment if he will make a statement on the employment implications for the regions of the United Kingdom outside the south-east of the completion of the Channel tunnel.

Mr. Lee: All parts of the United Kingdom should benefit from employment opportunities generated, directly and indirectly, by the operation of the Channel tunnel. I hope that firms in all areas will be able to utilise the tunnel's facility for easier freight transport into Europe, thus putting them in a better position to compete in the European market. I also expect the Channel tunnel to be of considerable benefit to tourism.

Tourism

Mr. Austin Mitchell: To ask the Secretary of State for Employment what is the Government's contribution to the British Tourist Authority and the three tourist boards in the current financial year; if he will break down the expenditure by end use; and if he will publish in the *Official Report* a table showing for each year since 1968 the percentage increase in the number of (i) US and (ii) other visitors together with an index of the Government contribution by way of grant-in-aid in terms of 1987 prices; based on 1968 as 100.

Mr. Lee: Estimated Government funding for the British Tourist Authority and the English, Scottish and Welsh tourist boards in the current financial year is as follows:

(£ million)	*Grant in Aid*	*54 Scheme*
BTA	23·8	—
ETB	12·4	13·2
STB	6·8	3·1
WTB	5·9	3·5
Totals	48·9	19·8
Total Government Contribution		68·7

A breakdown of expenditure by end use will not be available until respective annual accounts are produced next year; the accounts for 1987-88 have recently been laid before the House.

The following table shows visit levels to the United Kingdom since 1968 with the percentage increase for United States and other visits for each year in parentheses. Visitor levels are in thousands.

Year	Total visits	United States visits		Other visits	
1968	4,828	851		3,977	
1969	5,821	1,136	(+33)	4,685	(+18)
1970	6,692	1,567	(+38)	5,125	(+9)
1971	7,131	1,647	(+5)	5,484	(+7)
1972	7,459	1,716	(+4)	5,743	(+5)
1973	8,167	1,605	(−6)	6,562	(+14)
1974	8,543	1,411	(−12)	7,132	(+13)
1975	9,490	1,417	(0)	8,073	(+2)
1976	10,808	1,585	(+12)	9,223	(+14)
1977	12,281	1,814	(+14)	10,467	(+13)
1978	12,646	1,964	(+8)	10,682	(+2)
1979	12,486	1,719	(−12)	10,767	(+1)
1980	12,421	1,695	(−1)	10,727	(0)
1981	11,452	1,716	(+1)	9,736	(−9)
1982	11,636	1,726	(+1)	9,910	(+2)
1983	12,464	2,317	(+34	10,147	(+2)
1984	13,644	2,764	(+19)	10,881	(+7)
1985	14,449	3,166	(+15)	11,283	(+4)
1986	13,897	2,288	(−28)	11,609	(+3)
1987	15,445	2,800	(+22)	12,645	(+9)

Source: The International Passenger Survey.

The following table shows levels of grant in aid funding to BTA and the English, Scottish and Welsh tourist boards (excluding the section 4 scheme) since 1969-70, along with an index of this contribution using 1969-70 as 100, based on 1987-88 prices. It is not possible to use 1968 as a base as BTA and the national tourist boards were only established under the Development of Tourism Act 1969 and thus the 1969-70 financial year was the first year in which they were operating.

Grant-in-aid (£ million) in 1987-88 prices

Year	£ million	Index
1969-70	9·778	100
1970-71	22·599	231
1971-72	33·503	343
1972-73	31·525	322
1973-74	36·099	369
1974-75	33·131	339
1975-76	35·302	361
1976-77	36·557	374
1977-78	37·852	387
1978-79	40·062	410
1979-80	40·768	417
1980-81	40·632	416
1981-82	42·494	435
1982-83	47·142	482
1983-84	41·351	423
1984-85	41·773	427
1985-86	39·702	406
1986-87	44·460	455
1987-88	45·265	463

Mr. Austin Mitchell: To ask the Secretary of State for Employment whether the British Tourist Authority succeeded in raising the additional $800,000 it was originally seeking from the tourist trade in 1986.

Mr. Lee: The British Tourist Authority attracted £3·93 million in trade funding for marketing in 1986-87 in addition to the operations originally planned. Of this, £215,000 was in respect of a special advertising campaign to restore levels of visitors from North America. This was carried out in consultation with British Airways and other firms in the industry which also contributed substantial resources to related marketing efforts.

Accidents

Mr. Doran: To ask the Secretary of State for Employment (1) what is the definition of serious injury used in the reporting of accidents in industries covered by the Health and Safety Executive's inspectorate;

(2) what changes in the definition of serious injury used in the reporting of accidents in industries covered by the Health and Safety Executive's inspectorate have been made in the last 10 years;

(3) what is the definition of serious injury used in reporting of accidents in the coalmining industry;

(4) what changes in the definition of serious injury used in reporting accidents in the coalmining industry have been made in the last 10 years.

Mr. Nicholls: The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 1985 require the following injuries and conditions suffered by any person as a result of an accident arising out of or in connection with work to be notified forthwith to the enforcing authority and subsequently reported on an approved form:

(a) fracture of the skull, spine or pelvis;
(b) fracture of any bone:
  (i) in the arm or wrist, but not a bone in the hand; or
  (ii) in the leg or ankle, but not a bone in the foot;
(c) amputation of:
  (i) a hand or foot; or
  (ii) a finger, thumb or toe, or any part thereof if the joint or bone is completly severed;
(d) the loss of sight of an eye, a penetrating injury to an eye, or a chemical or hot metal burn to an eye;
(e) either injury (including burns) requiring immediate medical treatment, or loss of consciousness, resulting in either case from an electric shock from any electrical circuit or equipment, whether or not due to direct contact;
(f) loss of consciousness resulting from lack of oxygen;
(g) decompression sickness (unless suffered during an operation to which the Diving Operations at Work Regulations 1981 apply) requiring immediate medical treatment;
(h) either acute illness requiring medical treatment, or loss of consciousness, resulting in either case from the absorption of any substance by inhalation, ingestion or through the skin;
(i) acute illness requiring medical treatment where there is reason to believe that this resulted from exposure to a pathogen or infected material;
(j) any other injury which results in the person injured being admitted immediately into hospital for more than 24 hours.

The regulations do not contain the terms "serious injury"; the Health and Safety Executive normally refers to "major injury" in this context.

The regulations came into force on 1 April 1986 and repealed the Notification of Accidents and Dangerous Occurrences Regulations 1980. The 1980 regulations defined "major injury" as:

(a) fracture of the skull, spine or pelvis;
(b) fracture of any bone:—
  (i) in the arm, other than a bone in the wrist or hand;
  (ii) in the leg, other than a bone in the ankle or foot;
(c) amputation of a hand or foot;
(d) the loss of sight of an eye; or

(e) any other injury which results in the person injured being admitted into hospital as an in-patient for more than 24 hours, unless that person is detained only for observation.

Both sets of regulations apply to all work activities including coalmining.

The 1980 regulations repealed a number of provisions applying to different industries. Section 116 of the Mines and Quarries Act 1954 required notification of accidents causing "serious bodily injury" but the term was not defined. Otherwise, prior to 1 January 1981 when the 1980 regulations came into force, there was no separate requirement for notifying major injuries.

Labour Statistics (Basildon)

Mr. Amess: To ask the Secretary of State for Employment what is the total number of *(a)* male and *(b)* female unemployment in the constituency of Basildon; and what were the figures for each quarter since 1983.

Mr. Lee: The following information is in the Library. The table shows the total number of male and female unemployed claimants in the Basildon parliamentary constituency quarterly from July 1983 to April 1988, together with figures for June 1988 (the latest available date). Unemployment statistics for constituencies are available only from June 1983.

Number of unemployed claimants—Basildon parliamentary constituency

	Male	*Female*
1983		
July	4,451	1,697
October	4,484	1,888
1984		
January	4,822	2,012
April	4,623	1,964
July	4,815	1,988
October	4,926	2,046
1985		
January	5,125	2,148
April	4,978	2,092
July	4,722	1,969
October	4,583	1,909
1986

1988		
January	3,163	1,563
April	2,818	1,376
June	2,431	1,275

[1] The figures are affected by the change in the coverage of the count in March 1986.

Employment Act 1988

Mr. Redmond: To ask the Secretary of State for Employment what guidance his Department issues on the application of section 26 of the Employment Act 1988 to claimants who decline a place on a training scheme; and if he will make a statement.

Mr. Lee: The question refers to section 26 of the Employment Act 1988 which has no direct effect on unemployment benefit claimants. Section 27 does relate to unemployment benefit claimants and it is assumed that the hon. Gentleman intended to inquire about section 27 of the Employment Act which amends section 20 of the Social Security Act 1975.

All decisions applying to section 20 of the Social Security Act are given by the statutory independent adjudicating authorities.

Instructions to benefit office staff require that where it appears that a claimant has voluntarily left a course of approved training without good cause or was discharged because of unsatisfactory conduct he should be given an opportunity to make a statement and the matter should be referred to the independent adjudicating authorities.

Social Science Research

Mr. George: To ask the Secretary of State for Employment how much has been spent by his Department in each of the past five years on social science research; what percentage this constitutes of total departmental expenditure and of the Department's research budget; and how much of the research has been undertaken *(a)* within his Department, *(b)* by universities and polytechnics and *(c)* by independent research organisations.

Mr. Lee: The figures in the table are for the Department of Employment group (which includes for this period the Department of Employment, the Training Commission, formerly the Manpower Services Commission, and the Health and Safety Executive), and are based on information provided for the annual review of Government-funded research and development (the latest available figures being for 1986-87). The available information relates to gross expenditure on research and development including that performed elsewhere in central Government, for research and development in total and for social science and humanities.

	1982-83	*1983-84*	*1984-85*	*1985-86*	*1986-87*
Expenditure on social science and humanities research £ million	4·8	6·7	7·4	14·9	19·9
—as a percentage of total departmental expenditure	0·3	0·3	0·3	0·5	0·6
—as a percentage of total R and D expenditure	40·0	43·5	46·0	73·3	76·8
Expenditure on social science and humanities research undertaken:					
—within Department £ million	1·0	1·4	1·3	1·3	1·5
—by universities and polytechnics £ million	2·1	1·8	2·6	5·6	9·9
—by industrial research associations and non-industrial research institutes £ million	1·0	2·1	1·2	3·0	1·6

New Businesses

Mr. Amess: To ask the Secretary of State for Employment what initiatives his Department is taking to encourage people to set up new businesses; and if he will make a statement.

Mr. Cope: The main factor which has encouraged people to set up new businesses is the favourable economic climate which the Government have helped to create through their policies of controlling inflation and reducing rates of taxation. The increase in the number of businesses registering for VAT in 1987 was the highest since 1979 and the number of self-employed people has increased by over 1 million since that date.

This Department has a range of policies designed to encourage people to set up their own business and to give direct support where appropriate. The enterprise allowance scheme pays unemployed people an allowance of £40 per week for 12 months while they are setting up a business. Over 360,000 people have now benefited from this scheme, and 110,000 places have been provided for the current financial year.

The loan guarantee scheme also helps new businesses to raise finance and half of the loans arranged through the scheme are for start-ups.

People planning to set up in businesses can obtain information and business counselling from the Department's small firms service and the network of local enterprise agencies, many of which receive support from this Department.

Mr. Amess: To ask the Secretary of State for Employment what has been the net increase in the number of new businesses in *(a)* Basildon and *(b)* England and Wales since 1983.

Mr. Cope: Between December 1983 and December 1987 the number of businesses registered for VAT in the United Kingdom increased by 121,000. Separate figures for this period are not available for England and Wales or Basildon.

Small Businesses

Mr. Amess: To ask the Secretary of State for Employment if he will publish in the *Official Report* those Government measures of particular help to small businesses which are the subject of current legislation or are planned; and if he will make a statement.

Mr. Cope: I refer my hon. Friend to the answer given by my right hon. Friend the Chief Secretary to the Treasury to my hon. Friend the Member for Dover (Mr. Shaw), on 21 July 1988, at column *732*, which sets out some of the specific measures of help to small businesses in the Finance Bill.

In addition, new companies legislation is planned which will include a number of deregulatory measures of particular help to small companies. These include a simplification of the filing requirements for annual accounts and returns and a measure to enable private companies, with the agreement of their shareholders, to opt out of certain statutory requirements such as the holding of annual general meetings.

Mr. Amess: To ask the Secretary of State for Employment if he will list those measures his Department has promoted since 1983 which are of particular help for small businesses; and if he will make a statement.

Mr. Cope: I refer my hon. Friend to the answer to his related question today to my right hon. Friend the Prime Minister, and the reply my right hon. Friend the Secretary of State gave to my hon. Friend the Member for Dover (Mr. Shaw) on 27 July 1988.

Mr. Amess: To ask the Secretary of State for Employment what representations he has received requesting further assistance to small businesses; and if he will make a statement.

Mr. Cope: From time to time representations are made to me about assistance to small firms. A large number of businesses take advantage of the help that is available from this Department and others which is intended to enable them to operate more efficiently and to grow.

Unemployment Benefit

Mr. Madden: To ask the Secretary of State for Employment how many people suspended from receipt of unemployment benefit in the Bradford travel-to-work area in the last year to date have appealed against suspension; how many such appeals have been heard; how many appeals have been upheld; how many refused; in how many decisions are outstanding; and what is the average waiting time for an appeal hearing.

Mr. Lee: Information is not available in the precise form requested, as there is no right of appeal against suspension of benefit. However, in the Bradford travel-to-work area, of those persons disallowed unemployment benefit between 1 July 1987 and 30 June 1988, 1,201 lodged an appeal. Examination of the available records indicates that 651 appeals have been heard in the same period and 195 appeals are outstanding.

Information on the average waiting time for an appeal hearing in the Bradford travel-to-work area is included with that for north-east region. At December 1987 (the latest date for which figures are available) the average time between the date on which an appeal against an unemployment benefit decision was lodged and the date on which it was heard was 23·5 weeks.

Information is not readily available on the number of appeals which were allowed or disallowed in the period and this could be obtained only at disproportionate cost.

Mr. Madden: To ask the Secretary of State for Employment (1) how many people have been suspended from unemployment benefit in the Bradford travel-to-work area since 1 January; how many were suspended during the same period of 1987; how many in each period were suspended for the maximum period; and what proportion of the total of those receiving unemployment benefit were represented by those suspended for the maximum period;

(2) how many people have been suspended from unemployment benefit in the United Kingdom since 1 January; how many people were suspended during the same period of 1987; how many in each period were suspended for the maximum period; and what proportion of the total of those receiving unemployment benefit were represented by those suspended for the maximum period.

Mr. Lee: No figures are held on the number of people who have been suspended from receiving unemployment benefit. However, the following table shows the number of

persons whose benefit was disallowed in the Bradford travel-to-work area and the United Kingdom between 1 January and 30 June 1987 and 1988:

Number of disallowances of benefit in the Bradford travel-to-work area and the United Kingdom

Period	*Bradford travel-to-work area*	*United Kingdom*
1 January 1987 to 30 June 1987	24,177	518,843
1 January 1988 to 30 June 1988	22,269	n/a

n/a Figures not yet available.

Departmental Programmes

Mr. George: To ask the Secretary of State for Employment how much has been spent by his Department in each of the past five years on the evaluation of departmental programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mr. Cope: The process of evaluation of individual programmes is often part of the work itself. I regret therefore that the information as requested is not available.

ENERGY

Life Jackets

Mr. Prescott: To ask the Secretary of State for Energy when his Department received the report of the Robert Gordon institute of technology on the effectiveness of life jackets and survival suits used in the North sea offshore industries; what request he received for the publication of the report; and why it has been delayed.

Mr. Peter Morrison: The report was submitted to my Department in November 1987.

Following my reply to the hon. Member for Warrington, North (Mr. Hoyle) on 28 April 1988, at column *219*, a copy of the report was placed in the Library of the House. Members of the oil industry advisory committee of the Health and Safety Commission have requested publication. One manufacturer of immersion suits has also formally requested publication.

Since the report was submitted consultations have taken place between my Department, the Department of Transport and standards-setting organisations.

Additional copies of the report are to be produced and made more widely available.

Recruitment and Promotion Policy

Ms. Richardson: To ask the Secretary of State for Energy what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career break due to child care.

Mr. Parkinson: The criteria against which recruits are evaluated are designed not to discriminate, either directly or indirectly, against mature students or women returning to work—for example, advertisements do not contain upper age limits, and do mention returning to work and our flexible approach to hours of working and provision for part-time working. Promotion within the Department is on merit, although in some cases a minimum seniority is required. It is the practice for the chairman of a promotion board to evaluate its decisions, at the various stages, to ensure that equal opportunity policies are being implemented.

Sellafield (Reprocessing)

Dr. Thomas: To ask the Secretary of State for Energy if, in light of his statement on the wind-down of the fast reactor programme, 21 July, *Official Report*, column 1288, he will make a statement on (i) the continued necessity for the reprocessing of Magnox spent fuel at Sellafield for the separation of plutonium for the fast reactor core at Dounreay and (ii) the continued necessity for the reprocessing of advanced gas-cooled reactor spent fuel and pressurised water reactor spent fuel from electricity board reactors at the thermal oxide reprocessing plant at Sellafield for the separation of plutonium for the fast reactor fuel core at Dounreay.

Mr. Michael Spicer: As my right hon. Friend the Secretary of State made clear in his statement, we are retaining a position in fast reactor technology. There is a continued need for reprocessing at Sellafield, and BNFL has contracts placed for Thorp.

European Parliament (Committees)

Dr. Thomas: To ask the Secretary of State for Energy what are the departmental responsibilities regarding *(a)* responding to invitations by the energy committee of the European Parliament to submit written or oral evidence before any of its investigations involving a United Kingdom interest, *(b)* responding to invitations by any special committee of inquiry of the European Parliament to submit written or oral evidence on topics involving United Kingdom interests and *(c)* responding to reports by the energy committee of the European Parliament on matters directly concerning United Kingdom nuclear facilities.

Mr. Parkinson: On matters falling within the responsibility of my Department I would decide, after consulting the Foreign and Commonwealth Office and other Departments concerned, whether to respond to invitations by the energy committee or any special committee of inquiry of the European Parliament to submit evidence on topics involving United Kingdom interests. There is no formal procedure under which a member state can respond to reports by committees of the European Parliament.

Solar Energy

Mr. Amess: To ask the Secretary of State for Energy (1) what research his Department is undertaking into the development of solar energy; and if he will make a statement;

(2) what support his Department is giving for increased use of solar energy; and if he will make a statement.

Mr. Michael Spicer: Passive solar design of buildings is the best way to utilise solar energy in the United Kingdom. My Department is supporting a comprehensive research and development programme aimed at encouraging its integration into building design by the mid-1990s. This

programme is designed to generate convincing information about the benefits of passive solar design in both housing and non-domestic buildings. Thirty-seven projects worth over £6·5 million are under way in the programme, with nearly £2 million expected to be spent in 1988-89.

Our programme has three main activities. Field studies, which will provide evidence of the energy and financial and non-financial benefits of passive solar design from measurements in real buildings throughout the United Kingdom; design studies, which provide an opportunity for design practices to explore passive solar techniques in a wide range of buliding types and produce a range of exemplar designs; and supporting R and D to improve the understanding of the operation of particular design features.

Information resulting from these studies will be put into a form that will aim to persuade building developers, designers and users to apply the principles in practice. The programme is also seeking to identify the most appropriate ways of ensuring that the results of the programme are effectively transferred to the industry nationwide.

Mr. Amess: To ask the Secretary of State for Energy (1) what representations his Department has received supporting greater use of solar energy; and if he will make a statement;

(2) what representations his Department has received opposing the greater use of solar energy; and if he will make a statement.

Mr. Michael Spicer: My Department has received widespread support for its passive solar design R and D programme and its aim to encourage the integration of the technology into building design by the mid-1990s. Many of the leading design practices are playing an active part in our programme and are incorporating the technology into new buildings, both domestic and non-domestic, throughout the United Kingdom. We have received no representations opposing the greater use of solar energy.

New Businesses

Mr. Amess: To ask the Secretary of State for Energy what initiatives his Department is taking to encourage people to set up new businesses; and if he will make a statement.

Mr. Parkinson: For an explanation of the way my Department's activities encourage people setting up new businesses, I refer my hon. Friend to my reply to my hon. Friend the Member for Dover (Mr. Shaw) on 19 July 1988, at columns *557-58*, and to the work of the British Coal Enterprise Ltd. in particular.

Departmental Programmes

Mr. George: To ask the Secretary of State for Energy how much has been spent by his Department in each of the past five years on the evaluation of departmental programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mr. Parkinson: The Department regards evaluation as an important part of its programmes in order to ensure that value for money is being achieved and that the work and results are in accordance with the Department's objectives. This evaluation takes many forms, including internal reviews, market research, where appropriate, to measure programme effectiveness, reviews involving bodies like the advisory council on research and development and other external advisers, and reviews undertaken by or involving other parts of Government, for example, the Treasury, the Cabinet Office and inter-departmental reviews.

Evaluation is encouraged as an integral part of the Department's programmes and costs are included with those of individual programmes or are part of Departments' administrative costs. There are no separately identifiable figures for the costs of such evaluation over the past five years.

Sullom Voe Oil Terminal

Mr. Wallace: To ask the Secretary of State for Energy whether he has received any preliminary reports on the blast at the Sullom Voe oil terminal on 1 July; and if he will make a statement.

Mr. Peter Morrison: My Department has no statutory responsibility for the operation of installations at the Sullom Voe oil terminal, except for agreeing the suitability of the metering equipment, and flaring and venting consents. My officials were informed of the blast on 4 July in the course of discussions of other matters with the operator of the terminal. Safety matters at the terminal are for the Health and Safety Executive.

Mr. Wallace: To ask the Secretary of State for Energy whether he intends to publish any reports received by him concerning the blast at Sullom Voe oil terminal on 1 July.

Mr. Peter Morrison: I have had no reports, except for a routine report by officials that the blast had occurred, and would affect progress on recommissioning of the Ninian fractionation train, which has been out of commission because of corrosion problems.

Mr. Wallace: To ask the Secretary of State for Energy what information he has received concerning the cause and extent of corrosion damage at Sullom Voe oil terminal; and if he will make a statement.

Mr. Peter Morrison: My Department has been monitoring the course of repairs to corroded pipework at the terminal, in performance of its duties for assessing the requests that have arisen for increased gas flaring consents while the fractionation trains have been out of commission.

The operators have indicated that rain water penetrating defective lagging led to the corrosion. They hope to recommission the first fractionation train soon.

Fast Reactor Programme

Mr. Wallace: To ask the Secretary of State for Energy, pursuant to his statement on the fast reactor programme on 21 July, *Official Report*, column 1288, what changes have been made to the policy of his Department regarding a proposed European demonstration reprocessing plant to be sited at Dounreay vis-à-vis the evidence submitted to the local public inquiry in 1986; and if he will make a statement.

Mr. Michael Spicer: The report of the public local inquiry into the planning application made by the UKAEA and BNFL is being considered by the Secretary

of State for Scotland. It remains for the European Fast Reactor Collaboration to decide what reprocessing facilities it requires, and when.

Petroleum Exploration Licences

Mr. Michael Brown: To ask the Secretary of State for Energy whether he will arrange a further opportunity for holders of old-style onshore petroleum exploration licences to convert them into new-style licences.

Mr. Peter Morrison: I have today placed in the Libraries of both Houses the text of a notice to be published in the London and Edinburgh Gazettes as soon as possible inviting applications for landward petroleum exploration licences. The invitation is directed only to those with exploration licences awarded under the previous 1976 or 1982 Petroleum Production Regulations and I have specified that applications may be made between 10 am and 12 noon on 18 October 1988.

Old-style exploration licences do not permit exploration drilling to be undertaken. The opportunity which I am now giving will enable the holders of old-style licences to apply for a new exploration licence with a view to proceeding to the drilling stage. Holders of old-style licences expiring within the next 12 months who expect to want to undertake exploration drilling are advised to take advantage of this opportunity, since it is unlikely that there will be any further conversion opportunities until the second half of 1989.

Any wells to be drilled on new licences will also need the agreement of the landowner and occupier, and the consent of the local planning authorities. In certain cases an environmental impact assessment may also need to be prepared.

NATIONAL FINANCE

Child Minders

Mr. Galbraith: To ask the Chancellor of the Exchequer if he will consider giving tax relief on the cost of a child minder.

Mr. Norman Lamont: No.

Company Cars

Mr. Leighton: To ask the Chancellor of the Exchequer what is the annual value of the concession to company cars.

Mr. Norman Lamont: I assume the hon. Member is referring to the fact that the company car scales do not fully reflect the value to an employee of having the private use of a company car. Despite the doubling of the scales for 1988-89, that continues to be the case, by a substantial margin, as my right hon. Friend indicated in his Budget statement. But it is not possible to estimate any additional tax yield from changes without detailed assumptions about the level of each of the scales and the extent to which the rules which currently relate to them would continue to apply.

Child Care

Ms. Richardson: To ask the Chancellor of the Exchequer what action he is taking to implement the recommendations within his area of responsibility of the European Commission's childcare network report, "Caring for Children—Services and Policies for Childcare and Equal Opportunities in the United Kingdom".

Mr. Norman Lamont: I have noted the report's recommendations.

Amusement Machines

Mr. Ashdown: To ask the Chancellor of the Exchequer if he will provide an estimate for the last four years for which figures are available of *(a)* the income received from licences for amusement-with-prizes machines and *(b)* the income received from tax on profits made by amusement-with-prizes machines.

Mr. Lilley: Information in respect of income tax from profits earned on amusement-with-prizes machines is not available. Estimates of gaming licence duty accruing are as follows:

	£ million
1984-85	37·7
1985-86	44·1
1986-87	51·4
1987-88	[1]63·9

[1] Provisional.

National Income

Mr. Frank Field: To ask the Chancellor of the Exchequer (1) if he will list the amount and share of income going to the following tax units for each year since 1978-79, revalued at 1978-79 prices *(a)* the top 1 per cent., *(b)* the next 2 to 5 per cent., *(c)* the next 6 to 10 per cent. and *(d)* the next 10 to 20 per cent. and subsequent deciles;

(2) if he will list the tax take for each of the following income groups for each year since 1978-79, revalued at 1978-79 prices *(a)* the top 1 per cent., *(b)* the next 2 to 5 per cent., *(c)* the next 6 to 10 per cent. and *(d)* the next 10 to 20 per cent. and subsequent deciles;

(3) if he will detail the percentage shares of income tax paid for each year since 1977-78, by *(a)* the top 1 per cent., of taxpayers *(b)* the next 2 to 5 per cent., *(c)* the next 6 to 10 per cent. and *(d)* the next 10 to 20 per cent. and subsequent deciles.

Mr. Norman Lamont: The available information is in the table. The analyses are for single people and married couples paying income tax in each year. The quantiles are determined by reference to income tax liability. Estimates are based on the surveys of personal incomes for years up to 1985-86 and projections of the 1985-86 survey for subsequent years; the latter are therefore provisional. For years before 1985-86, estimates of gross income exclude employees' contributions to occupational pension schemes and some investment income on which tax is deducted at source.

I regret that quantile estimates of gross income before tax for the years 1979-80 to 1982-83 could be provided only at disproportionate cost.

1988-89[3]	13·0	15·0	11·0	15·0	12·0	9·0	8·0	6·0	5·0	3·0	2·0	1·0

[1] Counting married couples as one and combining their incomes.
[2] Provisional; includes estimates of occupational pension schemes and some investment income on which tax is deducted at source.
[3] Provisional.
Note: Figures may not sum to 100 per cent. due to rounding.

P11D Declaration

Mr. Nicholas Bennett: To ask the Chancellor of the Exchequer what representations he has received regarding the raising of the lower limit for the P11D declaration; and if he will make a statement.

Mr. Norman Lamont: I refer my hon. Friend to the reply I gave to the hon. Member for Moray (Mrs. Ewing) on 17 May at column *435*.

Disposable Wealth

Mr. Frank Field: To ask the Chancellor of the Exchequer how many adults in the United Kingdom had disposable wealth in 1979 *(a)* over £5,000 but less than £10,000, *(b)* over £10,000 but less than £20,000 and *(c)* over £20,000; and if he will give details of the numbers for equivalent amounts in real terms for each year since 1980.

Mr. Norman Lamont: The available estimates are published in "Inland Revenue Statistics" (IRS). The latest estimate of the distribution of marketable wealth for 1979 is given in summary form in IRS 1984 table 4.8 with a fuller distribution of identified wealth in IRS 1983 table 4.12. Estimates have not been made in real terms but estimates in current prices are to be found as follows:

	IRS	*Table*
Marketable wealth:		
1980	1986	4.7
1981-85	1987	7.5
Identified wealth:		
1980	1984	4.12
1981	1985	4.11
1982	1986	4.11
1983	1987	7.1
1984	1986	Appendix D1
1985	1987	7.3

Estimates for 1984 and 1985 are provisional. "Identified wealth" is wealth whose distribution can be estimated directly from capital transfer tax statistics.

Taxable Benefits

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer (1) whether he will bring up to date his reply of 6 April 1987 *Official Report*, column *78*, concerning taxable benefits together with an estimate of *(a)* the amount by which the scale charges for company cars fall short of the true value of the benefit and *(b)* the estimated yield from taxing the full value;

(2) what is his estimate of the real and the taxable value of benefits subject to *(a)* special and *(b)* general rules, together with the estimated revenue therefrom.

Mr. Norman Lamont: The available information, based on projections from data relating to 1985-86, on the taxable value of benefits and the tax yield arising are as follows:

Benefit provided by the employer —1988-89	*Taxable value*	*Tax yield £ million*
Cars and free fuel for private use	2,400	700
Private medical insurance	260	80
Other expense payments and benefits	360	120
TOTAL	3,020	900

My right hon. Friend the Chancellor of the Exchequer indicated in his Budget statement that independent studies had suggested that the 1987-88 scale charges represented only about one quarter of the value of the benefit of a company car. But it is not possible to estimate any additional tax yield from changes without detailed assumptions about the level of each of the scales and the extent to which the rules which currently relate to them would continue to apply.

The taxable value of free fuel for private use provided by an employer is calculated by reference to a set of scale charges. For private medical insurance premiums and most other expense payments and benefits—the main exceptions being beneficial loans and accommodation provided by an employer—the taxable value is the cost to the employer of providing the benefit. The taxable value of beneficial loans is calculated by reference to the difference between the official rate of interest (which broadly reflects commercial rates) and the actual rate of interest paid; accommodation provided by an employer is taxed by reference to the annual value of the accommodation, less any rent paid. The Inland Revenue does not collect information on any other basis of valuation.

Taxation

Mr. Grocott: To ask the Chancellor of the Exchequer what proportion of total taxation income tax and national insurance contributions combined constituted in 1979 and in each subsequent year.

Mr. Norman Lamont: Following is the information:

Income tax and national insurance contributions as a percentage share of total taxes and national insurance contributions

	Per cent.
1979-80	45·4
1980-81	45·6
1981-82	44·5
1982-83	44·4
1983-84	44·6
1984-85	43·3
1985-86	43·5
1986-87	44·4
1987-88	43·7

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing for an employee on *(a)* average earnings and *(b)* 10 times average earnings the marginal rate of income tax and national insurance contributions.

Mr. Norman Lamont *[holding answer 25 July 1988]:* The table shows the marginal rate of income tax and NIC of a married man on *(a)* average earnings and *(b)* 10 times average earnings under the 1988-89 tax and NIC regimes. The calculations assume that the man's earnings are his only source of income and that he has no reliefs or allowances other than the married man's allowance. Average earnings are those for full-time males paid at adult rates whose pay is unaffected by absence and are estimated at £244·70 per week in 1988-89.

Marginal rate of income tax and NIC[1]

	Per cent.
Average earnings	34
10 times average earnings	40

[1] Assuming contracted in to SERPS.

Social Security Expenditure

Mr. Grocott: To ask the Chancellor of the Exchequer what proportion of total expenditure social security, health and personal social services combined constituted in each year from 1979 to date.

Mr. Major: The table shows, for the financial years 1979-80 to 1988-89, public expenditure (net of receipts) on

social security, health and personal social services as a percentage of the public expenditure planning total, excluding privatisation proceeds, the adjustment made to bring the sum of individual estimated outturns in line with the Treasury's view of the likely overall outturn (1987-88) only and the reserve (1988-89) only.

	Percentages
1979-80 outturn	39·9
1980-81 outturn	41·2
1981-82 outturn	43·3
1982-83 outturn	44·5
1983-84 outturn	44·9
1984-85 outturn	44·7
1985-86 outturn	46·5
1986-87 outturn	47·4
1987-88 estimated outturn	[1]47·6
1988-89 plans	47·8

Source: Table 5.11, The Government's Expenditure Plans, 1988-89 to 1990-91, Cm. 288-I.

[1] The figure for 1987-88 does not include the additions to health authority cash limits provided for in Spring Supplementary Estimates.

Age Allowances

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing (i) the gain to the Exchequer in the current financial year at present rates of tax of abolishing the age allowances and (ii) the cost of retaining them without the income limit.

Mr. Norman Lamont: The yield in a full year at 1988-89 levels of income of abolishing the age allowances for taxpayers aged 65 and over is estimated to be about £400 million. If the age allowances were retained and the income limit abolished, the cost to the Exchequer would be £190 million.

The estimates are based on a projection of the 1985-86 survey of personal incomes and are therefore provisional.

Tax Allowances

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing for direct tax allowances and reliefs listed in table 6.5 of Cm. 288-I, his estimate of the cost in a full year at current rates of incomes and tax for items which will cost the Exchequer £10 million or more.

Mr. Norman Lamont: I regret that the estimates could be provided only at disproportionate cost.

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing the estimated direct revenue cost in income tax at the standard and higher rates in a full year at current rates of mortgage interest relief, life assurance pensions relief, retirement annuity premium relief and investment income relief of occupational pension funds.

Mr. Norman Lamont: Available estimates are as follows. The cost of mortgage interest relief in 1988-89 is based on the actual mortgage interest rate between April and July and on the assumption that mortgage interest rates remain at the recently announced levels of 11·5 per cent. from August. All estimates are provisional.

	Estimated direct revenue cost 1988-89 £ million
Mortgage interest relief	4,750
—of which relief at the excess over the basic rate	300
Life assurance premium relief	470
Employees' contributions to occupational pension schemes allowed as a deduction for income tax purposes	1,700
Employers' contributions to occupational pension schemes not treated as taxable benefits in kind in the hands of the employees	2,600
Retirement annuity premium relief	450
—of which relief at the excess over the basic rate	100
Relief on investment income of occupational pension funds (assuming relief at the basic rate)	4,400

National Savings

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* tables showing for those above and for those below pensionable age, the estimated number of tax units in receipt of more than £200 gross in national savings accounts and bonds and the average amount received, together with his estimates for 1988-89; and if he will divide the figures to show the amounts for those above and those below pensionable age by range of total income up to a lower limit of £100,000 and distinguishing between single persons, one-earner and two-earner married couples.

Mr. Norman Lamont: I regret that the information requested could be obtained only at disproportionate cost.

Mortgages

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing by range of income and tax status an estimate of the saving to the Exchequer in a full year by setting off investment income against mortgage interest qualifying for relief under the mortgage interest relief at source scheme.

Mr. Norman Lamont: The extent of any saving would depend upon the precise rules proposed for offsetting investment income against payments of mortgage interest and, in particular, on the way in which this restriction would impinge on the system of mortgage interest relief at source (MIRAS).

Stamp Duty

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* his estimate of receipts from stamp duty in the current financial year and in 1987-88 for transactions in *(a)* housing and *(b)* shares.

Mr. Norman Lamont: The information is as follows:

	1987-88 £ million	*1988-89 £ million*
(a) Residential property	800	1,000
(b) Shares	965	600

Overseas Debt

Mr. Lord: To ask the Chancellor of the Exchequer if he will make a statement on the United Kingdom's progress in implementing the debt initiative for the most debt-ridden countries put forward by him.

Mr. Lilley: The United Kingdom has converted aid loans into grants for 14 African countries and has taken part in Paris Club reschedulings for 10 sub-Saharan African countries which have resulted in repayment periods of 15 to 20 years. Reducing interest rates on rescheduled officially guaranteed debts is one of the options included in the agreement at the Toronto economic summit. The United Kingdom will choose this option when the agreement is implemented.

Mr. Tom Clarke: To ask the Chancellor of the Exchequer if he will list the amount of the debts owed to the United Kingdom by less-developed countries, the annual interest payments due, the current account deficits of those countries, the extent of any debt write-offs in the past 12 months and the proportion of each less developed country's debt owed to the United Kingdom.

Mr. Lilley *[holding answer 25 July 1988]:* At end-December 1986 £1,225 million was outstanding from less-developed countries to the Overseas Development Administration. The Export Credits Guarantee Department's amounts at risk are published in its "Summary of Audited Trading Results 1986/87." United Kingdom commercial banks' claims on developing countries are listed in the Bank of England's quarterly bulletin. Comprehensive figures on other private debts are not available.

In April 1988 the International Monetary Fund, in its world economic outlook, estimated that in 1987 developing countries had a surplus of $4·4 billion on the current accounts of their balance of payments.

In the calendar year 1987 the ODA wrote off £26·2 million in claims on developing countries. This comprises £24·7 million charged to the aid programme in respect of conversion of aid loans to grants and other exceptional debt relief and £1·5 million in refinancing grants.

It is not possible to calculate the amount of annual interest payments due to the United Kingdom or the proportion of developing countries' debt owed to the United Kingdom.

Taxpayers

Mr. Allen: To ask the Chancellor of the Exchequer how many people make up the 1 per cent. of taxpayers who pay the most tax; and at what level of income does this 1 per cent. begin.

Mr. Norman Lamont: It is estimated that in 1988-89 the top 1 per cent. of income tax payers comprises 210,000 single people and married couples, each with total income of at least £50,000.

Mr. Allen: To ask the Chancellor of the Exchequer how many people in the tax district which serves Nottingham are in the top 1 per cent. of taxpayers.

Mr. Norman Lamont: A tax district serves the residents of a number of places, according to who is their employer. Information about the amount of income tax payable is not compiled for smaller areas of residence than counties.

Millionaires

Mr. Allen: To ask the Chancellor of the Exchequer what estimate he has of the number of millionaires in Britain.

Mr. Norman Lamont: The latest provisional estimate is that about 10,000 individuals owned wealth exceeding £1 million in 1985.

Friendly Societies

Mr. Atkinson: To ask the Chancellor of the Exchequer if he has received any representations from the friendly society movement seeking a new legislative framework which will enable them to compete more effectively with other financial institutions; and if he will make a statement.

Mr. Lilley: I received a memorandum from the friendly societies liaison committee earlier this month. I intend to meet its representatives to discuss its proposals.

London Clearing Banks

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether, in the matter of his reply dated 14 July 1986, *Official Report*, columns *680-81*, concerning the profits of the London clearing banks, he will provide the corresponding figures for 1986 and 1987.

Mr. Lilley: The information requested, updated to include 1986 and 1987, is as follows:

Pre-tax profits of London clearing banks

	Actual £ million	*Adjusted to 1987 prices* £ million
1987	290	290
1986	3,040	3,167
1985	2,556	2,747
1979	1,571	2,833
1969	212	1,242

The figures are drawn from the annual reports of Barclays, Lloyds, Midland and National Westminster.

EC (Budget)

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will bring up to date the figures on net contributions to the EEC budget in the evidence submitted by Her Majesty's Government to the Treasury and Civil Service Committee on the financial and economic consequences of United Kingdom membership of the European Communities (page 76 of HC57-II Session 1984-85).

Mr. Peter Brooke: The updated figures are set out in the table:

Net contribution to the EC Budget

£ million

Year	*Net contribution before refunds or VAT abatements (cash)*	*Negotiated refunds*	*VAT abatements*	*Net contribution after refunds and abatements (cash)*[1]	*Net contribution after refunds and abatements in constant 1987 prices*[2]
1975	−56	—	—	−56	−170
1976	167	—	—	167	441
1977	369	—	—	369	854
1978	822	—	—	822	1,708
1979	947	—	—	947	1,718
1980	804	98	—	706	1,070
1981	1,090	693	—	397	539
1982	1,625	1,019	—	606	765
1983	1,454	807	—	647	776
1984	1,184	528	—	656	755
1985	2,035	61	166	1,808	1,965
1986	2,273	—	1,701	572	599
1987	2,866	—	1,153	1,713	1,713

[1]United Kingdom figures showing payments to the Community budget on a cash flow basis. Budget refunds and abatements are credited to the year in which they are paid.

[2]Constant prices have been constructed using the GDP deflator at market prices.

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a revision of the tables on pages 33-36 of Cm. 288-II to take account of what was agreed at the EEC summit meeting on financing the EEC budget and of the current year's budget settlement.

Mr. Brooke *[holding answer 27 July 1988]:* I regret I cannot provide the information requested. As my right hon. Friend the Prime Minister informed the hon. Gentleman on 22 February, at column *17*, the overall effect of the EEC summit agreement will be to increase the United Kingdom's net contribution after abatement by about £200 million to £300 million a year compared to the 1·4 per cent. own resources ceiling, and by an estimated £100 million to £200 million a year compared with the effective level of spending in 1987. Revised estimates of the United Kingdom's net payments to Community institutions which take account of the new financing arrangements and this year's budget will be published in the Autumn Statement.

Parliamentary Questions

Mr. Frank Field: To ask the Chancellor of the Exchequer when the sum of £200 was established as the level above which the cost of answering a parliamentary question is considered disproportionate; and if he will place a note in the Library detailing how this sum was arrived at, and the cost assumptions currently used when calculating the cost of parliamentary questions.

Mr. Brooke: The disproportionate cost threshold was set at £200 in 1982, being increased to £250 in March 1988 to maintain the value of the cost threshold in real terms.

The disproportionate cost procedure is designed to identify and draw to ministerial attention the most expensive 1 to 2 per cent. of parliamentary questions. This does not alter the discretion of individual Ministers to decide that a particular question should be answered partially or in full, regardless of cost.

The cost of answering a parliamentary question is based on staff time, using average rates of pay and associated costs (such as national insurance and superannuation for the Civil Service grades concerned) and on substantive non-staff costs such as computer usage.

Arts Sponsorship (Tax Relief)

Mr. Bowis: To ask the Chancellor of the Exchequer what is the cost to the Revenue of tax relief on business sponsorships of the arts; and how many companies have claimed such relief for each of the last five years.

Mr. Norman Lamont: The cost is not known precisely but is currently thought to be no higher than £10 million. The number of companies claiming relief is not known.

Theatre Tickets (VAT)

Mr. Bowis: To ask the Chancellor of the Exchequer what has been the receipts from value added tax on theatre tickets for each of the last five years.

Mr. Lilley: This information is not directly available. The estimated yield of value added tax based on consumers' expenditure on admissions to theatres, concerts and similar live entertainment for the last five years is:

	VAT Yield
	Nearest £5 million
1983-84	35
1984-85	35
1985-86	40
1986-87	50
1987-88	[1]55

[1] Estimated

Public Expenditure

Mr. Worthington: To ask the Chancellor of the Exchequer if he will publish in the *Official Report* a table for the years 1982-83 to 1990-91 bringing together on the same basis the analysis of charges against public expenditure by departmental programme, *Official Report*, columns *375-76*, 25 May, an analysis of charges by functional composition consistent with table 2.7 of Cm. 288-I.

Mr. Major: My reply on 22 July explained that the information requested could be provided only at disproportionate cost.

Departmental Programmes

Mr. George: To ask the Chancellor of the Exchequer how much has been spent by his Department in each of the past five years on the evaluation of Department programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mr. Brooke: The process of evaluation of my Department's programmes is part of the work itself. It is therefore not possible to identify separately the resources involved.

Budget Council

Mr. Summerson: To ask the Chancellor of the Exchequer if he will make a statement on the outcome of the recent meeting of the European Community's Budget Council.

Mr. Brooke: The Budget Council met in Brussels on 26 July. I represented the United Kingdom.

The Council established a first reading draft budget for 1989 totalling 47·6 becu (£33·1 billion) in commitment appropriations and 46·0 becu (£32·0 billion) in payment appropriations, respectively 470 mecu (£325 million) and 480 mecu (£335 million) below the figures proposed by the Commission in the preliminary draft budget (PDB).

The 1989 budget is the first to be subject to the new arrangements for budgetary discipline arising from the Brussels European Council of 11-12 February and to the inter-institutional agreement (IIA) between the Council, the Commission and the European Parliament which incorporates expenditure ceilings for 1988-92. The following table shows that the first reading draft budget is some way within those ceilings.

MECU

	Expenditure ceilings		*Draft budget*	
	ecu	*£*	*ecu*	*£*
Commitment appropriations				
FEOGA guarantee	28,624	19,886	28,127	19,541
Structural funds	9,522	6,615	9,478	6,585
R & D and integrated Mediterranean programmes	1,708	1,187	1,583	1,100
Other policies	2,468	1,715	2,298	1,596
Reimbursements and administration	5,153	3,580	5,081	3,530
Monetary reserve	1,000	695	1,000	695
TOTAL	48,475	33,677	47,567	33,046
Total payment appropriations[1]	46,885	32,572	46,009	31,964

[1] There is only a global ceiling for payments.

Provision for agricultural guarantee expenditure is almost 500 mecu (£350 million) below the limit agreed at the Brussels Council and given legal effect in the Budget discipline decision. The draft budget also includes provision of 1·45 becu (£1 billion) for the cost of depreciating existing agricultural stocks; and of 1 becu (£695 million) for a monetary reserve which can be drawn upon only to cover unforeseen additional expenditure of over 400 mecu (£280 million) arising from changes in the $/ecu exchange rate.

Non-obligatory expenditure (DNO) in the draft budget totals 13·5 becu (£9·4 billion) in commitments and 12 becu (£8·3 billion) in payments. In accordance with the conclusions of the Brussels European Council, the Budget Council distinguished between so-called "privileged" and "non-privileged" expenditure. In the first category, the draft budget provides for the substantial increase in appropriations for the structural funds agreed at the Brussels Council and for research and development appropriations at a level consistent with the framework programme adopted in September 1987. As regards non-privileged DNO, the Budget Council reduced the proposed provision in the PDB by an amount sufficient to ensure that, for this category of expenditure, the growth of both payments and commitments was contained within half the maximum rate of 5·8 per cent. communicated by the Commission. The growth of DNO as a whole in the draft budget is some 16·6 per cent. in commitments and some 17·7 per cent. in payments. The fact that the Council substantially exceeded the overall maximum rate was an inevitable consequence of the increase in provision for the structural funds.

The draft budget implies an own resource call up rate of 1·15 per cent. of Community GNP compared with own resources sub-ceiling for 1989 of 1·17 per cent.

The European Parliament will consider the draft budget at its plenary session in October and is entitled to make amendments and modifications within the ceilings for individual categories of expenditure set out in the IIA. The Budget Council will consider these amendments and modifications at its second reading of the budget in November.

HMSO

Mr. Nicholas Baker: To ask the Chancellor of the Exchequer what plans he has for the future of Her Majesty's Stationery Office.

Mr. Lawson: My right hon. Friend the Paymaster General said in a written answer on 21 July 1987, at column *112*, that the Government have no present plans to privatise Her Majesty's Stationery Office. That remains the present position. However, the Government see every advantage in removing unnecessary constraints and encouraging the management of the office to continue to develop the business on commercial lines. It has therefore been decided to establish Her Majesty's Stationery Office in the autumn as one of the new-style executive agencies as foreseen by the Prime Minister in her announcement on 18 February 1988, at column 1149 et seq, about the future management of the Civil Service. Her Majesty's Stationery Office will remain a trading fund within central Government, accountable direct to Treasury Ministers,

but the controller and chief executive will have greater freedom, within parameters agreed by Ministers, to manage the day-to-day affairs of the agency and in particular to introduce an organisational and pay structure better suited to the most efficient achievement of the agency's aims and objectives. Details of the new structure will be worked out with the Treasury during the next few months. The proposed changes will be the subject of full consultation with the trade unions.

Residence Rules

Mr. Hind: To ask the Chancellor of the Exchequer whether he has any proposals for amending the residence rules and the basis of liability to United Kingdom tax of resident individuals.

Mr. Norman Lamont: The present rules on United Kingdom residence and domicile which determine the basis of an individual's liability to United Kingdom income tax and capital gains tax are complex, long-standing and lack a firm statutory basis. Possible changes to these rules need careful consideration and discussion. With my agreement, therefore, the Inland Revenue is today issuing a consultative document which suggests a possible approach to overcome the deficiencies of the present rules. The aim is to move in the direction of greater simplicity, certainty and neutrality, and to relate liabilities to United Kingdom tax more closely to the degree of an individual's connection with this country.

The Revenue is issuing a press release today giving further details. Comments on the consultative document should be received by 30 November. We shall carefully consider all comments and representations which are made before introducing any legislative changes. I have placed copies of the document in the Library.

Income Tax

Mr. Gordon Brown: To ask the Chancellor of the Exchequer what is the reduction in income tax liability as a result of the introduction of independent taxation in its first full year of operation for *(a)* the top 1 per cent. of taxpayers, *(b)* the top 5 per cent. of taxpayers, *(c)* the top 10 per cent. of taxpayers, *(d)* the bottom 70 per cent. of taxpayers, *(e)* the bottom 60 per cent. of taxpayers, *(f)* the bottom 50 per cent. of taxpayers, *(g)* the bottom 30 per cent. of taxpayers and *(h)* the bottom 10 per cent. of taxpayers, with the percentages defined by reference to the joint income of husband and wife.

Mr. Norman Lamont *[holding answer 20 June 1988]:* Estimates are given in the table. The first column gives the reduction for quantiles of all married couples and single people liable to income tax and the second column gives quantiles based on married couples only. The quantiles in these two columns are defined by the total income of each current tax unit, that is counting a married couple as one unit. The third column gives the reduction in liability for husbands and wives (counted separately) who are liable to income tax on the basis of their own income. The quantiles in this column are calculated by reference to the income of each individual. This approach is more appropriate for analysing the income tax reductions of independent taxation than approaches in which the incomes of married couples are combined. Reductions in income tax liability relate to a full year at 1990-91 projected levels of income. The 1988 Budget proposals for income tax rates and allowances have been indexed to 1990-91 according to the statutory formula.

Quantile group based on income	*Reduction in income tax liability under independent taxation for quantiles[1] of all tax units[2] £ million*	*quantiles[1] of married couples £ million*	*quantiles[3] of married people £ million*
Top 5 per cent.	400	260	90
Top 10 per cent.	440	400	140
Bottom 70 per cent.	160	210	450
Bottom 60 per cent.	130	200	430
Bottom 50 per cent.	100	170	400
Bottom 30 per cent.	—	130	350
Bottom 10 per cent.	—	50	200
All	670	670	670

[1] Based on all income of tax unit, ie combining income of husband and wife.
[2] Married couples and single people.
[3] Based on each married person's own income.

All estimates are provisional and subject to considerable uncertainty; and I regret that it is not possible to provide estimates for the top 1 per cent. of taxpayers.

Public Relations

Mr. Dobson: To ask the Chancellor of the Exchequer what was the total spending by his Department on press, public relations and advertising, respectively, in 1987-88.

Mr. Brooke *[holding answer 21 July 1988]:* Expenditure during 1987-88 was as follows:

	£
Press and public relations	591,460
Advertising	44,723

These figures do not include the marketing costs on sales of Government shareholdings (some £44,616,000 including VAT in 1987-88) which are financed from the sales proceeds.

Mr. Dobson: To ask the Chancellor of the Exchequer what is the latest figure for the estimated expenditure by the Treasury on press and public relations during 1988-89.

Mr. Brooke *[holding answer 21 July 1988]:* The estimated expenditure for the current year is £586,515.

Mr. Dobson: To ask the Chancellor of the Exchequer what is the latest figure for the number of staff presently employed in the press and public relations office of the Treasury.

Mr. Brooke *[holding answer 21 July 1988]:* The number of press and public relations staff employed in the Treasury on 1 July 1988 was 11.

Mr. Dobson: To ask the Chancellor of the Exchequer what is the latest figure for the number of staff presently employed on press and public relations duties by those parts of the former Management and Personnel Office for which he now has responsibility.

Mr. Peter Brooke *[holding answer 25 July 1988]:* Nil.

Mr. Dobson: To ask the Chancellor of the Exchequer what is the latest figure for the estimated expenditure on press and public relations during 1988-89 by those parts of the former Management and Personnel Office for which he now has responsibility.

Mr. Brooke *[holding answer 25 July 1988]:* Nil.

Departmental Advertising

Mr. Dobson: To ask the Chancellor of the Exchequer what is the latest figure for the estimated spending in 1988-89 by the Treasury on *(a)* television advertising, *(b)* radio advertising, *(c)* newspaper advertising and *(d)* other promotional material.

Mr. Brooke *[holding answer 21 July 1988]:* The estimated expenditure for 1988-89 is £49,000, none of which is likely to be on television and radio advertising.

Mr. Dobson: To ask the Chancellor of the Exchequer what is the latest figure for the estimated spending in 1988-89 by those parts of the former Management and Personnel Office for which he now has responsibility on *(a)* television advertising, *(b)* radio advertising, *(c)* newspaper advertising and *(d)* other promotional material.

Mr. Brooke *[holding answer 25 July 1988]:* Nil.

Multiple Share Applications

Mr. Nicholas Bennett: To ask the Chancellor of the Exchequer for which privatisation share issue the first computer program to identify multiple share applications was designed; whether it has been purchased by his Department for use in conjunction with subsequent flotations; and if he will make a statement.

Mr. Norman Lamont *[holding answer 25 July 1988]:* The Government place a high priority on detecting multiple applications in privatisation sales. Methods of detection are a matter for the fraud auditors appointed for each sale, but computers have been used as an aid to detection in every sale since the British Gas sale in 1986 and we would expect them to be used in future sales. Different programmes are used in each sale, as the methods of collecting applications and techniques of detection change. Innovation in computer programmes to improve detection of multiple applicants is one of the criteria in the selection of fraud auditors.

Customs and Excise (Ethnic Monitoring)

Mr. French: To ask the Chancellor of the Exchequer what is the total cost of preparing, printing, posting and processing the results of the ethnic survey questionnaire recently sent to Customs and Excise staff.

Mr. Lilley *[holding answer 26 July 1988]:* This expenditure is included in the Department's general administrative costs and cannot be separately identified without incurring disproportionate expense.

Mr. French: To ask the Chancellor of the Exchequer if he will make a statement regarding the purposes of the ethnic survey questionnaire sent to Customs and Excise staff for completion.

Mr. Lilley *[holding answer 26 July 1988]:* The ethnic survey questionnaires issued to staff in Customs and Excise will provide the Department with statistical information about the number, grade and location of employees from ethnic minorities. The information will be used in monitoring the career progression of these staff to ensure they receive equality of treatment in respect of training, promotion and allocation to duties.

Rating

Mr. Worthington: To ask the Chancellor of the Exchequer what progress has been made in the discussions between the Inland Revenue valuation officer and the Scottish Assessors Association regarding the harmonisation of rating practices.

Mr. Norman Lamont *[holding answer 26 July 1988]:* Significant progress has been made and the prospect of reaching agreement in many important areas in time for the 1990 revaluation is good.

Domestic Credit

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer what assessment he has made of the extent to which the expansion of domestic credit is under control; what effect the influx of foreign funds has had on this; what measures he has taken to sterilise the influx and with what results; and if he will publish in the *Official Report* a table showing for each year since 1972 and the current year to date the expansion of domestic credit and the increase in sterling M3 in cash and in percentage terms.

Mr. Lilley *[holding answer 27 July 1988]:* Domestic credit is monitored as part of the continuous and comprehensive assessment of monetary conditions on which interest rate decisions are based. External influences are taken into account together with all other relevant factors.

The Government's policy is to ensure that, over time, any net foreign exchange intervention is fully funded.

Sterling M3 is now called M3. Figures for M3 and its credit counterparts are available in the annual supplement of *Economic Trends 1988*, and more recent figures are in *Financial Statistics*.

Government Expenditure

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing for each year since 1978 central Government expenditure on goods and services as a percentage of gross domestic product, less the extraction of oil and gas.

Mr. Major *[holding answer 27 July 1988]:* The available information is as follows:

Central Government expenditure on goods and services as a percentage of GDP at market price, less extraction of mineral oil and natural gas

	Percentage
1978	13·0
1979	13·0
1980	14·3
1981	14·7
1982	14·9
1983	15·2
1984	15·1
1985	14·8
1986	14·1
1987	13·6

Source: Based on United Kingdom National Accounts Statistics.

Incomes

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* tables showing by range of total income up to a lower limit of £100,000, for those above and those below pensionable age and distinguishing between single persons, one-earner and two-earner married couples, the estimated saving to the Exchequer of abolishing all allowances and reliefs other than the basic single and married allowances; and if he will provide similar tables on the 1990 basis of separate taxation of husbands and wives.

Mr. Norman Lamont *[holding answer 27 July 1988]:* An answer will be given after summer recess.

Market Researchers

Mr. Bowis: To ask the Chancellor of the Exchequer whether companies using the services of market researchers are advised to issue P45s on completion of their services.

Mr. Norman Lamont *[holding answer 27 July 1988]:* Companies employing market researchers do not normally issue forms P45 on the completion of an assignment, unless there is no intention of providing the researcher with a further assignment or the researcher indicates that the employment has ceased and requests a form P45.

Mr. Bowis: To ask the Chancellor of the Exchequer what decision has been taken by the Inland Revenue concerning the taxation status of market researchers; and if he will make a statement.

Mr. Norman Lamont *[holding answer 27 July 1988]:* The status of market research interviewers, like the employment status of all other workers, depends on the terms on which they are engaged and work. The Inland Revenue's evaluation of the terms which normally apply leads it to believe that in general market researchers are engaged under contracts of employment.

SOCIAL SECURITY

Earnings Taper

Mr. Chris Smith: To ask the Secretary of State for Social Services (1) pursuant to his answer to the hon. Member for Hornchurch (Mr. Squire), *Official Report*, 29 June, column 269, whether he intends to take any steps to ensure that the single homeless living in hostel accommodation who are in full-time training and work placements do not experience a 100 per cent. taper on their earnings, if they earn more than £5 a week;

(2) if he will give his current estimate of the number of social security recipients living in hostel accommodation who undertake full-time training or work placements and have a 100 per cent. taper on their earnings, under the provisions of the Social Security Act 1986;

(3) which social security recipients, other than the single homeless living in hostel accommodation and undertaking training or work placements have a 100 per cent. taper on their earnings.

Mr. Scott: Single people who are working fewer than 24 hours a week will have the first £5 of any earnings disregarded, or £15, if they have an underlying entitlement to the disability or lone-parent premium in income support. The number of income support recipients living in hostels and whose part-time earnings exceed their earnings disregard is not known. Each spouse in a married couple unemployed for less than two years has a part-time earnings disregarded of £5. Couples unemployed for more than two years have a combined disregard of £15. Any income support recipient or dependant whose part-time earnings exceed his or her disregard has those earnings taken fully into account. We have undertaken to monitor the effects of the earnings disregards and to consider their implications. People who are in remunerative work for 24 hours or more a week are not entitled to income support. No full-time workers now experience combined income tax and benefit withdrawal rates of 100 per cent. or more.

Departmental Offices (Norwich)

Mr. John Garrett: To ask the Secretary of State for Social Services in respect of the local offices of his Department at Chantry house and Baltic house, Norwich, how many items of unlinked correspondence were recorded each month since 11 April.

Mr. Scott: For the months since 11 April 1988, the totals of income support and supplementary benefit correspondence which were unlinked after two days at the Chantry house and Baltic house offices of the Department were:

	30 April 1988	*31 May 1988*	*30 June 1988*
Chantry house	0	18	0
Baltic house	17	38	4

No records are maintained on unlinked correspondence for other local office benefits.

Mr. John Garrett: To ask the Secretary of State for Social Services in respect of the local offices of his Department at Chantry house and Baltic house, Norwich, what was the average number of new claims and cases awaiting review which were recorded as outstanding each month since 11 April; and how many related to supplementary benefit claims and to single payment claims.

Mr. Scott: The number of cases outstanding at the two Norwich offices is as follows:

	Chantry House			Baltic House		
	April	May	June	April	May	June
1. (a) Income support claims	181	126	125	178	182	273
(b) Assessment reviews	78	44	46	359	173	73
2. (a) Supplementary benefit claims	22	0	0	136	17	1
(b) Single payments	10	0	0	37	3	13

Source: Internal management information statistics. This information is provisional only and subject to amendment.

Mr. John Garrett: To ask the Secretary of State for Social Services in respect of the local offices of his Department at Baltic house and Chantry house, Norwich, how many social fund applications were made each month for budget loans; crisis loans and community care grants since 11 April; how many applications in each of these categories were determined each month; and how many applications in each of these categories were granted each month.

Mr. Scott: The following numbers of social fund applications were made to the two Norwich offices:

	Norwich (Chantry House)			Norwich (Baltic House)		
	April	May	June	April	May	June
Community care grants	23	32	49	5	19	37
Budgeting loans	64	112	163	53	153	226
Crisis loans	61	113	126	33	55	63

These data are provisional and subject to amendment.

Details of the number of applications processed and the number of awards made each month are in the Library.

Mr. John Garrett: To ask the Secretary of State for Social Services, in respect of the local offices of his Department at Baltic house and Chantry house, Norwich, what load of current cases each office has carried *(a)* in the past six months, and *(b)* since 11 April; how many new claims for income support were made each month; and how many claims were determined.

Mr. Scott: The live case load for each office requested is:

	Chantry house	Baltic house
Supplementary benefit live load as at 17 November 1987	15,350	17,684
Income support live load as at 31 May 1988	13,129	14,633

Those figures may, however, overstate the number of people receiving supplementary benefit. I refer the hon. Gentleman to the footnote to the reply given to my hon. Friend the Member for Hyndburn (Mr. Hargreaves) on 31 March 1988, at columns *660-61*.

(*Source:* 100 per cent. count of cases in action which includes a small number of cases not actually in receipt of benefit.)

The number of income support claims received and determined for each office is as follows:

	Chantry house			Baltic house		
	April	May	June	April	May	June
Claims received	879	741	864	520	943	1,017
Determinations made	698	796	865	342	939	926

Source: Internal management statistics. This information is provisional and subject to amendment.

Poverty and Unemployment Traps

Mr. Frank Field: To ask the Secretary of State for Social Services if he will update again the information given in the first paragraph of the section on poverty and unemployment traps which appears on page 94 of the current issue of "Social Trends", taking into account changes in housing benefit, and the transition from supplementary benefit to income support in April, but assuming that income tax and national insurance remain at current levels; and if he will update again the information given in the second paragraph of the section on poverty and unemployment traps which appears on page 94 of the current issue of "Social Trends" assuming that a married couple with four children were faced with social security changes in April, but assuming that there will be no change in the level of national insurance contributions or income tax.

Mr. Scott: For a full-time working family paying income tax and national insurance contributions, and receiving income-related benefits, an extra £1 of gross earnings can lead to an increase in income tax of 25p, a 9p increase in national insurance contributions, 46p reduction in family credit and a 17p reduction in housing benefit—a total of 97p. Only 45,000 out of 17 million working heads of tax units are likely to have combined income tax and benefit withdrawal rates in excess of 90 per cent. In April 1987, 70,000 working heads experienced a combined rate in excess of 100 per cent.

After the addition of benefits, the net income of a hypothetical married couple with four dependent children (aged 3, 8, 11 and 16), and paying average rent and local authority rates, would be £123·25 at gross weekly earnings of £75. This figure would rise to £140·90 at gross earnings of £165. Prior to the reform of social security, net income at £75 gross earnings would have been about £127. It would then have fallen below this level until gross earnings reached £165.

The effects under the reformed social security scheme are cushioned somewhat by the fact that family credit is paid for 26 weeks irrespective of any subsequent change in circumstances.

Supplementary Benefit

Mr. Frank Cook: To ask the Secretary of State for Social Services if he will give the number of, or estimates of, people who were in November 1987 *(a)* in receipt of supplementary benefit and *(b)* dependent upon supplementary benefit in respect of the offices of his Department at Stockton, Middlesbrough, Hartlepool, Eston and Redcar.

Mr. Scott: The number of people in receipt of supplementary benefit on 18 November 1987 was:

	Number
Stockton	20,321
Middlesbrough	23,141
Hartlepool	12,365
Eston	8,445
Redcar	9,492

Source: 100 per cent. count of cases in action.

I regret that information on the number of people dependent upon supplementary benefit is not available at local level.

Mr. Frank Field: To ask the Secretary of State for Social Services if he will update the answer given to the hon. Member for Birkenhead, *Official Report,* 9 December, column *206,* to give the number of claimants and dependants below and above retirement age for each year since 1979, who have been dependent on supplementary benefit for over five years.

Mr. Scott: The table shows and up-dates the number of claimants below and above pension age who have been dependent on supplementary benefit for five or more years since 1979. Information about their dependants is not immediately available. When it is I shall write to the hon. Member.

	Supplementary pension claimants (thousands)	*Supplementary allowance claimants (thousands)*
November 1979	1,053	234
December 1980	1,054	251
December 1981	1,087	281
December 1982	1,090	308
December 1983	1,057	348
December 1984	1,041	409
February 1986	1,026	535
May 1987	1,033	659

Source: Annual Statistical Enquiries.

There was no annual statistical inquiry in 1985: the one due in December that year was deferred until February 1986.

Mr. McLeish: To ask the Secretary of State for Social Services if he will give the total number of 16 and 17-year-olds claiming supplementary benefit in September in each of the years 1979 to 1987 inclusive.

Mr. Scott: Information about the number of 16 and 17-year-olds claiming supplementary benefit in any given period is not available. The numbers in receipt of supplementary benefit on a day in each of the months indicated are shown in the following table:

Date	*Total number of 16/17-year-olds in receipt of supplementary benefit (thousands)*
November 1979	79
December 1980	141
December 1981	166
December 1982	183
December 1983	175
December 1984	184
February 1986	168
May 1987	141

Source: Annual sample statistical inquiries.
Notes: No inquiry was held in 1985.

Mr. Frank Field: To ask the Secretary of State for Social Services (1) if he will detail the extent to which the increase in the number of persons living at or below the supplementary benefit level since 1979 has been due to an increase in the real value of the scale rates;

(2) what proportion of the increase in the number of persons living at 100 per cent. or below the supplementary benefit level is accounted for by the real increase in the value of benefits over the periods *(a)* 1979 to 1983 and *(b)* 1979 to 1985.

Mr. Battle: To ask the Secretary of State for Social Services how far the fall in the number of persons living *(a)* below supplementary benefit level, *(b)* on supplementary benefit and *(c)* at between 100 and 140 per cent. of supplementary benefit level is accounted for by the changes in the real value of the supplementary benefit scale rate between 1979 and 1985.

Mr. Scott *[holding answer 8 July 1988]:* The information requested is as follows. The increase attributable to higher supplementary benefit real values is greater in some instances than the increase which actually occurred. Thus, if supplementary benefit had increased only in line with prices, the numbers of people in these ranges would have reduced. Supplementary benefit recipients do not, as a general rule, have incomes of 100 per cent. of the supplementary benefit scale rates. Two individuals shown in the low-income tables as having similar incomes may have incomes which are significantly different because two quite separate scale rates are applied.

Percentage of the increase in the number of people in benefit units attributable to real terms increases in the supplementary benefit scale rates 1979-85

	Per cent.
1. People in units receiving supplementary benefit	30
2. People in units not receiving supplementary benefit but with RNR below 100	220
3. Total: Rows 1 and 2 together	[1]50
4. People in units not receiving supplementary benefit and with RNR between 100 and 140	140

[1] The corresponding figure for the period 1979 to 1983 is 40 per cent.

Notes:

(1) Relative net resources is a concept expressing the net income of people not in receipt of supplementary benefit as a proportion of the supplementary benefit scale rates. A full explanation of how RNR is calculated may be found in the technical notes included in "Low Income Familes—1985", copies of which are available in the Library.

(2) Further information on the relative net resource distribution of

persons in benefit units receiving supplementary benefit or housing benefit supplement may be found in the reply given to the hon. Member for Birkenhead (Mr. Field) on 17 June, at column *366*.

Disabled People (Report)

Mr. Alfred Morris: To ask the Secretary of State for Social Services what considerations he has given to "Last On The List: Community Services for People with Disabilities", an independent report published by the King's Fund Institute, a copy of which has been sent to him; what action he is taking; and if he will make a statement.

Mr. Scott: We welcome the publication of this report, as it sets out a valuable overview on the ways that services are being provided for people with physical disabilities. The report is receiving careful consideration and it is proposed to discuss its implications further with interested parties. It will also be taken into account in framing the Government's proposals on community care policy, following consideration of Sir Roy Griffiths' recent report. The report is not, however, addressed solely to Government and we hope that it will stimulate similar consideration and discussion amongst service providers in the public, private and voluntary sectors.

National Insurance

Mr. Austin Mitchell: To ask the Secretary of State for Social Services, pursuant to the reply dated 25 March 1987, *Official Report*, columns *199-200*, concerning reduced rate national insurance contributions, if he will provide figures for the gross and net contributions, taking into account the figures supplied on the same date in reply to a question asking for an update of table 40.13 of social security statistics 1985, 25 March, *Official Report*, column *200*.

Mr. Scott: I shall write to the hon. Member.

Mrs. Mildred Edwards

Mr. Mudd: To ask the Secretary of State for Social Services when the hon. Member for Falmouth and Camborne can expect a reply to his letter to the Parliamentary Under-Secretary of State, dated 27 January, concerning Mrs. Mildred Edwards, departmental reference PO(5)1223/63.

Mr. Scott: A reply was sent on 11 April.

Ynys Môn

Mr. Ieuan Wyn Jones: To ask the Secretary of State for Social Services if he will list for each local office of his Department in Ynys Môn *(a)* the load of current cases which each office has carried during the last six months, *(b)* the number of new claims for income support made in each month since 11 April, *(c)* the number of claims for income support determined during each month since 11 April for income support and *(d)* the number of social fund applications made, and the number determined, in each month since 11 April for (i) budget loans, (ii) crisis loans and (iii) community care grants.

Mr. Scott: The constituency of Ynys Môn is served by the local office at Anglesey, but the boundaries are not conterminous.

The information requested is as follows:

	Number
Supplementary benefit live load at 17 November 1987	7,323
Income support live load at 31 May 1988	6,588

Note: These are the only figures available for the period. The source is a 100 per cent. count of cases in action. These figures may, however, overstate the number of people receiving supplementary benefit. The footnote to the reply given to my hon. Friend the Member for Hyndburn (Mr. Hargreaves), 31 March 1988 c. *660-61* refers.

Income support

	11 to 29 April 1988	*May 1988*	*June 1988*
Claims made	278	448	623
Claims determined	220	356	454

Note: These figures are provisonal and subject to amendment.

Social Fund applications

	11 to 29 April 1988	*May 1988*	*June 1988*
Budgeting loans	43	78	120
Crisis loans	25	38	56
Community care grants	17	20	25

Details of the number of social fund applications determined each month for each office have already been placed in the Library.

Mr. Ieuan Wyn Jones: To ask the Secretary of State for Social Services if he will list for each local office of his Department in Ynys Môn the average number of new claims and cases awaiting review which were recorded as outstanding in each month since 11 April; how many were related to (i) supplementary benefit claims and (ii) single payment claims; and how many items of unlinked correspondence were recorded in each month since 11 April.

Mr. Scott: The constituency of Ynys Môn is served by the local office of Anglesey, but the boundaries are not conterminous.

The amount of work outstanding in each month since 11 April 1988 is as follows:

	11 to 29 April	*May*	*June*
Income support claims	58	92	169
Assessment reviews	231	118	59
Supplementary benefit claims	67	10	2
Single payment claims	57	174	49

These figures are provisional and are subject to amendment.

I regret that no details are available about unlinked correspondence.

Mr. Ieuan Wyn Jones: To ask the Secretary of State for Social Services if he will list for each local office of his Department in Ynys Môn by staffing grades *(a)* the current staff complement, *(b)* the number of permanent staff currently in post, *(c)* the number of temporary staff currently in post, *(d)* the number of staff members currently being trained, *(e)* the number of qualified officers engaged in training staff and *(f)* the annual turnover of permanent staff.

Mr. Scott: Ynys Môn is served by Anglesey integrated local office. The requested information in respect of that office is as follows:

Grade	*Complement 1988-89*	*Permanent staff in post 1 July 1988*	*Temporary staff in post 1 July 1988*	*Turnover*
Senior Executive Officer	1	1	—	—
Higher Executive Officer	4	4	—	—
Local Officer 1	25	25	—	—
Local Officer 2	39	37	—	6
Administrative Assistant	12	11	2	5
Typist	2	1	—	—
TOTAL	83	79	2	11

The information regarding turnover relates to the year ending 31 March 1988.

On 1 July 1988 there were three LO1s and one LO2 being trained by means of self-instruction. Two LO1s supervise and assist their training as and when required in addition to other LO1 duties.

Family Income Supplement

Mr. Squire: To ask the Secretary of State for Social Services how much family income supplement rose in *(a)* cash terms and *(b)* real terms between (i) 1979 and 1988, (ii) 1979 and 1985 and (iii) 1983 and 1985.

Mr. Scott: The information requested is shown in the tables. The latest relevant date for comparison purposes for family income supplement is April 1987, the date of the last uprating. Family income supplement was replaced by family credit in April 1988, but it is not possible to make direct comparisons of the rates of family credit with family income supplement because the structure of the schemes is different.

(i) Period November 1979 to April 1987

	(1) November 1979 actual £	*(2) April 1987 actual* £	*(3) November 1979[1] expressed in April 1987 prices* £	*(4) Actual increase column 2 over column 1* £	*per cent.*	*(5) Real value increase column 3 over column 2* £	*per cent.*

Family income supplement.							
Prescribed amount for one child family where child is aged:							
Under 11	85·50	97·50	94·63	12·00	14·0	2·87	3·0
11-15	85·50	98·50	94·63	13·00	15·2	3·87	4·1
16 and over	85·50	99·50	94·63	14·00	16·4	4·87	5·1
Maximum amount for one child family, where child is aged:							
Under 11	22·00	25·00	24·35	3·00	13·6	0·65	2·7
11-15	22·00	25·50	24·35	3·50	15·9	1·15	4·7
16 and over	22·00	26·00	24·35	4·00	18·2	1·65	6·8

[1] Based on the movement in the General Index of Retail Prices (all items) between November 1983 and November 1985.

Low Incomes

Mrs. Margaret Ewing: To ask the Secretary of State for Social Services if his Department has any plans to implement the recommendations of the Social Services Committee that the Government should publish data on low income for each country in the United Kingdom and for each English region; and if he will make a statement.

Mr. Scott: The Select Committee will receive a formal response to its recommendations in the usual way. It would not be appropriate to comment until the Government have responded to the Committee.

Young People (Benefits)

Mr. McLeish: To ask the Secretary of State for Social Services if he will estimate the number of 16 and 17-year-olds who will lose their general entitlement to benefit in September; and if he will also give an estimate of the number likely to retain their entitlement.

Mr. Scott: Our best estimate is that some 70,000 school leavers will be affected by the September changes removing general income support entitlement and guaranteeing a YTS place and a training allowance. In some 18,000 cases income support dependency additions will be payable during the child benefit extension period because the young person's parents will be in receipt of income support. We estimate that of the order of 4,000 young people with good reason for living independently will be entitled to income support in their own right during the child benefit extension period only.

A possible 90,000 16 and 17-year-olds already in receipt of income support before September will instead receive bridging allowance from the Department of Employment for a limited period until they take up a place on the youth training scheme.

A total of some 18,000 young people will continue to be entitled to income support in their own right. These will include lone-parents and the severely disabled.

Fraud

Mr. Darling: To ask the Secretary of State for Social Services (1) if he will list for each of his Department's offices the number of people whose claims were disqualified because of *(a)* fraud and *(b)* suspected fraud for the years 1983 to 1987;

(2) if he will list the sums discovered to have been obtained by *(a)* fraud and *(b)* suspected fraud for each office of his Department for each of the years from 1983 to 1987;

(3) if he will list for each of his Department's offices the amount expected to be detected by managers in respect of claims that are either fraudulent or as suspected of being so in 1987 and 1988.

Mr. Scott: I regret that the information requested is not held centrally and could be obtained only at disproportionate cost.

Mr. Darling: To ask the Secretary of State for Social Services what is the average numbers of days that his Department assumes that a person ceases to claim benefit after having a claim refused by reason of proved or suspected fraud or other wrongful claims.

Mr. Scott: Where the amount of benefit in payment is reduced or extinguished following a fraud investigation, it is estimated that on average the changed position will continue for 32 weeks. This is based on a study by the Department's operational research services, a copy of whose report is in the Library.

Social Fund

Mr. Darling: To ask the Secretary of State for Social Services whether he intends to review the operation of the social fund; and what proposals he has to encourage people to claim benefit to which they are entitled.

Mr. Scott: There is continuous review of the operation of the social fund as part of the constant processes of monitoring and policy evaluation. There is a range of booklets, leaflets and posters giving prospective applicants to the social fund details of both the regulated and discretionary payments available under the scheme.

Mr. Madden: To ask the Secretary of State for Social Services what are the social fund budget profiles separately for grants and loans for each of the Bradford local offices of his Department and the Keighley office for each month of the financial year 1988-89; and what is expenditure so far.

Mr. Scott: The profiles set for these offices at the beginning of the financial year were:

	Loans		Grants	
	Per cent.	£	Per cent.	£
Bradford East				
April	2·23	9,800	2·23	4,150
May	8·88	39,024	8·88	16,529

February	9·19	17,296	9·19	7,522
March	9·40	17,692	9·40	7,694

Profiles are only a management guide to anticipated expenditure and are adjusted monthly in the light of actual expenditure.

Details of actual expenditure to date have been placed in the Library.

There have been technical problems with the social fund microcomputers. These are being corrected as quickly as possible. As a result these figures may be subject to revision.

Mr. Terry Davis: To ask the Secretary of State for Social Services how many appeals to the social fund inspectorate were received at the social security office at Erdington in Birmingham on Friday 22 July; and when the papers for these appeals were sent to the social fund inspectorate.

Mr. Scott: One application for a review by the social fund inspectorate was received in Erdington social security office on 22 July and the papers were forwarded on 27 July.

Mr. Terry Davis: To ask the Secretary of State for Social Services how many social fund officers are employed at the social security office at Erdington in Birmingham; what training has been given to these social fund officers; and what training will be given to them in future.

Mr. Scott: There are seven social fund officers currently employed at the Erdington office. Details of the training given to social fund officers was provided in the reply to the hon. Member for Islington, North (Mr. Corbyn) on 15 December 1987, at columns *483-84*. All seven officers have completed their training. The ongoing training needs of social fund officers are the subject of continual review.

Mr. Terry Davis: To ask the Secretary of State for Social Services how many applications for crisis loans were rejected by the social fund officers at the social security office at Erdington in Birmingham in April, May and June.

Mr. Scott: Information on numbers of social fund applications processed is in the Library.

Private Pensions

Mr. Cryer: To ask the Secretary of State for Social Services what is his Department's practice with regard to warning applicants for private pension schemes that they may forfeit state benefits and any local authority benefits dependent on his Department's qualifications, if income from a private pension exceeds a given level.

Mr. Scott: The leaflets and guides which the Department issues in relation to each benefit explain the current effect, if any, of receipt of an occupational pension on the benefit concerned. These leaflets and guides are available from local social security offices and post offices. It would not be practicable for the Department to give definitive information to individuals about the likely effect —possibly up to 40 years later—of their entitlement to an occupational or personal pension on state and local authority-administered benefits.

Family Credit

Mr. Cryer: To ask the Secretary of State for Social Services what facilities he is providing to ensure that family credit claims are processed rapidly; and if he will make a statement.

Mr. Scott: The central unit which previously administered family income supplement has been expanded to handle the higher level of claims expected under family credit, and an entirely new computer system has been developed and brought into use. Arrangements provide for priority to be given to claims where people have just started work following unemployment and to cases referred by local offices as being in financial difficulties whilst awaiting the award of family credit.

Mr. Cryer: To ask the Secretary of State for Social Services (1) what is the total number of applications for family credit which have been processed and paid from his Department's office areas for Leeds road, Law Russell house and Westfield house in Bradford; and if he will make a statement;

(2) what is the number of applicants for family credit from the office areas for Leeds road, Law Russell house and Westfield house in Bradford; how many people were in receipt of family income supplement for those same areas; and if he will make a statement.

Mr. Scott: Family credit claims are dealt with centrally, as were claims for family income supplement, and no information is available about claims from particular local areas for either benefit.

Single Payments

Mr. Fraser: To ask the Secretary of State for Social Services how many applications for single payments and supplementary benefit claims had been made before 11 April; and how many are outstanding at his Department's offices serving the London borough of Lambeth.

Mr. Scott: The London borough of Lambeth is served by 10 local social security offices. The boundaries of these offices are not conterminous with those of the borough. Local offices do not record single payments claims outstanding. Instead, a record is kept of the number of cases awaiting action. Figures for outstanding supplementary benefit claims and cases awaiting action on single payment claims at the close of business on 8 April and on 30 June are given in the table. The figures are provisional and subject to amendment.

	Single payment cases		*Supplementary benefit claims*	
	8 April	*30 June*	*8 April*	*30 June*
Office				
Balham	246	4	303	nil
Battersea	271	194	458	nil
Brixton	397	34	356	287
Camberwell	318	85	283	6
Crystal Palace	292	247	673	235
Kennington Park	416	[1]728	193	2
Oval	525	[1]2,085	368	6
Peckham	230	51	343	3
Southwark	238	42	341	20
Streatham	402	[1]475	611	74

[1] The later figures exceed the earlier ones because take-up campaign claims were sent to a central clearing office for sorting and onward transmission to the appropriate local office. Some claims made on or before the 8 April did not therefore arrive in local offices until after that date.

Mr. Barry Jones: To ask the Secretary of State for Social Services what was the cost of supplementary benefit single payments for each of his Department's local offices in the county of Cleveland in May 1985, 1986 and 1988; and if he will make a statement.

Mr. Scott: I refer the hon. Member to the reply to him on 25 July.

Housing Benefit

Mr. Favell: To ask the Secretary of State for Social Services what percentage of council house tenants are receiving housing benefit in *(a)* Glasgow, *(b)* Manchester, *(c)* Stockport, *(d)* Bristol and *(e)* Barnet.

Mr. Scott: The latest available information is given in the table.

Proportion of council house tenants receiving assistance through the housing benefit scheme 1987

	Percentage
Glasgow	73
Manchester	70
Stockport	72
Bristol	68
Barnet	62

Source:
The information for English authorities is derived from the publication "Housing Rent Statistics at April 1987" produced by the Chartered Institute of Public Finance and Accountancy. The figure for Glasgow is derived from the local authority housing stock as published in "Rating Revenue Estimates of Income and Expenditure 1987" produced by CIPFA Scotland; and rent rebate information from the local authority housing benefit subsidy claims for 1987-88.

Mr. Soley: To ask the Secretary of State for Social Services if he will publish a table giving the latest estimate of the number of tenants in receipt of housing benefit *(a)* by tenure, *(b)* by reason of eligibility for benefit and *(c)* whether the claims are standard or certificated.

Mr. Scott *[holding answer 27 June 1988]:* The information available is in the tables.

Housing Benefit: Estimated number of tenants receiving housing benefit 1988-89
Table 1—By tenure type

	Rent rebate/ allowance 000's	*Rate rebate 000's*
Local authority tenants	3,430	3,385
Private tenants	1,055	815

Note: (1) There is a significant overlap between rent rebate/allowances and rate rebates. Some tenants may receive help with both rent and rates whereas some may be receiving assistance with only rent or rates.

Table 2—By reason of eligibility

Client group	*number 000's*
Pensioners aged 80 and over	485
Pensioners aged 60 to 79	2,075
Sick and disabled	165
Lone parents	495
Couples with children	640
Others	640

Notes:
(1) Information cannot be separated by tenure type.
(2) Figures rounded to nearest 5,000.

Table 3—By tenants recieving/not receiving income support

	number 000's
Receiving income support	2,645
Not receiving income support	1,850

Departmental Staff

Mr. Simon Hughes: To ask the Secretary of State for Social Services what will be the implications for staff who have previously been working for his Department's offices situated in the London borough of Southwark of the proposed creation of the Department of Social Security; and if he will make a statement.

Mr. Scott: The decision to divide the DHSS into two separate Departments has only just been made and detailed arrangements will be announced later. One of our

first concerns will be to ensure that proper arrangements are made to protect the legitimate interests of staff. The trades unions representing the staff affected will, of course, be consulted.

Rating Reform

Mr. Blunkett: To ask the Secretary of State for Social Security (1) if he will show the effects of the proposed community charge benefit taper of 15 per cent., with tapers of *(a)* 20 per cent., *(b)* 12·5 per cent., *(c)* 10 per cent. and *(d)* 7·5 per cent., by showing for each of these tapers the cost at 1988-89 prices of paying community charge benefit to each of the following categories of income units, showing for each category how many income units he estimates would actually receive community charge benefit and how many would be entitled to community charge benefit (i) all income units, (ii) income units consisting of a single person over pensionable age, (iii) income units consisting of a couple both of whom are over pensionable age, (iv) income units consisting of a single person with dependent children, (v) income units consisting of a single person of less than pensionable age without dependent children, (vi) income units consisting of a married or cohabiting couple one or both of whom is of less than pensionable age, without dependent children, (vii) income units consisting of a married or cohabiting couple with dependent children and (viii) any income units not included in the categories above;

(2) what he now estimates will be *(a)* the total cost of community charge benefits in 1990-91 at 1988-89 prices, *(b)* the total number of income units in receipt of community charge benefits in 1990-91, *(c)* the total number of income units entitled to community charge benefits, whether or not they claim and receive benefit, *(d)* the total cost in 1988-89 of rate rebates, *(e)* the total number of income units in households which are in receipt of rate rebates in 1988-89, *(f)* the total number of income units in households which are entitled to rate rebates on 1988-89, whether or not rebate is actually claimed and received and *(g)* the cost of administering rate rebates in 1988-89 and the cost of administering community charge benefits in 1990-91, at 1988-89 prices; and if he will attribute any additional cost of community charge benefit compared to rate rebates to (i) payment of benefit to non-householders, (ii) the reduction in the taper from 20 per cent. to 15 per cent., (iii) increased administrative costs and (iv) other reasons.

Mr. Scott: I shall write to the hon. Member.

Asbestos

Ms. Ruddock: To ask the Secretary of State for Social Services (1) what progress has been made with the production of a leaflet to give information on claims for industrial disablement benefit, to those diagnosed as suffering from an asbestos-related illness; and when he expects it to be published;

(2) what organisations outside his Department will be consulted by the officials asked to investigate the possibility of producing a leaflet to give information on claims for industrial benefits to those suffering from an asbestos-related illness.

Mr. Scott: A leaflet giving information about claiming industrial injuries disablement benefit for an asbestos-related prescribed disease will be published as soon as resources are available. It is not normal practice to consult organisations outside the Department about such a leaflet.

Benefits

Mr. McKelvey: To ask the Secretary of State for Social Services what is the average time taken to calculate entitlement to transitional payments; and when claimants are likely to receive benefit.

Mr. Scott *[holding answer 14 July 1988]:* The information requested is not yet available.

Ms. Abbott: To ask the Secretary of State for Social Services, pursuant to his answer of 5 May, *Official Report*, columns *550-51*, if he is in a position to state what stage negotiations have reached with the local authority associations regarding their role in administering the claims for transitional payments and the reimbursement of administrative costs solely for the additional work arising out of transitional protection.

Mr. Scott *[holding answer 15 July 1988]:* Agreement was reached in June with the local authority associations on the information to be provided by local authorities to the new transitional payments unit and the procedures which would be set up to obtain it. Apart from the detailed payment arrangements, negotiations with the associations on the financial support for local authorities' additional administrative costs have now also been completed. The Government are allocating £1 million among authorities for their costs in preparing to assist the transitional payments unit and authorities will be paid £5 for each completed inquiry form returned to the unit.

Ms. Abbott: To ask the Secretary of State for Social Services, if, pursuant to his statement of 27 April, *Official Report*, columns 356-61, and the answer of 5 May, *Official Report*, columns *550-51*, he will state what arrangements are being made and what resources are available to compensate local authorities for the costs of the publications and other information which they produced for claimants and which have had to be reissued in the light of the changes announced on 27 April and 5 May; and if he will make a statement.

Mr. Scott *[holding answer 15 July 1988]:* The publicity campaign carried out nationally through two press advertising campaigns, leaflet RR4 "Housing Benefit New Rules" and posters should ensure that local authorities' additional publicity costs arising from the changes to the schemes are minimised. However, we are making an addition of £2 million to the housing benefit administration costs grant payable to authorities in 1988-89 to reflect their additional workload and costs as a result of the change in the capital rule.

Severe Disablement Allowance

Mrs. Beckett: To ask the Secretary of State for Social Services what would be the cost of *(a)* abolishing the 80 per cent. test of disablement for severe disablement allowance, *(b)* increasing the rate of severe disablement allowance to the same rate as invalidity benefit and *(c)* both *(a)* and *(b)*.

Mr. Scott *[holding answer 18 July 1988]:* I regret that information is not available on which to base reliable estimates of the cost of abolishing the 80 per cent. disablement condition for severe disablement allowance. It is estimated that the net cost of paying the allowance at the same rate as invalidity benefit to current recipients would be around £210 million a year.

HEALTH

Immunisation

Ms. Harman: To ask the Secretary of State for Social Services if he will consider making immunisation against certain diseases a precondition of children attending school.

Mrs. Currie: Such an idea would effectively make immunisation compulsory. It has not been public policy for immunisation to be compulsory, with the exception of smallpox, which ceased to be so in 1948. Some other European countries without compulsory vaccination achieve equally high immunisation rates as those which employ compulsion, and very high rates are already achieved in many parts of this country already.

However, we are about to launch a major publicity campaign to introduce a combined immunisation against measles, mumps and rubella, both in the second year of life and, for a limited period as a "catch-up" programme, at pre-school entry. Children should already be called at the latter stage for booster immunisations against diphtheria, tetanus and poliomyelitis. We look to general practitioners, health authorities and parents for active support for this programme.

Ms. Harman: To ask the Secretary of State for Social Services what steps he is taking to ensure the levels of immunisation of children against diphtheria, tetanus, whooping cough, polio and measles, including MMR, exceed 90 per cent. by 1990.

Mrs. Wise: To ask the Secretary of State for Social Services what advice on contra-indications is given to general practitioners and other doctors administering pertussis vaccine.

Mrs. Currie: The Chief Medical Officer has written to all doctors in England about the current upsurge of measles cases, reminding them of the need to improve levels of immunisation. We are also releasing very shortly to all doctors and to members of the nursing profession involved in immunisation a revised edition of the joint committee on vaccination and immunisation's memorandum "Immunisation Against Infectious Disease" which includes comprehensive expert advice on contra-indications to all immunisations, including pertussis. I shall arrange for a copy of the memorandum to be placed in the Library when it is published. Health professionals and authorities are also being urged to increase their efforts to raise immunisation rates, particularly in relation to the introduction of a combined vaccine against measles, mumps and rubella (MMR) on 1 October this year.

The level of immunisation and the efforts required to meet targets set for 1990 have been discussed at recent ministerial reviews of regional health authorities and family practitioner committees.

Doctors

Mr. Redmond: To ask the Secretary of State for Social Services when he expects the number of women doctors to reach parity with male doctors in the main career grades in the National Health Service.

Mrs. Currie: It is not possible to make a forecast of this kind. The proportion of women among medical students has risen from 22 per cent. in 1965 to 46 per cent. in 1987, but it is likely to be some years before the increased number of women entering the profession is fully reflected throughout the career structure.

The Department sponsored the recently published research study by Ms. Isobel Allen, "Doctors and their Careers", which highlighted the problem of women doctors in reaching top medical jobs. A copy of the study is in the Library. We are raising the problems identified with the medical profession and health authorities as part of our policy to ensure that women seeking medical careers have equal opportunity for employment and promotion.

Coronary Heart Disease

Mr. Bell: To ask the Secretary of State for Social Services what assessment his Department has made of the annual cost to both the National Health Service and the social services of the treatment of coronary heart disease, taking into account the costs of working days lost through illness, disability payments, unemployment benefits and similar other social costs; and if he will specify such costs.

Mrs. Currie: Comprehensive statistics on a precisely consistent basis are not available, but estimates can be made for some cost components. The annual cost to the National Health Service in England is estimated at approximately £560 million per annum. This includes expenditure on hospital in-patients and out-patients treated for coronary heart disease, an attribution of the costs of the general medical services, and the net ingredient cost of pharmaceutical preparations for treating heart disease.

The number of days of certified incapacity for sickness and invalidity benefit is readily available only on a Great Britain basis. The number of days attributable to coronary heart disease in the period 7 April 1986 to 4 April 1987 was 40·5 million. This statistic excludes periods of incapacity covered by statutory sick pay and working days lost by certain groups of workers who do not claim these benefits. It includes days of incapacity for which invalidity benefit was claimed by men aged 65 to 69 and women aged 60 to 64. It is not possible to attribute costs to these days.

Ethnic Monitoring

Mr. Janner: To ask the Secretary of State for Social Services when the monitoring of recruitment in respect of ethnic minorities was introduced in his Department; and where and by whom.

Mrs. Currie: Recruitment monitoring was introduced throughout the Department in July 1987 and is conducted by designated equal opportunities officers.

Mr. Janner: To ask the Secretary of State for Social Services by what means managers in his Department are encouraged to utilise all possible advertising outlets to attract, in particular, applicants in minority groups; what

advertisements were placed in the ethnic minority press and radio; which local ethnic employment groups were consulted; when and by whom; and with what results.

Mrs. Currie: Guidance for managers on recruitment and ethnic monitoring of job applicants was issued in July 1987. The guidance emphasises the importance of liaison with local community groups, particularly the community relations officer and representatives of ethnic minority groups, when running local recruitment exercises. A central record of recruitment advertising is not kept, but the Department has used a variety of outlets to attract applications from ethnic minority groups including:

contact with community relations officers, employment agencies and ethnic community leaders;
advertising in local press, including free press;
advertising in the London area in ethnic minority press such as *The Voice, Asian Times, Caribbean Times* and *New Life*. In 1987 three advertisements placed in *Asian Times, The Voice* and *New Life* (circulations 19,000, 38,000 and 40,000) produced 13, 87 and four applications respectively.

Snuff and Chewing Tobacco

Sir Dudley Smith: To ask the Secretary of State for Social Services what medical evidence he has on the safety of *(a)* snuff and *(b)* chewing tobacco.

Mrs. Currie: Medical evidence on the carcinogenicity of snuff and chewing tobacco was summarised in the monograph of the International Agency on Research into Cancer (Vol. 37). It concluded that there is sufficient evidence that oral use of snuffs of the types commonly used in North America and western Europe is carcinogenic to humans; that there is limited evidence that chewing tobacco of the types used in these areas is carcinogenic to humans and that there is inadequate evidence that nasal snuff is carcinogenic to humans. These forms of tobacco usage avoid certain effects specifically associated with the combustion of tobacco. However, the nicotine present in tobacco has addictive properties; nicotine may be related to some of the other non-carcinogenic adverse effects on health which can arise in people who smoke tobacco.

London Ambulance Service

Mr. Cox: To ask the Secretary of State for Social Services what survey his Department has conducted into the present efficiency of the London ambulance service; and if he will make a statement.

Mrs. Currie: The South West Thames regional health authority, which is responsible, on behalf of the four Thames regions, for the management of the London ambulance service continually monitors the efficiency of the service in order to ensure that the best possible service is provided to patients.

Heparin

Mr. Lawrence: To ask the Secretary of State for Social Services what assessment his Department has made of the drug Heparin as an anti-clotting post-operational treatment to prevent death from pulmonary embolism.

Mrs. Currie: Products containing Heparin have been licensed for the prophylaxis and treatment of thrombo-embolic disorders. Use for particular patients is a matter for clinical decision.

Physiotherapists

Ms. Armstrong: To ask the Secretary of State for Social Services how many vacancies there are for physiotherapists in funded and frozen posts by regional health authority.

Mrs. Currie: I regret that information on establishments is not collected centrally. However, the results of most recent sample surveys of health authorities suggest that nationally about 3·6 per cent. of funded posts for physiotherapists are unfilled after three months.

Mortality Rates

Ms. Armstrong: To ask the Secretary of State for Social Services if he will give the latest available figures for mortality rates by *(a)* regional health authority, and *(b)* district health authority.

Mrs. Currie: The latest available information is published in table 4.2 of "Key Population and Vital Statistics, local and health authority areas 1986", a copy of which is in the Library.

RAWP Formula

Ms. Armstrong: To ask the Secretary of State for Social Services if he will outline the methodology and the criteria used to determine deprivation in the recent report of the resource allocation working party formula.

Mrs. Currie: The research for the review of the RAWP formula looked at the relationship between a range of proxy measures of need for health care, and the use of health services, and allowed for the effects of the availability of services on their use.

Existing composite indices of deprivation, all based on data from the 1981 census, were examined. Details of the research are given in the final report on the review of the resource allocation working party formula, which is in the Library. Annex D to the report describes the indices of deprivation that were considered.

Abortions

Ms. Richardson: To ask the Secretary of State for Social Services (1) how many abortions were performed in 1987 on residents and non-residents at each of the following gestational ages: less than nine weeks, nine to 12 weeks, 13 to 16 weeks, 17 to 20 weeks, 21 to 24 weeks and 25 weeks and over on each of the following grounds; one with other, two alone, three with or without two, four alone, four with any other except one and five and six;

(2) how many abortions were performed in 1987 on residents and non-residents at each of the following gestational ages: less than nine weeks, nine to 12 weeks, 13 to 16 weeks, 17 to 20 weeks, 21 to 24 weeks and 25 weeks and over, on women in each of the following age groups; under 15 years, 15 years, 16 to 19 years, 20 to 24 years, 25 to 29 years, 30 to 34 years, 35 to 39 years, 40 to 44 years and 45 years and over.

Mrs. Currie: The information is given in the tables.

Legal abortions in England and Wales (1987 terminations) for residents of England and Wales: Grounds then age by gestation weeks

Definitions of statutory grounds

1. The continuance of the pregancy would involve risk to the life of the pregnant woman greater than if the pregnancy were terminated.
2. The continuance of the pregnancy would involve risk of injury to the physical or mental health of the pregnant woman greater than if the pregnancy were terminated.
3. The continuance of the pregnancy would involve risk or injury to the physical or mental health of any existing child(ren) in the family of the pregnant woman greater than if the pregnancy were terminated.
4. There is a substantial risk that if the child were born it would suffer from such physical or mental abnormalities as to be seriously handicapped.
5. In emergency to save the life of the pregnant woman.
6. In emergency to prevent grave permanent injury to the physical or mental health of the pregnant woman.

Conceptions

Ms. Richardson: To ask the Secretary of State for Social Services if he will give the numbers of conceptions in 1987 which *(a)* led to maternities and *(b)* were terminated under the terms of the Abortion Act 1967, among residents of England and Wales aged under 14 years, 15 years, 16 years, 17 years, 18 years and 19 years, giving in each case the rate per 1,000 population in each age group.

Mrs. Currie: The estimated number of conceptions in the calendar year 1987 will be derived from the births and legal abortions data for 1988, which are not yet available. The following table gives the latest available information, which is for the estimated number of conceptions occurring during the year 1986. A commentary on these statistics, together with details of the definitions and methods of estimation, will be included in the next issue of *Population Trends* to be published in September.

Number and rates of conceptions for girls aged 19 and under resident in England and Wales: 1986

Age of mother at conception	All conceptions: Number	All conceptions: [1]Rate	Conceptions leading to maternities: Number	Conceptions leading to maternities: [1]Rate	Conceptions terminated under the 1967 Abortion Act: Number	Conceptions terminated under the 1967 Abortion Act: [1]Rate
Under 14	292	0·9	120	0·4	172	0·5
14	1,980	5·7	809	2·3	1,171	3·4
15	6,922	18·5	3,293	8·8	3,629	9·7
16	15,425	41·9	8,933	24·3	6,492	17·6
17	24,776	64·8	16,101	42·1	8,675	22·7
18	32,177	83·6	22,456	58·4	9,721	25·3
19	37,205	93·5	27,419	78·9	9,786	24·6

[1] Rates per 1,000. The rates for girls under 14 is based on the number aged 13.

Ms. Richardson: To ask the Secretary of State for Social Services if he will give the numbers of conceptions in 1987 which *(a)* led to maternities and *(b)* were terminated under the terms of the Abortion Act 1967, among residents of England and Wales aged under 16 years, 16 to 19 years, 20 to 24 years, 25 to 29 years, 30 to 34 years, 35 to 39 years and 40 years and over.

Mrs. Currie: The estimated number of conceptions in the calendar year 1987 will be derived from the births and legal abortions data for 1988, which are not yet available. The following table gives the latest available information, which is for the estimated number of conceptions occurring during the year 1986. A commentary on these statistics, together with details of the definitions and methods of estimation, will be included in the next issue of *Population Trends* to be published in September.

Conceptions to women resident in England and Wales: 1986

Age of mother at conception	All conceptions	Conceptions leading to maternities	Conceptions terminated under the 1967 Abortion Act
All ages	818,917	671,259	147,658
Under 16	9,194	4,222	4,972
16-19	109,583	74,909	34,674
20-24	253,131	208,356	44,775
25-29	253,799	225,557	28,242
30-34	133,024	115,352	17,672
35-39	50,266	37,503	12,763
40 and over	9,920	5,360	4,560

Births

Ms. Richardson: To ask the Secretary of State for Social Services if he will give the total numbers of live births and still births in England and Wales in 1987, giving the numbers of each that were *(a)* legitimate, *(b)* jointly registered illegitimate and *(c)* solely registered illegitimate.

Mrs. Currie: The information requested is as follows:

Live and still births in England and Wales: 1987

	Live births	Still births
Total births	681,571	3,423
Legitimate	523,080	2,404
Jointly registered illegitimate	107,957	571
Solely registered illegitimate	50,474	448

Mentally Handicapped People

Mr. Clelland: To ask the Secretary of State for Social Services (1) what was the total number of mentally handicapped people over the age of 18 years who were cared for in hospitals and homes run by health authorities in England and Wales prior to 16 March;

(2) what is the total number of mentally handicapped people over the age of 18 years currently cared for in health authority hospitals and homes in England and Wales.

Mrs. Currie: On 31 December 1986, the latest date for which information is available centrally, there were 30,652 patients aged over 18 years resident in NHS mental handicap hospitals and hospital units in England, and 2,140 mentally handicapped people aged over 18 years resident in NHS community units in England. Figures for Wales are the responsibility of my right hon. Friend the Secretary of State for Wales.

Community Care

Mr. Clelland: To ask the Secretary of State for Social Services what records are kept to show where health authority patients have been resettled in the community; and how their resettlement and the progress of their rehabilitation into the community has been monitored.

Mrs. Currie: Oversight of services is maintained nationally through the Health Service planning and review system and the work of the social services inspectorate. It is for professional staff locally to decide what records to keep and how to monitor the progress of individual patients discharged into the community.

Mr. Clelland: To ask the Secretary of State for Social Services how standards of community care are defined; and which body has responsibility for their maintenance.

Mrs. Currie: Health and social services authorities have a management responsibility to set and maintain standards in their services. The social services inspectorate, the health advisory service and the national development team for people with a mental handicap advise on professional practice. Under the Registered Homes Act 1984, health and local authorities are responsible respectively for the statutory inspection and registration of independent nursing homes and independent residential care homes. The "Handbook for Health Authorities: Registration and Inspection of Nursing Homes" and the code of practice for residential care "Home Life", give detailed guidance. Copies are available in the Library.

Ex-mental Patients

Mr. Clelland: To ask the Secretary of State for Social Services what are the guidelines used to define rehabilitation and resettlement of ex-mental patients.

Mrs. Currie: Our policy is that mentally disordered people who are judged by the clinical team to be no longer in need of in-patient care should be subject to planned discharge from hospital. Planning should take full account of the patient's potential for resettlement and integration into the community, the ability of the individual's family to cope and the facilities and services provided by health and local authorities, voluntary organisations and the private sector which are available to meet his or her particular needs. Rehabilitation programmes are essential before discharge and should be followed up thereafter.

Cervical and Breast Cancer

Mr. Blunkett: To ask the Secretary of State for Social Services if, in view of the establishment of fund-raising organisations which claim to provide cervical and breast cancer screening units but which fail to gain charitable status and then fold, he has any proposals for further action to seek to prevent abuse, increase monitoring and strengthen powers available to prevent such fund-raising activity; and if he will make a statement.

Mrs. Currie: I shall write to the hon. Member.

District Health Authorities

Mr. Hinchliffe: To ask the Secretary of State for Social Services what guidelines his Department offers as to which agenda items should be taken in private at district health authority meetings.

Mrs. Currie: Health authorities are subject to the Public Bodies (Admission to Meetings) Act 1960 under which they may by resolution exclude the public from the whole or part of a meeting

"whenever publicity would be prejudicial to the public interest by reason of the confidential nature of the business to be transacted, or for other special reasons stated in the resolution and arising from the nature of that business or proceedings".

Guidance as to the application of the Act to health authorities is contained in circular HC(81)6. We expect as much business as possible to be conducted in public.

Mr. Hinchliffe: To ask the Secretary of State for Social Services (1) to whom generalist members of district health authorities are accountable;

(2) to whom local authority appointed members of district health authorities are accountable.

Mrs. Currie: All health authority members are appointed for their personal contribution. They are not appointed to represent any particular section or interest. District health authorities are responsible through their regional health authority to the Secretary of State for the provision of health services within their boundaries.

District General Managers

Mr. Hinchliffe: To ask the Secretary of State for Social Services to whom a district general manager is responsible.

Mrs. Currie: District general managers are directly accountable to their employing authority.

Health Authorities (Disputes)

Mr. Hinchliffe: To ask the Secretary of State for Social Services what factors determine whether he will intervene when a dispute arises between a district and regional health authority.

Mrs. Currie: The provision of services at local level is a matter for the district health authority, which will be held accountable by the regional health authority. Any differences should be resolved through discussions between the health authorities concerned.

Private Hospitals

Mr. Dobson: To ask the Secretary of State for Social Services (1) if he will list those recommendations made by Körner which applied to private hospitals; and when they were implemented;

(2) what plans he has to collect information suggested by Körner from private hospitals on the same basis as the information collected from National Health Service hospitals.

Mrs. Currie: There are no Körner recommendations which apply to private hospitals. Körner recommends that information be collected about NHS patients treated in private hospitals under contractual arrangements, such information to be on the same basis as that collected about NHS hospital stays. I refer the hon. Member to paragraph 8.30(b) of the first Körner report, a copy of which is available in the Library.

There are no plans to introduce the Körner recommendations about NHS patients and facilities to private patients in private hospitals. The information that we require from the Körner system is intended to help us in running the National Health Service.

NHS Patients (Private Hospitals)

Mr. Dobson: To ask the Secretary of State for Social Services if he will publish information about *(a)* the length of in-patient stays, *(b)* mortality, *(c)* the nurse-patient ratio, *(d)* the junior doctor-patient ratio and *(e)* the senior doctor-patient ratio for all private hospitals which treat National Health Service patients under contractual arrangements with district health authorities.

Mrs. Currie: Statistical information concerning National Health Service patients treated under contractual arrangements with private hospitals is included in the activity information submitted to the Department by health authorities. Information on the numbers of private hospital staff involved in contractual arrangements is not collected centrally. The available data are currently being processed and decisions will be taken in due course as to how much of the information can usefully be published on a routine basis.

Griffiths Report

Mr. Hinchliffe: To ask the Secretary of State for Social Services what proposals he has to review the working of the management style and structures introduced into the National Health Service following the Griffiths report.

Mrs. Currie: All aspects of the provision of hospital services are being examined as part of our review of the National Health Service. General management has been successfully introduced into the NHS and we remain committed to the principles set out in Sir Roy Griffiths' report.

Mental Illness (Ethnic Monitoring)

Mr. Tony Lloyd: To ask the Secretary of State for Social Services (1) if he has any information on the relative proportion of people receiving treatment for mental illness by ethnic group; and if he will make a statement;

(2) if he has any information with respect to the numbers of people committed under different sections of the Mental Health Acts by ethnic group; and if he will make a statement;

(3) what steps were taken as a result of the MIND report, a copy of which has been sent to him, about the disproportionate number of Afro-Caribbeans held in mental institutions, to investigate the causes and to alter the provisions of facilities; and if he will make a statement.

Mrs. Currie: The MIND report, "A Place of Safety", dealt primarily with the use of police powers under section 136 of the Mental Health Act 1983. This part of the Act is the responsibility of my right hon. Friend the Home Secretary. We are aware that there is a concern that ethnic minorities may be over-represented among patients detained under the powers of the Mental Health Act.

Mental health statistics are not currently collected centrally by ethnicity. There are no immediate plans to introduce the national monitoring of the ethnic origins of National Health Service patients, although the subject is under constant review by the Department.

It is essential that psychiatric patients receive care and treatment in a way appropriate to their illness, and that such care should be offered in a way acceptable to them, independently of racial origins.

Mr. Tony Lloyd: To ask the Secretary of State for Social Services what research he has carried out with respect to the needs of patients from different ethnic minorities with respect to provision of mental health facilities; and if he will make a statement.

Mrs. Currie: The Department is currently funding a project concerned with mental and other health needs of ethnic minorities in an inner-city context, undertaken by a small voluntary organisation, NAFSIYAT, which runs an inter-cultural therapy centre in north London. A final report on this project is expected next year.

Mr. Tony Lloyd: To ask the Secretary of State for Social Services what steps he takes to ensure that mental health provision and treatment for mental illness is made available for members of ethnic minority groups; and if he will make a statement.

Mrs. Currie: It is for health and social services authorities to identify and take account of the needs of all sections of the community in planning and funding local mental health services. The importance of this work was emphasised at a seminar on ethnic minority health last November for health authority chairmen and managers. Ministers also drew attention to the difficulties which needed to be overcome when mentally ill patients and those treating them had different cultural backgrounds. In addition, where appropriate, Ministers are raising questions on improving health services for ethnic minorities through the review system.

Mr. Tony Lloyd: To ask the Secretary of State for Social Services what steps he has taken to ensure that the training of those involved with the treatment of patients suffering from mental illness recognises the particular problems of patients from ethnic minorities.

Mrs. Currie: This is a matter for the bodies responsible for the education and training of professional staff. I understand, however, that the particular needs of members of ethnic minorities are covered in the training syllabuses of the nursing and social work professions, and the Royal College of Psychiatrists has established a special committee to consider any special training needs arising from mental illness among people from the ethnic minorities.

Care Orders (Privately Run Schools)

Mr. Cryer: To ask the Secretary of State for Social Services if he will list the criteria applied by his

Department for registering privately run schools which cater for young persons under care orders by local authorities; and if he will make a statement.

Mrs. Currie: Responsibility for the registration of privately run schools in a matter for my right hon. Friend the Secretary of State for Education and Science, who is writing to the hon. Member.

Departmental Programmes

Mr. George: To ask the Secretary of State for Social Services how much has been spent by his Department in each of the past five years on the evaluation of departmental programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mrs. Currie: The process of evaluation of the Department's programmes is part of the work itself. It is therefore not possible to identify separately the resources involved.

Child Abuse

Mr. Nicholas Winterton: To ask the Secretary of State for Social Services if he will commission a research project using information collated from medical records and information from the courts of new cases in order to study the link between the abuse of children and the marital status of and stability of relationship between the carers of the victim, taking full account of whether or not the abuser was the natural parent of the victim, whether he or she had at the time time of abuse been married or was cohabitating with the victim's other parent, and whether at the time of abuse the abuser was separated, divorced or distanced from the other parent of the victim.

Mrs. Currie *[holding answer 27 July 1988]:* Child abuse is a priority field for research sponsored by the Department, and there is a substantial programme of research, details of which follow. It is well known that disruption of normal family life may be a factor in some child abuse cases and there are no plans at present to focus solely on this question.

Current child abuse research sponsored by DHSS

Researcher	*Abstract*
1. Dr. F. Boddy, Dr. D. Gough, Glasgow University	*Professional Interventions in Child Abuse* This study will examine, evaluate literature on interventive strategies in cases of child abuse and attempt to provide a synthesis of present knowledge of value to those working in the field.
2. Dr. Bentovim, Professor Graham, Great Ormond Street, Hospital/Institute of Child Health	*Child Sexual Abuse* This study will look at characteristics and outcome of a treatment programme provided to the victims of child sexual abuse and their families.
3. Margery Smith, Great Ormond Street, Hospital/Institute of Child Health	*Normal Sexual Knowledge in Children* The aim is to collect systematic and reliable information on: (i) sexual knowledge in children; (ii) normal behaviour in families. A second aim of the study is to see whether children in the community can be distinguished from children who have been sexually abused on the basis of their sexual knowledge and behaviour.
4. Jane Gibbons, NISW	*Longitudinal Study of Children on NSPCC Abuse Registers* A feasibility study to examine the possibility of tracing children placed on registers maintained by the NSPCC; identifying the services supplied at the time; and assessing the outcome for the child several years later (seven years).
5. Elaine Farmer, Bristol University	*Decision Making Intervention and Outcomes in Respect to Children at risk of Abuse* The aims of this study are to explore the process of decision making and intervention in relation to a group of children at risk of abuse in two local authorities, and to relate these to outcomes over a two year period. Attention will be given to the way in which risk is reassessed over time and to the way in which decisions are made to remove or restore children home.
6. Christine Hallett, Leicester University	*A Study of Coprdination in Child Abuse* The research aims to study the policies and practices of interagency coordination in child abuse. The research has three dimensions: a conceptual analysis and literature review; a study of professional perspectives using case vignettes and a study of coordination in a sample of cases in selected areas.

Wakefield District Health Authority

Mr. Hinchliffe: To ask the Secretary of State for Social Services (1) if, in view of the fact that the Yorkshire regional health authority inquiry into Wakefield health authority did not look at the policy issues affecting the relationship between its chairman and district general manager and the rôle of the regional health authority in this situation, he will, as a matter of urgency, reconsider his decision not to set up a full independent public inquiry into the Wakefield health authority's proposed introduction of cook-chill catering and related matters;

(2) what action he proposes to take on the first recommendation of the report of the Yorkshire regional health authority inquiry into Wakefield health authority concerning the chairman of Wakefield health authority, a copy of which has been sent to him.

Mrs. Currie: We are considering the report, which was received only this week.

Mr. Hinchliffe: To ask the Secretary of State for Social Services whether his Department was consulted by Yorkshire regional health authority concerning its direction to Wakefield health authority to spend its share of the non-recurrent grant in December 1987 on meeting the additional costs of implementing cook-chill catering; and if he will make a statement.

Mrs. Currie: The region informed the Department in advance of discussion with its districts as to how it expected them to use the additional non-recurrent funds allocated in December, including in Wakefield's case that the money should be used to implement cook-chill, thereby securing recurrent savings. No formal direction was issued by the region to its districts.

Mr. Fatchett: To ask the Secretary of State for Social Services whether he will request the Yorkshire regional health authority to publish its report on the management of Wakefield district health authority; and if he will make a statement.

Mrs. Currie: No.

Childhood Cancers

Mr. Cran: To ask the Secretary of State for Social Services, pursuant to his answer of 19 July, *Official Report*, column *604*, on childhood cancers on north Humberside, what expert advice has been sought; and when he expects to receive it.

Mrs. Currie: Experts on medical statistics have been asked for an assessment of the report on childhood cancers on north Humberside and for advice on the further work which may be required. It is too early to say when their advice will be received.

Leukaemia

Mr. Cran: To ask the Secretary of State for Social Services what is the current level of Government funding for research into the epidemiology of leukaemia; and what have been the comparable figures over the previous five years.

Mrs. Currie: In 1986-87 (the latest year for which figures are available) the Department spent £2·7 million on directly commissioned cancer research. I regret that comparable information for the previous five years is not readily available. It is not possible separately to identify expenditure on research into the epidemiology of leukaemia, but the Department's programme contains the following:

— A programme of research at the Childhood Cancer Research Group, Oxford.

— Studies arising from the report on the investigation of the possible increased incidence of leukaemia in west Cumbria.

— A case control study of childhood leukaemia and other cancers in the West Berkshire and Basingstoke, and the North Hampshire district health authorities.

The Medical Research Council, the main Government agency for medical research in the United Kingdom, which receives its grant-in-aid from the Department of Education and Science, supports a considerable amount of research into the epidemiology of leukaemia.

Mr. Cran: To ask the Secretary of State for Social Services which cancer registries and research organisations are involved in the research into the epidemiology of leukaemia; what form the co-ordination between them will take; and what will be the rôle of the Government's Chief Medical Officer.

Mrs. Currie: A large number of organisations including the cancer registries, Medical Research Council, Office of Population Censuses and Surveys, medical research charities, and the Health Departments are involved in epidemiological research and the analysis of statistics on leukaemia. These activities are brought together in the United Kingdom Co-ordinating Committee on Cancer Research (UKCCCR) which also fulfils a co-ordinating role between the governmental and charitable organisations that fund research into leukaemia and other cancers.

A medically qualified official from the Department attends the UKCCCR on behalf of the Chief Medical Officer.

Departmental Staff

Mr. Simon Hughes: To ask the Secretary of State for Social Services what will be the implications for staff who have previously been working for his Department's offices situated in the London borough of Southwark of the proposed creation of the Department of Health; and if he will make a statement.

Mrs. Currie: The decision to divide the DHSS into two separate Departments has only just been made and details have still to be worked out. One of our first concerns will be to ensure that proper arrangements are made to protect the legitimate interests of staff. The trades unions representing the staff affected will, of course, be consulted.

Spectacles

Mr. Arbuthnot: To ask the Secretary of State for Health what the new National Health Service voucher values will be to take account of the imposition of value added tax on spectacles.

Mrs. Currie: The Government have introduced an amendment to the Finance Bill which, if approved, would apply VAT to spectacles from 1 September. We have decided that the new voucher values shown in the table would apply from that date if VAT is implemented. The imposition of VAT should not result in prices increasing by 15 per cent. The prices of spectacles already include the VAT which the opticians pay on their purchases of appliances. The only new element of VAT is the tax in the retail margin.

	Voucher type	*Current value (£)*	*New value (£)*
Single Vision	A	15·50	16·25
	B	25·50	27·00
	C	42·00	44·00
Bifocal	D	29·50	31·00
	E	50·00	52·50
	F	85·00	89·00
Hospital Eye Service Only	G	85·00	89·00
	H	25·00	26·50

	Voucher type	Current value (£)	New value (£)
Supplements	Childs small frame	30·00	31·50
	Specially made frame (hospital eye service)	30·00	31·50

National Blood Transfusion Service

Mr. Ian Taylor: To ask the Secretary of State for Health whether he has completed his consideration of the National Health Service management consultancy services report on the organisation of the national blood transfusion service; and if he will make a statement.

Mrs. Currie: We have decided that new management arrangements are needed for the supraregional and national dimension of the national blood transfusion service. We therefore intend that operational responsibility at the national level for the NBTS and the Central Blood Laboratories Authority (CBLA) will be exercised on behalf of the Health Ministers for England and Wales by the NHS management board and undertaken by its director of operations, in consultation in respect of Wales with the director, NHS Wales. Day-to-day implementation of the national strategy will be delegated to a new national director of the NBTS and a small supporting staff.

The key objectives will be:

(a) to implement a cost-effective strategy for ensuring an adequate supply of blood throughout England and Wales;

(b) to implement a cost effective strategy for the supply of plasma to the blood products laboratory of the CBLA;

(c) to co-ordinate the activities of the NBTS and the CBLA;

(d) to promote the efficiency of the NBTS.

In implementing the objectives in *(a)* and *(b)* a priority task will be to remove financial disincentives by having a national system of processing and handling charges both between transfusion centres and between them and CBLA. No charges will be made, of course, for freely donated blood.

The national director will be Dr. Harold Gunson, who is at present the regional transfusion director for north western region.

I have arranged for copies of the report to be placed in the Library.

Hospital Waiting Lists

Mr. Dobson: To ask the Secretary of State for Social Services (1) if he will publish the total number of cases deferred other than those listed by KHO7a; and if he will give the reasons for those deferrals.

(2) if he will break down the figures given in KHO7a into those cases where treatment has been *(a)* postponed and *(b)* cancelled.

Mrs. Currie *[holding answer 5 May 1988]:* I regret that the information requested is not available centrally.

NHS Expenditure and Charges

Mr. Worthington: To ask the Secretary of State for Social Services (1) when he will provide a substantive reply to the questions on health charges tabled by the hon. Member for Clydebank and Milngavie for priority written answer on 25 May;

(2) when he will provide a substantive reply to the questions on health charges tabled by the hon. Member for Clydebank and Milngavie for priority with written answer on 7 July.

Mrs. Currie: I replied to the hon. Member today.

Mr. Worthington: To ask the Secretary of State for Social Services if he will publish in the *Official Report* a table, consistent with the reply of 27 May, *Official Report*, columns *375-76*, indicating the receipts in the years 1982-83 to 1990-91 classified as charges in respect of running costs expenditure, together with a supplementary analysis indicating, separately, the amounts of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mrs. Currie: I shall write to the hon. Member.

Mr. Worthington: To ask the Secretary of State for Social Services (1) if he will publish in the *Official Report* tables which provide for *(a)* pharmaceutical services, *(b)* general dental services and *(c)* general ophthalmic services covering the period 1979-80 to 1988-89, gross expenditure, details of income analysed by source, and net expenditure incurred on Supply Votes and public expenditure programmes;

(2) if he will publish in the *Official Report* tables which provide, for *(a)* pharmaceutical services, *(b)* general dental services and *(c)* general ophthalmic services covering the period 1979-80 to 1988-89, gross expenditure, details of income analysed by source and net expenditure incurred on Supply Votes and public expenditure programmes.

Mrs. Currie *[holding answers 25 May and 7 July 1988]:* The information requested is given in the table. The figures for 1987-88 are the latest forecasts of outturn for that year and differ from those underlying the public expenditure White Paper, Cm. 288-II, which were based on Winter Supplementary Estimates for that year. The figures for 1988-89 are the planning figures underlying Cm. 288-II and are necessarily indicative. They form the basis of the Main Estimate for the year currently before Parliament. They will be reviewed in the light of up-to-date information during the course of the year and if necessary supplementary estimates submitted to Parliament at the appropriate stage.

[1] These are the figures underlying the public expenditure White Paper (Cm. 288-II) and are subject to in-year review.
[2] The basis is given in the reply to the hon. Member for Peckham (Ms. Harman) on 12 April, at columns *104-5*.
[3] Certain amounts appropriated in aid are offset against gross expenditure on the Phs and GOS (for example, receipts from drug manufacturers)
[4] The cessation of supply of NHS glasses in 1985-86 following the introduction of the voucher scheme resulted in the reduction, then cessation of GOS charge income.

Mr. Worthington: To ask the Secretary of State for Social Services (1) if he will publish in the *Official Report* a table providing a detailed analysis of the various line entries for charges in the years 1982-83 to 1990-91 in table 14.1 of Cm. 288-II;

(2) if he will publish in the *Official Report* a table providing a detailed analysis of the various line entries for charges in the years 1982-83 to 1990-91 in table 14.1 of Cm. 288-II;

(3) if he will provide a detailed breakdown for the years 1982-83 to 1990-91, by nature of item and functional area of charge, of the receipts to his programme classified as charges for the purposes of the public expenditure survey.

Mrs. Currie *[holding answers 25 May and 7 July 1988]:* The requested information is given in the table.

The 1987-88 income figures for prescription and dental charges in the family practitioner services underlying Cm. 288-II were based on winter Supplementary Estimates. Later forecasts of outturn are as given in my other reply to the hon. Member today.

The figures for 1988-89 and later years are the planning figures underlying Cm. 288-II and are necessarily indicative. Those for 1988-89 form the basis of the main Estimates for that year currently before Parliament. These figures for the family practitioner services will be reviewed in the light of up-to-date information during the course of the year and if necessary Supplementary Estimates submitted to Parliament at the appropriate Supply stage. The income in later years will be determined, where appropriate, by the level of charges, when these come to be set by Parliament, and by the volume of chargeable activity.

Analysis of charge income in table 14.1 of Cm. 288-II

	1982-83 £ million	1983-84 £ million	1984-85 £ million	1985-86 £ million	1986-87 £ million	1987-88 estimated outturn £ million	1988-89 plans £ million	1989-90 plans £ million	1990-91 plans £ million
Hospital and community health services and central health miscellaneous services[1]

Administration	3	3	3	4	—	—	—	—	—
Other	1	1	1	2	—	—	—	—	—
TOTAL[2]	336	355	368	433	474	472	493	510	530

[1] Hospital and community health services and Central health miscellaneous services totals have been combined to overcome the effect of transfers of services between the two sub-programmes.
[2] Differences between totals in the analysis and table 14.1 are due to roundings in individual items. The convention used in Cm. 288-II was to round the last two years to the nearest £10 million.
[3] The basis is given in the reply to the hon. Member for Peckham (Ms. Harman) on 12 April, at columns 104-5.
[4] Differs from table 14.1 which included assumed receipts of £80 million from the reconstitution of the GPFC.
[5] Total receipts only are indicated for the years 1986-87 to 1990-91. They are estimates based on the proportional relationship between gross and net expenditure in previous years and a breakdown of this figure would be meaningless.

Mr. Worthington: To ask the Secretary of State for Social Services if he will publish in the *Official Report* a table showing for the period 1958 to 1988, in a form consistent with the written answer of 29 March 1982, *Official Report*, columns *27-30 (a)* prescription charges per form or item *(b)* the real charge, as measured after adjusting by (i) the retail price index and (ii) the gross domestic product deflator *(c)* the proportion of prescriptions for which the nominal payment was in fact made *(d)* the proportion of patients receiving prescriptions exempted from the nominal payment and *(e)* the estimated proportions of the *(y)* adult and *(z)* total population estimated to liable to make the nominal payment.

Mrs. Currie *[holding answer 7 July 1988]:* The requested information on the prescription charge per item, together with the proportion of prescriptions for which such charges were paid, is given in the table. In addition, some 5 per cent. of all prescriptions dispensed are covered by pre-payment certificates.

Information is not available on the estimated proportion of patients, or of the population who are exempt from the single item prescription charge. It is thought however that approximately half the population is exempt from all prescription charges.

		Prescription charge per item[1]	Prescription charge per item re-valued to 1987 prices using:		Proportion of prescriptions paid[2]

Nursing and Residential Homes

Mr. Fearn: To ask the Secretary of State for Social Services if he will make it his policy to establish such guidelines for the care of persons residing in nursing and residential homes as will ensure the early development of improved standards of care through the provision of physiotherapy, occupational therapy, chiropody and similar health-related support services; and if he will make a statement.

Mrs. Edwina Currie *[holding answer 21 July 1988]:* This is our policy already. Through registration and inspection under the Registered Homes Act 1984, health and local authorities have a responsibility to ensure that appropriate and acceptable levels of care are provided to all patients and residents. It is a statutory requirement that the person registered in respect of a nursing home should provide and maintain adequate medical, surgical and nursing equipment and adequate treatment facilities to meet the needs of patients.

In 1985, the National Association of Health Authorities produced a handbook for health authorities, which the Department commended to all registering health authorities. The handbook provides comprehensive advice on all aspects of registration and inspection and advice relating to individual client groups. I understand a supplement is to be issued in September.

People living in residential care homes are entitled to receive the same standard of remedial care as other members of the community and the full range of remedial facilities provided by the local health authority or social services authority should be available to them. "Home Life: a code of practice for residential care" gives guidance about the provision of these services by authorities.

Copies of the handbook and "Home Life" are in the Library.

Health Authorities (Staff)

Mr. Fearn: To ask the Secretary of State for Social Services if he will publish a table in the *Official Report* showing for each regional health authority the number of whole-time staff employed and number of hours worked of *(a)* hospital nurses, *(b)* midwives, *(c)* health visitors, *(d)* district nurses, *(e)* ancillary staff, *(f)* ambulance personnel and *(g)* administrative and clerical staff for each year from 1974 to the latest year for which figures are available.

Mrs. Currie *[holding answer 21 July 1988]:* Such information as can be provided without incurring disproportionate costs is shown in the tables.

Number of whole-time staff employed and number of hours worked have been interpreted as whole-time equivalents.

Although not in the precise form requested, some additional information for years prior to 1981 can be obtained from two tables in *Regional Trends* publications, copies of which are in the Library. The particular tables are:

Health authorities: analysis by type of staff and practitioner, and primary health care nursing services: staff employed, within section 4—health.

[1] Includes qualified nurses, unqualified nursing staff and learners.

[2] Includes health visitors in both the community and school health services, health visitor field work teachers, TB visitors with HV certificates; dual/triple parts (HV/DN/MID and bank health visitors. Excludes HV students.

[3] Includes district nurse practical work teachers, registered/enrolled nurses assisting district nurses, dual parts (DN/MID) and bank district nurses. Excludes tutorial staff, other nursing staff in district nursing and district nurse students.

[4] 1985 and 1986 figures include general managers.

Child Protection Services (London)

Mr. Tony Banks: To ask the Secretary of State for Social Services when he plans to publish the social services inspectorate survey of child protection services in London; and if he will distribute copies to all London hon. Members.

Mrs. Currie *[holding answer 25 July 1988]:* I am today placing copies of the report in the Library. The report was discussed with London directors at a meeting on 18 July. They are now examining the report and will be taking action locally where needed. Some directors, however, reported a continuing rise in the numbers of registrations of child abuse and it may therefore take some time before there is a satisfactory resolution of the problem of unallocated cases. The inspectorate will continue to monitor progress and to work with boroughs with the worst problem.

I am also placing in the Library copies of the report by the social services inspectors on child protection services in Haringey. That report makes recommendations and puts forward a sensible action plan to tackle the serious problems it identifies. These can all be implemented within the resources available to Haringey. The council has already reported to me on the work that it has in hand to implement the key recommendations of the report.

Listeriosis

Mrs. Dunwoody: To ask the Secretary of State for Social Services (1) if he will institute an immediate inquiry into the possible connection between cook-chill food and the incidence of listeriosis; and what steps have been taken to ensure that no risk exists in National Health Service hospitals using this system of catering to patients who are pregnant or elderly or with weakened immune systems;

(2) what advice he has received from the chief medical officer on the possible connection between the incidence of listeriosis and cook-chill catering in National Health Service hospitals; and what urgent action he proposes to take.

Mrs. Currie *[holding answer 27 July 1988]:* While the incidence of listeriosis is increasing, only two cases are known to have been associated with food in the United Kingdom, neither of which was connected with the cook-chill catering system. There is no evidence to suggest the system is connected with this increased incidence and we have no plans to institute an enquiry. The Public Health Laboratory Service is investigating the food histories of all reported cases of listeriosis.

Hernia Repairs and Hip Replacements

Mr. Fearn: To ask the Secretary of State for Social Services if he will give the number of hernia repairs and hip replacement operations performed in each region, each year, since 1974 to the latest date for which figures are available.

Mrs. Currie *[holding answer 22 July 1988]:* Such information as can be provided without incurring disproportionate costs is given in the following tables.

Estimated number of hernia operations (Codes[1]: 410-412,515) performed in NHS non-psychiatric hospitals, by region of treatment, England 1979-85

Region of treatment	1979	1980	1981	1982	1983	1984	1985

[2] Because of NHS restructuring in 1982, the regional figures are not strictly comparable over the whole period.
[3] Special health authorities.

Essex Hospitals

Mr. Fearn: To ask the Secretary of State for Social Services how many individual representations he has received in opposition to West Essex health authority plans for Princess Alexandra hospital, Harlow, and the corresponding downgrading of St. Margaret's hospital, Epping, and the Hertfordshire and Essex hospital, Bishop's Stortford.

Mrs. Currie *[pursuant to her reply, 27 May 1988, c. 419]:* The number of letters we had received direct from members of the public about changes to services at St. Margaret's and the Herts and Essex hospitals proposed by West Essex health authority was about 250, not several thousand as stated. A petition with several thousand signatures was mistakenly included in the earlier total.

NORTHERN IRELAND

Inward Investment

6. **Mr. Bellingham:** To ask the Secretary of State for Northern Ireland how much inward investment has been attracted to the Province during his term of office; and if he is considering any further initiatives, similar to the Locate in Scotland initiative by the Scottish Office.

Mr. Tom King: Since I took office on 2 September 1985, 21 new projects, which are expected to create 1,330 jobs, have been finalised. The aggregate investment associated with those projects has been £47·15 million.

These investments reflect the hard work of the Northern Ireland Industrial Development Board and we have no current plans to alter the basis of its operation.

Fair Employment

9. **Ms. Armstrong:** To ask the Secretary of State for Northern Ireland when he now expects to publish a Bill on fair employment in Northern Ireland.

40. **Mr. McNamara:** To ask the Secretary of State for Northern Ireland when it is the Government's intention to publish the Bill on religious equality of opportunity in employment in Northern Ireland.

Mr. Viggers: The preparation of the legislation is well in hand, and a Bill will be introduced at the earliest possible opportunity.

15. **Mr. Parry:** To ask the Secretary of State for Northern Ireland if he will publish the representations he has received from employers in Northern Ireland following the publication of the fair employment White Paper.

17. **Mr. Duffy:** To ask the Secretary of State for Northern Ireland what changes will be made in the proposals contained in the fair employment White Paper following the representations received since its publication.

Mr. Viggers: The broad framework of policy and proposals for legislation is set out in the White Paper. The Government will give careful consideration to representations which are received, but I cannot anticipate the detailed provisions of the Bill.

The question of the publication of such representations is a matter for those who submitted them.

33. **Mrs. Fyfe:** To ask the Secretary of State for Northern Ireland what representations he has received from employers in Northern Ireland following publication of the fair employment White Paper.

Mr. Viggers: Representations have been received from the Northern Ireland chamber of commerce and industry, the Engineering Employers' Federation and the Federation of Building and Civil Engineering Contractors.

Debt (Emergency Provisions) Act 1971

10. **Mr. Clay:** To ask the Secretary of State for Northern Ireland what representations he has received seeking the repeal of the payments for Debt (Emergency Provisions) Act (Northern Ireland) 1971.

Mr. Ian Stewart: In the last year there have been a number of questions on this subject from hon. Members and a letter from Derry city council.

Labour Statistics

14. **Mr. Harry Barnes:** To ask the Secretary of State for Northern Ireland if he will make a statement on the Northern Ireland unemployment figures for June.

Mr. Tom King: There were 115,640 unemployed at 9 June 1988. I am pleased to note that this represented a decrease of 516 from May and a decrease of 9,910 from June 1987.

21. **Mr. John Marshall:** To ask the Secretary of State for Northern Ireland if he will make a statement about trends in employment in Northern Ireland during the last five years.

Mr. Viggers: At March 1988, the latest date for which figures are available, there were an estimated 495,580 employees in employment in Northern Ireland. This figure is 1,850 higher than the corresponding estimate five years ago and 5,000 higher than the figure one year ago.

Security

18. **Mr. William Ross:** To ask the Secretary of State for Northern Ireland what steps have been taken to improve security in Northern Ireland since 30 June.

Mr. Tom King: Since 30 June, the reorganisation of Army deployments has been completed with the establishment of a new brigade headquarters in Armagh. Various new physical improvements have been completed. New legislative measures to combat terrorism have been brought forward. A proposal for a draft Police and Criminal Evidence Order has also been published. Meetings between senior Royal Ulster Constabulary and Garda Siochana officers have continued and a further meeting between the Chief Constable of the Royal Ulster Constabulary and the Commissioner of the Garda Siochana took place at the Intergovernmental Conference on 27 July, which discussed a number of proposals for further improving the level of cross-border security co-operation.

24. **Mr. Maginnis:** To ask the Secretary of State for Northern Ireland if he will make a statement on the security situation in the Province.

Mr. Tom King: I refer the hon. Gentleman to the answer I gave earlier today to the hon. Member for Brent, East (Mr. Livingstone).

Cross-border Co-operation

19. **Mr. Andrew Mitchell:** To ask the Secretary of State for Northern Ireland whether he is satisfied with the level of cross-border co-operation.

Mr. Ian Stewart: Co-operation takes place over a wide range of activities, and we and the Irish Government are committed to developing it further.

Education

20. **Mr. Bidwell:** To ask the Secretary of State for Northern Ireland what recent meetings he has had with the educational groups.

27. **Mr. Henderson:** To ask the Secretary of State for Northern Ireland how many representations he has received recently from interest groups in the education field; and on what subjects.

Dr. Mawhinney: I have in recent months, received a large number of representations, written and oral, on a wide range of educational topics. These include representations on the consultation paper on education reform, substitution provision in schools, school development proposals, the cross-community contact scheme, youth service review and funding for arts, museums, sport and community services.

Mr. Anthony Hughes

22. **Mr. Nellist:** To ask the Secretary of State for Northern Ireland if he will call for a report from the Chief Constable of the Royal Ulster Constabulary as to when he expects police inquiries into the death of Mr. Anthony Hughes at Loughgall on 8 May 1987 to be concluded; and if he will make a statement.

Mr. Ian Stewart: I understand that the RUC have completed their investigations. The Director of Public Prosecutions (Northern Ireland) will decide whether any criminal proceedings should be brought.

Protection Rackets

23. **Mr. Bowis:** To ask the Secretary of State for Northern Ireland if he will make a statement on current progress on the ending of the protection racket system operating against firms in Northern Ireland.

Mr. Ian Stewart: The combating of paramilitary racketeering has a high priority in our overall law and order drive. Protection rackets have proved most difficult to counter, chiefly because of evidential difficulties. Nevertheless, determined police efforts have continued and there have been 12 successful court cases since the beginning of 1987, with a number of other cases currently pending.

We have been examining the best ways further to tackle the protection racketeers. In particular, we look to a forthcoming major administrative initiative to help spearhead this drive, an action which should be complemented by the forthcoming Prevention of Terrorism Bill, which will provide us with a further opportunity to fill any gaps in the legislative support being given to the RUC. We intend in the Bill to broaden further and to strengthen our attack on paramilitary racketeering.

Planning Applications

25. **Mr. Clifford Forsythe:** To ask the Secretary of State for Northern Ireland how many planning applications have been approved during 1986 and 1987 in *(a)* the borough of Newtownabbey and *(b)* the borough of Antrim.

Mr. Needham: In Newtownabbey borough, 544 planning applications were approved in 1986, and 459 in 1987. The corresponding figures for Antrim borough were 466 and 363.

Anglo-Irish Agreement

26. **Mr. Dykes:** To ask the Secretary of State for Northern Ireland if he has received any representations from the public concerning recent developments affecting the Anglo-Irish Intergovernmental Agreement.

Mr. Tom King: I have received occasional letters from the public about the Anglo-Irish Agreement.

37. **Sir John Farr:** To ask the Secretary of State for Northern Ireland what is his latest assessment of the effect that the Anglo-Irish Agreement has had on the level of violence in the Province, and if he will make a statement.

Mr. Tom King: I believe that, through the operation of the structures established following the agreement, co-operation on security across the border continues to develop, to the benefit of our common anti-terrorist effort.

Community Groups

28. **Mr. Barron:** To ask the Secretary of State for Northern Ireland if he will make a statement on the level of funds for community groups in the Province.

Dr. Mawhinney: In 1987-88, £37·24 million was provided to community groups through the action for community employment scheme, the community volunteering scheme and the youth training programme. In addition, £9·78 million was paid in grants to the health and social services boards and district councils to support community services and voluntary groups.

36. **Mr. Morgan:** To ask the Secretary of State for Northern Ireland what meetings he has had recently with representatives from community groups in the Province.

Dr. Mawhinney: Ministers and officials frequently meet representatives from community groups; some seven meetings have taken place at ministerial level in the past six months.

Housing Order 1988

29. **Mr. Illsley:** To ask the Secretary of State for Northern Ireland how many representations he has received on the draft Housing (Northern Ireland) Order 1988; and if he will make a statement.

Mr. Needham: During the consultation period on the proposal for a draft Housing (Northern Ireland) Order, submissions were received from 58 organisations and individuals. I also met representatives from four of the main voluntary organisations concerned with homelessness to discuss their views.

International Investment Ltd.

30. **Mr. Beggs:** To ask the Secretary of State for Northern Ireland if he will call for a report from the Chief Constable of the Royal Ulster Constabulary on the progress of investigations into the affairs of International Investment Limited (in liquidation) Gibraltar.

Mr. Tom King: I have nothing further to add to the information I gave to the hon. Gentleman when I wrote to him on 27 June 1988.

Harland and Wolff

31. **Mr. Nicholas Brown:** To ask the Secretary of State for Northern Ireland what recent discussions he has had with Mr. Ravi Tikkoo on the future of the Harland and Wolff shipyard; and if he will make a statement.

Mr. Viggers: My right hon. Friend met Mr. Tikkoo earlier this year. Discussions are being carried out by my officials and their advisors.

Mr. John Evans: To ask the Secretary of State for Northern Ireland when he last met trades union representatives from Harland and Wolff; and if he will make a statement.

Mr. Viggers: My right hon. Friend the Secretary of State has not had any recent meetings with trades union representatives from Harland and Wolff. He is, however, due to meet the Northern Ireland council of the Irish Congress of Trade Unions in the near future to discuss general economic issues.

35. **Mr. Skinner:** To ask the Secretary of State for Northern Ireland if he will make a statement on the state of current dicussions on his plans to privatise Harland and Wolff.

Mr. Tom King: The Government have appointed merchant bankers to advise on possible privatisation. Preliminary discussions have been held with Tikkoo Cruise Line Ltd. but these are at a very early stage.

A number of other parties have also expressed an initial interest.

Northern Health Board

32. **Mr. Fatchett:** To ask the Secretary of State for Northern Ireland if he will make a statement on the recent High Court decision on health service cuts and closures in the Northern health board area.

Mr. Needham: I wholeheartedly welcome the court's decision on this matter, since it frees the Northern board to proceed with its plans for 1988-89, which include service developments totalling over £800,000.

38. **Mr. Battle:** To ask the Secretary of State for Northern Ireland when he last met National Health Service trade unions to discuss the High Court's recent decision on the service cuts planned by the Northern health board; and if he will make a statement.

Mr. Needham: The judgment in this case was given only on 8 July and I have not met the trade unions during the intervening period.

I am glad of course that this case has been resolved and that the board can now proceed with implementing its operational plan—including the development of new services at a cost of more than £800,000.

Intergovernmental Conference

34. **Mr. Hunter:** To ask the Secretary of State for Northern Ireland when he will next have meetings with Ministers of the Republic of Ireland; and what subjects he will discuss.

Mr. Tom King: I met Irish Ministers yesterday at a meeting of the Intergovernmental Conference.

I gave details of our discussions in a reply earlier to a question from the hon. Member for Falkirk, West (Mr. Canavan).

IRA (Aid)

39. **Rev. Martin Smyth:** To ask the Secretary of State for Northern Ireland if he will make a statement about efforts by the Royal Ulster Constabulary to prevent aid to the Irish Republican Army from outside Northern Ireland.

Mr. Ian Stewart: I understand that the Chief Constable of the Royal Ulster Constabulary is in regular contact with law enforcement agencies throughout the United Kingdom and in other countries with a view to preventing the supply of arms and funds to terrorist organisations in Northern Ireland.

Concessionary Fares

41. **Mr. Kilfedder:** To ask the Secretary of State for Northern Ireland if he will introduce full concessionary fares for pensioners throughout the Province.

Mr. Needham: No. I have no plans to extend the existing scheme, which entitles persons over the age of 65, as well as children under 16 and the registered war disabled, to concessionary travel throughout Northern Ireland at half-fare on all scheduled bus and rail services, without restriction on time of travel or length of journey. Registered blind persons travel free. These concessions are financed by grants to the bus and rail companies amounting to some £6 million a year.

Gaelic Athletic Association

42. **Sir John Biggs-Davison:** To ask the Secretary of State for Northern Ireland if he will ask the chairman of the Standing Advisory Commission on Human Rights when his predecessor received the representations of the hon. Member for Epping Forest against the continued discrimination against members of the armed forces and police by the Gaelic Athletic Association; and when the commission expects to report.

Mr. Tom King: Representations by my hon. Friend on this issue were referred to the commission, which is an independent body, in 1984. I understand that a final completion date has not been fixed for the commission's major review of the adequacy and effectiveness of legislation to prevent discrimination on grounds of religious or political belief. However, the commission's report on fair employment (Cm. 237) referred to the matter raised by my hon. Friend, at paragraph 14.4.

Consultants

Mr. Mullin: To ask the Secretary of State for Northern Ireland if he will give the cost to his Department of employing management or computer consultants for each year from 1983 to 1987.

Mr. Ian Stewart: The total cost to all Northern Ireland Departments is as follows:

Financial Year	£
1983-84	3,309,283
1984-85	3,841,035
1985-86	4,006,116
1986-87	5,125,405

Mr. Mullin: To ask the Secretary of State for Northern Ireland if he will list each management or computer consultancy contract extant in his Department as at 1 January 1987, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Ian Stewart: The following management and computer consultancy contracts were extant at 1 January 1987:

Firms	*Subject of assignment*
Barnard Systems	DOE land registry BIS-IPSE
	DANI animal health
	NIO prison officers payroll
Beecom Management Consultants Ltd.	To provide work study staff under an agency agreement
	Finance for managers consultancy service for client company
Beecom (NI) Ltd.	II appreciation training
	DOE roads service integrated systems
	DOE water service integrated systems
Belfast Information Technology Service	"Hands On" IT sessions
British Telecom	Government network
Business Information Systems-Beecom	Management and finance accounting systems, IT sessions
Cap Industry Ltd.	To maintain the computerised rates assessment and collection system in NI
CCTA	DFP methodology support
	DFP strategy development
	DOE strategy study
Centre House Management	Financial appraisal for IDB

Firms	Subject of assignment
CIPFA Computer Services Ltd.	Implementation of IT strategy
H. Cloutt Associates	VME technical consultancy
Computer Learning Centre	"Hands On" IT sessions
Computing Consultancy and Services	Report on software, staff availability and demand
Elsdon Computer Services Ltd. (London)	Development of payroll system under VME (virtual machine environment)
Ernst and Whinney	Review on internal audit in Northern Ireland Civil Service
Ewbank Preece	Feasibility study
Gilpin Black Associates	Objective setting exercise
Goldblatt Management Consultancy	Carpet sector Review
	Financial appraisals for IDB
	Marketing appraisals for IDB
Gresham Computer Personnel Southampton	VME operations consultancy
P. Hyde	IT "The Human Dimension"
Industrial Training Service Ltd.	Development of Youth Training Programme (YTP) workscheme
	Enterprise training for YTP trainers
Industrial Training Services	Provide specialist advice and input to IDB's executive development programme
Johnson Andrews & Co.	Sales development training programme
Learmouth Burchett Management Systems	DANI works service
Lindsay Marketing Services	Marketing appraisal for IDB
Management Development Services (NI) Ltd	Consulting support service to participants in the enterprise allowance scheme
Market Research NI	Market appraisal for IDB
McCormick Tracey & Mullarbey	Meat plant survey
McFarland Edmund	International investment and market research
	Market appraisal for IDB
McIver Jenkins Associates Ltd.	Marketing advice
NI Council on Alcohol	Alcohol awareness
Coopers and Lybrand Associates	The development and implementation of a departmental information technology strategy for social security benefit payments
	Marketing appraisals for IDB
	Financial appraisals for IDB
	To carry out a survey of standard capital grants scheme claimants
	Energy consultants—to advise on the technical and economic aspects of private sector electricity generation and to evaluate competing private and public sector proposals for the next tranche of generating capacity required in Northern Ireland
	To assist the Department to supervise and monitor the affairs of the Northern Ireland Transport Holding Company and the three subsidiary transport operating companies
	Enabling study for Northern Ireland Prison Department
David Rigby Associates	Linen task force update
	Marketing appraisal for IDB
Deloitte Haskins and Sells	Financial appraisals for IDB
	To devise a system to meet the management, accounting and information needs of the Department's works service
Denton Hall Burgin and Warrens	To negotiate and draft contractural arrangements with private sector electricity generators for the generation and sale of electricity to Northern Ireland Electricity
PA Management Consultants	Organisational change in DED
Pactel	Evaluation of benefits of Belfast London information system
Peat Marwick	Financial appraisal for IDB
PE Consultancy Services	Marketing appraisal for IDB
Price Waterhouse	Assistance with statutory audits
	Investment appraisal
	Professional qualification in internal audit
	Toolmaking requirements for a tooling facility for injection moulding;
	Financial appraisals for IDB
Purchasing Index (UK) Ltd.	Road vehicle-mobile plant purchasing and management in Department of Agriculture (Northern Ireland)
QUB (Department of Agriculture)	Cheese survey
Queen's University Belfast	Basic book-keeping
	Investment appraisal
	Professional qualification on internal audit
N. M. Rothschild and Sons Ltd.	Financial consultants—to advise on the viability of the financial structure underlying private sector electricity generating proposals
Rowena Mills Associates	Marketing appraisal for IDB
Software Ireland	DFP valuation and lands office
	DED companies registry
	DFP methodology support
	IT awareness
	Users role in micro-computers
Software Ireland and Beecom	IT awareness programme (users role in system development)
Software Ireland Ltd.	Computerisation of valuation and lands office
Touche Ross	Assessment of audit needs, development of audit processes and assistance with computer audit, both for departmental internal audit and the statutory audit function
Touche Ross Management Consultants	Monitoring Harland and Wolff on behalf of DED
	To monitor Short Bros plc
University of Ulster	Investment appraisal
Warner International	Marketing appraisal for IDB

Electricity Generation

Mr. Tony Lloyd: To ask the Secretary of State for Northern Ireland when the Government's investment appraisal of Kilroot II and the competing public and private sector lignite proposals for electricity generation is likely to be completed; and if he will make a statement.

Mr. Viggers: The investment appraisal of the competing power station proposals has been completed and the Government have decided that Kilroot phase II will be developed to meet the need for new generating capacity in Northern Ireland. It has also been decided to set in hand immediately an examination of ways of privatising the entire Northern Ireland electricity system.

Mr. Ron Davies: To ask the Secretary of State for Northern Ireland what recent discussions he has had on the future of electricity generation in Northern Ireland; and if he will make a statement.

Mr. Viggers: I announced on 15 July that the Government have decided to meet the need for new

generating capacity in Northern Ireland, which will occur in the mid-1990s by installing the third and fourth generating sets in the Kilroot power station as dual coal-oil fired units.

On the same day I announced plans to examine ways of privatising the entire Northern Ireland electricity system.

Handicapped Persons (Central Heating)

Mr. McGrady: To ask the Secretary of State for Northern Ireland if he will extend the provision of central heating in respect of handicapped adaptations from those who are totally immobile to those in the severely handicapped categories; and if he will make a statement.

Mr. Needham: The Northern Ireland Housing Executive can make house renovation grants to all disabled people to help meet the cost of any necessary adaptations to their homes. Such grants are made only following assessment of the needs of each disabled person by professional staff of health and social services boards.

If professional staff recommend that adaptations, including modification of existing heating systems or the installation of alternative systems, are necessary, grants are made available.

Child Care

Ms. Richardson: To ask the Secretary of State for Northern Ireland what action he is taking to implement the recommendations within his area of responsibility of the European Commission's childcare network report: "Caring for Children—Services and Policies for Childcare and Equal Opportunities in the United Kingdom".

Mr. Needham: This detailed report and its recommendations are currently being considered. They cover the areas of responsibility of a number of Government Departments, both at national level and in Northern Ireland.

Flooding

Mr. William Ross: To ask the Secretary of State for Northern Ireland whether the costs of repairing the damage caused to flood protection works by the floods of last October fall on the drainage division's maintenance budget.

Mr. Viggers: Yes. The 1987-88 maintenance budget of the Department of Agriculture's drainage division was increased by £80,000 to allow for purchase of additional materials for repair of damage caused to flood banks last October.

Mr. William Ross: To ask the Secretary of State for Northern Ireland if he will publish a table in the *Official Report* to show the sums of money in cash and real terms for each year since 1980 expended on *(a)* capital works and *(b)* maintenance on river drainage in (i) the Armagh area, (ii) the Dunmurry-Sprucefield area and (iii) the Omagh area; what are his projections for the current year; and if he will indicate what extra sums he has made available to prevent a repetition of the floods of last October, and what extra sums have been made available to repair damage caused by these floods in the current year.

Mr. Viggers: The information is as follows for the years 1982-83 to 1987-88 together with a projection of current year expenditure.

£ million

	Armagh		*Omagh*		*Dunmurry-Sprucefield*	
	Capital works	*Maintenance*	*Capital works*	*Maintenance*	*Capital works*	*Maintenance*
1982-83 (cash terms)	0·4	1·3	0·2	1·1	3·0	1·5
(at 1988-89 prices)	0·5	1·7	0·3	1·5	3·9	2·0
1983-84 (cash terms)	0·4	1·4	0·7	1·1	3·3	1·7
(at 1988-89 prices)	0·5	1·8	0·9	1·4	4·1	2·1
1984-85 (cash terms)	1·5	1·3	0·4	1·1	2·5	2·1
(at 1988-89 prices)	1·8	1·5	0·5	1·3	3·0	2·5
1985-86 (cash terms)	1·7	1·1	0·4	1·0	3·2	2·0
(at 1988-89 prices)	1·9	1·3	0·5	1·1	3·6	2·3
1986-87 (cash terms)	3·2	1·3	0·4	1·1	2·1	2·0
(at 1988-89 prices)	3·5	1·5	0·5	1·2	2·2	2·2
1987-88 (cash terms)	3·9	1·2	0·9	1·0	3·1	1·8
(at 1988-89 prices)	4·0	1·3	0·9	1·1	3·2	1·9
1988-89 Projection	4·2	1·3	1·3	1·1	2·0	2·1

Cash terms have been repriced using the GDP factors.

Figures are not available in the form requested for earlier years, but the total expenditure in Northern Ireland in those years was:

	Capital works £ million	*Maintenance £ million*
1980-81 (cash terms)	2·8	3·1
(at 1988-89 prices)	4·3	4·7
1981-82 (cash terms)	3·5	4·0
(at 1988-89 prices)	4·9	5·5

The Drainage NI Order 1973 does not charge the Department of Agriculture with responsibility for the prevention of flooding but its ongoing programme of providing flood protection in vulnerable areas has been supplemented by an additional £1 million in the current year.

The Department's maintenance effort has been concentrating on the repair of those flood defences requiring immediate attention in October 1987 and account continues to be taken of damage caused at that time in prioritising future works programmes.

Disabled People (Discrimination)

Mr. Matthew Taylor: To ask the Secretary of State for Northern Ireland what steps his Department is taking to eliminate discrimination against the disabled in Northern Ireland.

Mr. Viggers: Our approach towards the disabled in Northern Ireland is directed towards enabling them to acquire the training, skills, opportunities and support they need to secure employment. A range of measures is available to provide practical help to employers.

Belfast

Sir John Biggs-Davison: To ask the Secretary of State for Northern Ireland what new funds are being provided to promote enterprises, employment and social improvement in the poorer parts of Belfast; and if he will make a statement.

Mr. Needham: I refer my hon. Friend to the reply given to a question by my hon. Friend the Member for Beaconsfield (Mr. Smith) on 19 July 1988 at column *562*.

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what consultations took place with Lisburn district council and Newtonabbey district council before the Whitehouse, Coole and Collin wards were included in areas of special need contained in "Making Belfast Work".

Mr. Needham: Wards within the Belfast urban area were assessed as areas of need on the basis of objective indices of deprivation and this did not, therefore, require consultation with any of the district councils.

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what criteria were used in defining areas of social need as Catholic West Belfast and Protestant West Belfast as contained in the map on figure 1 of "Making Belfast Work".

Mr. Needham: As the published material indicates, wards within the area were designated as either Protestant or Catholic on the basis of the 1981 census of population, after making allowance for those persons not stating their religion and those not enumerated. Objective indices of deprivation were used in defining the areas of social need.

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what was the amount of money invested in the area defined in the document "Making Belfast Work" published by his Department, as Catholic West Belfast, in projects for industrial development, housing, assistance to voluntary projects, health and social services and education for each year from 1970 through to 1980 and from 1980 until 1987.

Mr. Needham: The area in the document is defined by reference to council wards. The information requested is not held at ward level and could be obtained only at disproportionate cost.

MVs Portaferry and Strangford

Mr. McGrady: To ask the Secretary of State for Northern Ireland how many days MV Portaferry and MV Strangford vessels operated from Strangford to Portaferry and from Portaferry to Strangford in each of the years 1984-85, 1985-86, 1986-87 and 1987-88.

Mr. Needham: The Strangford lough ferry service was run using either the MV Strangford Ferry or the MV Portaferry for all or part of the daily scheduled period of service on 363 days in 1984-85, 339 days in 1985-86, 349 days in 1986-87 and 365 days in 1987-88.

Mr. McGrady: To ask the Secretary of State for Northern Ireland how many days the MV Portaferry and MV Strangford vessels were scheduled to operate from Strangford to Portaferry and from Portaferry to Strangford in each of the years 1984-85, 1985-86, 1986-87 and 1987-88.

Mr. Needham: The Strangford lough ferry service, operated by the MV Strangford Ferry as the main vessel and by the MV Portaferry as a standby-vessel, was, and is, scheduled to run every day of the year apart from Christmas day.

Mr. McGrady: To ask the Secretary of State for Northern Ireland when the Department of the Environment will replace the MV Portaferry vessel on the Strangford-Portaferry route; and if he will make a statement.

Mr. Needham: The Department of the Environment has no present plans to replace the MV Portaferry. The Department's aim is to ensure that the MV Portaferry is maintained as is required to enable the vessel to serve as a safe and effective standby for the main Strangford lough ferry service vessel, the MV Strangford Ferry.

Schools (Cleaning Services)

Mr. McGrady: To ask the Secretary of State for Northern Ireland (1) why the education and library boards in Northern Ireland have decided to employ contract cleaning services in all their schools from 1 September; and if he will make a statement;

(2) what steps will be taken to ensure that the same standards of hygiene and cleanliness are maintained under the contract cleaning services scheme in all schools in Northern Ireland.

Dr. Mawhinney *[holding answer 27 July 1988]:* Experience in other public bodies has shown that savings are possible by subjecting services to competitive tendering and education and library boards were requested by the Department to consider the market testing of a number of services, including cleaning. However, the extent to which they will employ contract cleaning services in their schools is not yet known.

The maintenance of standard of hygiene and cleanliness in controlled and maintained schools is the responsibility of the appropriate education and library board.

For voluntary schools and independent schools this responsibility rests with the individual school authority.

Mr. McGrady: To ask the Secretary of State for Northern Ireland what efficiency savings will be made in each of the education and library boards in Northern Ireland due to the introduction of contract cleaning services in schools from 1 September.

Dr. Mawhinney *[holding answer 27 July 1988]:* The Southern education and library board obtained tenders for a pilot scheme for cleaning services at 26 of its schools in its area and awarded contracts for 16 schools; the estimated saving in the period 1 September 1988 to 31 March 1989 is £29,000. The other boards have not yet subjected their cleaning services to competitive tendering.

Mr. McGrady: To ask the Secretary of State for Northern Ireland what percentage of the education and library board budget in each education and library boards was used for cleaning services for all types of schools in each of the years from 1980-81 to 1987-88.

Dr. Mawhinney *[holding answer 27 July 1988]:* The information is as follows:

	Belfast *Per cent.*	*North-Eastern* *Per cent.*	*South-Eastern* *Per cent.*	*Southern* *Per cent.*	*Western* *Per cent.*
1980-81	8·18	6·85	5·11	6·05	5·77
1981-82	7·94	6·49	5·11	6·07	5·80
1982-83	7·95	6·19	5·19	6·13	5·93
1983-84	8·13	6·19	5·33	6·06	5·58
1984-85	7·88	6·10	5·23	6·09	5·73
1985-86	8·36	6·44	5·34	6·38	6·02
1986-87	6·69	6·20	5·29	5·94	5·70
1987-88	6·90	6·52	5·53	6·24	6·09

These figures include cleaning and caretaking services; separate figures for cleaning are not available.

Short Brothers

Mr. Kilfedder: To ask the Secretary of State for Northern Ireland (1) if he proposes to take steps to prevent any foreign countries from purchasing the missile division of Short Brothers, Northern Ireland;

(2) if he will take steps to prevent Libyan interests from purchasing the missile division of Short Brothers, Northern Ireland.

Mr. Viggers *[holding answer 27 July 1988]:* In considering any approaches relating to the company the national and other interests will be fully taken into account.

Public Order (Charges)

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland if he will list all those elected councillors and hon. Members who have been charged under the Public Order (Northern Ireland) Order 1986 and the outcome of the subsequent trials; and if he will make a statement.

Mr. Ian Stewart *[holding answer 21 July 1988]:* This information is not readily available and could not be obtained except at disproportionate cost.

Economic League

Mr. Hume: To ask the Secretary of State for Northern Ireland what information is available to him on the activities or associations of the Economic League in Northern Ireland; and whether the Royal Ulster Constabulary has investigated whether that body might receive, possess or circulate information or misinformation which might be useful to some terrorist groups.

Mr. Ian Stewart *[holding answer 15 July 1988]:* I understand that no such information is held by my Department, nor has any such investigation been carried out by the RUC.

Mr. Hume: To ask the Secretary of State for Northern Ireland whether Government at any level in Northern Ireland have or have had contacts with the Economic League, receive information or representations from it or give information to it or have had such contacts with individuals or bodies whom Government might regard as acting for or with the Economic League.

Mr. Ian Stewart *[holding answer 15 July 1988]:* I am not aware of any such relationships between my Department and the Economic League.

Plastic Bullets

Mr. McNamara: To ask the Secretary of State for Northern Ireland if he will list, for each incident involving death or injury by plastic bullet rounds in Northern Ireland since 1972, the victim, the date of the incident, the circumstances leading to death or injury, the amount of compensation paid, if any, and whether it was paid under criminal injuries compensation legislation or other provisions.

Mr. Ian Stewart *[holding answer 8 July 1988]:* Since 1972, 13 people have died after being struck by plastic baton rounds. During the same period two people died as a result of rubber baton round injuries. The names of those who died and the details of the circumstances of each death are as follows:

Name	*Date of death*	*Circumstances*
Francis Rowntree	22 April 1972	Francis Rowntree was hit in the head by a rubber baton round fired during rioting at Divis Flats in Belfast on 20 April 1972. He died in hospital two days later.
Tobias Molloy	16 July 1972	On 16 July 1972 a number of rubber baton rounds were fired by the security forces when a crowd of youths attacked an army checkpoint near Strabane, Tobias Molloy is believed to have been struck by one of the rounds and was reported dead on arrival in hospital, across the border, in the Republic of Ireland.
Stephen Geddis	30 August 1975	On 28 August 1975, as the army moved in to dismantle a barricade built by youths at a road junction in Belfast, they were stoned by a crowd. The security forces fired a number of plastic baton rounds and later Stephen Geddis was admitted to hospital with head injuries from which he died the following day.
Brian Stewart	10 October 1976	On 4 October 1976 the security forces fired a number of plastic baton rounds to disperse a crowd of around 500 people who were stoning them in the Turf Lodge area of Balfast. Shortly afterwards Brian Stewart was admitted to hospital suffering from a fractured skull; he died on 10 October.

Name	Date of death	Circumstances
Michael Donnolly	9 August 1980	On 9 August 1980 the security forces fired a number of plastic baton rounds during a period of sustained rioting in Leeson Street in Belfast. Michael Donnolly was struck by one of these rounds and died a short time later in hospital.
Paul Whitters	25 April 1981	On 15 April 1981 during rioting in Londonderry masked youths approached a bakery throwing stones and breaking windowes and apparently intending to hijack a lorry. The security forces fired a plastic baton round at the crowd which hit one of them, Paul Whitters, on the head. He was admitted to hospital where he died 10 days later.
Julie Livingstone	13 May 1981	On 12 May 1981 members of the security forces in an armoured vehicle in Belfast fired 3 plastic baton rounds when they were attacked by youths throwing petrol bombs. Julie Livingstone was seen to fall and she later died as a result of a head injury.
Carol Ann Kelly	22 May 1981	On 19 May 1981 in the Twinbrook area of Belfast two army landrovers came under attack from youths throwing stones and other missiles, and the security forces fired two plastic baton rounds. Carol Ann Kelly was struck on the head by the second of these baton rounds and she died in hospital three days later.
Henry Duffy	22 May 1981	On 22 May 1981, during a period of heavy rioting in the Bogside area of Londonderry, the security forces fired a number of plastic baton rounds when they came under attack from youths throwing petrol and nail bombs. Henry Duffy was hit in the head by a baton round and died after admission to hospital.
Norah McCabe	9 July 1981	In the early hours of 8 July 1981 two police landrovers were attacked with stones and other missiles whilst travelling on the Falls Road in Belfast. At the junction of Linden Street a plastic baton round was fired from one of the landrovers and Norah McCabe was struck on the head, she died the following day in hospital.
Paul Doherty	31 July 1981	On 24 July 1981 following disturbances and demonstrations in connection with the Republican hunger strike, barricades were erected outside Divis Flats in Belfast. As the army removed these barricades they were stoned and petrol bombed by youths on the road and in the adjacent flats. A member of the security forces fired two plastic baton rounds and one of these struck Peter Doherty, who was near an open window in the kitchen of a flat. He died a week later.
Peter McGuinness	9 August 1981	On 9 August 1981 police on the Whitewell Road in Belfast were attacked with stones and petrol bombs by about 50 youths. As two petrol bombs burst on the roof of a police vehicle the security forces fired one plastic baton round and Peter McGuinness, who had been demonstrating with the crowd, was hit in the chest and died shortly afterwards.
Stephen McConomy	19 April 1982	On 16 April 1982, as a suspected explosives device was examined by the army, an armoured vehicle came under attack from rioters, Stephen McConomy was one of a group of youths near the vehicle. He was hit by a plastic baton round and died three days later in hospital.
John Downes	12 August 1984	On 12 August 1984 the police attempted to arrest Mr. Martin Galvin, the banned Noraid publicity director, at a rally in Andersonstown, West Belfast to mark the thirteenth anniversary of the introduction of internment, in the disturbances which followed the security forces fired a number of plastic baton rounds. John Downes died after being struck by one of them.
Keith White	14 April 1986	On 31 March 1986 following rioting in Portadown, Keith White was struck by a plastic baton round. He died in hospital from his injuries on 14 April 1986.

Since 17 March 1981, when records were first collated, 417 people are recorded as having been injured by baton rounds. More detailed information concerning these alleged injuries is not readily available and could be obtained only at disproportionate cost.

The information in respect of compensation is not available in the form requested, but between 1982 and 1988 (to 8 July) 48 of the claims made under the Police Act (Northern Ireland) 1970 against the Chief Constable of the Royal Ulster Constabulary for deaths and injuries from baton rounds have been settled at a figure of £505,516. Information relating to such claims made against the Secretary of State for Northern Ireland under the Criminal Injuries (Compensation) Northern Ireland Order 1977 could be provided only at disproportionate cost.

Regarding the details of those of the 48 settled claims that were concluded in court and are therefore in the public domain, I refer the hon. Member to the reply I have given him today to his written question.

Mr. McNamara: To ask the Secretary of State for Northern Ireland how many actions were brought against the Royal Ulster Constabulary by individuals or the families of individuals injured or killed by plastic bullets in each year since 1972.

Mr. Ian Stewart *[holding answer 8 July 1988]:* The information requested is not readily available since 1982 and could be obtained only at disproportionate cost.

However, since 1982, 183 cases, of which 107 have been concluded and 76 are pending, involving the use of plastic baton rounds, have been brought against the RUC. These cases include civil bills, writs and letters of claim, and cover claims for personal injury or death and also damage to property.

Mr. McNamara: To ask the Secretary of State for Northern Ireland if for those actions brought against the Royal Ulster Constabulary by individuals or the families of individuals injured or killed by plastic bullets since 1972, he will list *(a)* the outcome in each case whether

compensation was paid, to whom, in what amount and on what date and *(b)* for those cases settled out of court, amounts of compensation paid, to whom and on what date.

Mr. Ian Stewart *[holding answer 8 July 1988]:* The complete information is not available in the form requested and could be obtained only at disproportionate cost.

However, since 1982, 107 cases have been concluded as follows:

(a) 48 cases were concluded with an amount of £505,516 paid in compensation. No admissions of liability were made in these cases.
(b) Liability was denied in 35 cases.
(c) 15 cases were disallowed at court.
(d) In nine cases there were no further proceedings.

It would not be appropriate to give details of individual cases that were concluded out of court or the names of recipients of settlements in court. The other details of the 15 out of the 48 concluded cases that were settled in court were as follows:

Date of incident	*Amount paid*	*Date of settlement*
9 August 1981	3,000	20 December 1983
8 July 1981	2,000	7 February 1985
21 May 1981	1,000	14 December 1984
9 August 1980	1,500	11 December 1984

Educational Qualifications

Mr. McGrady: To ask the Secretary of State for Northern Ireland (1) if he will list the percentages of the total post-primary school population, who have attained passes in qualifications such as City and Guilds and B Tec certificates in each of the years 1985, 1986 and 1987;

(2) if he will list the percentages of the total post-primary school population, who have attained passes at each grade level including upgraded status in CSE and GCE O and A-level in each of the years 1985, 1986 and 1987.

Dr. Mawhinney *[holding answer 26 July 1988]:* The information is not available.

Electrical Equipment Testing

Mr. McGrady: To ask the Secretary of State for Northern Ireland what steps he is taking to guarantee the same standards of consumer protection after the discontinuing of electrical equipment testing services in the industrial science division of the Department of Economic Development.

Mr. Viggers *[holding answer 27 July 1988]:* Following a review of the work of the Department of Economic Development's industrial science division it has been possible to reinstate the service for the testing of electrical equipment and the same standards of consumer protection will therefore be provided as before the service was temporarily suspended.

Mr. McGrady: To ask the Secretary of State for Northern Ireland if he will review his recent decision to discontinue electrical equipment testing in the industrial science division of the Department of Economic Development, taking into account the increased financial burdens which will be placed on local authorities required to despatch articles to Great Britain; and if he will make a statement.

Mr. Viggers *[holding answer 27 July 1988]:* I have had representations from a number of local authorities in Northern Ireland and from consumer organisations about the difficulties they are encountering in getting electrical equipment tested. A review has been conducted of the work of the Department's industrial science division and it has been possible to reinstate this service. Some increase in charges will be necessary so that the service covers its cost and the local authorities are being informed of these increases.

Schools (Cleaners)

Mr. McGrady: To ask the Secretary of State for Northern Ireland how many people were employed as cleaners in primary, secondary and further education in Northern Ireland in each of the years from 1980-81 to 1987-88.

Dr. Mawhinney *[holding answer 27 July 1988]:* The information is as follows in respect of grant-aided controlled and maintained schools (including nursery and special schools):

	Cleaners
1980-81	5,313
1981-82	5,155
1982-83	5,194
1983-84	5,257
1984-85	5,262
1985-86	5,188
1986-87	4,984
1987-88	5,072

At present some 78 per cent. of cleaning staff are employed on a part-time basis.

A breakdown of these figures on a sectoral basis is not readily available and could be obtained only at disproportionate cost. The figures also exclude voluntary grammar schools for which such information is not held centrally.

DEFENCE

Submarine Compex

Mr. Patrick Thompson: To ask the Secretary of State for Defence if, subsequent to the publication of the results of frigate compex report in March 1987, the results of the submarine compex exercise are now available.

Mr. Sainsbury: My predecessor announced on 5 March 1987 the results of the comparison exercise for the refits of two Leander class frigates. A detailed report has now been drawn up to compare the commercial refits of the Oberon

class submarine HMS Otter at Humber Shiprepairers Limited, and her sister ship HMS Osiris under taken at Devonport royal dockyard.

Against an allocation of 105 weeks at the outset (including five weeks for sea trials), the submarine Otter was taken in hand on 3 December 1984 and completed on 2 March 1987, a period of 117 weeks inclusive. In effect, this was a delay of only one week since Humber Shiprepairers Limited was granted an 11-week extension to repair the port main engine at the Ministry of Defence's cost and liability. The Osiris refit commenced on 16 December 1985 and was completed on 11 June 1987, a period of just over 90 weeks inclusive. With less work to undertake, Devonport dockyard had contracted, during the refit, to complete in this time scale. Both refits achieved the required quality standards, having been examined by the same acceptance authorities, and both submarines are now operational.

The comparison of costs was again carried out by the Ministry of Defence's principal director of accountancy services, independently of the director general of ship refitting. In order to place the two refits on a comparable basis, the principal director of accountancy services made adjustments for differences in specification work content, condition of the ships, and yard facilities. He also took into account the work subcontracted by Humber Shiprepairers Limited, services provided to Humber Shiprepairers Limited and Devonport by the Ministry of Defence, and inflation between the different refit time scales. The costs were finally adjusted for the differences in the amount of work actually done on the respective submarines, with the result that the dockyard cost was assessed as approximately 30 per cent. more than Humber Shiprepairers Limited for comparable work.

Overall the performance of both yards was commendable in different ways. For HSL to complete Otter's refit to time and quality with no previous warship experience was most creditable, particularly in the light of the disruption to its schedules due to the poor quality of some of the Ministry material supplied to it. On the other hand, Devonport completed Osiris in a time not achieved for 13 years and to a high-quality standard. The report concludes that private ship repairers can compete with the royal dockyards, despite the latter's depth of experience, and recommends that, in view of the cost advantage, suitable ship repair yards should be invited to tender for future Oberon class refits. It describes the problems that arise during refits and suggests how these can be solved. Except as noted below the conclusions and recommendations of compex have been disseminated and are already being used by DGSR in the naval refit programme, the great majority of which is conducted now under commercial disciplines.

The Government are committed to the extension of competition as part of their policy of putting the royal dockyards under commercial management. The recommendation about future Oberon class refits will therefore be taken into account as decisions are made in each case. The recommended introduction of reduced complement refits will need further thought because of the budgetary implications.

Compex proved that the private ship repair sector was capable of conducting both submarine and surface warship refits. It has confirmed the opportunities for tightening our refit procedures across the board to achieve better value for money. It also confirms that we should pursue the goal of greater competition to reap those benefits in the future. The transfer of the royal dockyards to commercial management was wholly consistent with this policy.

I have placed in the Library copies of the executive summary of the report on the submarine refits, and will place copies of the full report there shortly.

Military Lands Act 1892

Mr. Cohen: To ask the Secretary of State for Defence if he will list in chronological order the byelaws made under the Military Lands Act 1892 that were in force on 1 July; and if he will place a copy of each of these byelaws in the Library.

Mr. Freeman: I refer the hon. Member to the reply I gave on 18 May, at column *509*, listing byelaws made under the Military Lands Act 1892 since May 1979. All these were extant on 1 July although the RAF Greenham Common Byelaws 1985 and the RAF Fylingdales byelaws are currently sub judice.

In addition, byelaws made before May 1979 affecting principal Army training areas include:

	Byelaws
Cinque Ports Training Area:	Lydd Ranges Byelaws 1939
	Hythe Ranges Byelaws 1986
	Shorncliffe and District Military Lands Byelaws 1976
	Dover and District Military Lands Byelaws 1976
Salisbury Plain Training Area:	Bulford Ranges Byelaws 1963
	Imber Ranges Byelaws 1963
	Larkhill Artillery Ranges Byelaws 1965
	Pernam Down Ranges Byelaws 1969
	The Porton and Winterbourne Gunner Military Lands Byelaws 1977
Otterburn Training Area.	Otterburn Training Area Byelaws 1971 (as amended by the Otterburn Training Area (Amendment) Byelaws 1980)
Stanford Training Area:	Stanford Training Area Byelaws 1970 (as amended by the Stanford Training Area (Amendment) Byelaws 1975)
Sennybridge Training Area:	Sennybridge Training Area Byelaws 1974

Departmental Vehicles

Mr. Redmond: To ask the Secretary of State for Defence how many vehicles are owned by his Department and by each branch of the armed forces; and how many of these have been converted to run on unleaded petrol.

Mr. Freeman: The Ministry of Defence owns 87,500 vehicles which are allocated as follows:

	Vehicles
Royal Navy	3,000
Army	58,000
Royal Air Force	10,000
Procurement Executive	2,000
Held in vehicle storage depots	14,500

A significant proportion of the current stock runs on diesel fuel, but it is not possible to provide the precise number without disproportionate effort. Other vehicles in

the current stock which cannot run on unleaded petrol will not be specifically converted, but, as and when they need to be replaced, they will be replaced whenever possible by vehicles which run on either diesel or unleaded petrol.

Ethnic Monitoring

Mr. Janner: To ask the Secretary of State for Defence what were the results of the ethnic monitoring of recruitment carried out in accordance with his equal opportunities action plan; and how many and what percentage of people from ethnic minorities were shown in such ethnic monitoring exercises to be employed at each grade or level of his Department.

Mr. Sainsbury: I refer the hon. and learned Member to the reply I gave him on 17 June at column *343*.

Mr. Janner: To ask the Secretary of State for Defence when he expects the results of the ethnic monitoring of recruitment commenced in 1987 to become available.

Mr. Sainsbury: Not before the end of the year.

Mr. Janner: To ask the Secretary of State for Defence what response he has received to the voluntary survey of the ethnic origins of all non-industrial and industrial staff thus far carried out.

Mr. Sainsbury: The response rate to the three phases of the survey of non-industrial staff completed to date was 79 per cent. Information on the response rate to the survey of industrial staff is not yet available.

Mr. Janner: To ask the Secretary of State for Defence in what quasi-governmental bodies or other organisations under his aegis he has authority to request or require the carrying out of ethnic monitoring exercises in accordance with the code of the Commission for Racial Equality; and what ethnic monitoring and equal opportunities exercises have been carried out by each such department.

Mr. Sainsbury: NDPBs and other bodies sponsored by the Ministry of Defence are responsible for arrangements for recruitment and personnel management of staff they employ. Bodies are encouraged to be equal opportunities employers and to pursue practices in the codes of the Commission for Racial Equality and the Equal Opportunities Commission.

No central records are held of ethnic monitoring and equal opportunities exercises carried out by these bodies.

Mr. Janner: To ask the Secretary of State for Defence (1) how many of the respondents from ethnic minorities employed in his Department in grade seven and above were in grades one, two, three, four, five, six and seven, respectively;

(2) how many of the respondents from ethnic minorities employed in his Department were senior executive officers and higher executive officers, respectively.

Mr. Sainsbury: I regret this information cannot be provided. The code of practice governing the protection of data collected through ethnic origins surveys requires Departments not to publish information in a way which could lead to individuals being identified.

Mr. Janner: To ask the Secretary of State for Defence whether he will institute a monitoring exercise in accordance with the code of the Commission for Racial Equality in order to ascertain figures for ethnic minorities in part-time posts in his Department.

Mr. Sainsbury: The Department now has the capability to monitor the number of ethnic minorities in part-time posts, and the number of such persons currently employed part-time is 27.

Mr. Janner: To ask the Secretary of State for Defence whether he will place in the Library the results of the survey of ethnic origins of all non-industrial and industrial staff now being conducted by his Department, as and when each of the three phases are completed.

Mr. Sainsbury: The results of the surveys of the ethnic origins of MOD staff will be published by the Cabinet Office and copies of the reports will be placed in the Library.

Equal Opportunities

Mr. Janner: To ask the Secretary of State for Defence what is the strength of his equal opportunities unit; how many members thereof are female and from ethnic minorities, respectively, and whether the equal opportunities officer is female or from an ethnic minority or both.

Mr. Sainsbury: The unit consists of three people, two men and one women, none of whom is from the ethnic minorities.

Staff (Ethnic Minorities)

Mr. Janner: To ask the Secretary of State for Defence what advertisements he has placed in the ethnic press in order to encourage more applicants from the ethnic minorities; and when.

Mr. Sainsbury: Recruitment advertisements are run for two months out of every three throughout the year. Advertisements have been placed in *The Voice*, *The Asian Times*, *The Sri Lankan Monthly*, *New Life* and *Sing Tao*.

Mr. Janner: To ask the Secretary of State for Defence in what scheme his Department participates which provides training for potential executive officer recruits; and in what way this encourages more applicants from ethnic minorities.

Mr. Sainsbury: The MOD is co-operating with the Cabinet Office in developing an access training course to enhance the job-related skills of candidates who wish to re-apply to enter the Civil Service through the executive officer competition. A pilot course is planned for the autumn.

Bisley Camp

Mr. William Ross: To ask the Secretary of State for Defence under what statutory authority he has power to sell or otherwise dispose of any part of the Bisley camp and its ranges; and if he will name the property developers presently preparing *(a)* the residential and *(b)* the commercial developments.

Mr. Freeman: Bisley camp and its ranges are the property of the National Rifle Association and any question of disposal would be its responsibility.

Mr. William Ross: To ask the Secretary of State for Defence what is the total area of the ranges at Bisley; and whether he has any plans to dispose of any part of that area.

Mr. Freeman *[holding answer 22 July 1988]*: The ranges at Bisley are owned by the National Rifle Association from which MOD leases a number of administrative buildings; we have no plans to reduce these requirements.

USAF (Air Refuelling)

Mr. Kirkwood: To ask the Secretary of State for Defence if refuelling at low levels was practised over the United Kingdom or surrounding waters by the United States Air Force B52 aircraft deployed at RAF Fairford in May.

Mr. Freeman: No.

Flying (Mallet Blow Exercises)

Mr. Kirkwood: To ask the Secretary of State for Defence whether flying during future Mallet Blow exercises will be allowed during the period between sunset plus 30 minutes and sunrise minus 30 minutes.

Mr. Freeman: Flying during the periods sunset plus 30 minutes is considered for those Mallet Blow exercises which take place at a time of the year when dusk is early. The next such exercise is planned to take place in April. No flying in the period before sunrise is planned for aircraft participating in Mallet Blow exercises.

Uranium Ammunition

Mr. David Davis: To ask the Secretary of State for Defence if he will update his report on the development of depleted uranium ammunition for Her Majesty's forces.

Mr. Sainsbury: Further to the replies given by my hon. Friend on 17 January 1985, at columns *183-84*, I can announce that a minimum series of trial firings of Phalanx ammunition will be conducted at the royal aircraft establishment, West Freugh, commencing in August this year. The amounts of DU involved will be no more than that previously approved for other MOD ranges.

Public Expenditure

Mr. Worthington: To ask the Secretary of State for Defence if he will publish a table in the *Official Report*, in the same format as the reply of 7 July, *Official Report*, column *701-4*, on receipts classified as charges in respect of his programme expenditure over the years 1982-83 to 1990-91, indicating the receipts in respect of running costs expenditure together with a supplementary analysis indicating, separately, the amounts of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mr. Archie Hamilton: The figures provided in answer to the hon. Member on 7 July 1988, at columns *701-4*, related to receipts in respect of programme expenditure. MOD running costs receipts anticipated for the period 1982-83 to 1990-91 are detailed in table 1:

Table 1
Running costs receipts

£ million

1982-83	*1983-84*	*1984-85*	*1985-86*	*1986-87*	*1987-88*	*1988-89*	*1989-90*	*1990-91*
516	610	645	670	704	818	777	808	828

A more detailed analysis of running costs receipts for the period 1985-86 to 1990-91 is provided in tables 2 and 3. Table 2 reflects receipts arising from other public expenditure programmes. Figures on the same basis for 1982-83 to 1984-85 are not readily available and could be produced only with disproportionate effort.

[1] Sections reflect the 1988-89 Supply Estimates structure.
[2] — indicates receipts of less than £0·1 million.

The amount of receipts in respect of programme expenditure met from other public expenditure programmes is not readily available and could be produced only at disproportionate effort.

Catering

Mr. Austin Mitchell: To ask the Secretary of State for Defence whether he will consider the privatisation of the services' catering arrangements; and if he will publish in the *Official Report* a table showing the number of officers and other ranks in each grade in each service who are wholly or partly responsible for catering, including the ordering, transporting and holding of stocks of foodstuffs and kitchen equipment and materials, the total cost including all administrative overheads, pension provision etc. and the cost per meal served.

Mr. Sainsbury: I will write to the hon. Member.

Recruitment and Promotion Policy

Ms. Richardson: To ask the Secretary of State for Defence what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career break due to child care.

Mr. Sainsbury: The MOD, in common with other Government Departments, is an equal opportunities employer. All applicants for recruitment, and candidates for promotion, are considered wholly on their merits and on an equal basis. The instructions and training given to those in the MOD who are responsible for recruitment and promotion specifically cover the need to avoid discrimination, whether direct or indirect, including discrimination in the circumstances referred to in the question.

RAF (Reserve Forces)

Mr. Wilkinson: To ask the Secretary of State for Defence what progress has been made in attempts to make greater use of reserve forces in the Royal Air Force.

Mr. Freeman: Trials to evaluate the potential use of Royal Air Force Volunteer Reserve aircrew have recently been concluded. The trials have shown that while it is not possible to replace regular crew members on RAF VC10s by means of reservists and the trial is being terminated, there is some scope for Volunteer Reserve air electronics operators to augment the Nimrod maritime reconnaissance force in time of tension and war. Accordingly, the possibility of developing and expanding this capability is being examined. In addition, a further trial has recently been set in hand to assess the feasibility of using some test pilots and navigators from the commercial sector in a reserve role to provide front-line aircrew in war.

In the case of the Royal Auxiliary Air Force, a trial has been carried out to establish the feasibility of recruiting and retaining a dedicated support force (the RAuxAF Support Force). The force adds to our ground defence capability, thus relieving regular uniformed personnel of diversionary tasks. The trial was a considerable success and attracted its full quota of 350 volunteers. We are hoping to build further upon this promising foundation.

Radioactive Waste

Mr. Cohen: To ask the Secretary of State for Defence what is his policy towards the use of landfill sites for the disposal of military radioactive waste; what use has been made of this technique in the past; what steps are taken to ensure that no environmental contamination takes place; and what measurements have been made of the actual level of contamination.

Mr. Sainsbury: The Ministry of Defence believes that shallow land burial is an appropriate and safe method of disposing of its low-level radioactive waste. It is the normal method for disposal of low-level radioactive waste, which arises from a variety of sources including hospitals and industry.

All disposals are measured and recorded. Regular monitoring of the disposal sites and surrounding area is carried out by the appropriate agencies to ensure that no harm to the local population or the environment occurs from past disposals.

Dartmoor (Mock Battles)

Mr. Steen: To ask the Secretary of State for Defence if he will make it his policy to put advance notices in the local press and in post offices, similar to those warnings given on live firing days, when mock battles using blank ammunition, flares, explosions and thunder flashes are planned by his Department on Dartmoor.

Mr. Freeman: The advance notification on live firing on Dartmoor range is intended to warn the public of the closure of these areas for safety reasons and is a

requirement under the byelaws. Training or range areas are not closed when the training taking place involves no live firing as this does not constitute a danger to the public; there is, therefore, no need to give advance notice to the public of this form of training.

RNADs Milford Haven and Trecwn

Mr. Nicholas Bennett: To ask the Secretary of State for Defence if he will meet representatives of the work force of Milford Haven and Trecwn RNADs before 30 September to discuss the consultative document "The Future of RNADs Milford Haven and Trecwn" issued on 25 July.

Mr. Freeman: Yes.

Mr. Nicholas Bennett: To ask the Secretary of State for Defence when it was originally intended to issue the report on the future of RNADs Milford Haven and Trecwn.

Mr. Freeman: No specific date was fixed for the publication of the consultative document. It was issued as soon as the relevant Ministry of Defence departments had considered all aspects of this complex question, and the Welsh Office had been consulted.

Mr. Nicholas Bennett: To ask the Secretary of State for Defence if he will list the main features of the normal rules for order of redundancy referred to in paragraph 11 of the consultative document on the future of the royal naval arms depots at Milford Haven and Trecwn.

Mr. Freeman: Redundancy procedures would be implemented only if a final decision to close Milford Haven is taken after completion of the consultative process and it was not possible to offer alternative jobs within the MOD. However, the normal rules for redundancy can be summarised as follows:

Selection of employees for redundancy

1. The head of establishment will select the employees to be declared redundant from these categories and in this order:

a. VOLUNTEERS. Those aged 57 to 60 years being given preference.

b. EMPLOYEES AGED 65 AND OVER

1. The oldest should normally be declared redundant first.

2. In industrial grades from which there is in line promotion, eg to chargehand, certain stores grades etc., employees in the higher grade aged 65 or over will be declared redundant before those in the lower grade under 65, despite the absence of redundancy in the higher grade, provided that there are employees in the lower grade suitable for promotion.

c. DILUTEES. Where the redundancy occurs in a craft grade, dilutees employed in the craft concerned will be declared redundant before fully qualified craftsmen.

d. EMPLOYEES OVER THE MINIMUM RETIREMENT AGE. Provided the correct inefficiency or ill health procedures have been followed, and there has been no subsequent improvement, the head of establishment may call on industrial employees over the minimum retirement age (60 in most cases) to retire if on account of health or reduced ability they are no longer capable of carrying out the full duties of their grade.

e. OTHER EMPLOYEES. If the number of employees under sub-paragraphs *a* to *d* is insufficient to resolve the redundancy, the head of establishment will select other employees to make up the required number. In doing so, while having regard to the efficiency of the establishment, and therefore, to the general proficiency and reliability of individual employees, and their suitability for other work, he will adhere as closely as possible to the order determined by the length of service, that is, reverse order of seniority.

Mr. Nicholas Bennett: To ask the Secretary of State for Defence if he will list by age, sex and length of service the total number of staff in each category E grade employed at royal naval arms depots *(a)* Milford Haven and *(b)* Trecwn.

Mr. Freeman: I will write to my hon. Friend with the information requested.

Apprentice Training School (RNAD Milford Haven)

Mr. Nicholas Bennett: To ask the Secretary of State for Defence what discussions he has had or he intends to have with the Training Commission and other interested parties concerning the apprentice training school at RNAD Milford Haven.

Mr. Freeman: None. There are no plans to close the apprentice training school at present.

RNAD Milford Haven

Mr. Nicholas Bennett: To ask the Secretary of State for Defence how many industrial or commercial companies have made representations to him concerning their possible purchase or use of the site of royal naval arms depot Milford Haven.

Mr. Freeman: There has been one inquiry of which my hon. Friend will already be aware.

Mr. Nicholas Bennett: To ask the Secretary of State for Defence if he will give his estimate of the cost of *(a)* removing the explosive impregnation from the site of royal naval arms depot Milford and *(b)* of removing all existing buildings from the site in order that it might be available for industrial or commercial use.

Mr. Freeman: The estimated cost of *(a)* certifying RNAD Milford Haven free from explosives is estimated at between £500,000 and £1 million and *(b)* no estimate of the cost of removing all existing buildings has been made, nor is one considered necessary at this stage, as the future of the site has still to be decided.

Mr. Nicholas Bennett: To ask the Secretary of State for Defence what other defence uses for the Milford Haven royal naval arms depot have been considered.

Mr. Freeman: There is no naval requirement for RNAD Milford Haven. The Army and Royal Air Force have no present need of extra storage space and no other defence uses have been identified, as yet, which are considered to be feasible.

Mr. Nicholas Bennett: To ask the Secretary of State for Defence what non-defence uses by other Departments for the Milford Haven royal naval arms depot have been invited and considered.

Mr. Freeman: It would be inappropriate at this stage to invite other Government Departments to consider alternative uses for the RNAD Milford Haven site. If no futher use is found for it, our normal practice would be to offer the site for sale on the open market. I will ensure that there is full consultation with the Welsh Office and public authorities.

Borders Tactical Training Area

Mr. Foulkes: To ask the Secretary of State for Defence (1) what is the percentage increase in the size of the Borders tactical training area represented by the recent expansion of this area;

(2) on what date the military low-flying management group recommended the recent extension of the Borders tactical training area;

(3) what increase is planned in the number of military training flights authorised to fly at less than 250 ft above the ground in the Borders tactical training area;

(4) if he will make a statement on the extension of the Borders tactical training area;

(5) what population density threshold was used in determining the new boundaries of the Borders tactical training area;

(6) what types of low-level training at less than 250 ft altitude, other than work-up training for exercises in the United States of America and Canada, are conducted in the Borders tactical training area;

(7) how long it takes in terms of *(a)* years and *(b)* the cumulative number of low-flying sorties, for the training value obtained from extending low-flying into new, unfamiliar territory to decline to a level at which it ceases to be operationally valuable;

(8) what are the specified standards which a Royal Air Force pilot must achieve before being permitted to fly at less than 250 ft;

(9) what changes have taken place since 1979 in the amount of operational low-flying training at less than 250 ft which is calculated to be the minimum operationally necessary;

(10) if he will list the changes to the boundaries of the Borders tactical training area since 1979, specifying the geographical location and date of any changes;

(11) if he will list the planned periods of operational low-flying training to be conducted in the Borders tactical training area up to the end of 1988;

(12) what proportion of low flying at less than 250 ft in the Borders tactical training area is conducted between the hours of *(a)* 7 am and 7 pm *(b)* 7 pm and 11 pm and *(c)* 11 pm and 7 am; and what changes are planned in these proportions;

(13) if he will list the major accidents to Royal Air Force aircraft since 1979 which occurred during flights authorised to fly at less than 250 ft.

(14) if he will publish statistics indicating the rate of accidents to Royal Air Force aircraft flying at less than 250 ft;

(15) how many complaints have been received in each year since 1979 about low flying by aircraft authorised to fly at less than 250 ft.

Mr. Freeman: I will write to the hon. Member as soon as possible.

Low Flying

Dr. Thomas: To ask the Secretary of State for Defence what geographical area, expressed *(a)* by county and *(b)* by parliamentary constituency, is covered by low flying area 17.

Mr. Freeman: Low flying area 17 covers *(a)* parts of the counties of Cumbria, Durham, Lancashire and North Yorkshire and West Yorkshire and *(b)* the parliamentary constituencies of Barrow and Furness, Workington, Carlisle, Copeland, Westmorland and Lonsdale, and Morecambe and Lunesdale, and parts of the parliamentary constituencies of Penrith and The Border, Durham, North-West, Bishop Auckland, Sedgefield, Darlington, Richmond, Yorks, Skipton and Ripon, Keighley, Pendle, Ribble Valley, Lancaster and Wyre.

Dr. Thomas: To ask the Secretary of State for Defence what geographical area, expressed *(a)* by county and *(b)* by parliamentary constituency, is covered by low flying area 18.

Mr. Freeman: Low flying area 18 covers *(a)* the Isle of Wight and parts of the counties of Kent, East Sussex and West Sussex, Dorset, and Hampshire and *(b)* the parliamentary constituencies of Thanet, North, Thanet, South, Canterbury, Dover, Folkestone and Hythe, Ashford, Hastings and Rye, Bexhill and Battle, Eastbourne, Lewes, Brighton, Kemptown, Brighton, Pavilion, Hove, Shoreham, Worthing, Arundel, Isle of Wight, Bournemouth, West, Bournemouth, East, Christchurch, Southampton, Test, Southampton, Itchen, Eastleigh, Gosport, Portsmouth, South, Portsmouth, North and Havant and parts of the parliamentary constituencies of Faversham, Mid-Kent, Maidstone, Tunbridge Wells, Wealden, Mid-Sussex, Crawley, Horsham, Chichester, Hampshire, East, Fareham, Winchester, Romsey and Waterside, New Forest, Dorset, North and Poole.

Dr. Thomas: To ask the Secretary of State for Defence what geographical area, expressed *(a)* by county or region and *(b)* by parliamentary constituency, is covered by low flying area 15.

Mr. Freeman: There is currently no low flying area 15 in the United Kingdom low flying system.

Dr. Thomas: To ask the Secretary of State for Defence what geographical area, expressed *(a)* by county or region and *(b)* by parliamentary constituency is covered by low flying area 13.

Mr. Freeman: Low flying area 13 covers *(a)* parts of the counties of Borders, Cumbria, Dumfries and Galloway, Durham and Northumberland and *(b)* parts of the parliamentary consitituencies of Roxburgh and Berwickshire, Hexham, Durham, North-West, Penrith and The Border, and Dumfries.

Dr. Thomas: To ask the Secretary of State for Defence what geographical area, expressed *(a)* by county and *(b)* by parliamentary constituency, is covered by low flying area 9.

Mr. Freeman: Low flying area 9 covers *(a)* part of the counties of Shropshire and Staffordshire and *(b)* parts of the parliamentary constituencies of Shropshire, North, Wrexham, Stafford, The Wrekin, Ludlow, Shrewsbury and Atcham, and Montgomery.

Mr. Ingram: To ask the Secretary of State for Defence (1) if he will list the number and dates of accidents since 1979 involving aircraft training in the United Kingdom low-flying system;

(2) if he will make it his policy to ensure that no aircraft or aircrew of any foreign country will be allowed to train in the extended United Kingdom low-flying system area announced on 9 June.

Mr. Freeman: I will write to the hon. Member as soon as possible.

Dr. Thomas: To ask the Secretary of State for Defence what increase is planned in the number of night low-level training sorties over the United Kingdom as a result of the operational deployment of the Royal Air Force's thermal imaging and laser designator pod.

Mr. Freeman *[holding answer 5 May 1988]:* I assume that the hon. Member is referring to the requirement for an advanced airborne laser designating pod. No decision has yet been made regarding the purchase of such a system which, if procured, is unlikely to be in service before the end of the decade, when it would be only one of a number of electro-optical devices. As such, its introduction would be unlikely to have a significant effect on the night flying requirement.

Dr. Thomas: To ask the Secretary of State for Defence (1) what is the minimum permitted height for fixed-wing military aircraft operating in the Otterburn danger areas, D512 and D512A;

(2) what is the minimum permitted height for fixed-wing military aircraft operating in the Spadeadam danger areas, D510;

(3) what is the minimum permitted height for fixed-wing military aircraft operating in the Garelochhead danger areas, D601;

(4) what is the minimum permitted height for fixed-wing military aircraft operating over the landward portion of the danger area known as D119;

(5) what is the minimum permitted height for fixed-wing military aircraft operating over the landward portion of the South Uist danger area, D 701;

(6) what is the minimum permitted height for fixed-wing military aircraft operating over the landward portion of the Lydd danger area, D 044;

(7) what is the minimum permitted height for fixed-wing military aircraft operating over the landward portion of the Eastney danger area, D 035;

(8) what is the minimum permitted height for fixed-wing military aircraft operating over the landward portion of the Rosehearty danger area, D 708;

(9) what is the minimum permitted height for fixed-wing military aircraft operating over the landward portion of the Loch Ryan danger area, D 402;

(10) what is the minimum permitted height for fixed-wing military aircraft operating in the Porton danger area, D 127;

(11) what is the minimum permitted height for fixed-wing military aircraft operating in *(a)* the Warcop danger area, D 407, *(b)* the Catterick danger areas, D 408A, D 409A and D 409B, *(c)* the Stanford danger area, D 208, *(d)* the Ferrybridge danger area, D 203, *(e)* the Pontrilas danger area, D 147, *(f)* the Pembrey danger area, D 118, *(g)* the landward portion of the Cowden danger area, D 307, *(h)* the landward portion of the Donna Nook danger area, D 307, *(i)* the landward portion of the Wainfleet danger area, D 306, *(j)* the landward portion of the Holbeach danger area, D 207, and *(k)* the Dartmoor danger area, D 011;

(12) what is the minimum permitted height for fixed-wing military aircraft operating over the landward portion of the Luce bay danger area, D 403.

Mr. Freeman: The permitted height for fixed-wing military aircraft operating over ranges and danger areas varies according to the aircraft involved, the training being undertaken, the prevailing climatic conditions and whether activity is by day or by night. In general, aircraft may transit such areas at 250 ft minimum separation distance (msd) when a range or danger area has not been activated or, where it has been activated, with the prior approval of the danger area co-ordinating authority. Over certain ranges, service aircraft may descent to 100 ft msd during their final approach to target. Royal Air Force Harriers may descend to 85 ft msd. In exceptional circumstances and where specifically authorised, certain Royal Navy aircraft operating in danger areas and ranges may descent to 50 ft msd. Aircraft conducting trials under Procurement Executive auspices do so to meet trial aims; in each case the minimum permitted height is determined by safety considerations.

Body Searches

Mr. Dobson: To ask the Secretary of State for Defence what guidance has been issued to Ministry of Defence police concerning the compatibility of body searches of the type applied to Ms. Mann-Cairns at RAF Greenham common with the relevant provisions of the Police and Criminal Evidence Act 1984; and if he will make a statement.

Mr. Archie Hamilton: I refer the hon. Member to the reply which I gave to my hon. Friend the Member for Dover (Mr. Shaw) on 27 July 1988.

World War 2 (Records)

Mr. Wigley: To ask the Secretary of State for Defence if he will take immediate steps to declassify records relating to the prisoners held by the Japanese at Mukden during world war 2; and if he will make a statement.

Mr. Freeman: Documents relating to the prisoners held at Mukden during world war 2 are public records. Their status has been determined in accordance with the requirements of the Public Record Acts and there is no reason to change this.

Departmental Programmes

Mr. George: To ask the Secretary of State for Defence how much has been spent by his Department in each of the past five years on the evaluation of departmental programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mr. Sainsbury: The Department gives careful evaluation to its programmes at every stage of the procurement process. This evaluation is part of the normal responsibilities of project managers and other MOD staff. The costs of this activity are included in the Department's overall running costs, but cannot be identified in the way requested.

Correspondence

Mr. David Nicholson: To ask the Secretary of State for Defence when the hon. Member for Taunton can expect a reply to his letter of 22 March, enclosing letters from Taunton United Nations Association and West Somerset CND, about statements and developments on NATO nuclear rearmament.

Mr. Archie Hamilton: I am afraid that we have no record of having received the letter to which my hon.

Friend refers. However, if my hon. Friend would send a further copy of the correspondence to which he refers, we will, of course, provide a reply as soon as possible.

British Forces Overseas (Rates)

Mr. Salmond: To ask the Secretary of State for Defence if he will publish a table showing the total amount by receiving state of payments made by Her Majesty's Government to them in lieu of rates, or their equivalent, and direct payments for services provided for British service men; if such payments are made to central Government of the receiving states or the respective local authorities; and if he will make a statement.

Mr. Freeman *[holding answer 14 July 1988]:* Her Majesty's Government make the following payments for services provided for British service men to central Government or their respective local authorities:

		£
Belize	Water and drainage	8,190
Kenya	Water and drainage	2,817
Canada	Refuse collection	173
	Education Services	272,720
	Environmental Services	7,573
	Water and drainage	121,747
Norway	Water and drainage	148
	Refuse collection	19,650
Denmark	Water and drainage	195
	Refuse collection	4,000
Turkey	Water and drainage	700
	Refuse collection	938

TRANSPORT

Tractors

Mr. Nicholas Bennett: To ask the Secretary of State for Transport if he will give the percentage change in first quarter tractor registrations for each United Kingdom region.

Mr. Peter Bottomley: The information requested is as follows:

New registrations of tractors[1] 1st Quarter 1988 compared to 1st Quarter 1987.

	Percentage increase
North	56
Yorks and Humberside	16
East Midlands	8
East Anglia	−16
South East	8
South West	14
West Midlands	21
North West	52
Wales	80
Scotland	13
Northern Ireland[2]	36

[1] Agricultural machines, including agricultural tractors, fishermen's tractors, tractors, agricultural engines and locomotive ploughing engines.

[2] Agricultural machines, but also including digging machines, mobile cranes, works' trucks, mowing machines and showmen's and general haulage vehicles.

Cross-Channel Traffic

Mr. Austin Mitchell: To ask the Secretary of State for Transport whether, further to his reply of 20 May concerning the 1973 forecasts for cross-Channel traffic, he will add the actual figures for 1980 and the latest forecast for 1990 and the year in which the tunnel is due to be completed; and who is responsible for ensuring that the fares charged by the cross-Channel ferries for passengers and accompanied vehicles are not fixed collusively.

Mr. Portillo: The actual figures for 1980, comparable with those given earlier for 1986 and which correspond as closely as possible to the 1973 forecast categories, are as follows:

Shipping Services	*1980 Passengers (millions)*
Accompanied vehicle passengers	9·0
Other passengers	7·7
Air Services	22·5
Total Passengers	39·2
Roll-on/Roll-off and Container Traffic	[1]15·4

[1] million tonnes

Regarding current forecasts for future years, I refer the hon. Member to the answer of 18 May, at column *460*, to my hon. Friend the Member for Christchurch (Mr. Adley).

The tunnel is due to be completed in 1993. The Director General of Fair Trading is responsible for monitoring undertakings given by ferry companies. Any allegations of collusive pricing would be a matter for him to consider under the competition legislation.

M40 Extension

Mr. Baldry: To ask the Secretary of State for Transport if he will make a statement on the progress on continuation of the M40 extension.

Mr. Peter Bottomley: The two contracts on the Warwick section started last year and are well under way. Completion is expected in summer 1989. Three of the contracts on the Banbury section have now been let. Tenders for the remaining one, and also for the Gaydon section contract, are due to be returned on 5 August. We expect the whole of the Banbury section and the Gaydon section to be open to traffic by autumn 1990.

Revised proposals for the Waterstock to Wendlebury section, north-east of Oxford were considered at a public inquiry which ended earlier this year. The inspector's report is awaited.

EC Transport Ministers

Dr. Thomas: To ask the Secretary of State for Transport when he last met his counterparts from the other European Community states; and what matters were discussed.

Mr. Tony Lloyd: To ask the Secretary of State for Transport when he last attended the EEC Council of Transport Ministers; and what matters were discussed.

Mr. Portillo: My right hon. Friend the Secretary of State has not met his European counterparts since the EC Transport Council on 20 and 21 June. I have therefore nothing to add to the reply given by my hon. Friend the Member for Eltham (Mr. Bottomley) on Monday 4 July, at column *488*.

Community Bus Schemes (Cornwall)

Mr. Matthew Taylor: To ask the Secretary of State for Transport what representations he has received regarding community bus schemes in Cornwall; and if he will make a statement.

Mr. Portillo: None since May 1987. Community bus schemes are flourishing in Cornwall. Eight of them receive support from the rural transport development fund.

Air Traffic Control

Mr. Stern: To ask the Secretary of State for Transport if he has any plans to privatise air traffic control.

Mr. Peter Bottomley: It is for the airport operator to decide who provides airport navigation services at a particular airport. At some airports these services are already provided by private sector suppliers. There are no plans to privatise en route air traffic control services.

Channel Tunnel (Rail Links)

Mr. Darling: To ask the Secretary of State for Transport when he last met the chairman of British Rail to discuss rail links to the north of England and Scotland from the Channel tunnel.

Mr. Portillo: Neither my right hon. Friend the Secretary of State nor my predecessor as Minister of State have discussed this specific subject with the chairman recently, but they have discussed the pattern of Channel tunnel rail services in general terms with him from time to time. Under section 40 of the Channel Tunnel Act, British Rail is required to publish by the end of 1989 a plan setting out its proposals for services through the Channel tunnel. It is are currently consulting interested parties.

London Transport (Fares)

Mr. Simon Hughes: To ask the Secretary of State for Transport what representations he has received regarding fare levels on public transport in London.

Mr. Portillo: I receive representations on fare levels from time to time but the level and distribution of fares is a matter for the public transport operators.

Aviation Fatal Accidents

Mr. Redmond: To ask the Secretary of State for Transport when he expects the inquiry set up by the civil aviation authority into the increase in general aviation fatal accidents in 1987 to be completed; and whether any preliminary conclusions have been reached.

Mr. Peter Bottomley: The investigation has been completed. The authority hopes to publish the report within the next few weeks. In the meantime the hon. Member might like to refer to the *Official Report*, 31 March 1988 at columns *1289-93*.

Heavy Lorries (PAC Report)

Mr. Allason: To ask the Secretary of State for Transport when he expects to be in a position to announce what action he intends to take on the Public Accounts Committee's report on the regulation of heavy lorries.

Mr. Peter Bottomley: I refer my hon. Friend to Cm. 367—the Public Accounts Committee's eighteenth report on the regulation of heavy lorries.

M6 (Congestion)

Mr. Roy Hughes: To ask the Secretary of State for Transport if he will make a statement on the causes of the congestion and delays on the northbound carriageway of the M6 between junctions 6 and 23 on the afternoon of 8 July.

Mr. Peter Bottomley: Traffic flows were heavy on the M6 that day. The major maintenance work under way between junctions 6 and 7, and essential resurfacing and bridge works between junctions 16 and 17 and junctions 21 and 23, all of which involved contraflow working, will have exacerbated the congestion.

East Coast Ports

Mr. Bellingham: To ask the Secretary of State for Transport whether he will publish tables showing the number of vessels using English east coast ports over the past 18 months; and if he will make a statement.

Mr. Portillo: The numbers of ship arrivals in 1987, compiled from Lloyd's of London shipping data, are in the table. No figures are available yet for 1988.

	Number
North East	
Blyth	454
Tyne	1,441
Sunderland	528
Tees and Hartlepool	4,889
Other North East ports	854
Humber	
Hull	3,032
Goole	1,267
Ouse wharves	1,097
Trent wharves	2,349
Humber wharves	1,271
Immingham	3,975
Grimsby	721
Haven	
Felixstowe	5,355
Ipswich	1,981
Harwich	2,452
Other ports	374
Thames and Kent	
Colchester	1,084
London	[1]11,500
Medway	3,546
Ramsgate	2,250
Dover	22,112
Folkestone	2,076
Other ports	489
Wash and North East Anglia	
Boston	1,091
King's Lynn	1,045
Great Yarmouth	1,590
Other ports	1,141
All East Coast ports	79,964

[1] Provisional.

Central London Rail Study

Mr. Simon Hughes: To ask the Secretary of State for Transport what is *(a)* the earliest and *(b)* the latest date by which the central London rail study will be (i) completed and (ii) published.

Mr. Portillo: I hope to be able to announce the findings of the central London rail study before the end of the year.

Monorails

Mr. Amess: To ask the Secretary of State for Transport what information his Department has on the number of monorails in use in England and Wales; and if he will make a statement.

Mr. Portillo: My right hon. Friend the Secretary of State has no direct responsibility for monorail systems. As far as we are aware, the only systems currently in use are in amusement parks and similar locations.

Seat Belts

Mr. Amess: To ask the Secretary of State for Transport what is the current front seat belt wearing rate; and what were the figures for each month since January 1983.

Mr. Peter Bottomley: The latest survey for which results are available is October 1987. The table shows the seat belt wearing rates for front-seat drivers and passengers for each survey since January 1983:

Counting month	*Percentage wearing rates*	
	Drivers	*Passengers*
1983		
January	53	54
February	93	93
March	94	95
April	95	95
May	95	95
June	94	95
July	94	95
August	95	96
September	95	96
October	95	94
November	94	96
December	95	96
1984		
January	95	96
February	95	95
March	95	96
April	95	96
May	95	95
June	95	96
August	94	95
October	94	96
December	95	96
1985		
February	95	96
April	93	94
June	94	95
August	94	95
October	93	94
December	94	95
1986		
April	94	94
October	94	94
1987		
April	94	95
October	94	94

These rates are thought to be the highest in the world.

Mr. Amess: To ask the Secretary of State for Transport (1) what representations he has received supporting the introduction of the compulsory wearing of rear seat belts by adults; and if he will make a statement;

(2) what is his Department's policy on the wearing of rear seat belts by adults; and if he will make a statement;

(3) if he has any plans to review the operation of section 33A of the Road Traffic Act 1972; and if he will make a statement;

(4) what estimate his Department has of the effect on the rate of road accidents fatalities in the United Kingdom in 12 months if the wearing of rear seat belts were made compulsory; and if he will make a statement;

(5) what evidence is available to his Department on the level and trend of voluntary use of rear seat belts either in the United Kingdom or abroad; and if he will make a statement;

(6) how much he expects to spend during the years 1988 and 1989, respectively, in campaigns to encourage the voluntary wearing of rear seat belts;

(7) what research his Department is currently undertaking on the effects of the compulsory wearing of front seat belts; and if he will make a statement.

Mr. Peter Bottomley: Seat belts save lives. The transport and road research laboratory and independent experts agree that the wearing of front seat belts saves at least 200 lives and prevents 7,000 serious injuries each year.

We continue to monitor the usage and effects of front-seat belt wearing. The usage rate remains high at 95 per cent. This autumn we shall undertake a survey of seat belt use among rear-seat occupants.

We have not received any recent representations supporting the introduction of compulsory wearing of rear-seat belts by adults, although responses to our road safety consultation paper "The Next Steps" generally supported the view that this should remain a goal for the longer term. Our current aim is to increase the voluntary use of rear restraints and their voluntary fitting in cars which do not already have them. We estimate that the wearing of rear-seat belts by adults could reduce deaths and serious injuries among rear seat adult passengers by at least 50 per cent.

All new cars registered from April last year must be fitted with rear restraints. That should encourage their use. It will take some years before most cars are fitted with them. We therefore believe that it would be premature at this stage to consider making rear-seat belt wearing by adults compulsory.

We will continue to take every opportunity to advise people to use seat belts. Over the next year some 27 million leaflets will be distributed with all vehicle excise licence reminders.

A27 (Worthing)

Mr. Higgins: To ask the Secretary of State for Transport if he will place in the Library full details of the cost-benefit analysis carried out by the consultants he appointed to examine the future route of the A27 in the Worthing area.

Mr. Peter Bottomley: Full details of the results of the economic analysis carried out by the consultants on each of their four favoured routes, using the Department of

Transport's 1986 cost-benefit analysis (COBA) computer programme, are contained in the consultants' report. A copy is now being placed in the Library.

Mr. Higgins: To ask the Secretary of State for Transport what origin and destination surveys were carried out by the consultants he appointed to consider the future route of the A27 in the Worthing area.

Mr. Peter Bottomley: None. The consultants made use of traffic information surveys by West Sussex county council in 1978, 1982 and 1983, which included roadside interviews.

Settle-Carlisle Line

Mr. Cryer: To ask the Secretary of State for Transport what requests he has made to the transport users consultative committees for Yorkshire and the north-west regarding public hearings into any hardship caused by the closure of the Settle to Carlisle section of British Rail; and if he will make a statement.

Mr. Portillo: My right hon. Friend the Secretary of State has requested a supplementary report from the transport users consultative committees for north-eastern and north-western England under section 56(10) of the Transport Act 1962 to notify him of any changes in the use of the line which would lead them to modify their advice. It is for the committees to decide their own procedure for undertaking this task.

Mr. Cryer: To ask the Secretary of State for Transport what information he has as to what mileage of rail on the Settle to Carlisle section of British Rail is continuously welded flat-bottomed rail, as to its current value and as to what would be the replacement cost of either flat-bottomed or bull-head track of equivalent weight; and if he will make a statement.

Mr. Portillo: This information is not available.

Pavement Parking

Dr. Cunningham: To ask the Secretary of State for Transport if he will publish the responses to the discussion paper on pavement parking; what action he now proposes to take in respect of pavement parking; and if he will make a statement.

Mr. Peter Bottomley: Over 450 responses were received it would not be practicable to publish them. We shall announce the outcome of the review as soon as possible.

Refrigerated Vehicles

Mr. Irvine: To ask the Secretary of State for Transport if he will make a statement on the expected effects of the recent European Community directive permitting an increase in the width of refrigerated vehicles to 2·6 m.

Mr. Peter Bottomley: Thick-walled refrigerated vehicles operating between EC member states may be 2·6 m wide as from 1 January 1989. We are therefore circulating proposals to increase the permitted width of refrigerated vehicles in Britain. This will assist British operators who already use refrigerated vehicles complying with the maximum limit of 2·58 m currently allowed by the construction and use regulations. It will further help operators by allowing future vehicles to be built at 2·6 m wide.

Direction Signs

Mr. Key: To ask the Secretary of State for Transport what is the outcome of his consultation on the report of the review of direction signs.

Mr. Peter Bottomley: The results of that consultation have been considered in the context of the wider revision of the Traffic Signs Regulations and General Directions 1981. These regulations cover not only directional signs, but a wide range of signs which play an essential part in promoting safety on our roads. All signing needs reviewing from time to time in the light of new traffic needs, road safety research and new technology.

We intend to make a thorough overhaul of the current regulations with several purposes in mind. First, we need to implement the new arrangements for white on brown tourist signs, and certain other changes either proposed in the direction signs review or associated with our demonstration project at Guildford. Second, we need to make changes for road and rail safety reasons (in particular, in connection with signing on motorways, at low bridges and at level crossings). In addition, changes in signing are needed to cater for bus deregulation, to regularise changes already authorised by special procedure, to simplify certain signs (particularly for parking restrictions), to introduce greater flexibility in varying signs, and more generally to consolidate various amending regulations made since 1981.

I am in touch with my right hon. Friends the Secretaries of State for Scotland and Wales about the early issue of general consultation letters on the substance of all these changes. We shall be consulting local authority associations particularly on the financial implications of the proposals. When the comments received in response to this consultation have been considered, the intention is to circulate for more detailed comment a draft statutory instrument giving effect to the changes which it has been decided to make. Our target is to introduce the revised regulations by autumn 1989.

A3 (Grayshott)

Mr. Mates: To ask the Secretary of State for Transport when he will publish details of the junction arrangements for access to Grayshott off the A3 at Hindhead following his recent announcement of the preferred route.

Mr. Peter Bottomley: Full details will not be available until the detailed design has been completed. I will send my hon. Friend a plan giving an indication of what is currently envisaged.

Institute of Motorcycling

Mr. Tony Lloyd: To ask the Secretary of State for Transport what action he proposes to take in the light of the information pack provided by the Institute of Motorcycling for callers to its freephone number, an example of which has been sent to him; and if he will make a statement.

Mr. Peter Bottomley: Yes, I congratulate the Institute of Motorcycling on the emphasis in its material on road safety and the encouragement given to new and young riders to take proper training. I recommend anyone thinking of taking up motor cycling to ring the IMC's Bikeline on 0800 400 483.

Dim-dip Devices

Mr. Tony Lloyd: To ask the Secretary of State for Transport if he will make a further statement on the result of the recent European Court judgment with particular reference to the question of whether dim-dip devices should still be fitted to motor vehicles; and if he will make a statement.

Mr. Peter Bottomley: I refer the hon. Member to my reply of Tuesday 12 July, at columns *140-41*.

The requirement for all new cars to have dim-dip devices will be waived only where a vehicle fully meets the requirements of the EC vehicle lighting installation directive (76/756/EEC) and has a headlamp-levelling device.

The object of both types of device is to cut road accidents by enabling the headlights to be used to make the vehicle fully visible without dangerous dazzle. This is particularly important in towns where the interaction between street lights and vehicle lights can create hazards, especially on wet roads.

The advantage of the dim-dip system is that it is cheaper, always automatic rather than at the driver's discretion, and not dependent on the very precise initial setting for full effectiveness. I believe it will be in the interests of road safety, as well as to the advantage of manufacturers, car owners and other road users for all new cars to continue to be fitted with dim-dip devices.

Unlike other countries we have not made it directly illegal to drive on side lights. It is better to have self-working dim-dip.

We shall shortly be consulting in the usual way on the draft Road Vehicles Lighting Regulations to give effect to this judgment.

Driving Instructors

Mr. David Marshall: To ask the Secretary of State for Transport what has been the effect of the current programme of check-testing of driving instructors on the register of approved driving instructors.

Mr. Peter Bottomley: The object of the approval system is to ensure that driving instructors have the right skills to help their pupils learn to drive safely and with consideration. The rolling programme of check tests at the higher standard introduced in 1985 has revealed a significant number who fall below this standard. Instructors who cannot raise their performance are removed from the register. The programme of check tests over the next two years aims to cover all existing instructors.

Motor Cycles

Mr. Tony Lloyd: To ask the Secretary of State for Transport which motor cycle manufacturing companies have approached him individually to discuss road and machine safety.

Mr. Peter Bottomley: Norton, Triumph and BMW.

Drinking and Driving

Mr. David Marshall: To ask the Secretary of State for Transport when he will publish the results of the roadside surveys of drinking and driving conducted earlier in the current year.

Mr. Peter Bottomley: As soon as possible.

Suzuki Four-wheel Drive Vehicles

Mr. Nicholas Winterton: To ask the Secretary of State for Transport (1) what information he has on the safety record of four-wheel drive vehicles manufactured by Suzuki;

(2) what investigations have recently been conducted by his Department into the safety record of four-wheel drive vehicles manufactured by Suzuki;

(3) if he has any plans to seek to prevent further sales of four-wheel drive vehicles manufactured by Suzuki;

(4) if he has any plans to seek to obtain the recall of four-wheel drive vehicles manufactured by Suzuki.

Mr. Peter Bottomley *[holding answer 26 July 1988]:* The Department is investigating allegations by the Consumers' Association that these vehicles are unstable under certain conditions. The question is being discussed with both Suzuki and the Consumers' Association. The Department is studying the test results available and seeking to establish whether there is any unacceptable road safety risk.

Horses and Riders

Mr. Onslow: To ask the Secretary of State for Transport what recent steps he has taken to remind other road users of the need to give due consideration to horses and riders on the public highway; and if he will make a statement.

Mr. Peter Bottomley: Advice to road users on the consideration needed when encountering horses on the roads is given in the Highway Code and the Department's "Driving" manual. Our TV filler, "Passing Horses," is shown once a week on average. Valuable current guidance is also issued by the British Horse Society and the AA, and we endorse this.

The basic message is "slow down, allow plenty of room, and don't sound your horn or rev your engine."

Second Severn Crossing

Mr. Flynn: To ask the Secretary of State for Transport if he will make a statement on his proposals for the second Severn crossing in the light of new estimates of *(a)* the capacity of the present bridge and *(b)* future traffic flows.

Mr. Peter Bottomley: I refer the hon. Member to the statement which my right hon. Friend the Secretary of State made to the House today.

Social Science Research

Mr. George: To ask the Secretary of State for Transport how much has been spent by his Department in each of the past five years on social science research; what percentage this constitutes of total departmental expenditure and of the Department's research budget; and how much of the research has been undertaken *(a)* within his Department, *(b)* by universities and polytechnics and *(c)* by independent research organisations.

Mr. Peter Bottomley: The available information relates to gross expenditure on research and development including that performed elsewhere in central Government for research and development in total and for social science and humanities. On this basis the figures are in £ million pounded.

	1982-83 £ million	1983-84 £ million	1984-85 £ million	1985-86 £million	1986-87 £ million
Social science and humanities	1·0	1·0	1·2	2·4	2·2
Percentage of total Department of Transport expenditure (research and development plus social science and humanities)	3·8 per cent.	3·4 per cent.	3·5 per cent.	8·8 per cent.	8·3 per cent.
Social science and humanities within the Department of Transport	0·4	0·4	0·5	1·5	1·6
Social science and humanities within higher education institutions	0·2	0·2	0·2	0·2	0·2
Social science and humanities within industrial research associations and non-industrial research institutions	0·0	0·1	0·0	0·0	0·1

Zeros indicate less than £0·05 million.

Road Accident Statistics

Mr. Amess: To ask the Secretary of State for Transport what was the number of *(a)* drivers and *(b)* front seat passengers (i) killed and (ii) injured in motor vehicle accidents in each month since 1980.

Mr. Peter Bottomley: The information requested is given in the tables. The data refer to car occupants as seating position is only identified for these vehicles.

[1] Excluding restraint usage unknown

Mr. Amess: To ask the Secretary of State for Transport what is the proportion of rear seat passengers, who are killed on being thrown clear of their vehicles in an accident.

Mr. Peter Bottomley : Provisional figures for 1987 show that of 164,396 casualties in cars and light vans, 26,810, or 16 per cent. were rear seat occupants. Of these, 2,486 were wearing a safety restraint.

Information is not collected on a national basis on occupants thrown from the vehicle in which they were travelling. In-depth crash injury studies have been taking place in selected areas since January 1984 in which a sample of accidents involving cars less than six years old is selected for investigation. Of a total of 6,201 cars in 2,342 accidents of all severities, there were 790 rear seat occupants, of which 593 were casualties. Of these, 37 (5 per cent.) died of their injuries, three of them being partially ejected and a further nine completely ejected.

Cars (Child Safety Restraints)

Mrs. Mahon: To ask the Secretary of State for Transport if the Government are considering any cash incentives for the purchase of car safety seats, with a view to encouraging their take-up; and if he will make a statement.

Mr. Peter Bottomley: No. People who can afford a car can afford either to buy the child restraints necessary to carry their children safely, or to take advantage of one of the many loan schemes now operating.

More important is the question of information and publicity. The Child Accident Prevention Trust recently published an excellent report, "The Safety of Children in Cars". We are discussing with the CAPT how to take forward its recommendations on increasing the use of child restraints by voluntary means.

Tolls

Mr. Flynn: To ask the Secretary of State for Transport if he has any plans to announce the abolition of tolls on *(a)* the Severn bridge and *(b)* other estuarial crossings.

Mr. Peter Bottomley: No.

Motorways

Mr. Amess: To ask the Secretary of State for Transport how many miles of new motorway were completed in each of the last five years; and at what cost.

Mr. Peter Bottomley: The information is as follows:

	Length of new motorway completed (miles)	*Cost (£ million)*
1983-84	49·4	357·1
1984-85	14·1	92·3
1985-86	54·3	328·1
1986-87	29·5	219·0

No new motorway was completed in 1987-88; 43·6 miles are currently under construction at a cost of £237·9 million.

Motorway (Accidents)

Mr. Amess: To ask the Secretary of State for Transport how many *(a)* fatal and *(b)* non-fatal accidents occurred on each motorway for each of the last five years; and if he will express the figures as a percentage of the total number of road accidents for those years.

Mr. Peter Bottomley: The information required is given in the following tables. The data for 1987 are provisional. They are not expected to change.

Motor Cyclists (Leg Protection)

Mr. Atkinson: To ask the Secretary of State for Transport if he will take into account the comments on the draft specification for leg protection by Dynamic Research Inc. of California, a copy of which has been sent to him, in his current research into leg protectors for motor cyclists.

Mr. Peter Bottomley: All useful contributions to developing effective leg protectors will be taken into account.

I hope soon to be able to read a commentary on the Dynamic Research Inc. comments.

Motorways (Repairs)

Mr. Amess: To ask the Secretary of State for Transport how many miles of new motorway are proposed up to December 1989; what are the estimated costs involved; how many miles of motorway are expected to be repaired by December 1989; what is the cost involved; and if he will list the number of miles and cost per motorway.

Mr. Peter Bottomley: Sixteen miles of new motorway are under construction and expected to be open by December 1989, at a total cost of £96 million. They are:

Scheme	Length miles	Cost £ million
M40 Oxford-Birmingham (Warwick section)	11·0	52·0
M63/M66 Portwood-Denton	5·0	44·4

The following new motorway is under construction:

Scheme	Length miles	Cost £ million
M40 Oxford-Birmingham (Banbury bypass)	27·6	141·9

Seven motorway widening schemes are also expected to be completed by the end of December 1989, widening 24·6 miles at a cost of £103·6 million.

Our plans have been to renew 80 miles of motorway in each of the years 1988-89 and 1989-90, at a cost of £102 million in 1988-89. We are considering the effect of the rephasing of capital maintenance works announced in my answer to my hon. Friend the Member for Hornchurch (Mr. Squire) on 20 June.

The figures for individual motorways in the original programme of major renewal schemes for 1988-89 are set out in the table; minor schemes are not included. The programme for 1989-90 has not yet been drawn up.

Motorway	Length (miles)	Cost (£ million)

EDUCATION AND SCIENCE

Student Grant

Mr. Matthew Taylor: To ask the Secretary of State for Education and Science if he will publish in the *Official Report* the allowances for parental contributions to student grants since 1985-86; and if he will show parental contributions as a percentage of the full student grant in each year.

Mr. Jackson: Parental contributions to mandatory student awards are assessed on the basis of the parents' residual income in accordance with specified scales. The levels of residual income below which no parental contribution would be assessed are as follows:

Academic year	*Residual income* £
1985-86	8,100
1986-87	8,700
1987-88	9,300
1988-89	9,900

The average assessed parental contribution expressed as a percentage of the average mandatory award in 1985-86 and 1986-87 (the latest year for which this information is available) is:

	Per cent.
1985-86	38·8
1986-87	38·4

Expenditure

Mr. David Nicholson: To ask the Secretary of State for Education and Science what were the figures for average expenditure per pupil in *(a)* primary and *(b)* secondary schools in each shire county education authority and the average for all shire counties in 1984-85 and the latest year for which information is available.

Mr. Jackson: The information requested is given in the following table.

Average Net Institutional Expenditure (1) Per Pupil (£ cash)

Local Education Authority	*1984-85*		*1986-87*	
	Primary	*Secondary*	*Primary*	*Secondary*
	£	£	£	£
Isles of Scilly	1,125	1,670	1,330	2,205

Somerset	655	950	780	1,195
Staffordshire	770	1,025	880	1,255
Suffolk	725	975	830	1,165
Surrey	675	1,030	820	1,260
Warwickshire	710	1,010	845	1,220
West Sussex	660	965	785	1,220
Wiltshire	695	975	850	1,230
Average for all English shire counties	710	1,020	840	1,255

Note:

Net institutional recurrent expenditure covers the cost of salaries and wages, premises and certain supplies and services. It does not include the cost of school meals, central administration and inspection, debt charges or revenue contributions to capital outlay.

Pupil-Teacher Ratios

Mr. David Nicholson: To ask the Secretary of State for Education and Science what were the average pupil-teacher ratios in *(a)* primary and *(b)* secondary schools for each shire county education authority and the average for all shire counties in 1984-85 and the latest year for which information is available.

Mrs. Rumbold: The average pupil-teacher ratios in *(a)* primary and *(b)* secondary schools for each shire county local education authority and the average for all shire counties in 1984-85 and 1986-87 (the latest year for which information is available) are as follows:

Pupil-teacher ratio

	Primary schools		*Secondary schools*

Voluntary Organisations

Mr. Tony Banks: To ask the Secretary of State for Education and Science when the London Voluntary Service Council can expect a reply to its letters to the Minister of State of 18 and 26 May about the future funding for voluntary organisations working in the field of education in inner London.

Mrs. Rumbold: A reply has been sent today.

Endometriosis

Mr. Battle: To ask the Secretary of State for Education and Science if the Medical Research Council has carried out any research into the disease endometriosis; and if he will make a statement.

Mr. Jackson: The MRC reproductive biology unit is currently carrying out studies on the treatment and causes of endometriosis. Two MRC project grants:

Steroid hormone control of phospholipid turnover in the regulation of menstrual bleeding; and

Psychiatric disorders and measured menstrual loss in women having hysterectomies for excessive menstruation

both of which have just ended, are relevant to this subject.

The MRC also supports research in the areas of obstetrics and gynaecology, fertility and human reproduction which may have indirect relevance to the understanding of this disease. The council is always willing to consider soundly based research grant applications in competition with other applicants.

Teachers

Ms. Armstrong: To ask the Secretary of State for Education and Science what percentage of English teachers in secondary schools have *(a)* higher degrees, *(b)* first degrees, *(c)* A-level pass, *(d)* O-level pass and *(e)* other academic qualifications in this subject.

Mrs. Rumbold: In January 1984, the latest date for which full figures of post-A-level qualifications are available, there were an estimated 45,700 full and part-time teachers who taught English in maintained secondary schools in England. The percentages of these teachers qualified in English beyond A-level are as follows. No information is available on the A and O-level qualifications of secondary school teachers.

	Percentage of teachers
Main subject of higher degree	2
Main subject of degree (including BEd)	36
Main subject of other post A level qualification	17
Subsidiary subject of degree (including BEd)	3
Subsidiary subject of other post A level qualification	13
No qualification in the subject beyond A level	29

Ms. Armstrong: To ask the Secretary of State for Education and Science what is his latest estimate of the numbers of teachers required to teach *(a)* science, *(b)* mathematics and *(c)* modern languages by 1992.

Mrs. Rumbold: Estimates of the numbers of teachers required to teach subjects within the national curriculum will depend on the timetable for the introduction of its various requirements, on my right hon. Friend's proposals in respect of each subject and on the outcome of the National Curriculum Council's subsequent consultations.

Ms. Armstrong: To ask the Secretary of State for Education and Science (1) what were the numbers of entrants into teacher training for *(a)* science, *(b)* mathematics and *(c)* modern languages in each of the last available five years;

(2) how many graduates of *(a)* universities and *(b)* polytechnics entered the teaching profession for each of the last available five years.

Mrs. Rumbold: I shall write to the hon. Member as soon as possible.

Ms. Armstrong: To ask the Secretary of State for Education and Science what were the numbers of teachers qualifying from training in *(a)* science, *(b)* mathematics and *(c)* modern languages for each of the last available five years.

Mrs. Rumbold: Numbers entering secondary courses of initial teacher training in English universities, polytechnics and colleges in, respectively, science, mathematics and modern languages, in each of the last five years were:

	Science	Mathematics	Modern languages
1983	1,400	1,041	724
1984	1,300	917	716
1985	1,215	791	697
1986	1,310	848	631
1987	1,573	1,140	681

Notes:

1. Figures based on returns of intakes to secondary initial teacher training courses made each autumn by universities, polytechnics and colleges to the DES.
2. Figures on entrants to primary courses of initial teacher training are not disaggregated by subject specialism.

Ms. Armstrong: To ask the Secretary of State for Education and Science how many teachers left the profession before the official retirement age for each of the last available five years.

Mrs. Rumbold: The numbers of full-time maintained nursery, primary and secondary teachers leaving the maintained, assisted and grant-aided sector before the age of 60 in each of the last five available years are as follows:

Financial year	*Teachers*
1980-81	28,600
1981-82	26,345
1982-83	25,627
1983-84	25,382
1984-85	27,171
[1]1985-86	27,224

[1]Provisional.

Ms. Armstrong: To ask the Secretary of State for Education and Science how many places there were for graduates in English on postgraduate teaching courses for each of the last available five years.

Mrs. Rumbold: Aggregate numbers of target places in English universities, polytechnics and colleges for secondary PGCE courses in English in each of the last five years were:

Year	*Places*
1983	775
1984	716
1985	729
1986	763
1987	758

In addition, over this period it was open to graduates in English, as in other subjects, to proceed to PGCE courses for intending primary teachers.

City Technology Colleges

Ms. Armstrong: To ask the Secretary of State for Education and Science (1) if he will list the consultants advising the Government on city technology colleges; and what is his estimate of the cost of this exercise;

(2) if he will list the consultants advising those city technology colleges already announced, giving an estimate of the cost.

Mrs. Rumbold: As from January 1987 the Government have been advised by a group of four, and latterly five individual experts, plus the Organisation for Rehabilitation through Training, on the curriculum and related issues of city technology colleges. The estimated cost to the Department to date is £40,000.

Kinghurst, Nottingham and Teesside CTC trusts are each employing the services of a number of advisers to help them establish their CTCs. Details are available from the CTC trust concerned in each case. The Department is contributing an estimated £225,000 towards the cost of these services over a period of three years.

Post-16 Education

Ms. Armstrong: To ask the Secretary of State for Education and Science what plans he has to ensure that post-16 educational opportunities in England and Wales are comparable with those available in the other European Economic Community countries by 1992.

Mrs. Rumbold: The Government's priority is to ensure that wide-ranging opportunities for post-16 education and training are available in this country, and to encourage more young people to take advantage of them. To that end we have developed important new programmes such as the two-year YTS and the certificate of pre-vocational education. Our examination reforms and the Education Reform Bill will help to give more 16-year-olds the motivation and the qualifications they need to stay on. We are working to produce a more rational system of vocational qualifications. We are emphasising to young people and to employers the importance of continuing education and training, not least in order to produce the skilled and productive work force which we will need if we are to continue to compete effectively in Europe after 1992.

Student Unions

Mr. Wilkinson: To ask the Secretary of State for Education and Science if he will seek to place upon heads of polytechnics and colleges of further education and upon university vice-chancellors a legal duty to ensure that college students unions do not misappropriate their funds or apply them to causes other than the material welfare of students.

Mr. Jackson: I refer to the reply given to my hon. Friend the Member for Thurrock (Mr. Janman) on 18 April, at column 292, in which my right hon. Friend indicated the Government's intention to collect up-to-date information on a number of issues relating to student unions and thereafter to reach conclusions and consult all concerned on the best action to take. A questionnaire will be issued to a sample of institutions shortly.

In the meantime, all student unions covered by the law of charity are already under a duty to apply their funds only on activities designed to promote the interests of students as students.

Co-ordinating Committee for Marine Science and Technology

Mr. Ken Hargreaves: To ask the Secretary of State for Education and Science whether he has now completed the appointments to the Co-ordinating Committee for Marine Science and Technology.

Mr. Jackson: Yes. The full committee membership is now:

Members	
Sir John Mason, CB, DSc, FRS	Chairman
Non-Governmental Members	
Mr. George C. Band	Director General, UK Offshore Operators Association Ltd.
Admiral Sir Lindsay Bryson, FRSE, FEng	Chairman, Marine Technology Directorate Ltd.
Dr. Douglas Georgala, CBE	Industrial Consultant, Laboratory of the Government Chemist.

Members	
Sir Anthony Laughton, FRS	Former Director, Institute of Oceanographic Sciences, Deacon Lab.
Mr. Don Lennard	Managing Director, Ocean Thermal Energy Conversion Systems Ltd.
Prof. Ernest Naylor, DSc, FIBiol	Lloyd Roberts Professor of Zoology, University College of North Wales, Bangor.
Prof. Tom Patten, CBE, FEng, FIMechE, FRSE	Chairman, Seaboard Lloyd Ltd.
Sir David Smith, FRS	Vice Chancellor of Edinburgh University.
Departmental Members	
Prof. Michael Burdekin, FEng, FICE, FIMechE	Professor of Civil and Structural Engineering at the University of Manchester Institute of Science and Technology. Science and Engineering Research Council representative.
Mr. Peter Carter	Director of R&D Branch, Offshore Supplies Office, Department of Energy.
Dr. Anthony Hawkins	Director Aberdeen Marine Laboratory, Department of Agriculture and Fisheries for Scotland.
Mr. Harold Hill	Director of Fisheries Research, Ministry of Agriculture Fisheries and Food.
Mr. Peter O'Neill	Head of Science and Research Policy and Programming Division, Department of Transport.
Mr. Charles Robson	Head of Chief Scientist Group, Department of Environment.
Dr. Mike Sutton	Engineering Markets Division, Department of Trade and Industry.
Dr. David Tyte	Deputy Director, (Underwater) Admiralty Research Establishment, Portland, Ministry of Defence.
Dr. John Woods	Director of Marine Sciences, Natural Environment Research Council.
Assessors	
Miss Rowena Harris	Science and Technology Secretariat, Cabinet Office
Mr. Henry Hogger	Assistant Head of Maritime, Aviation and Environment Department, Foreign & Commonwealth Office
Mr. Robin Ritzema	Head of Division Science Branch, Department of Education and Science
Secretary	
Dr. Nicholas Flemming	

Recruitment and Promotion

Ms. Richardson: To ask the Secretary of State for Education and Science what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career break due to child care.

Mrs. Rumbold: For the grades of administration officer and below, where the Department recruits direct, we are trying to widen our recruitment field, particularly to married women returning to work and mature people, by using centrally devised tests as an alternative to formal qualifications. Staff are encouraged to return to the Department following a career break for child care or other circumstances and they retain the grade and seniority that they had achieved at the date of leaving. Promotion at all levels is based on ability.

OVERSEAS DEVELOPMENT

Development Projects

Mr. Canavan: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will give a breakdown, by project, of the resources reallocated to development projects resulting from the savings arising from the United Kingdom's withdrawal from UNESCO.

Mr. Chris Patten: In the financial year 1986-87, the latest for which figures are available, the £6·4 million saved by our withdrawal from UNESCO was reallocated in full to aid projects, as shown in the following table.

Re-Allocation of 1986/87 UNESCO Savings
Final Expenditure 1986/87

	£ *Committed*	£ *Spent*
1. ODA Technical Co-operation Training Programme		
Country—

15. Dissemination of results of research	200,000	170,000
Grand Total items 1-15=	£6,411,380	[1]£4,700,932 (73·32%)

[1] Full use of the total amount was not possible because of the late start on the allocations following announcement of the programme in mid-April.

Departmental Programmes

Mr. George: To ask the Secretary of State for Foreign and Commonwealth Affairs how much has been spent by his Department in each of the past five years on the evaluation of departmental programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mr. Chris Patten *[holding answer 28 July 1988]:* Information in respect of the Overseas Development Administration is as follows:

	Expenditure on evaluation[1] *£ thousand*	*Expenditure on evaluation as percentage of allocation*	*Expenditure on evaluation as percentage of total net aid programme*
1983-84	293	78	0·02
1984-85	369	68	0·02
1985-86	375	81	0·02
1986-87	375	86	0·02
1987-88	425	95	0·03

[1] Virtually all expenditure on evaluation has been in respect of evaluation of Departmental programmes.

ATTORNEY-GENERAL

Heavy Vehicles (Fines)

Mr. Onslow: To ask the Attorney-General what action the Lord Chancellor is taking, in his capacity as chairman of the Magistrates Association, to draw magistrates' attention to the conclusions of the report of the National Audit Office concerning the financial advantage of regularly overloading a 38-tonne vehicle relative to the national average fine imposed for such an offence.

The Attorney-General: The Lord Chancellor, in his capacity as president of the Magistrates Association, will take the opportunity of expressing his personal views on this matter on a suitable occasion when addressing members of the association. When addressing west midlands magistrates in July 1986, Lord Chancellor Hailsham said, referring in particular to offences of overloading commercial vehicles:

"Where the motive is profit and the rewards are high, a swingeing fine may be the right penalty or the offender will simply recou himself in a very short time by further offences."

This was reported in the November 1986 issue of *The Magistrate*.

PRIME MINISTER

Ministers (Correspondence)

Mr. Maxwell-Hyslop: To ask the Prime Minister whether she will remind Ministers that when the regular staff of their private offices are on holiday, they must not omit to instruct the replacement staff of the necessity to enclose a second copy with all Ministers' letters sent to right hon. and hon. Members.

The Prime Minister: My right hon. Friend the Parliamentary Secretary to the Treasury has written to Ministers accordingly.

Iranian Airbus (Incident)

Mr. Austin Mitchell: To ask the Prime Minister, further to her replies dated 11 July on the shooting down of the Iranian Airbus, *Official Report*, column *4*, whether Royal Navy ships in the vicinity had indirect information on the Iranian Airbus's flight path; and whether the equipment of the Royal Navy is such as to preclude a similar error.

The Prime Minister: HMS Beaver heard warnings to an unidentified aircraft on the international civil distress frequency at the time of the incident. The equipment and operating procedures of Royal Navy ships are designed to minimise the risk of misidentifications.

Single European Act

Mr. Austin Mitchell: To ask the Prime Minister why she agreed to the Single European Act; and what are its implications for national sovereignty.

The Prime Minister: The provisions of the Single European Act were fully debated by the House during the various stages of the European Communities (Amendment) Bill, which completed its passage through the House on 10 July 1986.

Scientific Officers and Scientists

Mrs. Wise: To ask the Prime Minister (1) what is the typical salary of a Civil Service scientific officer after three years' service, and of a National Health Service scientist after the same service; and if she will make a statement on the implications of the disparity;

(2) what is the starting salary of *(a)* a Civil Service scientific officer and *(b)* a National Health Service graduate scientist; and if she will make a statement on the implications of the disparity between them.

The Prime Minister: The information requested is a follows:

	Starting salary £	*After 3 years* £
Civil Service scientific officer	8,284-9,687	9,687-10,622
NHS scientist	8,255-10,369	9,452-11,073

Notes:
NHS figures are those in the current offer which, if accepted, would become effective from 1 April 1988; Civil Service figures are subject to review from 1 August 1988.
Starting salaries depend on individual qualifications and relevant experience.

Economic and Monetary Union

Mr. Spearing: To ask the Prime Minister when she first agreed to the principle of economic and monetary union within the European Economic Community or any development of that principle at a meeting of the Heads of Governments of member states or at any meeting of the European Council established by the Single European Act.

The Prime Minister: The first of the many meetings at which Community Heads of Government, with United Kingdom participation, reaffirmed the objective of economic and monetary union took place on 19-20 October 1972.

Departmental Responsibilities

Mr. Tom Clarke: To ask the Prime Minister which Department will be responsible for *(a)* social services, *(b)* disability and *(c)* children; and if she will make it her policy that the titles of the new Departments of state reflect these as responsibilities.

The Prime Minister: Responsibility for the personal social services at central Government level falls to the Secretary of State for Health. Health care and personal social services for children, and those for people with a disability are matters for him. Benefits for all client groups are the responsibility of the Secretary of State for Social Security. The Minister for Social Security and the Disabled exercises the Department's responsibility for the co-ordination of Government policies concerning disabled people. The two Departments will be known as the Department of Social Security and the Department of Health.

10 Downing Street

Mr. Tony Banks: To ask the Prime Minister what work on the interior and exterior of No. 10 Downing street is envisaged during the next 12 months; what is the estimated cost; and how much in total has been spent on *(a)* fixtures and fittings, *(b)* interior and exterior decoration and *(c)* the grounds of No. 10 Downing street since 1979.

The Prime Minister: Work on the interior and exterior of 10 Downing street envisaged during 1988-89 consists of refurbishment, restorations, electrical and security improvements and general maintenance at an estimated cost of £975,000. Information on how much in total has been spent on fixtures and fittings, interior and exterior decoration and the grounds of 10 Downing street since 1979 is not available.

Ministers (Advisers)

Dr. Cunningham: To ask the Prime Minister if she will list in the *Official Report* the grades of, and or salaries paid to political and special advisers to *(a)* herself, *(b)* Secretaries of State and *(c)* Ministers, showing each Department separately.

The Prime Minister *[holding answer 27 July 1988]:* The number of special advisers in each Department is as follows:

	Number
Cabinet Office (including No. 10)	9
Foreign and Commonwealth Office	2
Her Majesty's Treasury	3
Department of Health Department of Social Security	12
Department of Education and Science	1

	Number
Department of Employment	1
Department of Trade and Industry	2
Home Office	2
Ministry of Agriculture, Fisheries and Food	1
Department of Energy	1
Department of Transport	1
Scottish Office	1
Department of the Environment	2
Ministry of Defence	1
Lord President of the Council	1

[1] The allocation of special advisers is still under consideration.

None of these posts is graded.

Two special advisers are unpaid and four are on secondment from the private sector. Apart from the three most senior advisers, the remainder are paid on a common pay spine, as follows:

Point No.	Salary	No. of advisers
1	13,715	1
2	14,587	[1]1
3	15,047	
4	15,591	
5	16,479	[1]1+1
6	17,090	
7	17,686	
8	18,287	
9	18,966	
10	19,859	
11	20,497	
12	21,270	
13	22,117	
14	22,927	1
15	23,736	3
16	24,755	1
17	26,359	1
18	27,702	1
19	29,050	1
20	30,398	[1]1
21	31,741	3
22	33,021	1
23	34,301	
24	35,952	2
25	37,159	
26	38,366	
27	39,312	[1]1
28	40,258	1

[1] These four advisers are paid on a pensionable basis, as members of the principal Civil Service pension scheme and their pay is reduced accordingly. The pay of all other special advisers is non-pensionable.

Children and Young People

Miss Lestor: To ask the Prime Minister if she will list the responsibilities of each Government Department, broken down by departmental divisions, for matters relating to children and young people aged under 18 years.

The Prime Minister *[holding answer 27 July 1988]:* Government responsibility for services relating to children and young people covers a wide range of activities and involves a number of departments. The main responsibilities within England are as follows:

Department of Education and Science
—Promotion of education, including the organisation of primary and secondary education, school curriculum and assessment policy, and public examinations.

Department of Employment
—Responsibility for training, employment and vocational education schemes for young people, such as YTS, TVEI and other educational programmes.
—Central responsibility for the career service.

Department of Environment
—Provision of play for pre-school children.
—Provision of play for pre-school children.
—Grants under the urban programme for projects benefiting children.

Department of Health
—Health services for children and young people in hospital and in the community, including child health surveillance and dental and school health services.
—Policy for social services for children, including day-care, foster-care and adoption, and prevention of child abuse.
—Nutrition, including infant feeding.
—Care and protection of children.
—Social services for socially deprived families and children in care.
—Care, control and treatment of juvenile delinquents.

Home Office
—Criminal justice policies.
—Arrangements for offenders given custodial sentences.
—Magistrates' court proceedings involving the custody and maintenance of children.

Lord Chancellor's Department
—Family law relating to children.

Department of Social Security
—Policy on social security benefits affecting children and young people, including cash benefits for disabled people, unemployment benefits (family credit, child benefit, and one-parent benefit), the social fund, state and occupational pensions, income support and housing benefits.
(Payments of benefits is undertaken by the Department and by local authorities. Payment of unemployment benefits is undertaken by the Department of Employment on an agency basis.)

In Wales, Scotland and Northern Ireland, some of the functions are carried out by the Departments listed above; others or their equivalents are, subject to apropriate legislation, performed by the Welsh, Scottish and Northern Ireland Offices.

Further breakdown by departmental divisions would be possible only at disproportionate cost.

THE ARTS

Elstree Studios (Nitrate Film)

Mr. Cryer: To ask the Minister of the Arts if he will make provision for the stocks of nitrate film at present stored at Elstree studios; and if he will make a statement.

Mr. Luce: The British Film Institute could carry out the necessary conservation work, and it is in discussion with the owners at present.

Public Expenditure

Mr. Worthington: To ask the Minister for the Arts if he will publish in the *Official Report* an analysis of receipts to his programme, consistent with the reply of 27 May, *Official Report*, columns *375-376*, analysing by function or nature of item *(a)* the receipts classified as charges with respect to programme expenditure, *(b)* the receipts classified as charges with respect to running costs expenditure and *(c)* the amounts of receipts in respect of (i) programme expenditure and (ii) running costs expenditure estimated to have been met from other public expenditure programmes.

Mr. Luce *[holding answer 28 July 1988]:* An analysis in the precise form requested is not available, but the arts and

libraries receipts detailed in the reply of 27 May relate to programme expenditures. They fall into the following categories, and the table covers the last three years for which firm figures are known.

£ million

	1984-85	*1985-86*	*1986-87*
Museums and Galleries	−8	−11	−8
Libraries (Central)	−16	−18	−16
LA Museums and Galleries	−10	−11	−11
LA Libraries	−37	−39	−42
TOTAL	−71	−79	−77

It is not possible to identify the amounts that originate in other public expenditure programmes.

English National Opera and London Festival Ballet

Mr. Bowis: To ask the Minister for the Arts if he will make a statement on the future funding of the English National Opera and London Festival Ballet.

Mr. Luce *[holding answer 28 July 1988]:* These companies receive their public funding from the Arts Council and from Westminster city council, on behalf of London generally. I am aware of the anxieties which have been expressed about the continuation of Westminster's contribution when the basis of local authority finance is changed. I hope that all the parties which currently contribute will continue to do so, and that means will be found to adjust their contributions as may become necessary and appropriate.

Sponsors (TV Advertising)

Mr. Bowis: To ask the Minister for the Arts if he will make a statement on the relaxation of television advertising rules for sponsors of major arts events.

Mr. Luce *[holding answer 28 July 1988]:* I welcome recent efforts by both the IBA and BBC to relax their guidelines on the credits which may be given to arts sponsors. I believe the IBA changes will be very helpful, but I am still concerned at the disparity of treatment between the arts and sport in the BBC guidelines and I shall continue to press for equality.

Museums

Mr. Worthington: To ask the Minister for the Arts if he will publish in the *Official Report* for each year in the period 1970 to 1987 and for the institutions listed in his earlier reply of 26 May, *Official Report* columns *259-260* *(a)* the number of adult entrants, *(b)* the number of concession entrants and *(c)* admission revenue.

Mr. Luce *[holding answer 27 July 1988]:* This information is not available in the precise form requested. However, total attendances at each of the institutions listed in my reply of 26 May in each year since 1978 were as follows:

Number[1] of visitors to National museums and galleries 1978-1987

	1978	*1979*	*1980*	*1981*	*1982*	*1983*	*1984*	*1985*	*1986*	*1987*

[1] in thousands.

Estimates Definitions (Expenditure)

Mr. Worthington: To ask the Minister for the Arts if he will publish in the *Official Report* a table covering each of the votes on class XIII and for each of the years 1979-80 to 1990-91, which shows gross expenditure on estimates definitions.

Mr. Luce *[holding answer 27 July 1988]:* The Office of Arts and Libraries was established in 1983. The following table shows gross spending since then on the votes which in the last closed year, 1987-88, comprised class XIII.

£'000s

	1983-84	*1984-85*	*1985-86*	*1986-87*	*1987-88*
British Museum	12,350 (Class X,12)	12,771 (Class V,1)	13,096 (Class V,1)	13,345 (Class XIII,1)	13,938 (Class XIII,1)
British Museum (Natural History)	9,416 (Class X,10)	9,731 (Class X,10)	11,415 (Class X,10)	11,787 (Class XII,10)	17,958 (Class XII,10)
Imperial War Museum	3,997 (Class X,15)	4,100 (Class V,2)	4,445 (Class V,2)	4,497 (Class XIII,2)	4,727 (Class XIII,2)
National Gallery	6,659 (Class X,16)	6,992 (Class V,3)	6,571 (Class V,3)	6,771 (Class XIII,3)	7,017 (Class XIII,3)
National Maritime Museum	3,988 (Class X,17)	4,275 (Class V,4)	4,218 (Class V,4)	4,462 (Class XIII,4)	4,677 (Class XIII,4)
National Portrait Gallery	1,757 (Class X,18)	1,886 (Class V,5)	1,777 (Class V,5)	1,814 (Class XIII,5)	1,819 (Class XIII,5)
Science Museum	7,642	8,483	8,954	9,171	9,589

	1983-84	*1984-85*	*1985-86*	*1986-87*	*1987-88*
	(Class X,13)	(Class V,6)	(Class V,6)	(Class XIII,6)	(Class XIII,6)
Tate Gallery	5,320	5,594	5,644	5,782	6,497
	(Class X,19)	(Class V,7)	(Class V,7)	(Class XIII,7)	(Class XIII,7)
Victoria and Albert Museum	10,299	11,340	10,670	11,023	11,680
	(Class X,14)	(Class V,8)	(Class V,8)	(Class XIII,8)	(Class XIII,8)
Wallace Collection	781	822	876	906	939
	(Class X,20)	(Class V,9)	(Class V,9)	(Class XIII,9)	(Class XIII,9)
Arts and the Heritage	111,671	124,111	129,871	173,670	183,514
	(Class X,21)	(Class V,10)	(Class V,10)	(Class XIII,10)	(Class XIII,10)

£'000

	1983-84	*1984-85*	*1985-86*	*1986-87*	*1987-88*
Libraries	45,324	47,286	48,719	53,143	54,238
	(Class X,22)	(Class V,11)	(Class V,11)	(Class XIII,11)	(Class XIII,11)
OAL Administration	[1]600	906	1,186	1,165	1,288
	(Class X,23)	(Class V,12)	(Class V,12)	(Class XIII,12)	(Class XIII,12)

[1]Part-year only.

The Vote Structure of class XIII was reorganised and simplified in 1988-89. The details are as follows:

		£'000
Vote 1.	Museums and Galleries	153,576
Vote 2.	Arts and the Heritage	174,364
Vote 3.	Libraries	89,668
Vote 4.	Office of Arts and Libraries Administration	1,522

Supply Expenditure

Mr. Worthington: To ask the Minister for the Arts if he will publish in the *Official Report* a table, covering each of the institutions for which a vote is taken on class XIII and for each of the years 1979-80 to 1990-91, which shows the public expenditure content of such Supply expenditure.

Mr. Luce *[holding answer 27 July 1988]:* I refer the hon. Member to the answer I gave to his earlier question on the matter. All the Supply expenditure referred to is classified as public expenditure.

HOUSE OF COMMONS

Cash Dispensers

Sir Geoffrey Finsberg: To ask the Lord President of the Council if he will make a statement on progress in discussions on providing an automated cash dispensing teller machine within the precincts of the House for the convenience of hon. Members and staff.

Mr. Wakeham: I replied to a question from my hon. Friend the Member for Warrington, South (Mr. Butler) about cash dispensing facilities in the House on 23 May, at column *22*. I have received no further representations on this subject. I understand, however, that this facility is being considered by the relevant sub-committee of the Services Committee as one of the possible amenities and facilities to be provided in the new parliamentary buildings.

Written Answers (Cost)

Mr. Tony Banks: To ask the Lord President of the Council what information he has about the total estimated cost of providing answers to written parliamentary questions in the current Session of Parliament; and how many such questions have been tabled.

Mr. Wakeham: Records of the total cost of answering parliamentary questions are not kept centrally. However, following an interdepartmental exercise in 1972, an assessment was made of the average cost of answering a written parliamentary question. This average figure is updated regularly and currently stands at £51. A total of 43,128 written and priority written parliamentary questions have been tabled to date this Session.

CIVIL SERVICE

Departmental Programmes

Mr. George: To ask the Minister for the Civil Service how much has been spent by his Department in each of the past five years on the evaluation of Department programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mr. Luce *[holding answer 28 July 1988]:* The Office of the Minister for the Civil Service's management accounting system provides for the continuous review of the Department's work in addition to an annual evaluation of all its programmes. The system is an integral part of the process of management in the Department and it is therefore not possible to identify separately the resources involved.

TRADE AND INDUSTRY

Furnishing Fabrics (Fire Safety)

Mr. Nicholas Winterton: To ask the Chancellor of the Duchy of Lancaster whether any guidance has recently been issued by his Department in order to indicate with whom responsibility rests for ensuring that furnishing fabrics conform to the new furniture fire safety regulations.

Mr. Forth: In answer to inquiries about responsibility for ensuring that these requirements of the new regulations are met, I have said that the primary responsibility lies with suppliers of furniture; suppliers of furnishing fabrics

direct to the public also have a legal responsibility. The enforcement of the regulations will be a matter for the local authority trading standards department.

Mr. Nicholas Winterton: To ask the Chancellor of the Duchy of Lancaster (1) if he will list the types of interliners or barrier cloths which currently meet the ignition source five test; and if he will place in the Library full details of the interliners' performance;

(2) what recent representations he has now received from furnishing fabric suppliers concerning their inability to find interliners or barrier cloths that will meet the ignition source five test;

(3) what tests have been carried out by his Department to check the validity of manufacturers' claims that their products meet the ignition source five test for furnishing fabrics.

Mr. Forth: I recognise the concerns which have been expressed by some parts of the furniture industry about the availability of interliners which will meet the ignition source 5 test which is to be carried out over standard polyurethane foam. No specific tests have been carried out by my Department to verify the statements of manufacturers about their products, but I am satisfied by the information available to me that there are materials which will meet the test. I understand that the manufacturers are generally known in the industry and I have no doubt that they will co-operate with the furniture industry in meeting the requirements of the Furniture and Furnishings (Fire) (Safety) Regulations 1988.

Patents Designs and Trade Marks

Mr. Worthington: To ask the Chancellor of the Duchy of Lancaster if he will publish in the *Official Report* a table, covering the years 1982-83 to 1990-91, which collates on the same basis *(a)* the non-capital receipts and expenditure account published in the annual report of the Comptroller-General of Patents Designs and Trade Marks, *(b)* the presentation of voted expenditure in the supply estimates and appropriation accounts for class V, Vote 2, section E (protection of innovation) and *(c)* the protection of innovation component in the support for industry line of table 5.1 of column 288.

Mr. Forth: The table shows the voted expenditure figures in the Supply Estimates and Appropriation Accounts for class V, vote 2, section E, for the years 1982-83 to 1988-89. Expenditure for the other years requested has not yet been voted. These figures cannot readily be collated on the same basis as the non-capital receipts and expenditure account published in the annual report of the Comptroller-General of Patents, Designs and Trade Marks, because the financial information in this annual report is presented on a calendar year basis. The figures for the protection of innovation component in the support for industry line of table 5.1 of column 288 are the same as the net total figures in the table given here.

Point II *(£'000)*

Voted Expenditure	*1982-83*	*1983-84*	*1984-85 Outturn*	*1985-86*	*1986-87*	*1987-88 Provisional Outturn*	*1988-89 Supply Estimates*

Public Expenditure

Mr. Worthington: To ask the Chancellor of the Duchy of Lancaster if he will publish a table in the *Official Report*, in the same format as his written reply of 11 July, *Official Report*, columns *31-34*, on receipts classified as charges in respect of his programme expenditure over the years 1982-83 to 1990-91, but consistent with the reply of 27 May *Official Report*, Volume 134, columns *375-76*, indicating the receipts in respect of running costs expenditure together with a supplementary analysis indicating, separately, the amounts of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mr. Forth: The information requested by the hon. Member for receipts in respect of programme expenditure was given in my hon. Friend's reply of 11 July, at columns *31-34*, which also explained why the totals differed from those provided by my right hon. Friend the Chief Secretary in his reply of 27 May. The information requested for receipts in respect of running costs expenditure is as follows:

Table 1

Trade and Industry public expenditure: receipts in respect of running costs included in other Departments

Departments running costs 1982-83 to 1990-91

Job Creation (Northern Region)

Mr. Trotter: To ask the Chancellor of the Duchy of Lancaster if he will list those schemes for which his Department is responsible which are aimed at industrial support and or job creation in the northern region, showing the annual cost in each case.

Mr. Atkins: Those schemes which were open for application during 1987-88 (the latest year for which figures are available), for which my Department was responsible and which were aimed at industrial support and/or job creation, are listed as follows. A regional analysis of expenditure for these schemes is not always available; accordingly, the list of schemes is divided into those for which information is available and other.

Schemes for which expenditure in the northern region is available:

	£ million
Old regional development grant	29·0
Revised regional development grant	33·6
Regional selective assistance	24·9
Microelectronics support scheme	less than 0·1
Fibre optics scheme	Nil
Advanced manufacturing technology scheme	Nil
Support for major projects	Nil

In addition, capital expenditure by English Estates on behalf of the Department in the northern region was £21·7 million.

Schemes for which no regional analysis is available:

Business improvement scheme.
Exchange risk guarantee scheme.
Certification schemes.
Support for the private sector shipbuilding industry.

In addition, to the foregoing, and as part of the enterprise initiative announced earlier this year, my Department is now also responsible for assistance to exceptional projects and regional enterprise grants.

Manufactures

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster whether he will publish for 1958, 1969, 1977, 1987 and the current year to date at an annual rate *(a)* the United Kingdom and *(b)* West German balance of trade in manufactures with each of the EEC countries, and the real rate of exchange between sterling and the deutschmark in nominal and real terms based on relative export unit values in 1975.

Mr. Alan Clark: The available information is in the following table:

Crude balances in manufactures

United Kingdom trade with: *US $ million*

	Belgium/ Luxembourg	Denmark	France	Fed. Rep. Germany	Greece	Ireland	Italy	Netherlands	Portugal	Spain
1958	−39	−114	−35	60	−40	−146	−49	−89	−44	−40
1969	271	220	127	−272	111	333	49	63	38	190
1977	558	459	−482	−2,322	286	894	−677	497	178	293
1987	−866	−94	−1,903	−12,220	249	800	−2,548	−1,833	−161	410
1988[1]	−1,021	−135	−2,045	−14,696	249	716	−3,197	−3,387	−110	124

[1] January to May (annual rate).

Federal Republic of Germany trade with:

	Belgium/ Luxembourg	Denmark	France	United Kingdom	Greece	Ireland	Italy	Netherlands	Portugal	Spain
1969	118	−150	1,269	268	225	76	77	1,090	166	395
1977	1,082	−718	3,441	2,284	532	71	−1,140	4,320	400	870

	Nominal exchange rate Deutschmark/£	Relative export prices[1] 1975 = 100
1969	9·38	89
1975	5·45	100
1977	4·05	99
1987	2·94	84
1988 (Q1)	3·01	80
(Q2)	3·14	—

[1] The export unit value index for manufactures for Germany divided by that for the United Kingdom, both expressed in a common currency.

Sources: OECD, Overseas Trade Statistic, IMF.

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster whether he will publish in the *Official Report* for each year since 1970 the index of the volume of *(a)* West German and *(b)* United Kingdom exports of manufactures and finished manufactures to the EEC.

Mr. Alan Clark: This information is not available.

Constant price data are available only at the level of total trade or by commodity. Geographical analyses in volume terms of individual countries' trade are not available.

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster what was the deficit on trade with the EEC in manufactures less precious stones in the first five months of 1988 and in 1970 after taking into account the change in import and export unit values.

Mr. Alan Clark: Data on export and import unit values are not available for United Kingdom trade analysed by area. The information requested is therefore not available.

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster whether he will publish in the *Official Report* a table showing for each year since 1978 gross and net investment in manufacturing per head of the population in the United Kingdom, the United States of America, Japan, France, Italy and Germany.

Mr. Maude: Comparable figures for OECD countries over this period are not available. Available information is contained in the publication "OECD National Accounts 1973-85".

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster whether he will publish an updated table showing various indices of competitiveness and the relative volume of trade in manufactures in the manner of the written reply of 22 October, 1979, *Official Report*, columns 56-60, together with a column showing the relative value of trade in manufactures with the EEC.

Mr. Alan Clark: Competitiveness indices are published in table F3 of the "Monthly Review of External Trade Statistics and Annual Supplement." The other data requested are in the following table.

	Terms of trade in manufactures	Relative volume of trade in manufactures	1980 = 100 Relative value of trade in manufactures with EC countries
1975	90	128	98
1976	86	128	102
1977	89	126	103
1978	92	112	93
1979	96	98	90
1980	100	100	100
1981	102	96	91
1982	101	90	84
1983	100	79	75
1984	100	78	76
1985	101	79	78
1986	103	77	76
1987	103	76	79

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster whether he will publish in the *Official Report* a table showing the relative volume of United Kingdom exports to imports of manufactures from the United States of America and Germany, respectively, together with relative export prices based on 1975 = 100.

Mr. Alan Clark: The information about relative export prices is available in the "Monthly Review of External Trade Statistics." Information is not available for the relative volume of United Kingdom trade by country.

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster (1) whether he will publish in the *Official Report* a table showing for each year since 1970 imports of manufactured less precious stones from the EEC as a percentage of the United Kingdom market for manufactures and United Kingdom exports of manufactures less precious stones as a percentage of the EEC market for manufactures;

(2) whether he will publish in the *Official Report* a table showing for 1958, 1968 and each year since 1970 the European Economic Community share of United Kingdom exports and imports of manufactures less precious stones;

(3) whether he will publish in the *Official Report* a table showing for 1958, 1968, 1978 and 1987 the United Kingdom share of European Economic Community imports of manufactures.

Mr. Alan Clark: Data excluding trade in precious stones are not readily available. The available information on the United Kingdom share of EC imports is published in table E3 of annual supplement of the "Monthly Review of External Trade Statistics." Data on the shares of United Kingdom imports and exports of manufactures accounted for by the other member states of the EC are in the following table:

Shares of United Kingdom international trade accounted for by other EC countries, per cent.
Balance of payments basis

Year	Exports	Imports
[1]1958	19	36
[1]1968	29	34
1970	31	35
1971	30	39
1972	32	42

1984	40	53
1985	42	55
1986	44	57
1987	46	56

[1] Overseas Trade Statistics basis.

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster whether he will publish in the *Official Report* a table showing for each year since 1970 and 1988 to date the United Kingdom visible trade balance in *(a)* manufactures less precious stones and *(b)* total trade less fuels and precious stones with the EEC and with the rest of the world, together with the export-import ratios in each case.

Mr. Alan Clark: Information excluding data for trade in precious stones is not readily available. The available information is in the following table:

United Kingdom overseas trade with EC and non-EC countries[1]

Balance of payments basis

	Balance £ Billion				Ratio of exports to imports, percentage			
	Manufactures[2]		Non fuel goods[2]		Manufactures[2]		Non fuel goods[2]	
	EC	Non EC	EC	Non EC	EC	Non EC	EC	Non EC

1988 first quarter	−3·2	−0·4	−4·0	−1·0	69	94	68	90

[1] Data for 1970 to 1987 are classified to SITC (Rev. 2).
[2] Data for 1988 are classified to SITC (Rev. 3).

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster what is the change in the volume of exports of finished manufactures in *(a)* the latest three months and *(b)* the fourth quarter of 1987; what assessment he has made of the causes of this change; and what further change he expects as a result of the increase in the real value of the pound sterling since the fourth quarter of 1987.

Mr. Alan Clark *[holding answer 28 July 1988]:* The volume of exports of finished manufactures increased by 7 per cent. between the first and second quarters of 1988. For the third and fourth quarters of 1987 the increase was 3 per cent.

There are many factors, as well as relative prices, which influence changes in the volume of United Kingdom exports, such as the growth in the world economy and the success of United Kingdom industry in producing goods which, in design, quality and marketing, meet the requirements of world markets.

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster what is his estimate of the effect of an increase of 10 per cent. in the real exchange rate on United Kingdom imports and exports of manufactures.

Mr. Major: I have been asked to reply.

United Kingdom manufacturing trade performance depends on many factors other than just the exchange rate. The effects of changes in cost or price competitiveness build up over a period of years, and may well be dominated by changes in non-price competitiveness.

EC (Trade Deficit)

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster whether, further to his reply of 20 July, *Official Report*, columns 621-2, giving the trade deficit with the EEC in the first five months of the current year, he will publish in the *Official Report* his estimate of the number of British jobs represented by the trade deficit.

Mr. Alan Clark: The deficit in our balance of trade in manufactured goods with the European Community reflects many interrelated factors, including the pattern of our trade in other goods and services with other areas. Since changes in the deficit cannot take place in isolation, no meaningful estimates can be made of the number of jobs represented by the deficit.

Departmental Recruitment and Promotion Policy

Ms. Richardson: To ask the Chancellor of the Duchy of Lancaster what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career-break due to child care.

Mr. Forth: The DTI's policy statement on equal opportunities, which was issued in 1984 in agreement with the Department trades unions and which takes account of the code of practice issued under the Equal Opportunities Act 1975, has been placed in the Library of both Houses. All DTI staff serving on recruitment and promotion duties are particularly briefed to guard against any form of direct or indirect discrimination in any circumstance.

EC (Investments)

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster whether he will bring up to date the figures on direct investment in tables 6 and 7 of the evidence submitted by Her Majesty's Government to the Treasury and Civil Service Committee on the Financial and Economic Consequences of United Kingdom Membership of the European Communities (pages 22-3 of HC 57-II Session 1984-85).

Mr. Maude: The available information is given in the tables.:

Table 6
United Kingdom: Inward Direct Investment
(figures for 1960-1983 exclude oil companies)

£ million

	World total	EC[3] total	Non-EC total	of which: USA	Japan
1960	135	4	131	85	—

1985	18,995	12,413	11,062	3,730	33·7	19·6
1986	24,627	14,144	12,681	2,240	17·7	9·1

[1] Nine member countries up to 1980; including Greece from 1981 onwards.
[2] All figures cover all industries except oil. Direct investment is the amount invested in the year in unremitted profits, shares, loans, and short-term indebtedness by US companies in their overseas subsidiaries, branches and associates.
n/a = Not available.
Source: Survey of Current Business published by US Department of Commerce.

Japanese direct investment overseas[1]

	UK	EC	World	UK share of EC	Share of world investment UK	Share of world investment EC	Share of world investment USA
	US$ million	US$ million	US$ million	Per cent.	Per cent.	Per cent.	Per cent.
1973-82	1,230	3,323	26,403	37	5	13	—
1983-86	1,538	5,655	30,509	27	5	19	49

[1] These Japanese direct investment figures cover only share capital and long-term loans and unlike the US figures do not include unremitted profits, short-term loans and trade credit.
Source: Japanese Balance of Payments.

Import Unit Values

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster if, further to his answer of 20 July, *Official Report*, columns 621-2, concerning the increase in import and export unit values for finished manufactures since 1983, he will publish in the *Official Report* the percentage increase in the terms of trade for finished manufactures in *(a)* May 1988, *(b)* 1980-81, *(c)* the first quarter of 1987 and *(d)* the first half of 1973; and what estimate he has made of the effect of the increase on the balance of trade in finished manufactures.

Mr. Alan Clark: The information is as follows:

Terms of trade for finished manufactures

	percentage change	over:
May 1988	+1·8	April 1988
Year 1980	−6·2	Year 1979
Year 1981	+1·5	Year 1980
1987 quarter 1	−0·8	1986 quarter 4
1973 first half	−1·9	1972 second half

No estimates of the effects of changes in the terms of trade on the balances have been made.

Motor Cars (United States)

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster what information he has on the reason for the decline in United Kingdom exports of motor cars to the United States in the first five months of 1988; and if he will publish in the *Official Report* a table showing the number of United Kingdom cars exported to the United States in each year since 1958 and 1988 to date, together with the real value of sterling based on 1975 relative export prices.

Mr. Alan Clark: Data on number of cars exported for the years 1958 to 1969 are not available.

As the table illustrates, United Kingdom exports of cars to the United States were at an exceptionally high level in 1987. On the basis of the figures in the first five months of this year, it looks likely that exports for 1988 as a whole will be well up on the levels achieved in 1986 and earlier years.

United Kingdom exports to the United States of America of motor cars 1970 to May 1988

	Number	Relative export prices 1975 = 100
1970	77,725	112
1971	110,549	107
1972	68,560	101
1973	65,785	102
1974	73,607	101
1975	69,142	100
1976	82,661	111
1977	55,909	102
1978	56,192	89
1979	47,184	85
1980	31,951	77
1981	13,645	93
1982	14,767	107
1983	18,608	115
1984	21,892	121
1985	25,700	120
1986	27,805	107
1987	50,937	94
[1]1988	15,082	n/a

[1] January to May.
Source: Overseas trade statistics.
Note: 1987 and 1988 figures provisional.
Motor cars defined as:
1970-77: Standard International Trade Classification (SITC) revised, sub-Group 732.1.
1978-87: SITC Revision 2, sub-Group 781.0.
1988: SITC Revision 3, sub-Group 781.2.
Relative export prices expressed as ratio of United States unit value of exports to that of the United Kingdom.

EC (Imports)

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster whether he will publish in the *Official Report* a table similar to that in table 15.10 of the Monthly Digest of Statistics showing imports from the European Economic Community as a percentage of home demand.

Mr. Alan Clark: Estimates are given in the following table:

Imports from the European Community as a percentage of United Kingdom Home Demand

		1981	*1982*	*1983*	*1984*	*1985*	*1986*	*1987*

[1] High figure caused by erratic trade in precious stones.
n.a.—Not available.

Secured Loans

Mr. Shersby: To ask the Chancellor of the Duchy of Lancaster if he will place in the Library any information at his disposal concerning consumer understanding of the concept of a secured loan including any research carried out by his Department and any advice tendered by the Office of Fair Trading and other consumer bodies.

Mr. Forth: I will write to my hon. Friend as soon as possible and place a copy in the Library.

Credit Advertisements

Mr. Janner: To ask the Chancellor of the Duchy of Lancaster (1) what percentage of credit advertisements in the county of Leicestershire appeared to be in breach of relevant legislation during the period from 1 April 1987 to 31 March; how many and what percentage of such breaches led to prosecutions; and with what results;

(2) how many and what percentage of credit advertisements in each county in the United Kingdom during the year from 1 April 1987 to 31 March appeared to be in breach of relevant legislation; how many and what percentage led to prosecution; and with what results.

Mr. Maude: I will write to the hon. and learned Member as soon as possible and place a copy in the Library.

Halifax

Mrs. Mahon: To ask the Chancellor of the Duchy of Lancaster if he has any plans to visit Halifax in the near future to view the prospects for industry.

Mr. Atkins: I have no plans to visit Halifax at present.

Regional Policy

Mr. Wigley: To ask the Chancellor of the Duchy of Lancaster if he will make a statement on the progress of Her Majesty's Government's new regional policy.

Mr. Atkins: In January 1988 the White Paper, "DTI —the department for Enterprise" (Cm. 278), announced changes in regional policy designed to reflect the Government's aim of encouraging enterprise. Since the beginning of the year over 1,250 applications for regional selective assistance have been received by the Department and the Scottish and Welsh Offices. Since January, over 5,400 applications have been approved (following an initial two-day business review) for the new consultancy initiatives, and preliminary indications are that over 40 per cent. of them have been from the assisted areas of Great Britain. There have also been over 450 applications under the regional enterprise grants scheme which was introduced on 1 April 1988.

Manufacturing Investment

Mr. Boyes: To ask the Chancellor of the Duchy of Lancaster which Organisation for Economic Co-operation and Development countries have had a greater increase in manufacturing investment than the United Kingdom since 1979.

Mr. Alan Clark: Figures of manufacturing investment for OECD countries are not available on a comparable basis over the period since 1979. Available figures for OECD countries are published in "OECD National Accounts 1973-1985."

Single European Market

Dr. Thomas: To ask the Chancellor of the Duchy of Lancaster if he will make a further statement on the implications of the completion of the single European market in 1992 for his Department's regional policy.

Mr. Maude: The single market will provide competitive businesses in the regions with major opportunities. My Department took due account of the implications of the single market for the regions when we introduced reforms to regional policy, as part of the enterprise initiative, at the beginning of this year.

Frogs Legs

Mr. Tony Banks: To ask the Chancellor of the Duchy of Lancaster what has been the total by value and weight and country of origin of frogs legs imported into the United Kingdom to each year since 1980; and if he will make it his policy to ban any further imports.

Mr. Alan Clark: Prior to 1988 frogs legs were not separately identified in the OTS.

For the period January to May 1988 imports of frogs legs were:

Country of origin	*m/tonnes*	*£ 000*
Belgium/Luxembourg	8·5	24·9
Indonesia	7·9	23·4
France	1·1	3·5

I have no immediate plans to ban imports of this product.

Stainless Steel

Mr. Speller: To ask the Chancellor of the Duchy of Lancaster what action he proposes to take in response to anti-competitive price-fixing arrangements for stainless steel within EEC and EFTA countries.

Mr. Atkins: It is for the European Commission to investigate alleged violations of European Community competition rules. Any restrictive agreements involving only one United Kingdom party would not fall under the scope of United Kingdom restrictive trade practices legislation.

English Estates

Mr. Heddle: To ask the Chancellor of the Duchy of Lancaster if he will publish in the *Official Report* the terms of reference of English Estates.

Mr. Atkins: The English Industrial Estates Corporation is a non-departmental public body which trades as English Estates. It is funded by the Government to provide and facilitate the provision of industrial and commercial premises and sites in certain parts of the country in support of regional and inner city policies. It carries out two main programmes on behalf of the Department of Trade and Industry. One is in the assisted areas of England and the other is a new programme in the inner cities under which it funds managed workspace projects in partnership with the private sector. It also provides premises on behalf of the Rural Development Commission in rural development areas.

A E Services

Mrs. Golding: To ask the Chancellor of the Duchy of Lancaster if he will make a statement on the circumstances which led the Registrar of Companies to give notice in February that the company AE Services would be dissolved.

Mr. Maude: The Registrar of Companies informs me that, in October 1987, he received information from a director of AE Services Limited to confirm that the company was no longer in business. The Registrar therefore gave notice in the *London Gazette* of his intention to strike the company's name off the register. There were no objections to this course of action and the company was therefore dissolved on 21 June 1988.

Elstree Studios

Mr. Cryer: To ask the Chancellor of the Duchy of Lancaster what assurances were given by Cannon Films to his Department on the purchase by the company of Elstree studios regarding retaining them for film production.

Mr. Atkins: The Secretary of State's decision not to refer the acquisition by Cannon of Screen Entertainment Ltd. to the MMC did not depend on any assurances about the future use of Elstree studios.

National Engineering Laboratory

Mr. Ingram: To ask the Chancellor of the Duchy of Lancaster if any foreign-based company or organisation has submitted a bid, or is connected with any of the bids, for the National Engineering Laboratory.

Mr. Forth: There are no foreign-based companies or organisations submitting a bid for the National Engineering Laboratory. There are two United Kingdom-based bidders with links to companies overseas, Moore Barrett and Redwood Limited, part of the SGS group, whose ultimate parent is the Societe de Surveillance Holding SA of Switzerland; YARD Limited, which is a member of the CAP Group plc and which has some Belgian, French, German, Netherlands and Spanish subsidiaries plus other overseas.

Petrol Companies (Pricing Operations)

Mr. Hill: To ask the Chancellor of the Duchy of Lancaster if he will refer the pricing operations of the major petrol companies to the Monopolies and Mergers Commission.

Mr. Maude: I will write to my hon. Friend as soon as possible and place a copy in the Library.

Films

Mr. Favell: To ask the Chancellor of the Duchy of Lancaster if he will make a statement on the conclusions which he has drawn from his consultations with the cinema and film industries about follow-up action to the 1983 Monopolies and Mergers Commission report on the supply of films and the subsequent experimental films release scheme; and whether he will make an early order under the Fair Trading Act 1973 to implement the two main recommendations by the Monopolies and Mergers Commission concerning barring and popular films.

Mr. Maude: I will write to my hon. Friend as soon as possible and place a copy in the Library.

Secondhand Furniture

Mr. Thurnham: To ask the Chancellor of the Duchy of Lancaster what representations he has received about safety standards on the sale of secondhand furniture; and if he will make a statement.

Mr. Forth: I will write to my hon. Friend as soon as possible and place a copy in the Library.

Post Office

Mr. Hill: To ask the Chancellor of the Duchy of Lancaster if, in the light of its profits before taxation in the last financial year, he will make a statement on whether there are any plans for privatising the Post Office.

Mr. Forth: It is the Government's view that there are significant benefits to be gained in transferring activities from the public to the private sector. We have made it clear that because of its special character we have no intention of privatising the Royal Mail. But we do not rule out other parts of the Post Office as possible candidates for privatisation. My right hon. and learned Friend the Member for Rushcliffe (Mr. Clarke) announced that the Post Office would be selling Girobank on 7 June. We have not made any further decisions about privatisation.

Special Telephone Number

Mr. Austin Mitchell: To ask the Chancellor of the Duchy of Lancaster how much his Department has paid for the special telephone number 200 1992.

Mr. Maude: I will write to the hon. Member as soon as possible and place a copy in the Library.

Barlow Clowes

Dr. Glyn: To ask the Chancellor of the Duchy of Lancaster what consideration will be given to the number of stockbrokers and financial intermediaries who advised their clients to invest with Barlow Clowes during the course of the inquiry into the circumstances surrounding its collapse.

Mr. Maude: I will write to my hon. Friend as soon as possible and place a copy in the Library.

Recorded Message Services

Mr. Lewis: To ask the Chancellor of the Duchy of Lancaster if he will list the telephone recorded message services which have been terminated by British Telecom under the Telecommunications Act 1984 due to the offensive content of the service.

Mr. Atkins *[holding answer 28 July 1988]:* British Telecom does not have powers of its own under the Telecommunications Act 1984 to terminate these services. Its ability to do so arises out of the terms of its contracts with message service providers. As such, the actions it takes are a commercial matter between the parties concerned subject to BT fulfilling the obligations of its licence.

Nevertheless, I understand from BT that the company has withdrawn its facilities from 15 services following adjudications by the Independent Committee for the Supervision of Standards of Telephone Information Services (ICSTIS) that the services were in breach of the ICSTIS code of practice. This is in addition to cases in which service providers have withdrawn recorded message services voluntarily when ICSTIS has notified them that complaints have been lodged.

Social Science Research

Mr. George: To ask the Chancellor of the Duchy of Lancaster how much has been spent by his Department in each of the past five years on social science research; what percentage this constitutes of total departmental expenditure and of the Department's research budget; and how much of the research has been undertaken *(a)* within his Department, *(b)* by universities and polytechnics and *(c)* by independent research organisations.

Mr. Maude *[holding answer 28 July 1988]:* The available information relates to gross expenditure on research and development including that performed elsewhere in central Government for R and D in total and for R and D in social science and humanities. The figures for total departmental expenditure exclude that on public corporations and are net of receipts. The information is given in the table:

Gross expenditure on R and D for social science and humanities[1]

	1982-83 £ million	*1983-84 £ million*	*1984-85 £ million*	*1985-86 £ million*	*1986-87 £ million*
Expenditure	0·10	0·15	0·22	0·11	0·09
As a percentage of total expenditure	0·01	0·01	0·02	0·01	0·00
As a percentage of total R and D expenditure	0·02	0·04	0·05	0·02	0·02
Performed within the department			None		
Performed in higher education	0·05	0·04	0·00	0·00	0·01
Performed in industrial research associations and non industrial research institutes	0·05	0·09	0·01	0·01	0·01

[1] Figures have been rounded to second decimal place.

Third-world Exports

Mr. Nicholas Bennett: To ask the Chancellor of the Duchy of Lancaster if he will list the main features of the preferential trading arrangements available to Third-world countries wishing to export to Britain, together with a list of those countries to which such arrangements apply.

Mr. Alan Clark *[holding answer 28 July 1988]:* As a member of the European Community, the United Kingdom is party to the following preferential trading arrangements.

The Lomé convention grants preferential treatment to products imported into the Community from the 66 African, Caribbean and Pacific states in Table 1. All ACP industrial products, except textiles and rum, and the great majority of agricultural products, are granted duty-free access and the remainder benefit from either a reduced rate of duty or exemption from duty for a limited quantity of imports. There is a parallel arrangement between the EC and the dependencies of member states in table 2.

The EC generalised scheme of preferences grants preferential treatment to products imported into the Community from the countries in table 3. All industrial products are granted duty-free access, and agricultural products access at reduced rates of duty, subject to quantitative limits in the case of certain products sensitive to Community interests.

In addition, the Community has preferential trade agreements with the countries listed in table 4. Under these agreements the Community also gives duty-free access to industrial products, and access at reduced rates of duty to agricultural products, subject to limits in the case of certain sensitive products.

WALES

Welsh Development Agency (Grants)

Mr. Gareth Wardell: To ask the Secretary of State for Wales if he will place in the Library details of the projects in Wales that have received Welsh Development Agency section 10 grants for each of the past five years.

Mr. Peter Walker: The WDA's section 10 powers have not been exercised during the period concerned.

NHS Expenditure

Mr. Alan Williams: To ask the Secretary of State for Wales, pursuant to his reply of 14 July to the hon. Member for Ynys Môn (Mr. Jones), if he will express the 11 per cent. real increase in National Health Service spending in Wales since 1985-86 on a year by year basis, indicating in the case of 1988-89 what percentage is attributable to the nurses' pay settlement.

Mr. Grist: I do not recognise the figure of 11 per cent. to which the right hon. Gentleman refers: the increase in spending on the National Health Service in Wales since 1985-86 is nearly 16 per cent. in real terms. The year-on-year increases are 3·9 per cent., 6·1 per cent. and 5·0 per cent. respectively. The nurses' pay settlement following the fifth report of the review body accounts for 3 per cent. of the increase since 1987-88.

Mr. Alan Williams: To ask the Secretary of State for Wales if, pursuant to his reply to the hon. Member for Ynys Môn (Mr. Jones) of 14 July, *Official Report*, column 342, he will give the information on National Health Service expenditure for Wales expressed as gross domestic product per head of population.

Mr. Grist: Expenditure on the National Health Service in Wales was £921·055 million in 1985-86 and GDP per capita in Wales was £4,509 in 1985. The ratio between these sums is 204,270:1.

Rating Reform

Mr. Murphy: To ask the Secretary of State for Wales if he will publish a table showing in respect of each district and county in Wales *(a)* the rate amount per adult for 1988-89, *(b)* the relevant equivalent community charge for 1988-89 and *(c)* the variation of *(b)* from *(a)* in cash terms and proportionate terms; and if he will show for *(a)* above the equivalent rate per adult excluding from rate levies the use of, and rating for, balances and contributions to and from special funds, and for both exclusive and inclusive of community councils' precepts and charges.

Mr. Grist: Illustrative figures for 1988-89 are given in the following table.

The figures for each district and county are averages of the total precepts of all relevant councils in the area and all figures exclude the use of balances.

Average rates per adult are calculated on a theoretical basis which is comparable with the community charge calculations; both assume the same spending levels.

Community charge calculations are based on present needs assessments which are under review and no allowance has been made for transitional safety net arrangements.

Departmental Recruitment and Promotion Policy

Ms. Richardson: To ask the Secretary of State for Wales what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career break due to child care.

Mr. Peter Walker: My Department has implemented the following measures: high age limits for the main recruitment grades; the issue of guidance to members of selection and promotion boards which, inter alia, stresses the need to avoid direct or indirect discrimination on age or other grounds; fields of review for promotion which mean that length of service is not the major factor in determining promotion; staff who take career breaks and are later reinstated do so without any loss of seniority in their grade; and expansion of opportunities for part-time work, including job-sharing arrangements.

School Nurses

Mr. Kirkwood: To ask the Secretary of State for Wales if he will list in the *Official Report*, for each year over the last five up to the latest for which figures are available, the following information with respect to school nurses: *(a)* the total number employed (given as total, whole-time, part-time, and whole-time equivalent), *(b)* the establishment figures and *(c)* the number of vacant posts.

Mr. Grist: There are currently no reliable figures which distinguish school nurses. However, district health authorities are, in conjunction with Welsh Office officials, improving coding procedures to enable information on school nurses in post to be obtained.

Welsh Water Authority (Fish Farm Licences)

Mr. Nicholas Bennett: To ask the Secretary of State for Wales what representations have been received by his Department concerning the granting of fish farm licences by the Welsh water authority to companies established by the authority; what steps have been taken to ensure that the authority will act in an impartial manner in both its planning and regulatory functions in relation to its subsidiaries; and if he will make a statement.

Mr. Peter Walker: I have received correspondence from the owners of one commercial fish farm on the subject of abstraction licences.

The Welsh water authority is a body corporate and the exercise of its planning function is a matter for the authority. Applications for licences to abstract water and consent to discharge effluent which are required by the authority for its own operations would be called in for my determination. There are also rights of appeal to me against the terms of licences and consents which the authority proposes to issue to third parties.

Mr. Nicholas Bennett: To ask the Secretary of State for Wales if he will investigate the circumstances in which the Welsh water authority granted a section 30 consent under the Freshwater and Salmon Fisheries Act on 23 June to Acquanorse plc to place cages in the Llysyfran reservoir; and if he will make a statement.

Mr. Peter Walker: The statutory responsibilities for consents issued under section 30 of the Salmon and Freshwater Fisheries Act rests with the Welsh water authority. I have no locus in the matter.

Political Parties

Mr. Ron Davies: To ask the Secretary of State for Wales what resources of his Department are deployed in maintaining and developing relationships with political parties and their members in *(a)* in England and *(b)* in Wales; and if he will indicate the resources that are devoted to each such party.

Mr. Peter Walker: None.

Civil Servants

Mr. Ron Davies: To ask the Secretary of State for Wales what is the amount of time spent, by percentage, of total hours worked by Welsh Office civil servants, on the analysis on his behalf of political material.

Mr. Peter Walker: I supply the analysis; my Department provides facts.

Mr. Ron Davies: To ask the Secretary of State for Wales what was the approved establishment of the Welsh Office at 1 April and at 1 April for each of the preceding five years; and what was the numbers of civil servants in post, by grade, at those dates.

Mr. Peter Walker: On 1 April each year my Department's manpower ceilings were as follows:

	Staff
1983	2,220
1984	2,195
1985	2,287
1986	2,294
1987	2,278
1988	2,215

I shall write to the hon. Gentleman with the detailed information requested, and will place a copy of my letter in the Library of the House.

Political Literature

Mr. Ron Davies: To ask the Secretary of State for Wales what consultations are undertaken by *(a)* Conservative constituency associations and *(b)* other political groups in England and Wales with his Department, on the factual content of literature produced by them.

Mr. Peter Walker: Wherever I think it necessary.

Mr. Ron Davies: To ask the Secretary of State for Wales if he will list those occasions since June 1987, when his Department has made unsolicited official responses to literature distributed free of charge to the public by political parties in Wales; and if he will indicate for each occasion the nature of the response.

Mr. Peter Walker: So far as I am aware, none.

Mr. Ron Davies: To ask the Secretary of State for Wales when his Department first obtained the copy of the *Caerphilly Labour Herald* issue No. 1, which formed the basis of his letter to the hon. Member for Caerphilly of 15 July.

Mr. Peter Walker: On 9 June 1988.

Mr. Ron Davies: To ask the Secretary of State for Wales if he will place in the Library a copy of his letter of 15 July to the hon. Member for Caerphilly, together with a copy of the *Caerphilly Labour Herald* which was the subject of that correspondence.

Mr. Peter Walker: I have placed a copy of my letter in the Library of the House. It is for the hon. Gentleman to place a copy of the newsletter from his constituency Labour party in the Library of the House if he so wishes.

Mr. Ron Davies: To ask the Secretary of State for Wales (1) if he will list the issues of political literature, held by his Department distributed by *(a)* the Labour party, *(b)* the Conservative party, *(c)* Plaid Cymru and *(d)* the Liberals, Alliance, SLD or SDP, in each case showing that received (i) since the general election of 1987 and (ii) between the general elections of 1983 and 1987;

(2) what is his policy with respect to the purchase by his Department of literature produced by local political organisations;

(3) if it is the policy of his Department to collect systematically literature distributed by political parties in Wales.

Mr. Peter Walker: The Welsh Office places orders for the policy documents of the main political parties, but we do not have regular arrangements for the purchase of literature produced by local political organisations. Detailed lists of publications held could only be provided at disproportionate cost.

Mr. Ron Davies: To ask the Secretary of State for Wales if he will make it his policy to obtain for his Department's library all future issues of the newsletter produced by the Caerphilly constituency Labour party.

Mr. Peter Walker: No. We are not interested in works of fiction.

Mr. Ron Davies: To ask the Secretary of State for Wales what is his estimate of the cost of Civil Service time incurred during the research by his Department into the edition of the *Caerphilly Labour Herald* which was the subject of his correspondence of 15 July to the hon. Member for Caerphilly.

Mr. Peter Walker: £5.

Mr. Ron Davies: To ask the Secretary of State for Wales on how many occasions since June 1987 his Department has carried out analyses of literature distributed free of charge to the public by political parties in Wales; and if he will indicate any subsequent action taken by him in each case.

Mr. Peter Walker: Once, when I wrote to the hon. Gentleman.

Mr. Ron Davies: To ask the Secretary of State for Wales what was the cost to his Department of purchases of literature produced by political parties in Wales during 1987-88; and if he will list such purchases.

Mr. Peter Walker: My Department spent £240 on literature produced by the political parties in Wales last year. £235 of this was accounted for by the purchase of Welsh manifestos prior to the election for the purposes of briefing incoming Ministers.

Water Supplies (Disconnections)

Mr. Wigley: To ask the Secretary of State for Wales how many households in Wales were disconnected from their water supplies in 1987-88.

Mr. Grist: The information is not available in the form requested. In 1987-88 the Welsh water authority disconnected 2,067 properties within their area of supply. Of these, 1,400 were reconnected after payment of bills.

Member's Correspondence

Mr. Ron Davies: To ask the Secretary of State for Wales how many copies of his letter to the hon. Member for Caerphilly of 15 July were made; and if he will list the recipients.

Mr. Peter Walker: Thirty. One copy was sent in reply to correspondence; one was sent to my right hon. Friend the Secretary of State for the Environment; six copies were for internal departmental use and 22 copies were supplied to the lobby correspondents at Westminster representing the Welsh and the main national media in the hope that they would inform the public of the rebates available to people on low incomes so as to eradicate the considerable unfounded fears that have been created in the Caerphilly area.

Mr. Ron Davies: To ask the Secretary of State for Wales what is his estimate of the cost of preparing his letter of 15 July to the hon. Member for Caerphilly and of the additional copies to the press.

Mr. Peter Walker: A total of £24.

Voluntary Organisations (Information)

Mr. Ron Davies: To ask the Secretary of State for Wales whether he will make it his policy to make available the resources of his Department, free of charge, to any voluntary organisation wishing to inform the public of the nature and consequences of recent legislation.

Mr. Peter Walker: Each case is considered on its merits.

Bed-and-breakfast Accommodation

Mr. Simon Hughes: To ask the Secretary of State for Wales what was the number of people in bed-and-breakfast accommodation in Wales, paid for by public funds at the latest date for which statistics are available.

Mr. Grist: The information available relates to numbers of families, not to individuals. On 31 March 1988, there were 59 homeless families in Wales who had been placed in bed-and-breakfast accommodation funded by local authorities.

Housing

Mr. Alan Williams: To ask the Secretary of State for Wales, pursuant to his answers to the hon. Member for Torfaen (Mr. Murphy) of 19 July, *Official Report*, column *564*, how much of the £457 million to be spent on housing in the valleys is accounted for by expenditure allocated to housing within the planning totals set out in the public expenditure White Paper, and what is the figure for each year.

Mr. Peter Walker: Within the £457 million to be spent on housing in the valleys over the next three years, gross public expenditure is expected to be around £225 million. I anticipate that this amount will be spread more or less equally over the three years.

Social Science Research

Mr. George: To ask the Secretary of State for Wales how much has been spent by his Department in each of the past five years on social science research; what percentage this constitutes of total departmental expenditure and of the Department's research budget; and how much of the research has been undertaken *(a)* within his Department *(b)* by universities and polytechnics and *(c)* by independent research organisations.

Mr. Peter Walker *[pursuant to his reply, 27 July 1988]:* The available information relates to gross expenditure on research and development including that performed elsewhere in central Government for R and D in total and for social sciences and humanities. The information is given in the following table:

Research spending

	1982-83	*1983-84*	*1984-85*	*1985-86*	*1986-87*
Departmental expenditure on social science R and D and humanities (£ million)	0·9	0·6	0·7	1·5	2·0
Percentage of total[1] departmental expenditure (per cent.)	0·04	0·02	0·03	0·05	0·07
Percentage of total departmental research spending (per cent.)	1·5	1·6	1·6	2·6	3·5
Expenditure on research[2] undertaken within my Department (£ million)	0·2	0·1	0·1	0·2	0·2
Expenditure on research[2] undertaken by higher education establishments (£ million)	0·2	0·2	0·2	0·3	0·3
Expenditure on research[2] undertaken by industrial research associations and non-industrial research institutes (£ million)	0·3	0·2	0·3	0·9	1·4

[1] Percentage of total expenditure within my responsibility as given in the Government expenditure White Paper.
[2] Figures may not add due to rounding.

Health Spending

Mr. Robin Cook: To ask the Secretary of State for Wales if he will give for each year since 1974 in Wales (i) total National Health Service expenditure, (ii) current expenditure on hospital and community health services, (iii) capital expenditure on hospital and community health services. (iv) expenditure on family practitioner services, (v) expenditure on centrally funded National Health Service services and (vi) expenditure on personal social services; if he will give each *(a)* in cash terms, *(b)* adjusted using the relevant pay and prices index and *(c)* adjusted using the gross domestic product deflator; and if he will place in the Library details of the methods used to make the adjustments.

Mr. Grist *[holding answer 18 February 1988]:* The information requested is set out in the tables. Figures relating to pay and prices terms have been constructed by reference to indices maintained by the Department of Health from English data, as separate pay and prices indices for Wales are not available.

(i) Total National Health Services Gross Expenditure at 1987-88 prices

	£ million cash	*Adjusted by the relevant pay and prices index*	*Adjusted by the GDP deflator*
1974-75	207·0	872·7	761·8
1975-76	278·1	913·8	814·5
1976-77	312·3	909·1	808·1

	£ million cash	Adjusted by the relevant pay and prices index	Adjusted by the GDP deflator
1977-78	353·4	939·3	802·9
1978-79	405·2	970·5	831·6
1979-80	474·9	950·7	833·9
1980-81	611·9	965·0	906·2
1981-82	697·8	1,009·0	940·4
1982-83	769·3	1,035·5	967·9
1983-84	816·4	1,045·8	981·0
1984-85	882·9	1,067·4	1,016·0
1985-86	942·1	1,081·5	1,023·0
1986-87	1,013·5	1,094·6	1,064·5
[1]1987-88	1,129·2	1,129·2	1,129·2

[1] provisional outturn.

(ii) Hospital and community health services: gross current expenditure

at 1987-88 prices

	£ million cash	Adjusted by the relevant pay and prices index	Adjusted by the GDP deflator
1974-75	142·3	598·7	523·7
1975-76	190·0	620·5	556·5
1976-77	216·9	622·5	561·3
1977-78	244·2	645·4	554·8
1978-79	277·1	668·1	568·7
1979-80	329·3	658·9	578·3
1980-81	428·2	669·3	634·2
1981-82	482·6	697·4	650·4
1982-83	521·0	707·0	655·5
1983-84	548·4	708·0	659·0
1984-85	589·3	718·9	678·1
1985-86	629·3	730·0	683·4
1986-87	671·6	728·7	705·4
[1]1987-88	749·4	749·4	749·4

[1] Provisional outturn.

(iii) Hospital and community health services: Gross capital expenditure

at 1987-88 prices

	£ million cash	Adjusted by the relevant pay and prices index	Adjusted by the GDP deflator
1974-75	15·3	56·5	56·3
1975-76	23·1	65·4	67·7
1976-77	18·0	45·5	46·6
1977-78	21·1	46·7	47·9
1978-79	23·7	46·9	48·6
1979-80	24·4	40·0	42·8
1980-81	32·1	41·8	47·5
1981-82	41·4	52·2	55·8
1982-83	47·1	58·5	59·3
1983-84	49·9	60·8	60·0
1984-85	53·3	62·3	61·3
1985-86	55·1	60·8	59·8
1986-87	60·6	63·7	63·7
[1]1987-88	62·9	62·9	62·9

[1] provisional outturn.

(iv) Family Practitioner Services: Gross expenditure

at 1987-88 prices

	£ million cash	Adjusted by the relevant pay and prices index	Adjusted by the GDP deflator
1974-75	46·2	188·2	170·0
1975-76	60·8	193·0	178·1
1976-77	72·3	206·6	187·1
1977-78	82·3	215·8	187·0
1978-79	97·2	225·5	199·5
1979-80	113·0	221·6	198·4
1980-81	142·3	228·1	210·7
1981-82	162·4	234·8	218·9
1982-83	187·9	251·2	236·4
1983-84	202·3	256·5	243·1
1984-85	221·0	262·1	254·3
1985-86	234·2	263·9	254·3
1986-87	252·6	271·0	265·3
[1]1987-88	282·2	282·2	282·2

[1] Provisional outturn.

Note: Includes the costs of the family practitioner services administration and related services.

(v) Centrally financed National Health Services: Gross expenditure

At 1987-88 prices

	£ million cash	Adjusted by the GDP deflator
1974-75	3·2	11·8
1975-76	4·2	12·3
1976-77	5·1	13·2
1977-78	5·8	13·2
1978-79	7·2	14·8
1979-80	8·2	14·4
1980-81	9·3	13·8
1981-82	11·4	15·4
1982-83	13·2	16·6
1983-84	15·7	18·9
1984-85	19·3	22·2
1985-86	23·4	25·4
1986-87	28·6	30·0
[1]1987-88	34·7	34·7

[1] provisional outturn.

Note:

1. Because of the variety and multiplicity of individual budgets it is not meaningful to derive a single inflation factor for this expenditure.

(vi) Personal Social Service: Gross expenditure

at 1987-88 prices

	£ million cash	Adjusted by the relevant pay and prices index	Adjusted by the GDP deflator
1974-75	37·1	132·5	136·5
1975-76	50·4	149·5	147·6
1976-77	57·9	151·6	149·8
1977-78	63·0	150·5	143·1
1978-79	76·9	169·6	157·8
1979-80	92·7	173·4	162·8
1980-81	111·6	173·8	165·3
1981-82	120·3	166·6	162·1
1982-83	131·3	169·6	165·2
1983-84	143·5	176·1	172·4
1984-85	147·8	174·4	170·1
1985-86	155·9	174·1	169·3
1986-87	169·3	180·5	177·8
[1]1987-88	182·1	182·1	182·1

[1] Provisional outturn.

ENERGY

British Nuclear Fuels Ltd.

Mr. Hoyle: To ask the Secretary of State for Energy what is the current budget for trainees at British Nuclear

Fuels Ltd.; what is the estimate for next year's budget; and what is the nature and extent of the future provision for trainees at British Nuclear Fuels Ltd.

Mr. Michael Spicer: This is a management matter for British Nuclear Fuels plc.

UKAEA Training School

Mr. Hoyle: To ask the Secretary of State for Energy (1) if there are any plans for the possible closure of the United Kingdom Atomic Energy Authority's training school at Risley;

(2) whether any studies have been carried out or commissioned concerning the cost-effectiveness of the United Kingdom Atomic Energy Authority's training school at Risley.

Mr. Michael Spicer: This is a management matter for the UKAEA.

Mr. Hoyle: To ask the Secretary of State for Energy what information he has as to the intake at the United Kingdom Atomic Energy Authority's training school at Risley for the academic year starting in September; what has the intake been for the last five years; and whether British Nuclear Fuels Ltd. will continue to send trainees to the training school after 1988.

Mr. Michael Spicer: These are management matters for the UKAEA and BNFL.

Offshore Oil and Gas (Safety)

Mr. Doran: To ask the Secretary of State for Energy (1) what is the definition of serious injury used in the reporting of offshore accidents;

(2) what changes in the definition of serious injury used in the reporting of offshore accidents have been made in the last 10 years;

(3) what changes in the definition of offshore worker used in the reporting of offshore accidents has been made in the last 10 years; and what is the current definition;

(4) what changes in the definition of offshore accidents have been made in the last 10 years; and what is the current definition.

Mr. Peter Morrison: The Offshore Installations (Inspectors and Casualties) Regulations 1973 (SI 1973/1842) require owners of offshore installations to notify me of all casualties or other accidents involving loss of life or danger to life in respect of all persons on offshore installations or attendant vessels, whether or not those persons are working. There are no definitions of 'serious injury', 'offshore worker' or 'offshore accident' in the regulations but owners have been informed that serious injury includes:

(a) Fracture of skull, spine, pelvis, arm, forearm, thigh or leg.
(b) Dislocation of shoulders, elbow, hip, knee or spine.
(c) Amputation of hand or foot, or substantial part of hand or foot.
(d) Loss of sight of an eye.
(e) Other serious bodily injuries, eg. internal haemorrhage, burns asphyxia, bends, or other injury likely to endanger life, cause permanent incapacity for work or substantially impair efficiency.
(f) Any person who suffers such an electric shock or burn, by coming into contact with any conductor in a circuit in which the voltage for the time being exceeds 25, that he requires first aid or medical treatment.
(g) Undue exposure of any person to doses of radiation from radio active materials.

These criteria have not been altered during the past 10 years.

Mr. Doran: To ask the Secretary of State for Energy if he will introduce legislation to extend the provisions of the Building (Scotland) Acts to offshore oil and gas installations.

Mr. Peter Morrison: No. The Offshore Installations (Construction and Survey) Regulations 1974 (SI 1974/289), supported by the guidance notes on design and construction for offshore installations, issued by my Department, set down specific requirements for the design and construction of offshore installations.

Mr. Doran: To ask the Secretary of State for Energy if he will introduce legislation to extend the provisions of the Fire Precautions Acts to offshore oil and gas installations.

Mr. Peter Morrison: No. There are specific requirements for the provision of fire and gas detection systems and for fire-fighting equipment on offshore installations in the Offshore Installations (Fire-Fighting Equipment) Regulations 1978 (SI 1978/611).

Mr. Meacher: To ask the Secretary of State for Energy if he will list the prosecutions in date order brought since 1977 regarding North sea offshore safety requirements; which company or person was prosecuted in each case; what was the exact charge brought in each case; and what was the penalty imposed in each case.

Mr. Peter Morrison *[holding answer 25 July 1988]:* A register of convictions of companies under the provisions of the relevant offshore safety legislation is being assembled in my Department and will be available for inspection by members of the public on appointment from 15 August. If the hon. Member wishes, I shall make arrangements for him to come and inspect it.

AGRICULTURE, FISHERIES AND FOOD

European Community (Membership Consequences)

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food whether he will bring up to date the figures in table 1 of the evidence submitted by Her Majesty's Government to the Treasury and Civil Service Committee on the financial and economic consequences of United Kingdom membership of the European Communities (page 59 of HC57-II, Session 1984-85).

Mr. Donald Thompson: Table 1 of the evidence submitted by Her Majesty's Government to the Treasury and Civil Service Committee on the financial and economic consequences of United Kingdom membership of the European Communities is updated as follows:

Agricultural land prices by land class in England and Wales[1] all properties, both vacant possession and tenanted sales

Year	Average price by predominant grade of land[2] 1 and 2 £/ha	3 £/ha	4 and 5 £/ha	All grades £/ha	Index of average prices of all grades of land[2] In current terms 1967-68 to 1970-71 = 100	In real terms 1967-68 to 1970-71 = 100
1983-84	4,938	3,857	2,225	3,497	732	149
1984-85	5,058	4,006	2,020	3,585	750	148
1985-86	4,320	3,838	2,425	3,499	732	135
1986-87[4]	3,879	3,498	2,224	3,311	653	116

Sources and footnotes [1], [2] and [3] are as in the original table.
[4] Figures for 1986-87 relate to England only as data for England and Wales combined are not available after 1985-86.

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food whether he will bring up to date the figures in tables f1 and f2 of the evidence submitted by Her Majesty's Government to the Treasury and Civil Service Committee on the financial and economic consequences of United Kingdom membership of the European Communities (pages 39-40 of HC 57-II Session 1984-85).

Mr. Donald Thompson: The information requested in respect of table f1 is as shown. Information updating table f2 appears at table 25 in the White Paper on the "Annual Review of Agriculture 1988" (Cm. 299).

Net farm income on full-time farms by farm type: England 1982-83 to 1986-87

	All dairy farms Money terms (£'000)	Index in real terms 1982-83 = 100	All livestock farms Money terms (£'000)	Index in real terms 1982-83 = 100	All cropping farms Money terms (£'000)	Index in real terms 1982-83 = 100	Pig & poultry farms Money terms (£'000)	Index in real terms 1982-83 = 100	Horticultural farms Money terms (£'000)	Index in real terms 1982-83 = 100
1982-83	13·5	103	5·3	110	17·2	103	*11·5	81	*2·3	28
1983-84	7·8	57	4·8	96	20·7	119	*8·7	59	*16·8	198
1983-84	8·3	61	5·2	103	21·5	123	13·4	91	15·2	179
1984-85	8·7	60	4·6	86	21·1	115	33·5	215	7·3	82
1984-85	9·0	62	5·1	97	21·1	116	30·1	193	7·2	81
1985-86	11·4	74	4·1	73	5·2	27	21·8	132	3·2	34
1985-86	12·9	84	4·4	78	4·9	25	20·0	121	3·2	34
1986-87	14·4	91	2·7	46	14·7	73	16·4	96	7·6	78

Source: Farm Business Survey.
Notes: Pairs of years relate to an identical sample of farms. Full-time farms are defined as those of 4 British Size Units (BSU) or more except for farm types asterisked where there is a range of 4-250 BSU. One BSU represents 2,000 ECU of standard gross margin at average 1978-80 values.

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food whether he will bring up to date the figures in table M of the evidence submitted by Her Majesty's Government to the Treasury and Civil Service Committee on the financial and economic consequences of United Kingdom membership of the European Communities (page 56 of HC57-II Session 1984-86).

Mr. Donald Thompson: Estimates are no longer prepared on the basis requested. Detailed information on the incomes, assets and liabilities of farm businesses by farm type and country is contained within the 1988 edition of "Farm Incomes in the United Kingdom", a copy of which is in the Library of the House.

Products (Statistics)

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food whether he will publish in the *Official Report* a table showing for 6 January and for the latest available date the United Kingdom levy/threshold price for products covered by the common agricultural policy, the United Kingdom levy and the world price together with the amount consumed in the United Kingdom in the latest period of 12 months for which figures are available.

Mr. Donald Thompson: The information is set out in the table. I remind the hon. Member that the "world" prices shown are generally the lowest offer prices at the Community frontier which underlie the Commission's calculation of the variable import levies. These prices are the lowest recorded and it is likely that, on average, higher prices would have to be paid if larger quantities were to be purchased on world markets or if suppliers on world markets diminished.

I must caution strongly against drawing conclusions from the information requested.

Levy applicable in the United Kingdom, threshold price and notional "world" price on 6 January and 23 July 1988; supplies for consumption in the United Kingdom; information for the main food items covered by the Common Agricultural Policy

Commodity	6 January 1988 [1]Threshold (or equivalent) price	[2]Levy applicable in UK	[3]Notional "world" price	23 July 1988 [1]Threshold (or equivalent price)	[2]Levy applicable in UK	[3]Notional "world" price	[4]Supplies for human consumption in UK
	£/tonne	£/tonne	£/tonne	£/tonne	£/tonne	£/tonne	'000 tonnes
Common wheat	173	135	51	165	85	88	5,466
Barley	158	126	43	150	65	92	1,967
Maize	158	117	51	163	83	88	1,160

Commodity	6 January 1988 [1] Threshold (or equivalent) price	6 January 1988 [2] Levy applicable in UK	6 January 1988 [3] Notional "world" price	23 July 1988 [1] Threshold (or equivalent price)	23 July 1988 [2] Levy applicable in UK	23 July 1988 [3] Notional "world" price	[9] Supplies for human consumption in UK
	£/tonne	£/tonne	£/tonne	£/tonne	£/tonne	£/tonne	'000 tonnes
Sugar (white)	440	[4]313	140	435	[4]249	196	2,111
Butter (82 per cent. fat)	2,336	[5]1,853	553	2,336	[5]1741	641	266
Cheese (Cheddar)	2,365	1,715	771	2,365	1,615	830	396
Skimmed milk powder	1,302	794	553	1,302	788	541	121
Beef and veal	2,708	[6]1,756	1,138	2,708	[6]1,765	1,075	1,124
Pigmeat	1,412	565	590	1,431	556	616	1,300
Sheepmeat	2,821	[7]	[8]	2,821	[7]	[8]	362
Poultrymeat	1,016	451	696	1,015	401	699	1,022
Eggs	869	293	687	822	571	305	738

Notes to table:

All figures have been rounded to nearest pound.

[1] For commodities for which there is no threshold price the following have been used: beef and veal—guide price converted to deadweight (using a killing out percentage of 53·8 per cent.); pigmeat and sheepmeat—basic price; poultrymeat and eggs—sluicegate prices plus basic levy converted at the green rate.

[2] Levy is net of monetary compensatory amounts. Rates of levy vary for different tariff headings. The rates quoted are: beef and veal and pigmeat—carcase; poultrymeat—70 per cent. chickens; eggs—in shell.

[3] Notional "world" prices have been calculated by subtracting the levy applicable from the "threshold" price. The beef price is also adjusted for duty. For pigmeat, poultrymeat and eggs the "world" price has been taken as the sluicegate price, less supplementary levy, where appropriate. The resulting estimate has been converted from ecu/t at the appropriate market rate of exchange: £0·694909 = 1 ecu on 6 January and £0·656335 = 1 ecu on 23 July.

[4] In practice the United Kingdom's imports from third countries are normally covered by the Lomé convention and enter the Community levy-free.

[5] A special lower rate of levy is applicable to imports of butter from New Zealand.

[6] Most imports of beef from third countries are subject to special arrangements allowing entry at reduced levy rate.

[7] Imports of lamb under voluntary restraint arrangements with principal suppliers and related agreements are subject to a reduced charge of 10 per cent. ad valorem. Any imports outside these arrangements are subject to levies which cannot exceed the 20 per cent. tariff bound in the GATT.

[8] No appropriate "world" price is available.

[9] Total United Kingdom new supplies mainly for human consumption (1987 forecast): the figures for cereals include grains used for brewing, distilling and industrial uses but exclude animal feed. The figures for butter and cheese include all types of these products.

Agricultural Imports

Mr. Austin Mitchell: To ask the Minister of Agriculture, Fisheries and Food whether he will publish in the *Official Report* a table showing the United Kingdom levies on imports of agricultural products from outside the EEC on 6 January and at the latest available date as a percentage of the world price and the intervention price.

Mr. Donald Thompson: The information is set out in the table. I remind the hon. Member that the "world" prices derived for the purpose of this calculation are the lowest recorded and do not represent those which might obtain if larger quantities were purchased from world markets or if supplies on world markets diminished.

United Kingdom levy[1] as percentage of (a) the "world" prices[2] and (b) the intervention price[3] in the United Kingdom

Commodity	6 January 1988 (a)	6 January 1988 (b)	23 July 1988 (a)	23 July 1988 (b)
Common wheat	265	111	97	72
Barley	294	109	70	58
Maize	230	96	94	70
Sugar (white)	223	80	127	64
Butter (82 per cent. fat)	335	89	272	84
Cheese (cheddar)	223	—	195	—
Skimmed milk powder	144	69	146	68
Beef and veal	154	72	164	72
Pigmeat	96	51	90	50
Poultrymeat	65	—	57	—
Eggs	43	—	187	—

[1] The levies taken are at the full rate. In the case of beef, butter and sugar, the United Kingdom obtains a large proportion of its supplies at reduced rates of levy.

[2] "World" prices have been calculated by subtracting the common import levy from the "threshold" price. The beef price is also adjusted for duty. For pigmeat, poultrymeat and eggs the "world" price has been taken as the sluicegate price, less supplementary levy where appropriate.

[3] "Intervention prices" have been defined as:
Common wheat—relevant month's intervention price for bread-making wheat of standard quality.
Barley and maize—relevant month's intervention price.
Sugar—intervention price for white sugar plus storage levy.
Butter—intervention price for 82 per cent. butter.
Skimmed milk powder—intervention price.
Beef and veal—intervention price converted to carcase equivalent using 53·8 per cent. killing out coefficient.
Pigmeat—lowest intervention price.
There are no intervention price for cheddar cheese, poultrymeat and eggs. The intervention prices used will differ in some cases from buying in prices.

Recruitment and Promotion Policy

Ms. Richardson: To ask the Minister of Agriculture, Fisheries and Food what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career break due to child care.

Mr. Donald Thompson: My Department is directly responsible for the recruitment of administrative officers, equivalent grades, and below. Selection panels are instructed on the need to guard against any form of discrimination. Selection criteria based, for example, on sex are strictly forbidden as are criteria which might discriminate on age grounds against mature students or women returning to work following a career break.

All staff have been issued with guidance entitled, "How to cope with changes in domestic responsibilities and still have a job," a copy of which has been placed in the Library. This encourages staff to consider alternatives to

resignation and also contains guidance on rejoining the Civil Service after a period away from work. A scheme designed to give preferential consideration for reinstatement when staff resign for domestic reasons is also under discussion with my Department's trade union side. This will give staff who resign for domestic reasons further encouragement to rejoin my Department when they are ready to return to work, and I hope the scheme will be introduced shortly.

Those responsible for assessing staff for promotion are regularly reminded of the need to guard against any form of discrimination, and to avoid making any assumptions about mobility or length of future service in reaching decisions.

My Department began monitoring the progress of women through all stages of recruitment competitions last year. Monitoring of promotion and allocation to duties will start this year. The need for further action will be considered in the light of the results which emerge.

Advisory Committees

Sir Richard Body: To ask the Minister of Agriculture, Fisheries and Food whether he will give a list of his advisory committees, stating in each case how many members are also members of the National Farmers Union.

Mr. Donald Thompson: The main advisory bodies sponsored by my Department are listed in "Public Bodies 1987," of which a copy is in the Library. Complete information as to how many members are also members of the National Farmers Union is not readily available.

Milk

Mr. Nicholas Bennett: To ask the Minister of Agriculture, Fisheries and Food if he will list the reductions in *(a)* milk production and *(b)* milk quota in each European Community country in 1987-88 as a percentage of (i) national production and (ii) European Community production, together with the cumulative total for all years since 1984.

Mr. Donald Thompson: The information requested is contained in the following tables:

	(i) National Production 1986-87	*(ii) EC 10 Production 1986-87*
Belgium*	−4·3	−0·14
Denmark	−5·7	−0·28
France*	−4·0	−1·02
Germany*	−10·0	−2·39
Greece*	+8·8	+0·04
Ireland	−4·7	−0·26
Italy	+0·9	+0·08
Luxembourg	−5·3	−0·02
Netherlands	−8·0	−0·98
United Kingdom	−5·9	−0·93
EC 10		−5·9
Spain*	−4·0	[1]0·18
EC 11	−4·0	−5·9

[1] Per cent. of EC 11.

Note: Quota in all member states was reduced by 6 per cent. in 1987-88 although this was partially offset in the members states marked with an asterisk by transfers between direct sale and wholesale quota. In addition, Spain was allocated a further 50,000 tonnes of wholesale quota from the Community reserve.

Change in quota (wholesale) between 1986-87 and 1987-88 as a percentage of:

	(i) National Production 1986-87	*(ii) EC 10 Production 1986-87*
Belgium	−5·7	−0·19
Denmark	−6·0	−0·29
France	−5·6	−1·43
Germany	−5·7	−1·37
Greece	−7·1	−0·03
Ireland	−5·7	−0·32
Italy	−6·2	−0·53
Luxembourg	−5·5	−0·02
Netherlands	−5·9	−0·72
United Kingdom	−5·9	−0·92
EC 10	—	−5·79
Spain	−3·9	[1]−0·17
EC 11	−5·71	−5·70

[1] percentage of EC 11

Cumulative change in production between 1983-84 and 1987-88 as a percentage of 1983-84 production:

	Cumulative change
Belgium	− 3·5
Denmark	−12·9
France	− 6·2
Germany	−15·3
Greece	+15·5
Ireland	− 2·9
Italy	+ 3·8
Luxembourg	− 2·7
Netherlands	−13·4
United Kingdom	−12·0
EC 10	− 9·7

Cumulative change in milk production (EC 10) between 1983-84 and 1987-88 compared with difference between 1983-84 production and 1987-89 quota:

Production reduction	*Quota reduction*
9·7	10·1

Note: Data on milk production was obtained from Eurostat, and the latest available information for 1987-88. Wholesale quota allocations were taken from the appropriate EC regulations and include allocations of quota from the Community reserve. The Eurostat figures are for "deliveries to dairies"; this differs slightly from the definition of "wholesale deliveries" for quota purposes so that the Eurostat milk production figures are not strictly comparable with quota.

Farming (National Laws)

Mr. Leighton: To ask the Minister of Agriculture, Fisheries and Food what proposals have been made by the EEC Commission for the harmonisation of national laws on pesticides, insecticides, fertiliser and organic farming; what is the current position of each proposal in relation to EEC Council approval; and if he will make a statement.

Mr. Donald Thompson: As regards EC pesticides (including insecticides), the EC Commission put forward a draft directive harmonising aspects of national laws on the approval of "plant protection products" in 1976. No progress has been made on this text since 1983, and the Commission is understood to be preparing a revised text for discussion.

I am aware that the Commission is working on a draft proposal on the production and marketing of agricultural

products and foodstuffs obtained without the use of synthetic chemicals, but as no proposals have been published I cannot comment any further.

Council directive 76/116 published in 1975 sets certain standards on labelling and composition of some inorganic fertilisers traded between member states. Proposals by the EC Commission to extend these harmonisation measures have included a recent new directive on fluid fertilisers agreed by the Council, and a further proposal for one on secondary nutrients is currently under consideration by the Council.

Butter

Mr. Leighton: To ask the Minister of Agriculture, Fisheries and Food what changes have taken place in the consumption of butter per person in each EEC country since 1973.

Mr. Donald Thompson: Information on butter consumption since 1973 is contained in the Commission publication "The Agricultural Situation in the Community —1987 Report", page T/165. A copy is in the Library of the House.

Set-aside Scheme

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food what provisions he is making under the set-aside scheme to ensure that land set aside which is crossed by public rights of way is kept clear; and if he will make a statement.

Mr. Ryder: Farmers are already required to keep rights of way over their land unobstructed. This will not be affected by their joining the set-aside scheme. The advisory guidelines to be issued shortly will remind farmers of the need to conform to obligations as regards rights of way on their land. Enforcement is a matter for highways authorities.

Bovine Spongiform Encephalopathy

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food if he will list the countries which have banned the import of United Kingdom cattle following the discovery of bovine spongiform encephalopathy in British herds.

Mr. Donald Thompson: Australia and Israel have told us that they will not permit imports of cattle from this country because of bovine spongiform encephalopathy.

Soil Erosion

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food what plans he has to continue to support the joint scheme with soil survey for monitoring soil erosion by aerial photography.

Mr. Donald Thompson: The practical work in the joint scheme with the Soil Survey and Land Research Centre for monitoring soil erosion by aerial photography is now complete. The results are being interpreted and, together with advice from the Priorities Board for Research and Development in Agriculture and Food, will inform decisions on the need for further studies.

Bovine Somatrophin

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food what representations he has received from Waitrose, Tesco and Sainsbury supermarket companies on the subject of bovine somatrophin.

Mr. Donald Thompson: Earlier this year my officials met the British Retailers' Association (whose membership includes various supermarket chains) to discuss the subject.

Disease Eradication Schemes

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food if he will list the percentage valuation payments made in respect of compensation paid to farmers for the various disease eradication schemes.

Mr. Donald Thompson: The compensation payable for animals slaughtered in the event of disease occurring is as follows:

African swine fever (which has never occurred in this country)—if the animal is affected, 50 per cent. of the value immediately before it became affected; if not, the value of the animal immediately before it was slaughtered.

Aujeszky's disease—for all animals slaughtered, their market value immediately before they were slaughtered had they not been affected or suspected or exposed to infection of Aujeszky's disease, up to a maximum of £300. (For Aujeszky's disease the cost of compensation is paid in full from a statutory levy on pig producers).

Bovine spongiform encephalopathy—for an affected or suspected animal an amount equal to 50 per cent. of either

(a) the market value of the animal; or

(b) 125 per cent. of the average price in respect of the month which occurred two months prior to the month in which the market value of the animal was determined rounded down to the nearest multiple of £2,

whichever is the less.

For an animal in which bovine spongiform encephalopathy cannot be confirmed post mortem, an amount equal to either

(a) the market value of the animal; or

(b) 125 per cent. of the average price in respect of the month which occurred two months prior to the month in which the market value of the animal was determined rounded down to the nearest multiple of £2,

whichever is the less.

(The Order providing for compensation in respect of bovine spongiform encephalopathy comes into effect on 8 August 1988.)

Brucellosis—where the slaughtered animal is an affected animal or a reactor an amount equal to 75 per cent. of either

(i) its market value or

(ii) 125 per cent. of the average price in respect of the month which occurred two months prior to the month in which the market value of the animal was determined rounded down to the nearest multiple of £4.

Where the slaughtered animal is not an affected animal or a reactor, an amount equal to either

(i) its market value or

(ii) 125 per cent. of the average price in respect of the month which occurred two months prior to the month in which the market value of the animal was determined rounded down to the nearest multiple of £4.

Cattle plague (which has not occurred in this country since 1877)—if the animal is affected, 50 per cent. of its value immediately before it became affected but not more than £20; if not, the value immediately before it was slaughtered but not more than £40.

Classical swine fever (which is not present in this country)—if the animal is affected, 50 per cent. of the value of the animal immediately before it became affected; if not, the value of the animal immediately before it was slaughtered.

Foot and mouth disease (which is not present in this country)—if the animal is affected, the value of the animal immediately before it became affected; if not, the value of the animal immediately before it was slaughtered.

Pleuro-pneumonia (which has not occurred in this country since 1898)—if the animal is affected, 75 per cent. of the value immediately before it became so affected, but not more than £30; if not, the value immediately before it was slaughtered.

Rabies (which is not present in this country)—where the animal was affected, 50 per cent. of its market value immediately before it became affected; in every other case the market value of the animal immediately before it was slaughtered.

Swine vesicular disease (which is not present in this country)—where the animal was affected, its value immediately before it became affected, in every other case the value of the animal immediately before it was slaughtered.

Tuberculosis—where the slaughtered animal is an affected animal or a reactor an amount equal to 75 per cent. of either

(i) its market value or

(ii) 125 per cent. of the average price in respect of the month which occurred two months prior to the month in which the market value of the animal was determined rounded down to the nearest multiple of £4.

Where the slaughtered animal is not an affected animal or a reactor, an amount equal to either

(i) its market value or

(ii) 125 per cent. of the average price in respect of the month which occurred two months prior to the month in which the market value of the animal was determined rounded down to the nearest multiple of £4.

Environmentally Sensitive Areas

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food if he will give, in respect of each environmentally sensitive area *(a)* the total extent, in hectares, *(b)* the extent of agricultural land, *(c)* the number of farmers eligible to enter into management agreements, *(d)* the number of agreements concluded with farmers and *(e)* the total area of land covered by agreements.

Mr. Ryder: The total area in hectares of each environmentally sensitive area in England is as follows:

	Hectares
Broads	29,870
Somerset Levels and Moors	26,970
South Downs	48,820
Pennine Dales	15,900
West Penwith	7,200
Breckland	88,480
North Peak	50,250
Suffolk River Valleys	38,000
Shropshire Borders	21,360
Test Valley	2,690

The figures are provisional and subject to minor amendment when final measurement and checking has been completed. The extent of agricultural land in each ESA is still being measured and will be presented in the report to Parliament referred to in my answer of today's date. Information on the number of farmers eligible to enter the ESA scheme in each area is not available.

The number of agreements concluded in 1987 and total area of land covered in each ESA are as follows:

	Number	[1]*Area*
Broads	389	6,735
Somerset Levels and Moors	523	7,709
South Downs (East)	58	3,104
Pennine Dales	218	8,130
West Penwith	139	5,552

[1]Hectares.

The other areas were not open for applications until 1988. Applications received in 1988 for all areas are still being processed.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food, in respect of land within each environmentally sensitive area, how many applications have been received from voluntary conservation bodies wishing to enter into management agreements; what is the total area of land involved; how many agreements have so far been concluded with voluntary conservation bodies; and what is the total area of land involved.

Mr. Ryder: The information requested on applications is not available for 1988. In England 11 agreements covering some 570 hectares were concluded with voluntary conservation bodies in 1987. The information could not be given for individual environmentally sensitive areas without risking disclosure of information on individual agreements.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food when he expects to report to the House, in accordance with the requirements of section 18(8) of the Agriculture Act 1986, on the performance of management agreements in environmentally sensitive areas; and whether any such report will describe the steps taken to monitor the effect of the agreements on wildlife and the landscape in each area.

Mr. Ryder: I expect to place a report, as required by section 18(8) of the Agriculture Act 1986, in the Libraries of both Houses by the autumn. The report will describe how the Ministry is monitoring the effects of ESA agreements in England, including on wildlife and the landscape, and will provide statistical information about each ESA.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what contribution he expects to receive from European Community funds towards the costs incurred in 1987 and 1988 in making payments to farmers in environmentally sensitive areas in the United Kingdom.

Mr. Ryder: The European Community will contribute 25 per cent. of the cost of payments to farmers of up to 60 ecu (£39) per hectare in the case of land on which hill livestock compensatory allowances are paid and 100 ecu (£65) per hectare on other land. I expect the contribution to amount to approximately £340,000 in 1987 but it is too early to make a firm estimate for 1988. The United Kingdom is a net contributor to the European Community budget so all payments to this country from the Community are funded by the Exchequer.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food what is his estimate of the savings which will be made in expenditure under the common agricultural policy on commodities produced on farms in environmentally sensitive areas in the United Kingdom in 1987 and 1988.

Mr. Ryder: It is too early to make a reliable estimate. Estimation of such savings will be made as part of the programme of monitoring and evaluation of the environmentally sensitive areas scheme.

Sheep (Radioactive Marking)

Dr. David Clark: To ask the Minister of Agriculture, Fisheries and Food on what date, and in which country or region, in each of the four countries in the United Kingdom, the last sheep were marked blue between 28 September 1987 and 10 January 1988 subsequently re-monitored and tagged for slaughter prior to entering the food chain.

Mr. Donald Thompson: The last dates on which blue-marked sheep were presented for remonitoring were as follows:

	Date
England	8 April 1988
Northern Ireland	15 January 1988
Scotland	22 April 1988
Wales	5 May 1988

All of these sheep were below the action level and tagged so that they were released from slaughter restriction.

Restrictions were lifted from all blue-marked on 1 June 1988.

NORTHERN IRELAND

Sports Clubs (Grants)

Mr. Beggs: To ask the Secretary of State for Northern Ireland what grants were made in each of the last three years to *(a)* rugby clubs, *(b)* soccer clubs, *(c)* hockey clubs, *(d)* cricket clubs, *(e)* athletic clubs and *(f)* the Gaelic Athletic Association; and what provision has been made for specific clubs in the above categories in the 1988-89 financial year.

Dr. Mawhinney: I will write to the hon. Gentleman.

Flooding

Mr. William Ross: To ask the Secretary of State for Northern Ireland what sums are being expended on flood prevention works in Strabane in the current and following financial years.

Mr. Needham: I will write to the hon. Gentleman.

Shootings (Gibraltar)

Sir Eldon Griffiths: To ask the Secretary of State for Northern Ireland if he will call for a report from the Chief Constable of the Royal Ulster Constabulary as to the cost to public funds of the security operation mounted by the Royal Ulster Constabulary in relation to the return of the bodies of Irish Republican Army terrorists killed in Gibraltar, including the cost required to guard their respective homes and to police the funerals.

Mr. Ian Stewart: I will write to my hon. Friend.

Sir Eldon Griffiths: To ask the Secretary of State for Northern Ireland what is his policy as to how the additional costs arising from the police operations in relation to the return of the Irish Republican Army members killed in Gibraltar shall be recouped.

Mr. Ian Stewart: The costs will be contained within existing provisions.

Sir Eldon Griffiths: To ask the Secretary of State for Northern Ireland if he will make available to the police authority and the Royal Ulster Constabulary extra funds to cover the additional costs of policing that arose in relation to the return to Northern Ireland of the three Irish Republican Army members killed in Gibraltar.

Mr. Ian Stewart: In any financial year there will be a number of known and unexpected events which will involve increased police activity. Such matters are taken into account during the preparation of the police authority's estimates.

Gaelic

Mr. Alton: To ask the Secretary of State for Northern Ireland what the status of Gaelic will be in the proposed educational reform; and if he will make a statement.

Dr. Mawhinney: I will write to the hon. Member.

Public Expenditure

Mr. Worthington: To ask the Secretary of State for Northern Ireland if he will publish a further table in the *Official Report*, in the same format as the written reply of 7 July, *Official Report*, columns *733-34*, on receipts classified as charges in respect of his programme expenditure over the years 1982-83 to 1990-91, indicating the receipts in respect of running costs expenditure together with a supplementary analysis indicating, separately, the amounts of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mr. Ian Stewart: I refer the hon. Member to the reply I gave him on 7 July 1988, at columns *733-34*, for the information on charges in respect of programme expenditure. Information on the source of these receipts is not readily available but it is estimated that receipts to the Northern Ireland programme from other public expenditure programmes is minimal.

The information on receipts in respect of running costs expenditure for the years 1987-88 to 1990-91 is shown in the table; the information for the years 1982-83 to 1986-87 is not presently available in the same format and I will write to the hon. Member when the information comes to hand.

Receipts in respect of Northern Ireland running costs expenditure coming from other public expenditure programmes cannot be readily distinguished from receipts coming from one Department to another within the Northern Ireland programme. The figures shown in the secondary analysis in the table therefore contain both elements.

Public expenditure Receipts in respect of running costs expenditure 1987-88 to 1990-91

£ million

	1987-88	1988-89	1989-90	1990-91
Agriculture, Fishery and Forestry Support				
Agency fees etc	3	3	3	3
Trade, Industry Energy and Employment				
Miscellaneous	1	2	2	2
Roads and Transport				
Car Parking	1	1	1	1
Vehicle and Driver Testing and Driver Licensing Fees	4	4	4	4
Agency Services Driver Licensing	2	2	2	2
Environmental and Miscellaneous Services				
Water and Sewerage Charges etc	16	16	17	17
Accommodation Services	11	12	12	12
Planning Service	2	2	2	2
Other Environmental Services	4	5	5	5
Law, Order and Protective Services				
Forensic Science and Other Services	4	4	4	4
Health and Personal Social Services				
Agency Services etc	1	1	1	1
Social Security				
Recoupment from National Insurance Fund for Agency Services	23	27	28	28
Other Agency Services etc	1	1	1	1
Other Public Services				
Computer and Other Recoveries	2	2	2	2
Total	76	83	84	86
of which	[1]38	[1]42	[1]43	[1]45

Notes:
[1] is estimated to relate to running costs expenditure included in public expenditure programmes.
(1) Figures in the table are consistent with Cm. 288.
(2) Individual figures may not sum to totals because of roundings.

Debt (Benefit Reductions)

Ms. Mowlam: To ask the Secretary of State for Northern Ireland if he will publish a table showing the total deduction made from *(a)* invalidity benefit, *(b)* child benefit, *(c)* widows' benefit, *(d)* supplementary benefit, *(e)* unemployment benefit, *(f)* sickness and *(g)* retirement pension in each year 1979 to June 1988, inclusive, under the Payments for Debt (Emergency Provisions) Act (Northern Ireland) 1971.

Mr. Needham: I will write to the hon. Lady.

Anglo-Irish Parliamentary Committee

Mr. Redmond: To ask the Secretary of State for Northern Ireland whether he intends to propose the setting up of an Anglo-Irish parliamentary committee; and what consultations have been undertaken as to the number of hon. Members from each of the political parties who would sit on this committee.

Mr. Tom King: I will write to the hon. Member.

Recruitment and Promotion Policy

Ms. Richardson: To ask the Secretary of State for Northern Ireland what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career break due to child care.

Mr. Ian Stewart: I will write to the hon. Lady.

Blackwater Arterial Drainage Scheme

Mr. Morley: To ask the Secretary of State for Northern Ireland (1) what is the current estimated total cost of the Blackwater arterial drainage scheme; if he will list the sources from which the cost will be met; and if he will list for each of the phases of the Blackwater arterial drainage scheme, the contract number, location and estimated cost, and, for those phases completed, the final cost;

(2) what steps are being taken to monitor the impact of the Blackwater arterial drainage scheme on the wildlife and landscape of the catchment; and if he will summarise the results of such monitoring.

Mr. Viggers: I will write to the hon. Member.

Finn-Lacky Catchment

Mr. Morley: To ask the Secretary of State for Northern Ireland (1) what steps have been taken to survey the wildlife of the Finn-Lacky catchment; if he will list the sites within the Finn-Lacky catchment that qualify for notification as areas of special scientific interest by virtue of their flora, fauna or physiological interest; and, in the event of an arterial drainage scheme for the catchment, if he will prepare an environmental statement under EC directive 85/337;

(2) if he will make a statement on the scheme for the drainage of the Finn-Lacky catchment; if he will estimate the number of hectares of agricultural land whose drainage will be improved as a result of such a scheme; if he will list

the sources from which he anticipates the cost of the scheme will be met; and if he will state the estimated cost of the scheme and the financial benefit he expects to accrue as a result of public investment in it.

Mr. Viggers: I will write to the hon. Member.

Strip Searches (Maghaberry)

Mr. McNamara: To ask the Secretary of State for Northern Ireland how many strip searches were made of female prisoners in Her Majesty's prison, Maghaberry, in June, giving the number of persons involved and number of times each person was searched; if any prison contraband, smuggled item or illegal correspondence was discovered in any search, indicating which items; in how many cases prisoners refused to be searched and had to be restrained while the search was being conducted; and what were the reasons for the search under each of the following headings: *(a)* making a remand appearance at a trial, *(b)* attending trial, *(c)* inter-prison visit or *(d)* other reasons.

Mr. Ian Stewart: The information requested is as follows:

Number of searches	*June*
Total number of searches carried out	25
Total number of inmates searched	16
Number of prisoners searched once	8
Number of prisoners searched twice	7
Number of prisoners searched more than twice	1

Reason for search	*June*
First admission on remand/awaiting trial	5
First admission on sentence/final discharge	12
Attending remand court	—
Attending trial	—
Inter-prison visits	1
Pre-release home leave	7

No prohibited article was found during these searches and no prisoner refused to be searched.

Bed-and-breakfast Accommodation

Mr. Simon Hughes: To ask the Secretary of State for Northern Ireland what is the number of people in bed-and-breakfast accommodation in Northern Ireland paid for by public funds at the latest date for which statistics are available.

Mr. Needham: I will write to the hon. Member.

MacBride Principles

Mr. Livingstone: To ask the Secretary of State for Northern Ireland if, further to his reply to the question from the hon. Member for Brent, East of 22 July, column *873*, he will, whilst not identifying the individuals concerned, break down the total sum of £86,856 into the cost of support to each individual concerned along with any known political or trade union connections of each individual.

Mr. Viggers: I will write to the hon. Member.

Anglo-Irish Intergovernmental Conference (Pub Bombings Cases)

Mr. Mullin: To ask the Secretary of State for Northern Ireland if the Birmingham, Guildford and Woolwich bombing cases were among the subjects discussed at the meeting of the Anglo-Irish Conference; and if he will make a statement.

Mr. Tom King: I will write to the hon. Member.

Royal Ulster Constabulary

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland, pursuant to his answer to the hon. Member for Belfast, South of 27 January, *Official Report*, column *292*, how many of the total days off sick or injured by members of the Royal Ulster Constabulary were attributed to *(a)* injury and *(b)* sickness; and if he will give this information for the last five years, stating average days off per capita.

Mr. Ian Stewart: I regret that there were some statistical errors in the reply that my predecessor gave to the hon. Member on 8 February at columns *85-6*.

The corrected information in respect of the regular RUC is as follows:

	Injury on Duty	*Average per Member*	*Sickness*	*Average per Member*
1983	14,233	1·78	91,388	11·42
1984	17,444	2·15	110,048	13·54
1985	21,351	2·58	111,318	13·48
1986	23,527	2·86	124,780	15·15
1987	23,676	2·87	131,462	15·97

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what information he has as to the number of days off work sick reported for members of the Royal Ulster Constabulary for each of the last five years; and if he will express this as an average figure.

Mr. Ian Stewart: I regret that there were some statistical errors in the reply that my predecessor gave to the hon. Member on 27 January at column *292*. The corrected information is as follows:

The following number of days were lost by members of the regular Royal Ulster Constabulary as a result of sickness and injury on duty for each of the last five years:

	Days lost
1983	105,621
1984	127,492
1985	132,669
1986	148,307
1987	155,138

In 1986, these figures represented an average loss of 18·01 days per member, and in 1987 18·84 days per member.

Marches

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what guidance or advice he has given to

the Royal Ulster Constabulary regarding the re-routing, banning, or imposition of conditions on marches or meetings in Northern Ireland; and what representations he has received from organisations and individuals about the operation of the Public Order (Northern Ireland) Order.

Mr. Ian Stewart *[holding answer 28 July 1988]:* The control of marches and public meetings in Northern Ireland is an operational matter for the Chief Constable of the Royal Ulster Constabulary. Since the Public Order (Northern Ireland) Order 1987 came into force in April 1987, records show that one letter has been received about possible changes to the legislation.

Belfast

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland (1) what is the total amount of expenditure on the building of houses and facilities in the Poleglass estate; what amount has been spent upon maintenance and repairs; what is the total number of dwelling units provided; and if he will express the expenditure as a figure per capita of residents;

(2) what is the amount spent on the erection of new houses by the Northern Ireland Housing Executive in the area defined in "Making Belfast Work" as Catholic West Belfast; what is the amount in maintenance and repairs on such property; what is the amount paid in repair and improvement grants to residents in the area defined as Catholic West Belfast, published by his Department; what is the amount paid to voluntary housing organisations in this area; and what is the amount paid to the Northern Ireland Housing Executive by those who accepted the right to buy their property in the defined area.

Mr. Ian Stewart *[holding answer 28 July 1988]:* These are matters for the Northern Ireland Housing Executive, but I understand from the chairman that the information is not immediately available. I will write to the hon. Gentleman as soon as possible.

Departmental Programmes

Mr. George: To ask the Secretary of State for Northern Ireland how much has been spent by his Department in each of the past five years on the evaluation of departmental programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mr. Stewart *[holding answer 28 July 1988]:* The process of evaluation of my Department's programmes is part of the work itself. It is therefore not possible to identify separately the resources involved.

Nuclear Bunkers

Mr. Hume: To ask the Secretary of State for Northern Ireland if he will make a statement on the three nuclear bunkers to be developed in Northern Ireland, indicating how far work has progressed on each bunker, the expected date of completion of each bunker and the most recent estimate of the total cost of each.

Mr. Ian Stewart *[holding answer 28 July 1988]:* Work is progressing satisfactorily on the first of the three Northern Ireland emergency centres at Ballymena. Work on this centre was started in July last year and is due to be completed in November 1989 at an estimated cost of £3·2 million. No date has yet been scheduled for work to be commenced on either of the other two centres. The most recent estimate for the cost of the other two centres is £2·6 million and £2 million respectively.

Mr. Hume: To ask the Secretary of State for Northern Ireland if he will make a statement indicating what areas are to be served by each of the proposed nuclear bunkers in Northern Ireland; what those services will be; what are the numbers designated to work in each bunker in the event of a nuclear attack; and when the list of those designated to staff these bunkers in the event of a nuclear attack was last updated.

Mr. Ian Stewart *[holding answer 28 July 1988]:* All three emergency centres will function on an integrated basis to provide all essential services to the community of Northern Ireland as a whole. If necessary, each individual centre can provide a comprehensive Provincewide service. Provision has been made for approximately 235 personnel to be designated to the centre currently under construction. It is intended to allocate approximately 260 staff to cover the remaining two centres. The list of those designated to staff the centres is subject to continuous review.

Training Schemes (Belfast)

Mr. Hume: To ask the Secretary of State for Northern Ireland if he will make a statement on Belfast areas of training, detailing the areas involved, the financial commitment, the employment levels involved, its structure and the criteria used in planning the scheme; and what methods and criteria will be used to assess its progress.

Mr. Viggers *[holding answer 26 July 1988]:* Action teams represent an intitiative to focus additional resources to directly benefit areas of multiple deprivation. Areas are selected on the evidence of the Belfast areas of need survey. Each team has a budget of £500,000 per annum, services a population in the region of 15,000 and is charged with the broad objective of identifying the major needs of the area and co-ordinating means of resolution in co-operation with existing agencies and the local community groups. Four teams are presently in operation covering the separate areas of Lower Shankill/Lower Falls, Duncairn/New Lodge, Springfield and Riverside. A further four teams are planned to become operational soon. The Policy Research Institute has been appointed to evaluate the initiative.

Social Science Research

Mr. George: To ask the Secretary of State for Northern Ireland how much has been spent by his Department in each of the past five years on social science research; what percentage this constitutes of total departmental expenditure and of the Department's research budget; and how much of the research has been undertaken *(a)* within his Department, *(b)* by universities and polytechnics and *(c)* by independent research organisations.

Mr. Ian Stewart *[holding answer 27 July 1988]:* The information is as follows:

Year	Departmental expenditure social science research	Percentage total departmental expenditure	Percentage expenditure of departmental research budget	Expenditure within department	Universities or polytechnics	Independent research organisations
	£ million	Per cent.	Per cent.	£ million	£ million	£ million
1982-83	0·7	0·020	7·36	0·6	0·03	—
1983-84	0·8	0·020	5·44	0·7	0·1	0·02
1984-85	0·7	0·017	5·83	0·6	0·1	0·02
1985-86	0·8	0·018	5·40	0·6	0·2	—
1986-87	0·9	0·019	4·86	0·7	0·2	—

Departmental Advertising

Mr. Dobson: To ask the Secretary State for Northern Ireland (1) what was the total spending by his Department on press, public relations and advertising, respectively, in 1987-88;

(2) what is the latest figure for the estimated spending in 1988-89 by his Department on *(a)* TV advertising, *(b)* radio advertising, *(c)* newspaper advertising and *(d)* other promotional material.

Dr. Mawhinney: I will write to hon. Member.

Statistical Divisions

Mr. Dobson: To ask the Secretary of State for Northern Ireland if he will list for 1979, 1984 and the most recent year the numbers of staff by grade in the statistical division in his Department; if he will differentiate between staff in the statistical posts and staff in administrative posts; and if he will give separate figures for the Central Register Office Northern Ireland.

Mr. Ian Stewart *[holding answer 21 July 1988]:* I will write to the hon. Member.

Public Relations

Mr. Dobson: To ask the Secretary of State for Northern Ireland (1) what is the latest figure for the estimated expenditure by his Department on press and public relations during 1988-89;

(2) what is the latest figure for the number of staff presently employed in the press and public relations office of his Department.

Dr. Mawhinney *[holding answers 21 July 1988]:* I will write to the hon. Member.

Computer Work Stations

Mr. Warren: To ask the Secretary of State for Northern Ireland how many computer work stations there are in his Department; what is the ratio of work stations to civil servants; and how he expects this to change over the next five years.

Mr. Ian Stewart: I will write to my hon. Friend.

Information Technology

Mr. Warren: To ask the Secretary of State for Northern Ireland (1) if he will list the composition of the senior information technology strategy committee in his Department; and how many times in the past year its meetings have been attended by Ministers;

(2) how many of the staff in his Department at grades 1, 2 and 3 have attended courses or training on information technology awareness or management in the last 12 months.

Mr. Ian Stewart *[holding answers 21 July 1988]:* I will write to my hon. Friend.

Abortion

Mr. Nicholas Bennett: To ask the Secretary of State for Northern Ireland if he has any plans to seek to legalise abortion in Northern Ireland.

Mr. Needham *[holding answer 15 July 1988]:* I will write to my hon. Friend.

Air Travel (Expenditure)

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what was the expenditure on air travel in each month from 1 January to 30 June for the Northern Ireland Civil Service; and if he will provide figures for the Northern Ireland Office as a whole and broken down by Department; and if he will make a statement.

Mr. Ian Stewart *[holding answer 28 July 1988]:* I will write to the hon. Gentleman.

SCOTLAND

Recruitment and Promotion Policy

Ms. Richardson: To ask the Secretary of State for Scotland what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career break due to child care.

Mr. Rifkind: My Department conducts training courses for members of recruitment and promotion boards which contain elements on the avoidance of discrimination and these are supplemented by written guidance.

Subject to certain conditions, my Department reinstates all applicants who resigned for domestic reasons. Previous service is taken into account for pay and seniority purposes and, in certain circumstances, previous performance assessments count towards eligibility for promotion boards.

My Department has no special measures relating to the recruitment or promotion of mature students.

Police (Special Branches)

Mr. Andrew F. Bennett: To ask the Secretary of State for Scotland how many police officers and civilians are serving in or responsible to the special branches of Scottish police forces, listed by police force.

Lord James Douglas-Hamilton: I shall write to the hon. Member.

Public Expenditure

Mr. Worthington: To ask the Secretary of State for Scotland if he will publish in the *Official Report*, in the same format as his written reply of 7 July, *Official Report*, columns *672-74*, on receipts classified as charges in respect of his programme expenditure over the years 1982-83 to 1990-91, indicating the receipts in respect of running costs expenditure together with a supplementary analysis indicating, separately, the amounts of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mr. Rifkind: Receipts in respect of programme expenditure met from other public expenditure programmes cannot be distinguished within the reply given on 7 July. For running costs expenditure, the information is as follows:

Public expenditure: receipts in respect of running costs expenditure 1982-83 to 1990-91—Scotland Programme[1]

£ million

	1982-83 Outturn	*1983-84 Outturn*	*1984-85 Outturn*	*1985-86 Outturn*	*1986-87 Outturn*	*1987-88 Estimated Outturn*	*1988-89 Plans*	*1989-90 Plans*	*1990-91 Plans*

Borders Region

Mr. Kirkwood: To ask the Secretary of State for Scotland (1) whether consideration has been given to designating the Borders region as eligible for rural development status under heading 5B of the proposed reform of the European Community structural funds;

(2) what representations he has made to the European Community to establish the Borders region as being eligible to qualify for rural development status under heading 5B of the proposed reform of the European Community structural funds.

Mr. Lang: The European Commission has only just agreed its proposals for the detailed eligibility criteria under which rural areas would qualify for objective 5B. We shall need to study these proposals closely. It is therefore too early to say whether Borders region will qualify. The implications of any regional fund assistance for non-assisted rural areas such as Borders, which might divert money away from assisted areas, would need careful consideration.

Rates

Mr. McAllion: To ask the Secretary of State for Scotland what was the average domestic rates bill per household in *(a)* 1979-80 and *(b)* 1988-89 for (i) Aberdeen, (ii) Dundee, (iii) Edinburgh, (iv) Glasgow, (v) Stirling and (vi) Scotland as a whole.

Mr. Ernie Ross: To ask the Secretary of State for Scotland if he will give the average domestic rates bill for each household in *(a)* 1979-80 and *(b)* 1988-89 for (i) Scotland, (ii) Aberdeen, (iii) Dundee, (iv) Edinburgh, (v) Glasgow and (vi) Stirling.

Mr. Lang: The information requested is as follows:

	Average Domestic Rate Bill 1979-80 £	*Average Domestic Rate Bill 1988-89* £
Aberdeen City	161	432
Dundee City	134	486
Edinburgh City	188	603
Glasgow City	138	506
Stirling	158	585
Scotland	149	494

Note:
The 1988-89 average rate bills for Edinburgh and for Scotland have been calculated after taking into account Lothian Regional Council's voluntary rate reduction.

Rating Reform

Mr. McAllion: To ask the Secretary of State for Scotland what is the latest estimated average poll tax bill per person for 1988-89 and 1989-90 for *(a)* Aberdeen, *(b)* Dundee, *(c)* Glasgow, *(d)* Edinburgh, *(e)* Stirling and *(f)* Scotland as a whole.

Mr. Lang: I refer the hon. Member to the answer I gave the hon. Member for Dundee, West (Mr. Ross) on 29 July 1988.

Mr. Salmond: To ask the Secretary of State for Scotland when, pursuant to his answer of 7 July, *Official Report*, column 676, he expects to issue guidance on the procedures involved in determining which individuals are severely handicapped, and thus exempt from liability to pay the poll tax.

Mr. Lang: My right hon. and learned Friend expects to issue guidance to the medical profession on the issue of certificates in respect of the severely mentally impaired for community charge purposes as soon as possible after the relevant Scottish provisions of the Local Government Finance Act come into force in August.

Mr. Ernie Ross: To ask the Secretary of State for Scotland if he will give the estimated average community charge per individual for *(a)* 1988-89 and *(b)* 1989-90 for (i) Scotland, (ii) Aberdeen, (iii) Dundee, (iv) Edinburgh, (v) Glasgow and (vi) Stirling.

Mr. Lang: My reply of 22 March to the hon. Member for Aberdeen, South (Mr. Doran) at column 72, gave estimates of the levels of personal community charge required to replace domestic rate income in each regional, islands and district council area in Scotland in 1988-89. The levels of personal community charge for 1989-90 are a matter for local authorities.

Mr. Allan Stewart: To ask the Secretary of State for Scotland what action he proposes to take to implement the amendments to the Abolition of Domestic Rates, etc. (Scotland) Act 1987 which are being made in the Local Government Finance Act.

Mr. Lang: The Bill has now received Royal Assent, and a commencement order will shortly be made in respect of the provisions relating to Scotland. The necessary regulations will be made thereafter, on a timetable which has regard to the existing timetable for the introduction of the community charge in Scotland, and in particular to the fact that community charges registers will come into force on 1 October. The regulations will be the subject of appropriate consultation.

School Leavers

Mr. McLeish: To ask the Secretary of State for Scotland if he will give the total number of pupils leaving year (S4) in secondary schools in Scotland in each of the years 1979 to 1987, inclusive, and for each of the following destinations: employment, employment with training, non-advanced further education, Government training schemes, remaining at school (S5) and unemployment.

Mr. Michael Forsyth: I refer the hon. Member to my reply to him of Thursday 28 July for information on numbers of pupils leaving S4. The information requested on destinations is not readily available.

Training

Mr. McLeish: To ask the Secretary of State for Scotland (1) if he will list the training programmes *(a)* administered by his Department using the Industry Acts and regional assistance provisions, *(b)* sponsored by the EEC social fund but administered by his Department, *(c)* sponsored by the Scottish Development Agency and *(d)* sponsored by the Manpower Services Commission;

(2) if he will give the total expenditure on all aspects of training programmes *(a)* administered by his Department, *(b)* sponsored by the EEC social fund, *(c)* provided by the Scottish Development Agency and *(d)* provided by the Manpower Services Commission;

(3) if he will give the total amount of expenditure on direct support for industrial training in the current year;

(4) if he will give the total number of *(a)* vacancies at job centres and *(b)* vacancies at careers offices in Scotland in each month between January 1987 and June 1988, inclusive;

(5) if he will give the total expenditure of the Manpower Services Commission in Scotland in each of the years 1979 to 1987, inclusive, and for each client group for each function of the commission.

Mr. Lang: I shall write to the hon. Member.

Mr. McLeish: To ask the Secretary of State for Scotland if he will give *(a)* the total number of places being provided in the new adult training programme in Scotland and *(b)* an estimate of the number of people participating in the programme in each of the years 1988-89, 1989-90 and 1990-91.

Mr. Lang: We plan to provide some 41,000 employment training places in Scotland. With an average expected length of stay of 6 months this should mean provision for around 49,000 participants from September 1988 to March 1989, and around 84,000 participants in each of the two subsequent years.

Housing Allocations (Strathkelvin)

Mr. Galbraith: To ask the Secretary of State for Scotland if he will meet Strathkelvin district council to discuss the housing financial allocations for 1988-89; and if he will make a statement.

Lord James Douglas-Hamilton: My right hon. and learned Friend the Secretary of State for Scotland has no plans to meet the district council. On 31 May, in response to representations from the council, the Secretary of State offered a meeting with officials of the Scottish Development Department to discuss the issue in question; this offer has not been taken up.

Bed-and-breakfast Accommodation

Mr. Simon Hughes: To ask the Secretary of State for Scotland what is the number of people in bed-and-breakfast accommodation in Scotland paid for by public funds at the latest date for which statistics are available.

Mr. Kirkwood: To ask the Secretary of State for Scotland what are the latest figures for the number of people in bed-and-breakfast accommodation in Scotland.

Lord James Douglas-Hamilton: There are no overall figures for the number of persons in bed-and-breakfast accommodation paid out of public funds. However, it is estimated that the number of households placed in bed-and-breakfast accommodation under the provisions of the homeless persons legislation at 31 March 1988 for Scotland was approximately 230.

SHARPEN Report

Dr. Moonie: To ask the Secretary of State for Scotland (1) when he will make the SHARPEN report available to the public;

(2) if he will make available forthwith the Scottish Health Service Planning Council's commentary to him on the SHARPEN report;

(3) when he will be in a position to give the Government's reaction to the recommendations of the Scottish Health Service Planning Council on the priorities to be adopted in the Scottish Health Service, as contained in the foreword to the SHARPEN report.

Mr. Michael Forsyth: I have nothing to add to the statement I made on 16 June at column 208 in reply to a question from my hon. Friend the Member for Tayside, North (Mr. Walker).

Health Boards

Dr. Moonie: To ask the Secretay of State for Scotland with reference to Scottish Office circular NHS 1985 (GEN) 18, for the years 1985-86, 1986-87 and 1987-88, what were the indicative amounts for, and payments made by, each Scottish health board and in total for all boards in respect of support finance; and what are the indicative amounts for each board for 1988-89.

Mr. Michael Forsyth: The information is given in the following table:

£ millions

Board	*1985-86*		*1986-87*		*1987-88*		*1988-89*
	Indicative Level	*Payments*	*Indicative Level*	*Payments*	*Indicative Level*	*Payments*	*Indicative Level*
Argyll and Clyde	·273	·004	·284	·058	·295	·035	·308
Ayrshire and Arran	·227	·025	·237	·047	·246	·142	·257
Borders	·154	·273	·190	·097	·153	·103	·149

Western Isles	·176	·192	·183	·150	·148	·140	·103
Total	6·015	2·854	6·095	4·225	5·208	3·735	4·725

Dr. Moonie: To ask the Secretary of State for Scotland how many memoranda of agreement between itself and other bodies has each health board submitted annually under paragraph 36 of Scottish Office circular NHS 1985 (GEN) 18; and what are the project titles.

Mr. Michael Forsyth: The information is as follows:

Memoranda of agreement

Year	*Health board*	*Body*	*Title*
1986	Greater Glasgow	Strathclyde Regional Council	East End mental health project—Easterhouse
1986	Greater Glasgow	Strathclyde Regional Council	Supported accommodation project
1986	Greater Glasgow	Strathclyde Regional Council	Joint care scheme
1986	Orkney	Orkney Islands Council	Day Centre/Hospital for the elderly—in Kirkwall
1986	Orkney	Orkney Islands Council	As above with link corridor to local authority residential home—in Stromness
Total = 5			
1987	Greater Glasgow	Strathclyde Regional Council	Fountainview Hostel (Quarrier's Homes)
1987	Lothian	WASP	Maintenance of existing service of 10 year duration for agoraphobics and others with severe anxiety problems
1987	Lothian	NUCLEUS	NUCLEUS—Counselling and support services for mentally handicapped children and their families
1987	Lothian	Scottish Council on Disability	Disability information dissemination in the Lothians
1987	Lothian	Edinburgh Association for Mental Health	Community Care
1987	Lothian	Granton Community Health Project	Granton Community Health Initiative
1987	Lothian	Garvald Training Centre	Garvald Community Enterprises
1987	Lothian	Lothian Play Forum	Special Needs Playscheme/Equipment
1987	Lothian	Disablement Income Group	Welfare Benefit Advisory Service in Hospitals
1987	Lothian	Craigshill Good Neighbour Network	Craigshill Daycentre for Confused Elderly, Livingston
1987	Lothian	St. Michael's Hospital Day Care Centre Committee	St. Michael's Hospital Day Care Centre
1987	Lothian	Southside Community Care Project	Pleasance Social Centre, Edinburgh
Total = 12			

Year	Health board	Body	Title
1988[1]	Ayrshire and Arran	Scottish Association for Mental Health (Supported Accommodation) Ltd.	Saltcoats Supported Accommodation
1988[1]	Ayrshire and Arran	Scottish Association for Mental Health (Supported Accommodation) Ltd.	Ayr Supported Accommodation
1988[1]	Lothian	Haddington and District Day Centre Committee	Haddington and District Day Centre
1988[1]	Lothian	Crossroads Care Attendant Scheme	Crossroads Care Attendant Scheme—Bathgate/Whitburn Area
1988[1]	Lothian	Midlothian Local Health Council	Midlothian Mental Health Project—Community Development Worker
Total = 5			

[1] To date.

Dr. Moonie: To ask the Secretary of State for Scotland what information is available in respect of jointly financed projects entered into under Scottish Office Circular NHS 1985 (GEN) 18, particularly the number, cost to the National Health Service and local authorities, types and distribution of projects.

Mr. Michael Forsyth: No information is available centrally from health boards. A study of local authority participation is in train but an analysis of the results has not yet been completed.

Licensing (Convictions)

Mr. Menzies Campbell: To ask the Secretary of State for Scotland (1) how many convictions there have been in the last five years for which information is available for contraventions of section 2, section 7(3), section 19(1), section 29(2), section 33(4) and (5), section 34(3) and (6), section 36(3), section 38(4), section 41(1), section 41(3), section 50(6), and section 54(1)*(a)* and *(b)* of the Licensing (Scotland) Act 1976;

(2) how many convictions there have been in the last five years for which information is available for contraventions of section 57(7) and (8), section 58(7), section 58(8), section 59(7), section 64(6), section 68(1), (2), (3) and (5), section 69(1) and (2), section 70(1), section 72(1) and section 73(1) of the Licensing (Scotland) Act 1976;

(3) how many convictions there have been in the last five years for which information is available for contraventions of section 84, section 85, section 86, section 87(1)*(a)* and *(b)*, section 88, section 89, section 90*(a)*, *(b)* and *(c)*, section 91(1)*(a)* and *(b)*, section 91(2) and (3), section 92(1), section 92(2) and section 93 of the Licensing (Scotland) Act 1976;

(4) how many convictions there have been in the last five years for which information is available for contraventions of section 94(1), section 95, section 96*(a)*and *(b)*, section 97(1), (2), (3) and (4), section 98(1) and (2), section 99*(a)* and *(b)* of the Licensing (Scotland) Act 1976.

(5) how many convictions there have been in the last five years for which information is available for contraventions of section 100*(a)* and *(b)*, section 101(1) and (2), section 103, section 111, section 112(1) and (3), section 113, section 114(2), section 119 section 120(1) and (2), section 120(7), section 123(2) of the Licensing (Scotland) Act 1976.

Lord James Douglas-Hamilton: The available information is given in the table. I regret that it is not possible to provide statistics in the precise format requested. Section 50(6) was repealed by the Local Government (Miscellaneous Provisions) (Scotland) Act 1981 and section 94(1) by the Finance Act 1981.

Number of persons with a charge proved under the Licensing (Scotland) Act 1976

Sections	1983	1984	1985	1986	1987
54 and 83	57	35	39	24	29
57 and 95	1	4	3	8	—
68(1)	75	114	90	106	113
68(2)	136	103	77	116	130
68(3)	50	56	50	42	47
72 and 73	2	1	2	—	—
74	15	19	27	14	19
77	9	9	5	5	7
78(1) and 79	80	82	95	84	65
78(2)	2	—	2	2	2
81	—	—	1	—	1
82	—	5	—	2	—
87	1	1	1	1	—
90(a) and 90(b)	4	11	8	4	3
90(c)	4	2	2	1	3
92	15	6	9	4	1
97(2)	—	1	2	—	—
97(1), (3), (4) and 98 to 101	1	4	2	6	4
Other offences by licensees	37	27	20	10	15
Other offences (not licensee)	28	24	27	25	21

Notes:

1. Convictions under section 85 cannot be distinguished from other offences involving the obstruction of a constable in pursuance of his duty and are excluded from the table.
2. The category "other offences (not licensee)" may include convictions under the Licensed Premises (Exclusion of Certain Persons) Act 1980.

Health Services

Mr. Robin Cook: To ask the Secretary of State for Scotland if he will give the figures in his reply of 12 July, *Official Report*, column *114*, as deflated by the health services pay and prices indices or the personal social services index as appropriate in the manner of his replies to the hon. Member for Oldham, West (Mr. Meacher) of 19 January 1987, *Official Report*, column *395-96*, and 14 November 1986, *Official Report*, column *397-98*.

Mr. Michael Forsyth: As I have already indicated to the hon. Member, most recently in a letter dated 30 March 1988, no separate index has been constructed which relates to the movement of pay and prices within the Health Service in Scotland. The Department of Health maintains indices for pay and price movements in England but the composition of expenditure on hospital and community

health services in Scotland—particularly the proportions accounted for by the various categories of staff costs—will differ from England; and on various items, such as rates and electricity, there tend to be marked variations in the changes in costs north and south of the border.

Rate Support Grant

Mr. Ron Brown: To ask the Secretary of State for Scotland what was the rate support grant for Scotland *(a)* in 1978-79 and *(b)* in 1988-89, in 1988-89 money.

Mr. Lang: The total of rate support grant for Scotland was £2,232 million in 1978-79 and £2,038 million in 1988-89, both in 1988-89 prices.

Caledonian MacBrayne Ferries

Mr. Home Robertson: To ask the Secretary of State for Scotland if his Department has been involved in any discussions with P and O Ltd. about the future of Caledonian Macbrayne ferries in connection with his plans to privatise the Scottish Transport Group.

Lord James Douglas-Hamilton: I shall write to the hon. Member.

YTS and Community Programme

Mr. McLeish: To ask the Secretary of State for Scotland if he will give the total number of places on the YTS and community programme in Scotland at the most recent date for which figures are available, broken down by local authority, nationalised industry, public sector, industry and commerce, voluntary sector and health boards.

Mr. Lang: The information is not available in the precise form requested. Figures for authorised places in Scotland at 30 June 1988 for YTS are given in table 1 and for community programme in table 2.

Table 1
YTS: Authorised Places at 30 June 1988

	Number
Local authorities and health boards	18,331
Other public sector (including nationalised industries and skillcentres)	1,399
Industry and commerce and other private sector	39,840
Voluntary sector	2,175
	61,745

Table 2
Community Programme: Authorised Places at 30 June 1988

	Number
Local authorities	20,650
Nationalised industries	130
Private sector	219
Voluntary sector	15,160

Scottish Homes (Chairman)

Sir Hector Monro: To ask the Secretary of State for Scotland whether he is able to announce his decision on the appointment of a chairman-designate of Scottish Homes; and if he will make a statement.

Mr. Rifkind: I am pleased to announce that, subject to parliamentary approval of the Housing (Scotland) Bill, I propose to appoint Sir James Mellon KCMG to be the first chairman of Scottish Homes. Sir James will serve as chairman-designate until the legislation is enacted and the provisions in part I of the Bill setting out the arrangements for the establishment of Scottish Homes are brought into force by commencement order. Thereafter, Sir James will be chairman for the period to 31 March 1993.

I am delighted that Sir James has accepted this appointment. I have no doubt that, as a Scot who has had a distinguished career in the diplomatic service, involving a special interest in commercial and industrial matters, he has the qualities necessary to ensure that Scottish Homes will make a major contribution to the provision of housing in Scotland and to the environmental and economic regeneration of Scotland.

South of Scotland Electricity Board

Mr. Bill Walker: To ask the Secretary of State for Scotland what progress has been made by the South of Scotland electricity board in following up the report on the board by the Monopolies and Mergers Commission published in August 1986; and if he will make a statement.

Mr. Rifkind: I have now received the second response of the SSEB to the MMC report published in August 1986. This describes progress and the steps taken by the board to meet the Commission's conclusions. I have placed copies in the Library. The board has responded in a constructive way to the MMC's recommendations and good progress has been made since my statement to the House on 7 April 1987 on the SSEB's initial response.

I am encouraged by the initiatives taken by the board to reduce its meter reading billing and collection costs and its level of outstanding debt by the introduction of power-card registers and special payment schemes. Tight cost reduction targets have been applied to the board's budgets, and at the same time the board has made significant progress with the quality assurance programme and in setting targets for quality of service in relation to electricity supplies. Good progress has also been made in drawing up an assessment system for allocating priorities and resources for distribution network refurbishment and in preparing an investment appraisal manual.

I am satisfied that the board has picked up and pursued the points that concerned me in its initial response particularly in relation to staffing surpluses and adjustments to the tariff structure. The board has, however, decided against setting separate targets for contracting and appliance retailing. I consider that in due course this will be a matter for the privatised company to determine in the light of its commercial judgment. Meantime, I am pleased to note the improved profitability of this part of the board's activities.

I am grateful to the MMC for a very helpful and constructive report. The action outlined in this response which has been taken by the board to implement the MMC's recommendations to improve performance and increase cost-effectiveness will stand the board in good stead as it prepares itself to operate successfully in the private sector.

Education (Expenditure)

Mr. McLeish: To ask the Secretary of State for Scotland if he will give the total amount of expenditure on education by central Government and of education authorities in Scotland in cash and real terms in each of the years 1979 to 1987, inclusive.

Mr. Michael Forsyth *[holding answer 28 July 1988]:* I shall write to the hon. Member.

SDA Investments

Mr. Salmond: To ask the Secretary of State for Scotland if he will list Scottish Development Agency investments in companies in *(a)* Scottish constituencies and *(b)* Scottish districts since November 1984.

Mr. Ian Lang *[holding answer 16 June 1988]:* Information on the number of companies in which the Scottish Development Agency has invested cannot be provided on a constituency and district basis without incurring disproportionate cost. However, the table sets out the total value of SDA investments by Scottish constituencies and districts over the four financial years 1984-85 to 1987-88.

Scottish Development Agency investments in companies by Scottish constituencies: 1984-1988

Labour Statistics

Mr. McLeish: To ask the Secretary of State for Scotland what was the total number of long-term unemployed leaving the register in Scotland and in each travel-to-work area for each month between January 1987 and June 1988 inclusive.

Mr. Lang *[holding answer 21 July 1988]:* The number of claimants who had been unemployed for over 52 weeks and left the count in Scotland and in each travel-to-work area for each month between January 1987 and June 1988, excluding those whose departure was recorded manually, is shown in the following tables. Complete monthly totals on a Scotland and travel-to-work area basis could be obtained only at dispropoftionate cost.

This information is available in the Library.

Claimants unemployed for more than 52 weeks leaving the count (excluding manually recorded departures)

Departmental Staff

Mr. Dobson: To ask the Secretary of State for Scotland if he will list for 1979, 1984 and the most recent year the numbers of staff by grade in the statistical divisions in his Department; if he will differentiate between staff in the statistical posts and staff in administrative posts; and if he will give separate figures for the General Register Office of Scotland.

Mr. Rifkind *[holding answer 21 July 1988]*: The information is set out in the tables:

Scottish Office

	1979	*1984*	*1988*
Professional grades			
Grade 5	2	2	2
Grade 7	10	12	13
Asst./Senior Asst. Statistician	13	10	10

Total	104	46	50

National Health Service Expenditure

Mr. Andrew Welsh: To ask the Secretary of State for Scotland if he will publish a table showing total Scottish Health Service costs for each year from 1974-75 to 1986-87, including revenue expenditure, capital expenditure and expenditure on primary care; and if he will give a breakdown of this figure by health board.

Mr. Michael Forsyth *[holding answer 26 July 1988]:* The information requested is set out in the tables. Table 1 gives a breakdown of expenditure in cash terms in the form requested. Table 2 shows the amounts spent by individual health boards over the same period.

Table 1
Gross expenditure in the National Health Service in Scotland

£ million cash

	Total National Health Service expenditure	*Total revenue expenditure*[1]	*Total capital expenditure*[1]	*Family practitioner services expenditure*
1974-75	453	340	33	80

Footnote: Figures represent total expenditure by health boards only (on hospital and community health and on family practitioner services) and do not therefore correspond to the totals given in Table 1.

Social Science Research

Mr. George: To ask the Secretary of State for Scotland how much has been spent by his Department in each of the past five years on social science research; what percentage this constitutes of total departmental expenditure and of the Department's research budget; and how much of the research has been undertaken *(a)* within his Department, *(b)* by universities and polytechnics and *(c)* by independent research organisations.

Mr. Lang *[holding answer 27 July 1988]:* The information is as follows:

Gross expenditure on R and D: Scottish departments

£ million

	1982-83	*1983-84*	*1984-85*	*1985-86*	*1986-87*
R and D on social science and humanities[1]	1·4	1·4	[2]5·3	4·9	5·1
Percentage of departments' total research budget	(3·3)	(3·0)	(9·9)	(9·1)	(9·5)
Percentage of total departmental expenditure	(0·02)	(0·02)	(0·07)	(0·07)	(0·07)
Performed by:					
a. Scottish departments	0·8	0·9	1·1	0·6	0·6
b. Higher education institutions	0·4	0·4	2·9	2·5	2·7
c. Industrial research associations and non-industrial research institutes	0·01	—	0·9	1·5	1·6

Notes:

[1] The available information including elements performed elsewhere in Central Government and embraces the humanities as well as social science.

[2] Figures from 1984-85 reflect inclusion of R and D funded mainly by the Scottish Education Department which was not recorded in earlier years as part of this survey.

DEFENCE

Self-loading Military Rifles

Mr. William Ross: To ask the Secretary of State for Defence what information he has as to whether any rifle competitions were fired at Bisley in the current year in which self-loading military rifles were used by competitors.

Mr. Freeman: Bisley ranges are the property of the National Rifle Association. All service rifle meetings held at Bisley use self-loading rifles. The use by civilians of the ranges is a matter for the National Rifle Association.

Transport

Mr. Austin Mitchell: To ask the Secretary of State for Defence whether he will consider the privatisation of the services' facilities for the transport of goods in the United Kingdom other than are required by fighting formations at divisional level and below; and if he will include in the *Official Report* a table showing the numbers of goods vehicles owned by each service which are not in the excluded category, the number of officers and other ranks in each grade in each service required to manage, operate and service them, the total cost including all administrative overheads, pension provision, and so on, the tonnage of goods moved and the all-in cost per ton-mile of the goods transported.

Mr. Freeman: Work is currently in hand to examine the cost effectiveness of the freight distribution systems which are operated and manned by the services in the United Kingdom to see what further improvements might be made. This includes a review of the costs of operating these systems which will take some time to complete. In the meantime, the financial and operating information is not available in the form requested. In due course we plan to examine the feasibility of seeking commercial bids for the operation of part or all of the systems.

City of London (Land Holdings)

Mr. Austin Mitchell: To ask the Secretary of State for Defence what is the area in square metres of the land owned and occupied by his Department in the City of London; how much of this is open space; and what is its estimated value for office development.

Mr. Freeman: The Ministry of Defence does not own any land in the City of London.

Salisbury Plain

Sir Charles Morrison: To ask the Secretary of State for Defence if he will give details of any plans or proposals he has for increasing the size of the Salisbury plain training area.

Mr. Freeman: It is Ministry of Defence policy to purchase suitable additional land which becomes available to improve the Salisbury plain training area, and specific proposals would be discussed with the local planning authority at the time; no proposals are at present the subject of such consultation. We look carefully at opportunities, when presented, to add land to the training area to provide buffer zones to separate training and private land and these continue to be let for agriculture.

Greenham Common

Ms. Richardson: To ask the Secretary of State for Defence whether any compensation is envisaged to the people of Newbury for the permanent loss of common land at Royal Air Force Greenham Common as a public recreational area in the event of compulsory extinction of commoners' rights.

Mr. Freeman: Compensation will be payable to those whose rights of common are being legally extinguished at RAF Greenham Common. The general public have no right of access to the land concerned, the freehold of which is held by the Secretary of State for Defence.

Ms. Richardson: To ask the Secretary of State for Defence what repair work to fences and structures on common land at Royal Air Force Greenham Common is currently being undertaken.

Mr. Freeman: I refer the hon. Member to the answer given by my hon. Friend the Minister of State for the Armed Forces on 13 July 1988 at column *238*. In accordance with normal procedures, maintenance and repair work to the fences and structures at Royal Air Force Greenham Common is undertaken as and when necessary.

Service Personnel (NHS)

Mr. Austin Mitchell: To ask the Secretary of State for Defence whether he will make it his policy to use National Health Service facilities for the medical examination and treatment of service personnel in the United Kingdom; and if he will include in the *Official Report* a table showing for each hospital or other medical establishment in each service the number of officers and other ranks by grade needed to manage, operate and service them, the total cost including all administrative overheads, pension provision and so on, the throughput in terms of the number of hospital bed-nights and out-patients treated, and any other measure of productivity used in the National Health Service.

Mr. Freeman: No. Service men will continue to be treated in service hospitals as part of the hospitals staff training for their war role. I refer the hon. Member to the information given in the "Statement on the Defence Estimate 1988 (2)" sections 5.1, 5.2 and 5.3.

Defence Act 1854

Mr. Cohen: To ask the Secretary of State for Defence when he will answer the question tabled for ordinary written answer on 10 June by the hon. Member for Leyton on the subject of use of the Defence Act 1854 by his Department since 1979.

Mr. Freeman: I apologise to the hon. Member for the delay in answering his question which was due to an administrative oversight. The question has now been answered.

Trident

Mr. Cohen: To ask the Secretary of State for Defence if he will make a statement on the consequences for the British Trident programme of the latest failure of a United States Trident missile.

Mr. Sainsbury: There are no consequences for the British Trident programme as a result of the most recent Trident D5 missile flight failure in the United States. This was only the second failure in 13 launches. This continues to represent a very high success rate for such a development programme. The cause of the failure is under investigation by the United States authorities and their initial view is that there will be little effect on the United States Trident II missile test programme.

Fylingdales

Mr. Cohen: To ask the Secretary of State for Defence if he will give *(a)* the date of commencement of works on the phased array radar to be built at Fylingdales, *(b)* the expected date of completion of these works and *(c)* the expected date of start of operations of the phased array radar at Fylingdales.

Mr. Freeman: On present plans work on the modernisation of the ballistic missile early warning system at RAF Fylingdales should start on site in mid 1989 and finish in mid 1991. The modernised radar should be operational by autumn 1992.

Mr. Cohen: To ask the Secretary of State for Defence what unit of United States Space Command is responsible for collating the information obtained by the Fylingdales ballistic missile early warning station in its role as part of the space surveillance network.

Mr. Hamilton: Collation of this information is carried out in the space surveillance centre at Cheyenne Mountain air force station, Colorado Springs, a unit of United States Space Command.

Space Tracking and Communications Systems

Mr. Cohen: To ask the Secretary of State for Defence what are the connections between the deep space tracking station proposed for construction at RAF Feltwell and the United States Milstar communications system.

Mr. Freeman: I understand there is no connection between the United States Milstar communications system and the deep space tracking station to be built at RAF Feltwell.

AE Services Ltd.

Mrs. Golding: To ask the Secretary of State for Defence if he will make a statement on the rôle played by AE Services Ltd. on the promotion of the sale of Westland W30 helicopters with the assistance of his Department.

Mr. Sainsbury: My Department has had no dealings with AE Services Ltd. in relation to the sale of Westland W30 helicopters.

F111 Aircraft (Noise)

Mr. Corbyn: To ask the Secretary of State for Defence if he will list the total number of representations received since 1985 on the noise levels of F111 United States air force planes at bases in the United Kingdom.

Mr. Freeman: Records are not maintained in a way which would enable us to provide a list of the total number of representations which have been received concerning the noise specifically of F111 aircraft since 1985.

Non-British Service Men (Training)

Mr. Corbyn: To ask the Secretary of State for Defence if he will list the total number of non-British service men undergoing training at Her Majesty's defence establishment per country each year since 1979.

Mr. Freeman: This information is confidential between Her Majesty's Government and the Governments of the countries concerned.

Saudi Arabia

Mr. Corbyn: To ask the Secretary of State for Defence what conditions of use have been put on the planes to be supplied to Saudi Arabia under the recently approved sales deal.

Mr. Sainsbury: I will write to the hon. Member.

Chile (Royal Navy Visits)

Mr. Corbyn: To ask the Secretary of State for Defence how many visits to Chilean ports have been made by Royal Navy vessels in each year since 1979.

Mr. Archie Hamilton: Royal Navy vessels have made the following number of visits to Chilean ports in each year since 1979:

Year	*Visits*
1979-1981	Nil
1982	1
1983	4
1984	1
1985	3
1986	4
1987	3
1988 (to date)	4

Nuclear Submarines (Purchase)

Mr. Terry Fields: To ask the Secretary of State for Defence what information he has on the progress of negotiations with the Canadian Government on the purchase from VSEL Nuclear Submarines of Trafalgar class vessels; when he expects any deal to be concluded; and if he will make a statement.

Mr. Sainsbury: I understand that the Canadian Government are still considering the options for purchasing nuclear-powered submarines. We continue to believe that the Trafalgar class vessels meet the Canadian operational requirement in all key respects.

KMS

Mr. Foulkes: To ask the Secretary of State for Defence what part his Department has played in procuring or assisting in the publication of advertisements for KMS.

Mr. Sainsbury: I will write to the hon. Member.

Search and Rescue (RAF Brawdy)

Mr. Nicholas Bennett: To ask the Secretary of State for Defence if he will give details of *(a)* the number of

callouts, *(b)* the number of military personnel rescued and *(c)* the number of civilian personnel rescued, in 1984, 1985, 1986, 1987 and in 1988 to date by the search and rescue detachment based at RAF Brawdy, Pembrokeshire.

Mr. Freeman: I will write to my hon. Friend as soon as possible.

United States Forces (Exercises)

Mr. Cohen: To ask the Secretary of State for Defence how many members of United States forces will be involved in the home defence exercises to be held in September and October; and for what purposes.

Mr. Archie Hamilton: I will write to the hon. Member.

Nuclear Weapons (Definition)

Mr. Cohen: To ask the Secretary of State for Defence if he will give his Department's general definition of *(a)* tactical, *(b)* sub-strategic and *(c)* strategic with reference to nuclear weapons; and if he will indicate how those definitions apply to (i) tactical air-to-surface missiles, (ii) short range attack missiles, (iii) stand-off missiles, (iv) air-launched cruise missiles and (v) strategic air launched cruise missiles.

Mr. Archie Hamilton: I will write to the hon. Member.

West Queensway

Sir Michael McNair-Wilson: To ask the Secretary of State for Defence why his Department did not arrange for a Treasury minute to be laid before Parliament before the transfer took place of West Queensway to the Government of Gibraltar.

Mr. Freeman: As part of the 1983 agreement on the transfer of the dockyard to the Government of Gibraltar, which the then Under-Secretary of State for Defence Procurement announced in the House on 27 July 1983, it was agreed that to aid economic development and diversification, an area of West Queensway (comprising some 4¼ acres including the NAAFI HQ, Imperial Court, the PSA exchange stores, the Army Watermanship training centre and the Queensway Club) would be transferred once the MOD facilities had been reprovided. Difficulties arose over the proposal to release the area and protracted negotiations with the Government of Gibraltar then followed before agreement upon mutually acceptable terms were reached earlier this year. The MOD facilities have been reprovided, the area was transferred on 1 June 1988 in line with the 1983 agreement.

The area is of no realisable value to the Ministry of Defence as, under the terms of the 1983 Lands Memorandum, surplus Crown land and property (with the exception of property which is less than 60 years old) is to be transferred to the Government of Gibraltar free of charge. Nevertheless, this case is of an unusual nature and my Department should have followed the normal practice for notifying Parliament of proposals to make such gifts. The practice in such cases is for the Department proposing to make the gift to arrange with the Treasury for a Minute to be presented to the House of Commons giving particulars of the gift and explaining the circumstances; and for assent to the gift to be withheld until 14 days (exclusive of Saturdays and Sundays) after the issue of the Minute, except in cases of special urgency.

I very much regret that the Ministry of Defence did not follow the correct procedure in this case, but nevertheless went ahead with the gift. A Minute covering the remaining areas of the gun and ordnance wharves, the transfer of which will complete the purchase, will be laid before the House immediately after the summer recess.

COBRA Project

Mr. Wilkinson: To ask the Secretary of State for Defence whether he will make a statement on his most recent discussions with Dr. Scholz, the Defence Minister of the Federal Republic of Germany, about the COBRA project; and whether he is now in a position to announce the initiation of the development phase of this programme.

Mr. Sainsbury: I will write to my hon. Friend.

Gibraltar Inquest

Mr. Hayes: To ask the Secretary of State for Defence if he will make a statement about the attendance of security forces witnesses at the forthcoming inquest in Gibraltar.

Mr. Younger: All concerned wish to co-operate as fully as possible with the coroner. At the same time the Government have a responsibility to ensure that the personal security of witnesses is not put at risk. A final decision whether or not the witnesses should be advised to attend the inquest will be taken immediately before the inquest opens in the light of an up-to-date assessment of the security risk. At present, however, the intention of Her Majesty's Government and of witnesses is that they will go.

Sea Cadet Missiles

Mr. Campbell-Savours: To ask the Secretary of State for Defence whether he will make a request for information or clarification as to the sale of Sea Cadet missiles overseas; and whether he will seek undertakings from the shippers of Sea Cadet missiles that such missiles have not arrived in the hands of Soviet interests.

Mr. Alan Clark: I have been asked to reply.

I have no knowledge of Sea Cadet missiles. It is not the practice to obtain undertakings in respect of goods which have already been shipped. Any diversion of strategically controlled exports from the United Kingdom to an embargoed destination which comes to the attention of Her Majesty's Government would be investigated.

Low Flying

Mr. Andrew F. Bennett: To ask the Secretary of State for Defence how many hours of low-flying operations were carried out over the United Kingdom, West Germany and other countries in each of the last five years; how many hours have been carried out over the Falklands during the same period; how many accidents have occurred during those exercises, leading to how many fatalities; and what plans there are to increase flights over the United Kingdom and the Falklands as a means of reducing flights over Germany.

Mr. Freeman *[holding answer 24 May 1988]:* Low flying activity is mainly recorded by sorties (which on average last 42 minutes) rather than by hours. The numbers of low-level training sorties flown by British

military aircraft (both fixed wing and helicopter) over the United Kingdom in each of the last five years were as follows:

Year	Sorties
1983	118,920
1984	109,244
1985	115,063
1986	123,488
1987	123,293

Figures for low-flying training sorties carried out in the Federal Republic of Germany are not available prior to 1984. Those for 1984 onwards are as follows, but are not directly comparable with the above because they do not include helicopter sorties which, in Germany, are not centrally recorded.

Year	Sorties
1984	18,752
1985	18,124
1986	16,853
1987	15,900

Central records of low-flying sortie numbers in other countries are not kept.

During the five years in question there have been 51 major accidents involving Army, Royal Navy and Royal Air Force aircraft operating at low level in which 53 military personnel have been killed

Most low-flying activity by United Kingdom military aircraft takes place in the United Kingdom, although RAF aircraft based in the Federal Republic of Germany do a significant amount of training there. Low-flying training also takes place in the USA and Canada, where the majority of ultra low flying is carried out, and in other NATO countries. The distribution of low-flying training is carefully balanced according to training needs, costs and other practical considerations. There are no current plans to alter this balance.

Commoners' Rights

Mr. Cohen: To ask the Secretary of State for Defence if he will list the occasions since 1979 that his Department has used, or has sought to use, the powers contained within the Defence Act 1854 to bring about the legal extinction of commoners' rights.

Mr. Freeman *[holding answer 16 June 1988]:* The need to extinguish commoners' rights under the Defence Act 1854 has arisen at various times but only on one occasion since 1979, at RAF Greenham Common.

Departmental Advertising

Mr. Dobson: To ask the Secretary of State for Defence (1) what was the total spending by his Department on press, public relations and advertising, respectively, in 1987-88;

(2) what was the total spending by the armed forces on press, public relations and advertising, respectively, in 1987-88;

(3) what is the latest figure for the estimated expenditure by his Department on press and public relations during 1988-89;

(4) what is the estimated expenditure by each of the armed forces on press and public relations during 1988-89.

Mr. Archie Hamilton *[holding answer 21 July 1988]:* The Ministry of Defence spent £6,980,000 on press and public relations in 1987-88 and our estimated expenditure in 1988-89 is £7,316,000. These figures include staffing costs and expenditure on films, exhibitions, publications and equipment, and cover expenditure on single-service activities as well as on central defence work. The information requested on advertising expenditure is not held centrally, and I shall write to the hon. Member.

FOREIGN AND COMMONWEALTH AFFAIRS

Provisional IRA (Document)

Mr. Redmond: To ask the Secretary of State for Foreign and Commonwealth Affairs whether, pursuant to his answer to the hon. Member for Linlithgow (Mr. Dalyell) of 23 June, *Official Report*, columns *658-59*, any inaccuracies in the background brief entitled "The Provisional IRA—International Contacts Outside the United States" have been acknowledged by Her Majesty's Government; whether any apologies have been made in this respect; and if he will make a statement.

Mrs. Chalker: We have accepted certain assurances from two individuals named in the background brief and undertook that any further copies of the brief which may be issued in future will be amended to take account of the objections raised.

Departmental Activity

Mr. George: To ask the Secretary of State for Foreign and Commonwealth Affairs how many memoranda by his Department have been submitted to *(a)* the Foreign Affairs Committee and *(b)* other Select Committees so far this Session; and if he will itemise which other Committees have been in receipt of such memoranda.

Mrs. Chalker: Memoranda have been submitted as follows:

	Memo's
(a) Foreign Affairs Committee	26
(b) Other Select Committees:-	5
(i) Defence Committee	3
(ii) Treasury and Civil Service Committees	2

Mr George: To ask the Secretary of State for Foreign and Commonwealth Affairs how many Bills were sponsored by his Department in the Session 1986-87 and so far in the present Session; and if he will state which Bills and on what date they received Royal Assent.

Mrs. Chalker: The FCO sponsored the following Bills in the last two Sessions:

1986-87

Territorial Sea Bill
Diplomatic and Consular Premises Bill
Irish Sailors and Soldiers Land Trust Bill

All of these became Acts; they received the Royal Assent on 15 May 1987.

1987-1988

Arms Control and Disarmament (Privileges and Immunities) Bill
Multilateral Investment Guarantee Agency Bill

These received the Royal Assent on 9 February 1988 and 24 March respectively.

Mr. George: To ask the Secretary of State for Foreign and Commonwealth Affairs how many *(a)* oral

statements, *(b)* answers to private notice questions and *(c)* statutory instruments have emanated from his Department in the present Session.

Mrs. Chalker: Figures are as follows:

		Number
(a)	Oral statements	3
(b)	Private notice questions	6
(c)	Statutory instruments (including SIs made in the last session and laid before Parliament in the current session)	66

Mr. George: To ask the Secretary of State for Foreign and Commonwealth Affairs how many parliamentary questions have been answered by Ministers in his Department in the Session 1987-88 so far.

Mrs. Chalker: Records indicate that 3,285 parliamentary questions have been answered in the Session 1987-88 so far.

Mr. George: To ask the Secretary of State for Foreign and Commonwealth Affairs how many times witnesses from his Department, other than Ministers, have appeared before Select Committees for this Session: and if he will identify the Committees, date, subject and the grade of witnesses.

Mrs. Chalker: The information is as follows:

Committee	*Date*	*Subject*	*Grade*
Public Accounts	16 December 1987	Manpower Element of Technical Cooperation	HCS 1A HCS 3 × 2 HCS 5
Foreign Affairs	27 January 1988	Arms Control and Disarmament	DS 4 HCS 3 HCS 5 × 2
Foreign Affairs	3 February 1988	Famine in the Horn of Africa	HCS 6
Foreign Affairs	10 February 1988	The Iran/Iraq Conflict	DS 4
Public Accounts	15 February 1988	BAOR	DS Senior Grade
Defence	17 February 1988	Belize	DS Senior Grade HCS 5
Foreign Affairs	30 March 1988	Famine in the Horn of Africa	HCS 6 DS Senior Grade × 3
Foreign Affairs	13 April 1988	FCO Estimates	DS 4 DS 5 HCS 1A
Foreign Affairs	20 April 1988	Supply Estimates 1988-89	HCS 3 × 2 HCS 5 × 2
Foreign Affairs	4 May 1988	Famine in the Horn of Africa	HCS 3 HCS 5 × 3

Mr. George: To ask the Secretary of State for Foreign and Commonwealth Affairs how many times he and Ministers from his Department have appeard before Select Committees so far this Session; and if he will identify the Committees, the date, the ministerial witness and the subject.

Mrs. Chalker:

Committee	*Date*	*Witness*	*Subject*
Foreign Affairs	27 January 1988	Secretary of State Sir Geoffrey Howe	Arms Control the Iran-Iraq Conflict
Foreign Affairs	10 February 1988	Mr. D. Mellor	The Iran-Iraq Conflict
Foreign Affairs	30 March	Mr. C. Patten	Famine in the Horn of Africa
Foreign Affairs	20 April	Mr. D. Mellor	The Iran-Iraq Conflict
Foreign Affairs	15 June	Mr. D. Mellor	Famine in the Horn of Africa

Mr. George: To ask the Secretary of State for Foreign and Commonwealth Affairs how many full and part-time staff are engaged in parliamentary liaison for his Department.

Mrs. Chalker: Twelve persons are engaged in parliamentary liaison work.

Mr. George: To ask the Secretary of State for Foreign and Commonwealth Affairs how many delegations he and his ministerial colleagues received from *(a)* hon. Members and *(b)* groups which contained hon. Members in the last parliamentary Session.

Mr. Waldegrave: The details requested are as follows:
(a) 169
(b) 84

Mr. George: To ask the Secretary of State for Foreign and Commonwealth Affairs how many letters he and his ministerial colleagues wrote to right hon. and hon. Members in the parliamentary Session 1987-88.

Mr. Waldegrave: Letters to Members of Parliament during this Session number 13,713.

Recruitment and Promotion Policy

Ms. Richardson: To ask the Secretary of State for Foreign and Commonwealth Affairs what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career break due to child care.

Mrs. Chalker: Within both the mainstream diplomatic and aid wings, upper age limits on recruitment have been raised wherever possible. In the Home Civil Service cadre, the upper age limit for entry into most grades is now 55 years.

Entry competitions to both wings are open to any eligible applicants with the required qualifications, including those gained as mature students.

Promotion in the diplomatic service is determined by assessment of performance in a variety of jobs both at home and overseas. Seniority is not affected by career breaks. In the aid wing, staff attend a promotion board whose members are given guidance on equal opportunities policy.

Arrangements exist in both wings to allow for the reinstatement of officers who resign but later wish to resume their careers. A flexible approach is adopted to requests for special unpaid leave for domestic reasons.

Western European Union

Mr. Hill: To ask the Secretary of State for Foreign and Commonwealth Affairs what specific mandate has now been granted to the Western European Union agency formed from the merger of the three agencies responsible for studying security questions.

Mrs. Chalker: We support the merger of the three WEU agencies in Paris into one: this should enable their resources to be more effectively deployed in support of revitalisation of the WEU. But the merger has not yet formally taken place, and the question of a mandate for a new agency does not yet arise.

Mr. Hill: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) if he will support the proposal of the Luxembourg Government to instruct the new Western European Union agency to define the tasks and methods of work of a European defence research institute which would be required to improve knowledge in the member countries of the European dimensions of defence questions;

(2) what is Her Majesty's Government's position on the Western European Union assembly's recommendation for the creation of a European Agency, financed by all the Western European countries, to promote research in all areas of conventional armaments and to prepare for the formulation of a European armaments policy.

Mrs. Chalker: We take the view that we should use the existing structures of the WEU as well as other available means in order to strengthen the habit of co-operation among the Europeans in security and to improve knowledge in member countries of the European dimension of defence questions.

Mr. Hill: To ask the Secretary of State for Foreign and Commonwealth Affairs what stage has now been reached in the exchange of views leading to the accession of Portugal and Spain to the Western European Union.

Mrs. Chalker: The discussions with both Spain and Portugal which were initiated on 26 May are continuing, and good progress is being made.

Mr. Hill: To ask the Secretary of State for Foreign and Commonwealth Affairs whether Her Majesty's Government support the accession to the Western European Union of all the European countries of the Atlantic Alliance which wish to join and which commit themselves to the same conditions as governed the Portuguese and Spanish cases.

Mrs. Chalker: Discussions with Spain and Portugal are continuing, but have not yet been concluded. It is therefore too early to say what would be the implications for other countries wishing to apply to join the WEU.

Mr. Hill: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) what specific measures Her Majesty's Government will propose in the Western European Union council for the provision of adequate information on a regular basis to the North American media and public regarding the nature, scope and aims of the reactivation of the Western European Union and the specific constraints of Western European Union countries in security matters and European co-operation in that area;

(2) if Her Majesty's Government support the proposal made for the Western European Union council to establish an information bureau in the United States of America.

Mrs. Chalker: Embassies of member countries of the WEU are already working to develop awareness in north America of the WEU's contribution and objectives. The operations of Western navies in the Gulf, in which WEU has played a coordinating role, have received widespread and favourable publicity. The platform of European security principles has also been welcomed.

Mr. Hill: To ask the Secretary of State for Foreign and Commonwealth Affairs what stage has now been reached in consultations on burden-sharing in the framework of NATO and in the Western European Union council.

Mrs. Chalker: The issue of burden-sharing is under close examination in both NATO and WEU. At their meeting in May, NATO Defence Ministers commissioned a report on burden-sharing to be presented to their next meeting in December. In the WEU, burden-sharing is being examined in the context of the work of following up the platform on European security interests agreed in November 1987 in The Hague.

Mr. Hill: To ask the Secretary of State for Foreign and Commonwealth Affairs what criteria Her Majesty's Government are proposing for assessing the share of the burden that each member of the Western European Union should assume in order to ensure their joint security.

Mrs. Chalker: As part of the work of following-up the platform on European security interests, the members of the WEU are examining together the share they each carry of the burden of the Alliance's common defence and ways of enhancing their contributions.

Mr. Hill: To ask the Secretary of State for Foreign and Commonwealth Affairs whether Her Majesty's Government will take steps to make use of the experience gained by the Western European Union agency for the control of armaments to ascertain the methods of verification that would enable Western Europe to make a firm contribution to any agreements on the limitation of conventional armaments.

Mrs. Chalker: The western European countries are working with determination towards the establishment of

a forum in which conventional arms reductions can be negotiated, but the circumstances and scale of the verification requirements for any conventional arms control agreement are likely to be very different from those under which the WEU agency for the control of armaments has operated in the past.

Bophuthatswana

Mr. Woodcock: To ask the Secretary of State for Foreign and Commonwealth Affairs if a Minister in his Department will undertake a fact-finding visit to Bophuthatswana.

Mrs. Chalker: No. Staff at Her Majesty's embassy in South Africa pay regular visits to Bophuthatswana.

Panama

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs what visits have been made by Ministers from his Department to Panama since 1979; and if any further visits are scheduled.

Mrs. Chalker: My right hon. and noble Friend the Baroness Young when she was Minister of State for Foreign and Commonwealth Affairs visited Panama from 12 to 15 November 1983. No further visits are scheduled at the present time.

Chemical and Biological Weapons

Mr. Corbyn: To ask the Secretary of State for Foreign and Commonwealth Affairs what further steps he is taking to enforce the banning of all chemical and biological weapons and the ending of their use.

Mrs. Chalker: The United Kingdom is a party to both the 1925 Geneva protocol prohibiting the use of poisonous gas and bacteriological methods of warfare, and the 1972 biological weapons convention which prohibits the development, production and stockpiling of biological and toxin weapons.

A comprehensive global chemical weapons convention is under negotiation at the conference on disarmament in Geneva. Good progress has been made but much work remains, particularly on verification. We are continuing to play an active role in resolving the remaining problems.

In his speech to the United Nations special session on disarmament on 7 June, my right hon. and learned Friend the Secretary of State for Foreign and Commonwealth Affairs called for wider accession to the 1925 Geneva protocol; automatic United Nations investigation of allegations of chemical weapons use; and international action in the event of confirmed use of chemical weapons.

Kurdish People

Mr. Corbyn: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Governments of Turkey, Iran and Iraq concerning their treatment of Kurdish people; and if he will make a statement.

Mrs. Chalker: As my hon. and learned Friend the Member for Putney (Mr. Mellor) made clear in his answer on 27 June, we regret the denial of basic human rights wherever they occur. We are aware of reports of such abuses in Iraq, Iran and Turkey, and continue to take every suitable opportunity to voice our concern. My hon. and learned Friend raised this when he visited Iraq in February. When my right hon. and learned Friend the Secretary of State for Foreign and Commonwealth Affairs met the Iraqi Foreign Minister in March, he reiterated our concern about such violations, and the plight of Iraqi Kurds in particular. We have also protested vigorously about the use of chemical weapons on the civilian town of Halabja in Iraqi Kurdistan.

No recent representations have been made to the Turks about the Kurds, but my right hon. and learned Friend the Secretary of State for Foreign and Commonwealth Affairs, did raise the issue of human rights in general when he met the Foreign Minister on 13 July during President Evren's visit.

Although no specific representations about the Kurds have been made to Iran, we have made known our views on human rights abuses in Iran on a number of occasions, and have co-sponsored resolutions on this issue at both the United Nations General Assembly and the United Nations Commission for Human Rights.

Iran and Iraq

Mr. Corbyn: To ask the Secretary of State for Foreign and Commonwealth Affairs if he has any plans to seek to visit Iran or Iraq in the wake of the ceasefire; and if he will make a statement.

Mrs. Chalker: We welcome the Iranian decision to accept SCR 598, and fully support the efforts of the United Nations Secretary-General to achieve an early ceasefire leading to a comprehensive settlement. This would open the way for the early restoration of security, prosperity and development for both countries and for the whole region.

My right hon. and learned Friend the Secretary of State for Foreign and Commonwealth Affairs has no current plans to visit either Iran or Iraq.

Hong Kong (Rhino Horn)

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs, pursuant to his reply to the hon. Member for Newham, North-West of 19 July, *Official Report*, column 560, if the Hong Kong authorities are in contact with the university of Mainz which is currently exploring a technique for identifying rhino horn in medical preparations; and if he will make a statement.

Mrs. Chalker: No, but they would expect the CITES secretariat to publicise the techniques should they prove successful. Since the intention of the Hong Kong Government is to introduce legislation to ban the sale of all medicinal products claiming to contain rhino ingredients, positive identification of the ingredients is not necessary.

Amnesty International (Exhibition)

Mr. Tony Lloyd: To ask the Secretary of State for Foreign and Commonwealth Affairs if his Department has considered an application for an exhibition relating to Amnesty International to be displayed in the Upper Waiting Hall.

Mrs. Chalker: Yes: we are happy that the exhibition should be displayed in the Upper Waiting Hall.

Chile

Mr. Corbyn: To ask the Secretary of State for Foreign and Commonwealth Affairs what further representations have been made to the Government of Chile concerning *(a)* violations of human rights and *(b)* the safety of people returning from exile.

Mrs. Chalker: We continue to make frequent representations, both at ministerial and official level, to the Chilean Government to improve their poor human rights record. As my hon. Friend the Member for Enfield North (Mr. Eggar) made clear in his reply of 7 June to the hon. Member, we do not believe that returning exiles are in any greater physical danger than others in Chile.

Mr. Corbyn: To ask the Secretary of State for Foreign Affairs if Her Majesty's Government's representatives in Chile have had meetings with Claudimoro Almeida; and if he will make a statement.

Mrs. Chalker: No member of our embassy in Santiago has had meetings with Mr. Almeyda. I refer the hon. Member to my hon. Friend the Under-Secretary of State's replies of 8 June to the hon. Members for Warrington, North (Mr. Hoyle), for Liverpool, West Derby (Mr. Wareing) and for Cynon Valley (Mrs. Clwyd).

Hong Kong (Otter Skins)

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs, pursuant to his reply to the hon. Member for Newham, North-West of 25 July, if he will give an estimate of the number of otters represented by the 1,020 pieces of otter skin seized by the Hong Kong authorities in the first six months of 1988.

Mrs. Chalker: It is believed that the 1,020 pieces of otter skin seized correspond to an equivalent number of otters.

Hong Kong (Birds)

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs, pursuant to his reply to the hon. Member for Newham, North-West of 25 July, if he will identify the species of birds of prey and owls seized by the Hong Kong authorities in the first six months of 1988.

Mrs. Chalker: Comprehensive information is not available. The following species are, however, known to have been seized in the period in question:

Birds of prey
- Falco Tinnuncules
- Accipiter Nisus
- Milvus Migrans
- Haliaeetus Leucogaster

Owls
- Otus Bakkamoena
- Glaucidium Cuculoides
- Otus Sunia
- Tyto Capensis

Overseas Prisoners

Mr. Chris Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs how many British people are in prison abroad; in which countries they are being held; and what were the equivalent figures for each of the last five years.

Mrs. Chalker: According to the most recent survey, there were, in early June 1988, to the best of our knowledge, 1,221 British citizens detained overseas. A breakdown by country is given in the table. Equivalent figures for the last five years are not readily available, and could only be produced at disproportionate cost.

British Citizens Detained Overseas: June 1988
(Total 1,221)

Country	*Number*
Algeria	1
Argentina	1
Australia	8
Austria	3
Bahrain	1

Total	1,221

Turkey (British Prisoners)

Mr. Corbyn: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list the total number of British subjects believed to be in prison in Turkey; what visiting arrangements they have from British officials; and what steps have been taken concerning repatriation.

Mrs. Chalker: There is at present only one British citizen imprisoned in Turkey. British consular officials visit him about once a month.

Both the United Kingdom and Turkey are parties to the Council of Europe convention on the transfer of sentenced persons. The convention came into force for Turkey on 1 January 1988. The Home Office are already in direct contact with the Turkish Ministry of Justice about the possibility of transferring this British prisoner to the United Kingdom.

John McCarthy

Mr. Corbyn: To ask the Secretary of State for Foreign and Commonwealth Affairs what is the latest information he has concerning the whereabouts of John McCarthy last seen in Beirut in 1986; and if he will make a statement.

Mrs. Chalker: Despite considerable efforts in Lebanon and elsewhere, we have no hard information on the whereabouts and well being of John McCarthy and the other British hostages.

Hong Kong (Endangered Species)

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs, pursuant to his reply to the hon. Member for Newham, North-West of 25 July, if he will identify by country of origin the endangered species seized by the Hong Kong authorities in the first six months of 1988.

Mrs. Chalker: The Hong Kong authorities can only identify seizures by country of export rather than origin. The 143 seizures during the first six months of 1988 were exported from:

	Number
Belgium	1
Bahrain	1
Canada	2
China	67
West Germany	3
United Kingdom	2
Guyana	1
Indonesia	13

Total	143

Major David Walker

Mr. Foulkes: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will now suspend all contact between his Department and Major David Walker and KMS in the light of evidence of his involvement in sabotage missions abroad.

Mrs. Chalker: There are no plans to engage Major David Walker or KMS on work for the Foreign and Commonwealth Office.

Mr. Foulkes: To ask the Secretary of State for Foreign and Commonwealth Affairs if Her Majesty's consul in Managua was contacted by Major David Walker or his employees in Nicaragua in March 1985, or subsequently.

Mrs. Chalker: We have no record of any contacts.

Mr. Foulkes: To ask the Secretary of State for Foreign and Commonwealth Affairs what contacts have been maintained between officers of his Department and Major David Walker between 1979 and the present day.

Mrs. Chalker: Between 1979 and 1982, KMS Ltd. was employed by the FCO to provide close protection to a number of Her Majesty's ambassadors and high commissioners abroad. The FCO has not employed KMS since then.

Mr. Nelson Mandela

Mr. Anderson: To ask the Secretary of State for Foreign and Commonwealth Affairs when he now expects Her Majesty's ambassador in South Africa to visit Mr. Nelson Mandela.

Mrs. Chalker: Our efforts are directed not to visiting Mr. Mandela but to securing his unconditional release. We continue to urge the South African Government to release Mr. Mandela and other political detainees immediately and unconditionally.

Tigré and Eritrea (Atrocities)

Mr. Wilkinson: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will investigate the increasing number of reports of atrocities being perpetrated by the Ethiopian armed forces in Tigré and Eritrea provinces and modify Her Majesty's Government's trade and political relations with Ethiopia accordingly.

Mrs. Chalker: I regret that it is not practicable to make a thorough investigation of reports of atrocities emanating from no-go areas of Eritrea and Tigré.

If reports of atrocities proved correct, we should of course condemn such acts by any of the parties to the civil war in Ethiopia. We have consistently urged a peaceful settlement of the conflicts on all concerned.

European Holiday Resorts (Arrests)

Mr. Thurnham: To ask the Secretary of State for Foreign and Commonwealth Affairs how many British nationals were arrested in European holiday resorts during 1987, and during 1988 to date.

Mrs. Chalker: Many places in Europe are considered by British citizens as holiday resorts. Following are figures for some of the more popular tourist destinations:

British citizens arrested

Country	*1987*	*Up to 28 July 1988*
Cyprus	6	6
France	114	55
Greece	101	59
Italy	24	46
Malta	5	3
Portugal	27	25
Spain	562	359
Switzerland	46	41

NATIONAL FINANCE

Company Taxation

Mr. Grocott: To ask the Chancellor of the Exchequer how much tax was paid by businesses in the latest year for which figures are available as a proportion of all tax revenue and as a proportion of national income, respectively; and what were the corresponding figures for France, West Germany, Japan and the United States of America.

Mr. Brooke: Data on total taxes paid by all types of business are not available. OECD has published figures for 1985 showing taxes on corporate income as percentages of total tax and GDP. They are as follows:

	Total Tax Per cent.	*GDP Per cent.*
United Kingdom	12·9	4·9
France	4·3	1·9
West Germany	6·1	2·3
Japan	21·0	5·9
USA	7·1	2·1

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing the basic rate of corporation, and so on, taxes in the Organisation for Economic Co-operation and Development countries and the amount collected in company taxation per head of the population in the most recent year for which figures are available.

Mr. Brooke: The information is given in the table, which is supplemented by explanatory notes.

	Company tax rate per cent.	*Tax per head of population £*
Australia	39	194
Austria	55	87
Belgium	43	187
Canada	28	241
Denmark	50	164
Finland	33	97
France	42	126
Germany	56	170
Greece	49	32
Iceland	51	not available
Ireland	50	48
Italy	36	197
Japan	42	398
Luxembourg	36	675
Netherlands	42	200
New Zealand	28	162
Norway	50·8	640
Portugal	45	not available
Spain	35	68
Sweden	52	126
Switzerland	9·8	156
Turkey	47·8	38
United Kingdom	35	305
USA	34	190

Notes:

1. The rates of company tax shown are the latest enacted.
2. Lower rates apply to distributed profits in Austria, Germany, Japan, Norway and Portugal. No tax is charged on distributed profits in Greece.
3. There are lower rates for smaller companies in Austria, Belgium, Canada, Finland, Germany, Ireland, Japan, Luxembourg, United Kingdom and USA. There are also lower rates for manufacturing companies in Canada and Ireland and for public companies in Greece.
4. There are in addition local income taxes on companies in Austria, Canada, Finland, Germany, Italy, Japan, Luxembourg, Portugal, Spain, Switzerland and USA.
5. The figures for company tax per head are for 1985, the most recent year for which information is available. They have been converted to sterling using purchasing power parities.

Income

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer what is his estimate of the change in the number of higher rate taxpayers in the current financial year; and if he will publish in the *Official Report* a table showing his estimate of their distribution by range of total income and tax category together with the aggregate tax liability in each case.

Mr. Norman Lamont: The number of married couples and single people liable to higher rates of income tax is estimated to be 1,190,000 in 1987-88, and 1,250,000 in 1988-89. The tables show the distribution of those liable to higher rate tax in 1988-89 and their income tax liability by income and tax category.

Estimates are based on a projection of the 1985-86 survey of personal incomes and are provisional.

Higher Rate Tax Units[1] 1988-89

Thousands

Range of income	*Single*	*Married couple (wife not working)*	*Married couple (both working)*	*All*
£ per year				
Under 20,000	0	0	0	0
20,000-25,000	50	10	10	70
25,000-30,000	70	90	150	320
30,000-50,000	90	190	360	630
Over 50,000	30	80	120	230
Total	240	370	640	1,250

[1] Counting a married couple as one and combining the partners' incomes.

Total tax liability of Higher Rate Tax Units[1] 1988-89

£ million

Range of income	*Single*	*Married couple (wife not working)*	*Married couple (both working)*	*All*[2]
£ per year				
Under 20,000	—	—	—	—
20,000-25,000	260	50	20	330
25,000-30,000	470	540	820	1,830
30,000-50,000	860	1,710	2,750	5,320
Over 50,000	1,230	2,060	2,650	5,940
Total[2]	2,820	4,350	6,230	13,410

[1] Counting a married couple as one and combining the partners' incomes.
[2] Figures may not sum exactly due to rounding.

Mr. Grocott: To ask the Chancellor of the Exchequer what is his estimate of the effects which the changes in taxation introduced in his latest Budget will have upon the proportion of gross income which will be paid in taxes by each quintile of income groups and upon disposable income as a proportion of gross income in each case.

Mr. Norman Lamont: Provisional estimates based on a projection of the 1985-86 survey of personal incomes are as follows:

Income tax liability in 1988-89 as a percentage of gross income

	Before Budget changes[2] *per cent.*	*After Budget changes*[2] *per cent.*
Quintile group of taxpayers[1]		
Top 20 per cent.	24·4	20·7
20-40 per cent.	16·9	15·1
40-60 per cent.	15·4	13·6
60-80 per cent.	12·9	11·1
Bottom 20 per cent.	7·5	5·8

[1] Based on 20,900,000 tax units liable to pay tax in 1988-89. Married couples are counted as one unit and the partners' incomes combined.
[2] Budget changes to main income tax allowances, thresholds, and rates only.

Mr. Gordon Brown: To ask the Chancellor of the Exchequer if he will give figures on distribution of total incomes before tax in 1985-86, giving numbers of incomes in the following ranges: less than £2,000, £2,000 to £2,500, £2,500 to £3,000, £3,000 to £3,500, £3,500 to £4,000, £4,000 to £4,500, £4,500 to £5,000, £5,000 to £6,000, £6,000 to £7,000, £7,000 to £8,000, £8,000 to £10,000, £10,000 to £12,000, £12,000 to £15,000, £15,000 to £20,000, £20,000 to £30,000, £30,000 to £50,000, £50,000 to £100,000, £100,000 and over, as set out in table 1 of the "Survey of Personal Incomes".

Mr. Norman Lamont: Table 1 of the survey of personal incomes excluded those with incomes below £2,000, which was, in 1984-85, the threshold for operation of pay-as-you-earn. Below this threshold, the tax records on which the survey is based are incomplete. Correspondingly, the 1985-86 table excludes those with incomes under £2,200. Neither table allows for the incomplete coverage in the tax records of investment income upon which basic rate tax liability has been satisfied at source.

Range of total income before tax (lower limit)

£	*Numbers (thousands)*
2,200	672
2,500	1,070
3,000	969
3,500	1,020
4,000	1,100
4,500	1,040
5,000	2,090
6,000	1,840
7,000	1,710
8,000	3,010
10,000	2,100
12,000	2,130
15,000	1,770
20,000	975
30,000	307
50,000	87
100,000	17
TOTAL	21,900

Mr. Gordon Brown: To ask the Chancellor of the Exchequer if he will give the change in average personal income as defined in the survey of personal incomes *(a)* before tax and *(b)* after tax at 1980 prices using the gross domestic product deflator between 1978-79 and 1988-89 of (i) the bottom 20 per cent., (ii) the next 20 per cent., (iii) the next 20 per cent., (iv) the next 20 per cent., and (v) the top 20 per cent. of incomes, including those not paying tax, giving the percentage change between 1978-79 and 1988-89.

Mr. Norman Lamont: I regret that figures for 1988-89 to include those who do not pay tax are not available.

Mr. Gordon Brown: To ask the Chancellor of the Exchequer if he will give the average weekly earnings of *(a)* the lowest decile and *(b)* the highest decile of all employees, including within all employees male and female, full and part-time, whose pay was not affected by absence, in April 1979 and April 1987 at 1980 prices calculated using the gross domestic product deflator, giving the percentage change between the two dates.

Mr. Major: No figures are available for the upper and lower deciles of average weekly earnings of all employees, both male and female, full and part time. However, figures for full-time employees (males and females separately) are to be found in the new earnings survey report. The GDP deflator is published on page 6 of *Economic Trends*.

Mr. John Greenway: To ask the Chancellor of the Exchequer what has been the increase in real personal disposable income over the latest period for which official figures are available.

Mr. Norman Lamont: In the first quarter of 1988 real personal disposable income was 5½ per cent. higher than a year earlier. Further growth is expected this year.

Overseas Assets

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer what is his estimate of the value of United Kingdom assets held overseas and the amount of United Kingdom tax payable thereon after double taxation relief; and if he will publish in the *Official Report* his estimate of the amount of tax which would accrue to the Exchequer if the money were invested in a similar portfolio in the United Kingdom.

Mr. Brooke: The value of United Kingdom assets held overseas is published in table 1.2 of the "United Kingdom Balance of Payments" (the Pink Book). Estimates of tax arising from these, or corresponding United Kingdom, assets are not available for the corporate sector and could be obtained only at disproportionate cost.

Manufacturing and Commercial Companies

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing for manufacturing, other industrial and commercial companies, and the financial sector the information given for the years 1984 to 1986 in table 14.3 of the "Annual Abstract of Statistics 1988"; and if he will add a forecast for 1987.

Mr. Major: Separate figures for manufacturing companies are not available. A subdivision of the corporate sector between financial and industrial and commercial (including manufacturing) for the years 1984 to 1986 is given in the tables. Definitive figures for 1987 are in the course of preparation and will be available in September 1988.

Table 1: Corporate sector appropriation account[1]: financial

£ million

	1984	*1985*	*1986*

Royalties and licence fees on oil and gas production	2,459	2,366	941
Balance: undistributed income after taxation[6]	37,928	38,820	40,277
Total	76,042	84,051	82,062

[1] Includes flows between the companies' sector and public corporations but excludes flows within the companies' sector.
[2] This represents the contribution of financial enterprises in the corporate sector to the gross domestic product. It is the difference between bank charges, commissions, etc, on the one hand and management expenses on the other.
[3] Before providing for depreciation and stock appreciation.
[4] Financial sector figures include payments to and receipts from industrial and commercial sector. Industrial and commercial sector figures include payments to and receipts from financial sector.
[5] After deducting depreciation allowances but before providing for stock appreciation.
[6] Before providing for depreciation, stock appreciation and additions to tax and dividend reserves.

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will bring up to date the information provided in his written reply of 16 March 1983, *Official Report*, columns *164-65*, concerning the amount of tax collected on income earning and other assets held overseas; and if he will include in the table an estimate for each year of the total value of such assets whether or not they have been assessed to tax.

Mr. Norman Lamont: Income tax payable on foreign and public revenue dividends paid by or through United Kingdom paying and collecting agents in the past six years was as follows:

	£ million
1982-83	120·3
1983-84	154·9
1984-85	182·7
1985-86	193·7
1986-87	212·1
1987-88	194·7

In the answer given in March 1983 information was also provided on income tax payable on income from overseas charged to tax under cases IV and V of schedule D, and on the number of requests for information by the Inland Revenue under our network of double taxation agreements. Further years' estimates cannot be made except at disproportionate expense.

Information on the value of United Kingdom assets held overseas is published in table 1.2 of the "United Kingdom Balance of Payments" (the Pink Book).

Mortgage Interest Relief

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer (1) whether he will publish in the *Official Report* a table showing his estimate of the number of cases in which higher rate relief will be given on mortgage

interest payments in the current financial year together with *(a)* the gross amount of interest qualifying for relief, *(b)* the amount of higher rate relief, and *(c)* the number of recipients of working age and their distribution by personal tax category and by range of total income together with the average amount of relief given by the standard and higher rate of tax;

(2) whether he will publish in the *Official Report* a table showing by range of income and tax status an estimate of the saving to the Exchequer in a full year from abolishing, respectively, the upper earnings limit for national insurance contributions and higher rate relief on mortgage interest.

Mr. Norman Lamont: Provisional estimates of excess over basic rate relief on mortgage interest in 1988-89, based on a projection of the 1985-86 survey of personal incomes, are given in the table. These figures take no account of any behavioural changes which might result from the removal of higher rate relief on mortgage interest.

It is estimated that the full year yield, at 1988-89 levels, of the abolition of the upper earnings limit for national insurance contributions would be £1·7 billion. A breakdown of this figure by status and by income will be given after the summer recess.

Beneficiaries[1] of higher rate relief on mortgage interest by range of total income: 1988-89

Range of total income	*Number of tax units*	*Gross amount of interest qualifying for relief*	*Cost of excess over basic rate relief*	*Average basic rate relief*	*Average excess over basic rate relief*	*Number of non-aged tax units*

Over 50,000	145	415	60	720	430	140
TOTAL	1,000	2,460	300	620	300	985

. . = less than £2,500 or £2·5 million as appropriate.
Figures may not add due to rounding.
[1] Includes about 190,000 tax units who are kept out of higher rate tax by this relief.

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer what is his estimate of the cost to the Exchequer of tax relief on interest payable on mortgages which have been taken out to raise cash for other purposes.

Mr. Norman Lamont: It is estimated that tax relief amounting to around £100 million was falsely claimed in respect of alleged home improvement loans in 1986/87 (the last year for which figures are available). In addition, a relatively small but unquatiified proportion of claims to relief on other loans has been claimed falsely.

Mr. McNamara: To ask the Chancellor of the Exchequer whether a solicitor's letter stating the purchaser's intention to buy a particular house at a particular price and dated on or before 31 July will satisfy the requirements of the Inland Revenue with respect to qualification for double MIRAS.

Mr. Norman Lamont: The new residence basis for mortgage interest relief, being introduced in the Finance Bill, restricts tax relief to the interest on £30,000 per residence, rather than £30,000 per borrower, and takes effect on 1 August. It will apply to all loans for home purchase made on or after date.

A loan made on or after 1 August will however be treated as made before that date provided:

(a) the offer of the loan was made before 1 August and was evidenced in writing by the lender before that date, and
(b) the borrower had entered into a binding contract before 1 August to acquire the property.

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* his estimate of the number of cases in which tax relief will be claimed through MIRAS or otherwise on mortgage interest payments on residential property in the current financial year together with *(a)* the estimated cost to the Exchequer and *(b)* the number of recipients of working age and their distribution by range of total income together with the average amount of relief given; and if he will break figures down as far as possible between single persons and one and two-earner married couples.

Mr. Norman Lamont *[holding answer 27 July 1988]:* Provisional estimates for the United Kingdom are given in the table. Following the introduction of MIRAS in April 1983, Inland Revenue administrative records cannot be used to provide comprehensive figures on the distribution of mortgage interest relief by range of income. The estimates in the reply are therefore based on projections of data in the 1983 family expenditure survey (FES) and 1985-86 survey of personal incomes, but the sample sizes do not permit reliable estimates to be made in all the detail requested.

The estimate of the cost of mortgage interest relief in 1988-89 takes account of the recently announced increases in the mortgage interest rate.

Tax units[1] receiving mortgage interest relief by range of total income 1988-89

Range of total income	*Number of tax units with mortgage interest relief*	*Average value of relief per mortgagor*	*Cost of relief*
	Thousands	*£*	*£ million*
Up to £5,000	690	340	240
£5,001 to £10,000	1,300	430	560
£10,001 to £15,000	2,440	520	1,270
£15,001 to £20,000	1,890	550	1,050
£20,001 to £25,000	1,110	570	630
£25,001 to £30,000	470	710	340
Over £30,000	700	950	660
Total	8,600	550	4,750

[1] Single persons and married couples.

Agricultural Production Licences

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer what is his forecast for receipts of capital gains tax on the sale of agricultural production licences for the current financial year; if he will include in the *Official Report* an estimate of the amount by which prices would have to fall to eliminate the premium on the transfer of entitlement to the production quota; and whether he will make it his policy to press for a reduction in the price of milk to whatever level is required to eliminate the surplus without the need to rely on quotas.

Mr. Norman Lamont: Information on capital gains tax is not available. The other parts of the question are for my right hon. Friend the Minister of Agriculture, Fisheries and Food and I shall ask him to write to the hon. Member.

Productivity

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish a table showing annual increases in productivity in the United States of America and the United Kingdom for manufacturing and the whole economy, since 1976-77, including figures for the latest period of 12 months.

Mr. Major: Data on United Kingdom productivity can be found in table 34 of *Economic Trends*, and in the annual supplement to *Economic Trends* (1988). The OECD "Historical Statistics 1960-86", tables 3.7 and 3.10, provide data on United States productivity.

Output

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing his estimate of the implied difference between growth of potential output per person-hour and the growth of actual output per person-hour between the two most recent cyclical United Kingdom peaks; and if he will include *(a)* a figure for the United Kingdom and *(b)* the rate of growth in manufacturing assumed by the International Monetary Fund and the Treasury, respectively.

Mr. Major: Information on potential output per person-hour is not available in the form requested by the hon. Member. The Financial Statement and Budget Report contains a forecast for manufacturing output growth.

Pensions (Underpayment)

Mr. Kirkwood: To ask the Chancellor of the Exchequer if he will make a statement on his plans for compensation of public service pensioners for the underpayment of the state retirement pension.

Mr. Brooke: State retirement pensioners were compensated in respect of the underestimate of the RPI. On the decision not to compensate public service pensioners, I have nothing to add to my written answer of 18 December, at columns 845-46, to my hon. Friend the Member for Croydon, South (Sir W. Clark).

Balance of Payments

Mr. Win Griffiths: To ask the Chancellor of the Exchequer what is his latest estimate of the outturn of the balance of payments position at the end of the current financial year.

Ms. Quin: To ask the Chancellor of the Exchequer what is his latest estimate of the deficit on current account for the year 1988.

Mr. Battle: To ask the Chancellor of the Exchequer what is his latest estimate of the current account deficit for the year 1988.

Mr. Major: As my right hon. Friend the Chancellor has already made clear, the current account deficit in 1988 will be larger than the £4 billion forecast at Budget time. A new forecast of the current account will be published, in the usual way, at the time of the Autumn Statement.

Taxation

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing for a married man with two children, one earner and no other allowances, the percentage in gross income taken in *(a)* direct taxes, including national insurance contributions less child benefit and *(b)* indirect taxation, including the retail prices index or other representative figure for rates, in the current financial year where the earnings of the married man are (i) three times average earnings, (ii) average earnings and (iii) 60 per cent. of average earnings and 45 per cent. of average earnings, in all cases with no other income; and if he will include the earnings figure in each case.

Mr. Norman Lamont: Figures for 1988-89 are given in the table.

Taxes as a percentage of gross earnings for a married man with two children, one earner and no other allowances

Earnings: Proportion of average	£ per week	Income tax and NICs less child benefit	Indirect taxes
(i) 3 times	734·10	29·9	n/a
(ii) Average	244·70	20·9	13·1
(iii) 60 per cent.	146·80	10·7	n/a
(iv) 45 per cent.	110·10	3·0	n/a

Notes:
The estimate of indirect taxes is derived from the 1985 family expenditure survey and is based on the illustrative assumption that 10 per cent. of disposable income is saved. Local authority rates are not included. Estimates cannot reliably be made for income levels either (i) three times or (iii) 60 per cent. or (iv) 45 per cent. of average earnings.

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing for the current financial year the amount of tax and national insurance contributions payable in the circumstances described in the question from the hon. Member for Great Grimsby on 5 April 1984, *Official Report*, column *630*; and if he will include any credit for child benefit.

Mr. Norman Lamont: Information for households with two children is in the table.

Percentage of average earnings[1] 1988-89	Gross earnings (£ per week)	National insurance contributions[2]	Income tax[3] less child benefit: Single female parent	Married female (sole earner)	Married man (sole earner)
100 per cent.	[4]161·80	14·56	6·26	−6·26	6·26
75 per cent.	[4]121·35	10·92	−3·85	−14·50	−3·85

[1] For full-time adult females (all occupations).
[2] Not contracted out.
[3] Deducting child benefit of £7·25 per week per child and assuming no reliefs or allowances other than personal allowances.
[4] This figure assumes that earnings increase by 7½ per cent. between 1986-87 and 1987-88 and by 6½ per cent. between 1987-88 and 1988-89.

Mr. Gordon Brown: To ask the Chancellor of the Exchequer if he will give the reduction in annual liability to *(a)* capital gains tax and *(b)* capital transfer tax and inheritance tax in (i) 1988-89 and (ii) the 1978-79 indexed regime, specifying in each case the total and average reduction per taxpayer as well as the number of taxpayers in each year.

Mr. Norman Lamont: The figures for capital transfer and inheritance tax are:

Reduction compared with the indexed 1978-79 regime: Total liability	Average liability[1]	Taxpayer numbers (thousands): 1978-79 indexed regime	1988-89 regime
£ million	£		
600	7,000	80	20

[1] Calculated for the number of taxpayers under the 1978-79 indexed regime.

The 1988-89 tax base is taken as given. It is not possible to determine to what extent changes in the tax regime between 1978-79 and 1988-89 may have affected the levels of transfers. I regret that it has not been possible to provide the figures for capital gains tax before the summer recess. I shall write to the hon. Member and place a copy of the letter in the Library.

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing for each financial year since 1978-79 the amount of tax raised by *(a)* personal income taxes, *(b)* national insurance contributions, *(c)* capital taxes, *(d)* corporate taxes, *(e)* indirect taxes and *(f)* rates; and if he will give his latest forecast for the current financial year on a full-year basis.

Mr. Brooke *[holding answer 27 July 1988]:* The information is as follows:

£ billion

	Personal income taxes	National insurance contributions	Capital taxes	Corporate taxes[1]	Local authority rates	Central government expenditure taxes
1978-79	19·1	10·2	0·8	4·4	5·8	18·2
1979-80	21·1	12·0	1·0	6·7	6·9	25·2
1980-81	24·8	14·4	1·2	8·1	8·7	28·8
1981-82	29·2	16·5	1·6	10·6	11·0	33·6
1982-83	30·5	18·7	1·4	13·0	12·2	35·0

	Personal income taxes	National insurance contributions	Capital taxes	Corporate taxes[1]	Local authority rates	Central government expenditure taxes
1983-84	31·7	21·3	1·6	13·9	12·3	37·8
1984-85	33·3	22·7	1·7	18·0	12·9	40·6
1985-86	35·9	24·6	2·3	18·4	13·8	44·0
1986-87	38·5	26·6	2·8	14·8	15·6	48·5
1987-88	41·5	29·1	3·7	17·9	16·9	52·4
1988-89[2]	42·1	31·6	4·7	19·9	19·0	55·4

[1] Corporation tax (including advance corporation tax but excluding corporation tax on capital gains), petroleum revenue tax, oil royalties, IBA levy and supplementary petroleum duty.
[2] Forecast.

The forecasts are from the 1988 Financial Statement and Budget Report. All figures are on an accruals basis as in the national income and expenditure accounts.

Export Unit Values

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing for each of the EEC Six, the United States of America, the United Kingdom and Japan the percentage increase in *(a)* export unit values and *(b)* producer-wholesale prices between 1976 and 1987.

Mr. Lilley: Figures for export unit values are given in "IMF International Financial Statistics" and for producer and wholesale prices in "OECD Main Economic Indicators".

Debt

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* the amount of *(a)* floating debt and *(b)* national debt outstanding at the end of the year 1987-88, the interest paid in 1987-88 in each case and the money supply in banking March.

Mr. Lilley: The national debt is provisionally estimated at 31 March 1988 as £197,295 million, of which £11,725 million is the provisional figure for floating debt. Interest paid on the national debt in 1987-88 was £16,233 million; including £924 million on floating debt. Full details will be given in the Consolidated Fund and national loans fund accounts and supplementary statements 1987-88, which will be published in December.

Money supply statistics have been reported on a calendar rather than banking month basis since October 1986. They are published in *Financial Statistics* table 11.1.

Bank Lending

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer what has been the increase in bank lending since May 1979; where the additional funds have come from; what effect he expects the increase in interest rates since the beginning of the year to have on banking profits; and what is his forecast of the increase in revenue to the Exchequer therefrom.

Mr. Lilley: Recent figures for bank lending are published in table 11.6 of *Financial Statistics*. Figures for earlier years are available from the Bank of England on request. Figures for banks' balance sheets are published in the Bank of England *Quarterly Bulletin* and earlier figures are likewise available from the Bank of England on request. Banks' profits are a matter for the institutions concerned. But the Autumn Statement will update the projections given for tax revenues in the Financial Statement and Budget Report.

Manufacturing Industry

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer what is his estimate of the elasticity of demand for imports and exports of manufactures relative to price; and whether he has any evidence that the elasticity in either case is different in the case of trade with the European Economic Community.

Mr. Major: Estimates of elasticities for exports and imports are published in the Her Majesty's Treasury "Macroeconomic Model Documentation, October 1987", a copy of which has been placed in the Library of the House. No estimates of these figures have been made for trade with the European Community.

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer what estimates he has of the proportion of the investment in plant and machinery in manufacturing industry in each of the past five years which has been due to *(a)* the change in the real exchange rate since 1976 and *(b)* lack of capacity.

Mr. Major: No such estimates are available.

Mr. Bowis: To ask the Chancellor of the Exchequer what has been the growth of manufacturing productivity in the economy since 1980.

Mr. Major: In the three months to May 1988 output per head in manufacturing was 50 per cent. higher than its average level in 1980.

Imports

Mr. Ian Taylor: To ask the Chancellor of the Exchequer if he will issue new guidelines to the Customs Commissioners regarding the suppression of information as to imports, in the light of the provisions contained in the Finance (No. 2) Bill; and if he will make a statement.

Mr. Lilley: Customs and Excise is fully aware of the need to operate the suppression arrangements with particular care in the light of the new provisions for disclosure of importers names and addresses introduced in the Finance (No. 2) Bill. Special methods will need to be adopted in order to mask information that might indirectly reveal details of the extent of business in a particular commodity. Customs is already discussing details with interested parties and will provide an adequate opportunity for comment on the new arrangements before they are implemented.

Money Supply

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing for each year since 1958 the estimated velocity of monetary circulation in terms of sterling M0 and sterling M3.

Mr. Lilley: The available figures are as follows:

Velocity of circulation
Ratio of money stock to Gross Domestic Product (Average) at current market price. Annual averages

	M0	*M3*
1963	—	2·94
1964	—	3·01
1965	—	3·04
1966	—	3·06
1967	—	3·02
1968	—	3·00
1969	—	3·13
1970	13·11	3·23
1971	13·50	3·21
1972	14·24	2·89
1973	14·43	2·64
1974	14·55	2·55
1975	16·02	2·97
1976	17·09	3·30
1977	18·02	3·57
1978	18·07	3·56
1979	18·78	3·71
1980	20·21	3·75
1981	21·31	3·48
1982	23·08	3·20
1983	23·73	3·15
1984	24·04	3·08
1985	25·19	3·02
1986	25·92	2·74
1987	27·05	2·47

The velocity of circulation is compiled on a quarterly basis. It is based on average end quarter estimates of M3 before June 1982, and on monthly M3 data thereafter. M0 is a monthly series throughout. M3 is not available before 1963 and M0 not available before 1970.

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing (i) the increase in cash terms in sterling MO and sterling M3 *(a)* from May 1979 to the latest available date and *(b)* between January 1974 and May 1979, (ii) the annual rate of inflation on these three dates, (iii) the increase in the amount lent by the banks to, respectively, the public sector and the private sector, (iv) the increase in outstanding mortgages on residential property, (v) the increase in producer and retail prices and (vi) the average annual rate of increase in each of the foregoing cases.

Mr. Lilley: The hon. Member refers in his question to sterling MO. That as such has never existed. I assume he means MO. Sterling M3 is now called M3.

Some of the data requested are not available monthly. In these cases, sources of calendar quarterly data are given.

Recent figures for MO are available in *Financial Statistics* table 11.4; earlier figures are available on the Central Statistical Office public database or from the Bank of England on request. M3 figures are available in *Financial Statistics* table 11.2 and 11.3 from June 1982; quarterly figures are available for earlier periods in the annual supplement of *Economic Trends* 1988, page 151. Figures for the general index of retail prices and index numbers of producer prices are available in the *Monthly Digest of Statistics* tables 18.1 and 18.6. Figures for bank lending to the public sector and private sector are available in *Financial Statistics* table 6.1 for recent monthly periods and quarterly for earlier periods. Recent quarterly figures for loans to the personal sector for house purchase are available in *Financial Statistics* tables 9.2 and 14.4; earlier figures are available on the Central Statistical Office public database, or on request from the Bank of England.

Banks (Assets)

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer what proportion of the assets held by United Kingdom banks are held in the form of *(a)* floating debt and *(b)* other Government securities; what was the comparable position in 1958; and what sums would now be required to enable the banks to re-establish the 1958 ratio.

Mr. Lilley: Recent figures for the assets of United Kingdom banks are published in tables 3.2, 3.3 and 3.4 of the Bank of England *Quarterly Bulletin*. Figures for 1958 are published in tables 9 and 10(2) of the Bank of England "Statistical Abstract", No. 1, 1970.

Duty-free Shops

Sir Dudley Smith: To ask the Chancellor of the Exchequer if he will state the current position with regard to EEC proposals on the future of duty-free shops; and what stance is being taken by Her Majesty's Government on this issue.

Mr. Lilley: This is presented by the Commission as a proposal consequential to its main proposals for tax approximation which are still under discussion in the Economic and Financial Affairs Council in Brussels. The United Kingdom has fundamental difficulties with the European Commission's central proposal, which we believe to be unnecessary for the completion of the single market.

There are no EC proposals which would affect the sales of duty-free goods to passengers travelling to and from destinations outside the EC.

Recruitment and Promotion Policy

Ms. Richardson: To ask the Chancellor of the Exchequer what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career break due to child care.

Mr. Brooke: As an equal opportunities employer, the Treasury issues guidance on codes of practice to be followed by those who sit on selection and promotion boards. Under internal promotions procedure, every effort is made to include at least one female board member.

Home Improvements

Mr. Cohen: To ask the Chancellor of the Exchequer what assessment he has made of the impact upon disabled owner-occupiers obtaining advances for adaptations to their homes of the abolition of tax relief for home improvements; and if he will make a statement.

Mr. Norman Lamont: The removal of relief for home improvements is part of the overall strategy of limiting,

where possible, the number of special reliefs within the tax system. Most home improvement loans have been found to be for items such as double glazing, generally unconnected with any disability of the borrower. Grants remain available to help disabled people meet the cost of home adaptations.

Exchange Rate

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer what was the real exchange rate against the deutschmark in February 1987; and if he will publish in the *Official Report* the amount by which United Kingdom export prices for manufactures have increased relative to German export prices since then.

Mr. Lilley: Nominal exchange rates are published daily in the national press. Figures for export prices for the United Kingdom and Germany are given in the IMF's "International Financial Statistics", monthly. Alternative price indices for constructing real exchange rate indices are also available in several international publications, including "International Financial Statistics".

Land and Buildings (Sales)

Mr. Gordon Brown: To ask the Chancellor of the Exchequer if he will publish in the *Official Report*, in the format of table 1 of Cm. 441, a table showing the *(a)* local authority, *(b)* central Government and *(c)* public corporation components of the sales of public sector land and buildings, consistent with the totals provided in his answer of 10 June, *Official Report* columns 705-9.

Mr. Major: The figures in table 1 of Cm. 441, though corresponding broadly to figures included in "The Government's Expenditure Plans 1988-89 to 1990-91" (Cm. 283), the Supply Estimates for 1988-89 and earlier years, and *Financial Statistics*, are illustrative and were provided only in order to give a guide to orders of magnitude. They are not underpinned and have not been analysed by economic category. As indicated in paragraphs 22 and 45 of Cm. 441, detailed baselines on the new basis will be established for the 1989 public expenditure survey and figures for the outcome will be published in the 1990 public expenditure White Paper.

EC (Economic and Monetary Union)

Mr. Spearing: To ask the Chancellor of the Exchequer at which meeting Her Majesty's Government have assented to the principle of economic and monetary union with the European Economic Community; in what manner any such agreement has been expressed; and by what means it has been communicated to Parliament.

Mr. Lilley: The first of the many meetings at which Community Heads of Government, with United Kingdom participation, reaffirmed the objective of economic and monetary union took place on 19-20 October 1972, and was reported in the subsequent communiqué. The outcome of that meeting was reported to Parliament on 23 October 1972, at columns 791-94.

Mr. Spearing: To ask the Chancellor of the Exchequer what assessment he has made of the advantages and disadvantages to the United Kingdom of *(a)* an EEC central bank and *(b)* a common currency in the EEC; and if he will make a statement.

Mr. Lilley: I refer the hon. Member to the Prime Minister's statement in the House on 23 June, at columns 1254-55.

Capital Gains Tax

Mr. Gordon Brown: To ask the Chancellor of the Exchequer if he will give the projected reduction in capital gains tax liability of *(a)* the top 1 per cent., *(b)* the top 5 per cent., *(c)* the top 10 per cent., *(d)* the bottom 70 per cent., *(e)* the bottom 60 per cent., *(f)* the bottom 50 per cent., and *(g)* the bottom 25 per cent. of those liable for capital gains tax in 1988-89, together with the total number of tax units estimated to be liable.

Mr. Norman Lamont: The estimated number of individuals and trusts liable to capital gains tax on disposals made in 1988-89 is 155,000. Available information is not sufficient to permit estimates of the reductions in gains tax liability at the levels of detail requested.

Arts

Mr. Tony Banks: To ask the Chancellor of the Exchequer what is his current estimate of the contribution made by the arts to the balance of payments figures.

Mr. Major: No comprehensive official estimate is available. Overseas income and expenditure relating to cultural activities enter directly or indirectly into many components of the balance of payments, especially travel and film and television services.

Value Added Tax

Mr. Tony Banks: To ask the Chancellor of the Exchequer what is his estimate of the total amount received in value added tax payments from arts institutions and bodies.

Mr. Lilley: I regret that an estimate is not available. Arts institutions and bodies do not constitute a separate VAT trader classification.

Mr. Corbyn: To ask the Chancellor of the Exchequer what representations he has received concerning the imposition of value added tax on new church buildings; and if he will make a statement.

Mr. Lilley: So far there have been only a few, but there is still plenty of time for representations to be made in response to the Customs and Excise consultation document issued on 21 June 1988.

Mr. Pike: To ask the Chancellor of the Exchequer what recent representations he has received regarding those items at present zero-rated for value added tax.

Mr. Lilley: I have received a number of representations in favour of retaining zero-rates of value added tax.

Bofors (Payments)

Mrs. Golding: To ask the Chancellor of the Exchequer what representations he has received from the authorities in India on the tax status and ultimate destination of payments made by Bofors of Sweden to the account of AE Services at Nordfinanz Bank, Zurich.

Mr. Norman Lamont: None.

Alcohol and Tobacco

Mr. Spearing: To ask the Chancellor of the Exchequer what response has been made by Her Majesty's Government to the proposals of the Commission of the European Economic Community to harmonise the rates of excise duty on alcohol and tobacco products.

Mr. Lilley: My right hon. Friend the Chancellor has made it perfectly clear to the Economic and Finance Council that the United Kingdom considers fiscal harmonisation unnecessary for the completion of the single market.

Public Expenditure

Mr. Wray: To ask the Chancellor of the Exchequer if he will indicate the areas of expenditure to which he attaches priority in making decisions on public expenditure for the forthcoming year.

Mr. Major: The Government's main objective for the current public expenditure survey is that public spending should be held as close as possible to the existing planning totals so that its share in national income continues to decline steadily over the three survey years. With this objective in mind, the Government will review their priorities and take decisions on individual programmes and the planning totals. These decisions will be announced as usual in the Autumn Statement in November.

Mr. Worthington: To ask the Chancellor of the Exchequer if he will publish in the *Official Report* an analysis of receipts to the programmes (19) Chancellor's Departments and (20) Other Departments for the years 1982-83 to 1990-91, consistent with the Chief Secretary's reply of 25 May, *Official Report*, columns *375-76*, analysing by function or nature of item (i) the receipts classified as charges with respect to programme expenditure, (ii) the receipts classified as charges with respect to running costs expenditure and (iii) the amounts of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mr. Major *[holding answer 28 July 1988]*: The readily available information on a consistent basis with that given in the earlier answer is given in the tables. Figures for receipts in respect of programme expenditure from other public expenditure programmes could be provided only at disproportionate cost.

Receipts which offset programme expenditure[1]

£ million

[1] The figures in this table are consistent with figures given in "The Government's Expenditure Plans 1988-89 to 1990-91" (Cm. 288).

Mr. Worthington: To ask the Chancellor of the Exchequer if he will publish in the *Official Report* a table for the years 1982-83 to 1990-91, parallel to, and consistent with, the earlier answer, *Official Report*, columns *375-76*, 25 May, showing income by departmental programme classified as receipts against running costs expenditure.

Mr. Major *[holding answer 28 July 1988]:* The information requested is given in the table. The figures in the table are consistent with my earlier answer and with information published in "The Government's Expenditure Plans 1988-89 to 1990-91" (Cm. 288); some of the figures differ slightly from those given to the hon. Member in response to a related question, which was asked of a number of different Departments, because no account has been taken, for the purposes of this table, of subsequent updates to these figures.

Other departments[3]	83	124	108	99	122	143	198	200	200
Total of departments	1,786	2,059	2,280	2,416	2,497	2,744	2,894	2,980	3,050

[1] The figures for 1989-90 and 1990-91 for DHSS-Social Security have been rounded to the nearest £100 million; other 1989-90 and 1990-91 figures are rounded to the nearest £10 million.
[2] Including Overseas Development Administration.
[3] Including Intervention Board for Agricultural Produce.
[4] This group comprises the Home Office, Lord Chancellor's Department, Northern Ireland Court Service, the Crown Prosecution Service, the Serious Fraud Office and the Crown Office, Procurator Fiscal Service and Lord Advocate's Department.
[5] Including Property Services Agency and Civil Superannuation.

Pound Sterling

Mr. Wray: To ask the Chancellor of the Exchequer what specific weight is given, when deciding policy, regarding the value of the pound sterling, to the following factors: *(a)* internal production of goods and services, *(b)* the creation or loss of jobs, *(c)* inflationary trends resulting from monetary and other economic pressures, *(d)* the state of the balance of payments, *(e)* productivity and *(f)* other economic considerations; and if he will make a statement.

Mr. Lilley: The Government's monetary policy is designed to exert continued downward pressure on inflation. Exchange rate policy is part of that overall policy. Decisions are taken within a continuous and comprehensive assessment of monetary conditions so as to maintain the required downward pressure on inflation.

Medium-term Financial Strategy

Sir Ian Gilmour: To ask the Chancellor of the Exchequer if he will make available the medium-term financial strategy assumptions for the medium-term growth of personal consumption, total fixed investments, the current balance of payments and unemployment which underlay each "Financial Statement and Budget Report" since 1980.

Mr. Major: I have nothing to add to the answer I gave to my right hon. Friend on 4 July, at column *480*.

Inland Revenue (Keith Report)

Mr. Chapman: To ask the Chancellor of the Exchequer what are the Government's intentions on implementing the remainder of the Keith committee's recommendations on the Inland Revenue's powers.

Mr. Norman Lamont: The Keith committee made wide-ranging recommendations for the modernisation of the Inland Revenue's administrative powers. Proposals in response to the recommendations were published in 1986 in the form of a consultative document, on which comments were invited. In the last two Budgets, and in the light of comments received, we have brought forward measures which give effect to some of these proposals.

The Revenue is today, with my approval, issuing a further consultative paper which contains new and revised proposals on the remaining issues, again taking account of representations received.

EC (Budget)

Mr. Chapman: To ask the Chancellor of the Exchequer if, following the adoption of the supplementary and amending budget for 1988, the European Commission has asked member states to make available their contributions under the 1988 intergovernmental agreement; and if he will make a statement.

Mr. Brooke: The Commission has requested that member states in a position to do so should make available on 1 August eight-twelfths of their agreed contributions under the 1988 intergovernmental agreement (IGA). In the United Kingdom's case, this would amount to 619 mecu (some £410 million). The Commission recognises that member states may have to defer payment until their domestic legislative procedures are complete. In this event, the Commission will continue to require overdraft facilities under article 12(2) of regulation 2891/77. The Government intend to provide such facilities to the Commission during August and will keep their position on the timing of IGA payments under review.

The outstanding amount of the overdraft for the United Kindom by the end of August is expected to be around £118 million. Repayment of any drawing under this facility will be made by deduction from future own resources payments. The article 12(2) facility does not affect the total amount which the Community is authorised to spend during the year. The Commission's request does not, therefore, involve any net addition to public expenditure.

Corporate Savings

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will bring up to date the information on corporate savings given in his written reply dated 7 July 1980, *Official Report*, column *71*.

Mr. Lilley *[holding answer 28 July 1988]:* The latest available information on the savings (after deducting depreciation and stock appreciation) of industrial and commercial companies and of financial companies and institutions for the years 1976 to 1986 is given in tables 5.6 and 5.8 of the 1987 edition of "United Kingdom National Accounts". Data for earlier years are on the CSO databank, which is available in the House of Commons Library.

National Savings

Mr. Boswell: To ask the Chancellor of the Exchequer what plans he has for changes in the system of national savings; and if he will make a statement.

Mr. Lilley: I regret that it has not been possible to provide an answer before the summer recess, and therefore I shall write to my hon. Friend and place a copy of the letter in the Library.

District Health Authorities (VAT)

Mr. Dobson: To ask the Chancellor of the Exchequer how much rebate has been paid annually since 1983-84 to district health authorities in respect of value added tax paid on work and services contracted out.

Mr. Lilley *[holding answer 28 July 1988]:* The amounts of value added tax reclaimed annually by regional health authorities since 1983-84 in respect of works and services contracted out are as follows:

Year	*Reclaimed £*
1983-84	5,511,073
1984-85	61,758,437
1985-86	115,444,090
1986-87	140,624,795
1987-88	147,782,353

Strip Searches (Gatwick Airport)

Ms. Ruddock: To ask the Chancellor of the Exchequer how many men and how many women have been strip-searched by customs officials at Gatwick airport in the last year; and what guidelines have been issued to customs officials on strip-searches.

Mr. Lilley *[holding answer 28 July 1988]:* Customs set up central records on search of the person in July 1987, but these records do not identify separately searches of men and women. Such information could be obtained only at disproportionate cost. For the period 1 July 1987 to 31 March 1988, 1,834 persons were strip-searched at Gatwick.

Section 164 of the Customs and Excise Act 1979 provides that officers may search persons where there are reasonable grounds to suspect that dutiable, prohibited or restricted goods are being carried. Customs officers are also obliged under the Police and Criminal Evidence Act 1984 to have regard to the relevant provisions of the codes of practice, including those concerning questioning of suspects and personal search in custody. In addition, officers are given guidance on search procedures in internal instructions and training courses.

National Insurance

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* his latest estimate of the yield from an increase of 1p in the standard rate of tax and in the employees' and employers' national insurance contribution, respectively, in 1988-89; and if he will divide the tax figure to show the yield from earned and unearned income.

Mr. Norman Lamont *[holding answer 27 July 1988]:* An increase of 1p in the basic rate of income tax is estimated to yield about £1·4 billion in full year at 1988-89 income levels; 90 per cent. of the yield is estimated to be from tax on earned income.

An increase of 1 per cent. in class 1 national insurance standard contribution rates is estimated to yield employee contributions of £1·75 billion and employer contributions of £2·0 billion in a full year at 1988-89 income levels.

Endangered Species

Mr. Tony Banks: To ask the Chancellor of the Exchequer (1) if he will provide a breakdown by species and number of the 209 live birds in the endangered species category seized by the Customs and Excise in the year to 31 March 1987;

(2) if he will provide a breakdown of the 1,395 live animals in the endangered species category seized by the Customs and Excise in the year to 31 March 1987.

Mr. Lilley *[holding answer 27 July 1988]:* The following information relates to live creatures imported in contravention of the restrictions imposed by the Endangered Species (Import and Export) Act 1976 or Council Regulation (EEC) No. 3626-82.

	Number
Birds	
African Grey Parrots	4
Indian Rosefinches	2
Kestrel	1
Musschen Broeks Lorikeets	51
Emerald Lorikeet	1
Wrinkled Hornbills	10
Citron Throated Toucans	20
Swainsons Toucans	16
Hyacinth Macaws	4
Goldfinches	100
Creatures other than birds	
Giant Tortoises	7
Vipcrine Snakes	147
Caspian Turtles	10
European Pond Turtle	1
Carpet Pythons	2
Ibiza Wall Lizards	500
Leopard Tortoises	2
Moorish Geckos	2
Tree Frogs	145
Pond Turtles	18
Edible Frogs	96
Tortoise	1
Bosc Monitors	22
Ocellated Skinks	24
Ground Lizards	264
Spiny-Tailed Lizards	80
Chilean Spotted Lizards	30
Leopard Geckos	15
Sand Boas	25
Chameleons	4

Mr. Tony Banks: To ask the Chancellor of the Exchequer if he will give details of seizures of live animals, live birds and articles derived from endangered species made by the Customs and Excise in the period since 31 March 1987.

Mr. Lilley *[holding answer 27 July 1988]:* The details sought are as follows. They relate to live creatures and articles derived from endangered species imported or exported in contravention of the restrictions imposed by the Endangered Species (Import and Export) Act 1976 or

Council regulation (EEC) No. 3626/82. The figures are provisional, having been compiled on the basis of seizures reported to date.

	Number
Birds	287
Creatures other than birds	2,285
Articles derived from endangered species	3,535

Mr. Tony Banks: To ask the Chancellor of the Exchequer what was the total estimated value of the seizures of endangered species of animals, birds and articles made by the Customs and Excise in each year since 1979.

Mr. Lilley *[holding answer 27 July 1988]:* Values or estimated values of many such seizures are not recorded centrally, if at all. The information sought could therefore be obtained only at disproportionate cost.

Mr. Tony Banks: To ask the Chancellor of the Exchequer if he will give details of the seizures of endangered species of animals and birds made by Her Majesty's Customs and Excise in each year from 1979 to 1987 and the information he has concerning related criminal proceedings taken, with penalties and costs imposed.

Mr. Lilley *[holding answer 27 July 1988]:* The details sought are shown in the following table. The figures for seizures relate to live creatures imported or exported in contravention of the restrictions imposed by the Endangered Species (Import and Export) Act 1976 or Council Regulation (EEC) No. 3626/82. Those for proceedings indicate the number of persons successfully prosecuted under the Customs and Excise Management Act 1979 for attempted evasion of the restrictions.

Year to 31 March	*Seizures*	*No. of persons convicted*	*Penalties/costs*
1979	28	1	£200
1980	Nil	1	6 months (reduced on appeal to 3 months)—£200
1981	173	2	£100
1982	643	2	£700
1983	447	4	£800
1984	1,125	6	£2,250
1985	655	1	£650
1986	264	4	13 months (suspended for 2 years); £1,045
1987	1,604	9	£5,545
1988	2,284	5	£3,325

Mr. Tony Banks: To ask the Chancellor of the Exchequer if he will provide a breakdown of the 6,000 articles derived from endangered species by *(a)* type, *(b)* animal and *(c)* country of origin seized by the Customs and Excise in the year to 31 March 1987.

Mr. Lilley *[holding answer 27 July 1988]:* As the information requested is very long I shall write to the hon. Member and place a copy in the Library.

EC Budget Council

Mr. Summerson: To ask the Chancellor of the Exchequer if he will make a statement on the outcome of the recent meeting of the European Community's Budget Council.

Mr. Peter Brooke *[pursuant to his reply, 28 July 1988]:* I regret that the own resources call up rate implied by the draft budget was incorrectly stated to be 1·15 per cent. of Community GNP; it is 1·11 per cent. of Community GNP.

Private Medical Insurance

Mr. Dobson: To ask the Chancellor of the Exchequer, pursuant to his reply of 13 July, *Official Report*, column *199*, to the hon. Member for Strathkelvin and Bearsden (Mr. Galbraith), how many people benefit from the income tax relief scheme for private medical insurance; which figures were used to estimate the cost of giving relief on all premiums to arrive at the sum of £240 million; and in which year those figures were compiled.

Mr. Norman Lamont *[holding answer 28 July 1988]:* It is estimated that in 1988-89 between 100,000 and 150,000 employees will not be taxed on the benefit of private medical insurance provided by their employers because their employment income and benefits come to less than £8,500 per year, the level at which the special rules for taxing benefits-in-kind begin to apply. Estimates of the cost of granting tax relief on all private medical insurance are derived from analyses of various surveys including the 1985-86 survey of expenses and benefits, the family expenditure survey, the general household survey and aggregate figures on private medical insurance premiums. The estimate given on 13 July related to 1988-89.

National Accounts

Mr. Worthington: To ask the Chancellor of the Exchequer (1) if he will publish in the *Official Report* an analysis for the years 1976 to 1986 by functional category of *(a)* the income from fees and charges shown as lines GTCQ, footnote 1 of table 7.2, and line CTNC of footnote 6 of table 8.2 and *(b)* the capital receipts shown as line GTDL, footnote 2 of table 7.3 and line CTCS, footnote 2 of table 8.3 of the United Kingdom National Accounts (1987 edition).

(2) if he will publish in the *Official Report* an analysis for the years 1977 to 1986 in the same COFOG classification as table 9.4 of United Kingdom National Accounts (1987 edition) of *(a)* the income from fees and charges and *(b)* the capital receipts, which have been netted against each line entry.

Mr. Major *[holding answer 28 July 1988]:* The information requested could be compiled only at disproportionate cost.

Mr. Worthington: To ask the Chancellor of the Exchequer if he will publish in the *Official Report* an analysis, comparable to table 8.5 (housing operating account), for the years 1976 to 1986 of the derivation of the line entries under subsidies to water supply, passenger transport, and other economic affairs and services, in table 8.2 of the United Kingdom National Accounts (1987 edition).

Mr. Major *[holding answer 28 July 1988]:* It is not possible without disproportionate expense to give the analysis requested in the question. In table 8.2 subsidies comprise payments by local authority rate funds to their own trading services and to public corporations. Some information on payments to their own trading services for individual financial years may be found in the trading

services revenue account tables in "Local Government Financial Statistics", published separately for England, Scotland, Wales.

Mr. Worthington: To ask the Chancellor of the Exchequer if he will publish in the *Official Report* a functional analysis, using the COFOG classification, for the years 1976 to 1986 of the line entries for *(a)* gross trading surplus, *(b)* rent and *(c)* imputed charge for consumption of non-trading capital, in tables 7.2 and 8.2 of the United Kingdom National Accounts (1987 edition) indicating, where appropriate, the corresponding charges for depreciation.

Mr. Major *[holding answer 28 July 1988]:* The functional analysis using the COFOG classification is produced only for government expenditure, and is not wholly appropriate for revenue items, as requested.

Mr. Worthington: To ask the Chancellor of the Exchequer if he will publish in the *Official Report* a detailed analysis for the years 1976 to 1986 of the composition of miscellaneous current transfers in table 7.2 of the United Kingdom National Accounts (1987 edition).

Mr. Major *[holding answer 28 July 1988]:* The information is as follows:

Analysis of miscellaneous transfers (£ millions)

	Total	*Passport fees*	*Court fines and fees*	*Driving licences*	*Public service vehicle licence fees*	*Other*[1]
1976	118	12	55	36	9	6
1977	136	19	62	37	12	6
1978	151	26	71	37	11	6
1979	136	28	79	11	11	7
1980	164	34	97	11	16	6
1981	164	27	102	11	19	5
1982	184	37	111	15	13	8
1983	214	35	124	30	16	9
1984	226	48	135	17	14	12
1985	209	42	130	15	14	8
1986	241	51	150	16	15	9

[1] Other comprises penalties for vehicle licence offences, Road Traffic Act and sheriff court fines in Scotland, driving licence fees, public service vehicle licence fees, OFTEL fees and dog and gun licences.

Mr. Worthington: To ask the Chancellor of the Exchequer if he will publish in the *Official Report* table 9.4 of the United Kingdom National Accounts (1987 edition), expressed in 1980 prices.

Mr. Major *[holding answer 28 July 1988]:* The available information at constant prices is given in table 9.3. It would be conceptually difficult and involve disproportionate cost to calculate table 9.4 at constant prices.

West Yorkshire

Mr. O'Brien: To ask the Chancellor of the Exchequer what representations he has received from the West Yorkshire valuation office over the increased burden on the office because of the revaluation of non-domestic properties in West Yorkshire due to take effect in 1990; and if he will make a statement.

Mr. Norman Lamont *[holding answer 28 July 1988]:* I regret that it has not been possible to provide an answer before the summer recess; therefore, I shall write to the hon. Member and place a copy of the letter in the Library.

Invisible Earnings (Arts)

Mr. Bowis: To ask the Chancellor of the Exchequer what have been the invisible earnings of the arts for each of the past 10 years.

Mr. Major *[holding answer 28 July 1988]:* No comprehensive official estimates are available. A number of components in the invisibles account will be affected directly or indirectly by expenditure relating to cultural activities, especially travel and film and television services.

Dewe Rogerson Limited

Dr. Cunningham: To ask the Chancellor of the Exchequer what was the fee paid to Dewe Rogerson Limited marketing consultants, for each of their appointments as advisers on privatisation issues since 1979.

Mr. Brooke *[holding answer 27 July 1988]:* For reasons of commercial confidentiality the Government do not give details of payments made to individual companies for privatisation advice.

Interest Rates

Mr. Nicholas Bennett: To ask the Chancellor of the Exchequer if he will list real and actual interest rates in each European Community country on 25 July.

Mr. Lilley *[holding answer 28 July 1988]:* The table gives nominal interest rates on 25 July for the 12 member countries of the European Community. There is no unique measure of "real" interest rates. Indices of consumer and producer prices, which are sometimes used to deflate nominal interest rates, are given in "OECD Main Economic Indicators", monthly.

Interest rates in EC countries[1]

Country	*Rate*
Germany	4·9
France	7·4
Italy	11·5
Netherlands	5·1
Belgium	7·1
Luxembourg	7·1
United Kingdom	10·8
Republic of Ireland	7·9
Denmark[2]	7·0
Spain	10·2
Portugal[2]	13·5
Greece[2]	19·0

Source: Bank of England.

[1] Rates are usually for instruments of three-months maturity, but the type of instrument differs from country to country. Rates are for 25 July.

[2] Discount rate.

Social Science Research

Mr. George: To ask the Chancellor of the Exchequer how much has been spent by his Department in each of the past five years on social science research; what percentage this constitutes of total departmental expenditure and of

the Department's research budget; and how much of the research has been undertaken *(a)* within his Department, *(b)* by universities and polytechnics and *(c)* by independent research organisations.

Mr. Brooke *[holding answer 28 July 1988]:* The information requested for social science research undertaken outside the Department is as follows:

£ million

	1983-84	*1984-85*	*1985-86*	*1986-87*	*1987-88*
Total social science research	0·3	0·3	0·3	0·3	0·3
of which:					
Universities and polytechnics[1]	0·2	0·2	0·2	0·2	0·2
Independent research organisations	0·1	0·1	0·1	0·1	0·1
Percentage of total departmental expenditure[2]	0·18	0·22	0·17	0·15	0·14

[1] Includes contribution to joint ESRC-Treasury Macroeconomic Modelling Consortium.
[2] Departmental expenditure covers class XIX, votes 11, 12 and 15 of the Appropriation Accounts.

Expenditure on social science research accounts for the total of central Treasury departmental expenditure on research. Separate figures for social science research conducted within the Treasury are not available.

Company Borrowing

Mr. Chris Smith: To ask the Chancellor of the Exchequer what is his estimate of the proportions of total borrowing by companies during the past six months, represented by *(a)* funds required to finance mergers and takeovers, *(b)* funds for investment in new plant, machinery, research and development and training and *(c)* funds for other purposes.

Mr. Major: This is a matter for my right hon. Friend the Chancellor of the Duchy of Lancaster.

Mortgages

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing for each year since 1981 the increase in mortgage funds for housing together with the increase in the value of the houses sold by reference to stamp duty or otherwise.

Mr. Trippier: I have been asked to reply.

Information on numbers of houses purchased with mortgages and on the prices paid is available only from building societies, insurance companies and, from 1983, banks.

Following are the available estimates:

Purchases of dwellings with mortgage advances United Kingdom

£ billion

	Gross advances		*Aggregate purchase price*	
	Amount	*Increase over previous year*	*Amount*	*Increase over previous year*
Excluding banks				
1981	13·0	2·2	19·0	2·3
1982	16·8	3·8	21·9	2·9
1983	20·4	3·6	26·3	4·4
Including banks				
1983	25·0	not available	31·8	not available
1984	29·0	4·0	37·3	5·5
1985	33·6	4·6	41·7	4·4
1986	47·5	13·9	56·8	15·1
1987	50·2	2·8	56·9	0·1

Note:
Information on the gross amount of advances by other financial institutions, including some of the specialised mortgage lenders, and on the number and price of the dwellings purchased is not available.

Corporation Tax

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* his forecast of the yield in revenue from corporation tax and advance corporation tax in the current financial year and in 1989-90 net of double taxation relief; and if he will include figures showing the amount of tax collected as a percentage of gross trading profit and as a percentage of the amount paid out in dividends.

Mr. Norman Lamont *[holding answer 27 July 1988]:* The latest estimate of the yield in revenue from corporation tax and advance corporation tax for the current financial year is £19·8 billion. The forecast for 1989-90 will be published in the next Financial Statement and Budget Report.

Mainstream corporation tax collected in 1987-88 was 21 per cent. of the gross trading profit in 1986. Advance corporation tax collected in 1987-88 was 36 per cent. of the amount of dividends paid out in 1987.

HOME DEPARTMENT

Mr. Jonas Savimbi

Mr. Anderson: To ask the Secretary of State for the Home Department what passport was used by Mr. Jonas Savimbi to enter the United Kingdom; and whether a visa was required.

Mr. Renton: On arrival in the United Kingdom on 6 July Mr. Jonas Savimbi used a passport issued by the Government of the Ivory Coast; a visa was not required. He was admitted as a visitor in accordance with the immigration rules.

Recruitment and Promotion Policy

Ms. Richardson: To ask the Secretary of State for the Home Department what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career break due to child care.

Mr. Hurd: Home Office recruitment advertisements emphasise that applications will be welcomed regardless of the sex or marital status of candidates, and there are no barriers to mature candidates and those returning to work.

Recruitment interviewers receive specific training which focuses on the risks of conscious and unconscious discrimination, and how to avoid them.

Subject to the application of seniority fields for a few grades, promotion in the Home Office is strictly on merit. All promotion board members receive training and are required to follow departmental guidance on fair and non-discriminatory procedures. There are specific arrangements to ensure that members of staff on maternity leave are considered by promotion boards.

Police (Special Branches)

Mr. Andrew F. Bennett: To ask the Secretary of State for the Home Department how many police officers and civilians are serving in, or responsible to, the special branches of the police forces in England and Wales listed by the police force.

Mr. Hurd: I refer the hon. Member to the reply I gave to the hon. Member for Brent, East (Mr. Livingstone) on February 29, at column *390*, which gives the information that is readily available.

Detective Inspector Lee Marvin

Mr. Austin Mitchell: To ask the Secretary of State for the Home Department whether his Department was consulted by former Detective Inspector Lee Marvin about his intention to publish his recollections of the cases in which he was involved.

Mr. Douglas Hogg: No.

Mr. Austin Mitchell: To ask the Secretary of State for the Home Department what action he proposes to take against Detective Inspector Lee Marvin for publication of information in the Sun newspaper.

Mr. Douglas Hogg: My right hon. Friend has no power to take action against former police officers who reveal information which was obtained in the course of their police duties. In cases where there appears to have been an offence under the Official Secrets Act, it is for my right hon. and learned Friend the Attorney-General to consider what action should be taken. A retired police officer may also be liable to face an action under the civil law for breach of confidence if he reveals information which was imparted to him in confidence in the course of his police duties.

Seat Belts

Mr. Neil Hamilton: To ask the Secretary of State for the Home Department how many prosecutions have ensued as a result of the failure to wear seat belts in motor vehicles, since it was made compulsory to do so; and how many fines for this offence are currently outstanding in England and Wales.

Mr. John Patten: Information on proceedings, findings of guilt and types of sentence imposed at magistrates' courts for offences of driving or riding in a motor vehicle not wearing a seat belt and of driving a motor vehicle with a child in the front not wearing a seat belt is published annually in "Offences Relating to Motor Vehicles England and Wales, Supplementary Tables" (table 5 of the issue for 1986), copies of which are in the Library. Figures for 1987 will be published later this year. Information on the number or amount of fines outstanding for these specific offences is not collected centrally.

Official Secrets

Mr. Austin Mitchell: To ask the Secretary of State for the Home Department whether he will take steps to extend to police officers the restrictions presently imposed on security officers in respect of confidentiality and official secrets.

Mr. Douglas Hogg: Police officers are already subject to the Official Secrets Act. It is an offence under the Police (Discipline) Regulations 1985 to communicate to any other person without proper authority any information which a police officer has obtained in the course of his police duties.

Mr. Austin Mitchell: To ask the Secretary of State for the Home Department what restraints exist on publication by former police officers of their memoirs and on reminiscences of details of recent work in which they were involved.

Mr. Douglas Hogg: The Official Secrets Act continues to apply to retired police officers and, like any other person to whom matters may have been imparted in confidence, a retired police officer may be liable to face an action under the civil law for the consequences of a breach of that confidence.

Mohammad Anwar

Mr. Corbyn: To ask the Secretary of State for the Home Department if he will now answer letters from the hon. Member for Islington, North dated 15 December 1987, 10 February 1988 and 12 July 1988 concerning Mohammad Anwar (A352040); and when Mr. Anwar can expect to hear the outcome of his 1983 and 1985 applications for asylum and residence in the United Kingdom.

Mr. Renton: I shall write to the hon. Member shortly.

Javier Antonio Farje Moscoso

Mr. Corbyn: To ask the Secretary of State for the Home Department if he will now reply to the letter of 7 July from the hon. Member for Islington, North concerning Javier Antonio Farje Moscoso.

Mr. Hurd: I have asked the chief constable of Greater Manchester police for a report on the contents of the letter of 7 July from the hon. Member. The hon. Member will receive a reply as soon as possible.

Risley Detention Centre (Strip Searches)

Mr. McNamara: To ask the Secretary of State for the Home Department how many category A prisoners are at present held on remand at Risley detention centre; to how many strip searches they have been subjected in June, giving the number of persons involved, the number of times each person was searched and if any prison contraband, smuggled item or illgal correspondence was discovered in any search, indicating which items; in how many cases prisoners refused to be searched and had to be restrained while a search was being conducted; and what were the reasons for the search under each of the following headings: *(a)* making a remand appearance at court, *(b)* attending a trial, *(c)* inter-prison visit and *(d)* other reasons.

Mr. Douglas Hogg: On 28 July there were seven inmates on remand at Risley remand centre who had been placed

in category A. Comprehensive records of strip searches are available only in respect of category A women prisoners, of whom there was one in Risley on the date in question. The records show that this prisoner was strip-searched on three occasions in June—twice in connection with her temporary transfer to another prison, and one at the time of a cell change.

No unauthorised article was discoverd on any of these occasions. On no occasion did the prisoner refuse to be strip-searched.

Durham Prison (Strip Searches)

Mr. McNamara: To ask the Secretary of State for the Home Department how many category A women prisoners there were in Her Majesty's prison, Durham, in June; and how many strip searches were made on these prisoners in that month, indicating strip searches before and after consultation with legal advisers, after visits and after cell changes, wing searches and cell searches, and listing reasons for searches and illegal contraband or smuggled items found.

Mr. Douglas Hogg: During June, there were three category A women prisoners in Durham prison. The number of occasions on which each was strip-searched during the month is shown in the table:

	Inmate A	*Inmate B*	*Inmate C*
After legal visits	—	—	—
After other visits	2	1	1
At the time of cell changes, and wing and cell searches	2	1	1
Others	—	—	2

No unauthorised article was found on any of the three women. I set out the reasons for such searches in my reply to a question from the hon. Member on 15 January at column *446*.

Departmental Advisers (Guidelines)

Mr. Andrew F. Bennett: To ask the Secretary of State for the Home Department when guidelines to his advisers appointed under section 7 of the Prevenion of Terrorism (Temporary Provisions) Act 1984 came into force; what status they have; and if he will place a copy of those guidelines in the Library.

Mr. Hurd: No guidelines have been given to the advisers appointed by the Secretary of State under section 7 of the Prevention of Terrorism (Temporary Provisions) Act 1984.

Prevention of Terrorism (Temporary Provisions) Act 1984

Mr. Andrew F. Bennett: To ask the Secretary of State for the Home Department when he intends to publish a Bill to replace the Prevention of Terrorism (Temporary Provisions) Act 1984.

Mr. Hurd: The Government intend to publish proposals for legislation to replace the Prevention of Terrorism (Temporary Provisions) Act 1984 later in the life of this Parliament.

Mrs. Ann Taylor: To ask the Secretary of State for the Home Department what was the number of British citizens against whom a new exclusion order was made under section 3(5) of the Prevention of Terrorism (Temporary Provisions) Act 1984 in each year from 1984 to 1988, who were not served with their new order within two weeks of it being made; and how many remain so to be served.

Mr. Hurd: I am informed that all exclusion orders made under the Prevention of Terrorism (Temporary Provisions) Act 1984 between the coming into force of the Act on 22 March 1984 and 31 March 1988, against British citizens not previously excluded, were served within two weeks of being made.

Mrs. Ann Taylor: To ask the Secretary of State for the Home Department if he will describe the procedure currently followed when conducting reviews prior to the expiry date of an exclusion order made under sections 4, 5 and 6 of the Prevention of Terrorism (Temporary Provisions) Act 1984 to determine whether a new exclusion order should be made under the Act; and what opportunity is offered to the individual concerned to make representations against the new order.

Mr. Hurd: One month after an exclusion order is made a letter is sent to the subject of the order explaining that before the order expires, three years from the date it was made, the Secretary of State will consider whether or not to make a further order. The excluded person is invited to inform the Home Office of any change of address during the next three years so that contact can be made when the review is due. Enclosed with the letter is a form which the excluded person may use at any time to give details relevant to the reconsideration of the order; the person is asked whether he is prepared to be interviewed by a police officer as part of the review process. The person is asked to return the form after about two and a half years. If it is not returned, a further form will be sent at that time, and the authorities in Northern Ireland will be asked for help in tracing the person's current address, if necessary.

If the Secretary of State decides to make a further order, the excluded person, when he is sent the order, is told of his rights under section 7 of the 1984 Act to make representations against the order.

Leeds Prison (Suicides)

Mr. Lofthouse: To ask the Secretary of State for the Home Department if he will order an inquiry into the incidence of suicides at Leeds prison since June 1987.

Mr. Douglas Hogg: The prison department undertakes inquiries into all inmate suicides in order to try to prevent future deaths, and coroners' inquests are held on all deaths of prisoners. We do not think that there are any grounds for setting up a formal inquiry into suicides at Her Majesty's prison, Leeds.

Chief Inspector Brian Woollard

Mr. Corbyn: To ask the Secretary of State for the Home Department what representations he has received concerning the case of chief inspector Brian Woollard; and if he will make a statement.

Mr. Douglas Hogg: Chief Inspector Woollard has recently reiterated his request for an independent inquiry into the influences of freemasonry in the Metropolitan police. Several hon. Members have written in support of

this request, or enclosing letters from constituents expressing concern about Mr. Woollard's treatment. No representations have been received directly from members of the public.

The Secretary of State has carefully considered Mr. Woollard's request but remains of the opinion that it would be inappropriate to exercise his power under section 32 of the Police Act 1964 to appoint a local inquiry into Mr. Woollard's allegations.

Mr. Woollard appeared before a disciplinary board on 25 May charged with being absent from duty. He was dismissed from the force. He has appealed against this decision to the Commissioner.

Vehicles (Metropolitan Police Area)

Mr. Corbyn: To ask the Secretary of State for the Home Department how many vehicles in the Metropolitan police area have been *(a)* removed and *(b)* wheel-clamped for each year since 1985.

Mr. Douglas Hogg: I understand from the Commissioner of Police of the Metropolis that the figures are as follows:

Year	*Vehicles removed*	*Vehicles wheel-clamped*
1985	41,531	34,810
1986	44,590	33,270
1987	45,292	111,032
1988 (to 15 July)	48,657	62,831

General Evren

Mr. Corbyn: To ask the Secretary of State for the Home Department when he expects to reply to the hon. Member for Islington, North following his holding answer of 18 July concerning the visit to Britain of General Evren.

Mr. Douglas Hogg: I replied to the hon. Member yesterday.

Emergency Planning (Local Authority Budgets)

Mr. Gerald Bowden: To ask the Secretary of State for the Home Department what assessment he has made of the effects on the efficiency of emergency planning of the reductions proposed in local authority budgets for 1988-89.

Mr. John Patten: Local authority bids for civil defence grant aid this year were substantially in excess of the planned provision which had been increased to £21·8 million from £19·4 million in 1987-88. Provisional approvals for expenditure have now been allocated taking account of the 1988-89 provision. These matters are the subject of current discussions with local authorities.

Motorways (Parked Vehicles)

Mr. Hill: To ask the Secretary of State for the Home Department what future steps he will take to ensure that the police exercise their duty to clear parked vehicles from motorway hard shoulders.

Mr. Douglas Hogg: We have no reason to doubt that police forces generally are making every effort to secure the prompt clearance of vehicles from the hard shoulders of motorways, but if my hon. Friend has any particular case or circumstances in mind, I would be grateful if he would bring this to the attention of the chief officer of the force concerned.

Neighbourhood Watch Schemes

Mr. Hill: To ask the Secretary of State for the Home Department what steps he will take to ensure that more neighbourhood watch schemes are instituted; and if he will issue guidelines to chief officers of police on how best to co-operate with the scheme.

Mr. John Patten: There are now almost 56,000 neighbourhood watch schemes in England and Wales involving some 3 million households. Nevertheless, there is certainly scope for the further development of the neighbourhood watch concept and for the establishment of new schemes. We believe that schemes are likely to be most effective when they are the product of action by concerned local people. I am pleased therefore that one of the first tasks of Crime Concern, the new independent national crime prevention organisation which was launched on 23 May, will be to promote and support local effort of this kind. We are also currently considering the issue of a guidance note intended to facilitate the establishment of neighbourhood watch schemes.

Police Officers (Service)

Mr. Steinberg: To ask the Secretary of State for the Home Department (1) pursuant to the answer to the hon. Member for City of Durham of 6 July, *Official Report*, column 591-2, how many of the 2,831 vacancies caused in 1987 by constables leaving the police before completing 30 years' service have been filled; and if he will break down the information by constabulary;

(2) pursuant to the answer of 6 July, *Official Report*, column 591-2, how many of the 584 vacancies caused in 1987 by the premature departure of officers at sergeant rank and above have been filled by promotion; and how many of the gaps left in the ranks from which these promotions were made have been filled.

Mr. Douglas Hogg: The information is not available centrally and could be obtained only at disproportionate cost.

Police Manpower

Mr. Steinberg: To ask the Secretary of State for the Home Department if his recently announced increases in police manpower are in every case additional to the new recruits needed to fill the vacancies created by the premature departure of police officers at all ranks.

Mr. Douglas Hogg: Yes.

Mr. Steinberg: To ask the Secretary of State for the Home Department if he will publish in the *Official Report* a table showing, for each constabulary in England and Wales *(a)* the numbers of black and Asian officers, *(b)* this figure as a percentage of total force strength and *(c)* the numbers of black and Asian officers who have left before completing 30 years.

Mr. Douglas Hogg: There is no central record of the numbers of black and Asian officers who have left police forces before completing 30 years' service. The other information requested is as follows:

Police force	Number of black-Asian officers in post 30 June 1988	Percentage of force strength at 30 June 1988
Avon and Somerset	15	0·50
Bedfordshire	27	2·70
Cambridgeshire	19	1·63
Cheshire	1	0·05
Cleveland	4	0·27
Cumbria	1	0·09
Derbyshire	19	1·06
Devon and Cornwall	2	0·07
Dorset	3	0·24
Durham	2	0·15
Dyfed-Powys	0	0·00
Essex	14	0·51
Gloucestershire	8	0·70
Greater Manchester	78	1·13
Gwent	2	0·20
Hampshire	7	0·23
Hertfordshire	17	1·06
Humberside	3	0·15

West Yorkshire	70	1·35
Wiltshire	8	0·73
City of London	1	0·13
Metropolitan	417	1·51

Police Officers (Dismissals)

Mr. Steinberg: To ask the Secretary of State for the Home Department if he will state, by constabulary, how many police officers of all ranks were dismissed in 1987.

Mr. Douglas Hogg: The information is as follows:

	Number
Avon and Somerset	1
Derbyshire	3
Essex	2
Greater Manchester	2
Hampshire	1
Lancashire	2
Merseyside	1
Metropolitan	15
Northamptonshire	1
North Wales	1
South Wales	3
Surrey	1
Warwickshire	1
West Mercia	1
West Yorkshire	1

Foreign Nationals

Mr. Thurnham: To ask the Secretary of State for the Home Department how many foreign nationals were arrested in the United Kingdom during 1987, and during 1988 to date.

Mr. Douglas Hogg: The information requested is not available.

Domestic Disputes (Bolton)

Mr. Thurnham: To ask the Secretary of State for the Home Department how many custodial sentences were made by courts in Bolton for crimes relating to domestic disputes *(a)* in 1977, *(b)* in 1987 and *(c)* during 1988 to date.

Mr. John Patten: Information available to the Department on the outcome of criminal court cases does not separately identify crimes relating to domestic disputes.

Remand Prisoners

Mr. John Greenway: To ask the Secretary of State for the Home Department what is the total number of prisoners currently held on remand, including those prisoners held in police cells; and what proportion this represents of the total prison population.

Mr. Douglas Hogg: On 30 June 1988 there were about 10,800 untried and convicted unsentenced prisoners in prison department establishments in England and Wales. A further 724 prisoners, most of whom would have been on remand, were held in police cells. Including those in police cells, the remand population was about 23 per cent. of the prison population.

Mr. John Greenway: To ask the Secretary of State for the Home Department what was the total number of prisoners held on remand during the latest available year who were subsequently at trial *(a)* found innocent and *(b)* found guilty but not sentenced to a term of imprisonment; and what proportion these figures represent of the total number of prisoners held on remand that year.

Mr. Douglas Hogg: The latest available information is given in the following table, updating the information published in table 2.2 of "Prison Statistics, England and Wales 1986" (Cm. 210), copies of which are in the Library.

Receptions of untried prisoners and convicted unsentenced prisoners during 1986: by outcome of court proceedings

Outcome	Number of persons[2]
Found not guilty or not proceeded against	2,800
Given a non-custodial sentence or freed on rising[1]	19,200
Received under sentence	33,100
Ultimate disposal not recorded	8,400
Total received	63,500

[1] Includes hospital orders, guardianship orders and care orders, under some of which the offender is not released into the community but is committed to a non-penal establishment. Persons freed on rising are those who were sentenced to immediate custody of such length that it had already been served on remand.

[2] Rounded estimates.

Mr. John Greenway: To ask the Secretary of State for the Home Department what is the total number of prisoners currently held on remand who have their privileges withheld by the prison officers or authorities.

Mr. Douglas Hogg: The information requested is not held centrally and could be obtained only at disproportionate cost.

Prison Population

Mr. John Greenway: To ask the Secretary of State for the Home Department what was *(a)* the certified normal prison population and *(b)* the actual population on the latest available date for Her Majesty's prisons in England and Wales.

Mr. Douglas Hogg: On Friday 22 July, the most recent date for which figures are available, the total certified normal accommodation of Her Majesty's prison establishments in England and Wales was 44,179 and the total population was 49,915. There were additionally 649 prisoners held in police cells.

Immigration (Carriers' Liability) Act 1987

Mr. McLoughlin: To ask the Secretary of State for the Home Department how many notices of liability to pay a charge have been issued under the Immigration (Carriers' Liability) Act 1987; and if he will make a statement.

Mr. Renton: The Immigration (Carriers' Liability) Act 1987 has proved to be an effective deterrent to persons travelling to the United Kingdom with inadequate documentation. Between 5 March 1987, when the Act came into effect, and 30 June 1988 a total of 6,791 notices of liability to pay the £1,000 charge were issued. The decrease in recent months is thought to be due to more effective document checks being made by carriers at ports and airports of embarkation, and to an extensive training programme, which is continuing, arranged by the immigration service.

Number of notices of liability to pay a charge issued under the Immigration (Carriers' Liability) Act 1987

Period	*Number*
1987	
5 March to 30 June	1,594
July	898
August	658
September	587
October	425
November	324
December	367
1988	
January	384
February	266
March	344
April	329
May	284
June	331

Parliamentary Boundary Commission for England

Mr. Greg Knight: To ask the Secretary of State for the Home Department when he expects to receive the report of the Parliamentary Boundary Commission for England on its next general review.

Mr. Hurd: The commission is obliged to report on the whole of England between 1 February 1993 and 31 January 1998. The exact timing and conduct of any review is a matter for the commission.

However, I understand that, at present, the commission hopes to submit a report to me as early as it can within the statutory period, providing there are no unforeseen delays.

Complaints

Mrs. Beckett: To ask the Secretary of State for the Home Department what is the practice of public bodies for which he is responsible, other than the Criminal Injuries Compensation Board, with regard to issuing to complainants, with an acknowledgement of their complaint, a printed card telling them not to write or phone to check on the progress of their complaint since this will slow its progress; and if he will make a statement.

Mr. Hurd *[holding answer 22 July 1988]:* The Criminal Injuries Compensation Board is the only public body for which I am responsible to adopt this practice.

TRANSPORT

Departmental Recruitment and Promotion Policy

Ms. Richardson: To ask the Secretary of State for Transport what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career break due to child care.

Mr. Peter Bottomley: Women are encouraged to return to work by arrangements for reinstatement and by the availability of part-time working, job sharing and special leave for domestic reasons.

The Department has a policy of fair and open competition in recruitment and promotion. The only upper age limit for new entrants recruited directly by the Department is that they need to be able to give five years' service before retirement. Staff are not normally selected for promotion within two years of retirement.

Motorways (Repair)

Mr. Amess: To ask the Secretary of State for Transport how many miles of motorway have been repaired for each of the last five years; at what cost; and if he will list the number of miles by motorway and express the figures as a percentage of the total number of miles for each motorway.

Mr. Peter Bottomley: The table shows the miles of motorway planned for renewal in each of the years from 1984-85 to 1987-88, and the percentages which these are of the length maintained. Costs for major maintenance are also given (outturn for 1984-85 and 1985-86 and allocated total figures for 1986-87 and 1987-88). Information for 1983-84 is not readily available.

Renewal is generally associated with major maintenance schemes. Other maintenance work is also carried out on motorways. For 1987-88 £34 million was allocated to such work.

	1984-85	1985-86	1986-87	1987-88	Total	Renewal as percentage of road length
M1	19·7	14·6	22·4	19·9	76·6	41
M2	3·4	2·1	4·9	1·8	12·2	49
M3	3·5	—	1·0	1·5	6·0	12
M4	7·9	4·8	4·5	4·9	22·1	19

Total	80	70	80	84	314	
Cost (£m)	[1]92	72	83	94		

[1] Includes an element for repairs to highway structures where these were carried out in conjunction with carriageway maintenance.

Midland Metro (Exhibition)

Mr. Grylls: To ask the Secretary of State for Transport if his Department has considered an application for an exhibition relating to Midland Metro to be displayed in the Upper Waiting Hall.

Mr. Portillo: I understand that arrangements have been made with the authorities of the House for the exhibition to be held in the Upper Waiting Hall from 19 December to 23 December.

Road Accident Statistics

Mr. Amess: To ask the Secretary of State for Transport what number and what percentage of all accidents on motorways for each of the last five years involved coaches; and how many were caused by coaches exceeding the speed limit.

Mr. Peter Bottomley: The table shows the number and percentage of all accidents involving coaches on motorways for each of the last five years. The 1987 data are provisional but are unlikely to change. The accident report form used by the police does not record whether any of these coaches were exceeding the speed limit.

Accidents involving coaches on motorways: Great Britain: 1983-87

Year	Number of accidents involving coaches	As percentage of all accidents
		Per cent
1983	82	2·1
1984	94	2·1
1985	102	2·2
1986	83	1·6
1987	114	2·1

Mr. Amess: To ask the Secretary of State for Transport how many fatalities have occured on motorways in each of the last five years in accidents involving coaches; and if he will list the figures by motorway.

Mr. Peter Bottomley: The information requested is given in the table. The motorways listed are those with at least one fatality in any of the five years. The 1987 data are provisional but are unlikely to change.

Fatalities on Motorways in accidents involving coaches: Great Britain—1983-87

	1983	1984	1985	1986	1987

Heavy Lorries

Mr. Thurnham: To ask the Secretary of State for Transport if he will make a statement about the current level of heavy goods vehicles on roads in the United Kingdom.

Mr. Peter Bottomley: The overall stock of heavy goods vehicles in the United Kingdom rose by 2 per cent. to stand at 459,000 at the end of 1987. The proportion of 38-tonne articulated vehicles—first introduced in 1983—within this stock is now about 10 per cent., these numbers having risen 20 per cent. in 1987. These vehicles, however, account for 40 per cent. of goods moved by HGVs and for over 20 per cent. of goods lifted.

It is estimated that the introduction of 38-tonne vehicles since 1983 has led to a saving of nearly 8,000 other HGVs that would have been required to cope with the current level of haulage activity.

Her Majesty's Coastguard

Mr. Nicholas Bennett: To ask the Secretary of State for Transport if he will list the auxiliary coastguards hours allocation for *(a)* training and *(b)* patrol and other duties for each sector in the Swansea region of the coastguard service in 1985-86, 1986-87, 1987-88 and 1988-89, together with the reasons for any variations in the hours allocated; and if he will make a statement.

Mr. Portillo: It has not been possible to analyse figures satisfactorily before 1987-88 as requested but totals are provided.

Refinements in projecting the requirement for auxiliary hours, various reorganisations and changes in numbers borne, prevent absolute comparisons being made between the years specified.

The allocations for 1988-89 have been based on the actual outturn for 1987-88, allowing for anticipated changes. It will be seen that the latter figures differ, in some cases markedly, from the allocations originally made for that year for the reasons given.

It will be seen that the total planned usage of auxiliaries in the Swansea region for 1988-89 is almost identical to the outturn for the previous year.

Most sectors are expected to maintain or increase the hours devoted to training, which are closely related to the number of individuals in the companies. However, there is also an element of training in patrol duties which it has not been possible to identify separately.

It should also be noted that the figures do not show operational deployments, which are additional and demand led.

Auxiliary hours allocation—Swansea region

Sector	*1985-86*	*1986-87*	*1987-88*		*Hours used 1987-88*		*1988-89*

London Underground (Escalator)

Mr. Gale: To ask the Secretary of State for Transport how many of the 37 London Underground escalators reported as out of service on 4 January are now working; and how many escalators were, at the latest available date, out of service and undergoing repairs.

Mr. Portillo: The performance of escalators is a matter for the board of London Underground Limited.

Driving Licences

Mr. Darling: To ask the Secretary of State for Transport how many people have had their applications to renew their driving licences refused on medical grounds relating to *(a)* depression and *(b)* other reasons; and how many appeals against such refusals were successful for each of the last 10 years.

Mr. Peter Bottomley: The only analysis of medical conditions in connection with ordinary driving licences was obtained from a survey undertaken in May 1987. The analysis found that 4 per cent. of medical cases were due to psychiatric conditions; 4 per cent. of the 211,151 medical cases received in 1987-88 is about 8,400. There are no figures specifically for depression.

No details are available about successful appeals by condition. The figures show the number of successful appeals for all conditions in each of the last 10 years.

Year	*Number*
1978	5
1979	3
1980	2
1981	2
1982	2
1983	0
1984	0
1985	4
1986	3
1987	6

London City Airport

Mr. Tony Banks: To ask the Secretary of State for Transport, pursuant to his reply to the hon. Member for Stockton, South (Mr. Devlin), 9 November 1987, *Official Report*, column *82*, on what grounds tests were allowed at London City airport of a BAe 146 aircraft on 24 July; and if he will make a statement.

Mr. Peter Bottomley: This is a matter for the planning authority.

Mr. Tony Banks: To ask the Secretary of State for Transport, pursuant to his reply to the hon. Member for Stockton, South (Mr. Devlin), of 9 November, *Official Report*, column *82*, if he will make available details of the permitted noise levels which rule out the use of BAe 146 aircraft at London City airport; and if he will make a statement.

Mr. Peter Bottomley: In summary, maximum permitted aircraft noise levels at London City airport are:

	EPNdB)
Take-off (sideline)	84
Fly-over (6500m, from start of take-off run)	81
Approach	92

The planning conditions allow limited trade-off among these levels.

Full details are given in the planning decision letter of 23 May 1985, a copy of which is in the Library.

Commuters

Mr. Corbyn: To ask the Secretary of State for Transport what is his estimate, for each year since 1979, of the numbers of London commuters travelling by *(a)* rail, *(b)* underground and *(c)* bus per day in and out of central London.

Mr. Portillo: Information on central London commuter traffic is published by the Department in "Transport Statistics Great Britain 1976-1986." A copy is in the Library. Estimates of the number of passengers entering London by rail, underground and bus during the morning peak period are given in table 1.4

Greater Manchester

Mr. Tony Lloyd: To ask the Secretary of State for Transport what correspondence he has received from the chairman of the Greater Manchester passenger transport authority in connection with the statement concerning planned expenditure made by the Parliamentary Under-Secretary of State, the noble Lord Brabazon of Tara, in the House of Lords on 30 June, *Official Report*, columns 1809-1813; what reply he intends to give; and if he will make a statement.

Mr. Portillo: My right hon. Friend the Secretary of State received a letter from Councillor Harkin on this subject dated 5 July. My noble Friend replied on 12 July.

Mr. Tony Lloyd: To ask the Secretary of State for Transport if he will give details of the *(a)* existing and *(b)* proposed procedures for the transportation of nuclear waste in Greater Manchester; and if he will make a statement.

Mr. Portillo: Movements of all radioactive materials, in Greater Manchester as elsewhere, must comply with stringent international safety regulations. These ensure that the design of the containers prevents any radiation risk even in the event of a severe accident.

HMS Invincible (Antiquities)

Mr. Onslow: To ask the Secretary of State for Transport what representations he has received concerning the disposal of antiquities recovered from the wreck of the warship Invincible, what steps he has taken to ensure that such disposals conform to his policy as outlined on 8 March, *Official Report*, column *155*, together with the conditions under which the excavation of this wreck was licensed by his Department; and if he will make a statement.

Mr. Portillo: My right hon. Friend the Secretary of State met a delegation on 11 July led by my right hon. Friend the Member for Woking (Mr. Onslow) and representations have also been made by the British Archaeological Trust.

The licence granted by my Department under the Protection of Wrecks Act 1973 provides:

(a) that diving operations within the designated area are to be carried out in accordance with plans agreed by the Advisory Committee on Historic Wreck Sites and under the overall direction of the project's archaeological director;

(b) and that all artefacts recovered are to be given immediate preservative treatment in accordance with the advice of a named expert.

Disposal of artefacts recovered is subject to the provisions of the Merchant Shipping Act 1894 and cannot be the subject of conditions attached to a licence issued under the 1973 Act.

M6 (Traffic Delays)

Mr. Waller: To ask the Secretary of State for Transport what were the causes of the severe congestion and delays to traffic on the northbound carriageway of the M6 motorway between junctions 6 and 23 on the afternoon of 8 July.

Mr. Peter Bottomley: I refer to my reply to the hon. Member for Newport, East (Mr. Hughes) yesterday.

Chapel-en-le-Frith/Whaley Bridge Bypass

Mr. Tony Lloyd: To ask the Secretary of State for Transport if, with respect to the A6 Chapel-en-le-Frith/Whaley Bridge bypass, he will give details of *(a)* the contract price, *(b)* the amount already paid to Tarmac, *(c)* the final and latest claim submitted by Tarmac, *(d)* the intitial report of the consultants concerning potential special geological conditions and *(e)* the name of the consultants; and if he will make a statement.

Mr. Peter Bottomley: *(a)* The tender sum was £17·03 million. The contract was subject to remeasurement and included a contract price fluctuation (CPF) clause to allow for inflation. About £3 million has been paid in accordance with CPF.

(b) The amount certified to date for payment to Tarmac Construction Ltd. is £33·66 million.

(c) The outstanding claims for additional payments are commercial matters between the Department and the contractor until they have been settled.

(d) Various consultants' reports were prepared in the period leading to construction. Together with the borehole records from the ground investigation surveys, these reports can be inspected, by arrangement, at the Department's east midlands regional office in Nottingham.

(e) Consulting engineers Scott Wilson Kirkpatrick and Partners took over the preparation of the scheme in 1981 following the disbandment of the Derbyshire county council sub unit of the midland road construction unit.

Pre-construction ground investigations and consultants reports did identify the complex nature of the geology along the line of the bypass. Particularly localised areas of unexpected ground conditions were encountered during construction. These resulted in extra works or a change of design.

Mr. Tony Lloyd: To ask the Secretary of State for Transport if he will establish an inquiry into the cost escalation on the contract for the A6 Chapel-en-le-Frith/Whaley Bridge bypass.

Mr. Peter Bottomley: Procedures before and after the submission of the final account and the Government's normal accounting controls will ensure that the reasons for the overspend are examined and that any defects or deficiencies are identified.

Traffic Speed (London)

Mr. Corbyn: To ask the Secretary of State for Transport if he will give his estimate of average traffic speed in central London for each year since 1979.

Mr. Peter Bottomley: Surveys of average traffic speed in central London are conducted at three-yearly intervals. Available results since 1979 are as follows:

	Average traffic speed in central London kilometres per hour[1]	
Morning peak period		
1980	19·4	(12·1)
1983	18·9	(11·8)
1986	18·4	(11·5)
Daytime off-peak period		
1980	18·6	(11·6)
1983	19·0	(11·9)
1986	17·6	(11·0)
Evening peak period		
1980	19·5	(12·2)
1983	18·4	(11·5)
1986	17·6	(11·0)

[1] Figures in brackets refer to speed in miles per hour.

Detailed results of the most recent survey are published in Department of Transport statistics bulletin (87)41. A copy is in the Library.

Road Studies (London)

Mr. Squire: To ask the Secretary of State for Transport whether he is proposing to make generally available to the public the consultants' reports on the four London road studies.

Mr. Peter Bottomley: As I said on 27 June, at column *122*, copies of the consultants' working papers can be purchased from them. Free leaflets summarising the options are also available from the consultants.

Mr. Corbyn: To ask the Secretary of State for Transport what is the total cost of London road assessment studies from 1984 to date; and what is the projected further spending.

Mr. Peter Bottomley: The total cost of stage 1 of the studies was about £3 million. It is estimated that stage 2, which began last December, will cost approximately £4 million to complete.

Additionally there is the cost of answering the hon. Member's 31 questions.

Mr. Corbyn: To ask the Secretary of State for Transport if he will publish all representations made to his Department in respect of the London assessment studies; and if he will make a statement.

Mr. Peter Bottomley: No.

It would not be practical to publish all representations made to the Department on the London assessment studies. Since the studies commenced in November 1984 we have received representations about various aspects of the studies from local authority associations, London planning advisory committee, individual boroughs, national and local groups and members of the public.

I refer the hon. Member to the reply I gave on 21 July, at columns *792-93*, about the most recent representations I have received from the Association of London Authorities.

Lorry Ban (London)

Mr. Corbyn: To ask the Secretary of State for Transport how many prosecutions have been made for violation of the London lorry ban in the last year; and if he will make a statement.

Mr. Peter Bottomley: The London lorry ban is the responsibility of the London boroughs. The Department is not informed of prosecutions against violators of the ban.

Gillespie and Isleton Road Sidings

Mr. Corbyn: To ask the Secretary of State for Transport if he has been approached by British Rail for assent to dispose of Gillespie sidings and Isleton road sidings at Finsbury Park station; and if he will make a statement.

Mr. Portillo: No. Our policy is for BR to dispose of all surplus land as rapidly as possible. These are commercial matters for BR, and no specific approvals are required from us.

Toll Roads (London)

Mr. Corbyn: To ask the Secretary of State for Transport if he has any plans to approve schemes for toll roads in London; and if he will make a statement.

Mr. Peter Bottomley: No.

Some of the preliminary options developed by the consultants for the London assessment studies include ideas for toll roads. We will consider all their suggestions when the consultants have completed their work.

We have also received a suggestion which we are considering from Costain for a tolled road tunnel under the Thames.

British Rail

Mr. Cox: To ask the Secretary of State for Transport when he last met the chairman of British Rail; and what issues were discussed.

Mr. Wigley: To ask the Secretary of State for Transport when he last met the chairman of British Rail; and what matters were discussed.

Mr. Portillo: My right hon. Friend the Secretary of State last met the chairman of British Rail on 27 July. A variety of railway matters were discussed.

Head Restraints

Mr. Hill: To ask the Secretary of State for Transport if he will consider introducing legislation for the compulsory fitment of head restraints in all motor vehicles; and if he will make a statement.

Mr. Peter Bottomley: We will review whether head restraints should be a compulsory fitment in the light of current discussions on improvements in the present EC standard for restraints.

It is important to secure these improvements first, because we are bound to permit restraints approved to EC or UN ECE standards.

The main improvement we are seeking is to increase the height requirement of restraints. This would apply the benefits to a greater number of occupants. Under the present standard the benefits apply mainly only to shorter people.

Singificant progress was made in June when our proposal to increase the height requirement was well supported by other European Governments. In the meantime I would urge manufacturers to provide restraints meeting our proposed new height requirement as soon as possible in order to maximise the benefits to road safety.

Vehicle Clamping

Mr. Hill: To ask the Secretary of State for Transport what further areas of London will be included in the clamping and towing away policy; what percentage of clamping is carried out on diplomatic cars; and whether any other cities are applying to use these restrictions.

Mr. Peter Bottomley: Applications for further clamping areas have been received from a number of London boroughs and my right hon. Friend is considering them. No formal applications have been received from local authorities outside London.

Police have powers to remove illegally parked vehicles from any road in Great Britain.

Clamping of vehicles used by persons entitled to full diplomatic immunity would be in breach of the Vienna convention on diplomatic relations. Statistics on the clamping of diplomatic vehicles not protected by this convention are not readily available.

Motorways (Direction Signs)

Mr. Hill: To ask the Secretary of State for Transport if he will consider a programme of replacement of roadside motorway direction signs, with overhead gantry signs, at selected accident black spots; and if he will make a statement.

Mr. Peter Bottomley: We are adding a number of gantry signs.

The Department has published standard criteria for signs on gantries (Departmental standard TD 18/85). They include situations where such mounting is likely to improve safety. The circumstances at each site need to be carefully assessed, taking economic and environmental as well as safety considerations into account, to devise the best solution.

The Department has commissioned further research into the question of sign obscuration and the current standard will be revised if the results so justify.

Motorway Driving Tests

Mr. Hill: To ask the Secretary of State for Transport whether he is considering the introduction of motorway driving tests in the light of the suggestion by the Institute of Advanced Motorists; and if he will make a statement.

Mr. Peter Bottomley: I share with the institute the view that all motorists are well-advised to take lessons on motorway driving before venturing on to a motorway for the first time.

Road Improvement Schemes

Mr. David Marshall: To ask the Secretary of State for Transport if he will make it his policy to ensure that the continuation of the Government's programme of schemes to improve the motorway and trunk road network will be complemented by provision to catch up the maintenance backlog by 1992.

Mr. Peter Bottomley: We regularly review our programme. We shall consider the implications of the rephasing of capital maintenance announced in my answer to my hon. Friend the Member for Hornchurch (Mr. Squire) on 20 June.

Departmental Programmes

Mr. George: To ask the Secretary of State for Transport how much has been spent by his Department in each of the past five years on the evaluation of departmental programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mr. Peter Bottomley *[holding answer 28 July 1988]:* Responsibility for the evaluation of programmes is delegated to 70 programme managers, within central guidelines, and forms part of the work itself. It is not possible to identify separately the resources involved.

HEALTH

Trent Regional Health Authority

Mr. Allen To ask the Secretary of State for Social Services what is the difference in cash terms between Trent regional health authority's current percentage of resource allocation working party allocations and the full resource working party allocation.

Mrs. Currie In 1988-89, Trent regional health authority's total revenue allocation (before additional funds were allocated for the review body pay awards) was

£1,061 million. This included a revenue RAWP allocation of £1,010 million, which was 2·7 per cent. of £28 million below the region's current RAWP target share of the available resources.

Mr. Allen: To ask the Secretary of State for Social Services when he expects the Trent regional health authority to receive 100 per cent. of its resource allocation working party allocation.

Mrs. Currie The long term (10-year) resource assumptions issued to regions in 1983 were aimed at bringing all regions to around 100 per cent. of their RAWP targets by 1993-94. Considerable progress has already been made. Ministers will continue to give careful thought to the pace of change in deciding on Regions' annual allocation.

The Government will also consider, within the context of the wider review of the National Health Service, the recent report from the National Health Service Management Board on the review of the RAWP formula, which recommends a number of changes in the calculation of regional targets.

NHS Finance

Mr. Allen To ask the Secretary of State for Social Services if his Department collects from regional health authorities information on any National Health Service reductions due to financial restraint on district health authorities.

Mrs. Currie: The Department is informed of all substantial proposed changes to services which require formal public consultation and via the new Körner information systems receives quarterly data on key items such as activity and available bed days.

Cholesterol

Mr. Bell: To ask the Secretary of State for Social Services (1) whether his Department has at any time in the last 12 months investigated the likely number of people with blood cholesterol levels in excess of the 5·2 mmol/l European consensus recommended guidelines; and what plans he has for further similar investigations;

(2) what measures his Department has taken to encourage screening for cholesterol both in hospitals and by general medical practitioners.

Mrs. Currie: A number of independent academic studies have been carried out, including a major blood cholesterol study of more than 12,000 men and women aged 25 to 59 in four British cities. This showed mean cholesterol concentrations of 5·9 and 5·8 mmol/l in men and women respectively. The Department has recently concluded a dietary and nutritional survey of adults, in conjunction with the Ministry of Agriculture, Fisheries and Food and the Office of Population Censuses and Surveys, which included examination of blood cholesterol levels, and the data collected are now being examined; the Departments will be considering the need for further such surveys. It is now widely accepted that a high blood cholesterol level is an important risk factor in relation to heart disease. In my reply to my hon. Friend the Member for Swindon (Mr. Coombs) on 26 July, I announced that the Standing Medical Advisory Committee has been invited to advise on the cost-effectiveness of cholesterol testing.

Promotion Monitoring

Mr. Janner: To ask the Secretary of State for Social Services by whom promotion board monitoring studies are being carried out; when such studies are expected to be completed; and whether he will then place a copy of such results in the Library.

Mrs. Currie: Two studies have been commissioned from the office of the Minister for the Civil Service into aspects of promotion procedures and monitoring.

The reports are due shortly and will be considered then.

Equal Opportunities

Mr. Janner: To ask the Secretary of State for Social Services how, where and when specific developmental training for women from HEO grade and above is provided.

Mrs. Currie: Training is provided in the social security regional organisation through the course "Women in management", held at various locations which is run regularly. Women working in other parts of the Department may attend the Civil Service college course "Management development for women" at Sunningdale.

Mr. Janner: To ask the Secretary of State for Social Services by whom review of the development of equal opportunity training is being carried out by his Department; when he expects that review to be completed; and whether he will then place a copy of the results of that review in the Library.

Mrs. Currie: I shall write to the hon. and learned Member.

Physiotherapists

Ms. Armstrong: To ask the Secretary of State for Social Services how many physiotherapists are currently employed by the National Health Service; and how many of these are members of the Chartered Society of Physiotherapy.

Mrs. Currie: At 30 September 1986, 11,260 physiotherapists were employed either full or part-time in the NHS in England. Information about membership of the Chartered Society of Physiotherapists is not collected centrally by the Department and I would suggest that the hon. Member contact the society direct.

Mortality Rates

Ms. Armstrong: To ask the Secretary of State for Social Services if he will make it his policy to publish as a matter of routine figures for mortality rates *(a)* generally, and *(b)* in hospitals by regional health authority.

Mrs. Currie: The Office of Population Censuses and Surveys publishes routinely, through Her Majesty's Stationery Office, many tables giving mortality rates, for example (a) by cause, sex and age group for England and for Wales separately in "Mortality Statistics series DH1" table 13, and for England and Wales in "Mortality Statistics, cause series DH2" table 4., (b) by sex for all regional and district health authorities in "Key population and vital statistics: local and health authority areas" table 4.2, (c) by selected cause for infant deaths by regional

health authority in "Mortality Statistics childhood series DH3" table 17, (d) by social class, age of mother and parity for regional health authorities for stillbirths, perinatal deaths, neonatal deaths, post-neonatal deaths and infant deaths in "Mortality statistics perinatal and infant: social and biological factors series DH3" tables 7a, 7b and 7c. Copies of all of these publications are available in the Library.

The content of published material is reviewed from time to time, and the OPCS makes available to customers data from unpublished tables. The OPCS can also provide, cost and resources permitting, special computer tabulations from its mortality data.

The OPCS makes available to all regional health authorities extracts of mortality data on magnetic tape for their own region.

There are currently no plans in the OPCS to publish mortality rates derived from the registration of deaths for deaths occurring in hospitals by regional health authority.

Health Authorities

Ms. Armstrong: To ask the Secretary of State for Social Services what plans his Department has for changes in the present structure of health authorities.

Mrs. Currie: I refer the hon. Member to my reply to my hon. Friend the Member for Erith and Crayford (Mr. Evennett) on 12 July at column *160*.

Crown Immunity

Mr. Ashley: To ask the Secretary of State for Health if he has any plans to remove Crown immunity from hospital incinerators and boiler plants.

Mrs. Currie: The National Health Service no longer has Crown immunity from the Health and Safety at Work etc Act 1974 which includes provisions bearing on the operation of incinerators and boiler houses. New controls on incinerator emissions were proposed in the consultation paper "Air Pollution Control in Great Britain", issued in December 1986. A best practical means standard for the application of the controls to NHS incinerators is currently in preparation for inclusion in regulations which are expected to be made in 1989. We are not proposing that the National Health Service should have Crown immunity from these regulations.

Parliamentary Questions

Mr. Frank Field: To ask the Secretary of State for Social Services what proportion of parliamentary questions to him tabled in the last complete parliamentary Session were not answered on the grounds of disproportionate cost.

Mr. Scott: Less than 2 per cent.

Infant Mortality

Mr. Frank Field: To ask the Secretary of State for Social Services if he will make a statement on infant mortality following the publication of the report by the working party established by the chief medical officer into the increase in infant mortality in 1986.

Mrs. Currie: Provisional figures for 1987 show a rate of infant mortality (the death rate for babies under 1 year) for England of 9·1 per thousand live births, which is the lowest ever recorded.

The figure for 1986, at 9·5 per thousand live births showed a slight increase compared to the previous year. Ministers asked the chief medical officer and the OPCS to inquire further with the assistance of expert advisers.

The studies so far show that the increase in infant mortality occurred in the post-neonatal period (ie between 28 days and 1 year of age). It occurred across all social classes, ages, parity of mother and legitimacy. The increase was predominantly among male infants, with some bias towards children of parents in social class 1. It was probably associated with the unusually severe cold snap which occurred in February 1986.

As regards cause of death, most of the increase was attributed to sudden infant death syndrome. An accompanying fall in the number of deaths ascribed to diseases of the respiratory system probably reflects a continued trend to report more of such deaths as sudden infant death syndrome. The detailed analysis of the 1986 figures is continuing. Other research work into the nature of sudden infant death syndrome is under way in universities and by voluntary organisations.

Mr. Fearn: To ask the Secretary of State for Health if he will publish a table showing infant mortality by sex broken down into the months of the year for the latest year available.

Mrs. Currie: The information is shown in the table.

Infant mortality (deaths under one year of age) by month of occurrence, England and Wales 1986[1]

Month	*Sex*	*Number of deaths*
January	male	352
	female	260
February	male	374
	female	237
March	male	336
	female	264
April	male	278
	female	204
May	male	311
	female	224
June	male	264
	female	190
July	male	261
	female	199
August	male	291
	female	178
September	male	281
	female	192
October	male	294
	female	205
November	male	322
	female	197
December	male	338
	female	234

Note:

These will include deaths occurring in 1986 but registered up to the end of March 1987.

[1] Provisional.

Pharmaceutical Inspectors

Mr. Redmond: To ask the Secretary of State for Social Services what is the region covered by each pharmaceutical inspector; how many are currently in post; how many vacancies there are in the pharmaceutical inspectorate; what has been the total number of establishment posts by year from 1979 to 1987 and the number of staff in post by region; how many prosecutions have been taken out in each of these years and with what results; and if he will make a statement.

Mrs. Currie: This information is not available in the Department. The hon. Member may wish to inquire of the Royal Pharmaceutical Society of Great Britain at 1 Lambeth high street London SE1 3JN.

Child Abuse

Mr. Redmond: To ask the Secretary of State for Social Services what is his Department's latest estimates of the incidence of child abuse, against males and females as a percentage of the age groups *(a)* under five, *(b)* five to 10 years, *(c)* 11 to 15 years and *(d)* over 15 years, in England and Wales; and what information he has on the social class of victims in each group.

Mrs. Currie: I understand that the NSPCC, from a sample covering areas including about 9 per cent. of the children in England and Wales, estimates that 25,670 children were added to child protection registers in England and Wales in 1987 because of child abuse.

Child abuse statistics have not previously been collected centrally by the Department. We announced on 9 July 1987 that arrangements would be made for the annual collection of national statistics on child abuse. The Department is carrying out a survey for the year ending 31 March 1988. It is planned to publish some provisional results from the survey later this year.

Mrs. Gorman: To ask the Secretary of State for Social Services (1) how many children were admitted to hospital in Cleveland between 1 May and 9 July 1987 on suspicion of sexual abuse; how many prosecutions have been brought or are pending in respect of these suspicions; what has been the outcome of the prosecutions heard to date; and if he will make a statement;

(2) how many children removed between 1 May and 9 July 1987 from home under care orders have been returned home with no supervision order by the social services department in Cleveland; of those returned home with supervision orders, how many are voluntary and at the request of the parents; and if he will make a statement.

Mrs. Currie: I regret that the information requested is not available centrally. Appendix D to the report of the inquiry into child abuse in Cleveland 1987 (Cm 412) contains some information which my hon. Friend may find helpful.

Nursing

Mr. Kirkwood: To ask the Secretary of State for Social Services whether he will place a copy of the following reports in the Library: *(a)* nursing in London study, *(b)* regional health authority leavers survey (1 July to 30 September 1987), *(c)* nursing career development project report, *(d)* nursing retention and recruitment by Price Waterhouse and *(e)* the wastage rates in nurse training report.

Mrs. Currie: I will write to the hon. Member.

Organ Donors

Mr. Hannam: To ask the Secretary of State for Social Services if decisions have yet been reached on the allocation of funding for publicity to improve donor supply from the £250,000 central budget announced on 3 June.

Mrs. Currie: We anticipate that funds in 1988-89 will be allocated in roughly equal proportions between publicity directed towards the general public and material aimed at relevant hospital staff. Officials are consulting interested parties about the specific projects which should be funded; decisions have not yet been taken on all items of expenditure. The level of donated organs continues to run well above 1987 levels.

Mr. Hannam: To ask the Secretary of State for Social Services if he is ready to produce guidelines to regional health authorities for the identification of potential organ donors and the setting up of an audit of brain stem dead patients, as recommended by the Royal College of Physicians working party on donor supply.

Mrs. Currie: I refer my hon. Friend to my reply to him on 26 July.

"Promoting Better Health"

Mr. Kirkwood: To ask the Secretary of State for Social Services if he will make a statement on his Department's progress to date in achieving the targets set out in the White Paper, "Promoting Better Health".

Mrs. Currie: Detailed discussions on implementing the improvements in primary health care set out in the White Paper "Promoting Better Health" are now well under way with representatives of the professions concerned. Announcements will be made in due course.

Nurses' Homes

Mr. Kirkwood: To ask the Secretary of State for Social Services how many nurses' homes have been *(a)* closed and *(b)* sold in each regional health authority area in each year since 1979.

Mrs. Currie: Information specific to the closure and sale of nurses' homes is not routinely collected.

Nurse Prescribing

Mr. Kirkwood: To ask the Secretary of State for Social Services what is the remit, membership and timetable of his Department's working group on nurse prescribing; and what work it has carried out since its establishment.

Mrs. Currie: The group will advise the Secretary of State for Health, after consultation with the Standing Medical Advisory Committee, the Standing Nursing and Midwifery Advisory Committee and the Standing Pharmaceutical Advisory Committee, on the professional and ethical issues of prescribing by nurses. It is chaired by Dr. June M. Crown of Bloomsbury health authority and contains a representative of the United Kingdom Central Council for Nursing and Midwifery and two representatives of each of the professional standing advisory committees mentioned above.

The group met for the first time on 19 July to discuss its terms of reference, methods of working and information needs. It will meet again on 7 September and thereafter at monthly intervals. It will report to my right hon. and learned Friend by 1 June 1989.

Doctors (Generic Antibiotics)

Mr. Cohen: To ask the Secretary of State for Social Services if he will make a statement on progress in encouraging doctors to prescribe generic antibiotics; and what guidance and training are available to doctors in this respect.

Mrs. Currie: We encourage doctors to prescribe all drugs generically. All doctors are taught to use generic names during their undergraduate training and professional and other independent publications normally refer to drugs by their generic title.

Particular therapeutic categories are not singled out for special attention. Statistics derived from prescriptions of drugs dispensed by community pharmacists show that the percentage of all prescriptions written generically in England has risen from 20 per cent. in 1977 to 39 per cent. in 1987. Figures for antibiotics only are not readily available.

Royal Devon and Exeter Hospital

Mrs. Wise: To ask the Secretary of State for Social Services how many medical physicists are currently employed at the Royal Devon and Exeter hospital; how many were employed on 12 February; what are their grades; and to what extent this staffing complement complies with recommended norms.

Mrs. Currie: There are currently eight medical physicists employed at the Royal Devon and Exeter Hospital, and eight were employed on 12 February 1988. The table shows their grades and areas of work.

Area of work/Grade	*Top*	*Principal*	*Senior*	*Basic*
Radiation Physics	—	1	3	—
Medical Electronics	—	1	1	—
Clinical Measurements	1	—	1	vacancy

It is for the health authority to determine staffing levels in the light of local needs.

Mrs. Wise: To ask the Secretary of State for Social Services under what exact circumstances the observation of side effects in patients receiving radiotherapy at the Royal Devon and Exeter hospital occurred.

Mrs. Currie: It is not unusual for some patients to develop side effects as a result of radiation treatment. A staff nurse, engaged in examining these patients at the Royal Devon and Exeter hospital, noticed that a small number had delayed healing of skin lesions.

Mrs. Wise: To ask the Secretary of State for Social Services whether, after a medical physicist has set a cobalt source such as that used for radiotherapy at the Royal Devon and Exeter hospital, it must be examined and checked by another medical physicist.

Mrs. Currie: As I said in answer to questions arising on this matter in the House on 25 July at columns 25-29, current recommended procedures are set out in guidance on the use of ionising radiation. I have asked the Health and Safety Executive to check that the guidance is being followed and to advise me whether any further action is necessary.

X-ray Equipment

Mrs. Wise: To ask the Secretary of State for Social Services when the guidance on the use of X-ray equipment, to which the Parliamentary Under-Secretary of State, the hon. Member of Derbyshire, South (Mrs. Currie), referred on 25 July, *Official Report*, column *29*, was sent out; and to whom it was sent.

Mrs. Currie: The guidance to which I referred was "Guidance Notes for the Protection of Persons Against Ionising Radiations Arising from Medical and Dental Use". The document replaced the "Code of Practice for the Protection of Persons Against Ionising Radiations arising from Medical and Dental Use", first published in 1957. The last revision of the code was in 1972, and guidance to similar effect was given in that publication.

Copies of the guidance notes—the result of a joint initiative by the National Radiological Protection Board, the Health Departments and the Health and Safety Executive—were distributed to all regional medical officers and radiation protection advisers, as well as all general managers of regional health authorities, district health authorities, and special health authorities for the London postgraduate teaching hospitals on 5 May 1988. A copy is in the Library.

Mrs. Wise: To ask the Secretary of State for Social Services if he will be seeking any information on X-ray equipment inventories in the private health care sector beyond that to be made available to him under the Ionising Radiations (Protection of Persons Undergoing Medical Examination) Regulations to monitor the appropriateness of that equipment and the extent of the X-ray exposures which will result from the use.

Mrs. Currie: Inspectors of the Health and Safety Executive during the course of normal inspections will wish to satisfy themselves that X-ray equipment meets the requirements of regulation 33(1) of the Ionising Radiations Regulations 1985—namely, that it should be of such design and construction and so installed and maintained as to be capable of restricting, so far as reasonably practicable, the exposure to ionising radiations of any person undergoing a medical exposure to the extent that this is compatible with the clinical purpose in view.

Inventories kept under regulations 9 of the Ionising Radiation (Protection of Persons Undergoing Medical Examination or Treatment) Regulations 1988 will assist in this matter.

Mrs. Wise: To ask the Secretary of State for Social Services (1) what procedures he intends to adopt to monitor the appropriateness of X-ray equipment acquisition in the private health sector and to monitor the extent of X-ray exposures which result from that equipment;

(2) if he intends to take any steps to discourage unnecessary proliferation of equipment for X-ray diagnosis in the private health care sector.

Mrs. Currie: Private health care organisations are independent bodies and may acquire what X-ray

equipment they require. All users of X-ray equipment are subject to the provisions of the Health and Safety at Work etc. Act 1974 and related legislation.

District health authorities have a general responsibility to ensure that medical, surgical and nursing equipment in private nursing homes and hospitals is adequately maintained. As part of this responsibility, they must inspect each establishment at least twice a year.

The Ionising Radiations Regulations 1985 put a duty on employers to appoint a radiation protection adviser whose functions include the monitoring of X-ray equipment. The Ionising Radiations (Protections of Persons undergoing Medical Examination or Treatment) Regulations 1988 require employers to keep records of such equipment.

Mrs. Wise: To ask the Secretary of State for Social Services if he will make a statement on the rate of replacement of obsolete X-ray equipment in the National Health Service.

Mrs. Currie: I refer the hon. Member to my reply to the hon. Member for Leyton (Mr. Cohen) on 4 February 1988 at column *741*.

Scientists

Mrs. Wise: To ask the Secretary of State for Social Services whether he will revert to the pre-1980 practice of linking the salaries of National Health Service graduate scientists with scientists in the Civil Service; and if he will make a statement.

Mrs. Currie: Negotiations in the National Health Service are based on the need to recruit and retain suitable staff at rates that can be afforded.

Consultants

Mr. Corbyn: To ask the Secretary of State for Social Services how many consultants are currently in receipt of merit awards; what has been the total cost of merit awards per year since 1979; and what are the criteria for awarding pensionable increases in salary levels as merit awards.

Mrs. Currie: The number of consultants and community physicians in receipt of distinction awards on 31 December 1987 in England and Wales was 5,604.

The total cost of distinction awards authorised for each year since 1979 is as follows (figures are from 1 April in each year).

	£ million
1979	20
1980	29
1981	31·1
1982	33·5
1983	37·1
1984	40·8
1985	45·5
1986	50·8
1987	56·5

The actual amount payable in each year is somewhat less, because part-time practitioners receive a proportion of the award only. In 1987, we estimated that some 86·3 per cent. of the authorised maximum payment was payable. Once awarded, distinction awards become part of salary and are therefore superannuable.

Emergency Planning

Mr. Strang: To ask the Secretary of State for Social Services when he intends to publish the circular on emergency planning in the National Health Service in England.

Mrs. Currie: Revised civil defence planning guidance to the National Health Service in England was published as a Health Circular on 18 July 1988. It replaces the existing guidance issued in 1977 and takes account of changes in the Government's planning assumptions and in management and structure within the NHS. A copy is in the Library.

Mentally Ill and Handicapped and Elderly Patients

Mr. Fearn: To ask the Secretary of State for Social Services what assessment he has made of the number, in each region, of *(a)* mentally handicapped, *(b)* mentally ill and *(c)* elderly patients who could be discharged into the community if adequate facilities were available.

Mrs. Currie *[holding answer 26 July 1988]:* The Department has not so far made an assessment of the number of such patients but will be seeking to do so from research findings and any assessments made by health authorities. It is likely to be several months before it is clear whether a useful national assessment can be made from these sources.

National Health Service (Annual Report)

Mr. Tim Smith: To ask the Secretary of State for Social Services why the annual report of the National Health Service contains no accounts.

(2) what were the total assets of the National Health Service at 31 March 1987;

(3) what was the total value of the outputs of the National Health Service during the year ended 31 March 1987.

Mrs. Currie *[holding answer 12 February 1988]:* Summarised accounts of regional and district health authorities together with summarised accounts of family practitioner committees in England are audited by the National Audit Office, laid before Parliament and published annually as a House of Commons paper (House of Commons paper 20 of 1986-87 contains information for 1985-86). An equivalent publication for 1986-87 accounts was very recently published as House of Commons paper 606 of 1987-88.

The accounts of health authorities and family practitioner committees record their annual capital expenditure and income but there is no record in a balance sheet of capital assets, nor any provision for depreciation of such assets in the revenue accounts. The outputs of the authorities and committees are not valued as such but are recorded as expenditure.

Following is the information for England for 1986-87 included in House of Commons paper 606.

Statement of working balances as at 31 March 1987

	Health Authorities[1] *£000*	*Family Practitioner Committees £000*
Current Assets		
Stocks	212,649	—
Debtors	278,130	5,169

	Health Authorities[1] *£000*	*Family Practitioner Committees* *£000*
Cash and Bank Balances	(42,962)[2]	215
Total	447,817	5,384

[1] Regional and district health authorities and the special health authorities for the London postgraduate teaching hospitals.
[2] Cash book balances (ie reflecting the value of unpresented cheques as at 31 March 1987).

Expenditure for the year ended 31 March 1987
Health Authorities—Hospital and Community Health Services

	£000
Capital Expenditure	
Hospital Services	8,255,383
Community Health Services	1,054,580
Other Services	572,464
Headquarters Administration	434,739
	10,317,166
Capital Expenditure	936,291
Total Expenditure	11,253,457

Family Practitioner Committees

	£000
Family Practitioner Committees Administration	
Current Expenditure	46,662
Capital Expenditure	3,109
	49,771
Family Practitioner Services	
General Medical Services	1,134,612
Pharmaceutical Services	1,696,073
General Dental Services	530,550
General Ophthalmic Services	130,725
	3,491,960
Total Expenditure	3,541,731

Hospital Waiting Lists

Mr. Dobson: To ask the Secretary of State for Social Services (1) if he will estimate the number of patients included in the March 1987 waiting list figures, under returns SBH 203, who would have been excluded as self deferred cases under category KHO7a;

(2) if he will list those district health authorities thought to have included self-deferral figures on their returns to SBH 203 for March 1987;

Mrs. Currie *[holding answer 5 May 1988]:* The instructions for completing form SBH203 clearly stated that self deferred cases should be excluded. Despite this, it is possible that the figures from some consultants included deferred cases but the extent to which this occurred cannot be measured retrospectively.

Mr. Dobson: To ask the Secretary of State for Social Services (1) when he expects to be able to publish the waiting list figures for September 1987; and if he will give reason for the dealy;

(2) if he will publish the waiting list for September 1987 for each regional health authority, district health authority, and special health authority including self-deferred cases (KHO7a); and if he will break these down by specialty.

Mr. Pendry: To ask the Secretary of State for Social Services how many patients are currently on waiting lists for in-patient treatment at National Health Service hospitals in the Tameside and Glossop district and in the north-west region.

Mrs. Currie *[holding answers 5 May and 16 June 1988]:* The national waiting list figures were announced on 27 April and placed in the Library. The detailed district in-patient waiting list figures have now also been placed in the Library. There was a time gap between the two as the district statistical returns required careful checking.

AIDS

Mr. Strang: To ask the Secretary of State for Social Services what additional funds he has made available to both statutory and non-statutory bodies in England and Wales, for each of the past three years, in relation to HIV and AIDS; what is the provisional allocation of funds for each year until 1989; and what are these figures for each statutory and non-statutory body.

Mrs. Currie *[holding answer 1 December 1987]:* The information requested for England is shown in the table. The provision of funds to statutory and non-statutory bodies in Wales is the responsibility of the Secretary of State for Wales.

Statutory and Non-Statutory Bodies	*1985-86*	*1986-87*	*1987-88 (Estimated Outturn)*	*1988-89 (Provisional)*

In relation to local authority services, £5 million was included in the Rate Support Grant Settlement for 1987-88 to provide for additional personal social services expenditure in relation to AIDS and drug abuse. £2 million joint finance is to be provided in 1988-89 to support expenditure on services for persons with AIDS in particular local authorities. Provision for future years is under consideration.

Mr. Baldry: To ask the Secretary of State for Health whether the Government will reaffirm their support for the principles and aims of the London declaration on AIDS prevention.

Mrs. Currie: The Government fully support the aims, objectives and principles set out in the London declaration, which was adopted by representatives of 148 states at the world summit of Health Ministers held in London in January 1988. The declaration emphasises information and education, aimed both at the general public and specific groups, as the most important component of national prevention strategies, and stresses the need to avoid discrimination against HIV-infected people and people with AIDS. These principles underlie the strategy that we have developed for fighting the spread of AIDS within the United Kingdom. The Government also have a firm commitment to playing a full part in the worldwide effort against AIDS and support the central role of the World Health Organisation in directing and co-ordinating that effort. The full text of the London declaration is as follows:

World Summit of Ministers of Health
London Declaration on AIDS Prevention
28 January 1988

The World Summit of Ministers of Health on Programmes for AIDS Prevention, involving delegates from 148 countries representing the vast majority of the people of the world, makes the following declaration:

1. Since AIDS is a global problem that poses a serious threat to humanity, urgent action by all governments and people the world over is needed to implement WHO's Global AIDS Strategy as defined by the Fortieth World Health Assembly and supported by the United Nations General Assembly.

2. We shall do all in our power to ensure that our governments do indeed undertake such urgent action.

3. We undertake to devise national programmes to prevent and contain the spread of human immunodeficiency virus (HIV) infection as part of our countries' health systems. We shall involve to the fullest extent possible all governmental sectors and relevant nongovernmental organizations in the planning and implementation of such programmes in conformity with the Global AIDS Strategy.

4. We recognize that, particularly in the absence at present of a vaccine or cure for AIDS, the single most important component of national AIDS programmes is information and education because HIV transmission can be prevented through informed and responsible behaviour. In this respect, individuals, governments, the media and other sectors all have major roles to play in preventing the spread of HIV infection.

5. We consider that information and education programmes should be aimed at the general public and should take full account of social and cultural patterns, different lifestyles, and human and spiritual values. The same principles should apply equally to programmes directed towards specific groups, involving these groups as appropriate. These include groups such as:

policy makers;
health and social service workers at all levels;
international travellers;
persons whose practices may place them at increased risk of infection;
the media;
youth and those that work with them, especially teachers;
community and religious leaders;
potential blood donors; and
those with HIV infections, their relatives and others concerned with their care, all of whom need appropriate counselling.

6. We emphasize the need in AIDS prevention programmes to protect human rights and human dignity. Discrimination against, and stigmatization of, HIV-infected people and people with AIDS undermine public health and must be avoided.

7. We urge the media to fulfil their important social responsibilities to provide factual and balanced information to the general public on AIDS and on ways of preventing its spread.

8. We shall seek the involvement of all relevant governmental sectors and nongovernmental organizations in creating the supportive social environment needed to ensure the effective implementation of AIDS prevention programmes and humane care of affected individuals.

9. We shall impress on our governments the importance for national health of ensuring the availability of the human and financial resources, including health and social services with well-trained personnel, needed to carry out our national AIDS programmes, and in order to support informed and responsible behaviour.

10. In the spirit of United Nations General Assembly Resolution A/42/8, we appeal:

to all appropriate organizations of the United Nations system, including the specialized agencies;
to bilateral and multilateral agencies; and
to nongovernmental and voluntary organizations

to support the worldwide struggle against AIDS in conformity with WHO's global strategy.

11. We appeal in particular to these bodies to provide well-coordinated support to developing countries in setting up and carrying out national AIDS programmes in the light of their needs. We recognize that these needs vary from country to country in the light of their epidemiological situation.

12. We also appeal to those involved in dealing with drug abuse to intensify their efforts in the spirit of the International Conference on Drug Abuse and Illicit Trafficking (Vienna, June 1987) with a view to contributing to the reduction in the spread of HIV infection.

13. We call on the World Health Organization, through its Global Programme on AIDS, to continue to:

(i) exercise its mandate to direct and coordinate the worldwide effort against AIDS;
(ii) promote, encourage and support the worldwide collection and dissemination of accurate information on AIDS;
(iii) develop and issue guidelines on the planning, implementation monitoring and evaluation of information and education programmes, including the related research and development, and ensure that these guidelines are updated and revised in the light of evolving experiences.
(iv) support countries in monitoring and evaluating preventive programmes, including information and education activities, and encourage wide dissemination of the findings in order to help countries to learn from the experiences of others.

14. Following from this Summit, 1988 shall be a Year of Communication about AIDS in which we shall:

open fully the channels of communication in each society so as to inform and educate more widely, broadly and intensively;
strengthen the exchange of information and experience among all countries; and
forge, through information and education and social leadership, a spirit of social tolerance.

15. We are convinced that, by promoting responsible behaviour and through international cooperation, we can and will begin now to slow the spread of HIV infection.

Health Spending

Mr. Robin Cook: To ask the Secretary of State for Social Services if he will give for each year since 1974-75 (i) total National Health Service expenditure, (ii) current expenditure on hospital and community health service, (iii) capital expenditure on hospital and community health service, (iv) expenditure on family practitioner services, (v) expenditure on centrally funded National Health Service services and (vi) expenditure on personal social services; if he will give each *(a)* in cash terms, *(b)* adjusted using the relevant pay-prices index and *(c)* adjusted using the gross domestic product deflator; and if he will place in the Library details of the methods used to make these adjustments.

Mrs. Currie: *[holding answer 18 February 1988]:* The information requested is as follows.

(a) *Gross Expenditure (England) in £million (cash)*

	National Health Service	*Hospital and Community Health Service*		*Family Practitioner Services*	*Central Health and Miscellaneous Services*	*Other NHS Capital*	*Personal Social Services*

Notes:

n/a—Not available.

[1] Figures for 1978-79 and later years are not directly comparable with figures for 1977-78 and earlier years because of differences in the composition of different programmes (e.g. the costs of FPS administration and of the PHLS are included in the CHMS programme prior to 1978-79; in subsequent years expenditure on these items is included in FPS and HCHS programmes respectively).

[2] Service specific inflation factors are not available for earlier years; for consistency HCHS (Capital) factors have been used for all years.

[3] Because of the variety and multiplicity of individual budgets it is not meaningful to derive a single inflation factor for CHMS expenditure.

[4] Estimate.

[5] Plan.

Pay and Price inflation 1974-75 to 1987-88

	NHS total		HCHS current		HCHS capital		FPS[1] current		PSS[2] (current and capital)	
	Year on Year per cent.	Index (1987-88 base)	Year on Year per cent.	Index (1987-88 base)	Year on Year per cent.	Index (1987-88 base)	Year on Year per cent.	Index (1987-88 base)	Year on Year per cent.	Index (1987-88 base)
1987-88	8·0	100·0	8·5	100·0	5·1	100·0	7·3	100·0	6·6	100·0
1986-87	6·3	108·0	6·9	108·5	5·0	105·1	5·0	107·3	4·8	106·6

1975-76	28·3	328·6	28·8	326·6	30·6	283·0	28·3	317·5	20·4	296·7
1974-75	—	421·6	—	420·7	24·4	369·6	—	407·4	—	357·2

[1] The figures for earlier years have been adjusted from those used on previous occasions to put them on a consistent basis.
[2] For 1983-84 and later years the figures include both capital and revenue inflation. For 1982-83 and earlier years the figures reflect only PSS pay and price inflation in respect of revenue expenditure. Comparable information in respect of capital inflation for earlier years is not available but the difference is not thought to be significant.

General inflation (June 1988) 1974-75 to 1987-88

	Year on year increase percentage	*Index (1987-88 base)*

Warrington District Health Authority

Mr. Butler: To ask the Secretary of State for Social Services what was the spending per head of population served by Warrington district health authority in the latest available year; and what is the figure per head, on the most nearly comparable basis, for the United Kingdom as a whole.

Mrs. Currie *[holding answer 24 February 1988]:* Figures of spending per head of resident population for 1986-87 (the latest year available) are shown in the table:

Revenue expenditure per head of resident population—Hospital and Community Health Services[1]

	£
Warrington district health authority	259
England—average for all district health authorities	214
United Kingdom	228

[1] Includes ambulance, blood transfusion, mass radiography and other services.

Sources:
(a) 1986-87 annual accounts of district and regional health authorities in England and those of the analogous health authorities, boards and agencies in Scotland, Wales and Northern Ireland—as submitted to the central health department in each country.
(b) Mid-year estimates of populations—1986 (Office of Population Censuses and Surveys).

Notes to the table:
1. Capital expenditure on Hospital and Community Health Services is excluded. Expenditure on family practitioner services (which cannot strictly be attributed to particular districts) and expenditure on personal social services (which in Northern Ireland is accounted for by Health and Social Services Boards) is also excluded.
2. Comparisons between the figures are influenced by a number of factors including:
   (a) people travel across district boundaries for treatment and resource allocations reflect the pattern of service provision locally;
   (b) the population figures used make no allowance for people resident in one district who receive treatment in another or for differences in morbidity and age/sex structure of particular populations.

Medical Physicists and Biochemists

Mrs. Wise: To ask the Secretary of State for Social Services (1) whether any difficulty is being experienced in retaining the services of National Health Service scientists, namely, medical physicists and biochemists in the National Health Service; and if he will make a statement;

(2) what steps he is taking to improve recruitment and the morale of medical physicists and biochemists in the National Health Service.

Mrs. Currie: There is at present no evidence of general difficulty in recruiting and retaining medical physicists and biochemists. The numbers employed in the NHS in England rose from 1,921 (whole-time equivalent) at 30 September 1985 to 1,943 (whole-time equivalent) at 30 September 1986. The management side of the Scientific and Professional Staffs Whitley Council has recently offered to increase pay rates by 5·5 per cent. and has agreed to undertake a reveiw of recruitment and retention in the light of service needs.

Nurses' Pay

Mr. Frank Field: To ask the Secretary of State for Social Services (1) whether funds for health authorities to meet the additional costs of the nurses' pay awards are being allocated on the basis of nursing staff in post or on the basis of nursing establishments; and what year is being taken as a basis for the funding of the nurses' pay award;

(2) whether he intends that resources to fund the additional costs of the nurses' pay award will be allocated by all regions on the same basis; and what guidance he has issued to regions on the allocation to districts of these resources.

Mrs. Currie *[holding answer 9 May 1988]:* The cost of the review body awards was calculated from information derived from health authorities' pay bill estimates based on the number of staff in post at 31 March 1988. Account was also taken of the review bodies' estimates of the average percentage increase for each staff group.

The additional funds provided to health authorities were to meet the cost of all review body awards: no sum was specifically earmarked for the nurses' pay award. The sum available to regional health authorities was allocated in proportion to their 1988-89 initial revenue cash limits. It is for each region to determine how to distribute those funds amongst its districts.

The guidance issued has been placed in the Library.

Mr. Fearn: To ask the Secretary of State for Health what information he has about the problems that the Wirral health authority faces with regard to the nurses' pay award; and if he will make a statement.

Mrs. Currie: I refer the hon. Member to my reply to the right hon. Member for Manchester, Wythenshawe (Mr. Morris) on 27 July.

Departmental Staff

Mr. Dobson: To ask the Secretary of State for Social Services if he will list for 1979, 1984 and the most recent

year the numbers of staff by grade in the statistical divisions in his Department; if he will differentiate between staff in the statistical posts and staff in administrative posts; and if he will give separate figures for staff employed in the Office of Population Censuses and Surveys and in the Government Actuary's Department.

Mrs. Currie *[holding answer 21 July 1988]:* The information requested for the Department and for the Office of Population and Censuses is shown in the tables. The number of staff in statistical divisions of the Government Actuary's department is a matter for my right hon. Friend the Chancellor of the Exchequer.

Departmental staff in statistical divisions (1 April)

Grade	1979		1984		1988	
	Administrative	Statistical	Administrative	Statistical	Administrative	Statistical
3	[1]	[1]	[1]	[1]	—	1

Personal Secretary	[1]	[1]	[1]	[1]	18	—
Total	574	29	483	27	493	24

[1] Figures not available by grade.
[2] The figures in the White Paper "Government Statistical Services" (Cmnd. 8236) included some staff who worked in support of statistical divisions. These figures relate solely to staff in OPCS statistical divisions.

Departmental Advertising

Mr. Dobson: To ask the Secretary of State for Social Services what is the latest figure for the estimated spending in 1988-89 by the National Health Service on *(a)* television advertising, *(b)* radio advertising, *(c)* newspaper advertising and *(d)* other promotional material.

Mrs. Currie *[holding answer 21 July 1988]:* The information for regional and district health authorities and family practitioner committees in England is not collected in-year and their annual accounts identify advertising expenditure in total only. For 1986-87 (the latest year available) the annual accounts of health authorities and the special health authorities for the London postgraduate teaching hospitals record total expenditure on advertising as £14,089,000 while the accounts of FPCs show £78,000. These costs are predominantly for staff recruitment advertisements in newspapers and professional journals.

The annual accounts of special health authorities and other bodies providing central services to the National Health Service (eg the central blood laboratories authority and the National Health Service training authority) do not separately identify expenditure on advertising, but given the size of their total expenditure, any such costs are not thought to be significant.

The Health Education Authority (the successor to the Health Education Council) is currently expected to incur expenditure on health promotional advertising campaigns in 1988-89 as follows:

	£000[1]
Television advertising	Nil
Radio advertising	450
Newspaper advertising	3,850
Other promotional material	3,200

[1] Estimated.

Social Science Research

Mr. George: To ask the Secretary of State for Social Services how much has been spent by his Department in each of the past five years on social science research; what percentage this constitutes of total departmental expenditure and of the Department's research budget; and how

much of the research has been undertaken *(a)* within his Department, *(b)* by universities and polytechnics and *(c)* by independent research organisations.

Mrs. Currie *[holding answer 27 July 1988]*: The readily available information is as follows. Totals include expenditure on research by non-departmental public bodies funded by the Department.

£ million

Year	*Social Science R and D*	*Percentage total expenditure*	*Percentage total R and D expenditure*	*Intramural*	*Universities etc.*	*Independent Research Organisations*
1982-83	9·1	0·02	29·4	0·6	3·9	1·0
1983-84	6·0	0·01	19·9	0·3	3·8	1·0
1984-85	5·8	0·01	21·2	0·3	4·0	1·0
1985-86	5·7	0·01	19·6	0·2	4·2	0·9
1986-87	5·6	0·01	11·3	[1]	4·1	1·0

[1] Information not available

Legionnaires' Disease

Mr. Fearn: To ask the Secretary of State for Health if, in the light of the recent events at the BBC, he will introduce legislation to make it a criminal offence to be negligent in regard to the spreading of Legionnaires' disease; and if he will make a statement.

Mrs. Currie: I am informed that up to now the Health and Safety Executive has taken the view that the general duties imposed under the Health and Safety at Work etc. Act 1974 would be sufficient in this regard. Further consideration is, however, being given to the recommendations in the Employment Committee's report "Legionnaires' Disease in the Working Environment".

Hospital Generators (Maintenance Checks)

Mr. Hill: To ask the Secretary of State for Health if he will issue guidelines to health authorities to ensure that proper maintenance checks are carried out on hospital generators that provide electricity for operating theatres.

Mrs. Currie: I shall write to my hon. Friend.

Health Education Officers (North West RHA)

Mr. Thurnham: To ask the Secretary of State for Health how many health education officers are employed by the North West regional health authority; and how many are assigned to the Bolton area.

Mrs. Currie: As at 30 September 1986, the latest date for which information is available centrally, the number of health education officers employed by North Western regional health authority and the number assigned to Bolton district health authority were as follows:

	Number
North Western RHA	[1]43
Bolton DHA	0

[1] Rounded to nearest whole time equivalents.

My hon. Friend may wish to contact the chairman of North Western regional health authority for more recent information.

Hospital and Health Centre Buildings

Mr. Ken Hargreaves: To ask the Secretary of State for Health what was the total amount paid in lieu of rates for hospital and health centre buildings by Blackburn, Hyndburn and Ribble Valley district health authority for the years 1985-86, 1986-87, 1987-88 and 1988-89.

Mrs. Currie: The annual accounts of the Blackburn, Hyndburn and Ribble Valley health authority record total expenditure on contributions in lieu of rates as follows:

	£
1985-86	549,647
1986-87	620,864
[1]1987-88	457,555

[1] Provisional (ie unaudited) figure.

The reduced expenditure for 1987-88 largely reflects the transfer of administrative responsibility for the Brockhall hospital to the Burnley, Pendle and Rossendale health authority from 1 April 1987

For further information and expected expenditure in 1988-89 (which is not collected in-year) my hon. Friend may wish to contact the chairman of the Blackburn, Hyndburn and Ribble Valley health authority.

Health Care (Bolton)

Mr. Thurnham: To ask the Secretary of State for Health how many patients in the Bolton area received health care initiated by the health authority but provided outside the National Health Service during 1986, 1987 and 1988 to date.

Mrs. Currie: I regret that this information is not available centrally.

Methadone

Mr. Rathbone: To ask the Secretary of State for Health how much money each regional health authority has spent in each of its districts for methadone treatment for each of the most recent five years for which figures are available.

Mrs. Currie: I regret that the information requested is not held centrally.

Mr. Rathbone: To ask the Secretary of State for Health what amount of methadone has been prescribed by general practitioners in each of the last five years for which figures are available.

Mrs. Currie: The number of prescriptions and the volumes of methadone dispensed by community pharmacists in England in each of the years 1983-1987 inclusive is as follows:

Methadone (thousands) *England*

Year	Number of prescriptions	Quantities dispensed Tablets	Mixture[1] (ml)	Linctus[2] (ml)	Injection (ampoules)
1983	105·9	1,443·0	10,064·9	6,713·0	502·6
1984	101·9	1,217·9	11,718·3	6,775·2	588·7
1985	128·6	1,048·6	17,328·8	5,538·4	398·1
1986	184·9	1,740·0	26,738·9	4,863·4	1,175·3
1987	243·5	1,875·2	50,408·3	3,865·2	1,525·8

Note:
These estimates are based on a sample of approximately 1 in 200 prescriptions dispensed in England by chemists and appliance contractors. Information on drugs dispensed in hospitals and by Dispensing doctors is not available.
[1] The mixture is 1mg/ml.
[2] The linctus is 2mg/5ml.

Home Start Consultancy

Mr. Baldry: To ask the Secretary of State for Health whether he intends to make a grant towards the administrative expenses of Home Start Consultancy; and if he will make a statement.

Mrs. Currie: Ministers recognise the good work done by Home Start and other voluntary agencies in supporting families with difficulties, and are anxious to assist. The Department is increasing its grant towards the headquarters expenses of Home Start Consultancy to £45,000 per annum in 1988-89, 1989-90 and 1990-91, an increase of 50 per cent. over its previous three-year grant of £30,000.

This year Home Start Consultancy has been added to the list of national organisations giving small grants to local groups for under-fives and their families under the Department's small grants scheme. A total of £30,000 has been allocated to Home Start, of which up to £2,850 may be used towards administration costs.

In addition, Home Start Consultancy received an allocation of £180,000 from the retail prices index error money which was announced by my hon. Friend in his reply to my hon. Friend the Member for Wells (Mr. Heathcoat-Amory) on 3 May at columns *422-24*. Some of this money will be available to fund a new national inner cities officer post and to meet the related administrative expenditure.

Registration Service

Mr. Baldry: To ask the Secretary of State for Health what progress has been made on the consultations on reforming the registration service announced by the Government on 3 December 1987, *Official Report*, House of Lords, column 1230.

Mrs. Currie: Those consultations have been completed and we now have the report of a working group set up by the Office of Population Censuses and Surveys and the local authority associations, which has also taken the views of the staff associations and other interested parties and which has produced detailed recommendations for the modernisation of the service. Ministers accepted the working group's views as the basis for wider public consultation, and a consultative document based on them will be issued in the autumn.

Mentally Ill Patients

Mr. Gale: To ask the Secretary of State for Social Services if he will give figures for each local authority area, for the number of patients suffering from mental illness that have, during the year 1986-87 been transferred from mental institutions to unregistered homes; and if he will make a statement.

Mrs. Currie: In 1986, the latest year for which figures are available, 1,080 people were discharged into the community after stays of over five years (excluding those who were merely transferred from one hospital to another). On other issues related to this matter I shall write to my hon. Friend.

Supplementary Benefit

Mr. Gordon Brown: To ask the Secretary of State for Social Services if he will publish a table using the low-income families statistics 1985 showing how many people fell below supplementary benefit level, were on supplementary benefit or up to 40 per cent. above supplementary benefit level, analysed according to both economic and family status together.

Mr. Scott *[holding answer 22 June 1988]:* A note has been placed in the Library.

ENVIRONMENT

House Building

Mr. Forth: To ask the Secretary of State for the Environment if he will give, for every county, borough and metropolitan district in England, the number of new dwellings built for each year since 1980.

Mr. Trippier: Housebuilding figures for each local authority area and county appear in the tables "Housebuilding in England by local authority areas, 1980 to 1987" which have today been placed in the Library. These incorporate late returns from several authorities and some revisions of earlier returns, received since figures for these years were published in "Local Housing Statistics". The tables will be published shortly by the Department.

Westminster City Council

Mr. McCartney: To ask the Secretary of State for the Environment what steps he proposes to take to ensure that the events recorded in investigation 493/Y/82 by the Parliamentary Commissioner for Administration into a complaint against Westminster city council do not recur.

Mr. Trippier: The reference quoted is one used by the Commission for Local Administration, not the Parliamentary Commissioner for Administration, whose remit does not cover London borough councils. The report shows shortcomings in the administration of various statutory provisions relating to housing. Such shortcomings, and their remedy, are a matter for the local housing authority not the Department.

Retail Prices Index

Mr. Austin Mitchell: To ask the Secretary of State for the Environment what weight council house rents and mortgage interest payments have in the retail prices index; and if he will publish in the *Official Report* a table showing the weight given to each in the index in each of the past 10 years, the annual increase in the price of each component and in the index as a whole, and the implied amount currently being spent under each heading.

Mr. Trippier: A separate index for local authority rents is not published. The weights and movements of the rent and mortgage interest components of the retail prices index have been as follows:

	Weight (out of 1,000)		*Percentage increase in year to January*		
	Rents	*Mortgage interest*	*Rents*	*Mortgage interest*	*R.P.I. (all items)*
1978	32	23	—	—	—
1979	32	31	9·4	38·8	9·3
1980	28	38	11·2	51·5	18·4
1981	30	42	22·7	15·1	13·0
1982	36	41	36·8	18·6	12·0
1983	36	30	11·0	−25·4	4·9
1984	35	39	4·8	24·8	5·1
1985	31	46	7·2	16·4	5·0
1986	29	54	7·4	18·4	5·5
1987	[1]34	44	5·9	8·6	3·9
1988	33	42	5·7	−3·7	3·3

[1]Until 1987 the figures for rent were net of rebates.

The implied amount being spent under the mortgage interest component is £8·13 per household per week. For rents the figure is £6·24. Both these figures represent an average (at January 1988 prices) taken over all households (both tenants and owner occupiers) covered by the RPI.

Rates and Taxes

Mr. Austin Mitchell: To ask the Secretary of State for the Environment whether he will publish in the *Official Report* a table showing the forecast revenue from rates in the current financial year, and the estimated revenue from a 1 per cent. levy on the current value of *(a)* residential property, *(b)* agricultural and horticultural land and premises, *(c)* factories, and so on, *(d)* shops, *(e)* offices and *(f)* other land and premises; and if he will include a figure for the yield of a 1 per cent. tax on all personal incomes.

Mrs. Virginia Bottomley: The forecast yield of rates in the United Kingdom for 1988-89 is £19·2 billion. The revenue from a 1 per cent. levy on estimated end 1986 market values is as follows:

	£ billion
Residential property	6·9
Agricultural land, buildings and forestry	0·3
Industrial buildings	0·3
Commercial buildings	1·9
Other buildings	1·1

The yield of a 1 per cent. tax on total household income in 1986 is estimated to be £3·1 billion. More up-to-date estimates are not yet available.

Homelessness

Mr. Redmond: To ask the Secretary of State for the Environment (1) what the homeless figures are for each of the last five years for *(a)* Doncaster and *(b)* England and Wales; how many of those are single homeless; and if he will make a statement;

(2) what is his estimate of the number of homeless single people for each of the last six years; what is his estimate of the number of homeless single persons for whom no authority is statutorily responsible; and if he will make a statement.

Mr. Trippier: The numbers of households for whom Doncaster borough council reported accepting responsibility for securing accommodation in the years 1983 to 1986 appear in a table placed in the Library in May 1987. In 1987, 285 households were accepted.

Corresponding figures for England were included in the reply given to the hon. Member for Newcastle-upon-tyne, East (Mr. Brown) on 10 June, at columns 737-78. For Welsh figures I refer the hon. Member to my right hon. Friend the Secretary of State for Wales.

The numbers of single people among the households accepted as homeless are not reported by local authorities and my Department has no estimates.

Recruitment and Promotion Policy

Ms. Richardson: To ask the Secretary of State for the Environment what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career break due to child care.

Mr. Ridley: My Department has a policy of fair and open competition in recruitment and promotion. The only upper age limit for new entrants recruited directly by the Department is that they need to be able to give five years' service before retirement. Staff are not normally selected for promotion within two years of retirement.

Women are encouraged to return to work by arrangements for reinstatement and by the availability of part-time working, job sharing, and special leave for domestic reasons.

Football Supporters

Mr. Amess: To ask the Secretary of State for the Environment when he expects the compulsory membership scheme for football supporters to be fully operational; how much the scheme will cost; and how it will be funded.

Mr. Moynihan: I shall write to my hon. Friend.

Horsham District Council

Mr. Soley: To ask the Secretary of State for the Environment (1) if he received any application from councillors of Horsham district council for dispensation to vote on the proposal to transfer an empty council house to the Horsham Conservative Association;

(2) what account he has taken of the decision of Horsham council to vote on the proposal to transfer an empty council house to the Horsham Conservative Association in drawing up proposals for a revised national code of conduct for local government.

Mrs. Virginia Bottomley: Yes. The two applications for the Secretary of State's dispensation under section 97(1) of the Local Government Act 1972 were dealt with in accordance with the long-established policy contained in DOE circular 105/73. Where a member's declared interest is immediate the prohibition on speaking and voting is generally strictly maintained, unless at least half the council or relevant committee would otherwise be

disabled. In the cases in question, some 35 of the 43 members of the council were disabled, and dispensations to speak and vote were given.

The White Paper on the "Conduct of Local Authority Business" (Cm. 433), published on 21 July, indicates that the Government will consult the local authority associations in drawing up a revised national code of local government conduct. We shall of course take account of all relevant information in doing so.

Mr. Soley: To ask the Secretary of State for the Environment if he will call in the decision of Horsham district council to grant planning permission to the Horsham Conservative Association to use an empty council house for its office; and whether he will make a statement.

Mr. Ridley *[holding answer 26 July 1988]:* No. This is not a matter of national or regional importance. I understand that the premises currently used by the Horsham Conservative Association are due to be demolished as part of the town centre redevelopment scheme, and that Horsham district council has given planning permission for two years for the use of premises, also affected by the town centre redevelopment scheme, as offices.

Local Authority Finance

Mr. Austin Mitchell: To ask the Secretary of State for the Environment whether he will publish in the *Official Report* a table giving, for 1987-88 and a forecast for 1988-89, the information on local authority income given in table 16.18 of the 1988 edition of the "Annual Abstract of Statistics".

Mrs. Virginia Bottomley: The figures requested are not yet available.

London City Airport

Mr. Tony Banks: To ask the Secretary of State for the Environment if his Department was consulted by the London Docklands development corporation over the application by London City airport to allow demonstration landings and take-offs by BAe 146 aircraft; and if any of his officials were present at the tests on 24 July.

Mr. Trippier: The London Docklands development corporation informed the Department that a planning application had been received and that planning permission has been granted allowing the London City airport to be used on three days for demonstration flights by British Aerospace 146 aircraft. No officials from my Department were present at the demonstration on 24 July.

Mr. Tony Banks: To ask the Secretary of State for the Environment if he will make it his policy to order a full public inquiry to consider any application for the scheduled use of London City airport by BAe 146 aircraft; and if he will make a statement.

Mr. Trippier: In the event of an application being made to the London Docklands development corporation my right hon. Friend will consider carefully whether it should be called in for public inquiry.

Lululla Arborea

Dr. Marek: To ask the Secretary of State for the Environment, pursuant to his answer of 25 July, what form of minutes of the consultations between representatives of the European Economic Community member states concerned the proposal to include Lululla arborea in appendix II of the Berne convention are available to his Department; and to what extent such records reveal the indentity of those countries which raised objections to the inclusion of that bird in that appendix.

Mrs. Virginia Bottomley: The consultation took place at a community co-ordination meeting in December 1987. The minutes of the proceedings of such meetings are normally confidential.

County Hall, London

Mr. Dykes: To ask the Secretary of State for the Environment if he will take steps to procure the publication by the London Residuary Body of *(a)* all the relevant papers on the disposal of the County Hall, Embankment, SE1, including advice from consultants on granting a bid already rejected by a public inquiry, *(b)* the details of the agreement reached between the London Residuary Body and the development group, especially the conditions placed on the bid by both parties and *(c)* full details including scale drawings of the developer's proposals.

Mrs. Virginia Bottomley: These matters are commercially confidential.

Housing Action Trusts

Mr. Tony Banks: To ask the Secretary of State for the Environment if he will list the management consultants commissioned to make recommendations on the setting up of housing action trusts; what is the total cost involved in those commissions; and when he expects their reports to be received.

Mr. Trippier: I shall write to the hon. Member shortly.

Mr. Tony Banks: To ask the Secretary of State for the Environment what is his current estimate of when the first housing action trusts will be set up; and which further local authority areas are currently being considered for future housing action trusts.

Mr. Trippier: Housing action trusts cannot be designated and established until the Housing Bill has received Royal Assent and the necessary orders have been approved by Parliament.

We have no current plans for further housing action trusts beyond those announced by my hon. Friend the then Minister for Housing and Planning on 11 July.

Homeless People

Mr. Soley: To ask the Secretary of State for the Environment what information he has as to which bed-and-breakfast hotels in London will accept single homeless people without payment of rent in advance and as to what alternative accommodation is available to them.

Mr. Trippier: This information is not collected centrally. Single homeless people can approach their local authority for advice, or assistance, under part III of the Housing Act 1985.

Mr. Soley: To ask the Secretary of State for the Environment (1) if he has any plans to provide additional funds to those organisations providing shelter for homeless people;

(2) when his Department will be able to provide an estimate of the numbers of single homeless people in London;

(3) if he will provide an estimate of the numbers of single homeless people using direct access hostels each night.

Mr. Trippier: I shall write to the hon. Member.

Mr. Norman Hogg: To ask the Secretary of State for the Environment if he will outline the estimated costs to public funds of *(a)* keeping homeless families in hotels and *(b)* building new council houses for those families.

Mr. Trippier *[building answer 14 July 1988]:* Estimates of the revenue costs in 1986-87 in Greater London and English non-metropolitan districts were given by my hon. Friend the Minister for Housing and Planning in reply to the hon. Member for Southwark and Bermondsey (Mr. Hughes) on 21 January, at column 826.

Corresponding estimates for English metropolitan districts are as follows:

New build	£3,200 per annum[1]
Bed and breakfast	£26 per day[2]

[1] Estimated average total first year costs to local authorities of a newly built dwelling, derived from information on costs (including land and fees) provided by authorities in housing subsidy. Costs vary widely between authorities and from year to year, reflecting differences in the mix of work and in land costs.

[2] Estimated average gross daily cost per household, based on returns to CIPFA from those authorities which reported both the number of household-days of bed and breakfast provided and the gross expenditure on it.

Caravan Sites

Mr. Corbyn: To ask the Secretary of State for the Environment if he will list the total number of sites approved by his Department under the Caravan Sites Act 1968 for each year since 1979; and the amount of money available for each year since 1979 in consequence of the Act.

Mr. Trippier: I shall write to the hon. Member shortly.

Local Government Superannuation Scheme

Mr. O'Brien: To ask the Secretary of State for the Environment if he will consider making the regulations necessary to allow part-time employees in local government to purchase back credits under the local government superannuation scheme; and if he will make a statement.

Mrs. Virginia Bottomley: I refer the hon. Member to the answer given on 11 July 1988, at column 43, to my hon. Friend the Member for Edmonton (Dr. Twinn).

Water Quality

Mr. Allan Roberts: To ask the Secretary of State for the Environment (1) if he will estimate the costs of support to local authority environmental health departments in undertaking their statutory duties to regulate drinking water quality and recreational water quality after privatisation of the water industry;

(2) what arrangements are currently in hand to ensure independent auditing of drinking water quality after privatisation of the water industry;

(3) if he will name those individuals outside his Department presently advising the Department of the Environment on the regulation of drinking water quality after privatisation of the water industry;

(4) what outside advice he will be receiving on the regulation of recreational water quality after privatisation of the water industry.

Mr. Moynihan: I shall write to the hon. Member shortly.

National Rivers Authority

Mr. Allan Roberts: To ask the Secretary of State for the Environment if he will be accepting the recommendations of the regional water authorities of England and Wales that the proposed National Rivers Authority should have staffing levels approaching 6,000 persons.

Mr. Moynihan: The staffing levels of the National Rivers Authority will depend on final decisions on the schemes of organisation for the creation of their NRA units submitted by the water authorities.

Mr. Allan Roberts: To ask the Secretary of State for the Environment what will be the arrangements for ensuring access to independent analytical services on behalf of the National Rivers Authority; and if he will estimate the costs to public funds of such arrangements.

Mr. Moynihan: The National Rivers Authority advisory committee has emphasised the importance of the National Rivers Authority having adequate laboratory and analytical facilities within its own control. The precise arrangements for analytical services for the NRA and their costs must depend on final decisions on the schemes of organisation submitted by the water authorities.

Tower Hamlets (Disposal Consents)

Mr. Simon Hughes: To ask the Secretary of State for the Environment (1) if, in respect of the application by the London borough of Tower Hamlets for disposal consent for Selby street, he will give the reasons for the delay between receipt by his Department of the application on 3 May and the request by the Department for additional information of 17 June; and if there is any necessary information which has still not been made available to the Department;

(2) if, in relation to the application by the London borough of Tower Hamlets for disposal consent for Masthouse terrace, he will give the reasons for *(a)* the delay between receipt by his Department of the application on 7 December 1987 and the request by the Department for additional information of 13 April and *(b)* for two separate requests for additional information having been made by the Department on 13 April and 20 May; and if there is any necessary information which has still not been made available to the Department;

(3) if, in relation to the application by the London borough of Tower Hamlets for disposal consent for the Hadrian estate, he will give the reasons for the delay between receipt by his Department of the application on 23 February and the request by the Department for additional information of 4 July; and if there is any necessary information which has still not been made available to the Department;

(4) if, in relation to the application by the London borough of Tower Hamlets for disposal consent for

Glenaffric avenue, he will give the reasons for his Department not having responded to the application since the council provided on 4 February all outstanding information requested by the Department; and if there is any necessary information which has still not been made available to the Department;

(5) pursuant to the answer of Monday 25 July to the hon. Member for Southwark and Bermondsey, if he will list in relation to each of the outstanding applications for disposal consent from the London borough of Tower Hamlets *(a)* the names of all outside bodies from whom at any time since receipt of each application necessary information has not been available to his Department, *(b)* the items of necessary information which at any time since receipt of each application have not been available from outside bodies and *(c)* the dates on which outstanding necessary items of information have been provided by outside bodies to his Department.

Mr. Trippier: I shall write to the hon. Member.

Bed-and-Breakfast Accommodation

Mr. Simon Hughes: To ask the Secretary of State for the Environment what is the number of people in bed-and-breakfast accommodation in England paid for by public funds at the latest date for which statistics are available.

Mr. Trippier: I shall write to the hon. Member.

Sanitary Ware

Dr. Blackburn: To ask the Secretary of State for the Environment if he will ensure that sanitary ware bearing the CE mark is not allowed in the United Kingdom market.

Mr. Trippier: I shall write to my hon. Friend shortly.

Plumbing

Dr. Blackburn: To ask the Secretary of State for the Environment (1) if he will ensure that products used in the plumbing industry in the United Kingdom not bearing the British Standard and water authority approval fail on safety aspects as laid down by British Standards;

(2) if he will ensure that the harmonisation of standards in 1992 in Europe takes into consideration the current low water plumbing pressures currently applicable in the United Kingdom;

(3) if he has any plans to change the British Standards for low water pressure systems in plumbing;

(4) what are the implications of the completion of the internal market for the legal status of water by laws and British Standards related to the plumbing industry; and if he will make a statement;

(5) if the Government intend to impose a 7·5 litre flushing action in the plumbing industry;

(6) when he expects to be able to establish acceptance by Europe of the United Kingdom low pressure domestic water system; and if he will make a statement.

Mr. Moynihan: I shall write to my hon. Friend shortly.

Former GLC Employees (Compensation)

Mr. Rooker: To ask the Secretary of State for the Environment if he will make a statement regarding the non-payment of moneys owing for the year 1987-88 to former Greater London council employees who are beneficiaries of the Local Government Compensation Regulations 1986.

Mr. Gummer: I shall write to the hon. Member shortly.

Crown Suppliers

Mr. Speller: To ask the Secretary of State for the Environment if he is yet in a position to say when the Crown Suppliers will be privatised; and what exclusive properties with particular reference to mailing lists they will retain.

Mr. Chope: I shall write to my hon. Friend shortly.

Housing Associations

Mr. Thurnham: To ask the Secretary of State for the Environment how many new homes were provided by housing associations during 1987; and how many of these were built or refurbished for sale as *(a)* leasehold flats for the elderly, *(b)* old properties refurbished with improvement grants; and *(c)* shared ownership schemes.

Mr. Trippier: I shall write to my hon. Friend shortly.

Organisms (Releases)

Mr. Wood: To ask the Secretary of State for the Environment what plans he has to strengthen his Department's ability to review the environmental implications of releases of non-indigenous and of genetically manipulated organisms.

Mrs. Virginia Bottomley: My right hon. Friend has decided to establish a committee of independent experts which will advise him on the ecological implications of releases of non-indigenous organisms and strengthen the Department's contribution to existing arrangements for evaluating the release of genetically manipulated organisms.

Sir Kenneth Blaxter has agreed to be chairman of the new committee and its full membership will be announced shortly.

The terms of reference of the committee are:

a) on an interim basis, pending advice from the Royal Commission on Environmental Pollution and the Government's response to this, to advise the Department, on request, on matters relating to the ecological implications of releasing novel organisms and viruses (other than those already covered by existing product based controls);

b) to provide ecological advice to other Departments and Government agencies and advisory bodies at their request either through the Department or direct as appropriate and, in particular, to provide such advice to the Health and Safety Executive and the Advisory Committee on Genetic Manipulation on proposals for the planned release of genetically manipulated organisms into the environment.

Dartford (Planning Appeals)

Mr. Dunn: To ask the Secretary of State for the Environment if he will publish in the *Official Report* the dates and details of each public inquiry held for planning appeals in the borough of Dartford since 1983; what length of time elapsed from the holding of each public inquiry to the issue of the decision; and how many planning appeals remain outstanding.

Mr. Chope: I shall write to my hon. Friend.

Birtenshaw Farm

Mr. Thurnham: To ask the Secretary of State for the Environment whether he will now announce his decision on Birtenshaw farm; and what account he has taken of the advice of the Association of Greater Manchester Authorities on the sufficiency of land available for housing in the Greater Manchester area and on pressure on green field sites.

Mr. Chope: I shall write to my hon. Friend.

Rating Appeals

Mr. O'Brien: To ask the Secretary of State for the Environment if he will publish the length of time it takes for rating assessment appeals to be heard in authorities in West Yorkshire, giving a breakdown for each authority; and if he will make a statement.

Mrs. Virginia Bottomley *[holding answer 28 July 1988]:* A number of factors determine the time taken for an appeal to reach a local valuation court hearing. These include the complexity of the case, the workload of each of the parties to the appeal and the workload of the local valuation panel. On average, an appeal in west Yorkshire is heard by the local valuation court within nine to 12 months of its receipt.

Mr. O'Brien: To ask the Secretary of State for the Environment if he will publish the details of rating valuation assessments appeals in the West Yorkshire area, giving information as to agreements reached with the valuation offices and appeals submitted to the valuation courts; and if he will give a breakdown for each local authority area.

Mrs. Virginia Bottomley *[holding answer 28 July 1988]:* During the year 1987-88 in the west Yorkshire area, 19,906 proposals by the valuation office to alter rateable values were settled without objection. A further 449 proposals by the Valuation Office, to which objections were received, were settled within the statutory period and 2,038 such proposals were passed to the local valuation panel as appeals to the local valuation court. In the same period, 1,800 proposals by ratepayers were settled within the statutory period and 4,860 proposals were passed to the local valuation panel as appeals. It is not possible in the time available to give a breakdown of these figures by local authority area.

Mr. O'Brien: To ask the Secretary of State for the Environment if he will publish a list of the outstanding rating valuation appeals for the Yorkshire and Humberside region, giving details of the appeals outstanding for each local authority area, and a breakdown of domestic and industrial appeals.

Mrs. Virginia Bottomley *[holding answer 28 July 1988]:* The number of appeals outstanding at 30 June 1988 in the local valuation panels in the Yorkshire and Humberside region is as follows:

	Appeals
Humberside	1,848
North Yorkshire	1,107
South Yorkshire	1,837
West Yorkshire	4,594

It is not possible, in the time available, to give a breakdown of these figures by local authority area or to provide a breakdown between domestic and non-domestic appeals.

Derelict Land Grant

Mr. Steen: To ask the Secretary of State for the Environment whether, having regard to the derelict land programme and paragraph 39(vii) of circular 27/87, derelict land grant is payable for wildlife habitat creation projects in addition to industrial housing and commercial projects.

Mr. Chope: I shall write to my hon. Friend shortly.

Sewers

Mr. O'Brien: To ask the Secretary of State for the Environment what provisions are to be made for communal sewers in gardens of properties to be included in the responsibilities of the water undertakers following privatisation; and if he will make a statement.

Mr. Moynihan: I refer the hon. Member to the announcement of the outcome of the water and sewerage law review on 11 May 1988, at column 132.

River Thames

Mr. Amess: To ask the Secretary of State for the Environment (1) what is his policy towards greater use of the River Thames; and if he will make a statement;

(2) if the Government will make it their policy to promote and uphold the environment of the River Thames; and if he will make a statement;

(3) what representations his Department has received requesting the Government to make greater use of the River Thames; and if he will make a statement.

Mr. Moynihan *[holding answer 28 July 1988]:* I shall write to my hon. Friend.

Departmental Programmes

Mr. George: To ask the Secretary of State for the Environment how much has been spent by his Department in each of the past five years on the evaluation of departmental programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mr. Ridley *[holding answer 28 July 1988]:* The process of evaluation of my Department's programmes is part of the work itself. It is therefore not possible to identify separately the resources involved.

Local Authority Finance

Mr. Worthington: To ask the Secretary of State for the Environment if he will publish in the *Official Report*, in the same format as his reply of 13 July *Official Report*, columns *231-34*, an analysis of capital receipts on his programmes.

Mrs. Virginia Bottomley *[holding answer 28 July 1988]:* The analysis is set out in the table.

	1982-83	1983-84	1984-85	1985-86	1986-87	1987-88	1988-89	1989-90	1990-91
Housing									
Housing Corporation	75	112	91	102	130	112	80	80	90
Other Central Government (Homeloan)	—	—	1	2	2	4	2	—	—
Local authorities	1,739	1,761	1,628	1,617	1,906	2,200	1,876	1,920	1,920
New Towns	63	84	88	64	98	119	110	80	70
Total	1,877	1,958	1,808	1,785	2,136	2,435	2,068	2,080	2,080
Other environmental services									
New Towns	72	79	83	138	171	312	311	180	150
Local environmental services	215	235	312	330	463	745	542	540	540
Total	287	314	395	458	534	1,057	853	720	690

Figures: 1982-83 to 1986-87—outturn; 1987-88—provisional outturn; 1988-89 to 1990-91—planned expenditure.

Mr. Worthington: To ask the Secretary of State for the Environment if he will publish in the *Official Report* in the same format as his reply of 13 July, *Official Report*, columns *231-34*, a detailed analysis by nature of charge and functional area for total DOE housing expenditure and for local environmental services and other local authority current expenditure.

Mrs. Virginia Bottomley *[holding answer 28 July 1988]:* For DOE housing expenditure, no further breakdown is available beyond the figures given in my right hon. Friend the Secretary of State's reply of 13 July. All the receipts for charges relate to local authorities' non-housing revenue account current expenditure.

Figures for local environmental services and other local authority current expenditure are as follows:

	Local environmental services	*Other local authority current* *Local authority rate collection*	*Records and registration of births, deaths and marriages*
	£'000	*£'000*	*£'000*
1982-83	575,722	2,713	9,545
1983-84	572,089	4,239	3,557
1984-85	687,624	4,569	9,578
1985-86	746,249	5,110	10,033
1986-87	816,651	5,061	10,530
1987-88	771,148	4,569	4,525
1988-89	700,920	4,848	9,893
1989-90	782,151	5,034	10,548
1990-91	750,594	5,197	11,038

Figures: 1982-83 to 1987-87—outturn; 1987-88—provisional outturn; 1988-89 to 1990-91—planned expenditure.

Public Expenditure

Mr. Worthington: To ask the Secretary of State for the Environment if he will publish a table in the *Official Report*, in the same format as his reply of 13 July, *Official Report*, columns *231-4*, on receipts classified as charges in respect of his programme expenditure over the years 1982-83 to 1990-91, indicating the receipts in respect of running costs expenditure, together with a supplementary analysis indicating separately, the amount of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mrs. Virginia Bottomley *[holding answer 28 July 1988]:* The table gives information on charges made for the running costs of DOE (central). Equivalent information on programme expenditure was given in my right hon. Friend the Secretary of State's answer of 13 July.

£'000

	1982-83	1983-84	1984-85	1985-86	1986-87	1987-88	1988-89	1989-90	1990-91
Receipts in respect of running costs expenditure:									
Royal palaces, royal parks and royal armouries	—	—	—	259	511	—	—	—	—
Historic buildings, ancient monuments and national heritage	—	—	8	—	28	—	—	—	—
Departmental administration	28,309	29,410	29,138	29,138	33,316	34,905	35,149	36,028	36,928
Total	28,309	29,410	29,146	29,397	33,855	34,905	35,149	36,028	36,928
Of which included in running costs of other Government Departments[1]									
Royal palaces, royal parks and royal armouries	—	—	—	251	511	—	—	—	—
Historic buildings, ancient monuments and national heritage	—	—	8	—	—	—	—	—	—
Departmental administration	1,584	1,699	2,790	3,756	1,776	3,151	3,279	3,361	3,445
Total	1,584	1,699	2,798	4,007	2,282	3,151	3,279	3,361	3,445

[1] Information is available for charges falling on the running costs of other Departments, but not for those falling on other public expenditure programmes.
Figures:
1982-83 to 1986-87—outturn; 1987-88—provisional outturn; 1988-89 to 1990-91—planned expenditure.

London Theatres (Listed Building Status)

Mr. Bowis: To ask the Secretary of State for the Environment if he will list the theatres in London with listed building status.

Mrs. Virginia Bottomley *[holding answer 26 July 1988]:* The following theatre buildings in London have been listed:

Central London theatres
- Adelphi Theatre
- Albery Theatre
- Aldwych Theatre
- Ambassadors Theatre
- Apollo Theatre
- Bush Theatre (BBC Television Theatre)
- Camden Theatre
- The Coliseum
- Comedy Theatre
- Criterion Theatre
- Domnar Warehouse
- Duke of York's Theatre
- Garrick Theatre
- Globe Theatre
- Golders Green Hippodrome
- Her Majesty's Theatre
- Jeanette Cochrane Theatre
- London Palladium
- Lyceum Theatre
- Lyric Theatre, Shaftesbury Avenue
- New Victoria
- Old Vic
- Palace Theatre
- Phoenix Theatre
- Playhouse Theatre
- Queens Theatre
- The Round House
- Royal Court Theatre
- Royal Opera House
- Sadlers Wells
- St. Martins Theatre
- Savoy Theatre
- Shaftesbury Theatre
- Strand Theatre
- Theatre Royal, Drury Lane
- Theatre Royal, Haymarket
- Vaudeville Theatre
- Victoria Palace
- Wyndhams

Outside Central London
- Grand Theatre, Wandsworth
- Hackney Empire
- Hoxton Hall
- Richmond Theatre
- Theatre Royal, Stratford East
- Wiltons Music Hall, Tower Hamlets
- Wimbledon Theatre

Housing Association Tenants (Transfer Discounts)

Mr. Bowis: To ask the Secretary of State for the Environment what steps he is taking to enable housing association tenants of pre-HAG properties to benefit from HOTCHA transfer discounts.

Mr. Trippier *[holding answer 28 July 1988]:* Section 45 of the Housing Associations Act 1985 limits the HOTCHA scheme to tenants of houses or flats provided with the help of housing association grant.

Housing Associations (Share Purchase Schemes)

Mr. Bowis: To ask the Secretary of State for the Environment what steps he is taking to encourage housing associations to provide share purchase schemes for existing and future tenants.

Mr. Trippier *[holding answer 28 July 1988]:* In 1987-88 the Housing Corporation approved shared ownership schemes providing 776 new homes. The corporation's development programme for 1988-89 will allow expansion of shared ownership and other forms of provision for low cost home ownership by housing associations. My noble Friend the Minister for Housing has written to my hon. Friend.

Sewage Discharges

Mr. Teddy Taylor: To ask the Secretary of State for the Environment (1) if he has reviewed the consents given to the Anglian water authority in December 1986 to discharge sewage into the estuary after 31 December 1987, in terms of the permission given; and if he will make a statement;

(2) what recent advice he has had from the Thames water authority about the quality of bathing water in Southend-on-Sea; and if he will make a statement;

(3) if he will review his decision of December 1986 about the treatment of sewage by the Anglian water authority in the Southend area; and if he will make a statement;

(4) what advice he has had from the Anglian water authority about the delays in the construction to the extended outfall in Southend-on-Sea; and if he will make a statement.

Mr. Moynihan *[holding answer 28 July 1988]:* I will write to my hon. Friend.

Ms. Walley: To ask the Secretary of State for the Environment (1) what measures he will take to ensure that all sewage treatment works meet the requisite effluent discharge standards; what proposals he has to encourage water authorities to make the necessary financial investment; whether the Government will relax controls on water authority capital expenditure in order to stimulate the necessary investment; and whether he will impose a deadline on discharge standards being met;

(2) if he will list for each year since 1974, by water authority, the percentage of sewage treatment works that have failed to meet their effluent discharge standards;

(3) if he will state the number of occasions on which he has reviewed the effluent discharge standards laid upon specific water authority sewage treatment works; and for how many works the effluent discharge standards were relaxed following review;

(4) if he will, by water authority region, list the names of those water authority sewage treatment works that failed to meet their effluent discharge standards in 1987, the measures that are proposed for each of these works to bring them up to standard, and the year by which it is anticipated that they will have been brought up to standard.

Mr. Moynihan *[holding answer 28 July 1988]:* I shall write to the hon. Member.

Council House Sales

Mr. Amess: To ask the Secretary of State for the Environment what is now the total number of council houses which have been sold under the right to buy provisions of the Housing Act 1980 to sitting tenants; and if he will make a statement.

Mr. Trippier *[holding answer 28 July 1988]:* 709,000 dwellings in England have been sold by local authorities and new towns under the right-to-buy legislation up to March 1988.

Mr. Amess: To ask the Secretary of State for the Environment if he will publish in the *Official Report* a list of the number of council houses which have been sold under the Housing Act 1980 to sitting tenants of each local authority since 1982.

Mr. Trippier *[holding answer 28 July 1988]:* I shall write to my hon. Friend.

Slurry and Silage Facilities

Ms. Walley: To ask the Secretary of State for the Environment (1) whether the regulations to be made under section 31(4) of the Control of Pollution Act 1974, controlling the construction of slurry and silage facilities, will cover existing as well as new and extended facilities;

(2) when he proposes to introduce regulations under section 31(4) of the Control of Pollution Act 1974 to control the construction of new or extended silage and slurry facilities, as outlined in paragraph 3.11 of "Observations by the Government on the Third Report of the Environment Committee on the Pollution of Rivers and Estuaries".

Mr. Moynihan *[holding answer 28 July 1988]:* I shall write to the hon. Member.

Rating Reform

Mr. Blunkett: To ask the Secretary of State for the Environment what would be the average total community charge payable in 1988-89, with the community charge fully operational, and using 1988-89 figures for local authority total expenditure and population, by the following categories of income units: *(a)* all income units in England and Wales on income support, *(b)* all income units in the United Kingdom on income support, *(c)* all income units consisting of a single person with or without dependent children, who is not cohabiting and is on income support, *(d)* all income units consisting of a married or cohabiting couple, with or without dependent children, who are on income support, and *(e)* all income units on income support where the claimant is aged less than 25 years, giving the averages for each category for each region.

Mr. Gummer *[holding answer 28 July 1988]:* The information requested is not available. I shall write to the hon. Member.

Social Science Research

Mr. George: To ask the Secretary of State for the Environment how much has been spent by his Department in each of the past five years on social science research; what percentage this constitutes of total departmental expenditure and of the Department's research budget; and how much of the research has been undertaken *(a)* within his Department, *(b)* by universities and polytechnics and *(c)* by independent research organisations.

Mr. Ridley *[holding answer 28 July 1988]:* The figures for expenditure on research for 1982-83, 1983-84, 1984-85, 1985-86 and 1986-87 are as follows:

£ million

	1982-83	*1983-84*	*1984-85*	*1985-86*	*1986-87*
Total research and development[1]	39·0	36·9	41·0	48·8	63·5
Total social science and humanities	1·2	1·5	1·9	1·9	2·6
Social science and humanities as a percentage of total research and development	3·1 per cent.	4·1 per cent.	4·6 per cent.	3·9 per cent.	4·1 per cent.
Research and development for social science by universities and higher education	0·4	0·3	0·4	0·3	0·3
Research and development for social science by independent research organisations	0·1	0·03	0·01	0·0	0·08

[1] Total research and development for science and technology and social science and humanities.

The figures above relate to the available information for gross expenditure on research and development by DOE, including that performed elsewhere in central Government, for research and development in total and for social science and humanities.

SOCIAL SECURITY

Household Incomes

Mr. Nigel Griffiths: To ask the Secretary of State for Social Security if he will provide a breakdown of the rise in real household incomes by household type between 1979 and 1985 for the bottom 10 per cent. and top 10 per cent. of individuals in the manner of his answer to the hon. Member for Liverpool, West Derby (Mr. Wareing), 16 June, *Official Report*, column *279*.

Mr. Scott: The information requested is set out in the table:

Increases in real average incomes of individuals in households 1979 to 1985
(Adjusted for family size and composition, before housing costs)

Family type	*Below 10 per cent.*	*Above 90 per cent.*
Married pensioner	2	16
Single pensioner	5	11
Married with children	13	17
Married without children	4	20
Single with children	5	21

Family type	Below 10 per cent.	Above 90 per cent.
Single without children	15	16
All family types	6	18

Notes to table

1. Further details on methods and assumptions can be found in "Households Below Average Income: A Statistical Analysis, 1981-85", copies of which are in the Library. Also relevant is "Low Income Statistics—Report Of A Technical Review", May 1985, which is also in the Library.
2. Household income is defined after the payment of any income tax and national insurance and the receipt of any social security benefits. Individuals within households have been ranked by their (equivalent) household income.

Mr. Gordon Brown: To ask the Secretary of State for Social Security if he will publish a table showing the increase in real income between (i) 1981 and 1983 and (ii) 1983 and 1985 for tables A1,3; C1,3; D1,3 and F1,3 from "Households Below Average Income: A Statistical Analysis".

Mr. Scott *[holding reply 22 June 1988]:* A note has been placed in the Library.

Benefits

Mrs. Wise: To ask the Secretary of State for Social Security how many people have lost housing benefit as a result of the replacement of free milk and free school dinners by a cash payment which is then reckoned as income for the purpose of calculating housing benefit *(a)* in Preston and *(b)* nationally.

Mr. Scott: Compensation is provided in the basic rates of family credit for the loss of entitlement to free school meals and free welfare milk. We estimate that 160,000 people nationally saw a reduction in their housing benefit as a result of this; but this reduction will have been more than outweighed by the increase in family credit. Information is not available other than on a national basis.

Mr. Austin Mitchell: To ask the Secretary of State for Social Security (1) whether he will publish in the *Official Report* a table showing the amount by which child benefit could be increased on a revenue neutral basis, if taxable, the gross and net cost to the Exchequer of raising the benefit to £20 for the first child and £15 for subsequent children, the estimated saving to public authorities as a result of the consequential reduction in other benefits, the tax saving from the abolition of the additional allowance for income tax purposes, and the estimated distribution of individual child benefits by range of income and tax status of their parents or guardians;

(2) how many adult male and female workers have been unemployed for one, two and three complete years, respectively; and whether he will publish in the *Official Report* a table showing the cost of paying each person a bonus of four weeks' benefit for each complete year of unemployment;

(3) how many children are being helped by payments from social security under the various headings and at what cost to the national insurance fund; how many would still need help if child benefit were raised to £20 taxable for the first and £15 taxable for subsequent children; and at what cost to the national insurance fund;

(4) how many unemployed adult males and females of working age have exhausted their entitlement to unemployment benefit; what is his estimate of the gross cost of removing the time limit in the case of *(a)* males and *(b)* females; and what would be the saving in each case in (i) other benefits and (ii) increased tax.

Mr. Scott: I will write to the hon. Member.

Mr. Redmond: To ask the Secretary of State for Social Security how many working days, on average, his Department's offices take to deal with supplementary benefit claims *(a)* nationally and *(b)* in Doncaster.

Mr. Scott: Supplementary benefit was replaced by income support from 11 April 1988. The average clearance times for claims to income support between 11 April to 30 June is as follows:

	Days
National	5·8
Doncaster East local office	3·0
Doncaster West local office	6·5

Source: Internal Management Statistics. This information is provisional and subject to amendment).

Mr. Frank Field: To ask the Secretary of State for Social Security if he will publish a table showing the value of *(a)* child benefit and *(b)* invalidity benefit for a married couple as a proportion of average net earnings for all males and all manually employed males for each year between November 1978 and the latest date available.

Mr. Scott: I shall write to the hon. Member.

Mr. Soley: To ask the Secretary of State for Social Security which types of accommodation currently qualify for funding under schedule 5 to the Supplementary Benefits Act 1976.

Mr. Scott: Schedule 5 to the Supplementary Benefits Act 1976, as amended, lays a duty on the Secretary of State to provide and maintain resettlement units at which persons without a settled way of life are afforded temporary board and lodging with a view to influencing them to lead a more settled life. That duty may be discharged by the actual provision of units, or by funding local authorities or voluntary organisations to do so, provided the purpose of these facilities is similar to that of resettlement units. My right hon. Friend the Member for Braintree (Mr. Newton) announced in February 1985 that we intended to move towards the closure of the directly administered units and use the money saved to finance further facilities to be set up and run by local authorities and voluntary organisations.

Housing Benefit

Mr. Beith: To ask the Secretary of State for Social Security whether he will now place further advertisements in national and regional newspapers advising pensioners how to apply for transitional payments in respect of housing benefit increases.

Mr. Scott: Yes. A two-week advertising campaign in national newspapers began on Thursday 28 July.

Ms. Mowlam: To ask the Secretary of State for Social Security if there is a final date for applications for the transitional additions payable in respect of people who lost as a result of the introduction of the new housing benefit system.

Mr. Scott: No cut-off date for applications has yet been announced.

Mr. Robin Cook: To ask the Secretary of State for Social Security what is the estimated administrative cost per successful application for housing benefit transitional payments made by the Glasgow unit.

Mr. Scott: It will not be possible to provide the information requested until we know more about the number of successful applications and the final cost of setting up the transitional payments unit.

Mr. Robin Cook: To ask the Secretary of State for Social Security what is the total planned expenditure for advertising the availability of housing benefit transitional protection.

Mr. Scott: The first stage of an advertising campaign publicising changes to housing benefit capital rules and transitional payments appeared in the national press at the end of May at a cost of £263,000. The second stage of this campaign began on Thursday 28 July and will cost £248,000. This is the total planned expenditure on advertising the changes to date.

Family Credit

Mr. Heddle: To ask the Secretary of State for Social Security if he will investigate why Mrs. V. Brady of 51 The Uplands, Great Haywood, Staffordshire, has not received her family credit since 24 May last; and if he will make a statement.

Mr. Scott: I will write to my hon. Friend.

Mr. Frank Field: To ask the Secretary of State for Social Security if he will state the number and proportion of claimants of family credit whose income is currently above *(a)* the national insurance threshold, and *(b)* the tax threshold.

Mr. Scott: This information is not available in respect of the people actually receiving family credit. However, on the same basis as the estimates in "Impact of the reformed structure of income-related benefits: October 1987", but using the 1988-89 thresholds, the breakdown is as follows:

	Number	*Proportion per cent.*
(a) Family credit recipients with incomes above the national insurance threshold	435,000	98
(b) Family credit recipients with incomes above the tax threshold	350,000	78

Ms. Mowlam: To ask the Secretary of State for Social Security what is the average time between claiming family credit and a payment order book being dispatched to the claimant.

Mr. Scott: I refer the hon. Member to the reply given to the hon. Member for Sunderland, North (Mr. Clay) on 7 July at column *725*.

Departmental Offices (Norwich)

Mr. John Garrett: To ask the Secretary of State for Social Security in respect of the local offices of his Department at Chantry house and Baltic house, Norwich, broken down by staffing grades *(a)* what is the current staffing complement, *(b)* how many permanent staff are currently in post, *(c)* how many temporary staff are currently in post, *(d)* how many staff members are currently being trained, *(e)* how many qualified officers are engaged in training staff and *(f)* what is the annual turnover of permanent staff.

Mr. Scott: The information requested is as follows:

Chantry Integrated Local Office, Chantry House

Grade	*Complement 1988-89*	*Permanent staff in post 1 July 1988*	*Temporary staff in post 1 July 1988*	*Turnover*
Principal	1	1	—	—
Senior Executive Officer	1	1	—	1
Higher Executive Officer	8	8	—	2
Local Officer 1	51	51·5	—	4
Local Officer 2	79	89·5	—	10
Administrative Assistant	27	29·5	3	5
Typist	4	4	—	1
Messenger	3	3	—	—
TOTAL	174	187·5	3	23

On 21 July 1988 there were no staff members being trained or engaged in training.

Mountergate Integrated Local Office, Baltic House

Grade	*Complement 1988-89*	*Permanent staff in post 1 July 1988*	*Temporary staff in post 1 July 1988*	*Turnover*
Principal	1	1	—	—
Senior Executive Officer	1	1	—	—
Higher Executive Officer	9	9	—	—
Local Officer 1	59	55·5	—	2·5
Local Officer 2	89	100	—	14
Administrative Assistant	31	31	2	6·5
Typist	4	3·5	0·5	—
Messenger	2	2	—	—
TOTAL	196	203	2·5	23

On 21 July 1988 there were five Local Officer 2s being trained and one Local Officer 1 engaged in training.

The information regarding turnover relates to the period 1 April 1987 to 31 March 1988.

Family Income Supplement

Mr. Frank Field: To ask the Secretary of State for Social Security if he will state the number and proportion of claimants of family income supplement whose income was above *(a)* the national insurance threshold and *(b)* the tax threshold for each year since 1978.

Mr. Scott: This information could be provided only at disproportionate expense.

Job Sharing

Mr. Janner: To ask the Secretary of State for Social Security how many job sharing and part-time working is encouraged in his Department; by whom and where it is publicised; and with what results.

Mr. Scott: The provisions for job sharing and part-time working are published in departmental circulars which are drawn to the attention of all staff. The Department's house journal, "Window", has also included occasional articles on part-time working. At 31 March 1988, the latest date for which figures are available, 596 women and 12 men were job sharing and 4,844 women and 109 men were working part-time.

Social Fund

Mr. Frank Field: To ask the Secretary of State for Social Security (1) what information he has on the take-up of loans and grants from the social fund; what were the projected take-up levels for the period from the introduction of the social fund to the present time; what has been the actual take-up shown by the latest available data; and if he will make a statement;

(2) how much he anticipated would be allocated by officers of his Department by way of community care grants to date; how much has been allocated; and if he will make a statement.

Mr. Scott: As my hon. Friend announced in his reply to the hon. Member for Derby, South (Mrs. Beckett) on 6 May, at column *656*, monthly information on the operation of the social fund in individual local offices, including figures for both applications and awards, is available in the Library. The national model profile of expected expenditure was contained in my hon. Friend's reply to the hon. Member for Derby, South on 11 July, at column *61*. This was based on the established pattern of seasonal variation in expenditure for single payments. Provisional figures show that in the period up to the end of June, £17 million was awarded for loans (60 per cent. of expected expenditure) and £4 million was awarded for community care grants (29 per cent. of expected expenditure).

Mr. Corbyn: To ask the Secretary of State for Social Security what are the total number of *(a)* loans and *(b)* grants made under the social fund for April, May and June of this current year for each London social security office; and what are the projected payments for the financial year 1988-89.

Mr. Scott: Information on the operation of the social fund and on allocations for 1988-89 is in the Library.

Earnings-related Supplement

Mr. Austin Mitchell: To ask the Secretary of State for Social Security what is his estimate of the cost to the national insurance fund in the current financial year of restoring the earnings-related supplement on the basis which applied before the Social Security (No. 2) Act 1980 for unemployed people only, what would be the saving in tax and other benefits; and how many males and females would benefit.

Mr. Scott: Information on which to base estimates is not available and could be obtained only at disproportionate cost.

Over-80s (Pensions)

Mr. Atkinson: To ask the Secretary of State for Social Security how much it would cost, net of income support, to uprate the over-80s pension to the level of the basic retirement pension; and how many pensioners would be affected.

Mr. Scott: I regret that the information requested is not available.

Social Security Budget

Mr. Austin Mitchell: To ask the Secretary of State for Social Security whether he will publish in the *Official Report* a table showing in terms of 1985 prices expenditure under the social security budget under the principal heads in 1986-87 and 1987-88; and if he will include his estimate for 1988-89.

Mr. Scott: The information requested is set out in the table. The figures are based on the cash provision shown in the public expenditure White Paper published in January 1988.

Expenditure[1] in 1985-86 prices[2] divided by broad groups of beneficiary Great Britain

£ million

	1986-87	*1987-88*	*1988-89*
Elderly people	20,370	20,490	20,400
Sick and disabled people	6,020	6,330	6,500
Unemployed people	6,690	5,980	5,800
Widows and orphans	1,090	1,040	1,000
Family benefits[3]	6,960	6,910	7,000
Administration	1,880	2,060	2,100
Total	43,010	42,810	42,800

Notes:

[1] Analysis covers all public expenditure on the social security programme.

[2] Converted to 1985-86 prices using the GDP deflator.

[3] Includes housing benefit paid to people in work.

Benefit Payments Errors

Mr. Redmond: To ask the Secretary of State for Social Security what is the percentage rate of benefit payments errors at his Department's offices *(a)* as a national average and *(b)* in Doncaster.

Mr. Scott: In the period 11 April 1988 to 30 June 1988 the average error rates, nationally and for the two Doncaster offices, were as follows:

	National Per cent.	Doncaster East Per cent.	Doncaster West Per cent.
Contributory benefits	4·6	2·2	5·2
Income support and Supplementary benefit	11·4	4·2	7·7

Departmental Recruitment and Promotion Policy

Ms. Richardson: To ask the Secretary of State for Social Security what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career break due to child care.

Mr. Scott: The Department operates an equal opportunities policy aimed at avoiding discrimination. All those involved in recruitment and promotion selection are issued with guidance on how to avoid unfair and unjustifiable discrimination. Chairmen of recruitment and promotion boards are required to ensure that no discrimination of any kind, direct or indirect, is allowed to prejudice the assessment and selection of candidates. Boards' decisions and the reasons for them, which are required to be recorded, must be impartial and restricted to matters relevant to the job and a candidate's ability for it.

Unclaimed Benefits

Mr. David Howell: To ask the Secretary of State for Social Security what was the total sum of unclaimed social security benefits in the latest convenient 12-month period.

Mr. Scott: I refer my hon. Friend to paragraphs 21 to 25 and table 15.17 on pages 272 to 273 of Cm. 288, the 1988 public expenditure White Paper.

Income Support

Mr. Corbyn: To ask the Secretary of State for Social Security if he will list for each of his Department's local offices in London postal districts *(a)* the numbers of income support recipients at each London office in the week beginning 11 April, *(b)* the numbers of income support recipients in receipt of transitional additions in the week beginning 11 April, at each London office, and *(c)* the numbers of income support recipients with the transitional addition who are pensioners, families with two parents, single parents, recipients of disability premium and other categories of claimants.

Mr. Scott: I regret that this information is not available.

Ms. Mowlam: To ask the Secretary of State for Social Security how many people transferred from supplementary benefit to income support were, on 11 April, receiving a transitional protection payment under the income support regulations, for each of his Department's local offices of Redcar, Middlesbrough, Eston, Hartlepool and Stockton.

Mr. Scott: I regret that this information is not available.

Pensioners (Benefits)

Mr. Battle: To ask the Secretary of State for Social Security (1) if he will detail at what level income support is paid to those persons of pensionable age who are *(a)* single and *(b)* married; what additional expenditure on the part of the claimant is taken into account for this purpose; and if he will make a statement;

(2) if he will detail the criteria laid down for determining the level of benefit paid to *(a)* single pensioners and *(b)* married pensioners; and if he will make a statement.

Mr. Scott: Assuming that the pensioner is not responsible for a child or young person and has no eligible housing costs, the information is as follows:

Premium Entitlement	(a) Single £	(b) Couple £
Pensioner premium	44·05	67·70
Higher Pensioner Premium	46·45	70·05
Higher Pensioner Premium and severe disability premium	71·70	[1]94·80 [2]119.55

[1] One qualifies.
[2] Both qualify.

The criteria for entitlement to the premiums are set out in schedule 2 to the Income support (General) Regulations 1987, (SI 1987 No. 1967).

The personal allowances take account of the average additional expenditure arising from the claimant's responsibility, from April, for 20 per cent. of his general rates, and water rates.

In setting the rates for personal allowances and premiums, the available resources were directed at those groups most in need, including pensioners. This more effective targetting is a central objective of the social security reforms.

Community Care Grants

Ms. Mowlam: To ask the Secretary of State for Social Security on what assumption the social fund community care grants budget for 1989-90 will be set.

Mr. Scott: I refer the hon. Member to the reply given to the hon. Member for Monklands, West (Mr. Clarke) on 8 July at column *787*.

Supplementary Benefit

Ms. Mowlam: To ask the Secretary of State for Social Security (1) how many people were *(a)* in receipt of supplementary benefit on 1 April, and *(b)* in receipt of income support on 1 May for each of his Department's local offices of Redcar, Middlesbrough, Eston, Hartlepool and Stockton;

(2) if he will give the number of, or estimates of, people who were, in November 1987 *(a)* in receipt of supplementary benefit and *(b)* dependent upon supplementary benefit, in respect of his Department's offices of Redcar, Middlesbrough, Eston, Hartlepool and Stockton.

Mr. Scott: The numbers of people in receipt of supplementary benefit and income support in November 1987 and May 1988, the closest dates available, are as follows:

	Redcar	Middlesbrough	Local Offices Eston	Hartlepool	Stockton
Number of people in receipt of supplementary benefit at 17 November 1987	9,492	23,141	8,445	12,365	20,321
Number of people in receipt of income support at 31 May 1988	8,528	20,714	7,572	11,083	17,597

Source: 100 per cent. of cases in action which includes a small number of cases not actually in receipt of benefit. These figures may, however, overstate the number of people receiving supplementary benefit. The footnote to the reply given to my hon. Friend the Member for Hyndburn (Mr. Hargreaves) on 31 March 1988, at columns *660-61*, refers.

Note: This information is provisional and subject to amendment.

I regret that information on the number of people dependent upon supplementary benefit is not available at local level.

Form AG1

Mr. Corbyn: To ask the Secretary of State for Social Security what actions have been taken by his Department in respect of incomplete or false declarations on form AG1; and if he will make a statement.

Mr. Scott: Generally, incomplete claim forms AG1 are returned to the claimant drawing attention to the omissions. Such claims are given priority when they are resubmitted. If a deliberately false declaration were to be detected or suspected further investigation would be carried out and appropriate action taken.

National Insurance Retirement Pension

Mr. Simon Hughes: To ask the Secretary of State for Social Security what is his estimate of how many people over pensionable age are receiving national insurance retirement pension, either basic, additional or graduated, of less than £1 per week.

Mr. Scott: The information is not available in the exact form requested. However, at 28 June 1988, a total of 143,642 pensioners had entitlement to small amounts of additional pension or graduated retirement benefit of £2 a week or less.

Benefit Claimants

Mr. Wray: To ask the Secretary of State for Social Security what is his latest information regarding the number of claimants who as a result of delays in the processing of *(a)* the new family credit benefits and *(b)* the reimbursement of housing benefit losses resulting from the changes in April have incurred debt.

Mr. Scott: I shall write to the hon. Member.

Mr. David Howell: To ask the Secretary of State for Social Security what it the total aggregated sum of unclaimed social security benefits; whether he will make arrangements for such sums to be held and accounted separately; and whether he will now make plans to distribute these sums in the form of capital sums to appropriate recipients.

Mr. Lester: To ask the Secretary of State for Social Security if he will publish a table showing the number of people claiming *(a)* supplementary benefit-income support, *(b)* rent rebates-allowances, *(c)* rate rebates and *(d)* family income supplement-family credit, in each year since 1975, including estimates for 1988, distinguishing between pensioners and those of working age and between certificated and standard housing benefit.

Mr. Scott: I shall write to my hon. Friends.

Transitional Protection Unit, Glasgow

Mr. Robin Cook: To ask the Secretary of State for Social Security how many staff are employed by the transitional protection unit at Glasgow; and what is the estimated annual pay bill.

Mr. Scott: On 28 July, there were 505 staff in post in the transitional payments unit. This number will reduce quickly as applications are assessed and payments are made. The manpower cost is estimated as follows:

	£000
1988-89	3,000
1989-90	1,500
1990-91	900
1991-92	600

Norcross Office, Blackpool

Sir John Farr: To ask the Secretary of State for Social Security (1) what is the average waiting time before a matter referred to his Department's office at Norcross, Blackpool, is cleared up;

(2) what is the policy of his Department's office at Norcross, Blackpool, on acknowledging correspondence from the general public; and how long on average that takes.

Mr. Scott: I shall write to my hon. Friend.

Disabled Pensioners (RPI Error)

Mrs. Gillian Shephard: To ask the Secretary of State for Social Security what plans he has to pay additional compensation to severely disabled war and industrially injured pensioners who lost significantly more than £8 as a result of the error in the calculation of the retail prices index.

Mr. Scott: I explained to the House on 18 December that we would be paying additional compensation to severely disabled war and industrially injured pensioners who have lost significantly more than £8—the amount of the special payment made in February. Losses over £8 incurred by these two groups range from nothing at all to some £60 over the full two years affected by the error—April 1987 to April 1989.

We have decided to make additional special payments to everyone in these two groups whose loss exceeds £8 by £10 or more: that is, by more than about 10p a week over the full two years affected. The ranges of loss in excess of £8, the weekly benefit entitlements to which they relate and the amounts of additional payments are shown in the table. The relationship between loss and weekly benefit

entitlement is not the same for both groups; this is because war pensioners can receive several additions to benefit which were not affected by the error.

We expect to start making these additional payments in September.

£s

War pensioners (weekly entitlement)	Industrially injured pensioners (weekly entitlement)	Loss exceeds £8 by between	Amount of additional payment
Over 230	—	50-60	55
Between 190-230	Over 170	40-50	45
Between 150-190	Between 130-170	30-40	35
130-150	115-130	20-30	25
100-130	100-115	10-20	15

Community Charge Rebate Regulations

Mr. Andrew Mitchell: To ask the Secretary of State for Social Security what steps he is taking to introduce community charge rebates regulations to have effect in Scotland in 1989-90.

Mr. Scott: Before rebate regulations can be laid, the Social Security Act 1986 has to be modified to provide the necessary statutory powers. It is our intention to lay the modification regulations as soon as possible after the Local Government Finance Bill receives Royal Assent. These regulations, which will be made under section 24 of the Abolition of Domestic Rates (Etc.) Scotland Act 1987, will provide for the introduction of Housing Benefit (Community Charge Rebate) Regulations. Once the modification regulations have been made, formal consultation with the local authority associations will begin on the draft community charge rebate regulations. In the meantime, Scottish local authorities have already received a substantial part of the draft regulations and we shall be issuing a complete draft to them shortly.

Relocation

Mr. Michael Brown: To ask the Secretary of State for Social Security if, pursuant to his answer to the hon. Member for Eastbourne (Mr. Gow) of 23 June, *Official Report*, columns *723-24*, he will now make a statement on the relocation of work in his Department from London.

Mr. Scott: We have decided to go ahead with relocating some work from local offices in London broadly on the scale recommended in the report, "The Business of Service", which was published on 24 June. Consideration is still being given to the possibility of relocating some headquarters work.

Child Benefit

Mr. Gordon Brown: To ask the Secretary of State for Social Security if he will give the number of families in receipt of child benefit and the average percentage of family income for 1979 and 1988-89 derived from child benefit for the *(a)* bottom 10 per cent., *(b)* bottom 30 per cent., *(c)* bottom 50 per cent. and *(d)* top 50 per cent. of families.

Mr. Scott *[holding answer 14 July 1988]:* The information is as follows:

Percentage contribution of child benefit to the incomes of households with children below various percentiles of the whole population

	Percentile of the income distribution			
	Below 10 per cent.	*Below 30 per cent.*	*Below 50 per cent.*	*Above 50 per cent.*
1979	19	13	10	5
1985	18	14	11	4

Notes to table

1. The income measure used is the same in all respects as that used in "Households Below Average Income: A Statistical Analysis, 1981-85" and is before housing costs.
2. The percentile points in the table are for the whole population, but the analysis is for households with children only. A corresponding analysis demonstrating the percentage contribution of child benefit to the incomes of all individuals below the percentile points shown can be found in HBA1, table G on page 24 of the tables.

Mr. Austin Mitchell: To ask the Secretary of State for Social Security whether he will publish in the *Official Report* a table showing the latest estimated distribution of children qualifying for child benefit by parental status and by range of parental income.

Mr. Scott *[holding answer 27 July 1988]:* Information about the incomes of families receiving child benefit is not routinely collected. The following estimates of the distribution of children by gross parental income in 1988-89 are therefore made on the basis of sample survey data which are subject to normal sampling and response variation. "Parental status" has been interpreted to mean economic status.

Number of children by gross family income

Thousands

Band of gross family income	Parental (economic) status			
	Full-time work[1]	*Unemployed*[2]	*Other*[3]	*Total*
Under £5,000	30	210	540	780
£5–10,000	1,600	870	880	3,350
£10–15,000	3,140	—[4]	60	3,210
£15–20,000	2,250	—[4]	—[4]	2,280
£20–25,000	1,140	—[4]	—[4]	1,150
£25,000–50,000	1,170	—[4]	—[4]	1,180
Above £50,000	180	—[4]	—[4]	180
	9,510	1,100	1,501	12,120

Notes:

(1) With the additions noted below, this answer is provided on the same basis as set out in my reply of 7 June to my hon. Friend the Member for Pembroke (Mr. Bennett) at columns *371-72*.

(2) Economic status categories are based on the FES:

[1] Full-time work: either head or spouse in full-time work (over 24 hours per week).

[2] Unemployed: either head or spouse unemployed and neither in full-time work. The definition of unemployment is self-reported in the FES and does not correspond to receipt of an unemployment related benefit.

[3] Other: includes part-time workers, economically inactive/one-parents, sick and disabled and early retired.

[4] sample numbers are too small to provide a detailed breakdown.

Resettlement Units

Mr. Win Griffiths: To ask the Secretary of State for Social Security which schemes of alternative provision for his Department's resettlement units have been approved; how much in each case has been provided for capital and revenue spending; and how much per head on capital and revenue this is for each scheme.

Mr. Scott *[holding answer 19 July 1988]:* Schemes for alternative provision for resettlement units approved to date, and the sums to be provided by the Department, are as follows:

Scheme	*Approved capital cost* £ million	*Average capital cost per bedspace* £	*Approved revenue cost (PA)* £	*Average revenue cost per bedspace* £
Camberwell	4·46	20,400	1,420,000	1,500
Brighton	1·130	15,300	143,000	1,900
South West	1·5	10,500	223,000	1,600
Liverpool	0·76	21,500	224,000	6,200
York	—	—	81,000	4,500
Southampton	2·436	14,100	313,000	1,800
Derby	2·0	17,500	356,000	3,100
Humberside	0·43	13,900	194,000	6,300
North Staffordshire	0·42	14,000	130,000	4,300
Manchester	1·88	12,000	463,000	3,000

Notes:

All figures are at 1987-88 prices.

Each approved scheme includes a number of separate projects of different sizes and catering for a variety of needs. Accordingly the planned cost of individual projects varies. In addition, some projects will be eligible for Hostel Deficit grant from DOE; funds from other sources eg local authorities and voluntary organisations may also be available.

For these reasons it is not possible to make direct comparisons between the relative costs of schemes as shown in the table.

Spending Power

Mr. Cousins: To ask the Secretary of State for Social Security if he will publish tables using the data and assumptions in his answer to the hon. Member for Bradford, West (Mr. Madden) on 22 June, *Official Report*, columns 575-80, but using expenditure and benefit figures appropriate for similar families in Newcastle upon Tyne together with a column showing the extent of the differences that would have resulted from the April benefit changes.

Mr. Nicholas Scott *[holding answer 11 July 1988]:* I have today placed the appropriate tables in the Library.

Ms. Armstrong: To ask the Secretary of State for Social Security if he will publish tables using the data and assumptions in his answer to the hon. Member for Bradford, West (Mr. Madden) on 22 June, *Official Report*, columns *575-80*, but using expenditure and benefit figures appropriate for similar families in *(a)* Wear Valley district council, *(b)* Derwentside district council and *(c)* Durham county together with a column showing the extent of the differences that would have resulted from the April benefit changes.

Mr. Scott *[holding answer 25 July 1988]:* The information requested for Wear Valley district council and Derwentside district council has been placed in the Library. I regret that similar tables cannot however, be prepared for Durham county.

Transitional Payments

Mr. McKelvey: To ask the Secretary of State for Social Security how many claimants have applied for transitional payment benefit in *(a)* Kilmarnock; *(b)* Ayrshire and *(c)* Scotland as a whole; how many in these classifications have had their benefit calculated; and how many are in receipt of the benefit.

Mr. Galbraith: To ask the Secretary of State for Social Security how many people in the constituency of Strathkelvin and Bearsden have applied for housing benefit transitional payments; and what is his estimate of the number who will qualify and when he expects them to be paid.

Mr. McAllion: To ask the Secretary of State for Social Security (1) what is the average waiting time for claimants receiving transitional payments in his Department's Dundee, East and Dundee, West offices;

(2) how many applications for transitional payments have been made at his Department's Dundee, East and Dundee, West offices; how many of these have been processed; and how many payments have been paid.

Dr. Godman: To ask the Secretary of State for Social Security how many people have applied for transitional payment benefit in *(a)* Greenock and Port Glasgow, *(b)* the Strathclyde region and *(c)* Scotland as a whole; how many in these have had their benefit assessed; and how many are now in receipt of such benefit.

Mr. Scott *[holding answers 14 July, 18 July and 20 July 1988]:* Information in the form requested is not available. In due course, statistics will be collected within the transitional payments unit to determine the number of applications received, the number of payments made and the time taken to process applications on a national basis, but they are unlikely to be available on either a constituency or district basis. It is not possible to estimate in advance the number of cases in which payments will be made as applications are still being received. Except for urgent cases, they are being processed in the order in which they were received and the date of payment will therefore depend upon the date of receipt at the transitional payments unit.

Mr. Winnick: To ask the Secretary of State for Social Security how many applications have now been received by his Department's unit in Glasgow regarding transitional payments; how many have been duly processed and payments made; and when he expects the remainder of the applications to be processed and payment made.

Mr. Scott *[holding answer 22 July 1988]:* As planned, the transitional payments unit became fully operational

this month, making the first housing benefit transitional payments on Thursday 14 July. Up to 25 July, the unit had received 41,024 written inquiries, 20,951 telephone inquiries and 119,143 applications for transitional payments. Already, 47,580 inquiry forms, to obtain the information necessary to assess eligibility for payment, have been sent out to local authorities. In the 7,839 cases where they have been returned, 3,296 assessments have been made. 1,624 applicants were found to be ineligible for payment and in the other 1,604 cases, applicants have been notified of their award and 68 payments have been made. In addition, regular payments are being made in respect of income support transitional payments. Depending upon the rate and volume of applications received we expect all applications to be processed by October.

EMPLOYMENT

Training and Work Experience

Mr. Chris Smith: To ask the Secretary of State for Employment how many voluntary or charitable organisations operate training and work experience programmes for the single homeless and unemployed persons; and if he would provide an estimate of the Government funds provided to each.

Mr. Nicholls: The information required is not available.

Consultants

Mr. Mullin: To ask the Secretary of State for Employment if he will give the cost to the Manpower Services Commission of employing management or computer consultants for each year from 1983 to 1987.

Mr. Nicholls: The Manpower Services Commission, now the Training Commission, spent the following amounts on management and computer consultancy in the financial years 1984-85, 1985-86, 1986-87 and 1987-88.

Year	*£ thousands*
1984-85	847
1985-86	994
1986-87	1,422
1987-88 MSC	1,279
ES	[1]373

[1] It should be noted that the figures provided relate to the organisation of the MSC prior to reorganisation on 26 October 1987 and therefore include spend appropriate to the employment service. The 1987-88 figures have been split to show the amounts appropriate to MSC and ES.

Mr. Mullin: To ask the Secretary of State for Employment if he will give the cost to his Department of employing management or computer consultants for each year from 1983 to 1987.

Mr. Nicholls: Expenditure in the Department of Employment Group, excluding the Training Commission and employment service in each year from 1983 to 1987 on management and computer consultancy was as follows:

	£ thousands
1983	307
1984	346
1985	407
1986	670
1987	1,007

Mr. Mullin: To ask the Secretary of State for Employment if he will list each management or computer consultancy contract extant in his Department as at 1 January 1987, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Nicholls: The following firms had consultancy contracts extant in the Department of Employment group, excluding the Manpower Services Commission, at 1 January 1987:

Firm	*Subject of Assignment*
CMG Ltd.	Study into Electronic Mail
EDP Ltd.	Support for financial payments systems
Logica	Support for personnel records system
PA Consultants	Advice on Office Automation systems appraisal
Portfolio Systems	Support for DE Unemployment Benefit Service administrative and staff training systems development
Segal, Quince and Wicksteed	Encouraging Small Business start-up and growth
Ms. Jeanette Taylor	Human Resource Development
Mr. M. Willmer (Manchester Business School)	Enterprise—DE Contribution

Mr. Mullin: To ask the Secretary of State for Employment if he will list each management or computer consultancy contract extant in the Manpower Services Commission as at 1 January 1987, giving in each case the name of the consultancy firm and the subject of the assignment.

Mr. Nicholls: The list of management and computer consultancy contracts extant as at 1 January 1987 is as follows:

Management consultancy projects: 1 January 1987

Consultants	*Subject of assignment*
Jones, Lang, Wootton	Feasibility study on untying MSC from Property Services Agency
Central Unit of Purchasing (Her Majesty's Treasury consultant)	Provide advice about purchasing arrangements within MSC
PIEDA	To improve Local Labour Market operations in Scotland
Centre for Urban and Regional Industrial Development (University of Manchester)	Manchester Labour Market Consultancy Project

2. Computer consultancy projects

Consultants	*Subject of assignment*
1. P.E. Consulting Services	to study current and future needs of Sheltered Employment Branch
2. C. J. Makeson	a study to examine MSC's proposals for, and design of a Network Terminal Protocol
3. COMSHARE	to provide MSC Senior Management with on line access to screen based reports of corporate information
4. Central Computer and Telecommunications Agency (CCTA)	to examine the PLECTRUM computer system, evaluate errors and security procedures

Consultants	Subject of assignment
5. A. J. Aykroyd	a consultant to assist with the development of the "Master Modeller" software package
6. Coopers and Lybrand	to advise the Director of the MSC on the levels of investment the Commission should make in Information Technology
7. P. A. Computer and Telecommunications	to assist MSC in the introduction of Office Technology in Head Office
8. Arthur Young	to assist MSC in deciding whether data sharing is applicable in the MSC environment
9. P.E. Consulting Services	to produce options and recommendations for stand alone Office Technology systems
10. Hoskyns Group	to study the options for the continuing support of the TOPS and SPECTRUM systems
11. Mr. Boothroyd	to monitor the progress of the introduction of Office Technology for senior management and Special Measures Division
12. Concurrent Computer Corporation Ltd.	to test the workload capacity of the SUPERVACS system
13. Arthur Young	a consultant to provide technical support in information engineering concepts and methods
14. CCTA Consultant	a feasibility study into the expansion of the BACIE database
15. CCTA Consultant	to examine MSC's use of automated software development tools and to make recommendations for future use
16. Mr. Harrison	to produce a distance learning package for SUPERVACS operators
17. Mr. Boothroyd	to provide advice to Head of Computing on proposed Office Technology development
18. CCTA	to establish the effectiveness of control, management and working methods employed on the FMAS project
19. CCTA	to establish the user requirements, system specification and business case for Central Research Information System
20. Mr. Humphries	a consultant to provide advice about the Training Access Point project
21. ICL	a consultant to provide advice about the implementation of a free text multi user database
22. CAP Industry Ltd.	to provide quality assurance for the SUPERVACS project
23. CCTA	to provide contingency plans to support the SUPERVACS system
24. Compsoft	a consultant to provide advice about computerisation of the Staff Deployment Survey
25. South Yorkshire Micro-systems Centre	to develop a database and provide training for the RESTART project
26. Comshare	additional development work on providing information to MSC senior management
27. P. A. Consultants	a consultancy to provide a training course for the implementation of the Office Technology Systems
28. CCTA	to carry out further work on the Central Research Information System
29. CCTA Consultant	to carry out a Post Implementation Review of the 'VETO' reorganisation project
30. Xentec	to assist in the running of the SPECTRUM system
31. J. Westgate (Consultants) Ltd.	to assist with the implementation of Network Terminal Protocol
32. CAP	to look into the feasibility on implementing a Terminal Protocol on an Open Systems interconnection conforming network
33. Xentec	to assist in the maintenance of the SPECTRUM system
34. C. Makemson	to provide Quality Assurance for the various outputs from MSC's Virtual Terminal Protocol Project
35. Sherringtom Software Ltd.	to provide programmers for work on the TOPS MINIS Project
36. CCTA Consultant	to establish the requirements for the display of vacancies on ORACLE

Training Schemes

Ms. Short: To ask the Secretary of State for Employment if he will state, when potential training managers in employment training are given their review of training arrangements prior to receiving ATO status, how many of their work experience placements will be visited and assessed for their quality and health and safety arrangements by Training Commission officials; what length and type of training these Training Commission officials will have had in identifying health and safety hazards; what steps he is taking to ensure that all the work placements used by ET are properly registered with the Health and Safety Executive Factory Inspectorate; whether the Training Commission will publish ET health and safety incident statistics; and if he will make a statement.

Mr. Nicholls: The number of locations to be visited by Training Commission staff and assessed for their quality

and health and safety arrangements will be determined by the size of a training manager's employment training operation. The minimum sampling levels will be:

Number of training locations used by a Training Manager	*Minimum number of locations to be visited*
12 or less	3
13-24	4
25-50	5
51-100	8
101-150	10
151-200	12
more than 200	5 per cent. (subject to a minimum of 12)

Each sample will include a cross-section of directed training locations and practical training locations.

Every Training Commission area office will have staff who have been specially trained to help them identify the more obvious health and safety hazards and their training will be given by staff who are affiliate members of the Institute of Occupational Safety and Health and who have wide experience in dealing with health and safety issues on YTS.

In addition every Training Commission region has a part-time professional safety adviser to provide expert advice on the more complex health and safety issues.

The Training Commission will be entering into a contractual agreement with every training agent and training manager which will require written assurances that their premises and those of their subcontractors will be registered with the appropriate enforcing authority. Training managers themselves will also be expected to monitor health and safety on all of the training provision that they will be responsible for.

The Training Commission will be recording and publishing employment training accident statistics in exactly the same way as for YTS.

Ms. Short: To ask the Secretary of State for Employment if his Department's adjudication officers will be required to impose benefit penalties on ET trainees for making themselves voluntarily unemployed if *(a)* they chose to terminate their training before the end of their agreed training plan because they are dissatisfied with their training or work experience placement, *(b)* they are dismissed from their training scheme for absenteeism or lateness and *(c)* they are dismissed from their training scheme for misconduct; and if he will make a statement.

Mr. Cope: Participation in Employment Training will be voluntary and leaving the programme early for any one of the reasons mentioned will not in itself provide grounds for refusal of benefit.

Benefit Advisers

Ms. Short: To ask the Secretary of State for Employment how many claimant advisers are in post; how many interviews with claimants they have carried out in each year since 1986; what has been the outcome of those interviews; how many claimants have been referred to the Department of Health and Social Security for advice on other benefits or to adjudication officers because of doubts about their availability for work; how many have been encouraged to apply for the job start allowance; if he will give the costs of the claimant adviser service; and if he will make a statement about their current priorities.

Mr. Cope: At the end of June 1988, there were 796 claimant advisers in post; estimated costs for the 1988-89 financial year are approximately £14 million.

The number of interviews conducted and the outcome of those interviews for each financial year is shown in the table.

The priority of the claimant adviser service is to provide advice and guidance to claimants to help them move out of unemployment. In accordance with the priorities of the employment service, they concentrate their advice on those who have been unemployed for six months or more.

Claimant Adviser Performance

	November 86 March 87	*April 87 April 88*	*April 88 June 88*
Number of Interviews[1]	65,000	620,000	192,000
Referrals to DHSS[2]	7,600	63,500	16,400
Referrals to AO[3]	2,500	26,100	5,800
Outcomes			
—found work or placed in a programme	2,600	100,000	36,500
—alternative benefit	5,400	56,500	15,600
—other[4]	10,000	88,000	26,000

[1] This figure relates to the number of interviews, rather than the number of claimants interviewed, as claimants may have more than one interview.

[2] It is only possible to provide figures for the total number of referrals made to DHSS for all reasons.

[3] Figures are for total referrals to adjudication officers for all doubts arising.

[4] Figures are not available for those who have encouraged to apply for jobstart allowance.

Local Employer Networks

Mr. Anthony Coombs: To ask the Secretary of State for Employment what is the latest information on the number of local employer networks that have been established.

Mr. Cope: There are plans for 107 networks by the end of July. A further 12 networks are under negotiation. We expect that by October about 130 networks will have been established, with at least one in every local education authority area.

Part-time Workers

Mr. Tony Banks: To ask the Secretary of State for Employment whether he has any plans to seek to improve the rights of part-time workers to paid holidays and pensions.

Mr. Nicholls: No. Terms and conditions of employment are a matter for employers and employees or their representatives to determine. Pension rights are a matter for my right hon. Friend the Secretary of State for Social Security.

Mr. David Marshall: To ask the Secretary of State for Employment whether he has any plans to seek to improve the pay levels of part-time workers.

Mr. Nicholls: No. Pay is a matter for employers and employees or their representatives to determine.

Mr. Darling: To ask the Secretary of State for Employment whether he has any plans to seek to improve the protection of part-time workers against unfair dismissal.

Mr. Nicholls: No.

Training

Mr. Couchman: To ask the Secretary of State for Employment what plans he has to encourage industry to train those over 25 years of age for the jobs of the future; and if he will make a statement.

Mr. Nicholls: The falling number of young people entering the labour market means that employers will need to invest more in the training of adults to provide the skills they need to compete. My right hon. Friend the Secretary of State has taken and is planning a number of steps to support and encourage increased efforts by employers to train and retrain the adult work force, including those over 25 years old, through working life.

The £1·5 billion employment training programme will provide, from September, an opportunity for employers to equip up to 600,000 adult unemployed people a year with the skills needed to fill the job vacancies our economy is creating: 25 to 50-year-olds unemployed for two years or more enjoy a special priority under the programme.

The Training Commission is reviewing its current range of measures to support firms, especially smaller firms; investment in the training of their employees, to improve access and encourage greater responsiveness to new skill needs.

The Training Commission has joined with the National Economic Development Office in a campaign to encourage employers to upgrade training and retraining of adults in response to the prospective fall in the supply of young people. Industry training organisations are being encouraged to promote a similar response.

Employment Training Scheme

Mr. Harry Greenway: To ask the Secretary of State for Employment how many people are employed under the new employment training scheme; and if he will make a statement.

Mr. Nicholls: Employment training will be launched on 5 September 1988 and will provide around 300,000 training places when fully operational. Participants in employment training will be trainees and not employees. Excellent progress has already been made, and the Training Commission has reached agreement with prospective providers for the provision of some 270,000 of the 300,000 places needed. I am confident that contracts for the remaining 30,000 places will be agreed before 5 September.

Mr. Meacher: To ask the Secretary of State for Employment if he will publish in the *Official Report* a breakdown of *(a)* the percentage of places for which bids have been received and *(b)* the percentage of places provisionally allocated nationally for the local education authority maintained further education sector and other agencies which are directly controlled by county or metropolitan authorities under the new employment training scheme.

Mr. Nicholls: The Training Commission has received bids to provide over 700,000 training places, more than twice the 300,000 places needed for employment training. No breakdown of these bids is available.

On 12 July, the latest date for which detailed information is available, about 24 per cent. of places had been provisionally allocated to local authorities.

Mr. Nicholas Bennett: To ask the Secretary of State for Employment if he has received any representations from the Transport and General Workers Union concerning the employment training programme; and if he will make a statement.

Mr. Nicholls: My right hon. Friend the Secretary of State has had no formal representation from the Transport and General Workers Union about employment training. I am aware, however, that a compaign of opposition and protest has been organised by the union in some parts of the country in an attempt to disrupt the implementation of the programme in September. I am pleased to say that this campaign has had no effect on the process of contracting, which is now well advanced. Employment training will be launched exactly as planned on 5 September.

Job Creation

Mr. John Marshall: To ask the Secretary of State for Employment how many new jobs have been created in Great Britain since 1983; what are the comparable figures for the other member states of the European Economic Community; and if he will make a statement.

Mr. Lee: I shall write to my hon. Friend as soon as possible and place a copy of my letter in the Library.

Strikes

Mr. Andrew Mitchell: To ask the Secretary of State for Employment how many working days were lost due to strikes in *(a)* February 1979 and *(b)* February 1988; and if he will make a statement.

Mr. Lee: I will write to my hon. Friend as soon as possible and will place a copy of my letter in the Library.

Service Jobs

Mr. Ieuan Wyn Jones: To ask the Secretary of State for Employment if he will make a statement on the variations in the rate of increase of the number of jobs created in the services in the regions of the United Kingdom.

Mr. Nicholls The following table shows the net increases and the percentage increases in the number of employees in employment in service industries between March 1987 and March 1988 in each region and in the United Kingdom.

Employees in employment
Service industries[1]

	Change March 1987-March 1988 (thousands)	*Change March 1987-March 1988 (per cent.)*
South East	+183	+3·00
East Anglia	+33	+7·00
South West	+19	+2·00
West Midlands	+43	+4·00
East Midlands	+27	+3·00

	Change March 1987-March 1988 (thousands)	Change March 1987-March 1988 (per cent.)
Yorkshire and Humberside	+40	+4·00
North West	+20	+1·00
North	+20	+3·00
Wales	+11	+2·00
Scotland	+17	+1·00
Northern Ireland	+4	+1·00
United Kingdom	+418	+3·00

[1] Divisions 6 to 9 of Standard Industrial Classification 1980.

EC Job Creation

Mr. Dykes: To ask the Secretary of State for Employment when he next expects to meet his European Economic Community opposite numbers to discuss new job creation in the Community.

Mr. Cope: An informal meeting of Community Labour and Social Affairs Ministers will be held on 19-20 September. The agenda has not yet been decided, but we will be continuing our efforts to ensure that market-led employment growth is a Community priority and that the Community takes full advantage of the potential of the single market.

Labour Statistics

Mr. Frank Field: To ask the Secretary of State for Employment whether he will consider the publication of a quarterly figure of unemployment based on the quarterly supplements to the labour force survey.

Mr. Lee: The quarterly results are (because of the small sample on which they are based) insufficiently reliable for it to be appropriate to publish actual quarterly estimates of unemployment. They can, however, support valid quarterly indications of the trend in such variables.

Officials are considering the quality of the quarterly data and of trend indicators which might be derived from them. Decisions about publication will be taken when that consideration has been completed.

Single Market

Mr. Wigley: To ask the Secretary of State for Employment what research is being undertaken by his Department into the employment implications of the completion of the European Community internal market in 1992 for the regions of the United Kingdom.

Mr. Cope: I refer the hon. Member to my reply to the hon. Member for Meirionnydd Nant Conwy (Dr. Thomas) on 5 July 1988, at columns 188-89.

Recruitment and Promotion Policy

Ms. Richardson: To ask the Secretary of State for Employment what measures he has implemented to ensure that recruitment and promotion policy in his Department does not directly or indirectly discriminate against applicants who were mature students or women returning to work following a career-break due to child care.

Mr. Nicholls: Recruitment to and promotion within my Department is conducted within the general guidance applying across the Civil Service. As an equal opportunities employer, the Department of Employment recruits and promotes staff solely on merit and implements policies that do not disadvantage any group. I am satisfied that no additional measures are needed to safeguard the position of mature students or women returning to work after a career break.

Training Programme (Disabled People)

Mr. Hannam: To ask the Secretary of State for Employment if he has made a decision on the Training Commission's proposal for continuous part-time participation for disabled and other groups of people in the new training programme.

Mr. Nicholls: My right hon. Friend the Secretary of State has decided that part-time training opportunities will be available for people whose disabilities or domestic responsibilities restrict their ability to train full-time.

Dock Labour Scheme

Mr. Woodcock: To ask the Secretary of State for Employment if he will estimate the financial effect on British industry of retention of the registered dock labour scheme after 1992.

Mr. Nicholls: No.

Manchester Ship Canal (Dock Labour Scheme)

Mr. Woodcock: To ask the Secretary of State for Employment if he will estimate the continuing extra cost of retention of the registered dock labour scheme on users of the Manchester ship canal.

Mr. Nicholls: I have not made any estimate of the costs of using this canal. It would not be possible to make any such meaningful assessment.

Community Programme

Mr. Meacher: To ask the Secretary of State for Employment how many bids under the new employment training scheme have been accepted from existing community programme projects run by APEX; and what proportion this represents of bids received from APEX community programme schemes.

Mr. Nicholls: Detailed information about bids for employment training places is not available centrally. APEX currently has some 1,348 filled places on the community programme and it and some other organisations with whom it plans to associate in the new programme have been offered some 4,300 employment training places.

Unfair Dismissal

Mrs. Mahon: To ask the Secretary of State for Employment what proportion of the work force have statutory protection against unfair dismissal.

Mr. Nicholls: Data from the spring 1986 labour force survey indicate that in March 1986 approximately 70 per cent. of the work force were covered by the unfair dismissal provisions of the Employment Protection (Consolidation) Act 1978.

Manpower Services Commission

Mr. Corbyn: To ask the Secretary of State for Employment if he will state the number of Manpower Services Commission staff employed for each year since 1978 and their total cost to public funds.

Mr. Nicholls The information requested is as follows:

Number of Manpower Services Commission staff		*Total cost of Manpower Services Commission staff to public funds (£000s)*	
At:			
1 April 1978	25,332	1978-79	209,996
1 April 1979	26,289	1979-80	246,238
1 April 1980	25,868	1980-81	300,269
1 April 1981	24,225	1981-82	316,192
1 April 1982	24,250	1982-83	329,629
1 April 1983	22,687	1983-84	333,666
1 April 1984	21,929	1984-85	331,311
1 April 1985	20,803	1985-86	363,491
1 April 1986	21,075	1986-87	412,808
1 April 1987	23,953	1987-88	348,700
1 April 1988	12,520·5	1988-89	237,532

Notes:
(1). The 1988-89 figures is an estimate.
(2). On the passage of the Employment Act 1988 the Manpower Services Commission was renamed the Training Commission.

Mr. McLeish: To ask the Secretary of State for Employment if he will give the estimated expenditure of the Manpower Services Commission and his Department in Scotland in each of the years 1988-89, 1989-90 and 1990-91.

Mr. Nicholls: The estimated expenditure of the Training Commission (formerly the Manpower Services Commission) in Scotland in 1988-89 is £210,082,000. Estimates of expenditure for the years 1989-90 and 1990-91 will only be made when the Supply Estimates for these years are prepared.

No estimate is made of the territorial distribution of expenditure in the rest of the Department of Employment group.

Mr. McLeish: To ask the Secretary of State for Employment if he will give the total expenditure of the Manpower Services Commission and his Department in Scotland in each of the years 1979 to 1987, inclusive.

Mr. Nicholls: The Manpower Services Commission (named the Training Commission from May 1988) keeps records on the basis of the standard financial year for accounting for Government expenditure. The year runs from 1 April to 31 March.

The proportion of the commission's costs that can be specifically indentified with services in Scotland is financed by a contribution to the commission's grant-in-aid from the Industry Department for Scotland.

The figures for this contribution are published in the annual Appropriation Accounts and are as follows:

	£
1979-80	53,244
1980-81	73,552
1981-82	92,211
1982-83	107,414
1983-84	118,541
1984-85	127,400
1985-86	133,896
1986-87	162,077

Mr. McLeish: To ask the Secretary of State for Employment if he will give the total expenditure on the Manpower Services Commission's programme for the unemployed in each of the years 1979 to 1987, inclusive.

Mr. Nicholls: All Training Commission (formerly Manpower Services Commission) programmes are concerned to some extent with the problems of unemployment, and expenditure on those specifically for the unemployed is not identified separately. Figures for the commission's total programme expenditure, and expenditure on programmes which it manages on behalf of the Department of Employment are shown by financial year in the table.

£000s

	Training Commission	*Community Programme*	*Community Industry*	*Sheltered Employment*	*Total*
1979-80	394,395	50,966	16,952	41,954	504,267
1980-81	479,177	45,736	18,994	54,940	598,847
1981-82	646,527	92,741	23,376	58,888	821,532
1982-83	783,697	154,796	23,601	66,772	1,028,866
1983-84	970,378	401,542	23,637	72,691	1,468,248
1984-85	1,087,049	532,702	24,125	63,783	1,707,659
1985-86	1,210,916	683,224	24,447	67,185	1,985,772
1986-87	1,444,492	1,007,031	25,309	56,801	2,533,633

Training (Expenditure)

Mr. McLeish: To ask the Secretary of State for Employment if he will give an estimate of the percentage of gross domestic product spent on training in each of the years 1979 to 1987, inclusive; and if he will provide such comparative statistics as are available to him for each of the Organisation for Economic Co-operation and Development countries over the same period.

Mr. Nicholls: The information requested is not available.

European Social Fund (Women's Training Places)

Mr. Corbyn: To ask the Secretary of State for Employment how many women's training places have been approved by his Department under the European social fund for each year since 1983.

Mr. Cope: My Department does not approve training places for projects supported by the European social fund; this is a matter solely for the European Commission to decide.

For each of the years since 1983 the European Commission approved the following number of training places in the United Kingdom under the European social

fund guideline strictly reserved for women returning to the labour market for occupations in which they are under-represented.

Training places approved by European Commission under European social fund guideline for women

Year	Number
1983	1,466
1984	3,377
1985	6,206
1986	8,200
[1]1987	16,007
[1]1988	20,435

[1] Provisional.

In addition, 955,729 United Kingdom training places for women were approved by the European Commission under other social fund guidelines for the period 1984 to 1986. Figures prior to 1984 were not divided by gender and those for 1987 and 1988 are not yet available.

Youth Unemployment

Mr. Sheerman: To ask the Secretary of State for Employment what have been the levels of youth unemployment in percentage terms for *(a)* 16 to 18-year-olds and *(b)* 18 to 25-year-olds in each of the last 10 years.

Mr. Nicholls: The available information is published in table 2.15 of the *Employment Gazette*. Summarised are the figures for April of each year from 1980 to 1988, taken from this publication. Direct comparisons of unemployment by age since 1980 are not possible because of changes in the coverage of the count.

Table A. Rates by age. Unemployed registrants

April	Under 18 Per cent.	18-19 Per cent.	20-24 Per cent.
1980	13·3	11·0	9·3
1981	17·8	18·7	15·6
1982	22·4	22·8	17·9

Table B. Rates by age. Unemployed claimants

April	Under 18 Per cent.	18-19 Per cent.	20-24 Per cent.
1983	24·0	23·6	17·1
1984	18·9	24·6	17·1
1985	18·8	23·3	17·5
[1]1986	21·5	21·8	17·2
1987	13·8	20·6	15·7
1988	11·5	15·4	12·4

[1]Because of a change in the compilation of the unemployment statistics, unadjusted figures from April 1986 are not directly comparable with earlier figures.

YTS

Mr. Sheerman: To ask the Secretary of State for Employment (1) what has been the average cost of the YTS per entrant, in each of the years since the scheme's inception;

(2) how many young people, having completed YTS, go into *(a)* further or higher education, *(b)* jobs, *(c)* unemployment and *(d)* other destinations, in percentage terms, in each of the years since the scheme's inception;

(3) how many places have been available on the YTS in each year since its inception; and how many in each year have been taken up;

(4) what has been the annual cost of the YTS since its inception to the most recent date available at constant prices.

Mr. Cope: I will write to the hon. Member as soon as possible and will place a copy of my letter in the Library.

Coal Industry (Accidents)

Mr. Illsley: To ask the Secretary of State for Employment if he will list the accident rate and the percentage change in fatal and major injury accidents in *(a)* private licensed mines and *(b)* British Coal operated mines between the period 1985-86 and 1986-87; and what is the latest trend in these figures.

Mr. Nicholls: The table gives the available information for the years 1985-86 and 1986-87, based on a rate per 1,000 employed. It is not possible to indicate any trend as licensed mines employment figures are not available for 1987-88.

Year	Fatal rate	Percentage change	Major injury rate	Percentage change
Licensed mines				
1985-86	0·75	+214	12·82	+76
[1]1986-87	2·26		22·6	
British Coal mines				
1985-86	0·18	−33	4·62	+64
[1]1986-87	0·12		7·59	

Figures for licensed mines are based on workforce figures supplied by British Coal.

[1] The introduction of RIDDOR Regulations on 1 April 1986 widened the coverage of serious accident categories. The figures for 1986-87 are not directly comparable with earlier years.

Mr. Illsley: To ask the Secretary of State for Employment if, in the light of the increase in the rate of fatal and major injury accidents in private licensed mines, he will make it his policy not to lift the safety restrictions on small private mines.

Mr. Nicholls: The Mines and Quarries Act 1954 and associated legislation is currently being reviewed and the provisions relating to licensed mines will be included in the exercise. The review is subject to full consultation with both sides of the industry.

Mr. Illsley: To ask the Secretary of State for Employment if he will list the number of fatal accidents in private licensed mines since April 1988, giving a comparable rate of fatalities per 1,000 people employed for *(a)* such mines and *(b)* mines operated by British Coal.

Mr. Nicholls: Since April 1988, there have been two fatalities at licensed coal mines and six fatalities at British Coal mines. It is not possible to give a comparable rate as the current figures for people employed at licensed mines is not available.

Channel Tunnel (Registered Docks)

Mr. Woodcock: To ask the Secretary of State for Employment what steps will be taken to ensure registered docks will be in a position to compete fairly with the Channel tunnel; and if he will make a statement.

Mr. Portillo: I have been asked to reply.

The tunnel does not enjoy favoured treatment over ports. There is no public funding or guarantee, and the Government are committed to even-handedness, for example, of infrastructure and frontier control measures. As regards ports in the dock labour scheme, we have no present plans to change their position.

NATIONAL FINANCE

Mortgage Interest Relief

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer (1) whether he will publish in the *Official Report* a table showing for those with and those without investment income in 1986-87 the numbers in each income band up to a lower limit of £100,000 benefiting from mortgage interest relief divided as between single persons and one and two-earner married couples; and if he will provide an estimate for 1987-88;

(2) whether he will publish in the *Official Report* tables showing the estimated number of tax units under age 65 years in each income band up to a lower limit of £100,000 in receipt of mortgage interest relief in the current financial year and the percentage with investment income; and if he will also distinguish between single persons, one-earner and two-earner married couples.

Mr. Norman Lamont *[holding answer 27 July 1988]:* The available information is in the tables. Following the introduction of MIRAS in April 1983, it is no longer possible to estimate the distribution of mortgage interest relief from Inland Revenue records. The estimates in the table are based on projections of data from the family expenditure survey but, as the sample size for the FES is relatively small, it is not possible to provide reliable estimates in all the detail requested nor to provide separate figures for non-aged tax units. Estimates are subject to revision.

Tax units[1] receiving mortgage interest relief by range of total income 1986-87

Written Answers to Questions

Wednesday 19 October 1988

WALES

Temporary Traffic Lights

Dr. Marek: To ask the Secretary of State for Wales how many temporary road traffic lights there are on trunk roads in Wales at present; and what are the two longest times of operation and their locations.

Mr. Wyn Roberts: There are 25 temporary road traffic lights associated with roadworks on trunk roads in Wales at present. The two longest times of operation and their locations are:

(a) A494 Drws-y-Nant, Gwynedd, in operation from January 1979 and expected to remain until June 1991, and,

(b) Aberaeron-Aberarth, Dyfed, in operation from January 1984 and expected to remain until September 1989.

Information regarding temporary traffic lights for statutory undertakers' works is not held centrally.

Curriculum Council

Mr. Nicholas Bennett: To ask the Secretary of State for Wales if he will make a statement about the establishment of the Curriculum Council for Wales.

Mr. Peter Walker: The Curriculum Council for Wales, which I appointed in shadow form in May 1988, was formally established on 16 August 1988. Its chairman is Mr. Hywel Evans OBE, JP, headteacher of Aberconwy school, Gwynedd. The other 13 members are:—

Mr. Richard Daugherty—Senior Lecturer, Department of Education, University College Swansea, West Glamorgan

Mr. Alwyn Evans—Chief Adviser, Gwynedd LEA

Mrs. Margaret Hemmings—Headteacher, Lewis Girls School, Mid Glamorgan

Mr. Michael Jones—Solicitor, Cardiff, South Glamorgan

Mr. Wynne Lewis—Head of Science Department, St. Cyres School, Penarth, South Glamorgan

Mr. John Love—Headteacher, Dyffryn Comprehensive School, Newport, Gwent

Miss Anne Powell—Headteacher, Birchgrove Infants School, Swansea, West Glamorgan

Mr. Eddie Roberts—Director of Education, Mid Glamorgan

Mr. Ieuan Roberts—Headteacher, Ysgol Croesatti, Flint, Clwyd

Mrs. Olwen Chapman—Headteacher, Llanefyl Church in Wales School, Powys

Mr. Ieuan Price—Principal, Carmarthen College of Technology and Art, Dyfed

Mr. Peter Winterburn—Lecturer in Biology, University of Wales College of Cardiff, South Glamorgan

Mrs. Beryl Brewer—Personnel Manager, Marks and Spencers, Cardiff, South Glamorgan.

The council was given its formal remit on 12 October and a copy of the remit has been placed in the Library of the House.

ATTORNEY-GENERAL

Legal Profession

Mr. Greg Knight: To ask the Attorney-General what representations he has received recently on the reform of the legal profession; and if he will make a statement.

The Solicitor-General: I have received three representations since 1 April 1988 and my noble and learned friend the Lord Chancellor has received 28 representations, from the same date, on such matters as rights of audience, fusion, legal education and training and entry to the profession.

Immigration Appeals

Mr. David Young: To ask the Attorney-General how many refusals of visitor visas have gone to immigration appeals; what were the outcomes of such appeals; and what is the total cost of such proceedings.

The Solicitor-General: Appeals against refusal of applications for visitor visas are not recorded separately, but are recorded together with appeals against refusal of applications by foreign students for temporary entrance clearance. In the period 1 January to 31 August 1988 a total of 3,277 separate appeals in this category were received by the adjudicators and 28 by the immigration appeal tribunal. Because of the way in which statistics are recorded by the appellate authorities, it is not possible to show the outcome of appeals received within any particular period. However, between 1 January and 31 August 1988, a total of 1,226 appeals against refusal of applications for visitors' visas and from foreign students were disposed of by the adjudicators of which 302 were allowed, 656 dismissed and 268 withdrawn; and 65 appeals were disposed of by the appeal tribunal of which 19 were allowed, 25 dismissed and 21 were considered to be outside the tribunal's jurisdiction.

It is not possible to distinguish accurately the total cost of dealing with particular categories of appeal. This information could be obtained only at disproportionate cost.

Mr. David Young: To ask the Attorney-General what is the average cost of holding an immigration appeal hearing.

The Solicitor-General: The Lord Chancellor is responsible for the administration of the immigration appellate authorities. It is not possible from current records to give a precise average cost for an immigration appeal hearing. However, in the calendar year 1987, a total of 9,943 appeals were dealt with by the immigration appellate authorities. The total cost of the appellate authorities in the financial year 1987-88 (the first full financial year in which the Lord Chancellor had responsibility for the IAAs' administration) was £2,411,088. From this information it would be possible to state as an informed, but not precise, estimate that the average cost of dealing with an appeal was of the order of £240.

It is estimated that in the same period hearings outnumbered appeals by approximately 20 per cent.

"Spycatcher"

Mr. Tony Banks: To ask the Attorney-General what has been the total cost to public funds from all efforts made by Her Majesty's Government to prevent the publication and reporting of the book, "Spycatcher".

The Solicitor-General: The total amount expended to date on legal costs both here and abroad in respect of litigation and advice, and on travelling and subsistence, is about £1,019,000.

PRIME MINISTER

European Parliament

Mr. Spearing: To ask the Prime Minister what steps have been taken or are planned by any institution of the European Economic Communities to implement the opinion of the European Council meeting at Hanover, that there was a need to associate the European Parliament more closely with its decisions; and for what reason she concurred with that opinion.

The Prime Minister: The conclusions of the Hanover European Council reflect our wish to encourage the continued constructive involvement of all the institutions, including the European Parliament, in the business of the Community. The co-operation procedure laid down in the Single European Act provides a further way of associating the European Parliament more closely in the decisions of the Council.

Social Services

Mr. Rathbone: To ask the Prime Minister whether responsibility for social services will rest with the Health Department and under the ministerial responsibility of the Secretary of State for Health.

The Prime Minister: Yes. Responsibility for personal social services is a matter for my right hon. and learned Friend the Secretary of State for Health.

Parliament Square (Access)

Mr. Bowen Wells: To ask the Prime Minister what central Government funds have been spent on proposals for improvements for Parliament square and the environs of the Palace of Westminster which benefit the public and make access easier for hon. Members; and when such proposals will be implemented.

The Prime Minister: The Government have committed some £186,000 to studies commissioned by Westminster city council into ways of improving the environment and traffic conditions in Parliament square. Westminster's consultants have recently reviewed options for long-term improvements. The Government will be considering the way forward with Westminster, the House authorities and other interested parties. The implementation date for improvements will depend on which scheme is selected.

European Union

Mr. Spearing: To ask the Prime Minister if any definition has been proposed by Her Majesty's Government of the phrase "European union", as contained in the preamble to the Single European Act; and if she will provide any appropriate references or text.

The Prime Minister: I refer the hon. Gentleman to the speech of my right hon. and learned Friend the Foreign Secretary on 23 April 1986, at column 325.

Separation of Powers

Mr. Allen: To ask the Prime Minister if she will bring forward legislation to ensure a constitutional separation of powers in order to enhance the powers of the elected representatives vis-a-vis those of Government.

The Prime Minister: No.

"Spycatcher"

Mr. Allen: To ask the Prime Minister what further representations she has received calling for an inquiry into allegations of illegality and domestic subversion made against the British secret services in the book "Spycatcher"; and if she will make a statement.

The Prime Minister: I have received no such representations and I have nothing to add to the statement issued by my right hon. Friend the Secretary for the Home Department on 13 October, immediately after the publication of the House of Lords judgement on the book "Spycatcher". A copy of this statement has been placed in the Library.

Interviews

Mr. Tony Banks: To ask the Prime Minister how many requests for British media interviews have been received by her during the past 12 months; and how many were granted.

The Prime Minister: I receive a considerable number of requests every year, but I am only able to accept a few owing to my many other commitments.

Ministerial Visits

Mr. Tony Banks: To ask the Prime Minister which towns in the United Kingdom she has visited during the past 12 months, showing if she had any discussions with elected civil leaders in each of the towns listed.

The Prime Minister: During the past 12 months I have visited numerous towns in the course of my official duties. They include:

Aberdeen	Greenock
Ashford	Halifax
Belfast	Inverness
Bilborough	Lisburn
Cambridge	Mablethorpe
Coleraine	Newhaven
Daventry	Nottingham
Drumahoe	Perth
Dundee	Plymouth
Edinburgh	Redditch
Enniskillen	Salford
Folkestone	Scunthorpe
Glasgow	Wellesbourne

With regard to discussions with civil leaders, I refer the hon. Gentleman to the reply I gave to the hon. Member for Midlothian (Mr. Eadie) on 8 February 1988 at column *46*.

Mr. Tony Banks: To ask the Prime Minister if she will list the countries she has visited, together with dates, during 1988 to date.

The Prime Minister: The information is as follows:

Date	Country visited
4-8 January	Kenya, Nigeria
12-13 February	Belgium (EC)
17 February	Belgium (NATO)
2-3 March	Belgium (NATO)
6-8 April	Turkey
10 June	France
18-22 June	Canada
27-28 June	Germany
29 July-9 August	Bahrain, Oman, Singapore, Australia, Malaysia, Thailand, United Arab Emirates
20-23 September	Belgium, Luxembourg, Spain

Mr. Tony Banks: To ask the Prime Minister how many *(a)* Department of Health and Social Services offices and *(b)* jobcentres she has visited in the past 12 months.

The Prime Minister: I refer the hon. Gentleman to the reply I gave him on 15 April 1988 at column *245*.

Official Meetings

Mr. Tony Banks: To ask the Prime Minister (1) which trades union leaders she has met officially for discussions during the past 12 months;

(2) which local authority leaders she has met officially for discussions during the past 12 months.

The Prime Minister: I refer the hon. Gentleman to the reply I gave to the hon. Member for Midlothian (Mr. Eadie) on 8 February 1988 at column *46*.

Mr. Tony Banks: To ask the Prime Minister how many requests for official meetings have been received by her during the past 12 months; and how many were granted.

The Prime Minister: I receive a considerable number of requests for official meetings each year, and agree to a substantial number of these.

Australia (Visit)

Mr. Tony Banks: To ask the Prime Minister what was the purpose of her visit to Australia in 1988.

The Prime Minister: I visited Australia at the invitation of the Australian Prime Minister, Mr. Hawke, to mark Australia's bicentenary, to open British day of Expo 88 and to hold discussions with members of the federal and state governments.

Mr. Tony Banks: To ask the Prime Minister (1) what was the total cost for maintaining contact with the United Kingdom when she was visiting Australia and other countries in August 1988; and how many officials were involved at *(a)* home and *(b)* abroad;

(2) what was the total cost to public funds of her visit to Australia and other countries in August 1988; how many officials accompanied her; and what were their functions.

The Prime Minister: It is too soon after my visit to Australia and the middle and far east to be able to give detailed information on the cost to public funds. A provisional estimate of the total cost of the visit, including communications with the United Kingdom is £174,000.

I was accompanied on the visit by three officials and 11 support staff including two communications officers. A third communications officer was temporarily moved from Hong Kong to Canberra for five days to assist with the increase in messages. All other staff involved with communications handled telephone calls and messages as part of their normal duties.

Mr. Tony Banks: To ask the Prime Minister how many journalists accompanied her in officially provided transport on her visit to Australia and other countries in August 1988; which organisations they represented; and what was the cost charged to each journalist.

The Prime Minister: There were places for 15 journalists in the official aircraft. All were taken by representatives of newspapers and radio and television organisations. Each journalist was charged £1,750 for the whole tour.

Cabinet Office (Staff)

Mr. Sean Hughes: To ask the Prime Minister what are the latest available figures for the Cabinet Office in the London pay area of the number of vacancies by grade and the proportion this is of the grade complement in London.

The Prime Minister: The position as at 1 October 1988 is as follows:

Grade	Vacancies	Complement
Grade 7	6·5	169·0
Senior Executive Officer	2·5	51·0
Higher Executive Officer	3·0	77·5
Executive Officer	5·0	134·0
Administrative Officer	10·5	179·0
Senior Personal Secretary	0·5	50·0
Personal Secretary	6·5	68·5
Typist	3·0	58·5
Support Manager 3	0·5	5·0
Support Grade Band 2	4·0	74·0
Senior Psychologist	1·0	4·0
Senior Occupational Health Nursing Adviser	1·0	3·0
Occupational Health Nursing Adviser	1·0	3·0
Sister	1·0	3·0
Graphics Officer	3·0	9·0

Mr. Sean Hughes: To ask the Prime Minister if she will provide the latest available figures for the Cabinet Office for *(a)* numbers of staff in receipt of local pay additions, by grade, *(b)* location of those offices awarding local pay additions and *(c)* annual cost.

The Prime Minister: The numbers of individuals in receipt of local pay additions in the Cabinet Office by grade and location are:

Grade	London	Sunningdale	Basingstoke
Administrative Assistants	38	1	52
Administrative Officers	169	27	81
Executive Officers	133	[1]—	[1]—
Typists	54	3	16
Typing Managers	6	0	2
Personal Secretaries	62	2	5
Senior Personal Secretaries	50	0	1

[1] LFAs not payable to these grades in these locations.

The figures are based on the number of staff-in-post as at 1 October 1988. The estimated annual cost is £365,700.

OVERSEAS DEVELOPMENT

ODA (Transfer)

Mr. Spearing: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has for further transfer of the Overseas Development Administration from London; and what basis he uses as a critierion in this respect.

Mr. Chris Patten: The ODA now has some 500 posts in its East Kilbride office, and is in the process of moving some 390 posts to the former Royal Navy dockyard in Chatham; 680 posts remain in central London. The bulk of the ODA departments currently located in central London are planned to remain there, as close as possible to the rest of the Foreign and Commonwealth Office. However, the requirement for accommodation in central London is kept under review by the ODA, in common with other Government Departments, to hold this to the minimum necessary bearing in mind the need to administer the aid programme cost-effectively.

Kampuchea

Mr. Spearing: To ask the Secretary of State for Foreign and Commonwealth Affairs what is the current policy of Her Majesty's Government in respect of aid to Kampuchea; and what criteria or conditions will influence or determine any decision of Her Majesty's Government to again provide official aid to that country.

Mr. Andrew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs what further plans there are for United Kingdom aid to the people of Kampuchea.

Mr. Chris Patten: We do not give official aid to Cambodia, and shall only be able to consider the provision of such aid when a government acceptable to the majority of Cambodians is in place. We are currently considering the provision of humanitarian aid via British non-governmental organisations working in Cambodia, and we contributed £100,000 to the World Food Programme/Food and Agriculture Organisation appeal launched in May.

Rhinos (Protection)

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will give details of the assistance given to the Governments of Kenya, Zambia and Zimbabwe for the protection of rhinos in each of the past five years.

Mr. Chris Patten: Conservation of wildlife, including the rhinoceros, has been supported through the aid programme in both Kenya and Zimbabwe during the last five years, although precise figures are not readily available. We currently have three experts in Kenya, one of whom co-ordinates the Kenya rhino rescue project. We are ready to discuss with the Governments concerned what further assistance we might provide.

ENERGY

Power Stations (Safety)

Mr. Frank Cook: To ask the Secretary of State for Energy if he will list the substantive documentation which demonstrates the safety of construction, operation and decommissioning of the pressurised water reactor power station now under construction at Sizewell.

Mr. Michael Spicer: The safety documentation on which the Health and Safety Executive granted the CEGB a site licence for Sizewell B is the pre-construction safety report together with its supporting reports. A copy of the PCSR is available in the Libraries of both Houses.

Mr. Frank Cook: To ask the Secretary of State for Energy whether the Sizewell B pre-construction safety report is to apply, other than for site specific related changes, to the similar station proposed for Hinkley Point C.

Mr. Michael Spicer: Yes. The CEGB proposes that, other than for minor changes made, with the agreement of the HSE's nuclear installations inspectorate, to the Sizewell design after licensing and for changes to deal with site specific requirements, the Sizewell PCSR can be directly applied to Hinkley Point C.

Mr. Frank Cook: To ask the Secretary of State for Energy if he will make the proprietary version of the pre-construction safety report available to hon. Members, members of the public and to objectors who have registered with the Hinkley Point C secretariat.

Mr. Michael Spicer: Copies of the Sizewell PCSR, together with CEGB documents covering the site-specific related changes for Hinkley Point C, are available in the Libraries of both Houses. They are also available for inspection by the public at several CEGB premises, and at the Hinkley Point C inquiry public office, and have been put before the Hinkley Point C inquiry inspector as inquiry documents.

Mr. Frank Cook: To ask the Secretary of State for Energy whether all the references cited in the Sizewell B, pre-construction safety report, are available in unabridged form.

Mr. Michael Spicer: No. Commercially confidential information contained in the PCSR supporting documents is not publicly available. The NII has, of course, been supplied with unabridged versions of all safety documents.

Mr. Frank Cook: To ask the Secretary of State for Energy for what reason each deletion and abridgement of the Sizewell B, pre-construction safety report, and supporting reference documents has been made; and if he will make a statement.

Mr. Michael Spicer: Deletions of material in the PCSR supporting documents have been made for reasons of commercial confidentiality.

Mining Subsidence

Mr. Woodcock: To ask the Secretary of State for Energy (1) following his understanding that British Coal has now taken steps to introduce the option that claimants may have subsidence damage repair work undertaken by a contractor of their choice, what steps have been taken to publicise this option in the last year; how many claimants have requested this option within the last year; and in how many cases British Coal has agreed to this option within the last year;

(2) within what period of time of the British Coal Corporation receiving a claim are claimants against the corporation for subsidence damage in active mining areas now being visited; and what percentage of claimants have not been visited within four weeks *(a)* in the last 12 months for which figures are available and *(b)* in the last three months for which figures are available;

(3) since the Government's response to the Waddilove report on subsidence damage, what percentage of claimants have chosen to have repairs carried out by a contractor of their choice; how many requests to have repairs carried out by independent contractors have been refused by the board; and how many references there have been to independent adjudication.

Mr. Michael Spicer: These are management matters for British Coal, and I have asked the chairman to write to my hon. Friend.

Mr. Woodcock: To ask the Secretary of State for Energy since publication of the Government's response to the Waddilove report on subsidence damage, how many requests have been received by the board for reference to independent adjudication; how many requests have not been referred because of lack of agreement by the board; and where references have been made to independent adjudication, in what proportion of cases British Coal has agreed to meet the costs of the adjudicator.

Mr. Michael Spicer: This is a management matter for British Coal, and I understand that the deputy chairman has already written to my hon. Friend on this subject.

Electricity Privatisation

Mr. Menzies Campbell: To ask the Secretary of State for Energy what is his estimate of the effect on the initial market value of a privatised electricity industry, of a requirement that at least 20 per cent. of generating capacity should now be non-fossil fuel based.

Mr. Michael Spicer: The market value of the electricity industry will depend on a wide range of factors including the profitability of the companies, their capital structures, their future prospects and the state of the market. It is impossible to say to what extent any particular factor will contribute to this.

Mr. Menzies Campbell: To ask the Secretary of State for Energy what proposals there are to require private companies operating nuclear power stations after the privatisation of the electricity industry to take out insurance against major nuclear accidents.

Mr. Michael Spicer: I refer the hon. Member to the reply given to the hon. Member for Meirionydd Nant Conwy (Dr. Thomas) on 3 March 1988, col. *649*.

South Africa (Oil Embargo)

Mr. Menzies Campbell: To ask the Secretary of State for Energy what proposals he has to help prevent the circumvention of the international oil embargo against South Africa.

Mr. Peter Morrison: I have made it clear to companies operating on the United Kingdom continental shelf that they must comply with the the export guidelines which state that North Sea oil shall only be exported to members of the European Community and the International Energy Agency or countries with whom there is already an existing pattern of trade.

DEFENCE

Irish Sea (Exercises)

Mr. Foulkes: To ask the Secretary of State for Defence what naval vessels, maritime reconaissance aircraft or other defence equipment were involved in exercises in the Irish sea on 5 September; whether any incidents or collisions occurred; and if he will make a statement.

Mr. Archie Hamilton: There was no exercise in the Irish Sea on 5 September and there were no incidents or collisions involving royal naval vessels.

Conservative Party Conference 1988

Mr. Tony Banks: To ask the Secretary of State for Defence what services were provided by members of the armed forces for purposes connected with the 1988 Conservative party conference; and what was the total cost involved.

Mr. Archie Hamilton: In response to requests from the chief constable, Sussex constabulary, small numbers of military personnel were deployed to assist the police in searching the conference area for explosive devices and in potential bomb disposal tasks. In addition, the mine-sweeper, HMS Nurton, was stationed off Brighton, and three rigid inflatable boats crewed by Royal Marines were provided to assist the police in patrolling inshore waters. In line with normal arrangements for such operations no charges for the small extra costs incurred by my Department for transport, accommodation, and so on, were made to the Sussex constabulary.

Australia (Prime Minister's Visit)

Mr. Tony Banks: To ask the Secretary of State for Defence what was the total cost to his Department of the Prime Minister's visit to Australia and other countries in August 1988.

Mr. Archie Hamilton: The Ministry of Defence made available an RAF VC10 aircraft and crew for the Prime Minister's visit to Australia and other countries in August 1988. A provisional estimate of the cost to be borne by the Management and Personnel Office is £195,000.

Armilla Patrol

Mr. Tony Banks: To ask the Secretary of State for Defence what has been the total cost to date of the Armilla patrol; and what is the current monthly cost.

Mr. Archie Hamilton: I refer the hon. Member to the answer given to the hon. Members for Halifax (Mrs. Mahon) and for Orkney and Shetland (Mr. Wallace) on 5 November 1987 at column 888, by my hon. Friend the Member for Hertfordshire, North (Mr. Stewart).

Rhino Poaching (Kenya and Zimbabwe)

Mr. Tony Banks: To ask the Secretary of State for Defence if he will offer the services of British combat

troops to the Governments of Kenya and Zimbabwe to assist in the campaign against the poaching of rhino; and if he will make a statement.

Mr. Archie Hamilton: No. Such operations would not be appropriate tasks for the armed forces. The Government have, however, provided other forms of assistance to African Governments in their attempts to halt the illegal trade in endangered species, including staff and equipment to be used by wildlife departments. In addition, the United Kingdom is a party to the convention on international trade in endangered species of wild fauna and flora, and has been in the forefront of those calling for even stricter controls on such trade.

EDUCATION AND SCIENCE

National Union of Students

Ms. Armstrong: To ask the Secretary of State for Education and Science if *(a)* the National Union of Students and *(b)* the Federation of Conservative Students have been asked to submit evidence to the inquiry on voluntary membership of the National Union of Students.

Mr. Jackson: I refer to the answer given by my right hon. Friend to my hon. Friend the Member for Thurrock (Mr. Janman) on 18 April at column 292, in which he announced the intention to conduct a fact-finding survey of student services and the links between local student unions and the National Union of Students. He also indicated that he would be glad to receive any information or suggestions which interested parties might wish to put forward. Beyond that, no formal invitation to submit evidence has been issued to either body mentioned.

Under-fives

Mr. Corbyn: To ask the Secretary of State for Education and Science if he will list the total number of children under five, by education authority, at *(a)* nursery schools and *(b)* primary schools, for each year since 1983.

Mr. Butcher: The total numbers of pupils aged under five in maintained nursery and primary schools in each local education authority in England in January of each year since 1983 are given in the table. Many of these pupils in primary schools were in nursery classes.

Docklands

Mr. Spearing: To ask the Secretary of State for Education and Science what representations he has received from the London borough of Newham concerning the future capital investment in education in docklands; and what timetable he expects to pursue in order to meet the needs of the area for new school places.

Mr. Butcher: I have received the London borough of Newham's education capital plans for 1989-90 and future years. In addition, officials from my Department have discussed capital needs in the dockland area with representatives of Newham.

Newham is responsible for providing sufficient school places in their area. Its capital plans are currently under consideration and capital allocations for 1989-90 are expected to be announced before the end of the year. In formulating allocations priority will continue to be given to the establishment of new or enlarged schools to meet population growth.

City Technology Colleges

Mr. Spearing: To ask the Secretary of State for Education and Science what consultations he has had and what preliminary conclusions he has reached concerning the establishment of a city technology college in the London borough of Newham.

Mrs. Rumbold: Newham was listed in our booklet "A New Choice of School" as a suitable location for a city technology college, and my officials have had discussions with a number of potential sponsors about the establishment of one there. No formal proposals have yet been made to us, but we shall be delighted to consider any that are.

Mr. Allen: To ask the Secretary of State for Education and Science what level of financial contribution has been made by Marks and Spencer towards the cost of the proposed city technology college in Nottingham; what proportion this represents of the total cost; and what other indications he has received of Marks and Spencer's degree of commitment to this project.

Mrs. Rumbold: I can confirm that Marks and Spencer is one of the sponsors of the Nottingham CTC. It is for sponsors itselves to decide whether or not to announce the degree of its sponsorship.

Schoolchildren (Nottingham)

Mr. Allen: To ask the Secretary of State for Education and Science what action his Department is taking to ensure continued health care for schoolchildren within the Nottingham district health authority area in the light of the district health authority's reduction of 20 whole-time nursing posts, including five in the schools health service.

Mr. Butcher: The responsibility for school health service matters lies with my right hon. Friend the Secretary of State for Health.

Museums, Colleges and Institutions (Funding)

Mr. Macdonald: To ask the Secretary of State for Education and Science if he will list the museums, adult education colleges and other institutions presently funded by the Inner London education authority which the Government intend to support after 1 April 1990; if he will give an estimate of the financial support involved; and if he will make a statement.

Mrs. Rumbold: The Department of Education and Science circular 6/88 listed the museums and adult education colleges for which the Government were willing to consider a measure of central funding. The detailed arrangements are now under discussion with the institutions, the Inner London education authority and other bodies as appropriate. A copy of the circular has been placed in the Library of the House.

University College and Middlesex School of Dentistry

Mr. Alfred Morris: To ask the Secretary of State for Education and Science if he will make a statement on the future of the University college and Middlesex school of dentistry and its associated dental hospital, and the consequences of closure for staff.

Mr. Jackson: The Government have accepted the University Grants Committee's recommendations for the rationalisation of dental education in England, Wales and Northern Ireland and their implications for health service provision. In line with the agreed need to reduce the current over-provision of dental graduates, there will be a net intake reduction of 55 places in October 1989, principally through the withdrawal of funding from the University college and Middlesex school of dentistry. The consequences for the staff of that school will be for the college to decide, in consultation with London university and the University Grants Committee. Arrangements will be made for students on courses, including those currently registering, to complete their studies.

As regards Scotland, the health service implications of the University Grants Committee's recommendations are more complex. Consequently, my right hon. and learned Friend the Secretary of State for Scotland has established a small working party whose remit is to recommend changes in the current provision of dental education in Scotland which best safeguard services to NHS patients. The intention is to secure necessary changes in provision from October 1990.

School Examinations and Assessment Council

Mr. Pawsey: To ask the Secretary of State for Education and Science if he will make a statement on the establishment of the School Examinations and Assessment Council.

Mr. Kenneth Baker: The School Examinations and Assessment Council, set up in shadow form earlier this year, was formally established under section 14 of the Education Reform Act 1988 on 15 August with a full complement of 15 members. The council's chairman is Mr. Philip Halsey, CB, LVO, who will also act as the council's chief executive. The council has been designated the body responsible for approving syllabuses and syllabus criteria under section 5 of the Act. I have placed in the Libraries of both Houses a copy of my letter to Mr. Halsey of 28 September about the work of the council.

National Curriculum Council

Mr. Pawsey: To ask the Secretary of State for Education and Science if he will make a statement on the establishment of the National Curriculum Council.

Mr. Kenneth Baker: The National Curriculum Council, which was set up in shadow form earlier this year, was formally established under section 14 of the Education Reform Act 1988 on 15 August, under the chairmanship of Mr. Duncan Graham CBE who will also act as the council's chief executive. The council currently has 13 members, including its chairman. I intend to make two further appointments to bring the membership up to the full complement of 15 provided for in the Act.

I have approved the council's proposal to locate its main offices in York.

I wrote to Mr. Graham on 26 August about the work of the council. Its initial tasks include conducting statutory consultations on my proposals for attainment targets and programmes of study in mathematics and science for pupils aged five to 16 which I sent to the council on its establishment. Copies of my letter and of the proposals have been deposited in the Libraries of both Houses.

EMPLOYMENT

Community Programme

Mr. Allen: To ask the Secretary of State for Employment if he will make a statement on the future of community projects currently operated by the community programme in Nottingham and elsewhere.

Mr. Nicholls: Local officials of the Training Agency held a series of presentations with all community programme agents and sponsors to ensure, wherever possible, the satisfactory transition of community programme projects into employment training. Project-based places have an important role within employment training and substantial provision has been made for this in the new programme.

Ms. Armstrong: To ask the Secretary of State for Employment what representations he has had regarding redundancies in community task force.

Mr. Nicholls: In July 1988 community task force sought advice from the Training Agency about the issue of redundancy notices to CTF employees whose services would not be required from 5 September 1988.

In response, in August, the Training Agency outlined the procedures, which included details of financial help available to CP agents/sponsors, including CTF.

Ms. Armstrong: To ask the Secretary of State for Employment how many employees of the community task

force have had redundancy notices sent to them as a result of replacing the community programme and the jobs training scheme with the adult training programme.

Mr. Nicholls: A total of 235 employees were issued with redundancy notices by community task force as a result of the change to employment training.

All of those concerned had the opportunity to apply for alternative posts in employment training and in the event 138 people actually left.

Wages

Mr. Pike: To ask the Secretary of State for Employment if he will publish a table showing *(a)* on a national basis and *(b)* on a regional basis the average weekly wage for (i) full-time male employees, (ii) part-time male employees, (iii) full-time female employees and (iv) part-time female employees in both cash terms and real terms based on 1987-88 prices for each year since 1979.

Mr. Lee: I am sending the hon. Member the available information, a copy of which has also been placed in the Library.

YTS

Mr. Pike: To ask the Secretary of State for Employment how many people were on YTS schemes in the constituencies of *(a)* Burnley, *(b)* Pendle, *(c)* Rossendale/Darwen and *(d)* Hyndburn on 31 August.

Mr. Cope: The information is shown in the table:

Number of young people on YTS at 31 August 1988

Local authority district[1,2]	*Number*
Burnley	343
Pendle	900
Rossendale and Blackburn[3]	1,311
Hyndburn	1,169

[1] Young people do not necessarily train in the local authority district in which they live.

[2] The Training Agency's computerised management information system does not collect information by constituency. Figures have been given for local authority districts (LADs).

[3] Statistics for Darwen are not available, but are included in Blackburn LAD.

Labour Statistics

Mr. Pike: To ask the Secretary of State for Employment if he will list the number of people living in *(a)* Lancashire, *(b)* greater Manchester, *(c)* Merseyside and *(d)* Cheshire who have never worked since leaving school; and if he will indicate how many people under the age of 18 are in this situation in each area.

Mr. Lee: The following information is in the Library. The table shows the number of unemployed claimants in the requested counties who had not entered employment since leaving full-time education along with those aged under 18 in this group on 8 September 1988. These figures include some temporary over-recording.

Unemployed school-leavers, 8 September 1988

	Total	*Aged under 18*
Lancashire	3,542	526
Greater Manchester	11,632	1,845
Merseyside	12,943	2,034
Cheshire	3,456	511

Mr. Pike: To ask the Secretary of State for Employment what is the number of unemployed people in *(a)* Burnley and *(b)* Pendle who have been unemployed (i) for more than one year and (ii) for more than two years.

Mr. Lee: The following information is in the Library. The table shows the number of unemployed claimants for the requested durations in Pendle travel-to-work area and Burnley travel-to-work area on 14 July 1988.

Travel-to-work	*Unemployed claimants—14 July 1988*	
	One year and over	*two years and over*
Burnley	1,537	1,070
Pendle	949	614

Mr. Pike: To ask the Secretary of State for Employment if he will list the number of vacancies which exist by industrial classification in *(a)* the north-west, *(b)* Lancashire, *(c)* the Burnley constituency, *(d)* the Pendle constituency, *(e)* the Rossendale and Darwen constituency and *(f)* the Hyndburn constituency: and if he will list other vacancies according to whatever similar criteria his Department uses for the same areas.

Mr. Lee: Following is the available information, which is also in the Library. The tables show the number of unfilled vacancies analysed by industry at jobcentres in the north-west region, the county of Lancashire and at jobcentres covering areas closely corresponding to the requested parliamentary constituency areas on 5 August 1988, the latest available date.

Recent research has confirmed that, nationally, about a third of vacancies are notified to jobcentres. Estimates arenot available disaggregated by local area or industry.

Unfilled vacancies analysed by industry—5 August 1988

Industrial classification	*North-west region*	*Lancashire County*	*Jobcentres covering Burnley constituency*	*Jobcentres covering Pendle constituency*	*Jobcentres covering Rossendale & Darwen constituency*	*Jobcentres covering Hyndburn constituency*

Speculative placings/transfers/inputs	0	0	0	0	0	0

Mr. Pike: To ask the Secretary of State for Employment how many unemployed building workers there are in the north-west.

Mr. Lee: Information from the labour force survey indicates that in spring 1987 there were an estimated 13,000 people in the north-west who were currently unemployed and whose last employment (within the previous three years) was in building work in the construction industry. An occupational analysis of the Department's monthly claimant unemployment count is not available.

Wages Council Inspectors

Mr. Pike: To ask the Secretary of State for Employment how many wages council inspectors are currently in post in the north-west region; and if he will make a statement.

Mr. Nicholls: There are currently 12 wages inspectors in post in the north-west division of the inspectorate.

Wages Councils (Prosecutions)

Mr. Pike: To ask the Secretary of State for Employment how many prosecutions there were in the north-west region in 1987 and to date in 1988 under wages council legislation.

Mr. Nicholls: There were two prosecutions of employers in the north-west division in 1987. In 1988, there has been one to date.

Accident Statistics

Mr. Meacher: To ask the Secretary of State for Employment what is the distribution by locality of fatal accidents at work in each of the last five years.

Mr. Nicholls: The number of fatal injuries to employees reported to the Health and Safety Executive's factory inspectorate in each of its areas are shown in the table.

Health and Safety Executive Area	1982	1983	1984	1985	Q1 1986	[1]1986-87
South West	14	16	16	12	3	17
South	7	11	9	11	1	11
South East	17	17	19	21	3	14

Grand Total	469	443	437	398	98	355

[1]Data for the year commencing 1 April 1986.
[2]Figures on an area basis could only be obtained at disproportionate cost.
[3]From 1982 to 1985 the figures include some self-employed and from 1982 to 1983 they may also include some members of the public.

Commissioner for the Rights of Trade Unionists

Mr. Meacher: To ask the Secretary of State for Employment if he will list those persons who have been offered the post of Commissioner for the Rights of Trade Unionists; and what was their response.

Mr. Nicholls: No.

Employment Training

Mr. Leighton: To ask the Secretary of State for Employment how many of the 270,000 employment training places agreed with prospective training managers will be provided by *(a)* employers, *(b)* voluntary or community corporations, *(c)* local authorities, and *(d)* other bodies.

Mr. Nicholls: On 9 September, around 291,000 employment training places had been agreed. Of those, 96,500 are provided by employers (including private sector training organisations); 88,000 by voluntary bodies; 61,000 by local authorities; and 45,000 by other bodies.

AGRICULTURE, FISHERIES AND FOOD

Sugar

Mr. Spearing: To ask the Minister of Agriculture, Fisheries and Food if he will tabulate in the *Official Report* in tonnes of white sugar equivalents, or raw unrefined sugar where appropriate, the quantities of sugar in the sugar year 1987-88 which were *(a)* imported into the United Kingdom from African, Caribbean and Pacific states of European Economic Community, *(b)* imported as raw or white sugar, stating their main country of origin, *(c)* produced from sugar beet grown in the United Kingdom, *(d)* exported as raw or refined sugar to member states of the European Economic Community or other countries, respectively and *(e)* absorbed by retail and bulk domestic sugar markets, respectively, together with any other relevant information, including stocks in hand and carried over, related to the above figures.

Mr. Donald Thompson: The information requested is as follows:

1987-88 (October-September)

	'000 tonnes[1]
United Kingdom Imports (provisional figures)	
From EC	
Ireland	47·5
Denmark	43·9
France	21·7
Other	1·9
Total	113·5
From ACP	
Mauritius	466·7
Fiji	199·7
Jamaica	129·6
Guyana	142·6
Swaziland	71·6
Barbados	66·2
Other	155·4
Total	1,231·9
Other Sources	0·5
Total	1,345·9
United Kingdom production from Home Grown Beet (including carry forward from 1986-87)	1,328·3
Carry forward to 1988-89	102·3
'C' sugar to be exported from 1987-88 production	82·0
Exports to EC (provisional)	72·0
Exports to third countries (excluding C sugar) (provisional)	160·0
Deliveries to retail market (provisional)	587·0
Deliveries to industrial market (provisional)	1,538·0
[2]Stocks (as at 31 August 1988)	311·1

[1]All figures in '000 tonnes white sugar equivalent—figures may not sum due to rounding.
[2]Figure comprises sugar held by producers and merchants in the EC sugar storage scheme plus preferential sugar held in store by cane refiners.

Bovine Somatotropin

Mr. Kirkwood: To ask the Minister of Agriculture, Fisheries and Food what recent representations he has had regarding the commercial licensing of bovine somatotropin and if he will make a statement.

Mr. Donald Thompson: I have received a considerable number of letters from individuals and organisations expressing opposition and some in support to the licensing of bovine somatotropin.

Pesticides

Mr. Kirkwood: To ask the Minister of Agriculture, Fisheries and Food what recent representations he has received regarding the five-year delay in enforcing maximum residue limits for pesticides on fruit and vegetables; and if he will make a statement.

Mr. Ryder: I have received several representations following reports in the media. Over 800 maximum residue levels for pesicides on fruit and vegetables have in fact been introduced under the Pesticides (Maximum Residue Levels in Food) Regulations 1988. All these limits come into effect on 31 December 1988.

There are, however, six individual commodity/pesticide combinations which were included in our second consultation document but for which MRLs have not yet been set. It was recognised in our proposal that approved uses in this country can sometimes lead to residues above the various international MRLs. It was therefore proposed in the consultation document that these MRLs should come into effect in five years time, so as to allow time for good agricultural practice to be adapted. However, I was advised that it was not normal practice to set limits so far in advance of implementation. I have asked for residue data relating to these six MRLs to be reconsidered by the Advisory Committee on Pesticides. MRLs which reflect the advice of the ACP and current international standards will be introduced as soon as possible. However, in setting a timetable, I will be bound to take account of any necessary adjustments to agricultural practice which may have to be set in train.

Coastal Defence

Mr. Spearing: To ask the Minister of Agriculture, Fisheries and Food what principles he has adopted in his policy for coastal defence; what proposals he has for future defence works; and what bodies may be in future responsible for their adoption.

Mr. Ryder: The Ministry in providing grant aid for coastal defence, gives highest priority to schemes which provide protection to people and property. To qualify for grant, schemes must be technically appropriate, economically justified and environmentally sympathetic. Coastal and drainage authorities regularly provide information on their programmes of work which assist the Ministry in planning future grant expenditure.

In parallel with our proposals to privatise water and sewerage utilities, it is intended that water authorities' responsibilities for coastal defence should be transferred to the proposed National Rivers Authority, together with other river management and regulatory functions. Otherwise present arrangements, whereby works programmes are decided by regional or local land drainage committees and financed by precept in constituent county councils, will continue.

Milk

Mr. John D. Taylor: To ask the Minister of Agriculture, Fisheries and Food what proposals he has to comply with the ruling by the European Court of Justice that European Community legislation for milk quotas was deficient in that it did not take into account those who had ceased milk production under a Community-financed scheme in 1984; and if he will make a statement.

Mr. Donald Thompson: The Commission has now put forward proposals to deal with this problem, and we are giving these careful consideration. It is for the Council of Ministers to make decisions on these proposals.

Mr. Spearing: To ask the Minister of Agriculture, Fisheries and Food what representations he has received from the Milk Marketing Board concerning his practice of permitting certain drugs to be injected into cows markedly to increase yields; what action he intends to take; and if he will make a statement.

Mr. Donald Thompson: The chairman of the Milk Marketing Board has told me of the concern of many milk producers about the possible impact if BST were to become generally available. He also reported that many wanted an EC ban on its use.

Applications for licences for the product are being considered by the European Commission's Committee for Veterinary Medicinal Products, which is required to provide an opinion before licence applications are determined nationally. Any decision in the United Kingdom will take account of our obligations under the Medicines Act 1968 and the relevant EC directives.

Soft Drink Regulations

Mr. Shersby: To ask the Minister of Agriculture, Fisheries and Food what representations he has received following publication of his proposals for revision of the soft drink regulations; what steps he proposes to maintain quality standards; and if he will make a statement.

Mr. Ryder: I have received numerous comments on the draft soft drinks regulations and will give them careful consideration before deciding on how best to proceed. It is my intention to ensure that the new regulations enable consumers to make an informed choice when purchasing soft drinks and at the same time allow innovation by manufacturers.

Food Labelling

Mr. Shersby: To ask the Minister of Agriculture, Fisheries and Food what information he has concerning proposals for nutritional labelling being prepared by the European Commission; what representations he has made to the Commission concerning any change in the information at present provised to consumers in Britain; and if he will make a statement.

Mr. Ryder: I understand that the European Commission has just tabled its proposals on voluntary nutrition labelling, although we have not yet received the formal document. Earlier drafts indicate that the proposals are similar to the full nutrition labelling declarations (category III) as contained in the Ministry's guidelines, a revised version of which was issued to the industry in January. As expected, the proposals are for voluntary nutrition labelling but that where nutrition information is given it should be in a mandatory form. As soon as we receive the formal proposals from the European Commission they will as usual be circulated to industry and other interested parties for comment.

Mr. Shersby: To ask the Minister of Agriculture, Fisheries and Food what consideration is being given by the Food Advisory Committee to the use of graphical representations to accompany numerical nutrition declarations; if he will make it his policy to ensure that all sections of the food industry are consulted before any decision is made; and if he will make a statement.

Mr. Ryder: The Food Advisory Committee has looked into the possible use of graphical representations to accompany numerical nutrition information and has concluded that further work is required particularly regarding consumer expectations before the various options can be considered further. It is my policy to ensure that all sections of the food industry and other interests are fully consulted about any proposals which may affect them, including, of course, any on the graphical representation of nutrition information.

EC (Surplus Produce)

Rev. Martin Smyth: To ask the Minister of Agriculture, Fisheries and Food what organisations were licensed to distribute the current issue of European Economic Community surplus produce; what criteria were used to select these organisations; what regulations or advice has been given to those charged with distribution of this food; what quantity is being distributed in England, Wales and in each local authority area; and if he will make a statement.

Mr. Ryder: My right hon. Friend the Member for Suffolk Coastal (Mr. Gummer) announced to the House that 127 organisations had been designated to distribute surplus produce to the most needy. A list of those organisations was placed in the Library on that day. To qualify for designation, charitable and non-profit making organisations were required to demonstrate that they could comply with the conditions of the scheme and in particular: (i) that they were capable of arranging for the produce to be withdrawn from intervention stores (preferably in quantities of no less than 1 tonne on any one occasion), to be processed into an appropriate form for final consumption, and to be distributed to the most needy; (ii) that they were capable of carrying out the operations mentioned in sub-paragraph (i) with due safeguards against abuse and against risks to health; (iii) that the quantity of butter and/or beef received under these arrangements would be additional to quantities (if any) which the organisation normally acquires from commercial sources or from concessionary sales; and that such quantities continue to be acquired; (iv) that they would maintain adequate and satisfactory books and records and would undertake to make these available as required to the Intervention Board for Agricultural Produce or its agents for verification purposes.

Written instructions on how the scheme should be operated have been issued to all designated organisations. The Intervention Board for Agricultural Produce arranged for a series of seminars for organisations operating the scheme, to be held throughout the United Kingdom. The board provides any additional advice necessary on a daily basis.

The quantities of produce that designated organisations have been authorised to withdraw from intervention stores in 1988 can be broken down as follows:

Organisations based in:	*Butter (tonnes)*	*Beef (tonnes)*
England	1,677	570
Wales	176	332
Scotland	80	550
Northern Ireland	530	320

Figures are not available for local authority areas.

Council of Agriculture Ministers

Mr. Boswell: To ask the Minister of Agriculture, Fisheries and Food what was the outcome of the Agriculture Council in Luxembourg on 17 and 18 October; and if he will make a statement.

Mr. MacGregor: At this meeting, at which I represented the United Kingdom, the Council again discussed the Commission's proposal for an optional scheme of direct income aid to low-income farmers, with a Community contribution towards the cost. I repeated my considerable doubts about the cost-effectiveness and appropriateness of the proposal, and these doubts are now being shared by a number of other members of the Council.

The Council also discussed for the second time the Commission's proposal for giving effect to the judgment of the European Court about the position of farmers who, because they had taken part in the earlier Community schemes for the abandonment of milk production or conversion of dairy herds, were not assigned a quota for milk production when the quota system was introduced in 1984. The main issues in the debate were the circumstances in which such farmers should now be considered for a milk quota, the conditions to be attached, how the extra quota should be found and how the cost should be offset. The matter is to be considered further, but considerable support was given to the views I have strongly expressed on both occasions that the quotas of existing producers should not be affected and that the conditions for beneficiaries under the judgment need to be restrictively drawn, in particular to ensure that only those clearly intending to go back into milk production should be included and that windfall gains should be excluded.

The Commission gave an oral presentation of its proposals for changes in the support arrangements for beef and for sheep as well as the results of its discussions with the New Zealand Government about future imports of butter and sheepmeat from that country. Members of the Council were only able to give very brief preliminary reactions, and these subjects will be taken up at later meetings.

After some discussion, the Council eventually decided on a reduction in the consumption aid for olive oil to apply during the 1988-89 marketing year, with a saving of 102 million ecu to the CAP budget.

Along with a number of my colleagues in the Council, I expressed serious doubts about the Commission's ideas for detailed implementation of the extensification scheme, particularly in relation to control and verification, the risk of fraud and other practical difficulties. The Commission undertook to reconsider.

There was also a discussion of the state of the pigmeat market, in which I again expressed the case for the early abolition of monetary compensatory amounts in that sector.

THE ARTS

Property in Lieu of Tax

Mr. Faulds: To ask the Minister for the Arts when he expects to lay before the House the statement referred to in his written answer of 29 June to the hon. Member for Warley, East, *Official Report*, column *259*; and whether he will make it his policy that in future years such statements in conformity with section 9 (6) of the National Heritage Act 1980, are laid before the House within three months of the close of the financial year covered by them.

Mr. Luce: The statement to which the hon. Member refers was laid before the House on 28 July. It is my intention that in future years the statement of disposals or transfers of property accepted in lieu of tax should, whenever possible, be laid within three months of the close of the financial year.

Investment

Mr. Menzies Campbell: To ask the Minister for the Arts whether, in the light of the publication of the PSI Myerscough report on the economic importance of the arts in Britain, a copy of which has been sent to him, he will make it his policy to increase investment in the arts and entertainment industry.

Mr. Luce: The PSI report is a valuable contribution to understanding the role of the arts within the economy. It illustrates how useful developments can be funded by a partnership between public and private interests. It is one of the objectives of the three-year funding programme which I announced last year to stimulate such plural funding of the arts.

Departmental Staff

Mr. Sean Hughes: To ask the Minister for the Arts, what are the latest available figures for his office in the London pay area of the number of vacancies by grade and the proportion this is of the grade complement in London.

Mr. Luce: The Office of Arts and Libraries is located in central London and currently has the following vacancies for permanent staff:

	Number
Executive Officer	1
Administrative Officer	1
Administrative Assistant	2

These posts constitute 7 per cent. of the total complement.

Mr. Sean Hughes: To ask the Minister of the Arts if he will provide the latest available figures for his office for *(a)* numbers of staff in receipt of local pay additions, by grade, *(b)* location of those offices awarding local pay additions and *(c)* annual cost.

Mr. Luce: The number of staff expected to receive local pay additions in the Office of Arts and Libraries in a full year is as follows:

	Number
Administrative Assistants	3
Administrative Officers	6
Executive Officers	10
Senior Personal Secretaries	1
Personal Secretaries	3
Typists	1
Total	24

They are located at Horse Guards road and at Sumner street, London SE1.

The annual cost is estimated at £14,400.

British Library

Mr. Dalyell: To ask the Minister for the Arts what has been the total cost to date of the Urquhart wing at the British Library's document supply centre, Boston Spa.

Mr. Luce *[holding answer 4 July 1988]:* The three phases of the Urquhart wing at the British Library's document supply centre, Boston Spa, cost a total of £11,235,027 including VAT.

Club Theatres

Mr. Bowis: To ask the Minister for the Arts if he will make a statement on regulations for club theatres.

Mr. John Patten *[holding answer 28 July 1988]:* I have been asked to reply.

Public performances of plays are subject to the licensing requirements of the Theatres Act 1968. Premises licensed under the Act will be subject to local authority fire and safety regulations. Local authorities have no power to regulate the content of plays but the 1968 Act prohibits the presentation of obscene performances, whether in public or private, subject to certain defences. Performances of plays in clubs will not be subject to the licensing provisions of the Act if the public are not admitted.

HOME DEPARTMENT

Strip Searches

Mr. McNamara: To ask the Secretary of State for the Home Department how many category A prisoners are at present held on remand at Risley detention centre; to how many strip searches they have been subjected in July, August and September, respectively, giving the number of persons involved, number of times each person was searched and if any prison contraband, smuggled item or illegal correspondence was discovered in any search, indicating which items; in how many cases prisoners refused to be searched and had to be restrained while a search was being conducted; and what were the reasons for the search under each of the following headings *(a)* making a remand appearance at court, *(b)* attending a trial, *(c)* inter-prison visit and *(d)* other reasons.

Mr. Douglas Hogg: On 17 October there were eight inmates on remand at Risley remand centre who had been placed in category A. Comprehensive records of strip searches are kept only in respect of category A women prisoners, of whom there was one in Risley during July, August and September. Information from Risley indicates that this prisoner was strip-searched once in July at the time of a cell change and twice in September, at the time of a cell change and on transfer to another establishment. No unauthorised articles were discovered on any of these occasions. On no occasion did the prisoner refuse to be strip-searched.

Mr. McNamara: To ask the Secretary of State for the Home Department how many category A women prisoners there were in Her Majesty's prison, Durham, in July, August and September, respectively, and how many strip searches were made on prisoners in those months, indicating strip searches before and after consultation with legal advisers, after visits and after cell changes, wing searches and cell searches, and listing the reasons for searches; and illegal contraband or smuggled items found.

Mr. Douglas Hogg: During July, August and September, there were three category A women prisoners in Durham prison. The number of occasions on which each was strip-searched during each month is shown in the table:

	Inmate A			Inmate B			Inmate C		
	July	August	September	July	August	September	July	August	September
After legal visits	—	—	—	—	—	—	—	—	—
After other visits	—	3	2	—	—	4	—	1	1
At the time of cell changes, and wing and cell searches	—	2	—	1	2	1	—	2	1
Others	—	—	—	—	—	2	—	—	2

No unauthorised article was found on any of the three women. I set out the reasons for such searches in my reply to a question from the hon. Member on 15 January at column *446*.

Prisoners (Statistics)

Mr. William Ross: To ask the Secretary of State for the Home Department how many persons originally from *(a)* Northern Ireland and *(b)* the Irish Republic, were in prison in (i) England and (ii) Wales, at the latest date for which figures are available.

Mr. Douglas Hogg: Citizens of Northern Ireland are not separately identified from other citizens of the United Kingdom. However, on 31 August 1988, about 310 prisoners in prison service establishments in England who were citizens of the United Kingdom or whose citizenship was unknown were known to have been born in Northern Ireland. A further three were held in establishments in Wales.

The recording of nationality on the records held centrally for citizens of the Republic of Ireland is not completely reliable because it depends upon the information provided by the prisoner. On 31 August, about 470 prisoners in establishments in England were recorded as citizens of or born in the Republic of Ireland. None was held in establishments in Wales.

Guildford Pub Bombings

Mr. Corbyn: To ask the Secretary of State for the Home Department how many times each of the four people convicted of the Guildford bombing have been subject to *(a)* prison moves and *(b)* prison disciplinary proceedings since 1974.

Mr. Douglas Hogg: I will write to the hon. Member.

Mr. Corbyn: To ask the Secretary of State for the Home Department if he will publish the report of the Somerset constabulary on the case of the four people convicted of the Guildford bombing.

Mr. Douglas Hogg: No. It is not the practice to publish the reports of police investigations.

Disabled People's March (Police Deployment)

Mr. Corbyn: To ask the Secretary of State for the Home Department if he will call for a report from the Commissioner of Police of the Metropolis as to how many Metropolitan police officers, and at what rank, were deployed on 28 July at the march of people with disabilities from Kennington Park to Elephant and Castle.

Mr. Douglas Hogg: I understand from the Commissioner of Police of the Metropolis that one chief inspector, five inspectors, nine sergeants and 80 constables were deployed on the march.

Firearms (Amendment) Bill

Mr. Amess: To ask the Secretary of State for the Home Department if he has any plans to extend the Firearms (Amendment) Bill to firearms rendered incapable of firing live ammunition, but which will accept blank ammunition; and if he will make a statement.

Mr. Douglas Hogg: The Firearms (Amendment) Bill does not amend the definition of a firearm in section 57(1) of the Firearms Act 1968 and there are no plans to do so.

Mr. Amess: To ask the Secretary of State for the Home Department (1) what discussions his Department has held with historical re-enactment groups concerning the Firearms (Amendment) Bill; if he will list those groups; and if he will make a statement;

(2) what assistance his Department has sought from historical re-enactment groups concerning the Firearms (Amendment) Bill; and if he will make a statement.

Mr. Douglas Hogg: We have considered carefully representations from the Sealed Knot, the English Civil War Society, the Great War Society an the World War II Battle Re-enactment Society. I am satisfied that the Bill will not impose an unreasonable burden on their activities. Most of the guns they use will still be able to be held either on a firearm or a shotgun certificate.

Football League Clubs, London (Police Costs)

Mr. Tony Banks: To ask the Secretary of State for the Home Department if he will call for a report from the Commissioner of Police of the Metropolis as to how much was *(a)* charged and *(b)* paid by each Football League club in London for police services in the 1987-88 season and 1988-89 season to date.

Mr. Douglas Hogg: I understand from the Commissioner of Police of the Metropolis that the information is as follows:

Club	Season 1987-88		Season 1988-89 (to 18 October)	
	Charged £	Paid £	Charged £	Paid £
Arsenal	161,875·96	161,875·96	15,955·96	5,810·28
Brentford	34,078·68	34,078·68	9,645·95	6,790·68
Charlton	49,273·65	49,273·65	9,960·01	9,441·27
Chelsea	168,257·86	168,257·86	47,318·96	30,783·20
Crystal Palace	37,173·59	37,173·59	10,176·56	4,203·23
Fulham	26,526·79	26,526·79	5,093·81	1,326·96
Leyton Orient	17,509·17	17,509·17	3,924·49	1,100·62

Club	*Season 1987-88*		*Season 1988-89 (to 18 October)*	
	Charged £	*Paid £*	*Charged £*	*Paid £*
Millwall	57,693·28	57,693·28	16,975·52	12,329·84
Queen's Park Rangers	129,564·28	129,564·28	28,004·20	16,233·40
Tottenham Hotspur	153,785·36	153,785·36	12,413·06	Nil
West Ham United	176,303·08	176,303·08	30,433·09	12,452·08
Wimbledon	81,354·26	81,354·26	16,897·37	11,077·49
Total	1,093,395·96	1,093,395·96	206,798·98	111,549·05

Traffic Wardens (Newham)

Mr. Tony Banks: To ask the Secretary of State for the Home Department how many traffic wardens were on duty in the London borough of Newham over the weekend of 8-9 October 1988.

Mr. Douglas Hogg: I understand from the Commissioner that on Saturday 8 October, one traffic warden controller, six traffic warden supervisors and 34 traffic wardens were on duty and on Sunday 9 October one traffic warden controller, six supervisors and 27 traffic wardens.

Telephone Interceptions

Mr. Tony Banks: To ask the Secretary of State for the Home Department (1) what sums of money were charged to Government by British Telecom or other telephone companies for interception services in the last financial year; and what was the average cost per interception;

(2) how many telephone lines in total were intercepted by authorised warrant in 1987;

(3) for all telephone interceptions in 1987, what proportion were authorised for *(a)* criminal investigation and *(b)* domestic surveillance for security purposes;

(4) what has been the average duration of an authorised interception warrant during the past two years; who monitors them; and to whom the monitoring information is reported;

(5) how many requests have been received from the police to have telephone lines monitored for traffic frequency in the past 12 months;

(6) how many individual telephone lines have been intercepted on average per authorised warrant in the last two years.

Mr. Hurd: The Interception of Communications Act 1985 sets out the purposes for which a warrant may be issued and makes provision for the monitoring of interception under the Act by an independent judicial figure, the right hon. Lord Justice Lloyd. The commissioner's annual reports, presented to parliament by my right hon. Friend the Prime Minister, comment on the results of that monitoring.

The figures for the number of interceptions warrants issued by the Home Secretary and the Secretary of State for Scotland in force on 31 December 1987 were given in an annex to the report of the commissioner, which was presented to Parliament in March 1988 (Cmnd. 351). I do not intend to publish statistics additional to those in the commissioner's reports. Nor would it be consistent with the practice of successive Governments to give information about the costs relating to interception warrants.

Police Manpower (Newham)

Mr. Tony Banks: To ask the Secretary of State for the Home Department how many police officers were on duty in the London Borough of Newham over the weekend of 8-9 October 1988; and what was the total cost involved.

Mr. Douglas Hogg: I understand from the Commissioner of Police of the Metropolis that there were 2,607 police officers on duty on 8 October and 2,578 on 9 October. The total additional cost was £206,959.

Airport Police Officers (Sidearms)

Mr. Tony Banks: To ask the Secretary of State for the Home Department when it became routine for police officers at *(a)* Heathrow and *(b)* Gatwick publicly to display sidearms; why this was considered necessary; and who authorised this practice.

Mr. Douglas Hogg: Armed police officers at Heathrow Airport have carried unconcealed sidearms while dressed in shirt sleeve order for several years, and, since 14 December 1987, while dressed in full uniform. At Gatwick airport sidearms have been carried unconcealed by officers in shirt sleeve order since 16 October 1987. In each case the decision was taken by the chief officer of police (the Commissioner of Police of the Metropolis and the chief constable of Sussex constabulary respectively) in accordance with his responsibility for all operational matters, for the greater comfort of the officers concerned, and in order to render their sidearms more accessible in an emergency.

Party Conferences (Policing Costs)

Mr. Tony Banks: To ask the Secretary of State for the Home Department what information he has regarding the policing costs associated with the 1988 annual conference of *(a)* the SDP, *(b)* the Liberal-Democrats, *(c)* the Labour party, *(d)* the Conservative party and *(e)* any other political party in respect of which additional policing costs arose.

Mr. Douglas Hogg: I understand from the chief constables of Devon and Cornwall and of Lancashire that there were no additional policing costs associated with the 1988 annual conference of the Social Democratic party and that the estimated additional costs of policing the Social and Liberal Democrats' conference and the Labour party conference were £400 and £61,000 respectively.

I also understand from the chief constable of Sussex that it is anticipated that the additional costs of policing the 1988 Conservative party conference will be £1·4 million, subject to the finalising of the accounts.

There is no information held centrally to suggest that any significant additional policing costs are incurred for other political party conferences in England and Wales.

"Dispensing with the Services of a Police Officer"

Sir Eldon Griffiths: To ask the Secretary of State for the Home Department what consultations he had with the Police Federation before the document, "Dispensing with the Services of a Police Officer", was made public.

Mr. Douglas Hogg: The document to which my hon. Friend refers was not produced or made public by my Department.

Prisoners (Food)

Mr. Latham: To ask the Secretary of State for the Home Department whether he will set out in tabular form, for the latest convenient date, the expenditure per head for inmates in each of Her Majesty's prisons in respect of food per week; and how this relates to the actual budget.

Mr. Douglas Hogg: The quantity of food for inmates is determined by reference not to cash budgets but to dietary scales designed to meet agreed nutritional requirements. Ingredients are supplied primarily from centrally negotiated contracts and from prison farms and gardens. The notional cost per inmate per week totalled £6·45 in the year ended 31 March 1988.

Neighbourhood Watch

Mr. Redmond: To ask the Secretary of State for the Home Department if he will list, for each south Yorkshire police division *(a)* the date on which the first neighbourhood watch schemes were established, *(b)* the crime rate on that date and *(c)* the crime rate on the most recent available date.

Mr. John Patten: I understand the first neighbourhood watch schemes were established in each South Yorkshire police division are as follows:

Division	*Date*	*Location*
Rotherham	January 1984	Firbeck Village
West Bar (Central Sheffield)	August 1984	Arbourthorne Estate
Barnsley	April 1985	Greenmoor Village
Doncaster	June 1985	Clayton Village
South Sheffield	October 1985	Alderson Place
North Sheffield	June 1986	Phenistone Road

I regret that information about crime rates on particular dates cannot be provided.

Mr. Redmond: To ask the Secretary of State for the Home Department how many neighbourhood watch schemes there are in each South Yorkshire police division; and by what percentage the crime rate has fallen or risen since these schemes began.

Mr. John Patten *[pursuant to his reply, 20 July 1988 c. 642]:* I regret that my answer was incomplete. The full text of the reply is as follows:

I understand from the chief constable of South Yorkshire that the first neighbourhood watch schemes in his police force area was established in January 1984 and that by the end of June 1988 the total number of schemes had increased to 718. The following table shows the number of schemes in each police division:—

Division	*Number of Neighbourhood Watch Schemes*
Doncaster	152
Barnsley	76
Rotherham	63
West Bar	44
South Sheffield	241
North Sheffield	142
Total	718

Each of these schemes was established at different times between January 1984 and 1988 and it is not possible to state by what percentage the crime rate has fallen or risen since each scheme began.

However, we welcome the fact that total recorded crime in the South Yorkshire police force area in the first six months of this year has fallen by 4·8 per cent. and residential burglaries by 10·2 per cent. compared with the same period in 1987.

Departmental Programmes

Mr. George: To ask the Secretary of State for the Home Department how much has been spent by his Department in each of the past five years on the evaluation of departmental programmes; and what proportion this constitutes of *(a)* the amount allocated for evaluation and *(b)* the Department's total budget.

Mr. Hurd *[holding answer 28 July 1988]:* It is not possible to identify separately the resources involved in the evaluation of my Department's programmes.

Entry Clearance

Mr. Madden: To ask the Secretary of State for the Home Department how many applications for entry clearance from *(a)* wives, *(b)* husbands, *(c)* fiancés and *(d)* fiancées made at British posts on (1) New Delhi, (2) Bombay, (3) Calcutta, (4) Madras, (5) Dhaka, (6) Islamabad, (7) Karachi and (8) Colombo for each quarter since January 1987 were (A) received, (B) granted and (C) refused; how many refusals at each post were (i) wholly and (ii) partly because the visa officer was not satisfied that the primary purpose of the marriage was not immigration; how many refusals at each post were (I) wholly and (II) partly because the visa officer was not satisfied that the couple could support and accommodate themselves without recourse to public funds; what was the refusal rate at each post; and what percentage of those refusals were (y) wholly and (z) partly on primary purpose grounds.

Mr. Renton *[holding answer 20 July 1988]:* Information for the Indian sub-continent for the whole of 1987 and, where available, for the first quarter of 1988 is given in the tables. Where the numbers are small, the figures for individual posts have been combined. In order to keep down the cost, only annual data for 1987 have been given. In any case, information on refusals which takes account of successful appeals is not compiled for periods shorter than 12 months. Corresponding information for Colombo is not available.

Table 1 Husbands, fiances, wives and fiancees in the Indian sub-continent applying for entry clearance for settlement in the United Kingdom
Number of persons or percentage

Post	Husbands		Fiances		Wives		Fiancees	
	1987	1988 1st quarter	1987	1988 1st quarter	1987	1988 1st quarter	1987	1988 1st quarter

[1] After taking account of successful appeals.
[2] Five or fewer, or ½ per cent. or less.
[3] Refused rate based on fewer than 15 applications.
— Nil.

Public Expenditure

Mr. Worthington: To ask the Secretary of State for the Home Department if he will publish a table in the *Official Report*, in the same format as his written reply of 25 July, on receipts to his programme classified as charges in respect of his programme expenditure over the years 1982-83 to 1990-91, and consistent with the answer of 27 May, *Official Report*, columns *375-76*, indicating the receips in respect of running costs expenditure, together with a supplementary analysis indicating, separately, the amounts of receipts in respect of programme expenditure and of running costs expenditure estimated to have been met from other public expenditure programmes.

Mr. Hurd *[holding answer 28 July 1988]:* The following figures, which are consistent with those given by my right hon. Friend the Chief Secretary to the Treasury on 29 July at columns *747-48*, relate to receipts which offset running cost expenditure for which the Home Ofice is responsible. The Home Office receives no receipts classified as being paid from other public expenditure programmes in respect of running costs. Figures for receipts in respect of programme expenditure paid from other public expenditure programmes could be provided only at disproportionate cost.

Social Science Research

Mr. George: To ask the Secretary of State for the Home Department how much has been spent by his Department in each of the past five years on social science research; what percentage this constitutes of total departmental expenditure and of his Department's research budget; and

how much of the research has been undertaken *(a)* within his Department, *(b)* by universities and polytechnics and *(c)* by independent research organisations.

Mr. Hurd *[holding answer 28 July 1988]:* The information is not available in the form requested. That available and given in the table relates to expenditure not only on social science research but on research on humanities. It also includes research performed elsewhere in central Government. Expenditure on social science and humanities research is expressed as a percentage of total cash-limited Home Office expenditure.

Year	*Expenditure on social science and humanities research (£m)*	*Percentage total expenditure*	*Percentage research budget (social science and humanities, science and technology)*	*Percentage undertaken (1) within Department*	*(2) by Universities and polytechnics*	*(3) by independent[1] research organisations*
1982-83	3·1	0·45	25·6	51·6	12·9	11·9
1983-84	3·0	0·38	24·6	56·7	13·3	2·7
1984-85	2·9	0·34	22·0	62·0	17·2	4·8
1985-86	2·8	0·31	20·4	64·3	21·4	1·8
1986-87	2·3	0·23	17·3	56·5	21·7	1·3

[1] Industrial research associations, non-industrial research institutes.

Adoption

Mr. Thurnham: To ask the Secretary of State for the Home Department what information he has as to how many babies were brought into the United Kingdom for adoption by British couples during 1987; and if he will list the countries of origin.

Mr. Renton *[holding answer 29 July 1988]:* Information is not available in the form requested, as the statistics collected on passenger admissions do not separately identify children who come to the United Kingdom for adoption. The available information—which may not be entirely complete—is that 52 children were granted settlement in the United Kingdom in 1987 on the basis of their adoption by a person already settled here. The nationalities are shown in the table:

Acceptances for settlement by reason of adoption

Nationality	*Number of children of each nationality*
India, Pakistan	7
Canada, Korea, Philippines, Sudan, Sweden, Thailand, USA	2
Bolivia, Brazil, Chile, Colombia, Egypt, El Salvador, German Federal Republic, Ghana, Guyana, Jamaica, Kenya, Mauritius, Morocco, New Zealand, Norway, Paraguay, Peru, Poland, Trinidad and Tobago, Venezuela, Yugoslavia, Zimbabwe, Other	1
	[1]52

[1] Includes one child whose nationality is not recorded.

General Practitioners (Misuse of Drugs)

Mr. Rathbone: To ask the Secretary of State for the Home Department how many cases there have been of general practitioners being brought before the misuse of drugs tribunal; and how many of those have been found guilty for each of the most recent five years for which records are available.

Mr. Douglas Hogg *[holding answer 29 July 1988]:* The number of cases of general practitioners considered by the misuse of drugs tribunal for each of the years 1983-87 is as follows:

Year	*Number of cases*
1983	3
1984	3
1985	1
1986	3
1987	3

In all but one of these cases my right hon. Friend the Home Secretary made, in th light of the tribunal's findings, a direction under section 13 of the Misuse of Drugs Act 1971, prohibiting the practitioner from prescribing certain controlled drugs. In the remaining case, representations by the practitioner against a proposed direction are shortly to be considered by the misuse of drugs advisory body.

Passports

Mr. Franks: To ask the Secretary of State for the Home Department if he will give the number of employees at the passport office and the number of passports issued in 1979, 1981, 1983, 1985 and 1987.

Mr. Renton *[pursuant to his reply, 23 June 1988, c. 679]:* I regret that my answer contained incorrect information. The answer as it should have appeared is as follows:

The information, covering the six United Kingdom passsport offices, is as follows:

Year	*Number of passports issued*	*Highest number of staff in post in any month[1]*	
		Permanent staff	*Casual staff*
1979	1,809,091	901	182
1981	1,768,538	996	119
1983	1,979,740	949	167
1985	1,799,043	938	111
1987	2,041,220	961	232

[1] Includes headquarters staff

Child Abuse

Mr. Redmond: To ask the Secretary of State for the Home Department what are the figures for each of the last five years, broken down by sex, of persons convicted of child abuse; and of the sentences given by the courts, in England and Wales.

Mr. John Patten *[pursuant to his reply, 28 July 1988, c. 420]*: I am now able to provide some data for 1986. Comparable information for earlier years could be provided only at disproportionate cost, while figures for 1987 are not yet available.

The tables bring together the readily available information on the number of defendants found guilty of certain sexual offences and offences of violence against children. For other types of offence it is not possible from the results of court proceedings held centrally to distinguish the age of the victim. As the hon. Member will see, nearly half of the persons convicted of sexual offences received sentences of immediate custody.

Table 1: Persons found guilty and sentenced at all courts for sexual offences where the victim is known to have been of 16 years of age or under

England and Wales 1986 — *Number of persons*

Offence description	*Sex*	*Total found guilty*	*Total for sentence*	*Absolute/ conditional discharge*	*Probation/ supervision order*	*Fine*	*Community service order*	*Fully suspended sentence*	*Immediate custody*	*Otherwise dealt with*

SOCIAL SECURITY

Transitional Arrangements

Mrs. Wise: To ask the Secretary of State for Social Security how many local offices of his Department suspended the normal visits undertaken to review claims (LO2 visits) during the transitional period of the introduction of the new social security arrangements.

Mr. Peter Lloyd: The table gives the number of local offices suspending one visit or more during each of the four-week periods of the exercise to convert supplementary benefit cases to income support:

	Four-week period ending				
	15/12/87	*12/1/88*	*9/2/88*	*8/3/88*	*[1]8/4/88*
Number of offices suspending routine visits	41	51	52	48	32
Number of offices suspending out of course visits	271	264	284	291	289

[1]This period is slightly longer than four weeks in order to coincide with the end of the supplementary benefit scheme.
(Note: The same office may appear in both categories of visit and in each four-week period.)
(Source: Internal management information returns.)

Conductive Education

Mr. Nellist: To ask the Secretary of State for Social Security if he will make a statement on the visit to the Peto institute in Hungary, by the Minister of State, the hon. Member for Chelsea (Mr. Scott), in mid-September; whether the visit resulted in administrative easement of benefit transferral for the United Kingdom families concerned; and what proposals he now has for further support and development of conductive education in the United Kingdom.

Mr. Scott: I visited the Peto institute during a short visit to Hungary from 18-21 September, and I was very impressed by the skill and dedication of Dr. Hari and her staff. I met some of the United Kingdom families whose children were attending the Peto institute, and listened to their concerns. I also saw two examples of the use of conductors in Hungarian hospitals and had discussions with Hungarian Government Ministers.

Following an earlier visit by officials, we had already made special arrangements for co-ordinating the handling of claims by the United Kingdom families for attendance allowance, invalid care allowance and mobility allowance. The arrangements are intended to reduce the need for inquiries and to enable benefits to continue in payment abroad without interruption. Additionally, information already obtained for attendance allowance purposes will be used, wherever possible, for deciding claims for mobility allowance for children reaching the age of five, to avoid the requirement to return to the United Kingdom for medical examination.

I have seen many examples of excellent practice in this country by health and education professionals working with disabled children. I welcome the work of the Birmingham Foundation for Conductive Education, in piloting the training of United Kingdom conductors, in association with the Peto institute. I shall await with great interest the findings of the associated research project, to which Government have contributed substantial funding. I also welcome the interest shown by health and education professionals in this country in aspects of conductive education and I hope that my visit will lead to more exchanges of good practice between the United Kingdom and Hungary. All these developments have the potential of adding to the range of options open to parents of motor-disordered children in the United Kingdom.

Benefits

Mr. Pike: To ask the Secretary of State for Social Security if he will publish a table showing the numbers of unemployed people in Burnley by entitlement to benefit for the years 1981, 1984, 1986 and 1987 and distinguishing between the following *(a)* unemployment benefit only, *(b)* supplementary and unemployment benefit, *(c)* supplementary benefit only, and *(d)* no benefit.

Mr. Peter Lloyd: The numbers of people registered as unemployed in Burnley by entitlement to benefit for the years [1]1982, 1984, 1986 and 1987 were:

	Unemployment benefit only	*Supplementary benefit and unemployment benefit*	*Supplementary benefit only*	*No benefit[2]*
February 1982	2,158	472	2,192	759
February 1984	1,490	428	3,220	848
November 1986	1,400	371	2,897	961
November 1987	870	195	2,422	807

Notes:
[1] Data are normally obtained as at November of each year. However as a result of industrial action during 1981 and 1984 it has not been possible to give data for those dates. Instead figures as at February 1982 and 1984 have been provided.
[2] The only figures available are for those who are "signing" at the unemployment benefit office to receive National Insurance credits.

Multiple Sclerosis

Mr. Kirkwood: To ask the Secretary of State for Social Security if he will list in the *Official Report*, for the past five years for which figures are available, the number of applications for mobility allowance received by medical appeal tribunals in the United Kingdom from applicants who suffered from multiple sclerosis, as a percentage of the total applications heard by the tribunals in the same period, together with the percentage of applications from multiple sclerosis applicants during the same period whose appeals were upheld.

Mr. Scott: I regret that it is not possible to provide information about the number of claims received from people suffering from specific diagnostic conditions.

Social Security Payments

Mr. Menzies Campbell: To ask the Secretary of State for Social Security (1) what was the total value of *(a)* grants, and *(b)* loans, given by social security offices to persons living within the Fife North-East area over the last six months; and what was the total value of single payments made by those offices to persons living within the Fife, North-East area over the same period in 1987;

(2) what was the number of applications received by social security offices from persons within the Fife North-East area for a grant or loan from the social fund during the last six months and the proportion of these for which a grant or loan was given;

(3) what was the number of applications for single payments from persons in the Fife North-East area over the six months period from April 1987; and what was the proportion of these for which a payment was granted.

Mr. Peter Lloyd: Fife North-East constituency is covered by the Department's offices at Dundee East, Leven and Perth, but their boundaries are not conterminous. Information about social fund applications and awards from the social fund since 11 April 1988 is held in the Library.

Information about single payment expenditure is not available monthly. However, the available information for the 24-week period ending on 22 September 1987 is shown in the table.

Local Office	*Number of SP claims*	*Number of SP awards*	*Percentage successful awards*	*Total payments £*
Dundee East	8,919	4,538	50·88	346,712
Leven	3,368	1,622	48·16	119,946
Perth	2,824	1,532	54·25	120,934

Pensions

Mr. Barry Jones: To ask the Secretary of State for Social Security if he will propose Community legislation to oblige member states to introduce equality in respect of the ages at which men and women became entitled either to state or occupational pensions; and if he will make a statement.

Mr. Peter Lloyd: The current draft directive on equal treatment would require equal pension ages for men and women within both state and occupational pension schemes. Negotiations on this draft directive are continuing.

Disabled People (OPCS Report)

Mr. Alfred Morris: To ask the Secretary of State for Social Security on what date he received from the Office of Population Censuses and Surveys the report on the financial situation of people with disabilities; on what date he intends to publish the report; and if he will make a statement.

Mr. Scott: The complete text of the OPCS report on the financial circumstances of disabled adults living in private households was received by the Department at the end of August. On the date of publication of the report I refer the right hon. Member to my reply to the hon. Member for Derby, South (Mrs. Beckett) on 7 June at column *575*.

Family Credit

Mr. Wigley: To ask the Secretary of State for Social Security if he has any plans to seek to improve the workings of the family credit system with regard to the requirement to submit audited accounts; what representations he has received concerning the need to modify current regulations; and if he will make a statement.

Mr. Peter Lloyd: There is no requirement for self-employed persons to submit any accounts in support of a claim for family credit. The relevant information about business receipts and expenses may be provided by completing a form supplied by my Department or by submitting accounts, as the person wishes. The legislation provides that, for accounts to be acceptable for this purpose, they have to be maintained and audited by a qualified auditor. Representations have been received from claimants and their financial advisers that this latter condition is unduly restrictive.

We intend, shortly, to lay amending regulations to relax the rules on the acceptability of accounts, though without changing the present basis of assessing earnings from the business by reference to gross receipts and expenses allowable under family credit legislation.

Mr. Wigley: To ask the Secretary of State for Social Security how many families were in receipt of family credit payments during the period April to June, inclusive; and how many of thesed were paid on the basis of submitted audited accounts.

Mr. Peter Lloyd: The number of families in receipt of family credit was:

194,000 at the end of April
215,000 at the end of May
236,000 at the end of June

None of these was being paid on the basis of submitted audited accounts.

Mr. Wigley: To ask the Secretary of State for Social Security how many families were in receipt of family income supplement in March; and how many families were in receipt of family credit in September.

Mr. Peter Lloyd: Around 205,000 families were receiving family income supplement in March. Around 242,000 families were receiving family credit at the end of September, but at that stage the situation was distorted by the effects of the postal dispute which had held up the receipt and clearance of claims. Otherwise, on the basis of claims subsequently received, the figure could have been expected to be higher than at the end of August when over 255,000 families were receiving family credit.

Income Support

Dr. Michael Clark: To ask the Secretary of State for Social Security whether he has any plans to change the arrangements for paying income support to homeless people.

Mr. Scott: As a result of monitoring the operation of the new social security scheme, we have concluded that there is scope for improving the arrangements for helping homeless people. We are therefore taking the following steps.

First, we are issuing further guidance to local offices to ensure that claimants are paid their full income support entitlement as soon as possible after the start of a claim. This will draw attention, in particular, to the power to pay some benefit in the first week of a claim, including a full week's board and lodging payment if this falls due during the period covered.

Secondly, we will be expanding the guidance in the social fund manual to ensure that officers dealing with crisis loan applications are aware of the potential risks to health and safety that may be faced by the homeless. Crisis loans may be available in advance of the normal income support pay day to meet accommodation charges, including the payment of rent in advance.

Finally, we are extending the direct payment arrangements. Existing provisions allow for the accommodation charge within income support to be paid direct to a hostel from the start of a claim if the hostel is akin to a resettlement unit or provides facilities for alcoholics or drug addicts. We will be extending these arrangements to cover all hostels. This should help more claimants to secure accommodation.

We continue to believe that payment of income support in arrears is the most sensible arrangement for the majority of people below pension age. This is in line with the way wages and other benefits are normally paid.

In addition, landlords providing board and lodging accommodation were informed of the new payment arrangements before income support was introduced and our information shows that, in practice, most are accepting payment of accommodation charges in arrears. Claimants planning to stay in this type of accommodation are provided with a letter for the landlord confirming that a claim for benefit has been made.

We are, of course, continuing to monitor the effects of the new scheme.

Dorsal Column Stimulators

Mrs. Wise: To ask the Secretary of State for Social Services in the area of which regional health authorities dorsal column stimulators for pain relief have been fitted in the most recent period for which figures are available.

Mrs. Currie: I have been asked to reply.

We do not hold this information centrally.

NHS Laundry and Cleaning (Accidents)

Mr. Meacher: To ask the Secretary of State for Social Services what has been the rate of (i) fatal accidents, (ii) serious, non-fatal accidents, and (iii) minor accidents in *(a)* National Health Service laundries, *(b)* National Health Service cleaning, *(c)* privatised laundries, and *(d)* privatised cleaning in the last two years.

Mr. Mellor: We do not collect this information centrally.

Details of injuries are maintained by the Health and Safety Executive under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 1985.

Housing Benefit

Mr. Clay: To ask the Secretary of State for Social Services what is his latest estimate of the increase in the number of claimants and the level of expenditure on housing benefit which will result from the introduction of the community charge.

Mr. Scott *[holding answer 17 June 1988]:* The information requested is given in the table.

Caseload and costs of the community charge benefit scheme—latest estimates

	Community charge benefit			*Rate rebates*	
	caseload thousands	*(individuals) thousands*	*Cost £ million*	*caseload thousands*	*cost £ million*
England	6,860	(9,380)	1,525	5,115	1,265
Scotland	780	(1,040)	165	600	160
Wales	440	(600)	60	295	45
Great Britain	8,080	(11,020)	1,750	6,015	1,470

Notes:

1. The caseload figures in columns one and four are take-up estimates of numbers of claimants. They thus treat both partners in a married or unmarried couple as one. Column two gives the estimated number of individuals who would receive community charge benefit.
2. The rate rebate figures are estimates for 1988-89.
3. The community charge benefit figures are based on a maximum benefit of 80 per cent. of liability and a prescribed taper of 15 per cent. The current housing benefit rules for assessing the levels of the applicable amounts, the treatment of capital and income and a minimum benefit of 50p per week per claim have been used throughout. The figures are based on the most recent illustrative estimates of what community charges would have been in 1988-89 had they been in operation.

HEALTH

Speech Therapy

Mr. Ashley: To ask the Secretary of State for Health if he will publish the results of the recent study commissioned by the Department of Health and Social Security on the incidence and prevalence of communications and language handicaps and the need for speech therapy.

Mr. Mellor: I expect the report to be published by the researcher when it is complete.

Mr. Ashley: To ask the Secretary of State for Health what measures he is taking to ensure that the current National Health Service structure for speech therapists is retained if local education authorities are providing funding for speech therapy.

Mr. Mellor: We do not believe that the provision of funds for speech therapy by local education authorities

would undermine the current National Health Services structure for speech therapists. Health authorities remain responsible for the provision of speech therapy services and there is in general good co-operation between health authorities and local educational authorities in the provision of services for children.

Mr. Ashley: To ask the Secretary of State for Health if he will list the district health authorities which have a specialist speech therapist in post.

Mr. Mellor: We do not hold this information centrally, but under the new flexible pay and grading structure introduced on 1 January this yar, it is possible for speech therapists in most grades to be employed in a specialist field.

Mr. Ashley: To ask the Secretary of State for Health what plans he has to provide central funds for the provision of speech therapy services.

Mr. Mellor: None.

Mr. Ashley: To ask the Secretary of State for Health what are the respective duties of *(a)* education authorities and *(b)* health authorities to provide funds for speech therapy services.

Mr. Mellor: Speech therapy is one of the services which it is the duty of health authorities to provide under the National Health Service Act 1977. Local education authorities have no duty to provide funds for speech therapy services, but will have the power to do so when a recent amendment to the Education Act 1981 comes into effect on 1 November 1988.

Mr. Ashley: To ask the Secretary of State for Health what measures he intends to take to increase the number of specialist speech therapists who work with deaf children and adults.

Mr. Mellor: This is a matter for individual health authorities and speech therapy managers.

Mr. Ashley: To ask the Secretary of State for Health what measures he intends to take to increase the minimum and maximum salary levels of speech therapists following the claim submitted on 1 April.

Mr. Mellor: Pay is a matter for negotiation in the appropriate Whitley council. I understand that at a joint meeting on 27 June National Health Service management made an offer of 5·5 per cent. increase on all points of all scales. This offer, which includes salaries ranging from £8,704 to £20,263, has been rejected. Negotiations are continuing on the offer and a further meeting is to be arranged.

Mr. Ashley: To ask the Secretary of State for Health (1) how many specialist speech therapists in the United Kingdom work with deaf children and adults;

(2) how many children had speech therapy identified as a special need on special educational statements; and if he will list the number of these children that receive therapy at the level required.

Mr. Mellor: This information is not available centrally.

NHS (Expenditure)

Ms. Harman: To ask the Secretary of State for Health if he will provide a breakdown of estimates given in his reply to the hon. Member for Livingston (Mr. Cook) on 9 March, *Official Report*, columns *254-56*, showing spending by age separately on *(a)* the hospital service and *(b)* community health services.

Mr. Mellor: This information is not available.

Mentally Ill People

Ms Harman: To ask the Secretary of State for Health (1) what progress has been made in meeting the 1991 targets for provision for mentally ill people outlined in Command 6233, "Better Services for the Mentally Ill"; and what changes he expects to occur in the next three years;

(2) what progress has been made to meet the 1991 targets for provision for mentally ill people, by health and social services authority, outlined in Command 6233, "Better Services for the Mentally Ill"; and what changes he expects to occur in the next three years.

Mrs. Currie: The Command Paper "Better Services for the Mentally Ill", published in 1975 by the then Labour Government, did not set illustrative targets.

Over the next three years we expect to see a continuing development of services, though the pace of change will depend on local needs and opportunities.

Mentally Handicapped People

Ms. Harman: To ask the Secretary of State for Health (1) what progress has been made in meeting the 1991 targets for provision for mentally handicapped people outlined in Command 4683, "Better Services for the Mentally Handicapped"; and what changes he expects to occur in the next three years;

(2) what progress has been made in meeting the 1991 targets, by health and social services authority, for provision for mentally handicapped people outlined in Command 4683, "Better Services for the Mentally Handicapped"; and what changes he expects to occur in the next three years.

Mrs. Currie: The "targets" set in the 1971 White Paper were intended to be guidelines to the statutory authorities on the scale of provision necessary to provide better services for mentally handicapped people. The movement to community care and changes in thinking on the best form of provision have now made the guidelines less useful.

Substantial progress has been made in expanding provision for mentally handicapped people, including support to the majority of mentally handicapped people who live at home, and increased residential provision for those who cannot, while the numbers living in NHS hospitals continue to fall. The provision of local authority day services has also increased. We expect this progress to continue.

Between 1976 and 1986 there was a decrease of 14,800 in the number of NHS resident patients from 49,000 in 1976 to 34,200 in 1986. During the same period there was an increase of 12,600 places in residential homes from 11,800 to 24,400 and of 13,800 places in adult training centres and special needs units from 36,600 to 50,400.

Relevant figures are available in the Department's various statistical publications on health and personal social services, the most recent of which is the "Statistical Bulletin on Personal Social Services Mental Handicap Provision," copies of which are in the Library.

Home Helps

Ms. Harman: To ask the Secretary of State for Health what estimates his Department has about the distribution of the work of home helps between their various client groups; and if he will indicate whether this has changed over the last 10 years.

Mr. Mellor: This information is no longer collected centrally. However, information collected by the Chartered Institute of Public Finance and Accountancy and published in "Personal Social Services Statistics, 1986-87 Actuals" contains details of the home help service for the week beginning 10 November 1986. Information for the year ending 31 March 1977 was published in "Health and Personal Social Services Statistics for England, 1978". Copies are available in the Library.

The available information indicates that in both 1977 and 1986 the large majority of people receiving home help were aged 65 years and over, but it is not possible to deduce detailed trends.

Ms. Harman: To ask the Secretary of State for Health what was the number of home helps in England in each local authority; and what this figure represents per 1,000 persons aged 65 plus years and per 1,000 persons aged 75 plus years, in the latest available year.

Mr. Mellor: The latest available information for each local authority in England is given in the table. The figures do not indicate the volume of service actually provided to people in these age groups. The exact proportion of the service which goes to particular age groups is not known.

Number of home helps (expressed as whole time equivalents) and rate per thousand population aged 65 years and over and per thousand population aged 75 years and over, by local authority, England, 1986

	Number (wte)	*Rate per thousand population*	
		Aged 65 years and over	*Aged 75 years and over*
Cleveland	620	8·8	22·8
Cumbria	553	6·9	16·4
Durham	752	8·3	20·8
Northumberland	450	9·5	23·0
Gateshead	358	11·1	27·6

Notes:

[1] Figures exclude home help organisers and assistant and trainee home help organisers.

[2] Figures for Isles of Scilly are included with Cornwall.

[3] Figures are provisional.

Residential Homes for the Elderly

Ms. Harman: To ask the Secretary of State for Health (1) what was the ratio of places in residential homes for the elderly to the population aged 65 plus years in England and in each local authority in 1979 and the latest available year;

(2) what was the number of places in voluntary, local authority and private homes for the elderly in England for each of the last 10 years; and how these relate to the population aged 65 plus years and 75 plus years.

Mr. Mellor: Information available centrally prior to 1985 does not separately identify residential homes solely for elderly people. The information given in the tables relates to places in homes for elderly and younger physically handicapped people. Information collected on places does not identify provision for specific age groups.

Number of places in local authority, voluntary and private residential homes for elderly and younger physically handicapped people in England, by local authority, 1979 and 1986, and rates per 1,000 population aged 65 and over

Meals Service

Ms. Harman: To ask the Secretary of State for Health what was the number of meals provided, for each of the last 10 years, by the meals service; how many were provided at home and how many elsewhere; and if he will relate these figures to the population aged 65 plus years and 75 plus years in each year.

Mr. Mellor: The information is given in the table. The figures do not indicate the actual provision to people in these age groups. The exact proportion of meals provided to each age group is not known.

1982-83	43·836	15·568	35·51
1983-84	47·728	17·439	36·54
1984-85	51·447	19·051	37·03
1985-86	54·805	20·634	37·65
1986-87	59·661	22·834	38·27

Notes:

1. Local authorities have discretion whether, and to what extent, to charge for meals. The Government's view is that they should seek to recover the economic cost of providing meals where this does not cause hardship. Where someone represents to their local authority that they cannot afford the charge, the local authority has a duty to reduce it to the amount that they consider it reasonable for the recipient to pay.
2. Gross expenditure is wage costs, supplies and administrative expenses minus other income (eg. health authority contributions to jointly financed schemes).
3. Data relate to meals on wheels and meals served in day centres for elderly people. Data are not collected centrally about meals which may be provided at other types of day centre.

Meals on wheels service—England £ million (Cash)

	Gross expenditure	Fees and charges	Fees and charges as percentage of expenditure

Community Health Councils

Mr. Kirkwood: To ask the Secretary of State for Health what funding his Department has made available to community health councils in each of the last five years for which figures are available.

Mr. Mellor: The Department does not separately fund community health councils, the expenses of which are met from the overall allocations made to health authorities.

Following are figures of revenue expenditure incurred by community health councils and derived from the summarised annual accounts of health authorities in England for the latest available five years:

Year	£000
1982-83	5,787
1983-84	6,099
1984-85	6,341
1985-86	6,784
1986-87	7,165

Nurses (Back Injuries)

Mr. Kirkwood: To ask the Secretary of State for Health what information he has, for each of the last five years for which figures are available, as to how many nurses have suffered back injuries sustained at work; and how many of those have needed surgery as a result.

Mr. Mellor: None.

Drug Prescribing

Sir Michael McNair-Wilson: To ask the Secretary of State for Health what arrangements are made for a registered medical practitioner to participate on a named patient basis.

Mr. Mellor: Under the Medicines Act 1968, doctors are free to be supplied with and to prescribe any unlicensed drug on a named patient basis if they judge it to be in the patient's best interest.

Medical Accidents

Sir Michael McNair-Wilson: To ask the Secretary of State for Health under what circumstances other than as a result of litigation a health authority compensates the victims of a medical accident.

Mrs. Currie: There are two situations, other than as a result of litigation, in which a health authority may compensate the victim of a medical accident. Firstly, where an authority is potentially legally obliged to do so. This would occur where an authority is advised by its solicitors that, in the particular circumstances of a case, civil proceedings, if issued, would be indefensible and that liability should be admitted and a basis for compensation agreed or, alternatively, that payment should be offered "without prejudice" but in full satisfaction of the potential claim. Secondly, in cases where, although under no legal obligation to do so, an authority nevertheless considers that, in the circumstances of the case, compensation should be offered on an ex gratia basis.

Nurses and Midwives (Pay Award)

Mr. Gordon Brown: To ask the Secretary of State for Health if he will estimate the full year cost for 1989-90 of the nurses and midwifery staff pay award.

Mr. Mellor: We estimate the cost of this year's pay award to nurses in the hospital and community health services in England will be £731 million. The extra £110 million my right hon. and learned Friend the Secretary of State announced on 13 October together with the additional funding provided in April means we have met the cost of the award in full.

Physiotherapists

Mr. McCrindle: To ask the Secretary of State for Health how many physiotherapists have been trained in each of the past five years at Guys' and St. Thomas' schools of physiotherapy; how many physiotherapists will be trained at these schools in each of the next three years; and if he will make a statement.

Mr. Mellor: The intake of student physiotherapists to the two schools is set out in the table:

	Guys'	St. Thomas'
1984	38	24
1985	30	24
1986	30	24
1987	30	24
1988	30	24

The South East Thames regional health authority, which is responsible for managing physiotherapy training arrangements in the region, plans to cease intakes to these schools as from 1989, when new courses will begin at King's college, University of London and Brighton polytechnic.

Mr. McCrindle: To ask the Secretary of State for Health (1) if he will estimate the number of unfilled physiotherapy posts in each regional health authority in each of the past five years; and if he will make a statement;

(2) if he will estimate the number of unfilled physiotherapy posts in the four London regional health authorities over the past five years; and if he will make a statement.

Mr. Mellor: We do not have information on the number of physiotherapy posts vacant against funded establishments on a regional basis. However, the results of the most recent sample surveys of health authorities suggest that nationally about 3·6 per cent. of funded posts for physiotherapists are unfilled after three months.

Mr. McCrindle: To ask the Secretary of State for Health what projections he has of the availability of physiotherapists in the London area over the next five and next 10 years; if these take into account the effect of the development of a new school in Eastbourne and subsequently at Brighton polytechnic; and if he will make a statement.

Mr. Mellor: We await the report of a joint working party recently set up by the Manpower Planning Advisory

Group (which advises regional chairmen and the National Health Service management board) and the chartered Society of Physiotherapy which is urgently undertaking a reveiw of the short-term manpower situation in the profession. The results will be available by early next year. In spring 1989 we shall be issuing guidance on a supply strategy for the next five to 10 years. This work will take account of any particular supply problems of the London area and of proposals for new schools such as that proposed at Brighton polytechnic. Officials are in close touch with the region concerned on the details of this proposal.

Resource Management Initiative

Mr. Anthony Coombs: To ask the Secretary of State for Health if he has any plans to extend the resource management initiative.

Mr. Mellor: The resource management initiative is a NHS management board and a joint consultants committee jointly sponsored initiative. The pilot projects will be subject to an interim evaluation this October and a formal evaluation in October 1989. The pilots have already demonstrated that certain elements—for example, the introduction of nurse management information systems and the feeding back to managers and clinicians of existing information—are areas that the majority of acute hospitals could usefully begin to introduce. We are considering how best to programme an extension of the initiative over the country as a whole.

Eyesight Tests

Mr. Jim Marshall: To ask the Secretary of State for Health if he will review current proposals to introduce charges for eyesight tests.

Mr. Mellor: I have nothing to add to the reply given to the hon. Member for Peckham (Ms. Harman) by my right hon. Friend the Secretary of State for Social Services on 22 July 1988, at column *896*.

Child Care

Mr. Corbyn: To ask the Secretary of State for Health what is the total number of children, by local authority area in *(a)* local authority day nurseries and *(b)* with child minders, for each year since 1983.

Mrs. Currie: We do not have the information in the form requested. Figures for children on the registers of day nurseries provided by local authorities and places available with registered child minders in each local authority in England are published annually in "Children's Day Care Facilities" (A/F/6), copies of which are in the Library.

Hospital Beds and Facilities

Dr. Glyn: To ask the Secretary of State for Health what action he proposes to take to assist doctors in the London area endeavouring to follow the policy of trying to get beds and facilities for their patients outside their own catchment area, who are being resisted by hospital administrators; and if he will make a statement.

Mrs. Currie: General practitioners are free to refer their patients to any consultant whom they consider is best able to treat them. Equally, consultants have the right to refuse to accept such a referral for any reason. Over the years this right has been extended to include consultants who agree with authorities locally that certain types of patients, usually in the non-acute services—for example, mental illness—will benefit if they are treated within certain catchment areas, normally that within which the patient lives. Consultants may also agree that they will accept referrals from GPs in other districts/regions only if the patients concerned have particular need of their specialist skills.

Health Education Service (Nottingham)

Mr. Allen: To ask the Secretary of State for Health if his Department will assist the Nottingham district health authority to prevent further reductions in the health education service to schools.

Mrs. Currie: The allocation of funds to Nottingham health authority is a matter for Trent regional health authority. The district must itself decide how best to allocate the resources available to it.

Departmental Services

Mr. Allen: To ask the Secretary of State for Health, pursuant to the answer of 29 July, *Official Report*, column *779*, which proposed changes to services his Department treats as requiring formal public consultation.

Mrs. Currie: The requirements for public consultation are laid down in the Community Health Councils Regulations 1985 (SI 1985 No. 304). These require that when a health authority proposes to make any substantial development of the service it provides, or variation in its service, it must formally consult the relevant community health council. A departmental circular (HSC IS 207) provides that where the community health council objects to proposals which relate to a closure or change of use of hospitals, the matter should be referred to the regional health authority. If the region supports the original proposal, the matter is referred for final decision by my right hon. and learned Friend the Secretary of State.

Parliamentary Constituencies

Mr. Grocott: To ask the Secretary of State for Health if he will list the parliamentary constituencies in *(a)* England, *(b)* Scotland, *(c)* Wales and *(d)* Northern Ireland, in descending order of size, showing in each case the extent to which they are either above or below the quota.

Mrs. Currie: The information requested is contained in "Electoral Statistics, 1988" (HMSO), a copy of which is available in the Library.

Population Statistics

Mr. Pike: To ask the Secretary of State for Health if he will list those local authorities in whose area a population decline of 5 per cent. or over was noted between the census of 1961 and 1981; and what information he has with regard to population decline since the last official census.

Mrs. Currie: The information requested is given in the tables. Table 1 lists local authorities in England and Wales whose resident populations declined by 5 per cent. or more between 1961 and 1981. Table 2 contains a list of authorities not included on table 1 whose populations have fallen by 5 per cent. or more between 1981 and 1987 (the last year for which estimates are available).

Source:
1961 populations: The Registrar General's Revised Estimates of the Population 1961-1971; 1981 & 1987 populations: OPCS Monitor PPI 88/1.

Population estimates for 1961 and 1981 are based upon the Censuses held in those years. A number of adjustments have been made to Census results so that the figures relate to usually resident populations at mid year. Mid 1987 estimates have been obtained by updating census-based 1981 figures to take account of subsequent births, deaths and migration. No adjustments have been made to remove any effects of changes in boundaries since the local government reorganisation of 1974.

Sudden Infant Death Syndrome

Mr. Frank Field: To ask the Secretary of State for Health if he will set out in the *Official Report* the number of infant deaths attributed to sudden infant death syndrome in England each month in 1986.

Mrs. Currie: The table shows the number of deaths (registered in England and Wales, but usually resident in England) under one year of age with any mention of sudden infant death syndrome, cot death or similar term on the death certificate, irrespective of whether it did or did not appear as the underlying cause of death by month of occurrence for 1986. Infant deaths which may have been sudden and unexpected, but where no mention of "sudden" or "cot" death or similar term was made on the death certificate, cannot be separately identified reliably.

Number of deaths under one year of age with any mention of sudden infant death syndrome by month of occurrence. Usual residents of England

1986 Provisional

Month of occurrence	*Number*
January	159
February	178
March	140
April	117
May	114
June	71
July	67
August	67
September	74
October	112
November	140
December	183

Sugar

Mr. Tony Banks: To ask the Secretary of State for Health (1) what reports on the health implications of sugar consumption have been received by his Department in the past five years;

(2) when he expects to receive the report on sugar from the Committee on Medical Aspects of Food Policy; and if he will make a statement.

Mrs. Currie: In recent years two scientific reports on sugar and health have been received in the Department:

1. "The Evaluation of Health Aspects of Sugars" from the United States Food and Drug Administration (1986),
2. "Report on Sugars and Syrups" from the British Nutrition Foundation (1987).

In addition, the Chief Medical Officer's Committee on Medical Aspects of Food Policy (COMA) panel on sugars in the diet has received some 20 submissions from interested individuals and organisations. We expect the panel's report in the course of next year.

Child Health

Ms. Harman: To ask the Secretary of State for Social Services what steps he is taking to ensure that parents throughout the country possess a standardised health record for each of their children; and if he will make a statement.

Mrs. Currie: The Government believe that as a matter of principle people should have the right to know what is recorded about them. We have said in debate that we want progress on developing draft guidelines for general access to medical records and we hope this will be achieved later this year. We think it is in the interests of everyone, especially the health and welfare of patients, that progress is made quickly.

With regard to parent-held child health records, we must give recognition to the fact that parents are the primary health carers of their own children. This is reflected in the Department's overall policy to encourage increased parent participation in clinical and social decisions affecting the care of their children.

We support in principle the introduction of parent-held child health records to record details of routine screening checks on their children such as hearing, eyesight, height and weight, childhood illnesses and immunisations. Because of the number of different professionals involved in child health surveillance there are obvious advantages when parents hold such information all on one record and take it with them to each appointment. However, the decision on whether to give parents these records is a matter of professional judgment.

There obviously needs to be a full consensus of professional opinion before a "standardised" record can be introduced throughout the country. Some of the professional bodies involved have already established a joint working party chaired by Dr. David Hall to look at and make recommendations on the content and timing of child health surveillance. The report is expected early next year.

Several health authorities have already successfully introduced parent-held child health records on an experimental basis. We are watching closely the outcome of this work and, in the light of experience and the joint working party report, we will take any action necessary.

Resource Management

Mr. Frank Field: To ask the Secretary of State for Social Services (1) if he will make a statement on the future of the resource management pilot project at Arrowe Park hospital;

(2) if he will make a statement on the future of the National Health Service resource management initiative.

Mrs. Currie: The resource management initiative's overriding aim is to ensure that health authorities' resources are used efficiently and effectively to the maximum benefit of patients. The main components are:

(a) to develop new management systems that provide a central role for doctors, nurses and other professional staff in the management process;

(b) to develop new computerised hospital management information systems; and

(c) to equip staff for their new roles and responsibilities.

A key feature of resource management is the active co-operation of the medical profession; the resource management initiative is jointly sponsored by the joint consultants' committee and the NHS management board, and its ultimate success will depend on the continuing commitment of clinicians.

The initiative is being piloted at six acute sites and progress at five of the six sites is both good and on schedule. More specifically, developments at two sites (the Freeman hospital, Newcastle, and the royal infirmary, Huddersfield) have reached a point where all the main new information systems will shortly become operational.

Developments at three of the other four sites (the Pilgrim hospital, Boston, Guy's, and the royal Hampshire county hospital, Winchester) are expected to reach a broadly similar stage next spring.

Developments at Arrowe Park hospital have to date been slower than at the other sites, although some useful work has been undertaken in developing management structures. The project plan for the hospital is currently being revised and discussed with the district and region. The NHS management board is keen that Arrowe Park remains part of the initiative.

Progress at the sites will be evaluated, with an interim report expected in October 1988. A fuller evaluation is scheduled for completion in October 1989, and will be based on 12 months operational experience at two sites and six months operational experience at three other sites. Decisions on extending the initiative to other sites will be taken in the light both of the 1989 evaluation and of the outcome of the current review of the NHS.

NATIONAL FINANCE

Savings (Taxation)

Mr. Spearing: To ask the Chancellor of the Exchequer what action has been taken or what steps have been proposed to implement the conclusion of the European Council meeting at Hanover that there should be proposals for eliminating fraud, linked to the delivery of national systems for the taxation of savings and for controlling the application of these systems.

Mr. Norman Lamont: The capital movements directive agreed in June requires the Commission to make such proposals by the end of this year. No proposals have yet been made.

Earnings (Unemployment)

Mr. Butler: To ask the Chancellor of the Exchequer what is his estimate of the contribution to reducing unemployment of each 1 per cent. annual decrease in average earnings.

Mr. Major: A decrease in the level of pay settlements which brought them more closely into line with increases in productivity would have an important effect in reducing unemployment. This is now on a firm downward trend, and greater wage restraint would help to keep it there.

Tax Cuts

Mr. Simon Hughes: To ask the Chancellor of the Exchequer if he will make a statement on the effects of the tax cuts announced in the Budget on the levels of consumer expenditure.

Mr. Major: The Budget left the overall burden of taxation unchanged, and I therefore do not expect any significant immediate effects on total consumers' expenditure. In the longer run, by improving incentives and encouraging an enterprise economy, it will have boosted output, employment and exports, and allow a higher level of consumers' expenditure than would otherwise have been possible.

Taxes (Western Isles)

Mr. Macdonald: To ask the Chancellor of the Exchequer if he will estimate the cost of creating a Western Isles division of the general commissioners of taxes.

Mr. Norman Lamont: In the region of £30,000 per annum.

Civil Service Pensions

Mr. Stott: To ask the Chancellor of the Exchequer how many people employed by the Civil Service, prior to 1949 on permanently unestablished grades, are still in employment or are in receipt of pensions; and what is the estimated cost of counting in full their unestablished service prior to 1949 for pension purposes.

Mr. Brooke: I regret that this information can be provided only at disproportionate cost.

Taxation

Mr. Grocott: To ask the Chancellor of the Exchequer what proportion of Exchequer revenues from direct taxation came from each quintile of income groups *(a)* before the 1988 Budget and *(b)* after the 1988 Budget.

Mr. Norman Lamont: Estimates of the percentage distribution of income tax liability in recent years including 1987-88 (pre-1988 Budget) and 1988-89 (post-1988 Budget) were given in my reply to the hon. Member for Birkenhead (Mr. Field) on 28 July at column *488*. Estimates covering revenue from all direct taxation are not available.

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer (1) whether he will publish in the *Official Report* a table showing for those above and those below age 65 years the estimated number of tax units and their tax liability in the current financial year in each range of total income up to a lower limit of £100,000 divided into single persons and one-earner and two-earner married couples; and if he will include the number of females within each category and their tax liability;

(2) whether he will publish in the *Official Report* tables showing for those above and for those below pensionable age, the estimated number of tax units paying income tax and their income tax liability as a proportion of their total income in a full year at 1988-89 rates, by range of total income up to a lower limit of £100,000, distinguishing between single persons, one-earner and two-earner married couples; and if he will add figures showing the likely effect of his proposals for the separate taxation of husbands and wives on the numbers of tax units and the proportion paid in tax.

Mr. Norman Lamont: Available estimates are given in the tables. All estimates are based on a projection of the 1985-86 survey of personal incomes and are provisional. Under the present system a married woman's income is treated as her husband's and taxed as if it belonged to him. Separate estimates for single females are provided in the tables. Comparable estimates after the introduction of independent taxation of husbands and wives are not

available. However estimates of gains in 1990-91 are published in the Inland Revenue Budget press release "Independent Taxation of Husband and Wife".

British Library

Mr. Dobson: To ask the Chancellor of the Exchequer whether consideration has been or is being or will be given to the possibility of levying charges on those who will use the new British library building under construction in Euston road, London NW1.

Mr. Luce: I have been asked to reply.

The British library board plans to maintain the free provision of its basic services. At the same time, consideration will continue to be given as needed to supplementing the grant-in-aid with charges for the provision of value-added or premium services as is done at present. This applies both to the library's present accommodation and to the new building at St. Pancras.

Farm Incomes

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table giving for the most recent financial year the information on farm incomes for tax purposes given in his written reply dated 14 March 1985, *Official Report*, column 246.

Mr. Norman Lamont *[holding answer 29 July 1988]*: The latest available information is for 1985-86 and is given in the tables.

Table 1: *Companies*
Accounting periods ending in the financial year to 31 March 1986

	Number/Amount
Number with gross trading profit for tax purposes	8,000
Gross trading profit for tax purposes	£390 million
All taxable income after reliefs (profits chargeable to Corporation Tax)	£190 million

Notes:
1. The companies included are those whose main activity is in agriculture or horticulture. Their trading profits may include profits from non-agricultural and non-horticultural activities.
2. Companies with a trading loss in 1985-86 are excluded.

Table 2: Individuals (summary)
Income tax year 1985-86

	Number/Amount
Number of cases	324,000
Gross profit for tax purposes	£2,510 million
Taxable profit	£1,800 million

Notes to Table 2, 3 and 4:
1. The number of cases is the number of married men and single people whose "main source" (usually but not always the largest source) of earned income is from self-employment in agriculture and horticulture; plus the number of married women whose largest source of self-employment income is from agriculture and horticulture.
2. Gross profit includes balancing charges. It also includes any non agricultural/horticultural profits of individuals concerned. Taxable profit is gross profit less losses and capital allowances so far as allowed for the income tax year.
3. Individual items may not sum to total due to rounding.
4. Nil or negative includes losses.

Table 3: Individuals—gross profit, 1985-86 tax year

Income Tax

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* tables showing for those above and for those below pensionable age, the estimated number of tax units paying income tax and their income tax liability in a full year at 1988-89 rates by range of total income up to a lower limit of £100,000, distinguishing between single persons, one-earner and two-earner married couples; and if he will provide corresponding information on the basis of the following rates of tax *(a)* single persons, £3,000 taxed at nil rate, £1,500 at 15 per cent., £1,500 at 20 per cent., £7,500 at 25 per cent., and five successive bands of £5,000 at an incremental rate of 5 percentage points to a maximum of 60 per cent., *(b)* all married persons, £3,000 exempt, £3,000 nil rate, £3,000 at 15 per cent., £3,000 at 20 per cent., £9,000 at 25 per cent., and four successive bands of £8,000 at an incremental rate of 5 percentage points to a maximum of 55 per cent., *(c)* the nil rate band to be reduced by one-half of the amount by which total income exceeds £7,500 and £15,000 in the case of single and married persons, respectively, on the same basis as the present age allowance and *(d)* all other allowances and reliefs to be abolished.

Mr. Norman Lamont *[holding answer 29 July 1988]:* Provisional estimates for the 1988-89 tax regime, based on a projection of the 1985-86 survey of personal income, are given in the table. Estimates for the alternative tax regime could be produced only at disproportionate costs.

Number of tax units paying income tax and tax liability by range of total income 1988-89

Total income (lower limit) £ per annum	Singles: Number of units paying tax '000s	Tax yield £ million	Married couple with wife's earnings: Number of units paying tax '000s	Tax yield £ million	Married couple without wife's earnings: Number of units paying tax '000s	Tax yield £ million

50,000	10	590	10	350	10	330

[1] Less than £5 million or 5,000.

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* tables showing for women above and for those below pensionable age, the estimated number of tax units paying income tax in 1988-89 directly or indirectly and the estimated amount of tax payable in a full year at the marginal rate, dividing the figures to show the amounts by range of total income up to a lower limit of £100,000 and distinguishing between single persons, one-earner and two-earner married couples; and if he will include tables showing his estimate of the amount of tax which would be payable by such tax units in 1988-89 on the basis of separate taxation for husbands and wives as proposed for 1990.

Mr. Norman Lamont *[holding answer 29 July 1988]:* Estimates for single women are given in the tables. They are based on a projection of the 1985-86 survey of personal incomes and are provisional.

Under the present tax system a married women's income is treated as her husband's and taxed as if it belonged to him. The estimates requested of the tax liability on the income of married women under the present tax system and under independent taxation could be produced only at disproportionate cost.

Number of single females paying income tax and tax liability by range of total income 1988-89

Total income (lower limit) £ per annum	Aged 65 and over: Number ('000)	Aged 65 and over: Tax liability total (£ million)	Aged 65 and over: Tax liability of higher rate taxpayers (£ million)	Aged under 65: Number ('000)	Aged under 65: Tax liability total (£ million)	Aged under 65: Tax liability of higher rate taxpayers (£ million)
2,000	—	—	—	180	10	—

50,000	10	490	490	10	130	130
Total	850	1,530	780	3,830	4,430	530

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* tables showing for one-earner and two-earner married couples under 65 years of age and married couples over 65 years of age the number of tax units paying less and the number paying more tax in each income band up to a lower limit of £100,000 at 1988-89 rates of tax in the event of the proposed allowances for separate taxation of husbands and wives being replaced by a transferable allowance of £3,000 for each spouse; and if he will include figures of the consequential changes in tax yield.

Mr. Norman Lamont *[holding answer 29 July 1988]:* I regret that the estimates requested could be provided only at disproportionate cost.

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether, further to his written reply of 2 October comparing income taxation in the United Kingdom and Germany, he will give a breakdown of the 22 to 56 per cent. range of tax showing the actual rate charged on incomes of single, one-earner and two-earner couples at intervals of DM10,000 together with the corresponding rate chargeable in the United Kingdom in terms of the gross income and the taxable income, assuming the minimum allowances in both cases; and if he will add details of the corresponding social security contribution and if child benefit is payable.

Mr. Norman Lamont *[holding answer 29 July 1988]:* Such information as can be produced without incurring undue cost is given in the tables, which are supplemented by explanatory notes.

Table 1
Germany

Taxable income		Income tax rate per cent.	
DM	£	Single	Married couple
18,000	4,390	22	21
28,000	6,829	32	21
38,000	9,268	39	23
48.000	11,707	45	29
58,000	14,146	48	33
68,000	16,585	51	37
78,000	19,024	52	41
88,000	21,463	53	44
98,000	23,902	54	45
108,000	26,341	54	47
118,000	28,780	55	49
128,000	31,219	56	50

Notes:
1. The figures relate to 1987 to ensure compatibility with the figures given in the written answer of 22 October 1987.
2. Conversions to sterling have been made on the basis of OECD estimates of purchasing power parity.
3. The tax rates have been rounded.
4. The same rates apply for both one- and two-earner married couples.
5. Social security contributions, deductible in arriving at taxable income, are as follows:—
Old age insurance—9·35 per cent. of gross earnings, maximum deduction DM 6,395 (£1,560) pa.
Unemployment insurance—2·15 per cent. of gross earnings, maximum deduction DM 1,470 (£358) pa.
Health insurance—6·3 per cent. of gross earnings, maximum deduction DM 3,231 (£788) pa.
6. Child benefit, not included in computing taxable income, is payable as follows:—
50 DM (£12.20) per month for the first child
100 DM (£24·39) per month for the second child
220 DM (£53·66) per month for the third child
240 DM (£58·54) per month for each subsequent child

Table 2
United Kingdom

Taxable income	Marginal rate of income tax	Income tax as a percentage of gross income			Income tax and National Insurance contributions as a percentage of gross income		
£	Per cent.	Single	One-earner married couple	Two-earner married couple	Single	One-earner married couple	Two-earner married couple
4,390	27	17·4	14·5	11·2	26·4	14·3	12·3
6,829	27	19·9	17·4	14·1	28·9	19·3	16·7
9,268	27	21·4	19·2	16·2	30·4	22·4	19·8
11,707	27	22·4	20·4	17·6	31·4	24·4	22·0
14,146	27	23·0	21·3	18·8	31·4	24·8	23·2
16,585	27	23·6	22·0	19·6	30·8	25·1	23·6
19,024	40	24·6	23·2	20·9	31·1	25·9	24·5
21,463	45	26·4	25·0	22·8	32·2	27·5	26·1
23,902	45	28·1	26·8	24·6	33·4	29·0	27·6
26,341	50	29·7	28·4	26·3	34·5	30·5	29·1
28,780	50	31·3	30·0	27·9	35·7	31·9	30·5
31,219	50	32·7	31·4	29·4	36·8	33·1	31·8

Notes:
1. The figures relate to 1987-88 to ensure compatibility with Table 1.
2. The calculations assume that all income is earned income, there are no reliefs other than the appropriate personal allowance and that in two-earner married couples no wife's earnings election has been made but the wife makes full use of the wife's earned income allowance. National Insurance Contributions are at the standard Class 1 rate for employees contracted-in to the state additional (earnings related) pension scheme. In the calculations for income tax and national insurance contributions the assumption is made that married couples have two children; child benefit is deducted accordingly, to take into account cash benefits for children.

Investment Income

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer (1) whether he will publish in the *Official Report* tables showing for those above and for those below pensionable age, the estimated number of tax units with an investment income in 1988-89 by range of total income up to a lower limit of £100,000, distinguishing between single persons, one-earner and two-earner married couples together with aggregate and the average investment income in each case; and if he will provide separate figures for those with an investment income of more than £200; (2) whether he will publish in the *Official Report* tables showing for women above and for those below pensionable age, the estimated number of tax units with an investment income in 1988-89 by range of total income up to a lower limit of £100,000, distinguishing between single persons, one-earner and two-earner married couples, together with the average investment income in each case; and if he will provide separate figures for those with an investment income of more than £200.

Mr. Norman Lamont *[holding answer 29 July 1988]:* Available estimates are in the tables. All estimates are provisional and subject to a wide margin of error because

they are based on a projection of the 1985-86 survey of personal incomes and the coverage of investment income in the survey is incomplete. In some cases, investment income on which basic rate liability is satisfied by deduction at source is not reported. No reliable estimates can be given for single people and married couples with total income of less than £5,000.

Table 1

Single people and married couples with investment income 1988-89

Total income (lower limit) £ per annum	Single people			Married couples: without wife's earned income			Married couples: with wife's earned income

Tax Relief

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* his estimate of the cost to the Exchequer of an increase of £100 in each of the allowances and reliefs for income tax at 1988-89 income and tax levels; and if he will provide corresponding figures on the basis of the proposed 1990 regime for the independent taxation of husbands and wives.

Mr. Norman Lamont *[holding answer 29 July 1988]:* Provisional estimates for the main income tax allowances based on a projection of the 1985-86 survey of personal incomes are in the table. Estimates for increases in allowances under independent taxation are available only at 1990-91 income levels.

Direct revenue cost of increasing allowances by £100 in a full year

£ million

Allowance	at 1988-89 incomes
Single and wives earned income	340
Married man's[2]	265
Additional personal and widow's bereavement	15
Single age	25
Married age[2]	20

Allowance	at 1990-91 incomes with Independent Taxation[1]
Personal allowances:—	
single and wives	340
husbands[2]	270
Additional personal and widow's bereavement	15
Aged personal	
single and wives	30
husbands[2]	25

[1] Assuming allowances are indexed from 1988-89 to 1990-91.

[2] To provide an appropriate comparison between the present system of allowances and Independent Taxation, the personal allowances under Independent Taxation are shown separately for single people and wives and for husbands. If the married couple's allowance were also increased by £100, it would cost approximately a further £270 million for the non-aged and £25 million for the aged.

Note:

The additional personal and widow's bereavement allowances are defined under present legislation as the difference between the married allowance and the single allowance. It follows that all the allowances could not be increased by £100 at the same time.

Wife's Earnings Election

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer (1) whether he will publish in the *Official Report* a table showing for wives with earned income the estimated distribution of the number of such wives in 1988-89 by wife's total income and the couples' joint total incomes together with the estimated revenue loss from wife's earnings elections and the estimated further loss on the 1990 basis of separate taxation of husbands and wives;

(2) whether he will publish in the *Official Report* a table showing the estimated number and direct revenue cost of wife's earnings elections in a full year by range of incomes at 1988-89 income and tax levels together with tables for *(a)* husbands and *(b)* wives showing (i) the numbers separately assessed by range of total income of the relevant spouse and (ii) the aggregate total income of each spouse and the aggregate investment income of each spouse; and if he will add a table showing the additional direct revenue cost on the basis of the 1990 proposals for the separate taxation of husbands and wives.

Mr. Norman Lamont *[holding answer 29 July 1988]:* Available estimates are in the tables. They are based on a projection of the 1985-86 survey of personal incomes and are therefore provisional. Further estimates for investment income and separate taxation could be provided only at disproportionate cost.

Distribution of wives[1] earned income 1988-89

Income (lower limit) £ per annum	Number of wives with earned income in range ('000)	Number of married couples (with wives earnings) with joint total income[2] in range ('000)
1	2,280	60
2,000	1,970	170
4,000	1,110	340
6,000	950	430
8,000	500	520
10,000	270	730

Income (lower limit) £ per annum	Number of wives with earned income in range ('000)	Number of married couples (with wives earnings) with joint total income[2] in range ('000)
12,000	240	1,190
15,000	100	1,880
20,000	40	1,520
30,000	20	640
All ranges	7,480	7,480

[1] Excluding some wives with earnings below the PAYE reporting limit and self-employed wives making a net loss.
[2] Combined income of husband and wife.

Wives earnings election 1988-89

Income (lower limit) £ per annum	By range of joint total income of married couple: number '000	By range of joint total income of married couple: cost £ million	By range of wives earned income: number '000	By range of wives earned income: cost £ million	By range of husbands total income[1]: number '000	By range of husbands total income[1]: cost £ million
1	—	—	—	—	—	—

30,000	290	245	15	30	95	115
All ranges	300	245	300	245	300	245

[1] Husband's earned income plus husband and wife's investment income.
[2] Less than £1 million or 1,000.

Elderly Taxpayers

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing his estimate of the number of single persons and married couples aged 65 to 79 and the numbers aged 80 and over, the distribution by income of those subject to tax, and the numbers benefiting from age relief in whole or in part and at what cost to the Exchequer; and if he will provide a similar estimate for 1990-91.

Mr. Norman Lamont *[holding answer 29 July 1988]:* Estimates of the numbers of single persons and married couples aged 65 and over in 1988-89 and the distribution of income for those liable to income tax are given in the tables. In 1988-89, about 2·5 million single persons and married couples, including half a million non-taxpayers, benefit from the age allowances at a cost to the Exchequer of about £400 million. Costs in 1990-91 will depend on the levels of the age allowances.

Number of single people and married couples aged 65 and over in 1988-89

Thousands

Age	Single persons	[1]Married couples
65-79	3,300	2,400
80 and over	1,700	500
Total aged 65 and over	5,000	2,900

[1] Based on the age of the husband or the wife, whichever is the elder.

Taxpayers[1] aged 65 and over[2] by range of total income 1988-89[3]

Total income (lower limit) £ per annum	Thousands
3,000	230
4,000	300
5,000	330
6,000	280
7,000	260
8,000	210
9,000	160
10,000	240
12,000	170
15,000	210
20,000	80
25,000	40
30,000	90
All	2,600

[1] Single person or a married couple.
[2] Either husband or wife is aged 65 or over.
[3] Estimates are based on a projection of the 1985-86 survey of personal incomes and are provisional.

Incomes

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing for *(a)* two-earner families with a wife's earnings election and *(b)* other higher-rate taxpayers by tax category, his estimate of the number and distribution of incomes, together with the average unearned income and average amount of mortgage interest relief in each income band in each category in the current financial year; and if he will add a table showing the gains and losses to the Exchequer from the application of separate taxation of husbands and wives as proposed for 1990.

Mr. Norman Lamont *[holding answer 29 July 1988]:* Provisional estimates for 1988-89 based on a projection of the 1985-86 survey of personal incomes are given in the table. Estimates of the effects of the introduction of independent taxation in 1990-91 were given in the Inland Revenue press release on independent taxation issued on 15 March 1988.

Higher rate taxpayers[1] with wife's earnings election 1988-89

50,000	76	70	15,300	51	3,000
All	353	307	6,900	233	2,600

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* tables showing by range of total income up to a lower limit of £100,000, for those above and those below pensionable age and distinguishing between single persons, one-earner and two-earner married couples, the estimated saving to the Exchequer of abolishing all allowances and reliefs other than the basic single and married allowances; and if he will provide similar tables on the 1990 basis of separate taxation of husbands and wives.

Mr. Norman Lamont *[pursuant to his reply, 28 July 1988, c. 506]:* The total direct revenue yield from abolishing all income tax allowances (other than the basic single and married allowances) and reliefs cannot be estimated reliably. Available estimates of the direct revenue yield in a full year at 1988-89 income levels of abolishing some specified tax reliefs and allowances other than the single, married man's, and wife's earned income allowancess are in the table. Estimates are based on a projection of the 1985-86 survey of personal incomes and are therefore provisional. Estimates do not allow for any behavioural changes that might occur.

The introduction of independent taxation of husband and wife will not affect the estimates for single taxpayers. Changes to the figures for married couples cannot be estimated reliably.

Direct revenue yield at 1988-89 income levels of abolishing income tax reliefs and allowances[1]

Income (lower limit)	*Under 65 years*			*65 years and over*			*All*
		Married couples			*Married couples*		
	Single	*Without wife's earnings*	*With wife's earnings*	*Single*	*Without wife's earnings*	*With wife's earnings*

All	1,550	1,800	3,250	210	170	130	7,110

[1] Estimates assume that tax reliefs for the following are abolished: mortgage interest, retirement annuity premiums, employees superannuation contributions, the business expansion scheme and donations to charities; and that all tax allowances other than the basic single allowance, the basic married man's allowance, and the wife's earned income allowance are also abolished.

Composite Rate Interest

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* tables showing for those above and for those below pensionable age, the estimated number of tax units in receipt of more than £200 gross in composite rate interest in 1986-87 and the average amount received, together with his estimates for 1988-89; and if he will divide the figures to show the amounts for those above and those below pensionable age by range of total income up to a lower limit of £100,000 and distinguishing between single persons, one-earner and two-earner married couples.

Mr. Norman Lamont *[holding answer 29 July 1988]:* The latest information available relates to 1985-86 and derives from the survey of personal incomes. Some of these estimates are based on small samples: where this means that the actual number may be more than about one third higher or lower than shown in the tables, the figures are shown in brackets. The coverage of investment income in the survey is incomplete. In some cases investment income on which basic rate liability is satisfied at source is not reported. Composite rate interest is reported net of tax in the survey.

100,000	(900)	(18,600)	4,910	5,110

Property Income

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether he will publish in the *Official Report* tables showing for those above and for those below pensionable age, the estimated number of tax units in receipt of more than £200 gross in lettings and other incomes from property and the average amount received, together with his estimates for 1988-89; and if he will divide the figures to show the amounts for those above and those below pensionable age by range of total income up to a lower limit of £100,000 and distinguishing between single persons, one-earner and two-earner married couples.

Mr. Norman Lamont *[holding answer 29 July 1988]:* The latest information available relates to 1985-86 and derives from the survey of personal incomes. Some of these estimates are based on small samples: where this means

that the actual number or amount may be more than about one third higher or lower than shown in the tables, the figures are shown in brackets.

Lower limit of total income £	*Aged 65 and over with over £200 before tax from lettings* *Number*	*Average rental* £	*Aged under 65 with over £200 before tax from lettings* *Number*	*Average rental* £
Single people				
2,200	41,100	1,400	(29,700)	(1,900)
10,000	(10,900)	(2,900)	(17,400)	(2,600)
20,000	8,040	(8,100)	7,500	(4,400)
50,000	(600)	(10,700)	(900)	(9,000)
100,000	(100)	(12,200)	(400)	(14,400)
Married couples without wives earned income				
2,200	(26,400)	(1,400)	(19,600)	(400)
10,000	(12,300)	(2,600)	(12,300)	(1,400)
20,000	(6,900)	(3,900)	14,300	2,670
50,000	(500)	(6,800)	2,420	(4,800)
100,000	(100)	(24,000)	(800)	(11,800)
Married couples with wives earned income

20,000	8,720	4,040	42,700	2,770
50,000	(2,800)	(5,800)	7,800	6,240
100,000	(700)	(14,200)	1,700	(10,900)

Tax Allowances

Mr. Austin Mitchell: To ask the Chancellor of the Exchequer whether, further to his reply of 22 October, *Official Report*, columns *858-60*, on income tax allowances and rates in the United Kingdom and Germany, he will publish in the *Official Report* comparable figures for France and Italy.

Mr. Norman Lamont *[holding answer 29 July 1988]:* The information requested is given in the tables, which are supplemented by explanatory notes.

Table 1
Allowances and reliefs

	£
France	
a. Basic exemption (zero rate band)	
Single person	1,305
One-earner married couple	1,305
Two-earner married couple	1,305
b. Employment income relief: a percentage of gross pay less social security contributions	
Single person	[1]
plus	[2]
One-earner couple	[3]
Two-earner couple	[4]
Italy	
a. Employment income relief (tax credit)	
Single person	206·80
One-earner married couple	206·80
Two-earner married couple	413·60
b. Married person's relief (tax credit)	
One-earner couple	176·54
Two-earner couple where employment income of spouse does not exceed £1,261	176·54
c. Low income relief (tax credit, given where person's employment income—and that of any spouse—does not exceed £4,623·70)	
Single person	65·57
One-earner married couple	65·57
Two-earner married couple	131·14
d. Deduction for social security contributions and (subject to a maximum of £1,056·86) life and accident insurance premiums and various other expenses	

[1] 10 per cent. (maximum relief 4,822).
[2] 20 per cent. of balance (maximum 8,731).
[3] As for single person.
[4] For each partner: as for single person.

Notes:

1. The figures relate to 1987 to ensure comparability with the figures for Germany and the United Kingdom given in the written answer of 22 October 1987 referred to in the question.
2. Conversions to sterling have been made on the basis of OECD estimates of purchasing parity.
3. The figures relate to employment income.
4. In France and Italy child relief is also given according to the number of children.
5. In France relief is given to married couples by means of the income splitting system which reduces the tax payable by a married couple.

Table 2
Income Tax Sales

Rate per cent.	*Band of taxable income, £*
France	
0	1–1,305
5	1,306–1,364
9·6	1,365–1,617
14·49	1,618–2,557
19·2	2,558–3,288
24	3,289–4,129
28·8	4,130–4,997
33·6	4,998–5,765
38·4	5,766–9,606
43·2	9,607–13,212
49	13,213–15,628
53·9	15,629–17,778
56·8	over 17,778
Italy	
12	1–2,522
22	2,523–4,623
27	4,624–11,768
34	11,769–21,015
41	21,016–42,032
48	42,033–63,049
53	63,050–126,100
58	126,101–252,204
62	over 252,204

Notes:
1. See Note 1 to Table 1.
2. See Note 2 to Table 1.

SCOTLAND

Prisons

Mr. William Ross: To ask the Secretary of State for Scotland how many persons originally from *(a)* Northern Ireland and *(b)* the Irish Republic were in prisons in Scotland at the latest date for which figures are available.

Lord James Douglas-Hamilton: I regret that this information is not available in the format requested. However, in 1987, a total of 83 persons born in Northern Ireland and 34 persons born in the Irish Republic were received under sentence into penal establishments in Scotland.

Environmentally Sensitive Areas

Mr. Macdonald: To ask the Secretary of State for Scotland, in respect of land within environmentally sensitive areas in Scotland *(a)* how many applications have been received from voluntary conservation bodies wishing to enter into management agreements in each of these areas, and what is the total area of land involved and *(b)* how many agreements have so far been concluded with voluntary conservation bodies in each of these areas and what is the total area of land involved.

Mr. Michael Forsyth: One application covering 373 hectares in the Loch Lomond ESA has been received from a voluntary conservation body. An agreement was concluded covering these 373 hectares.

Mr. Macdonald: To ask the Secretary of State for Scotland when he expects to lay a report before the House in accordance with the requirements of section 18(8) of the Agriculture Act 1986 on the performance of management agreements in environmentally sensitive areas in Scotland; and whether any such report will describe the steps taken to monitor the effect of the agreements on wildlife and the landscape in each area.

Mr. Michael Forsyth: It is too early to assess the effect of the performance of management agreements on each environmentally sensitive area as a whole. My right hon. and learned Friend is, however, considering whether a preliminary statement describing conditions in each area might be helpful. The report on the effect of agreements which will be provided in due course will describe the monitoring arrangements adopted.

Mr. Macdonald: To ask the Secretary of State for Scotland if he will give in respect of environmentally sensitive areas in Scotland *(a)* the total extent in hectares, of each area, *(b)* the extent of agricultural land within each area, *(c)* the number of farmers eligible to enter into management agreements in each area, *(d)* the number of agreements concluded with farmers in each area and *(e)* the total area of land covered by agreements in each area.

Mr. Michael Forsyth: The information is as follows:

	Total area has	*Estimated extent of agricultural land—has*	*Estimated number of eligible farmers/ crofters*	*Concluded agreements*	*Area covered by agreements*
Breadalbane	120,000	90,000	160	55	26,360
Loch Lomond	42,000	30,600	89	15	8,250
Whitlaw and Eildon	8,000	7,500	65	—	—
Stewartry	42,000	39,000	300	4	550
The Machair of the Uists, Benbecula, Barra and Vatersay	7,000	7,000	800 + 65 Grazing Committees	7	65

Dumfries Bypass

Mr. John D. Taylor: To ask the Secretary of State for Scotland at what stage are the plans for the A75 bypass around Dumfries, and if he will make a statement on the future timetable for this scheme.

Lord James Douglas-Hamilton: The contract for the Dumfries bypass has been awarded and construction is due for completion by October 1990.

Rating Reform

Mr. Menzies Campbell: To ask the Secretary of State for Scotland what is his estimate of the effect of the introduction of community charge on the income of full-time students in Scotland, in terms of average losses or gains per month.

Mr. Lang: My right hon. and learned Friend has made no such estimate.

Scottish Bus Group

Mr. Pawsey: To ask the Secretary of State for Scotland if he will set out the programme for the disposal of Scottish Bus Group subsidiaries, providing, where known, the proposed timetable for disposal.

Lord James Douglas-Hamilton: My right hon. and learned Friend hopes soon to announce the detailed pattern of privatisation in terms of the units to be offered for sale. It is not possible in advance of the necessary legislation to say when sales will begin.

Forestry Commission

Mr. Onslow: To ask the Secretary of State for Scotland what are the terms of reference of the non-executive members of the Forestry Commission.

Lord James Douglas-Hamilton: The powers and duties of the Forestry Commissioners are mainly set out in the Forestry Act 1967.

Inshore Fisheries (Helicopter Patrols)

Mr. Macdonald: To ask the Secretary of State for Scotland how many helicopter patrols for the surveillance

of inshore fisheries have been mounted during the current financial year; how many of these have been specifically or mainly for the surveillance of salmon fisheries; and what their total costs so far have been.

Mr. Michael Forsyth: Twenty-four separate patrols have been undertaken in the current financial year by helicopters hired for surveillance of Scottish inshore fisheries, which flew a total of 91½ hours at a cost of £56,137. To isolate the cost of salmon enforcement as distinct from other forms of enforcement is not feasible.

EC Surpluses

Rev. Martin Smyth: To ask the Secretary of State for Scotland what organisations were licensed to distribute the current issue of EC surplus produce; what criteria were used to select these organisations; what regulations or advice has been give to those charged with distribution of this food; what quantity is being distributed in Scotland and in each locality; and if he will make a statement.

Mr. Michael Forsyth: I refer the hon. Member to the answer given today by my hon. Friend the Parliamentary Secretary to the Ministry of Agriculture, Fisheries and Food.

HOUSE OF COMMONS

Parliamentary Questions (Norman Shaw North Branch Library)

Mr. Amess: To ask the Lord President of the Council if he will take steps to arrange for a duplicate set of written parliamentary questions to be placed in the Norman Shaw North branch library on each sitting day; and if he will make a statement.

Mr. Wakeham: I have no plans to do so at present.

Palace of Westminster (Child Care Facilities)

Mr. Corbyn: To ask the Lord President of the Council what facilities are available for the care of the children of hon. Members and staff in the Palace of Westminster.

Mr. Wakeham: No such facilities exist. Their provision is, however, being considered, along with other claims for accommodation, in the context of phase II of the new parliamentary buildings.

ENVIRONMENT

Local Government Officers

Mr. Blunkett: To ask the Secretary of State for the Environment if local government officers falling within the politically restricted group as defined in his Department's response to the Widdicombe committee of inquiry, who have been selected to contest elections prior to the enactment of legislation arising from this response, will be required to resign their positions or withdraw from being a candidate for the election.

Mrs. Virginia Bottomley: The White Paper "The Conduct of Local Authority Business" (Cm. 433, paragraph 5.23) sets out the Government's proposal: local authority officers holding a post in the politically restricted group will not be capable of being elected as an MEP, MP or member of a principal local authority at or after the next election occurring after the legislation comes into force.

Mr. Blunkett: To ask the Secretary of State for the Environment what discussions his officials have had prior to his response to the Widdicombe committee of inquiry, with the International Labour Organisation concerning the implications of imposing political restrictions on the existing contracts of employment of affected local government officers.

Mrs. Virginia Bottomley: None.

Use Classes Order

Mr. Cox: To ask the Secretary of State for the Environment if he will consider revising the 1987 Use Classes Order in order to separate the office from the light industrial use classes.

Mr. Chope: I have no plans to amend the scope of the business use class (B1) of the 1987 Use Classes Order.

Anti-litter Campaign

Mr. Amess: To ask the Secretary of State for the Environment if he will make a statement on the achievements of his national anti-litter campaign.

Mrs. Virginia Bottomley: The programme, launched by the Prime Minister, of experimental projects undertaken by the Tidy Britain Group is well under way. With Government support the group is running a series of project-based pilot schemes to tackle specific major problem areas over 12 months. The projects incorporate before and after studies to help assess the effectiveness of different approaches. It is too soon to reach conclusions, but I understand from the group that the projects are attracting good support from all sectors of the community.

New Dwellings (London)

Mr. Corbyn: To ask the Secretary of State for the Environment how many new dwellings have been constructed in each London borough in each year since 1979 by *(a)* local authorities, *(b)* housing associations and co-operatives and *(c)* the private sector.

Mr. Trippier: Housebuilding figures reported by London boroughs and, until its abolition the GLC, are published for the local authority, housing association and private sectors in table 1 of "Housebuilding in England by local authority areas: 1980 to 1987". These figures include building outside boroughs' own areas, details of which are given in table 2(b). Geographical information on GLC build and building by housing associations assisted by the GLC are given in table 3.

Housebuilding figures reported for 1979 are given in table 4(b) of "Local Housing Statistics", issue No. 59. Housing association figures are shown under the heading "Other public sector" and include activity by Government Departments; for London this amounted to three starts and 161 completions. A geographical breakdown of GLC build and build by housing associations assisted by the GLC is given in table 7 of "Local Housing Statistics", issue No. 53. No boroughs reported any building activity outside their own areas in 1979.

Copies of these publications are available in the Library.

Figures for housing co-operatives are not reported separately to the Department. Activity will be included either in the housing association sector or the private sector depending on the type of co-operative.

Limehouse Link Road

Ms. Gordon: To ask the Secretary of State for the Environment what is the cost of purchasing land required for the Limehouse link road; and what is the expected cost of building the Limehouse link road.

Mr. Trippier: LDDC estimates that at outturn prices the Limehouse link road will cost £141·5 million to construct. The cost of associated land acquisition will be determined by the outcome of current compulsory purchase orders and of statutory compensation procedures.

Ms. Gordon: To ask the Secretary of State for the Environment if his Department or the London Docklands development corporation is providing finances for the building of the Limehouse link road; what are the respective sums being made available from all sources; and if he will make a statement.

Mr. Trippier: The costs of constructing the Limehouse link will be met wholly by the LDDC. The corporation itself will decide what proportion of these costs will be met from its Government grant, and what proportion from land disposal receipts.

Freshwater Biological Association

Mr. Pike: To ask the Secretary of State for the Environment what recent representations he has received regarding the proposed closure of the Windermere and River Frome laboratories of the Freshwater Biological Association; and if he will make a statement.

Mr. Moynihan: I have received a number of representations about the River Frome laboratory. This and the Windermere laboratory of the Freshwater Biological Association are funded by grant-in-aid from the Natural Environment Research Council which comes under the responsibility of my right hon. Friend the Secretary of State for Education and Science.

Piers

Mr. Spearing: To ask the Secretary of State for the Environment if he will make a statement concerning the future ownership maintenance and operations of piers in the tidal Thames.

Mr. Moynihan: The Thames Water Authority is currently considering the implications of the reorganisation of the water industry for the future ownership of the piers which are currently in its ownership.

Housing Investment Programmes

Mr. Pike: To ask the Secretary of State for the Environment if he will list those local authorities whose housing investment programme in 1988-89 is less than 20 per cent. of its housing investment programme in 1979-80, in real terms.

Mr. Trippier: A comparison of gross capital expenditure on housing in 1979-80 with authorities' estimates for 1988-89 identifies no authorities whose 1988-89 expenditure was, in real terms, less than 20 per cent. of its 1979-80 expenditure. We have not yet received returns of estimated 1988-89 expenditure from 14 authorities.

Owner-occupation

Mr. Pike: To ask the Secretary of State for the Environment if he will list those local authorities in whose area there is a 75 per cent. or higher rate of owner-occupation.

Mr. Trippier: The most recent information for individual local authority areas is from the 1981 census. The percentages of households who were owner occupiers is shown in Table 17 of "Census 1981, Key statistics for local authorities, Great Britain", a copy of which is in the Library.

Channel Tunnel

Mr. Spearing: To ask the Secretary of State for the Environment what steps he is now taking to evaluate the impacts of proposals to utilise a new high-speed railway from London to the Channel tunnel for daily working journeys for residents in Kent to and from London; what effects he expects such proposals to have on the existing structure plan for that county; and if he will state his criteria for development in areas not scheduled for residential expansion.

Mr. Chope: The impact on daily working journeys for residents in Kent is a matter for my right hon. Friend the Secretary of State for Transport.

I understand that British Rail is undertaking widespread consultations on Channel tunnel train services and is at present discussing the strategic implications of its proposals with Kent county council and the London planning advisory committee, and that Kent county council hopes to come to a conclusion on the strategic implications in January. It will be a matter for Kent county council to decide, in the light of British Rail's decision on a preferred route, whether or not to undertake a further review of the Kent structure plan.

The Secretary of State's criteria for development in areas not scheduled for residential expansion are set out in general terms in circulars issued by the Department and more recently in the planning policy guidance notes. The detailed application of these policies in this case is primarily a matter for the local planning authorities in Kent and London.

Irish Sea (Pollution)

Mr. John D. Taylor: To ask the Secretary of State for the Environment on what basis tests are carried out to establish the level of pollution in the Irish sea; whether he seeks the opinion of independent monitoring organisations; and if he will make a statement on pollution in the Irish sea.

Mrs. Virginia Bottomley: Monitoring and research in the Irish sea is carried out by a wide range of organisations including United Kingdom Government Departments with responsibility for fisheries and the environment, by

water authorities and by research agencies including the National Environmental Research Council. The independent Irish sea study group offers an opportunity to interested parties including universities, industry, Government Departments and conservation groups to meet to discuss these issues. The group, whose work the Department welcomes, hopes to produce a report on the Irish sea shortly. Aspects of pollution in the Irish sea were considered in a recent report on the Irish sea, by the International Council for the Exploration of the Seas, which we are considering. We are in contact with the Irish Government about how best to take these matters forward.

Vicuna

Mr. Tony Banks: To ask the Secretary of State for the Environment if, pursuant to his reply of 28 January, *Official Report*, column *374*, he is now in a position to provide details of the amounts and destinations of trade in vicuna and stock levels of vicuna available in the United Kingdom market; what progress has been made in reconciling the discrepancy between United Kingdom and Japanese statistics; and if he will make a statement.

Mrs. Virginia Bottomley: The majority of international trade in vicuna products from the United Kingdom in recent years has been to Japan. The total exports (in kg) for the years 1983 to 1987 to Japan and to the rest of the world were:

	Japan	*Rest of world*
1983	54·71039	20·34270
1984	184·43149	20·83830
1985	245·01560	14·56341
1986	205·88448	6·19800
1987	332·42721	25·97895

The current stock level of pre-convention vicuna held in the United Kingdom is 406,53 kg.

The apparent discrepancy between the United Kingdom and Japanese statistics has been resolved and full details of the exports concerned were contained in my letter of 29 September 1988 to the hon. Member.

Full details will be published in due course in the United Kingdom supplementary report on CITES trade for 1986 and the EC CITES reports for 1986 and 1987.

Conservative Party Conference

Mr. Tony Banks: To ask the Secretary of State for the Environment what services were provided by personnel of his Department for the 1988 Conservative party conference.

Mr. Ridley: None, but, in preparing for the conference, my Ministers and I drew upon material produced by my Department during the normal course of business.

Pool Cars

Mr. French: To ask the Secretary of State for the Environment how many representations he has received regarding criminal offences associated with the use of pool cars; what plans he has for curtailing the abuse of pool cars; and if he will make a statement.

Mr. Douglas Hogg *[pursuant to his reply, 13 July 1988, c. 235]:* I am sorry that my hon. Friend's question appeared wrongly in the Order Paper addressed to the Secretary of State for the Environment. It was correctly tabled for answer by the Secretary of State for the Home Department, but was transferred because of a misinterpretation of the term "pool car" as referring to the Government car service pool vehicles used by Ministers and officials, the responsibility of the Department of the Environment. There was insufficient time, once the mistake had come to light, to transfer the question back to the Home Department before the day on which it was set down for answer.

TRADE AND INDUSTRY

Gas Supply

Mr. Page: To ask the Chancellor of the Duchy of Lancaster when the report of the Monopolies and Mergers Commission on the supply of gas to non-tariff customers is to be published; and if he will make a statement.

Mr. Maude: The report is published today, following a reference to the commission by the Director General of Fair Trading in November 1987.

In its unanimous report, the commission found extensive discrimination by British Gas in the pricing and supply of gas to contract customers. It concluded that this practice operated against the public interest. The commission made four main recommendations which it felt would encourage competition in the supply of gas, and restrain BG's discriminatory policy on pricing and supply of gas. The recommendations were that BG should be required:

to publish a price schedule at which it is prepared to supply firm and interruptible gas to contract customers, and not to discriminate in pricing or supply;

not to refuse to supply interruptible gas on the basis of the use made of the gas, or the alternative fuel available;

to publish further information on common carriage terms;

to contract initially for no more than 90 per cent. of any new gas fields.

One of the main findings was that BG's policy of price discrimination imposed higher costs on customers less well placed to use alternative fuels, or to obtain them on favourable terms, thus placing an arbitrary cost disadvantage on these customers. In addition, BG's policy of relating prices to those of the alternatives available to each customer placed it in a position to undercut potential gas suppliers, which may be expected to deter new entrants and inhibit the development of competition in the market. Its refusal to supply interruptible gas to some customers also imposed additional costs on those users.

The commission also concluded that BG's failure to provide adequate information on the costs of common carriage, its ability to identify potential customers of competing suppliers and the potential source of gas, and its position as a dominant purchaser of gas may all be expected to deter entry into the market.

My right hon. and noble Friend the Secretary of State welcomes this report. The MMC's recommendations offer a sound basis for encouraging the development of effective competition in the supply of gas to contract customers. The Secretary of State is asking the Director General of Gas Supply to seek agreement with British Gas to modifications to British Gas's authorisation so as to effect remedies relating to British Gas's pricing and contract policies in the supply of gas to large users, and also relating to the provision of information on its common carriage

terms for transmission of gas. If satisfactory arrangements cannot be made by agreement, the Secretary of State has powers to remedy the adverse effects by order under the Fair Trading Act.

In order to encourage the emergence of other suppliers of gas to industrial users, the Secretary of State considers that it is essential that a reasonable percentage of the output of new gas fields should be available to suppliers other than British Gas. He has asked the Director General of Fair Trading to consult interested parties on the basis of the MMC's recommendations, with a view to proposing by 31 January 1989 a scheme which will make it easier for others to buy gas from developers of gas fields. In particular, he has asked the director general to advise him whether requirements under such a scheme should be subject to a time limit, and if so what the limit should be. The Secretary of State will then consider the position further.

The Secretary of State believes that these measures will remove distortions in the gas market with consequential improvements to resource allocation and efficiency. The remedies are designed to encourage new entrants into the industrial gas market thereby accelerating the development of competition.

Balance of Trade

Mr. Gordon Brown: To ask the Chancellor of the Duchy of Lancaster what was the balance of trade in each of the following goods and services for *(a)* the second quarter of 1988 and *(b)* the second quarter of 1987 (i) passenger motor cars, (ii) other consumer goods, (iii) machine tools, (iv) instrument engineering, (v) tourism and (vi) banking and insurance services.

Mr. Alan Clark: Quarterly estimates of earnings from the banking and insurance services are not available. The balance of trade for the remaining goods and services is given in the table:

United Kingdom Balance of Trade

£ million

	Second quarter 1987	*Second quarter 1988*
Passenger motor cars	−840·0	−1,316·9
Other consumer goods	−1,119·2	−1,515·4
Machine tools	−0·5	−20·2
Instrument engineering	−137·0	−160·0
Tourism	−307·0	−550·0

Note: All figures provisional.

Mr. Spearing: To ask the Chancellor of the Duchy of Lancaster if he will publish in the *Official Report* a table showing for the last 12 months of available figures the overall balance of trade of the United Kingdom in respect of *(a)* the European Economic Community and *(b)* the rest of the world showing for each the percentage of both overall trade and of the respective surpluses or deficits.

Mr. Alan Clark: Information on United Kingdom trade with EC and the rest of the world is in the table. Because the overall trade balance comprises both surpluses and deficits it is not meaningful to express components as percentages.

United Kingdom Trade, 12 months to June 1988

£ billion BoP basis

	Exports	*Imports*	*Balance*	*Total trade (exports plus imports)*
Trade with:				
EC	39·2	50·6	−11·4	89·8
Rest of World	40·6	44·1	−3·5	84·6
World	79·8	94·7	−14·9	174·5

Source: Monthly Review of External Trade Statistics.

Manufactured Goods

Mr. Leighton: To ask the Chancellor of the Duchy of Lancaster if, pursuant to his answer to the hon. Member for Newham, North-East, of 20 July, *Official Report*, column *619*, he will give the information requested on the trade in manufactured goods between the United Kingdom and the Federal Republic of Germany in the form in which it is available.

Mr. Alan Clark: Figures of United Kingdom trade in manufactures with the Federal Republic of Germany at current prices are in the table:

United Kingdom trade in manufactures[1] with Federal Republic of Germany

	Exports fob	*Imports cif*	*Crude balance*	*Exports as percentage of imports*
	£ billion	*£ billion*	*£ billion*	*Per cent.*
1970	0·4	0·5	−0·1	81
1971	0·4	0·6	−0·2	72
1972	0·5	0·8	−0·3	60
1973	0·6	1·3	−0·6	50
1974	0·8	1·7	−0·9	47
1975	1·0	1·7	−0·7	57
1976	1·4	2·5	−1·0	58
1977	1·9	3·2	−1·3	59
1978	2·2	4·1	−1·9	54
1979	2·8	5·3	−2·5	52
1980	3·1	5·1	−2·0	61
1981	3·2	5·3	−2·2	60
1982	3·4	6·7	−3·3	51
1983	3·9	8·9	−4·9	44

Barlow Clowes

Mr. David Shaw: To ask the Chancellor of the Duchy of Lancaster (1) if he will take steps to examine the accounts of all the corporate financial intermediaries which placed client moneys in funds managed by Barlow Clowes operations in the United Kingdom, Switzerland, the Channel Islands and Gibraltar to ascertain whether they have kept proper books of account in each year since 1983 in accordance with the Companies Acts, and that all commission and benefits due or payable to those companies was properly included as revenue in the accounting records of those companies;

(2) if he will appoint inspectors to those financial intermediary companies which placed in total £100,000 or more of client moneys with Barlow Clowes operations in order to ascertain whether those companies have kept proper books of account which have incorporated all

benefits, payments and commissions due to, paid or payable to the companies, their employees, their directors and their shareholders since 1983.

Mr. Maude: I understand the concerns of the many investors who put their money into the Barlow Clowes funds on the advice of professional intermediaries. The Financial Intermediaries Managers and Brokers Regulatory Association is looking into dealings with Barlow Clowes by its members. My Department is in close touch with FIMBRA and the Securities and Investments Board over this matter. Whether further action by my Department in this area is appropriate and, if so, what form it should take remain under close and careful consideration.

Dr Glyn: To ask the Chancellor of the Duchy of Lancaster what representations he has received about advice given at the London Regional Transport retirement seminar to pensioners to invest in Barlow Clowes; and if he will make a statement.

Mr. Maude: I have received many representations from pensioners and others who placed investments with Barlow Clowes. I do not believe I have received any which refer to retirement seminars given by London Regional Transport.

Dr. Glyn: To ask the Chancellor of the Duchy of Lancaster if he will take steps to ensure that all stockbrokers and financial intermediaries who advised their clients to invest in Barlow Clowes will have their names published and that FIMBRA is not solely responsible for this disclosure.

Mr. Maude: I do not think that it would be appropriate to publish such a list at this stage.

Ranks Hovis McDougall (Bid)

Mr. Steel: To ask the Chancellor of the Duchy of Lancaster if he has received a report from the Office of Fair Trading on the Goodman Fielder Wattie bid for Ranks Hovis McDougall plc.

Mr. Barry Jones: To ask the Chancellor of the Duchy of Lancaster if he is yet in a position to say if he will refer the Ranks Hovis McDougall takeover bid by Goodman Fielder Wattie to the Monopolies and Mergers Commission.

Mr. Maude: My right hon. and noble Friend the Secretary of State announced on 18 August that he had decided, in accordance with the advice of the Director General of Fair Trading, to refer the proposed acquisition by Goodman Fielder Wattie (GFW) for Ranks Hovis McDougall plc to the Monopolies and Mergers Commission for further investigation. GFW subsequently abandoned its bid, and the reference has been laid aside.

Pleasurama

Mr. Skinner: To ask the Chancellor of the Duchy of Lancaster if he will now take steps to investigate the alleged insider dealing in shares in Pleasurama; and if he will make a statement.

Mr. Maude: The surveillance division at the stock exchange looks at cases of price movements before price sensitive announcements, and where appropriate it passes information to my Department for consideration of whether further investigation is required, in particular by the appointment of inspectors under section 177 of the Financial Services Act 1986. Such appointments are not normally announced.

City (Self-regulation)

Mr. Skinner: To ask the Chancellor of Duchy of Lancaster whether he will now introduce legislation to outlaw self-regulation in the City; and if he will make a statement.

Mr. Maude: No.

Capital Investment (North-west)

Mr. Pike: To ask the Chancellor of the Duchy of Lancaster if he will publish, using the 1979 base year figure of £971 million, the percentage charge of capital investment in the north-west in the years 1987 and 1988 to date; and if he will also give that figure as a cash sum for each year.

Mr. Maude: Regional capital expenditure data are available only for manufacturing industry. Results for 1987 and 1988 are not yet available. In current prices, net capital expenditure in manufacturing industry in the north-west region rose by 3 per cent. from £971 million in 1979 to £1,000 million in 1986. In constant (1980) prices, net capital expenditure fell by 38 per cent. from £1,118 million in 1979 to £698 million in 1986.
Source: Annual Census of Production.

Computers (Export)

Mr. Onslow: To ask the Chancellor of the Duchy of Lancaster further to the answer of 29 April 1988, *Official Report*, column *287*, what further steps have been taken, to ease the current restrictions placed by HM Customs on the temporary export of personal computers by British business men; and if he will make a statement.

Mr. Alan Clark: The arrangements described in my answer of 29 April, *Official Report* column *287*, eased the burden on business men visiting most free world countries. For destinations not covered by those arrangements my Department will consider applications for temporary export licences for multiple use.

I have arranged for copies of the press notice announcing the measures to be placed in the Library of the House.

Nottinghamshire (Structural Funds)

Mr. Allen: To ask the Chancellor of the Duchy of Lancaster if he will agree to meet a delegation from Nottinghamshire county council to discuss reorganising Nottinghamshire as an eligible area in the revised European structural funds as well as in national regional industrial policy.

Mr. Newton: No, for the reasons set out in my letter of 30 September to the chief executive of Nottinghamshire county council, of which I am sending the hon. Member a copy.

NORTHERN IRELAND

Strip Searches

Mr. McNamara: To ask the Secretary of State for Northern Ireland how many strip searches were made of female prisoners in Her Majesty's prison, Maghaberry, in July, August and September, respectively, giving the number of persons involved and number of times each person was searched; if any prison contraband, smuggled item or illegal correspondence was discovered in any search, indicating which items; in how many cases prisoners refused to be searched and had to be restrained while the search was being conducted; and what were the reasons for the search under each of the following headings *(a)* making a remand appearance at a trial, *(b)* attending trial, *(c)* inter-prison visit or *(d)* other reasons.

Mr. Ian Stewart: The information requested is as follows:

Number of Searches	*July*	*August*	*September*
Total number of searches carried out	28	18	29
Total number of inmates searched	20	13	22
Number of prisoners searched once	12	9	15
Number of prisoners searched twice	8	3	7
Number of prisoners searched more than twice	—	1	—
Reasons for Search			
First admission on remand/awaiting trial	12	5	5
First admission on sentence/final discharge	11	11	21
Attending remand court	—	—	—
Attending trial	—	—	—
Inter-prison visits	—	1	1
Pre-release home leave	3	1	1
Visits to outside hospitals	2	—	—
Released on bail	—	—	1

No prohibited article was found during these searches and no prisoner refused to be searched.

New Businesses

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland how many businesses have been set up in the area defined as "Catholic West Belfast" in the document "Making Belfast Work" in the last five years using public funds; and if he will list them showing whether they are still in business and the amounts of public funds invested, together with the numbers of jobs created, when they started and any subsequent job losses.

Mr. Needham: The area in the document is defined by reference to council wards. The information requested is not held at ward level and could be obtained only at disproportionate cost.

Public Bodies

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland how many non-departmental public bodies, agencies, boards and units have been set up by his Department since November 1985; how many staff are employed by them; if he will list the names and functions carried out by such organisations; and how many such organisations have been wound up since November 1985.

Mr. Needham: Since November 1985, six such bodies have been established (details are as shown) and four bodies have been wound up.

Name of non-departmental public body	*Number of staff*	*Functions*
Interim Council for Catholic Maintained Schools	21 full time 3 part time	In consultation with the Department of Education and Education and Library Boards to negotiate, establish and implement educational policy in general educational matters and in areas of management of Catholic maintained schools
Northern Ireland Centre for Learning Resources	17 full time 2 part time	The Centre provides high-level audio-visual and print design resources to support the education and training of teachers and to help to facilitate curriculum development work in schools
Mental Health Commission for Northern Ireland	7	To keep under review the care and treatment of people suffering from mental disorder and to monitor the operation of the operation of the Mental Health (NI) Order 1986
Northern Ireland Health Promotion Committee	Nil	To provide services to support Government policies to promote good health and prevent disease
Technology Board for Northern Ireland	8 departmental staff (of whom 5 are employed by DED)	To advise Government on strategic scientific technological and industrially related research and development issues
Northern Ireland Advisory Committee on Travellers	Nil	To advise the Minister on ways and means of securing such improvements as they may deem necessary or desirable in the living conditions of the Travelling People in Northern Ireland

Divis Joint Development Committee

Mr. A. Cecil Walker: To ask the Secretary of State for Northern Ireland what sums of money have been received or applied for by the Divis joint development committee in the past year from the Department of Economic Development and the Department of Employment Belfast action team; and what are the profits concerned.

Mr. Needham: For the financial year 1987-88 grants were paid as follows:

	£
Department of Economic Development (ACE Scheme)	267,736·48
Department of the Environment (BAT)	35,749·60

Profits do not accrue from these programmes.

Mr. A. Cecil Walker: To ask the Secretary of State for Northern Ireland whether the Housing Executive or any

other Government body is funding new premises for the Divis joint development committee; and if he will make a statement.

Mr. Needham: I understand that there have been consultations between the executive and the committee about a possible alternative site for new premises, since the committee's present premises are scheduled for demolition. Neither the executive nor any other Government Department has proposals at present to fund any new premises.

Mr. A. Cecil Walker: To ask the Secretary of State for Northern Ireland what information he has as to whether the Divis joint development committee has applied to the International Fund for Ireland for contributions; and if he will make a statement.

Mr. Ian Stewart: This is a matter for the board of the International Fund for Ireland. I have arranged to have the question referred to the chairman.

Union Flag

Mr. John D. Taylor: To ask the Secretary of State for Northern Ireland why the Union flag was not flown on the Southern health and social services board premises at The Mall, Armagh, on Sunday 21 August; and what new arrangements are being made to ensure that the Union flag is flown on these premises on all appropriate dates.

Mr. Ian Stewart: The requirement to fly the Union flag on those prescribed days relevant to Northern Ireland applies to central Government offices only. There is no requirement therefore for the Southern health and social services board to comply.

Milk Quota

Mr. John D. Taylor: To ask the Secretary of State for Northern Ireland, pursuant to the reply of 7 June, *Official Report*, column *465*, how many of the 801 milk producers who were contracted out of production had applied for milk quotas to the Department of Agriculture (NI) prior to 31 July; and when they were advised that they should apply by 31 July.

Mr. Viggers: While various inquiries by producers had been made during the period 31 March 1984 to 31 July 1988, the exact number could not be determined without incurring disproportionate cost. The European Commission only announced in September its proposals for dealing with the European Court judgment about milk quotas and the non-marketing of milk scheme. One of its conditions for eligibility was that former producers must have applied for additional quota before 31 July 1988. Obviously advice could not be given to producers to apply before that date because the proposed deadline was not known until after it had passed. The United Kingdom and other member states have been expressing strong reservations about the proposed 31 July 1988 deadline. Consideration of the proposals continues and it is likely to be some time yet before the final arrangements are established.

Agricultural Land (Development)

Mr. McGrady: To ask the Secretary of State for Northern Ireland if he will make a statement on co-ordination between the Department of Agriculture for Northern Ireland and the Department of the Environment (Northern Ireland) over the release of agricultural land for building development.

Mr. Needham: Both Departments are concerned to ensure that conditions favour a viable rural economy in Northern Ireland. Developments which will improve the quality of life, including employment prospects, in rural communities, while at the same time conserving the countryside are encouraged.

The Department of the Environment for Northern Ireland as planning authority consults the Department of Agriculture for Northern Ireland on planning applications which affect agricultural land. The Department of the Environment when drawing up an area, local or subject plan also consults the Department of Agriculture to ensure that the development proposals in the plan are acceptable from an agricultural viewpoint.

Barr Hall, Portaferry

Mr. John D. Taylor: To ask the Secretary of State for Northern Ireland what information he has about the proposal to use the private residence at Barr Hall, Portaferry, as a prisoner rehabilitation centre; whether there is a planning permission for this proposal; and whether he will arrange a public inquiry before any planning decision is made for an application to use Barr Hall as a rehabilitation centre.

Mr. Needham: None. Should a planning application for such a proposal be received, it will be processed in the normal way, including consideration of the need for a public inquiry.

EC (Surplus Produce)

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what organisations were licensed to distribute the current issue of EEC surplus produce; what criteria were used to select these organisations; what regulations or advice has been given to those charged with distribution of this food; what quantity is being distributed in Northern Ireland and in each local authority area; and if he will make a statement.

Mr. Viggers: I refer the hon. Gentleman to the reply given today by my hon. Friend the Parliamentary Secretary to the Ministry of Agriculture, Fisheries and Food.

Farm Woodland Schemes

Mr. John D. Taylor: To ask the Secretary of State for Northern Ireland what has been the response to the new farm woodland schemes: how many inquiries he has received; how many applications have been approved; and if he will make a statement.

Mr. Viggers: There has been considerable interest shown in the farm woodland scheme which opened to applications on 1 October. The Department of Agriculture for Northern Ireland held two FWS open days at Seskinore and Garvagh, at which approximately 400 farmers attended. Another open day is being held at Castlewellan on 19 October and further publicity events are planned. One hundred and forty information packs

have been issued, and to date 15 applications have been received by the Department. None of these applications has yet been approved.

Housing (Insulation Standards)

Mr. A. Cecil Walker: To ask the Secretary of State for Northern Ireland why housing insulation standards are lower in Northern Ireland than in Scotland and England; what steps are being taken to introduce the latest standards to Northern Ireland; and when these new standards will be implemented in Northern Ireland.

Mr. Needham: The same thermal insulation standards apply in Northern Ireland as in Great Britain. It is the intention that, subject to consultation with interested parties, standards in Northern Ireland will be adjusted to reflect any increase in standards in Great Britain.

FOREIGN AND COMMONWEALTH AFFAIRS

United States of America

14. **Mr. Morley:** To ask the Secretary of State for Foreign and Commonwealth Affairs whether he has any plans to visit the United States of America.

Mr. Eggar: No dates have yet been fixed for my right hon. and learned Friend's next visit to the United States. My right hon. Friend the Prime Minister will be there from 15 to 17 November.

South Africa

19. **Mr. Simon Hughes:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met a representative of the Government of South Africa; and what matters were discussed.

Mrs. Chalker: My right hon. and learned Friend last met the South African ambassador on 23 September. They discussed a range of issues of common interest.

36. **Mr. Matthew Taylor:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the current state of United Kingdom relations with South Africa.

Mrs. Chalker: I refer the hon. Member to the speech that my right hon. and learned Friend made on 17 May to the Royal Commonwealth Society, a copy of which has been placed in the House of Commons Library.

Southern Africa

Mr. McAllion: To ask the Secretary of State for Foreign and Commonwealth Affairs when he next intends to meet representatives from the African National Congress of South Africa and the South West African People's Organisation of Namibia.

Mrs. Chalker: My right hon. and learned Friend has no present plans to do so.

22. **Mr. Anderson:** To ask the Secretary of State for Foreign and Commonwealth Affairs what initiatives the Government propose to take in relation to southern Africa.

Mrs. Chalker: We shall continue to pursue policies designed to promote fundamental change in South Africa.

United Nations

26. **Mr. Anthony Coombs:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met the United Nations secretary-general; and what subjects were discussed.

33. **Mr. Eastham:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met the secretary-general of the United Nations; and what was discussed.

69. **Ms. Armstrong:** To ask the Secretary of State for Foreign and Commonwealth Affairs, when he last met the secretary-general of the United Nations; and what was discussed.

16. **Mrs. Clwyd:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met the secretary-general of the United Nations; and what was discussed.

Mr. Eggar: My right hon. and learned Friend met the secretary-general on 27 September during his visit to the general assembly. They discussed Afghanistan, Iran/Iraq, Namibia and Cyprus. The following day the secretary-general was present at a confidential meeting of the Foreign Ministers of the five permanent members of the UN Security Council.

21. **Mr. Patnick:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the outcome of the latest session of the United Nations general assembly.

Mr. Eggar: The 43rd session of the UN general assembly began on 20 September and is not expected to end until early December.

International Debt

17. **Mr. Knapman:** To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions were held at the latest session of the United Nations general assembly on the resolution of the international debt problem.

Mrs. Chalker: During the recent visit of my right hon. and learned Friend the Secretary of State to New York for the opening of the United Nations general assembly, a number of speakers referred to international debt issues.

Central America

18. **Mr. McTaggart:** To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Government of the United States of America regarding recent developments in the central American peace process.

Mr. Eggar: We have regular discussions with the United States Administration on a wide range of issues, including developments in the central American peace process.

29. **Mr. Wareing:** To ask the Secretary of State for Foreign and Commonwealth Affairs whether he has any plans to visit central America.

34. **Mr. Tony Banks:** To ask the Secretary of State for Foreign and Commonwealth Affairs whether he has any plans to visit central America.

37. **Ms. Abbott:** To ask the Secretary of State for Foreign and Commonwealth Affairs whether he has any plans to visit central America.

57. **Mrs. Mahon:** To ask the Secretary of State for Foreign and Commonwealth Affairs whether he has any plans to visit central America.

Mr. Eggar: I will attend the San Jose V conference due to be held in San Pedro Sula, Honduras in February 1989. I also hope to be able to visit the region during 1989.

71. **Mr. Patchett:** To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Government of the United States of America regarding recent developments in the central American peace process.

Mr. Eggar: We have regular discussions with the United States Administration on a wide range of issues, including developments in the central American peace process.

Chile

20. **Mr. McAvoy:** To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had recently with the Government of the United States of America regarding the current situation in Chile.

Mr. Eggar: We have remained in regular and close contact with the United States Government about the political situation in Chile, in particular about the recent plebiscite. Both of us have welcomed the exemplary conduct of the polling and the Chilean Government's acceptance of the result.

31. **Dr. Godman:** To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he had had recently with other Governments of the European Economic Community regarding the current situation in Chile.

44. **Mr. Frank Cook:** To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had recently with other governments of the EEC regarding the current situation in Chile.

Mr. Eggar: We have remained in close and regular contact with our European Community partners on the political situation in Chile. The twelve member states issued a statement on 7 October on the outcome of the recent plebiscite. A copy has been placed in the Library of the House.

Refuseniks

24. **Mr. John Marshall:** To ask the Secretary of State for Foreign and Commonwealth Affairs what representations Her Majesty's Government have recently made about the plight of refusenik families in the Union of Soviet Socialist Republics.

Mr. Waldegrave: We take every suitable opportunity to raise these issues with the Soviet authorities. My right hon. Friend the Secretary for Education and Science took up a number of individual cases during his recent visit to the Soviet Union. My right hon. and learned Friend the Secretary of State raised the case of Mr. George Samoilovich with Mr. Shevardnadze in New York on 26 September, following earlier representations by officials.

Bophuthatswana

25. **Mrs. Ann Winterton:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on Her Majesty's Government's policy towards recognition of Bophuthatswana.

39. **Mr. Michael Brown:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will consider giving full diplomatic recognition to the country known as Bophuthatswana.

61. **Mr. Nicholas Winterton:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a further statement on Her Majesty's Government's policy towards recognition of Bophuthatswana.

66. **Mr. Beggs:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a further statement on Her Majesty's Government's policy towards recognition of Bophuthatswana.

73. **Mr. Mudd:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a further statement on Her Majesty's Government's policy towards recognition of Bophuthatswana.

73. **Mr. Woodcock:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on Her Majesty's Government's policy towards recognition of Bophuthatswana.

Mrs. Chalker: The creation of Bophuthatswana was a key element in the South African Government's policy of seperate development, to which we are wholly opposed. In common with all other states except South Africa we do not recognise Bophuthatswana as independent.

Western European Union

27. **Sir Dudley Smith:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the priorities of the United Kingdom presidency of the Western European Union.

Mr. Waldegrave: Our four main priorities for our presidency of the WEU remain those set out in the reply of my hon. and learned Friend the Member for Putney (Mr. Mellor) to my hon. Friend the Member for Ashford (Mr. Speed) on 28 June 1988, namely: to elaborate the commitments in the WEU platform in order to make practical contributions to the common defence; to use the WEU as a forum for frank discussions of key European security issues; to develop the WEU as a forum for coordinating European approaches to out of area issues; to secure a satisfactory outcome to the enlargement negotiations with Spain and Portugal.

Spain

28. **Mr. David Evans:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met the Prime Minister of Spain; and what subjects were discussed.

Mrs. Chalker: My right hon. and learned Friend the Foreign Secretary's last meeting with the Prime Minister of Spain was on 27 November 1987. They discussed EC matters and Gibraltar.

40. **Mr. Amos:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the current state of Anglo-Spanish relations.

Mrs. Chalker: Anglo-Spanish relations are excellent, as shown by the recent visit by my right hon. Friend the Prime Minister and the current state visit by Her Majesty The Queen.

Mr. Barry Field: To ask the Secretary of State for Foreign and Commonwealth Affairs if he has any plans to visit Spain.

Mrs. Chalker: My right hon. and learned Friend the Foreign Secretary is in Spain at the moment in attendance upon Her Majesty The Queen during her state visit.

France

30. **Mr. Allen:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make an official visit to France.

Mrs. Chalker: My right hon. and learned Friend will visit Paris on 2 November when he will address the conference of the "Kangaroo Group" on the European single market and have talks with the French Foreign Minister, Monsieur Dumas.

Weapons Control

32. **Mr. Wallace:** To ask the Secretary of State for Foreign and Commonwealth Affairs what progress has been made during the summer adjournment on negotiations towards a treaty regarding chemical weapons.

60. **Mr. Evennett:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the general progress of the arms control negotiations in Geneva.

65. **Mr. Chapman:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement about progress in all arms negotiations or conferences currently under way.

72. **Mr. Curry:** To ask the Secretary of State for Foreign and Commonwealth Affairs what progress is being made on the negotiation of a treaty to ensure the global elimination of all chemical weapons.

Mr. Waldegrave: The United States/Soviet nuclear and space talks in Geneva continue to make progress but their conclusion is unlikely this year. The United States and Soviet Union are negotiating verification protocols to the threshold test ban and peaceful nuclear explosions treaties with a view to early submission for ratification. We hope that a mandate for conventional stability talks covering the area from the Atlantic to the Urals can soon be agreed in Vienna. The mutual and balanced force reduction talks in Vienna remain stalled.

At the Geneva negotiations for a global chemical weapons convention discussion during the summer session (which finished on 20 September) continued on a series of technical issues, particularly verification.

The United Kingdom is again playing an active role in the first committee of the United Nations general assembly which convened in New York on 17 October.

Middle East

35. **Mr. Marlow:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the situation in the middle east.

Mr. Waldegrave: We shall continue to encourage the parties to the Arab/Israel dispute to pursue the search for peace, and to agree arrangements for an international conference.

Narcotics Trade

38. **Mr. Couchman:** To ask the Secretary of State for Foreign and Commonwealth Affairs what efforts Her Majesty's Government are making to negotiate asset seizure agreements with third countries to counter international trade in narcotics.

Mr. Eggar: We have signed agreements to trace, freeze and confiscate the proceeds of drug trafficking this year with the United States of America, Bahamas, Canada and Australia. Negotiations are well advanced with several other Governments and talks have opened with a further 40 countries.

United Arab Emirates

41. **Mr. Pawsey:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the current state of United Kingdom relations with the United Arab Emirates.

Mr. Waldegrave: Our relations with the United Arab Emirates are long established and very good.

Zimbabwe

42. **Mr. McLoughlin:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met the Foreign Minister of Zimbabwe; and what subjects were discussed.

Mrs. Chalker: My right hon. and learned Friend last met the Zimbabwean Foreign Minister on 26 September 1988 in New York when he called on President Mugabe. They discussed my right hon. and learned Friend's recent visit to Africa, our bilateral relations, and recent developments in southern Africa.

Mozambique

43. **Mr. Jacques Arnold:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he has any plans to visit Mozambique.

Mrs. Chalker: My right hon. and learned Friend visited Mozambique from 17 to 19 September. He had friendly and useful talks with President Chissano, the Mozambican Foreign Minister and other senior Ministers. The visit confirmed our assessment that the Mozambique Government are following pragmatic policies, both internally and in their relations with their neighbours.

Mexico

45. **Mr. Hardy:** To ask the Secretary of State for Foreign and Commonwealth Affairs whether he has any plans to visit Mexico.

Mr. Eggar: My right hon. and learned Friend has no present plans to visit Mexico.

Tanzania

46. **Mr. Baldry:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he has any plans to pay an official visit to Tanzania.

Mrs. Chalker: My right hon. and learned Friend visited Tanzania between 14 and 17 September. He has no plans for a further visit.

Cyprus

47. **Mr. Cox:** To ask the Secretary of State for Foreign and Commonwealth Affairs what discussion he had with the President of Turkey on his recent visit on the presence of Turkish troops in the occupied area of northern Cyprus; and if he will make a statement.

Mrs. Chalker: This subject was raised in my right hon. and learned Friend's talks with the Turkish Foreign Minister during President Evren's state visit. He made clear our view that the withdrawal of Turkish troops would be an important element of any final settlement.

Kenya

48. **Mr. Nicholas Bennett:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met the Foreign Minister of Kenya; and what subjects were discussed.

Mrs. Chalker: My right hon. and learned Friend last met Dr. Ouko on 11-12 September during his recent visit to east Africa. They discussed a range of regional, bilateral and other issues.

Prince Sihanouk

49. **Mr. Mullin:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he has any plans to meet Prince Sihanouk of Cambodia; and if he will make a statement.

Mr. Eggar: Prince Sihanouk is paying a working visit to Britain on 25 and 26 October in the course of which my right hon. Friend the Prime Minister and my right hon. and learned Friend the Secretary of State will discuss with him the current situation in Cambodia and the prospects for progress towards a negotiated settlement.

Eastern Europe

50. **Mr. Ward:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last had the opportunity to raise the issue of human rights in Eastern Europe with the Foreign Ministers of the countries concerned.

Mr. Waldegrave: We attach great importance to the observance of human rights commitments. We take every suitable opportunity of raising abuses of human rights, both in general terms and in relation to individual cases where appropriate, with the Governments concerned.

My right hon. and learned Friend the Secretary of State for Foreign Affairs last raised such issues in meetings with his counterparts in Eastern Europe as follows:

Romania:	November 1987 in London
Czechoslovakia:	June 1987 in London
Bulgaria:	September 1987 in London
GDR:	November 1986 in London
Poland:	December 1987 in London

In addition, he wrote to the Romanian Foreign Minister in September this year about the human rights implications of Romania's rural redevelopment programme ("systematisation").

Hungary's human rights record, though not faultless, is good by comparison with its neighbours. We have not had cause to raise human rights issues in recent ministerial contacts.

EC (Spanish Presidency)

51. **Mr. Dykes:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he expects to hold talks in the near future with his Spanish counterpart and the Spanish Minister of EEC Affairs on the suggestions which the United Kingdom intends to put forward for the period of the Spanish presidency, beginning on 1 January 1989.

Mrs. Chalker: My right hon. and learned Friend saw the Spanish Foreign Minister yesterday and discussed a number of issues including future developments in the European Community. I am also in regular contact with my Spanish opposite number on these issues.

Test Ban Treaty

52. **Mr. Strang:** To ask the Secretary of State for Foreign and Commonwealth Affairs what progress has been made towards reaching agreement on a comprehensive test ban treaty; and if he will make a statement.

Mr. Waldegrave: The negotiations on nuclear testing between the United States and Soviet Union appear to be making satisfactory progress towards their first goal: ratification of the 1974 threshold test ban treaty and the 1976 peaceful nuclear explosions treaty. The ultimate objective is the complete cessation of nuclear testing as part of an effective disarmament process. Our position on a comprehensive test ban was contained in the answer given on 27 June by my hon. and learned Friend the Member for Putney (Mr. Mellor): a comprehensive test ban remains a long-term goal; but we shall continue to rely for our security on a nuclear deterrent for the foreseeable future and that means a continuing requirement to conduct tests in order to ensure that our nuclear weapons remain effective and up to date.

Brazil

53. **Mr. Maples:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the current state of Anglo-Brazilian relations.

Mr. Eggar: The United Kingdom enjoys traditionally good relations with Brazil, which we are seeking to develop. We welcome her return to democracy. Brazil is by far our largest export market in Latin America. I am looking forward to visiting Brazil myself from 4-14 November. My right hon. Friend the Minister of State Department of Energy is in Brazil this week.

Pakistan

54. **Mr. McKelvey:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he next intends to visit Pakistan to discuss progress towards the restoration of democracy.

Mr. Eggar: My right hon. and learned Friend has no plans at present to visit Pakistan.

Soviet Union (Ministerial Meetings)

55. **Mr. Yeo:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met Foreign Minister Shevardnadze of the Soviet Union; and what subjects were discussed.

Mr. Waldegrave: My right hon. and learned Friend last met Mr. Shevardnadze in New York on 26 September. They discussed arms control questions; regional conflicts, including the role of the United Nations in resolving them; CSCE and human rights; and bilateral relations.

68. **Mr. Sims:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the current state of Anglo-Soviet relations.

Mr. Waldegrave: Anglo-Soviet relations are better than for many years, and we welcome this. We maintain an active dialogue with the Soviet leadership in order to secure progress in arms control; on the resolution of regional conflicts; greater respect for human rights; and increase in trade; and more contacts at all levels between our two peoples.

Uganda

56. **Mr. Devlin:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met the Foreign Minister of Uganda; and what subjects were discussed.

Mrs. Chalker: My right hon. and learned Friend last met Mr. Ssemogerere during his visit to Uganda between 13 and 14 September. They discussed a range of bilateral, regional and other issues.

Gibraltar

58. **Mr. Colvin:** To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with Spanish authorities and the new Chief Minister of Gibraltar on the implementation of the Gibraltar airport agreement with Spain.

Mrs. Chalker: My right hon. and learned Friend has made clear, both to the Spanish authorities and to the Chief Minister, that we believe that the agreement is very much in Gibraltar's interest; that we hope that the Gibraltar House of Assembly will take steps to implement it; but that we will not attempt to impose it on the people of Gibraltar.

Soviet Union

59. **Mr. Gow:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he next intends to visit the Soviet Union.

Mr. Waldegrave: Having visited the Soviet Union in February this year my right hon. and learned Friend has no immediate plans for a return visit. I will pay a visit to the Soviet Union as soon as dates can be agreed.

Common European Policies

62. **Mr. Knox:** To ask the Secretary of State for Foreign and Commonwealth Affairs when he next proposes to have discussions with his European Community partners concerning the development of common European foreign policies.

Mrs. Chalker: My right hon. and learned Friend attended an informal weekend meeting in Yannina on 15-16 October. All his colleagues from the EC were present. They had an excellent discussion of political co-operation matters, particularly the prospects for further developments in East-West relations with Europe.

Arms Reductions

63. **Mr. Cohen:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement about the current state of conventional arms reduction negotiations.

Mr. Waldegrave: Informal discussions are taking place in Vienna between representatives of NATO and the Warsaw pact aimed at agreeing a mandate for negotiations on conventional stability covering the Atlantic/Urals area. Few outstanding difficulties remain to be settled but the talks cannot begin before the conclusions of the Vienna CSCE review meeting. This in turn is dependent on achieving a satisfactory outcome in respect of human rights. Meanwhile the MBFR negotiations, now in their 16th year, continue in Vienna but with little prospect of substantive agreement.

Central Europe

64. **Mr. Boswell:** To ask the Secretary of State for Foreign and Commonwealth Affairs whether he will make a statement on the latest security developments in central Europe.

Mr. Waldegrave: Implementation of the INF treaty has now begun involving inter alia the withdrawal of Soviet and US LRINF/SRINF missiles from central Europe. At the same time Warsaw pact and Alliance negotiators are meeting in Vienna with a view to agreeing a mandate for new negotiations on conventional stability. While these will cover the whole Atlantic/Urals area they are likely to focus on areas where the concentration of forces is greatest, notably in central Europe. It is hoped the conventional negotiations will begin within the next few months, in parallel with further negotiations on confidence building. Meanwhile the MBFR talks, which are directly concerned with the reduction of armed forces in central Europe, continue in Vienna but with little prospect of early agreement.

Gibraltar Airport

67. **Mr. Stanbrook:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the current state of Anglo-Spanish relations in the light of the continuing restrictions imposed by Spain on British military aircraft wishing to use Gibraltar airport.

Mrs. Chalker: I refer my hon. Friend to my answer to the hon. Member for Hexham (Mr. Amos). We continue

to press the Spanish authorities to lift the restrictions imposed on British military aircraft using Gibraltar airport, but regrettably they have not yet done so.

Visa Fees

70. **Mr. Madden:** To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has received about introducing last June a full visa fee for children entering the United Kingdom.

Mr. Eggar: My right hon. and learned Friend has received no representations on this point.

Western European Union

Mr. Spearing: To ask the Secretary of State for Foreign and Commonwealth Affairs what consultation has occurred between the members of the Western European Union and those members of the European Economic Community, who are not members of the Union, concerning the conclusion of paragraph 2 of the Union's adopted document, "Platform of European Security Interests", which states that Union members are convinced that the construction of an integrated Europe will remain incomplete as long as it does not include security and defence.

Mr. Waldegrave: No formal consultations have taken place.

Economic and Monetary Union

Mr. Spearing: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list those proposals placed before the Council of Ministers of the European Economic Communities which implement the objective of the progressive realisation of economic and monetary union, as adopted at the Hanover European Council.

Mrs. Chalker: No proposals on economic and monetary union have been considered by the Council of Ministers since June. The committee tasked by the Hanover European Council with studying and proposing concrete stages leading towards economic and monetary union is due to complete its proceedings in good time to enable the Ministers for Economic Affairs and for Finance to examine its results before the European Council in Madrid in June 1989.

Falkland Islands

Mr. Chris Butler: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on economic progress in the Falkland Islands.

Mrs. Chalker: The most recent estimates indicate that the GNP of the Falkland Islands increased threefold from 1986-87 to 1987-88, from approximately £9·9m to approximately £30m. I expect this increase to be sustained in 1988-89. The islands' welcome prosperity has enabled the Falkland Island Government to finance an increasing number of its own development projects in fisheries, local infrastructure and farming.

Council of Ministers

Mr. Spearing: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list those decisions of the European Economic Community Council of Ministers which have been taken by qualified majority vote in accordance with the provisions of the Single European Act since it came into force, indicating those in which the representatives of the United Kingdom *(a)* abstained and *(b)* voted in the minority when a qualified majority was obtained.

Mrs. Chalker: The information on Council decisions is not available in the form requested. About 100 decisions have been taken by majority vote since the Single European Act came into force.

Political Prisoners (South Africa)

Mr. John Evans: To ask the Secretary of State for Foreign and Commonwealth Affairs what estimate his Department has of the number of political prisoners held in South African gaols.

Mrs. Chalker: I regret that we have no reliable estimate of the number of political prisoners in South African jails.

Council of Ministers (Standing Orders)

Mr. Spearing: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will place in the Library the standing orders or their equivalent of the Council of Ministers of the European Economic Community.

Mrs. Chalker: I have made arrangements for a copy of the rules of procedure of the Council, published by the Office for Official Publications of the European Communities, to be placed in the Libraries of both Houses.

EC Treaties

Mr. Spearing: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps he has taken to publicise the availability of the Treaty Series No. 47 (1988) treaties establishing the European Communities (CM. 455).

Mrs. Chalker: I am grateful for this opportunity to draw the attention of the House to the consolidated version of the three basic Community treaties as amended by the Single European Act, recently published by HMSO. Copies of the Command Paper have been deposited in the Library of the House.

Publication of the Cm. 455 was announced in HMSO's Daily List and on Prestel in the normal way. It will be listed in HMSO's September monthly catalogue and will be one of the featured titles in the July-September "New Books from HMSO" leaflet.

In addition, HMSO is planning to mail fuller details, with information on other titles of European interest, to some 5,000 bookshops, businesses and libraries shortly.

Mr. Spearing: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list any statutes, treaties or other agreements which define the scope and manner of the internal and external relationships and obligations of member states of the European Economic Communities, other than those contained in Treaty Series 47 of 1988 (Cm. 455).

Mrs. Chalker: There are none.

European Union

Mr. Spearing: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) if he will list in the *Official Report* those publications or speeches by Ministers which express the policy of Her Majesty's Government towards the interpretation of the concept of European union;

(2) what definition of the term European union is currently accepted by Her Majesty's Government; and what is Her Majesty's Government's policy towards European union.

Mrs. Chalker: I refer the hon. Gentleman to the speech of my right hon. and learned Friend the Secretary of State on 23 April 1986 at column 325.

Kampuchea

Mr. Andrew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make it his policy to initiate the convening of an international conference to promote a settlement for the Kampuchean people, containing international guarantees against the return to power of Pol Pot and his immediate followers.

Mr. Eggar: We fully support the efforts of Prince Sihanouk and the Association of South East Asian Nations to bring about a negotiated political settlement in Cambodia. Naturally we are ready to help when and where we can. This might include eventual participation in an international conference if, in due course, that seemed to be the best way to proceed.

Mr. Andrew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make it his policy to promote the exclusion of the Pol Pot faction of the Khmer Rouge from the United Nations.

Mr. Eggar: We see no reason to change our policy on the question of Cambodia's seat at the United Nations, which implies neither recognition of the Coalition Government of Democratic Kampuchea (we recognise only states, not Governments) nor support for the abhorrent Pol Pot.

Arms Sales

Mr. Menzies Campbell: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make it his policy to propose the establishment of a United Nations-backed comprehensive register of international arms sales.

Mr. Eggar: In 1982 we proposed that all states should report to the United Nations the value of their military production and of their imports and exports of arms. We followed up these proposals at the recent Third United Nations special session on disarmament with a call for greater openness on all types of international transfer of conventional weapons; we raised the possibility at that time of establishing a United Nations register of arms transfers on a universal and non-discriminatory basis. We believe that such a register could provide a means of monitoring measures taken to restrain the accumulation of conventional arms.

Anglo-United States Relations

Mr. Jack: To ask the Secretary of State for Foreign and Commonwealth Affairs when he last had consultations with the United States Secretary of State about Anglo-United States relations.

Mr. Eggar: My right hon. and learnd Friend met Mr. Shultz for bilateral talks in the margins of the United Nations general assembly on 29 September.

North Atlantic Assembly (Parliamentary Delegation)

Mr. Page: To ask the Secretary of State for Foreign and Commonwealth Affairs what changes have been made in the composition of the United Kingdom parliamentary delegation to the North Atlantic Assembly.

Mr. Waldegrave: Mr. James Lamond, MP, Mr. Frank Cook and Lord Lucas of Chilworth have replaced Mr. David Clark, MP, Mr. Kevin McNamara, MP and Lord Colnbrook as members of the delegation.

Black Rhino Horn

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs if any representation have been made to the Government of North Yemen regarding the use of black rhino horn for dagger handles; and if he will make a statement.

Mr. Eggar: No representation has been made to the Government of North Yemen regarding the use of black rhino horn for dagger handles.

Vicuna

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs what information he has about current vicuna stocks in Hong Kong; and if he will make a statement.

Mr. Eggar: Since the enactment in 1976 of the Animals and Plants (Protection of Endangered Species) Ordinance, which covers vicuna, the Hong Kong Authorities have not issued any licence for the import, export or possession of vicuna or any of its products. They therefore have no record of such stocks in the territory.

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make funds available to the Government of Peru to assist them in the project to expand vicuna population; and if he will make a statement.

Mr. Eggar: We are aware that the Peruvian Government are interested in expanding the vicuna population, but not aware of any request for financial assistance. We have recently conducted a review of our bilateral aid programme for Peru, and the question of vicuna was not raised by the Peruvian authorities.

Prime Minister (Tour Costs)

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs what additional costs were incurred by each of Her Majesty's embassies and high commissions arising from the tour by the Prime Minister to various countries in August 1988.

Mr. Eggar: All separately identifiable expenditure incurred by Her Majesty's embassies and high commissions is being reclaimed from the Office of the Minister of the Civil Service. Any residual costs not separately identified will have been absorbed within posts' existing local budgets.

Iran-Iraq (United Nations Force)

Mr. Tony Banks: To ask the Secretary of State for Foreign and Commonwealth Affairs what contribution towards the costs of the United Nations observation force supervising peace between Iran and Iraq has *(a)* been sought and *(b)* been paid.

Mr. Eggar: According to the latest bulletin from the United Nations the total requests for contributions towards the costs of the United Nations Iran-Iraq Military Observer Group amount to $35·2 million. Of this total $16·2 million have so far been paid. The assessed contribution of the United Kingdom for the first three months of the operation of the force (9 August to 8 November 1988) is $2,085,184. This has been paid.

TRANSPORT

East-London River Crossing

Mr. Spearing: To ask the Secretary of State for Transport if he will publish the terms of reference given to the consultants contracted to report on the alternative design of the proposed east London river crossing, showing separately those related to *(a)* navigational requirements, *(b)* maximum height of structure and *(c)* any limit on additional cost over that estimated for the existing design; and if he will request a report on the design and cost implications of incorporating facilities for a single or double line for (i) a conventional railway and (ii) an extension of the docklands light railway.

Mr. Channon: The terms of reference of the review are as follows:

(a) to ascertain whether there is, within the broad order of costs of the Department's proposed bridge, an alternative design which would be practicable, acceptable, satisfy the objectives of the east London river crossing scheme and keep options open for the future use of London City airport;

(b) to consult interested parties including:

(i) the Port of London Authority

(ii) the Civil Aviation Authority

(iii) the Royal Fine Arts Commission

Consideration of additional rail links across the Thames is a matter for the public transport operators concerned.

Mr. Spearing: To ask the Secretary of State for Transport what are the estimated costs of the newly approved east London river crossing and associated roads, broken down under the headings *(a)* roadworks north of the Thames, *(b)* the river crossing by one or more possible means or designs of bridge, *(c)* roadworks south of the Thames, *(d)* environmental conservation elements in *(a)* to *(c)* above, globally or individually and *(e)* the Oxleas wood tunnel and other conservation works recommended by his inspector; what is the approximate percentage cost of *(e)* compared to the estimated total; and what are his reasons for not authorising expenditure under this heading.

Mr. Channon: The estimated costs of the east London river crossing, as presented at the public inquiry, excluding land acquisition and supervision costs, at average 1984 prices are as follows:

(a) Works north of the Thames: £21 million.

(b) The Thames bridge proposed by the Department: £56 million.

(c) Works south of the Thames: £66 million.

(d) It is not possible to identify separately all the environmental conservation elements of a scheme as they are not all additional items but integral parts of the scheme design. Identifiable environmental conservation measures in *(a)* to *(c)* above, including new footpaths, footbridges and landscaping, amount to some £19 million. About £1 million will be spent north of the river and the remainder south of the Thames.

(e) The inspector estimated that his recommendation of a tunnel under part of Oxleas wood and associated works would cost about an additional £10 million. Additional environmental measures and cycleways recommended by the inspector will cost some £750,000. These recommendations approximate to 8 per cent. of the total estimated works costs. The inspector's tunnel recommendation would also have required the deletion of the south facing slip roads at the Shooters hill interchange. Having carefully weighed the advantages of the inspector's proposals against the disadvantages, my right hon. Friend the Secretary of State for the Environment and I were not satisfied that the additional cost of the tunnel and the loss of benefits from deletion of the slip roads were justified.

Driving Tests (Cancellation)

Mrs. Wise: To ask the Secretary of State for Transport if he will reduce the amount of notice which must be given by a learner driver to cancel a driving test without loss of fee from the current time of 10 days.

Mr. Peter Bottomley: No. The 10 days' notice was introduced on 27 June this year to cut the number of wasted test periods, shorten waiting times for all candidates and keep down fees.

Mrs. Wise: To ask the Secretary of State for Transport (1) if he will ensure that at least three days notice of cancellation of a driving test is given by his Department, except if the reason is exceptionally bad weather;

(2) if he will ensure that driving tests are not cancelled by his Department without notice.

Mr. Peter Bottomley: Every effort is made to give as much notice of cancellations as possible. Circumstances such as sudden illness of an examiner may sometimes make a last-minute cancellation unavoidable. In such cases, priority is given to re-booking the candidates involved; and claims for reasonable out-of-pocket expenses are considered sympathetically.

General Secretary, ASLEF

Mr. John Evans: To ask the Secretary of State for Transport when he last met the general secretary of the Associated Society of Locomotive Engineers and Firemen; and what was discussed.

Mr. Portillo: My right hon. Friend the Secretary of State met the general secretary of ASLEF on 12 July, when he received a deputation from the railway unions about a report which they commissioned on quality of service on British Rail.

Channel Tunnel

Mr. Spearing: To ask the Secretary of State for Transport what proposals he has received concerning private funding of all or part of any new rail link between London and the Channel tunnel.

Mr. Portillo: British Rail will be inviting proposals from the private sector shortly.

Passenger Transport Companies

Mr. Pawsey: To ask the Secretary of State for Transport if he will set out the programme for the disposal of passenger transport companies formed from the metropolitan county PTEs providing, where known, the proposed timetable for disposal together with any proposals for their subdivision into smaller parts.

Mr. Portillo: My right hon. Friend the Secretary of State has no powers to dispose of passenger transport companies formed from the old metropolitan county PTEs bus undertakings. My right hon. Friend recently announced his approval to the sale of Yorkshire Rider Ltd. to its management and employees.

Municipal Operators (Disposal)

Mr. Pawsey: To ask the Secretary of State for Transport if he will set out the programme for the disposal of English and Welsh municipal operators, providing, where known, the proposed timetable for disposal.

Mr. Portillo: My right hon. Friend the Secretary of State has encouraged local authorities and PTAs to consider disposing of their municipal bus companies but no powers presently exist to require this.

Fares (London)

Mr. Spearing: To ask the Secretary of State for Transport if he will state what instructions or other basis he hs given to the board of London Regional Transport which permits or requires it to raise fares on London bus and underground services to levels twice that of inflation.

Mr. Portillo: The level and structure of fares is a matter for the board of London Regional Transport.

London Rail Services (Congestion)

Mr. Spearing: To ask the Secretary of State for Transport when he received the joint report from British Rail and London Regional Transport concerning congestion on rail services in central London; when this will be made public; and if he will make a statement concerning his responses.

Mr. Portillo: My right hon. Friend the Secretary of State hopes to receive the report of the central London rail study and announce its main findings towards the end of the year.

Mr. Spearing: To ask the Secretary of State for Transport if, consequent to the receipt of the report by London Regional Transport and the British Railways Board on rail congestion in London, he will estimate the cost of extending the approved rail link from Heathrow to Paddington over two miles of new standard gauge tube tunnel to King's Cross, and investigate the implications of using such a line, and that proposed from Mottingham to King's Cross, as part of the London urban rail network.

Mr. Portillo: The central London rail study is taking account of the proposed new Heathrow-Paddington rail link. It is for British Rail and BAA to consider whether they wish to bring forward proposals to extend the link beyond Paddington.

Mr. Spearing: To ask the Secretary of State for Transport if, consequent to the receipt of the report by London Regional Transport and the British Railways Board on central London rail congestion, he will use his statutory power to require London Regional Transport and its subsidiaries to restore train frequency on London underground to that of pre-war or subsequent levels, where currently they do not reach such levels of service.

Mr. Portillo: The central London rail study is considering the scope for improving the utilisation of the existing network. We shall consider carefully any such proposals.

Dial-a-ride, London

Mr. Livingstone: To ask the Secretary of State for Transport what are his latest plans for the future of the London dial-a-ride service.

Mr. Portillo: There have been increases of 50 per cent. in funding and ridership since LRT assumed responsibility for funding the scheme. I am encouraging LRT in its objective of securing improvements in the utilisation of vehicles and drivers so that more people can benefit.

Train Punctuality and Complaints

Mr. Pawsey: To ask the Secretary of State for Transport if he will now seek to place a statutory duty on British Rail to provide information on train punctuality and complaints to the Central Transport Consultative Committee and to the local committees.

Mr. Portillo: I understand that BR already provides the CTCC and TUCCs with detailed monitoring information on performance against quality standards including punctuality. Perhaps my hon. Friend could write if there is a particular problem he has in mind.

British Rail (Investment)

Mr. Pawsey: To ask the Secretary of State for Transport if he will give the levels of investment for British Rail for 1985-86, 1986-87 and 1987-88 together with the anticipated level of investment for 1988-89, 1989-90 and 1990-91, and in addition the figures to be broken down by region.

Mr. Portillo: The levels of British Rail investment for the years in question are as follows:

	£ million	
	Cash	*1988-89 prices*
1985-86	412	462
1986-87	411	447
1987-88	543	567

BR's 1988 corporate plan shows an increasing investment programme, with total investment expenditure of around £2bn over the three years to 1990-91 (at current prices).

BR does not break the figures down on a regional basis.

Manchester Airport Rail Link

Mr. Alfred Morris: To ask the Secretary of State for Transport what recent developments there have been in regard to the Manchester airport rail link; and if he will make a statement.

Mr. Portillo: I have recently received a statement from the PTA in support of its case that this link is financially viable. I am studying that, and also British Rail's views on the need for financial support from the PTE. I have therefore asked greater Manchester PTA to set out for me the way in which it sees the link being financed, including the scope for private sector funding.

PSV and Bus Operator Licences

Dr. Marek: To ask the Secretary of State for Transport, how many cheques for applications for *(a)* PSV operator, and *(b)* bus operator licences bounced in the last 12 months for which figures are available.

Mr. Peter Bottomley: Figures on bouncing cheques are not readily available.

Driving Tests

Dr. Marek: To ask the Secretary of State for Transport how many driving tests were carried out in the last 12 months for which figures are available; and how many cheques that were issued in payment for the driving test fee bounced.

Mr. Peter Bottomley: A total of 2,096,181 driving tests of all types were conducted in the financial year 1987-88. Information about numbers of bouncing cheques is not readily available.

Driving Licences (Recall)

Dr. Marek: To ask the Secretary of State for Transport in what circumstances a driving licence can be recalled once it is issued.

Mr. Peter Bottomley: Powers exist to revoke an ordinary driving licence for medical reasons or if it was granted in error or contained an error or omission. In addition, the statutorily independent traffic commissioners may suspend or revovke a vocational driving licence if they are not satisfied that the holder meets the required standards of fitness, or if conduct means that the holder is not a proper person to have the vocational licence in question.

MFV Inspire (Sinking)

Mr. Foulkes: To ask the Secretary of State for Transport what information he has about the sinking of the MFV Inspire on 5 September; what plans he has for an inquiry; what other vessels were known to be in the vicinity at the time; and if he will make a statement.

Mr. Portillo: One of my Department's marine surveyors is investigating the circumstances surrounding this tragic accident. His investigation will include consideration of whether any other vessels were in the vicinity of the Inspire at the time that she was lost.

Collisions and Sinkings

Mr. Foulkes: To ask the Secretary of State for Transport what incidents have been reported to him in the last 12 months involving collisions, sinkings or other interactions between vessels in the Irish sea, firth of Clyde and Atlantic coast of Scotland.

Mr. Portillo: The following incidents have been reported to my Department between 1 October 1987 and 30 September 1988.

General Lapas (Phillipines) (Merchant Vessel (MV)) Osco Spirit (Liberia) (MV)—In collision in Belfast Lough on 29.10.87

Tipperary (Ireland) (MV) Sumburgh Head (Bermuda) (MV)—In collision off Dublin on 18.2.88

Drum (Yacht) Otis (Submarine)—Yacht contacted unlit submarine 3½ miles south of Mull of Kintyre 27.7.88

Ardlough (Antigua) (MV)—Flooded and sank in the Irish Sea on 26.9.88

Ocean Gain (UK fishing vessel) (FV)—Founded off Holyhead on 1.3.88

Mhairi (UK FV)—Capsized and sank off the West Coast of Iona on 17.1.88

Alert II (UK FV)—Founded off the Isle of Muck on or about 3.5.88

St Patrick (French FV)—Struck North Shoals and sank on 14.2.88

Emma Jane (UK FV)—Flooded and sank 3 miles North East of Anglesey on 18.7.88

Kaya (UK FV)—Collided in Loch Broom on 22.7.88

Inspire (UK FV)—Capsized and sank off Cemaes Head, Cardigan, on 5.9.88

Village Belle III (UK FV)—Struck a rock whilst departing from Kirkcudbright on 6.9.88 and subsequently sank.

Mr. Foulkes: To ask the Secretary of State for Transport what representations he has received about recent loss of vessels, incidents and collisions in the Irish sea; what action he has taken as a result; and if he will make a statement.

Mr. Portillo My Department has received two representations. These are being dealt with by way of correspondence with my officials.

Roads and Utilities (Report)

Mr. Spearing: To ask the Secretary of State for Transport what further action he has taken, or expects to take, considering on the Horne report on roads and utilities.

Mr. Peter Bottomley Proposals for legislation, developed in consultation with the street works advisory committee, are advancing.

Progress is being made jointly with the utilities and highway authorities in producing the technical systems and documents required to support the new arrangements, including specifications for reinstatements, a code of practice for diversionary works, training and certification of workmen and a computerised street works register.

Legislation will be introduced when a suitable opportunity can be found.

Foreign Reflaggings

Mr. Tony Banks: To ask the Secretary of State for Transport (1) how many foreign reflaggings to the ensign have occurred since the introduction of the Armilla patrol; and which countries' ships have been involved;

(2) if any contributions towards the cost of the Armilla patrol have been sought from countries or companies whose ships have reflagged to the ensign; and if he will make a statement.

Mr. Portillo: It is not possible to provide this information going back to September 1980, except at a wholly disproportionate cost.

No contributions have been sought towards the cost of the Armilla patrol and there is no intention of seeking any from countries or companies whose ships have reflagged.

Buses (London)

Mr. Spearing: To ask the Secretary of State for Transport if he will state the timetable he now envisages for the privatisation of London Buses Ltd. and deregulation of buses in London, respectively; and what steps he is taking to ensure the continuity of major existing bus routes prior to and after the implementation of each of these measures.

Mr. Portillo: We intend to deregulate bus services in London in the early 1990s. No timetable has been set. Detailed proposals will be brought forward in due course.

Unlicensed Vehicles

Mr. Tony Banks: To ask the Secretary of State for Transport how many reports of unlicensed vehicles have been received by the London enforcement office in the period from 1 January 1988 to date.

Mr. Peter Bottomley: 252,752.

Written Answers to Questions

Thursday 20 October 1988

ENVIRONMENT

Private Housing (Basic Amenities)

Mr. Pike: To ask the Secretary of State for the Environment if he will list those local authorities in whose area more than 5 per cent. of the private housing stock are without basic amenities.

Mr. Trippier: The information requested is not available.

Unfit Dwellings

Mr. Pike: To ask the Secretary of State for the Environment if he will list those local authorities by areas in which 4·5 per cent. or more of the dwellings are considered unfit.

Mr. Trippier: The following 56 English housing authorities have reported, in their 1988 housing investment programme returns, that 4·5 per cent. or more of the total stock in their areas at 1 April 1988 was unfit:—

Allerdale, Barnsley, Birmingham, Blackburn, Bolsover, Bolton, Bradford, Brent, Brighton, Bristol, Bury, Camden, Caradon, Cleethorpes, Ealing, Gedling, Great Grimsby, Hackney, Hammersmith and Fulham, Haringey, Hastings, Hyndburn, Islington, Kensington and Chelsea, Kingston upon Hull, Lambeth, Leeds, Leicester, Malvern Hills, Manchester, Mendip, Mid Suffolk, Newcastle upon Tyne, Newham, Oswestry, Penwith, Preston, Reading, Richmond upon Thames, Rochdale, Rossendale, Rugby, Salford, Sandwell, South Herefordshire, Southwark, St. Helens, Stoke on Trent, Sutton, Tameside, Thurrock, Tower Hamlets, Walsall, Waltham Forest, Wandsworth, Wolverhampton.

Five authorities have not yet made a return and a further 21 have not provided estimates of the numbers of unfit dwellings covering their private sector stock.

Public Sector Housing

Mr. Pike: To ask the Secretary of State for the Environment when he will publish the report his Department has now received from Glasgow university's centre for housing research on public sector housing; and if he will make a statement.

Mr. Trippier: The report will be published by HMSO in the new year.

Mr. Pike: To ask the Secretary of State for the Environment what was the cost to his Department of the report he has now received from Glasgow university's centre for housing research; and if he will make a statement.

Mr. Trippier: The contract is estimated to cost about £180,000 excluding VAT.

Rural Development Commission

Mr. Baldry: To ask the Secretary of State for the Environment what progress has been made by the Rural Development Commission in encouraging and diversifying rural enterprise.

Mr. Ridley: The Rural Development Commission came into being on 1 April 1988 through the merger of the Development Commission with its main agency, the Council for Small Industries in Rural Areas. The annual report of the two constituents bodies for 1987-88 has been published today, and I have placed copies in the Library of the House.

I am grateful to the Lord Vinson and his fellow commissioners for the efforts which they have devoted to fostering the economic and social development of rural areas and which have led to the achievements described in the report. There is now a general recognition of the important part that small-scale industry must play in maintaining economic activity in rural areas and there has been a considerable increase in prosperity in many rural development areas. I welcome the commission's intention to review its objectives in the light of changed conditions in order to maximise the stimulus it provides for rural enterprise. I shall also take full account of advice given by the commission about other problems of rural areas and possible approaches to resolving them.

PRIME MINISTER

Hillmorton, Rugby

Q131. **Mr. Pawsey:** To ask the Prime Minister if she has any plans to make an official visit to Hillmorton, Rugby.

The Prime Minister: I have at present no plans to do so.

Neutron and Proton Therapy

Q156. **Dr. Bray:** To ask the Prime Minister what advice she has received from the Medical Research Council, the Imperial Cancer Research Fund, the Cancer Research Campaign, the United Kingdom Co-ordinating Committee for Cancer Research, the Advisory Council on Science and Technology or any other body regarding the £6 million grant to a London hospital for a cyclotron for neutron and proton therapy; and if she will make a statement.

The Prime Minister: The Minister for Health announced on 7 June the award of a grant to the Cyclotron Trust as a contribution towards the charitable funds it is raising to provide a cyclotron at St. Thomas's hospital to improve the care of cancer patients. I have received a letter from Sir Raymond Hoffenberg, chairman of the United Kingdom Co-ordinating Committee on Cancer Research, and a reply has been sent today.

Engagements

Mr. Barry Field: To ask the Prime Minister if she will list her official engagements for Thursday 20 October.

Mr. Wigley: To ask the Prime Minister if she will list her official engagements for Thursday 20 October.

Mr. Butler: To ask the Prime Minister if she will list her official engagements for Thursday 20 October.

Mr. Ieuan Wyn Jones: To ask the Prime Minister if she will list her official engagements for Thursday 20 October.

Mr. Skinner: To ask the Prime Minister if she will list her official engagements for Thursday 20 October.

Mr. Harry Greenway: To ask the Prime Minister if she will list her official engagements for Thursday 20 October.

Mr. Pike: To ask the Prime Minister if she will list her official engagements for Thursday 20 October.

Mr. Stern: To ask the Prime Minister if she will list her official engagements for Thursday 20 October.

The Prime Minister: This morning I presided at a meeting of the Cabinet and had meetings with ministerial colleagues and others. In addition to my duties in the House I shall be having further meetings later today, including one with the Premier of the state of South Australia.

Dental and Optical Examinations

Mr. Barry Jones: To ask the Prime Minister if she will take steps to seek to exempt Wales from the provisions of the Health and Medicines Bill concerning charges for dental and optical examinations; and if she will make a statement.

The Prime Minister: On enactment the provisions of the Health and Medicines Bill will apply throughout Great Britain. The Government see no reason to vary that.

TRADE AND INDUSTRY

Barlow Clowes (Report)

Mr. Nicholas Winterton: To ask the Chancellor of the Duchy of Lancaster when he now expects to be able to publish the report of the internal inquiry into the role of his Department in the collapse of the Barlow Clowes companies.

Mr. Maude: I refer my hon. Friend to the statement made today by my right hon. Friend the Chancellor of the Duchy of Lancaster.

Trade Descriptions Act 1972

Mr. John Marshall: To ask the Chancellor of the Duchy of Lancaster when the terms of the successor regime to replace the Trade Descriptions Act 1972, will be laid before Parliament.

Mr. Forth: I laid before Parliament yesterday the Trade Descriptions (Place of Production) (Marking) Order 1988. This will require goods to be marked with or accompanied by a statement of the place of production, if the goods are presented in a way which is likely to give consumers the impression that the goods were manufactured or produced in a different place. Subject to the parliamentary procedures, the order will come into force on 31 December, at the same time as the repeal of the 1972 Act. The order bringing into force the repeal of the 1972 Act was laid before Parliament in draft on 29 July.

Regional Development Grant

Mr. John Marshall: To ask the Chancellor of the Duchy of Lancaster whether he will make a statement about payment of regional development grant.

Mr. Newton: My right hon. Friends the Secretaries of State for Scotland and for Wales and I have decided that the current two-month waiting period for interim payments under the revised regional development grant scheme will be lifted tomorrow. Payments which are at present held up by the waiting periond will be made as soon as practicable. This will be of immediate benefit to companies operating in the development areas, particularly in the light of the increased case processing times which have resulted from the surge in applications before the scheme closed last March.

Small Companies

Mr. John Marshall: To ask the Chancellor of the Duchy of Lancaster if he is yet in a position to announce the outcome of the Government's review of audit requirements for small companies.

Mr. Maude: On 22 May 1986, my hon. and learned Friend the Member for Folkestone and Hythe (Mr. Howard) announced that the Government had decided to retain the statutory requirement for small companies to have their accounts audited. Since that announcement, the Government have considered again the arguments for and against the compulsory audit of small companies. We still believe that the involvement of an independent professional accountant such as the audit requirement entails is likely to improve the reliability of accounts and provide a continuing protection against fraud. We have looked at possible alternative ways of achieving these objectives without requiring a full-scale audit, but have concluded that none of the alternatives offers sufficient advantages over the audit. We do not, therefore, propose to remove the statutory requirement.

EMPLOYMENT

Coal Industry

Mr. Skinner: To ask the Secretary of State for Employment what steps he is taking together with British Coal to reduce the 130 per cent. increase in underground fires between 1979 and 1986; and if he will make a statement.

Mr. Nicholls: The number of underground fires in mines owned by the British Coal Corporation increased from 68 in 1979 to 77 in 1985-86, an increase of about 13 per cent. The increasingly intensive use of plant during this period meant that the reduction in the number of mines had no significant effect on the potential of fire.

Reducing the number of underground fires is a primary objective of the Health and Safety Executive which is actively monitoring measures taken by British Coal. These include the application of more sophisticated inspection and detection techniques, the raising of standards in the specification, design, installation and maintenance of machinery and equipment and the continuing development of fire-resistant materials.

Labour Statistics

Mr. Kirkwood: To ask the Secretary of State for Employment whether he will consider decentralising the statistical function in his Department dealing with Scottish jobless totals to a separate unit located in Scotland.

Mr. Lee: The unemployment statistics are a by-product of the Great Britain wide system for paying unemployment-related benefits. Dissemination and briefing on the figures for Scotland are already the responsibility of a unit located in the ofice of the Training Agency's director for Scotland.

OVERSEAS DEVELOPMENT

China (Overseas Aid)

Mr. Harry Greenway: To ask the Secretary of State for Foreign and Commonwealth Affairs whether he has any plans to make an official visit to China to discuss overseas aid; and if he will make a statement.

Mr. Chris Patten: I visited China from 17-23 September during which time I signed on behalf of the United Kingdom a new memorandum of understanding providing aid and trade provision support for development projects up to a total value of £300 million. Soft loans and mixed credits will be available for projects to be agreed by the British and Chinese Governments. I also visited a number of British aid activities—particularly English language teaching and science and technology consultancies—which are providing excellent value for money and are strengthening Britain's growing political and commercial links with China.

ATTORNEY-GENERAL

County Court Judges (Northern Ireland)

Mr. Stanbrook: To ask the Attorney-General what remuneration is paid to county court judges in Northern Ireland.

The Solicitor-General: The salary of a county court judge in Northern Ireland is currently £45,800. County court judges are presently in group 6 of the judicial salary structure. The Government have decided that they should be paid at the higher group 5 rate for as long as they are required to carry out significantly different work from their counterparts elsewhere in the United Kingdom, as is currently the case. They will therefore be paid £50,180 with effect from 1 April 1988, increasing to £50,900 with effect from October, in line with the Government's implementation of the recommendations on judicial salaries in the 1988 report of the Top Salaries Review Body.

HOME DEPARTMENT

Right of Silence

Mr. Devlin: To ask the Secretary of State for the Home Department whether he intends to propose amendments of the law concerning the right of silence in England and Wales.

Mr. Hurd: I told the House on 18 May at columns *465-66* that I saw a strong case for changing the law in relation to the inferences which may be drawn from a failure to answer questions put to a suspect by the police. I considered that more careful work needed to be done before I could bring forward with confidence a specific proposal for legislation, and I set up a working group (comprising officials, members of the legal profession and a senior police officer) to carry out that further work and submit an early report with a view to legislation.

My right hon. Friend the Secretary of State for Northern Ireland has similarly reached the conclusion that the law of the province needs to be changed. He has laid before the House a draft Order in Council containing provisions to this effect.

I will seek the earliest opportunity after receiving the working group's report to bring forward legislation on this subject for England and Wales. Although the timing of change will inevitably be different in the two jurisdictions, the Government see a clear need for substantial changes to be made in both if the law is to be effectively enforced.

FOREIGN AND COMMONWEALTH AFFAIRS

Lincolnshire-Australia Links (Exhibition)

Mr. Quentin Davies: To ask the Secretary of State for Foreign and Commonwealth Affairs if he has considered an application for an exhibition relating to Lincolnshire links with Australia to be held in the Upper Waiting Hall, in the week beginning 31 October.

Mr Eggar: I understand that, under procedures agreed by the Services Committee, arrangements have been made with the authorities of the House for the exhibition to be held in the Upper Waiting Hall from 31 October to 4 November.

Departmental Staff

Mr. Sean Hughes: To ask the Secretary of State for Foreign and Commonwealth Affairs what are the latest available figures for his Department in the London pay area of the number of vacancies by grade and the proportion this is of the grade complement in London.

Mr. Eggar: In the diplomatic wing, there are currently 145·5 vacancies in all grades amounting to 2·6 per cent. of total complement. The majority are in clerical and technical support grades though the number in any grade fluctuates from month to month with changes in operational requirements and the recruitment cycle.

In the aid wing, there are 58 vacancies in all grades amounting to 10·9 per cent. of total complement. The majority are in clerical, secretarial and other support grades.

Mr. Sean Hughes: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will provide the latest available figures for his Department for *(a)* numbers of staff in receipt of local pay additions, by grade, *(b)* location of those offices awarding local pay additions and *(c)* annual cost.

Mr. Eggar: In the diplomatic wing of the Foreign and Commonwealth Office, local pay addition is being paid to a total of 927 members of staff, in the following grades:

	Number
Administrative Assistants	82
Administrative Officers	261
Diplomatic Service Grade 10 Officers	272
Secretarial Staff	307
Teleprinter Operators	5

All the staff work in FCO buildings in central London, and at Croydon. The annual cost is £462,100.

In the aid wing, local pay addition is being paid to a total of 189 members of staff, in the following grades:

	Number
Administrative Officers	104
Typing Managers	3
Secretarial Staff	82

All the staff are working at ODA headquarters at Eland house, London, SW1. The annual cost is £120,400.

Palestine

Mr. Atkinson: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a further statement on the situation in Palestine.

Mr. Waldegrave: The continuing violence in the occupied territories underlines the urgent need for a just and durable solution to the Arab-Israel dispute. This would be best achieved by the holding of an international conference, as the framework for negotiations between the parties concerned.

Anglo-Soviet Relations

Mr. Harry Greenway: To ask the Secretary of State for Foreign and Commonwealth Affairs what is his latest assessment of the effect upon Anglo-Soviet relations of the Union of Soviet Socialist Republics' policies of glasnost and perestroika; and if he will make a statement.

Mr. Waldegrave: Bilateral relations have greatly improved since Mr. Gorbachev assumed power in the Soviet Union. A more pragmatic Soviet approach to contentious issues such as Afghanistan and human rights, and greater Soviet willingness to facilitate exchanges of people and ideas, have contributed to this improvement. We have combined readiness to make use of these new opportunities with a realistic view of what has not changed, including Soviet military capabilities and the need for secure defence. This consistent approach has earned respect and brought results.

WALES

Welsh Development Agency (Asset Sales)

Mr. Barry Jones: To ask the Secretary of State for Wales if he will list in the *Official Report* the annual amount of cash raised by the Welsh Development Agency from the sale of assets for each of the years 1980 to 1988; if he will list for each of those years the details of the assets sold, including buildings and support services; if he will indicate the current target for such sales; and if he will make a statement.

Mr. Peter Walker: I refer the hon. Gentleman to the annual accounts of the Welsh Development Agency for the years up to and including 1987-88. The target for property and investment disposals for the current financial year is just over £15 million. Details of the assets sold to date could be provided only at disproportionate cost.

Pharmacy Technicians

Mr. Barry Jones: To ask the Secretary of State for Wales how many pharmacy technicians are employed in each of the health authorities in Wales.

Mr. Grist: The information which relates to whole-time equivalents as at 30 September 1988 is given in the following table:

District health authority	*Pharmacy technicians*
Clwyd	24·4
East Dyfed	5·8
Gwent	38·1
Gwynedd	10·0
Mid Glamorgan	21·8
Pembrokeshire	1·0
Powys	2·0
South Glamorgan	34·2
West Glamorgan	21·9

Mr. Barry Jones: To ask the Secretary of State for Wales (1) what steps he will take to enhance the status of pharmacy technicians with the National Health Service; and if he will make a statement;

(2) if he proposes to improve the salaries of pharmacy technicians; and if he will make a statement.

Mr. Grist: The salaries of pharmacy technicians are negotiated within committee "C" of the professional and technical staffs "B" Whitley council. The staff side has rejected an offer of a 5·5 per cent. increase in pay with effect from 1 April 1988, but further discussions are being arranged for later this month.

In recognition of the difficulties which are being experienced in some parts of the country in the recruitment of staff for hospital pharmacies, the management side of the Whitley council is undertaking a review of the duties and grading structure of pharmacy technicians.

Blood Supplies

Mr. Barry Jones: To ask the Secretary of State for Wales (1) if he will make a statement concerning the supply of blood to north Wales hospitals during the recent industrial dispute involving donor staff; and if he will list the numbers of staff employed in the blood donor service as it affects north Wales;

(2) what is the requirement of individual blood units for *(a)* Clwyd and *(b)* Gwynedd per week for the efficient running of the donor centres; and if he will list the numbers of individual donors for each of the months of 1988.

Mr. Grist: The collection of blood from donors and the supply of blood products to hospitals in Clwyd and Gwynedd is undertaken by the Mersey regional blood transfusion service. The information requested is not held by the Welsh Office although the Department maintains contact with the north Wales health authorities on the adequacy of blood supplies.

ROSPA (Wales)

Mr. Barry Jones: To ask the Secretary of State for Wales if he will increase his grant aid to the Royal Society for the Prevention of Accidents (Wales); how much he has given annually in real terms since 1979; what are his plans for funding levels for the years 1989-90, 1990-91 and 1991-92; and if he will make a statement.

Mr. Wyn Roberts: In order to secure best value for money, the amount of grant in aid to the Royal Society for the Prevention of Accidents up to 1992 is being reviewed and negotiations are still in progress. The annual grant paid since 1979 in real terms is as follows:

	£
1979-80	68,892
1980-81	52,099
1981-82	46,815
1982-83	51,584
1983-84	54,742
1984-85	52,424
1985-86	49,469
1986-87	47,851
1987-88	45,558

Mr. Barry Jones: To ask the Secretary of State for Wales how many representations he has received concerning the funding of the Royal Society for the Prevention of Accidents (Wales); and if he will make a statement.

Mr. Wyn Roberts: My right hon. Friend and I have received 15 representations from 12 different sources.

Mr. Barry Jones: To ask the Secretary of State for Wales if he will meet the Road Accident Prevention Federation for North and South Wales to discuss grant aid to the Royal Society for the Prevention of Accidents (Wales) up to 1991-92; and if he will make a statement.

Mr. Wyn Roberts: The amount of grant in aid given is a matter for discussion between the Royal Society for the Prevention of Accidents and the Welsh Office. The Road Accident Prevention Federation for North and South Wales has conveyed its views in writing to my right hon. Friend and these will be taken into account.

Road Accident Statistics

Mr. Barry Jones: To ask the Secretary of State for Wales how many fatal road accidents in Wales there were in each of the years 1979-88; and if he will make a statement.

Mr. Wyn Roberts: The number of fatal road accidents is as follows:

Year	*Number*
1979	295
1980	252
1981	243
1982	260
1983	228
1984	227
1985	224
1986	214
1987	196
1988 to June	[1]93

[1] provisional.

The downward trend is most encouraging.

Carers

Mr. Barry Jones: To ask the Secretary of State for Wales if he will list those health authorities and social service departments that make provision for carers in Wales; what initiatives he will take to ensure that the needs of carers in the community are recognised; and if he will make a statement.

Mr. Grist: It is necessary for all health and social services authorities to take into account the needs of carers in providing suitable care for their patients and clients. We have made this clear in our published strategies and initiatives for those with mental handicaps, the elderly and our proposals in respect of the development of mental illness services. Income support for carers is available in certain circumstances under arrangements which are the responsibility of my right hon. Friend the Secretary of State for Social Services.

Mr. Barry Jones: To ask the Secretary of State for Wales what estimate he has on the number of people who would enter long-term hospitals or institutional care if carers were not available; and if he will make a statement.

Mr. Grist: Information is not available on the form requested. There can be no doubt, however, that without the care and support which families and friends often provide, many more people would require additional support from caring agencies. We would not accept, however, that this would necessarily lead to admission to long-term hospital or institutional care. Our policies and programmes are designed to ensure that care is provided in people's own homes and communities rather than in institutions, wherever possible.

Clwyd Community Health Council

Mr. Barry Jones: To ask the Secretary of State for Wales if he will meet the Clwyd South community health council to discuss the implications of charging for dental and optical examinations in Clwyd; and if he will make a statement.

Mr. Grist: I do not believe that a meeting with Clwyd CHC on this matter would serve any useful purpose, since it has been debated so thoroughly both inside and outside Parliament.

Dental and Optical Examinations (Pensioners)

Mr. Barry Jones: To ask the Secretary of State for Wales what is his estimate of the number of pensioners in *(a)* Clwyd, *(b)* Wales, *(c)* the United Kingdom and *(d)* Alyn and Deeside district council area who will be (i) obliged to pay for dental and optical examinations and (ii) exempt; and if he will make a statement.

Mr. Grist: This information is not available.

NATIONAL FINANCE

Local Pay Additions

Mr. Sean Hughes: To ask the Chancellor of the Exchequer if he will provide the latest available figures for Her Majesty's Stationery Office for *(a)* numbers of staff in receipt of local pay additions, by grade, *(b)* location of those offices awarding local pay additions and *(c)* annual cost.

Mr. Brooke: The following is the information:

	Number
AO	89
AA	17
Senior Personal Secretary	1

	Number
Personal Secretary	4
Typist	1

(a) Numbers of staff in receipt of local pay additions, by grade.
(b) Location of those offices awarding local pay additions:
Holborn Bookshop, 49 High Holborn, London, WC1V 6HB
Britannia House, 7 Trinity Street, London, SE1 1DA
Hansard Press, 11 Steedman Street, London, SE17 3AF
Parliamentary Press, Mandela Way, London, SE1 5SS
Macaulay Press, Unit 2A, Tideway, 87 Kirtling Street, London, SW8 5BP
Parliamentary Liaison Office, Lower Ground Floor, Norman Shaw Building (North), Victoria Embankment, London, SW1A 2JF
Golden Cross House, Duncannon Street, London, WC2N 4JF
Controller's Suite, Room 1-15, 24 Whitehall, London, SW1A 2ED
Publications Centre, 51 Nine Elms Lane, London, SW8 5DR
(c) Annual cost:
1 June 1988—31 March 1989—£50,000
1 May 1989—31 March 1990—£63,400

Gross Income

Mr. David Nicholson: To ask the Chancellor of the Exchequer what proportion of gross income was represented by the amount of income tax and employees' national insurance contributions payable on incomes *(a)* half average earnings, *(b)* average earnings and *(c)* 1½ times average earnings in the financial years 1963-64, 1973-74, 1983-84 and 1988-89, using the latest data on average earnings for 1988-89.

Mr. Norman Lamont: The information is in the tables.

Income tax and income tax and NIC as percentages of Gross Earnings

		Multiples of average earnings[1] *0·5*	*1*	*1·5*
Single person				
1963-64	Tax	7·3	17·3	21·6
	Tax & NIC	13·6	22·4	25·0
1973-74	Tax	14·2	22·1	24·7
	Tax & NIC	21·0	27·9	29·2
1983-84	Tax	18·0	24·0	26·0
	Tax & NIC	27·0	33·0	34·2
1988-89[2]	Tax	14·8	19·9	21·6
	Tax & NIC	23·8	28·9	29·1
Married[3] *couple*				
1963-64	Tax	1·3	12·5	18·4
	Tax & NIC	7·6	17·6	21·8
1973-74	Tax	9·4	19·7	23·1
	Tax & NIC	16·2	25·6	27·6
1983-84	Tax	11·1	20·6	23·7
	Tax & NIC	20·1	29·6	32·0
1988-89[2]	Tax	8·9	17·0	19·6
	Tax & NIC	17·9	26·0	27·1

[1] Earnings are average earnings of full-time adult males working a full week on adult rates in all occupations.
[2] Provisional
[3] Assumes wife not in paid employment

Balance of Payments

Mr. Harry Greenway: To ask the Chancellor of the Exchequer what is his latest estimate for the balance of payments in the current year; and if he will make a statement.

Mr. Major: My right hon. Friend the Chancellor of the Exchequer will be making a new forecast in his autumn statement.

PAYE and VAT

Mr. Robert Banks: To ask the Chancellor of the Exchequer what has been the outcome of the pilot study of joint pay-as-you-earn and value added tax visits which the Inland Revenue and Customs and Excise undertook in the Nottingham area.

Mr. Norman Lamont: The pilot study, which took place in the last quarter of 1986, was designed to test the Keith committee's suggestion that joint visits, rather than separate visits for PAYE and VAT purposes, could be mutually beneficial to traders and to the Inland Revenue and Customs and Excise.

The findings are that, while joint visits are feasible and acceptable to most of the traders who received them, in only 2 per cent. of cases would a joint visit replace two separate visits. So, in most instances, a joint visit would add to, rather than reduce, the inspections of a business's records. Furthermore, a system of joint visits would add substantially to the departments' costs.

In the light of these results, it is not proposed to implement a programme of joint visits at this stage. But both departments will continue to improve the information and other services they provide, especially to small businesses.

European Communities (Finance) Bill

Mr. Thurnham: To ask the Chancellor of the Exchequer when notes on clauses for the European Communities (Finance) Bill will be made available to the House.

Mr. Brooke: Copies have been placed in the Vote Office today.

EC (Advance Payments and Overdraft Facilities)

Mr. Yeo: To ask the Chancellor of the Exchequer if he will make a statement about the advance payments and overdraft facilities granted by the United Kingdom to the European Commission in August, September and October.

Mr. Brooke: In each of the three months August, September and October the Commission had cash flow problems because its spending obligations exceeded the revenue available under the 1988 budget. The Commission therefore requested member states, by reference to article 10(2) of regulation 2891/77, to advance by one month the payment of own resources other than VAT. The United Kingdom accordingly made advance payments from the Consolidated Fund on 22 August, 20 September and 20 October, under section 2(3) of the European Communities Act 1972.

In August and September the Commission also overdrew its accounts with member states, by reference to article 12(2) of Council regulation 2891/77. The overdraft with the United Kingdom currently totals £159·8 million. The Government have met this obligation from the Consolidated Fund, again in accordance with section 2(3) of the European Communities Act 1972. Overdrafts are unwound by corresponding reductions in subsequent own resources payments.

The table shows the level of advance payments made under article 10(2) in August, September and October; and the extent of the outstanding overdraft under article 12(2) at the end of each month.

£ million

	August	September	October
Early payment of non-VAT own resources under article 10(2) (reimbursed in the following month)	163·8	145·8	140·4
End-month overdraft under article 12(2)	96·9	3·9	n/a

The total amount which the Community is authorised to spend in 1988 remains as set out in the 1988 budget and supplementary budget. There is, therefore, no net addition to public expenditure arising from the Commission's use of these advance payment and overdraft facilities.

The Community's cash flow difficulties in 1988 should be resolved when member states are in a position to make available their contributions under the intergovernmental agreement on the financing of the 1988 budget.

Tax Cuts

Mr. Matthew Taylor: To ask the Chancellor of the Exchequer if he will estimate the effects of the tax cuts announced in the Budget, on the rate of inflation.

Mr. Lilley *[holding answer 19 October 1988]*: The budget gave no fiscal stimulus to inflation. It left the overall burden of taxation as a percentage of GDP unchanged. In the longer run, the tax reforms and reductions in tax rates, by improving supply, will help the Government to achieve their aim of reducing inflation.

Crown Estate Commissioners

Mr. Macdonald: To ask the Chancellor of the Exchequer what are the annual salaries and allowances payable to each of the part-time Crown Estate Commissioners.

Mr. Lawson *[holding answer 19 October 1988]*: The combined salaries and allowances payable to the part-time Crown Estate Commissioners are as follows:

First Commissioner and Chairman of the Board—£25,524 a year.
Two part-time Commissioners—£9,940 a year each.
Four part-time Commissioners—£7,940 a year each.

HEALTH

Occupational Therapists

Mr. Barry Jones: To ask the Secretary of State for Health what initiatives he will take to enhance the status and salary of occupational therapists; how many occupational therapists there are in *(a)* the United Kingdom *(b)* England and *(c)* Wales; how many have qualified in each of the years 1979 to 1988; what plans he has to increase occupational therapist trainee places; and if he will make a statement.

Mr. Mellor: The remuneration of occupational therapists is determined following recommendations of the pay review body covering nurses, midwives, health visitors and the professions allied to medicine which was set up by my right hon. Friend the Prime Minister in 1983. Since that date the average rates of pay of occupational therapists, in common with those of the other professions allied to medicine, have increased by 24·1 per cent. in real terms. This reflects the importance that the Government place on the work done by these groups of staff.

At 10 October 1988 there were 10,540 occupational therapists in the United Kingdom on the state register maintained by the occupational therapists board of the Council for the Professions Supplementary to Medicine. Separate figures for England and Wales are not available.

Numbers of students qualifying in the years 1979 to 1987 (figures for 1988 are not yet available) are as follows:

	Number
1979	463
1980	508
1981	538
1982	557
1983	593
1984	592
1985	673
1986	667
1987	660

On 15 May 1987 the Government announced detailed plans to increase the number of occupational therapy training places. The number of funded training places is expected to have risen by 100 a year by 1990-91. In addition, health authorities are funding a number of conversion courses for occupational therapy helpers and the Department is partly funding a shortened course for graduates at the London hospital.

The joint DH-NHS manpower planning advisory group has commissioned a study of staffing and skill mix in occupational therapy. Preliminary results will be available in late 1989 and this will enable us to review the need for training places.

Nursing Sisters

Mr. Spearing: To ask the Secretary of State for Health What is the approximate number of nursing sisters who under the current proposals will be designated *(a)* as being in charge of a ward or being a senior sister in an assignment and *(b)* those designated as having equal responsibility at the same proposed grade, together with the respective figures which reflect the current distribution of responsibilities; and what representations he has received from persons with extensive nursing qualifications and experience which favours the change to sole responsibility, giving their names and the terms of such representation.

Mr. Mellor: On the information currently available, a clear majority of hospital sisters and about two out of three of all sisters and charge nurses in England will be graded at the higher level on the basis that they carry continuing responsibility for the management of a ward or that they are responsible for the provision of specialist clinical advice. Returns from regional health authorities indicate that there are, in addition, some 3,500 wards where two or more sisters currently share responsibility for the management of the ward and where authorities plan to create one post which will carry continuing responsibility and attract the higher grading. Once that process is complete, some three out of four sisters and charge nurses will be on the higher grade and about two out of three of those working in hospitals.

I understand from regional chairmen and general managers that a large majority of nurse managers and

senior nurses have expressed support for the principle of one post carrying continuing responsibility for a ward as set out in the new grading definitions.

SOCIAL SECURITY

Benefits and Allowances

Mr. Alfred Morris: To ask the Secretary of State for Social Security if he will give the expenditure on industrial disablement benefit in 1978-79 and 1987-88 at 1987-88 prices; and if he will state the amount and proportion of the increased expenditure that was due to *(a)* increase in real value of the basic pension, *(b)* increase in number of beneficiaries and *(c)* other factors.

Mr. Scott: Expenditure on industrial disablement benefit (including special hardship allowance and its successor, reduced earnings allowance), at 1987-88 prices, is estimated to have been £448 million in 1978-79 and £449 million in 1987-88. Available information is that an increase of £22 million due to the real increase in average awards of benefit was offset by a decrease of £21 million due to a fall in the number of beneficiaries over the period.

Mr. Alfred Morris: To ask the Secretary of State for Social Security if he will give the expenditure on invalidity benefit in 1978-79 and 1987-88 at 1987-88 prices; and if he will state the amount and proportion of the increased expenditure which was due to *(a)* an increase in real value of the basic pension, *(b)* increased payments of additional component, *(c)* and increase in number of beneficiaries and *(d)* other factors.

Mr. Scott: Expenditure on invalidity benefit at 1987-88 prices grew from £1,705 million in 1978-79 to £2,985 million in 1987-88. Of this increase, £1,120 million (87 per cent.) was attributable to increased numbers of beneficiaries; and £160 million (13 per cent.) to a real increase in the average amount of benefit paid. This latter increase was the net result of £260 million growth in additional pension offset by £100 million attributable to the following changes in the other elements of invalidity benefit, including basic pension: adjustment of child dependancy increases to take account of child benefit; the 5 per cent. abatement of invalidity pension from November 1980 to September 1985; and the reduction of invalidity allowance in respect of any entitlement to additional pension.

Mr. Alfred Morris: To ask the Secretary of State for Social Security if he will give the expenditure on attendance allowance in 1978-79 and 1987-88 at 1987-88 prices; and if he will state the amount and proportion of the increased expenditure that was due to *(a)* an increase in real value of the allowance, *(b)* an increase in number of beneficiaries, *(c)* any change in the proportion of beneficiaries receiving the higher rate and *(d)* other factors.

Mr. Scott: At 1987-88 prices, expenditure on attendance allowance rose from £340 million in 1978-79 to £850 million in 1987-88. Of this increase, £475 million (93 per cent.) was attributable to increased numbers of beneficiaries and £35 million (7 per cent.) to a real increase in the average amount of benefit paid. This latter figure subsumes the expenditure consequences of a change in the proportion of higher rate allowances from 43 per cent. of total awards in December 1979 to 40 per cent. in March 1987.

Mr. Alfred Morris: To ask the Secretary of State for Social Security if he will give the expenditure on mobility allowance in 1978-79 and 1987-88 at 1987-88 prices; and if he will state the amount and proportion of the increased expenditure that was due to *(a)* the difference between the increase in the retail price index and the index of motoring costs, *(b)* and increase in the number of beneficiaries and *(c)* other factors.

Mr. Scott: Expenditure on mobility allowance, at 1987-88 prices, rose from £95 million in 1978-79 to £595 million in 1987-88. Of this increase, £400 million (80 per cent.) was attributable to increased numbers of beneficiaries; and £100 million (20 per cent.) to a real increase in the average amount of benefit paid. Any difference between the rise in the retail price index and motoring costs did not contribute directly to the increased expenditure.

Mr. Alfred Morris: To ask the Secretary of State for Social Security if he will give the expenditure on NCIP/severe disablement allowance in 1978-79 and 1987-88 at 1987-88 prices; and if he will state the amount and proportion of the increased expenditure that was due to *(a)* an increase in real value of the allowance, *(b)* an increase in the number of beneficiaries, *(c)* the change in the qualifying conditions and *(d)* other factors.

Mr. Scott: The expenditure on non-contributory invalidity pension, at 1987-88 prices, was £140 million in 1978-79. This benefit was replaced by severe disablement allowance and expenditure on the latter in 1987-88 was £305 million. Of this increase, £105 million (64 per cent.) was attributable to increased numbers of beneficiaries; and £60 million (36 per cent.) to a real increase in the average amount of benefit paid. I regret that detailed information is not readily available on which to base a reliable analysis of how far changes in the qualifying conditions or other factors contributed to these increases.

Mr. Alfred Morris: To ask the Secretary of State for Social Security if he will give the expenditure on invalid care allowance in 1978-79 and 1987-88 at 1987-88 prices; and if he will state the amount and proportion of the increased expenditure that was due to *(a)* an increase in real value of the allowance, *(b)* an increase in the number of beneficiaries and *(c)* other factors.

Mr. Scott: At 1987-88 prices, expenditure on invalid care allowance rose from £8 million in 1978-79 to £165 million in 1987-88. Of this, £22 million (14 per cent.) was attributable to a real increase in the average amount payable whilst £135 million (86 per cent.), attributable to increased numbers of beneficiaries, was largely the result of the extension of the allowance to married women in 1986.

Mr. Alfred Morris: To ask the Secretary of State for Social Security if he will give the expenditure on war disablement pension in 1978-79 and 1987-88 at 1987-88 prices; and if he will state the amount and proportion of the change in expenditure that was due to *(a)* an increase in real value of the basic pension, *(b)* a change in number of beneficiaries and *(c)* other factors.

Mr. Peter Lloyd: Estimated expenditure on war disablement pensions and allowances, including gratuities for disablement of less than 20 per cent. at 1987-88 prices, was £452 million in 1978-79 and £399 million in 1987-88. It is estimated that there was a reduction in expenditure of about £132 million, or 29 per cent., due to a reduction in the number receiving war pensions and allowances from 287,000 at December 1978 to 203,000 at December 1987. This was offset by an estimated increase in expenditure of about £79 million, or 17 per cent., due to an increase in the real value of the average war pension and allowances, mainly because of the introduction of a new allowance, mobility supplement, in 1983 and a 12 per cent. increase in the proportion of war pensioners receiving an age allowance.

Mr. Alfred Morris: To ask the Secretary of State for Social Security if he will give the expenditure on supplementary benefit (housing) paid to long-term sick and disabled people in 1978-79 and 1987-88 at 1987-88 prices; and if he will state the amount and proportion of the increased expenditure that was due to *(a)* an increase in real value of the benefits, *(b)* an increase in number of beneficiaries and *(c)* other factors.

Mr. Peter Lloyd: We do not keep records specifically of long-term sick and disabled people in receipt of supplementary benefit, only of people whose reason for claiming supplementary benefit was sickness. Information for 1978 and 1987 is not in any case comparable because of the introduction of the housing benefit scheme in 1982-83 which now provides help with rent and rates. The term "housing costs" in 1978 therefore includes rent and rates as well as mortgage interest, ground rent, and so on, whereas the term "housing costs" in 1987 excludes rent and rates.

The information available, based on the annual statistical inquiries, shows that the amount of housing costs included in the assessments of people claiming supplementary benefit because they were sick was £42 million in 1978 and £39 million in 1987. These figures do not reflect the amount actually paid in supplementary benefit for housing costs—this would have been less if the claimant had other income or had any dependent adults living in his household.

In 1987-88 housing benefit expenditure for people in receipt of supplementary benefit because of sickness amounted to some £200 million.

NORTHERN IRELAND

Abortion

Mr. Nicholas Bennett: To ask the Secretary of State for Northern Ireland, pursuant to the reply of 22 July, *Official Report*, column *563*, what information he has about the policy of the Northern Ireland branch of the British Medical Association on the extension of the Abortion Act 1967 to Northern Ireland.

Mr. Needham: I understand that the Northern Ireland branch of the British Medical Association follows the national policy of the association and therefore does not have a separate policy on the extension of the Abortion Act 1967 to Northern Ireland.

Regent House School, Newtownards

Mr. John D. Taylor: To ask the Secretary of State for Northern Ireland how many pupils at Regent House school, Newtownards, live in the constituencies of *(a)* Strangford, *(b)* South Down, *(c)* North Down, *(d)* Belfast, East and *(e)* elsewhere.

Dr. Mawhinney: The information requested is not available.

Criminal Law Reform

Mr. Lewis Stevens: To ask the Secretary of State for Northern Ireland if he has any proposals for the reform of the general criminal law in Northern Ireland; and if he will make a statement.

Mr. Tom King *[pursuant to his reply, 20 July 1988, c. 641.]:* I have today laid before Parliament a draft Order in Council which proposes amending the general criminal law of Northern Ireland relating to evidence both before and during trial.

The provisions of this draft order would allow the courts to attach whatever weight they think proper to the fact that someone remained silent when questioned—for example, where circumstances were such that an innocent person might reasonably have been expected to protest his innocence and draw attention to facts which served to establish it.

The draft order proposes amending the criminal law to permit the courts in Northern Ireland to draw whatever inferences would be proper from the fact that an accused remained silent in four situations. Two are dealt with by provisions that have the same effect as provisions recommended by the Criminal Law Revision Committee in 1972. The first is the "ambush" where, having remained silent during police questioning, the accused offers an explanation of his conduct for the first time at his trial when he might reasonably have been expected to offer it when being questioned. The second provides that once the prosecution has established that there is a case to answer, the accused should be warned that he will be called to give evidence and that if he should refuse to do so the court may draw such inferences as would appear proper.

The other two situations are covered in provisions which have the same effect as provisions in the Criminal Justice Act enacted by the Irish Parliament in 1984. One allows a court to draw such inferences as would appear proper from an accused's failure or refusal to explain to the police certain specified facts such as substances or marks on his clothing. The other makes similar provision where an accused fails or refused to account to the police for his presence at a particular place.

My right hon. Friend the Home Secretary has also announced today his intention to bring forward legislation on this subject for England and Wales at the earliest opportunity.

Royal Belfast Hospital for Sick Children

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland when he expects the remainder of the £4·5 million promised for the upgrading of the Royal Belfast hospital for sick children to be made available; what sums have been spent so far and on what; when he expects work to be completed; and if he will make a statement.

Mr. Needham *[holding answer 19 October 1988]:* The present position regarding the programme of seven improvement schemes for the Royal Belfast hospital for sick children is as follows:

	Cost (£000)	*Spent to date (£000)*	*Completion date*
Extension to X-Ray Department	441	441	August 1983
Barbour Ward	200	200	November 1984
Day Care Unit	578	578	January 1987
Engineering Services	340	340	October 1987
Musgrave & Paul Ward	1,347	638	March 1989
Total	2,906	2,197	

The two remaining schemes, the operating theatres/intensive care unit and the out-patients department/A&E department have now been presented by the Eastern health and social services board as a composite scheme which is currently being considered. I cannot state at this time when this scheme will be completed.

Irish Sea

Mr. John D. Taylor: To ask the Secretary of State for Northern Ireland on what basis tests are carried out to establish the level of pollution in the sea off the Northern Irish coast; whether he seeks the opinion of independent monitoring organisations; and if he will make a statement about the level of pollution in the water around the coast of Northern Ireland.

Mr. Needham *[holding answer 19 October 1988]:* Tests to assess the level of pollution in the sea off the Northern Irish coast are carried out on the basis of requirements set out in the relevant national legislation, EC directives and international conventions and for the purpose of public reassurance. The opinion of independent monitoring organisations is not sought. The tests have shown that the water around the coast of Northern Ireland is generally of good quality.

EDUCATION AND SCIENCE

Departmental Staff

Mr. Sean Hughes: To ask the Secretary of State for Education and Science what are the latest available figures for his Department in the London pay area of the number of vacancies by grade and the proportion this is of the grade complement in London.

Mrs. Rumbold: On 1 October 1988 there were the following vacancies against the formal complement for administrative and support staff in the Department's London divisions. The proportions of the grade complement that this represents are shown in brackets.

	Numbers	*(per cent.)*
Grade 5	1	(2)
Grade 7	4	(3)
Senior Executive Officer	3	(6)
Senior Professional and Technical Officer	4	(25)
Higher Executive Officer	8	(4·5)
Information Officer	1	(8)
Executive Officer	16	(7)
Graphics Officer	1	(17)
Librarian	1	(50)
Assistant Librarian	2	(33)
Personal Secretary	2	(2)
Administrative Officer	15	(7)
Administrative Assistant	10	(9·5)
Paperkeeper	5	(15)
Reprographics Operator	3	(15)
Senior Messenger	1	(7)
Typist	6	(9)

Mr. Sean Hughes: To ask the Secretary of State for Education and Science if he will provide the latest available figures for his Department for *(a)* numbers of staff in receipt of local pay additions, by grade, *(b)* location of those offices awarding local pay additions and *(c)* annual cost.

Mrs. Rumbold: The number of staff by grade awarded local pay additions in my Department is as follows:

	Number
Administrative Officer	200
Administrative Assistant	105
Senior Personal Secretaries	9
Personal Secretaries	104
Typing Managers	9
Typists	79
	506

The awards are made to those in the above grades working in central London, Croydon and Isleworth. Of the above, one administrative assistant, one personal secretary and four typists are at the Croydon local office and one personal secretary and three typists are at the Isleworth local office. The full-year cost is estimated to be £186,000.

Students (Fees)

Mr. Straw: To ask the Secretary of State for Education and Science (1) whether he has any plans to introduce arrangements so as to approve proposals from the Universities Funding Council by which home students or their families would be required to pay the whole or a part of their tuition fees for final degree and other advanced further education courses at universities, polytechnics and other colleges;

(2) whether he has any plans to permit certain universities to charge higher fees, payable by the student, for tuition.

Mr. Kenneth Baker: There is a developing debate on the method of funding higher education. The Government have no proposal to require students in receipt of mandatory awards to meet part of their tuition fees. Institutions do not need permission to charge tuition fees higher than those met under the mandatory awards arrangements.

Surplus School Places

Mr. Straw: To ask the Secretary of State for Education and Science what steps he has taken to encourage local education authorities to reduce surplus school places; and what financial mechanics are in force to support this.

Mr. Kenneth Baker: Circular 3/87, issued in May 1987, emphasised the high cost of underused capacity at schools

with a substantial proportion of surplus places, urged LEAs to consider rationalising provision by closing and amalgamating schools where appropriate, and set new national targets, since revised, for the removal of surplus places.

Mr. Straw: To ask the Secretary of State for Education and Science what estimate he makes of the number of surplus school places; and what savings would be achieved if these were removed.

Mr. Kenneth Baker: It is estimated that in January 1988 there were approximately 620,000 surplus primary school places and 800,000 surplus secondary school places in England. Savings in premises-related costs of approximately £240 million a year would be achieved if these places were removed.

Maintained Schools (Expenditure)

Mr. Straw: To ask the Secretary of State for Education and Science (1) what allocation or planning figure has been made, for capital expenditure for grant maintained schools, for the current and any subsequent financial year;

(2) by what criteria he proposes to judge applications by grant-maintained schools for capital expenditure; and in what way these criteria will differ from those he applies in respect of approvals for capital expenditure by local education authorities on their schools.

Mr. Kenneth Baker: There will be no grant-maintained schools in the current financial year. Allocation will be made for future financial years; the total will depend upon the number of schools. The needs of the first grant-maintained schools will be considered on a case-by-case basis. As numbers build up, schools within the grant-maintained sector will participate in a bidding system similar to that now operated for voluntary-aided schools.

Departmental Officials (Statistics)

Mr. Straw: To ask the Secretary of State for Education and Science if he will list in the *Official Report* the number of officials, including Her Majesty's inspectors, their grades and duties, who work for the whole or part of their time on grant-maintained schools; and if he will estimate their cost.

Mr. Kenneth Baker: The Department has established a division to deal with policy on grant-maintained schools. The division currently consists of nine staff (one grade 5, one grade 7, one senior executive officer, one higher executive officer, two executive officers, one personal secretary and two administrative officers) working full time on all matters relating to grant-maintained schools. Their estimated annual salary cost at 1988-89 prices is about £150,000. Other members of the Department, including HM inspectorate, will in the course of their wider territorial, specialist or other policy functions devote some time to grant-maintained schools matters. It is not possible separately to quantify or cost this element of their work.

Grant-Maintained Schools Trust

Mr. Straw: To ask the Secretary of State for Education and Science what grant from public funds has been made to the Grant-Maintained Schools Trust.

Mr. Kenneth Baker: The Grant-Maintained Schools Trust is not at present in receipt of any grant from public funds. If the trust were in due course to make an application to my Department for financial assistance towards specific activities intended to provide support or advice for schools which had acquired grant-maintained status, the Department would be prepared to consider it.

School Closures and Reorganisations

Mr. Straw: To ask the Secretary of State for Education and Science if he will list in the *Official Report* details of all applications made to him since June 1986 for the closure or reorganisation of any school in England, with the name place and type of school, the local authority area, the number of pupils of the school, the decision which he made and whether it was for closure or reorganisation, the dates when the application was first submitted to his Department, and when his final decision was made, and including any applications still pending.

Mr. Kenneth Baker: I will write to the hon. Member as soon as possible.

AGRICULTURE, FISHERIES AND FOOD

Research and Development

13. **Mr. Haynes:** To ask the Minister of Agriculture, Fisheries and Food if he will summarise the results of his Department's review of funding for agricultural research and development.

19. **Mr. Darling:** To ask the Minister of Agriculture, Fisheries and Food if he will summarise the results of his Department's review of funding for agricultural research and development.

Mr. MacGregor: The Barnes review of the agriculture departments' R and D programmes is part of a wider review of priorities for all Government-funded R and D against our belief that industry should bear the responsibility for funding work which is close to commercial application and thus of direct benefit to it. Consultations are proceeding on the funding of near market R and D with all sectors of industry involved. My noble Friend has asked for considered responses from each sector by the end of this month. Further discussions will then take place.

22. **Mr. Buckley:** To ask the Minister of Agriculture, Fisheries and Food what is the current annual financial commitment by the agriculture industry to agricultural research and development.

63. **Mr. Allen McKay:** To ask the Minister of Agriculture, Fisheries and Food what is the current annual financial commitment by the agriculture industry to agricultural research and development.

Mr. MacGregor: The agricultural and horticultural industries fund about £20 million of R and D annually, about half of which is raised directly from producers through levies and similar arrangements and the remainder through contributions or contracts from producer organisations. The industries supplying agriculture also undertake substantial investment in R and D, estimated to be in the order of £200 million a year.

28. **Mr. Maxton:** To ask the Minister of Agriculture, Fisheries and Food by how much he expects the financial commitment of the industry towards agricultural research and development to rise over the next five years; and if he will make a statement.

59. **Mr. Home Robertson:** To ask the Minister of Agriculture, Fisheries and Food by how much he expects the financial commitment of the industry towards agricultural research and development to rise over the next five years; and if he will make a statement.

Mr. Donald Thompson: I cannot yet say. We have asked industry to provide considered first responses by the end of October to our proposals for withdrawal of Government funding for near market R and D.

31. **Mr. Corbyn:** To ask the Minister of Agriculture, Fisheries and Food what proposals he has for modifying research and development programmes in agriculture and fisheries; and if he will make a statement.

Mr. Donald Thompson: Advice from the Priorities Board for R and D in agriculture and food, together with the regular review cycle of all the agriculture and fisheries research programmes, provides a strategic view of the national research needs of these industries. In addition, we have recently undertaken an internal review of expenditure by the agricultural departments on R and D to identify near market work. It remains our policy that the Government should be responsible for funding basic and strategic research as well as work in support of policy and statute; but we believe that near market work which offers the prospect of commercial application within a short enough time scale to justify investment by industry should be funded by industry. Detailed information about our near market programmes has been made available to industry and meetings have been held with the sectors concerned but final decisions have not yet been taken.

38. **Mr. Doran:** To ask the Minister for Agriculture, Fisheries and Food what is the latest estimated total level of spending by his Department on agricultural research and development in 1988-89.

Mr. Donald Thompson: The latest available estimate of spending by my Department on agricultural research and development in 1988-89 is £87·3 million on a full economic cost basis out of an estimated total Government spend on R and D on agriculture, fisheries and food for 1988-89 somewhat in excess of £225 million. Further information on R and D funded by my Department is given in the "Annual Review of Government Funded R and D 1988".

42. **Mr. Boyes:** To ask the Minister for Agriculture, Fisheries and Food what was the average total amount of public spending on agricultural research and development in each of the last five years.

Mr. Donald Thompson: Public spending on agricultural research and development in the last five years, on a full economic cost basis, was as follows:

	£ million
1983-84	166·1
1984-85	170·0
1985-86	165·0
1986-87	165·7
[1]1987-88	162·3
Average	165·8

[1] Provisional

Details of spending by each Department and by the research councils are published in the "Annual Review of Government Funded R and D."

Meat and Livestock Commission

14. **Mr. Latham:** To ask the Minister of Agriculture, Fisheries and Food when he last met the chairman of the Meat and Livestock Commission; and what matters were discussed.

Mr. Donald Thompson: My right hon. Friend and I maintain regular contacts with the chairman of the Meat and Livestock Commission to discuss matters of mutual interest.

Dry Sow Stall

15. **Mr. Hanley:** To ask the Minister of Agriculture, Fisheries and Food what discussions he has had with the pig industry on progress towards the abolition of the dry sow stall.

Mr. Donald Thompson: My Department has consulted the industry and other interests on the Farm Animal Welfare Council's assessment of pig production systems.

Council of Agriculture Ministers

17. **Mr. George Howarth:** To ask the Minister of Agriculture, Fisheries and Food what topics were discussed at the last Council of European Community Agriculture Ministers; and if he will make a statement.

20. **Mr. Nigel Griffiths:** To ask the Minister of Agriculture, Fisheries and Food what was the outcome of the last European Community Council of Agriculture Ministers; and if he will make a statement.

Mr. MacGregor: Decisions were taken on olive oil consumption aid which will produce a saving of 102 million ecu. Other matters were discussed but no decision taken.

Small Farmers Association

18. **Mr. McLoughlin:** To ask the Minister of Agriculture, Fisheries and Food when he last met the chairman of the Small Farmers Association; and what subjects they discussed.

Mr. Ryder: My right hon. Friend has not met the chairman recently. But he is kept regularly in touch with the Small Farmers Association's views.

Council of Fisheries Ministers

16. **Mr. Wray:** To ask the Minister of Agriculture, Fisheries and Food when he last attended a meeting of the European Community's Council of Fisheries Ministers; and which subjects were discussed.

Mr. Donald Thompson: Together with my noble Friend, the Minister of State, Scottish Office, I represented the United Kingdom at the meeting of the Council of Fisheries Ministers on 19 and 20 October 1988 in Luxembourg. The Council dealt with many issues. In particular, we welcome the agreement reached on improvements to the control

regulation to facilitate better enforcement. The Commission is committed to produce proposals to increase the precautionary TAC for Channel cod. For reasons of conservation the Council agreed to the extension of the mackerel box off our south-west coast and to a reduction in cod quotas off Svalbord and north Norway. We also raised again the importance of having flexibility for fishing for Western mackerel across the 4° W line.

21. **Mr. Harry Barnes:** To ask the Minister of Agriculture, Fisheries and Food when he next expects to attend a meeting of the European Community's Council of Fisheries Ministers; what matters he expects to discuss; and if he will make a statement.

Mr. Donald Thompson: The next EC Council of Fisheries Ministers is to be held on 28 November 1988. Present plans are that fish product guide prices for 1989 are to be discussed. Other items have yet to be tabled.

Non-alcoholic Drinks

23. **Mr. Thurnham:** To ask the Minister of Agriculture, Fisheries and Food if he will make a statement about the current level of sales of non-alcoholic beer and wine.

Mr. Ryder: There are no official statistics, but these sales have clearly increased substantially over the last few years. Technical developments in the industry have contributed to improvements in quality of the products. The recently announced reductions in excise duties chargeable on lower strength drinks should encourage the development of this sector.

United Kingdom Harvest

24. **Mr. Bowis:** To ask the Minister of Agriculture, Fisheries and Food if he can give an estimate of the likely size of the current United Kingdom harvest.

45. **Mr. Yeo:** To ask the Minister of Agriculture, Fisheries and Food what is his latest forecast for the 1988 cereal harvest.

50. **Mr. Boswell:** To ask the Minister of Agriculture, Fisheries and Food if he will make a statement on the 1988 harvest.

79. **Mr. Parry:** To ask the Minister of Agriculture, Fisheries and Food what estimates he has of the size of the 1988 harvest.

Mr. MacGregor: My Department currently estimates the 1988 cereals harvest in the United Kingdom to be 21 million tonnes.

Milk Production Hormone

25. **Mr. Clay:** To ask the Minister of Agriculture, Fisheries and Food when he expects the current trials of the milk production hormone BST to end.

58. **Mr. Cunliffe:** To ask the Minister of Agriculture, Fisheries and Food when he expects to be able to announce the final results of the trials of the milk production hormone BST.

Mr. Ryder: These trials are being conducted by the companies concerned. Their purpose is primarily to produce evidence as to the efficacy of the products. This evidence will be presented to the Veterinary Products Committee which advises Ministers on applications for product licences. It is up to the companies to decide when to submit their evidence to the Veterinary Products Committee.

56. **Mr. Martlew:** To ask the Minister of Agriculture, Fisheries and Food what advice he has received from the Veterinary Products Committee concerning the milk production hormone BST; and if he will make a statement.

Mr. Ryder: The Veterinary Products Committee was consulted, as is required under the provisions of the Medicines Act 1968, concerning applications for animal test certificates for BST. It advised that it was completely satisfied with all aspects of the safety of BST. So the present trials are designed to assess not the safety of the product, but its efficacy under field conditions.

Two applications for product licences for BST have been received and these are being considered in accordance with the provisions of the Medicines Act and EC legislation.

Tenant Farmers Association

26. **Mr. Knapman:** To ask the Minister of Agriculture, Fisheries and Food when he last met the chairman of the Tenant Farmers Association; and what subjects they discussed.

Mr. Ryder: Although I have not yet met the chairman of the Tenant Farmers Association, I am glad to say that I shall be addressing the association's annual conference next February. In the meantime, the Department is in regular touch with the association on a wide range of issues.

National Farmers Union

27. **Miss Emma Nicholson:** To ask the Minister of Agriculture, Fisheries and Food when he last met the president of the National Farmers Union; and what subjects they discussed.

49. **Mr. Campbell-Savours:** To ask the Minister of Agriculture, Fisheries and Food when he last met representatives of the National Farmers Union; and what subjects were discussed.

68. **Mr. Sean Hughes:** To ask the Minister of Agriculture, Fisheries and Food when he last met representatives of the National Farmers Union; and what subjects were discussed.

Mr. MacGregor: I meet the president of the National Farmers Union frequently to discuss a wide range of agricultural matters. I last met him on 11 October.

54. **Mr. Knox:** To ask the Minister of Agriculture, Fisheries and Food when next he is due to meet the president of the National Farmers Union to discuss the dairy sector.

Mr. Donald Thompson: I have no present plans to do so.

EC (Surplus Food and Drink)

29. **Mr. Canavan:** To ask the Minister of Agriculture, Fisheries and Food what is the total volume and value in pound sterling of surplus food and drink in the EEC.

Mr. Ryder: A note setting out the volume of EC intervention stocks of agricultural commodities, which includes only the surplus quantities held in United Kingdom and EC intervention and assisted private storage, is deposited in the Library of the House and is updated monthly. The estimated value of the EC stocks listed in the most recently deposited note, depreciated as now required following the February European Council agreement, is £3·12 billion.

Whale Hunting

30. **Mr. David Martin:** To ask the Minister of Agriculture, Fisheries and Food what further steps he will take to encourage more humane whale hunting in the Faroes.

Mr. Donald Thompson: We continue to pursue this matter within the International Whaling Commission which we regard as the primary forum for the discussion of all whaling issues, including those concerning killing methods.

British Wool Board

32. **Mr. Kirkhope:** To ask the Minister of Agriculture, Fisheries and Food when he last met with the chairman of the Wool Board; and what subjects they discussed.

Mr. MacGregor: I meet the chairman of the British Wool Board regularly to discuss matters relating to the marketing of wool in the United Kingdom.

Horticultural Research

33. **Mr. Hind:** To ask the Minister of Agriculture, Fisheries and Food if he has any plans to meet the chairman of the Horticultural Development Council to discuss horticultural research; and if he will make a statement.

Mr. Ryder: My noble Friend the Baroness Trumpington met the chairman of the Horticultural Development Council in June to discuss horticultural research. The chairman continues to make an input into discussions through his membership of two Ministry working groups which are considering particular aspects of horticultural R and D (future HDC funding and rationalisation of facilities for horticultural research).

Forestry Commission

34. **Mr. Page:** To ask the Minister of Agriculture, Fisheries and Food when he last met the chairman of the Forestry Commission; and what subjects they discussed.

Mr. MacGregor: I last met the chairman of the Forestry Commission on 3 October when we discussed progress in the task of clearing and replanting woodlands damaged by last October's storm in south-east England.

Dairy Trade Council

35. **Mr. Brandon-Bravo:** To ask the Minister for Agriculture, Fisheries and Food when he last met the president of the Dairy Trade Council and what subjects they discussed.

Mr. Donald Thompson: My right hon. Friend the Minister and I have regular contacts with the president of the Dairy Trade Federation to discuss various issues affecting the dairy industry.

Scottish National Farmers Union

36. **Mrs. Ray Michie:** To ask the Minister for Agriculture, Fisheries and Food when he last met the president of the Scottish National Farmers Union; and what matters were discussed.

Mr. MacGregor: I meet the president of the Scottish National Farmers Union whenever I go to Scotland, the last occasion being on 7 to 9 July. A range of matters were discussed. I also meet him from time to time elsewhere.

Countryside Commission

37. **Mr. Batiste:** To ask the Minister for Agriculture, Fisheries and Food when he last met the chairman of the Countryside Commission; and what subjects they discussed.

Mr. Ryder: My right hon. Friend and other Ministers of my Department have frequently met the chairman of the Countryside Commission for discussions on a wide variety of issues. I look forward to meeting him soon.

Beef and Sheepmeat Regimes

39. **Mr. John Greenway:** To ask the Minister for Agriculture, Fisheries and Food what progress has been made in the negotiations in Brussels on the review of the beef and sheepmeat regimes.

Mr. MacGregor: Little progress has been made on the basis of the proposals on sheepmeat produced by the EC Commission in October last year. The Commission has just presented proposals on beef and revised proposals on sheepmeat, but no texts are yet available. I expect negotiations to resume shortly.

Potato Marketing Board

40. **Mr. Conway:** To ask the Minister for Agriculture, Fisheries and Food when he last met the chairman of the Potato Marketing Board; and what subjects they discussed.

Mr. Ryder: I refer my hon. Friend to the reply given to my hon. Friend the Member for Derbyshire, West (Mr. McLoughlin) on 9 June, at column *677*.

Fishing Vessels

41. **Mr. Terry Lewis:** To ask the Minister for Agriculture, Fisheries and Food how many fishing vessels were constructed in the United Kingdom, with financial assistance from the Sea Fish Industry Authority and FEOGA grants in 1984, 1985, 1986 and 1987; and how many fishing vessels have been built or are under construction in the current year with this kind of financial assistance.

Mr. Donald Thompson: The information requested is as follows:

Number of vessels awarded both United Kingdom and EC aid

	Number
1984	33
1985	43
1986	35
1987	24
1988	19

The 1988 figure includes vessels whose construction is expected to be completed by the end of the year.

Fishing Industry

43. **Mr. Dunnachie:** To ask the Minister of Agriculture, Fisheries and Food what recent discussions he has had with fishermen's organisations concerning the present circumstances of the fishing industry.

Mr. Donald Thompson: We are in frequent and regular touch with fishermen's organisations. Most recently this month I discussed the North sea fishing industry at a conference with representatives of the major organisations.

Home Grown Cereals Authority

46. **Mr. Allan Stewart:** To ask the Minister of Agriculture, Fisheries and Food when he last met the chairman of the Home Grown Cereals Authority; and what subject they discussed.

Mr. MacGregor: I last met the chairman of the HGCA on 10 October and when I addressed the authority's pre-harvest luncheon on 12 July. We discussed a number of topics concerning the cereal sector.

Women's Farmers Union

47. **Mr. Nicholas Bennett:** To ask the Minister of Agriculture, Fisheries and Food when he last met the president of the Women's Farmers Union; and what subject they discussed.

Mr. MacGregor: I met the national chairman of the Women's Farming Union on 11 July and discussed various subjects of concern to it.

Set Aside Scheme

48. **Mr. Gill:** To ask the Minister of Agriculture, Fisheries and Food what indications he has of the level of uptake under the Set Aside Regulations 1988; and if he will make a statement.

60. **Mr. Livsey:** To ask the Minister of Agriculture, Fisheries and Food how many farmers registered under the set aside scheme by 30 September; and if he will make a statement.

77. **Mr. Charles Wardle:** To ask the Minister of Agriculture, Fisheries and Food how many of those farmers who had registered for the voluntary set aside scheme by 30 September had decided to take up the scheme for the 1988-89 crop year.

Mr. MacGregor: I refer hon. Members to the answer given earlier today to my hon. Friend the Member for Gedling (Mr. Mitchell).

Imports (Northern Cyprus)

51. **Mr. Cox:** To ask the Minister of Agriculture, Fisheries and Food what have been the items and quantity of agricultural produce imported into the United Kingdom from the occupied area of northern Cyprus during the last 12 months.

Mr. Donald Thompson: United Kingdom imports of agricultural produce from the different regions of Cyprus are not recorded separately.

Bovine Spongiform Encephalopathy

44. **Mr. Flynn:** To ask the Minister of Agriculture, Fisheries and Food what is the number of cases of bovine spongiform encephalopathy to date in the United Kingdom.

Mr. Donald Thompson: Up to 14 October 1988, 1,193 cases of bovine spongiform encephalopathy had been confirmed since the disease was first identified in November 1986.

52. **Mr. Patchett:** To ask the Minister of Agriculture, Fisheries and Food how many cases of bovine spongiform encephalopathy have now been notified to his Department.

Mr. Donald Thompson: Since the disease was made notifiable on 21 June, 1,232 suspect cases of BSE have been reported to the Ministry. Because there is no diagnostic test in live animals affected cattle are slaughtered on clinical evidence of infection. Confirmation is dependent on the examination of brain tissue after death; since 21 June, of the 502 animals for which laboratory results have so far been received 454 have been confirmed as having been affected with BSE.

Farmers (Diversification)

53. **Mr. Steen:** To ask the Minister of Agriculture, Fisheries and Food what assessment he has made of the case for measures to improve communication between farmers wishing to diversify and local planning authorities.

Mr. Ryder: I believe there is a case for improved communication in this area. To this end agriculture Ministers have taken every opportunity to meet planners and farmers to encourage a better understanding between them. We will soon be publishing, in association with the Department of the Environment and the Welsh Office, a farmers' guide to the planning system as my right hon. Friend the Minister of Agriculture, Fisheries and Food announced on 25 July in his reply to my hon. Friend the Member for Hyndburn (Mr. Hargreaves). This will encourage farmers to present their applications effectively and discuss their ideas with planning officers, local councillors and their neighbours at an early stage.

Country Landowners Association

55. **Mr. Hunter:** To ask the Minister of Agriculture, Fisheries and Food when he last met the president of the Country Landowners Association; and what subjects they discussed.

Mr. MacGregor: I refer my hon. Friend to the reply I gave today to my hon. Friend the Member for Gloucestershire, West (Mr. Marland).

Common Agricultural Policy

57. **Mr. Alan W. Williams:** To ask the Minister of Agriculture, Fisheries and Food what steps he takes to ensure that consumer and environmental interests are taken into account in decisions concerning the common agricultural policy.

Mr. Ryder: I receive advice and representations from many sources, including bodies representative of

consumers and of environmental interests. I take these fully into account when decisions are being taken on CAP matters and, as appropriate, urge the Commission and other member states to do the same.

Cereals Co-responsibility Levy

61. **Mr. Alexander:** To ask the Minister of Agriculture, Fisheries and Food if he will press for the European Community cereals co-responsibility levy to be applied to imports of cereal substitutes, and in equal measure.

Mr. MacGregor: Extending the cereals co-responsibility to imported cereals substitutes would be difficult to achieve, contrary to the European Community's international obligations and would be inconsistent with the Government's efforts in the current GATT negotiations to liberalise agricultural trade. The United Kingdom Government have consistently opposed a co-responsibility levy as being the wrong way to tackle the problem of cereal surpluses.

National Federation of Fishermen's Organisations

62. **Mr. Wall:** To ask the Minister of Agriculture, Fisheries and Food when he last met representatives of the National Federation of Fishermen's Organisations; and which subjects were discussed.

Mr. Donald Thompson: My right hon. Friend the Minister met representatives of the National Federation of Fishermen's Organisations at their annual general meeting on 7 May 1988. A number of issues of importance to the United Kingdom fishing industry were discussed including TACs, licensing systems including under 10 m vessels; part-time fishermen; fishing vessel registration; technical conservation measures and mesh sizes including minimum landing sizes for nephrops; North sea plaice; Channel cod; water authority privatisation; pollution and dumping; the Grimsby National Dock Labour Board scheme; the bass fishery; loans; safety; light dues and the ban on the carriage of monofilament nets. Members of the NFFO also attended a conference in North Shields on 5 October on the North sea fishing industry at which I discussed the Government's fisheries policy and pollution.

Agricultural Workers

64. **Mr. Strang:** To ask the Minister of Agriculture, Fisheries and Food if he has any plan to meet the national secretary of the agricultural and allied workers trade group of the Transport and General Workers Union to discuss problems affecting agricultural workers.

Mr. Donald Thompson: I have no plans at present to do so.

65. **Mr. Rogers:** To ask the Minister of Agriculture, Fisheries and Food what topics were discussed at the last Council of European Community Agriculture Ministers; and if he will make a statement.

Mr. John Evans: To ask the Minister of Agriculture, Fisheries and Food what was the outcome of the last Council of European Community Council of Agriculture Ministers; and if he will make a statement.

Mr. MacGregor: I refer the hon. Members to the reply I gave to my hon. Friend the Member for Daventry (Mr. Boswell) on 18 October 1988.

Sheep

66. **Mr. Alex Carlile:** To ask the Minister of Agriculture, Fisheries and Food if he will make a statement on the current state of the sheep sector.

Mr. MacGregor: The sheep sector remains buoyant. Returns are good and exports are encouraging.

Sea Fish Industry Authority

67. **Mr. Graham:** To ask the Minister of Agriculture, Fisheries and Food if he will make a statement concerning the financing of the Sea Fish Industry Authority.

Mr. Donald Thompson: Following consultation with interested organisations, the authority has now published its intentions to make regulations increasing the present rate of levy from £3·50 per tonne to £7 per tonne with effect from 1 April 1989. In deciding whether to confirm these regulations, fisheries Ministers will take into account any industry objections made to them.

Toxic Waste

69. **Dr. Moonie:** To ask the Minister of Agriculture, Fisheries and Food how many licences were issued for the incineration of toxic waste at sea in 1985, 1986 and 1987; how many such licences have been issued so far in the current year; and if he will make a statement.

Mr. Donald Thompson: Licences were issued for 24 wastes in 1985 and for 20 wastes in 1986; 14 licences were issued in 1987 and 12 in 1988.

United Kingdom waste has accounted for only about 5 per cent. of the total incinerated at the one, internationally agreed, incineration site in the Dutch sector of the North sea. At the ministerial conference on the North sea in November 1987 all North sea states including the United Kingdom agreed that marine incineration should be substantially reduced, by not less than 65 per cent., by 1 January 1991, and phased out by 31 December 1994. Remaining United Kingdom licensed wastes are therefore being reviewed to identify satisfactory alternative options for disposal of the waste on land.

GATT

70. **Mr. Curry:** To ask the Minister of Agriculture, Fisheries and Food what progress he expects in the general agreement on tariffs and trade negotiations prior to the mid-term meeting in December.

Mr. MacGregor: With a view to further reform of agricultural policies in both the short and long term, GATT members are working actively towards a framework of principles to guide the negotiations, which are due to continue till 1990, and on first steps to implement them. I have consistently emphasised the importance of securing progress at the December meeting and will continue to work for a constructive outcome.

Farm Woodland Scheme

71. **Mr. David Nicholson:** To ask the Minister of Agriculture, Fisheries and Food what response there has been from farmers to the new farm woodland scheme.

Mr. Riddick: To ask the Minister of Agriculture, Fisheries and Food how many farmers have expressed interest in the new farm woodland scheme since its introduction on 1 October.

Mr. Ryder: As the scheme has only been operational since 1 October, it is too early to give any figures for uptake. There has, however, been substantial interest amongst farmers and the scheme's information literature has been in demand.

Clyde Fishermen's Association

72. **Mr. Foulkes:** To ask the Minister of Agriculture, Fisheries and Food when he last met representatives of the Clyde Fishermen's Association.

Mr. Donald Thompson: I have not met the Clyde Fishermen's Association.

Agriculture

73. **Mr. David Marshall:** To ask the Minister of Agriculture, Fisheries and Food what discussions he has had with environmental organisations to discuss the future of agriculture in the United Kingdom.

Mr. Ryder: My right hon. Friend and other Ministers of my Department have frequently met representatives of environmental organisations for discussions on a wide variety of issues. I look forward to meeting the organisations soon.

Wildlife

74. **Mr. McCartney:** To ask the Minister of Agriculture, Fisheries and Food what discussions he has had with wildlife organisations about the future of the countryside.

Mr. Ryder: My right hon. Friend and other Ministers of my Department have frequently met representatives of wildlife organisations for discussions on a wide variety of issues. I look forward to meeting the organisations soon.

Milk Marketing Board

75. **Sir Hal Miller:** To ask the Minister of Agriculture, Fisheries and Food when he last met the chairman of the Milk Marketing Board; and what subjects they discussed.

Mr. Donald Thompson: My right hon. Friend the Minister and I have regular contacts with the chairman of the Milk Marketing Board to discuss various issues affecting the dairy industry.

Agricultural Land (Classification and Grading)

76. **Mr. Chapman:** To ask the Minister of Agriculture, Fisheries and Food when he intends to make a statement about agricultural land classification and grading, following the publication of his consultation document in February.

Mr. Ryder: We hope to publish the definitive guidelines and criteria before the end of this month.

East Craigs Seed Testing Station

78. **Mr. Ron Brown:** To ask the Minister of Agriculture, Fisheries and Food what representations he has received since 22 July from the trade union movement and local representatives about the future of East Craigs seed testing station, Edinburgh; and if he will make a statement.

Mr. Ryder: None. I have nothing to add to the reply given to the hon. Member on 22 July 1988 at columns *879-80*.

Dairy Herds

80. **Mr. Hardy:** To ask the Minister of Agriculture, Fisheries and Food what information he has about the present number of dairy herds in the United Kingdom and in each member state of the EEC; and what equivalent information he has for each country 10 years ago.

Mr. Donald Thompson: The most recent data available are for 1986. No comparable data are available for 1976, so the following table compares the 1986 figures with those for 1977.

Number of dairy herds in the EEC

Country	*Year*	*Number of herds*	*Year*	*Number of herds*
Germany	1977	519,000	1986	369,000
France	1977	576,000	1986	329,000
Italy	1977	453,000	1986	338,000
Netherlands	1977	83,000	1986	61,000
Belgium	1977	66,000	1986	45,000
Luxembourg	1977	4,000	1986	2,000
United Kingdom	1977	72,000	1986	53,000
Irish Republic	1977	120,000	1986	77,000
Denmark	1977	56,000	1986	32,000
Greece	1977	n/a	1986	73,000
Spain		n/a		n/a
Portugal		n/a		n/a

Source:
(a) The Agricultural Situation in the Community 1987 Report.
(b) Eurostat Yearbook of Agricultural Statistics 1978.

Storm Damage

81. **Miss Widdecombe:** To ask the Minister of Agriculture, Fisheries and Food what help he plans for farmers still facing substantial costs for clearance as a result of the storm on 16 October 1987.

Mr. Ryder: The Government believe that the package of measures which they introduced after last year's great storm provided a comprehensive and appropriate response. Applications have already been received for the replanting of 5 million trees under the special Forestry Commission replanting scheme and it is expected that a half of the fallen timber will have been cleared by the end of next spring. In addition, expenditure of some £2·5 million is expected under MAFF's storm damage recovery scheme for environmental features such as shelterbelts and orchard replacement.

Southall Horse Market

Mr. Harry Greenway: To ask the Minister of Agriculture, Fisheries and Food what information he has as to the conditions at the Southall horse market; and if he will make a statement.

Mr. Donald Thompson: During recent visits to the market by the Department's veterinary staff no problems affecting the welfare of horses have been noted or brought to their attention.

Sheepmeat

Mr. Speller: To ask the Minister of Agriculture, Fisheries and Food if he has any plans to review the operation of the sheepmeat regime; and if he will make a statement.

Mr. Donald Thompson: The sheepmeat regime is due to be reviewed by the Council of Agriculture Ministers later this year. I expect negotiations on this review to resume shortly on the basis of proposals by the EC Commission.

Upland Planting

Mr. Harris: To ask the Minister of Agriculture, Fisheries and Food whether he has provided the chairman of the Forestry Commission with guidance on planting in the uplands of England.

Mr. MacGregor: I have written to the chairman of the Forestry Commission in the following terms:

"You will recall that in his announcement of 16 March setting out our joint view about future planting in the uplands of England, the Secretary of State for the Environment said that I would be writing to you to give further guidance on the matter. This is now set out in this letter.

As you know, a large proportion of the land in England has been used for agriculture as either arable or improved grassland, and we therefore attach a high value to conserving the habitats provided by the limited remaining area of unimproved land in the uplands.

General Criteria

Where unimproved land lies above the 800 ft contour, approval should not normally be given for new planting which consists predominantly of conifers, other than for the planting of small areas, as defined below, where it is clear that this would be environmentally acceptable. An exception may also be made for planting on unimproved land between the 800 and 1,000 ft contours if the Commission agrees with the local authority and any other authorities consulted—or, in the absence of such agreement. Ministers so decide—that this would be justified in the interests of improving forest landscaping. More generally, there may be some scope in the uplands for the planting of broadleaves and mixed woodlands.

These criteria should apply both to plans for new planting by the Commission and to all future approvals of applications for grants for new planting by the private sector.

Unimproved land

For the purposes of this letter, unimproved land is defined as land which has not been converted to arable use or, in the case of grassland, has not been cultivated and reseeded within the ten years prior to the date of this letter, and any future improvement of land now defined as unimproved will not alter that definition.

Predominantly conifers

Since the establishment of broadleaved woods in the uplands is crucially dependent on planting conifers as nurses, often in the ratio of two conifers to one of broadleaves, the term 'predominantly' should be taken to mean the use of more than two conifers for every broadleaved tree at the initial planting stage.

Exception for small areas

The term 'small' should normally be taken to mean any area not exceeding 10 hectares. In appropriate circumstances this exception may also cover an area not exceeding 40 hectares where the Commission agrees with the local authority and any other authorities consulted (or Ministers decide) that this would allow the proposed planting to blend sympathetically with the landscape or to ameliorate over-regulate or oddly-shaped woodland boundaries.

Planting in the industrial Pennines

It is recognised that conifers may also have a role to play in ameliorating the environment of the industrial areas of the Pennines where conditions are not suitable for growing broadleaves. Conifer planting may be permitted in these areas, which for the purposes of this exception should be defined and agreed between Forestry Commission and Department of the Environment officials.

Replanting

In providing grants for replanting, the Commission should encourage practices which will convert forests of even age into attractive and more varied landscapes with a mixture of types and ages of trees. To encourage the conservation, rehabilitation and regeneration of ancient woodlands, applications for grant-aid for their replanting will be expected to follow the Commission's published Guidelines for the Management of Broadleaved Woodland. The Commission should continue to follow similar practices in respect of its own replanting programmes.

Consultation Arrangements

The Commission should introduce arrangements, where these do not already exist, to consult local authorities in England on all new planting proposals above 800 ft where such proposals would involve the planting of more than 10 hectares predominantly with conifers. Otherwise, this letter does not affect the Commission's current arrangements for consulting local authorities and other bodies as appropriate, and individual applications will continue to be considered on their merits under the terms of the general guidance I have given."

I have arranged for copies of my letter to be placed in the Library of the House.

Written Answers to Questions

WALES

Physiotherapists and Speech Therapists

Mr. Barry Jones: To ask the Secretary of State for Wales (1) if he will make a statement concerning the supply of (i) physiotherapists and (ii) speech therapists in Wales and the demand for their services; if he will publish the staff turnover of physiotherapists in Wales; how many physiotherapist posts in Wales are frozen; and if he will make a statement;

(2) how many chartered physiotherapists there are in Wales and in each Welsh health authority; how many vacancies for physiotherapists exist in Wales and in each Welsh health authority; what was the vacancy level expressed as a percentage of (i) physiotherapists and (ii) speech therapists in *(a)* Wales and *(b)* each health authority; and if he will make a statement.

Mr. Grist: Physiotherapists and speech therapists are among those staff groups which have been the subject of detailed scrutiny in the first round of the manpower resource planning exercise undertaken by the health service in Wales this year. As part of the exercise, initiated by the manpower steering group established by the Department in 1986, health authorities were requested to make projections of future manpower requirements, including demand and supply estimates, over the next decade.

A report on the outcome of that first planning round is being finalised, following which consideration will be given to its findings to determine the need and scope for action at the all-Wales and district levels to forestall any projected manpower difficulties.

Information on the number of posts frozen by health authorities and on staff turnover rates is not held by the Department, though improvements being sought in the health service information base should provide capacity for analysis of turnover in future years. The decision to freeze posts is an operational matter for health authorities.

Information on the number of physiotherapists and speech therapists in post in each Welsh district health authority as at 30 September 1988 is given in the following table. Information on the number of vacancies is not currently collected by the Department on a regular basis, but information obtained in the course of this year's manpower resource planning exercise indicates that at the all-Wales level at 30 September 1988 there were approximately 32 (whole-time equivalent) vacancies for speech therapists, representing approximately 5 per cent. and 15 per cent. respectively of the planned staffing levels for these groups. These aggregate figures are approximate only; reliable information at individual district health authority levels is not currently available. Staff in post (whole-time equivalents) as at 30 September 1988:

	Physiotherapists	*Speech Therapists*
Clwyd	78·4	24·7
East Dyfed	32·9	14·0
Gwent	79·1	12·1
Gwynedd	46·9	11·9
Mid Glamorgan	74·3	19·6
Pembrokeshire	17·6	6·0
Powys	26·5	7·5
South Glamorgan	142·4	27·7
West Glamorgan	69·6	19·7
All Wales	567·7	143·2

Public Appointments

Mr. Ron Davies: To ask the Secretary of State for Wales if, pursuant to his answer of 26 July, *Official Report*, column *171*, and the information subsequently sent to the hon. Member for Caerphilly, he will provide what information he has concerning the political affiliations of those appointees to public bodies listed.

Mr. Peter Walker: Since individuals are appointed to public bodies on the basis of their intrinsic merits and personal qualities, comprehensive information on political affiliations is not available.

Mr. Ron Davies: To ask the Secretary of State for Wales what information he seeks on a regular basis concerning candidates for public appointment.

Mr. Peter Walker: Prior to appointment we seek details of candidates' past and present occupations, relevant specialisms, areas of interest, previous or existing appointments or voluntary service, time availability for public duties and ability to speak Welsh.

Once appointed their performance is regularly assessed and certainly taken into account before any decisions are reached on either reappointment or further appointments.

Agriculture and Horticulture (Research and Development)

Mr. Ron Davies: To ask the Secretary of State for Wales how many people are employed in agricultural and horticultural research and development in Wales reliant on Government funds; and if he will give details by institute and site.

Mr. Peter Walker: I refer the hon. Gentleman to the reply I gave to the hon. Member for Alyn and Deeside (Mr. Jones) on 30 June 1988 at column 310.

Mr. Ron Davies: To ask the Secretary of State for Wales (1) if he will provide figures to show the financial effect of implementing in Wales recently announced proposals to cut Government funding of agricultural and horticultural research and development by sector, institute and site, respectively;

(2) if he will provide figures to show the employment effect of implementing in Wales recently announced proposals to cut Government funding of agricultural and horticultural research and development by sector, institute and site, respectively.

Mr. Peter Walker: I refer the hon. Gentleman to the reply given to him today by my right hon. Friend the Minister of Agriculture, Fisheries and Food.

EDUCATION AND SCIENCE

Grant-maintained Schools

Mr. Pike: To ask the Secretary of State for Education and Science what inquiries he has received from schools in the north-west wishing to become grant-maintained schools under the Education Act 1988; and if he will make a statement.

Mrs. Rumbold: The Education Reform Act provides an opportunity for all secondary schools and primary schools with more than 300 pupils to apply for grant-maintained status if parents so wish. The Department has received inquiries from a large number of parents, governors and others about these provisions of the Act, including some relating to schools in the north-west.

GCSE

Mr. Pike: To ask the Secretary of State for Education and Science how many children took the GCSE examination in Lancashire in the current year; and what were the results achieved.

Mrs. Rumbold: This information is not yet available centrally.

GCE and CSE

Mr. Pike: To ask the Secretary of State for Education and Science how many children took the GCE O-level and CSE examinations in Lancashire in 1987; and what were the results achieved.

Mrs. Rumbold: In the 1987 summer examination session, some 29,000 pupils in maintained schools in Lancashire sat for O-level and CSE examinations. Information on examination achievements is not available on a strictly comparable basis, but in 1987 there were 20·59 thousand school leavers in Lancashire, of whom 4·76 thousand achieved 5 or more higher grades; 5·91 thousand attained 1 to 4 higher grades; 7·47 thousand achieved no higher grades; and 2·34 thousand gained no graded result.

Cash Limits

Mr. Curry: To ask the Secretary of State for Education and Science if he will give details of any revised cash limits for his Department's votes.

Mr. Kenneth Baker: Subject to parliamentary approval to the necessary Supplementary Estimates, cash limits for the following votes will be revised as follows:

£'000s

Class and vote	*Current cash limit*	*Increase/ decrease*	*Revised cash limit*
XII. 1	482,201	−744	481,457
XII. 3	1,843,880	+744	1,844,624

The increase on class XII, vote 3 represents expenditure originally included for provision within class XII, vote 1 in respect of a major capital project at Goldsmiths' college. The increase on class XII, vote 3 reflects the inclusion of this expenditure following the college's incorporation as part of the university of London.

These changes will not affect the overall planned total of expenditure.

HOME DEPARTMENT

Police Pay

Mr. Wray: To ask the Secretary of State for Education and Science what is the estimated total cost of pay increases for the police force in 1988-89.

Mr. Douglas Hogg: The estimated cost in 1988-89 of this year's pay increase for police officers below the rank of assistant chief constable in England and Wales is £86·5 million.

Mr. Wray: To ask the Secretary of State for the Home Department what has been the average pay increase of the police force in percentages for each year since 1970.

Mr. Douglas Hogg: The average increases in the pay of police officers below the rank of superintendent have been as follows:

	Percentage
1 September 1970	[1]16
1 September 1971	6·5
1 September 1972	15
1 September 1973	4 (plus £1 a week)
1 September 1974	16·7
1 September 1975	30
1 September 1976	[2]5
1 September 1977	10
1 September 1978 / 1 May 1979	[3]39
1 September 1979	13.5
1 September 1980	21·3
1 September 1981	13·2
1 September 1982	10.3
1 September 1983	8·4
1 September 1984	5·13
1 September 1985	7·5
1 September 1986	7·5
1 September 1987	7·75
1 September 1988	8·5

[1] With a minimum of 10 per cent. and increases of up to 28 per cent. for long-serving constables and sergeants.

[2] Subject to a minimum of £2·50 a week and a maximum of £4 a week.

[3] Implemented in two phases, with half being paid on 1 September 1978 and the remainder on 1 May 1979.

NATIONAL FINANCE

Exchange Rate

Mr. Pike: To ask the Chancellor of the Exchequer what is Her Majesty's Government's policy towards the maintenance of a firm exchange rate in the particular context of industry's need to plan ahead; and how this policy has evolved since the statement by the Chief Secretary to the Treasury on 12 December 1986, *Official Report*, column 260.

Mr. Major *[holding answer 19 October 1988]:* Control of inflation is of paramount importance to industry. The Government have made it clear that it will not accommodate inflation by exchange rate depreciation. Industry understands that and can plan ahead on that basis.

Value Added Tax

Mr. Onslow: To ask the Chancellor of the Exchequer what representations he has received concerning the likely

effect of the European Court ruling on the application of value added tax to construction work undertaken by charities; and if he will make a statement.

Mr. Lawson *[holding answer 19 October 1988]:* A number of letters about the potential impact on charities have been received in response to the consultation paper issued by Customs and Excise on the implementation of the European Court ruling on VAT zero rating for construction services. In addition, Treasury Ministers have received a number of letters from hon. Members and others. Customs officials and the Economic Secretary to the Treasury have also met representatives of the charities to discuss their representations. These, along with other responses to the consultation paper, are being considered in detail; an announcement will be made in due course.

Vacancies (London)

Mr. Sean Hughes: To ask the Chancellor of the Exchequer what are the latest figures for Her Majesty's Customs and Excise in the London pay area of the number of vacancies by grade and the proportion this is of the grade complement in London.

Mr. Lilley: The information is as follows:

	Number of vacancies	*Per cent. of complement*
Grade 5 and above	0	0
Grade 6	0	0
Grade 7	16	8·0
SEO	29	7·2
HEO	365	23·3
EO	231	9·4
AO	30	5·2
AA	40	7·4
Secretarial grades	20	9·7
Support staff	31	10·2

Mr. Sean Hughes: To ask the Chancellor of the Exchequer what are the latest available figures for Her Majesty's Stationery Office in the London pay area of the number of vacancies by grades and the proportion this is of the grade complement in London.

Mr. Brooke: The following is the information:

Number of Vacancies by Grade

	Proportion of Grade Complement in London percentage
Non-Industrial	
5 Higher Executive Officers (4 of these are computer specialists)	25
1 Higher Printing and Graphics Officer	4
4 Executive Officers (2 of these are computer specialists)	14
2 Printing and Graphics Officers	3
2 Office Machinery Technical Services Service Managers	40
5 Administrative Officers	6
1 Administrative Assistant	5
1 Typist	25
3 Support Grade Band 2	38
Industrial	
2 Order Handlers	4
2 Publications Handlers	3
1 Industrial Messenger	5
1 Machine Assistant	5

Lord Havers (Pension)

Mr. Campbell-Savours: To ask the Chancellor of the Exchequer what is the level of pension and the lump sum paid in respect of the previous Lord Chancellor; and what remuneration he receives in his ex officio capacity as a Lord of Appeal in Ordinary.

Mr. Brooke *[pursuant to his reply 26 July 1988, c. 167]:* Contrary to the information given in my earlier reply, former Lord Chancellors are entitled to a tax-free lump sum payment equal to twice their pension on retirement. This payment is abated if there are any contributions outstanding towards the cost of a widow's pension.

NORTHERN IRELAND

Civil Service

Mr. John D. Taylor: To ask the Secretary of State for Northern Ireland why applicants for appointments in administration to posts in the Northern Ireland Civil Service were required to be under the age of 32 years on 1 October; and since when this age restriction has been in operation.

Mr. Ian Stewart: The appointments in administration scheme is a trainee grade and the competition aims to ensure a supply of highly qualified people with the potential to fill senior posts in the Civil Service. Because of the requirement for minimum seniority periods to be served in each grade before an officer is eligible for promotion and the length and variety of Civil Service experience required by those appointed to the most senior posts, it in effect takes a considerable time before appointees are in a position to reach the most senior levels. The age limit of 32 is considered appropriate to the long-term needs of the Northern Ireland Civil Service, and reflects the substantial training input for candidates appointed to this grade.

The age limit for the appointments in administration competition in the Northern Ireland Civil Service has been 32, since the current appointments in administration scheme was introduced in 1973.

Sewage Pumping Station (Donaghadees)

Mr. John D. Taylor: To ask the Secretary of State for Northern Ireland what information he has as to whether the proposal to construct a sewage pumping station at Quarry Green, Donaghadees, has been approved by Ards borough council; whether he has received any objections to this proposal; and if he will make it his policy to establish a public inquiry into this proposal.

Mr. Needham: The planning application for the proposed pumping station attracted 18 objections. The Department is not yet in a position to consult Ards borough council with its preliminary opinion but it will do so. A public inquiry cannot be held under planning legislation.

Anglo-Irish Agreement

Mr. Nicholas Bennett: To ask the Secretary of State for Northern Ireland what arrangements he is making to take account of public views in the review under article 11 of the Anglo-Irish Agreement.

Mr. Tom King: The review, beginning in November, will examine the whole working of the conference and its associated secretariat to see whether any changes in the scope and nature of its activities are desirable. I am anxious to have available any views that hon. Members and other interested parties may wish to put forward. I would be grateful if such views could be forwarded to me as soon as possible, and not later than the end of the year.

I have already written to the leaders of the Northern Ireland parties, and the Northern Ireland spokesmen of other parties in the House, inviting their contributions.

FOREIGN AND COMMONWEALTH AFFAIRS

South Africa

Mr. Pike: To ask the Secretary of State for Foreign and Commonwealth Affairs if he plans to introduce any further economic sanctions against South Africa, in collaboration with *(a)* his Commonwealth and *(b)* his European Economic Community partners.

Mrs. Chalker: No.

DEFENCE

Armed Forces Pay

Mr. Wray: To ask the Secretary of State for Defence what is the estimated total cost of pay increases for the armed forces in 1988-89.

Mr. Freeman: The total cost of pay increases for the armed forces for 1988-89 is £242 million. This figure takes account of the increased deductions made from servicemen's pay in respect of food and accommodation charges as a result of the recommendations made by the AFPRB in its 1988 report.

Mr. Wray: To ask the Secretary of State for Defence what has been the average increase in percentage of payments to the armed forces for each year since 1970.

Mr. Freeman: Since the military salary was introduced in April 1970 average increases in armed forces pay have been:

RPI since 1970

Pay review year	*Equivalent percentage increase for full year*	*Year*	*RPI Increase*
1971	[1]	1970-71	9·5
1972	10	1971-72	6·3
1973	6·5	1972-73	9·1
1974	13	1973-74	15·2
1975	29·5	1974-75	21·7
1976	[2]9·6	1975-76	18·9
1977	5	1976-77	17·5
1978	13	1977-78	7·9
1979	32·5	1978-79	10·1
1980	16·8	1979-80	21·8
1981	10·3	1980-81	12·0
1982	6·1	1981-82	9·4
1983	7·2	1982-83	4·0
1984	[3]4·9	1983-84	3·2
1985	7·1	1984-85	6·9
1986	[4]5·6	1985-86	3·1
1987	4·9	1986-87	4·2
1988	6·4	1987-88	3·9

[1] There was no formal review in 1971 but an interim award of 7 per cent. was made in August 1971.
[2] This percentage is derived from a flat rate award of £6 per week to all AFPRB ranks.
[3] A staged increase, the full amount awarded was 7·6 per cent.
[4] A 7·5 per cent. increase deferred to 1 July 1986.

Bomb Damage (Cyprus)

Mr. John D. Taylor: To ask the Secretary of State for Defence what was the extent of the bomb damage to military married quarters in the island of Cyprus on 4 October; whether these premises were located within a United Kingdom sovereign base area; who was responsible; what was the source of the detonators and explosives used in these two bombs explosions; if he has any plans to improve security against terrorist attacks at the United Kingdom bases in Cyprus; and if he will make a statement.

Mr. Archie Hamilton: The bomb explosions occurred at Berengaria camp which is a retained site and not part of the United Kingdom sovereign base areas. There were no casualties and the damage was very minor, consisting of two craters approximately 1ft deep in the gardens of married quarters. Responsibility for the attack and the source of explosives and detonators is not yet known but is the subject of investigation by the Cypriot police. In the light of recent terrorist activity, security in British bases has been reviewed and enhanced where appropriate. We cannot however comment on any particular security measures.

OVERSEAS DEVELOPMENT

World Bank and IMF Loans

Mr. Andrew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs what pressure the Government intend to bring to bear on the World Bank and the International Monetary Fund to address the environmental and ecological implications of their loans and other transactions.

Mr. Chris Patten: The World Bank has substantially increased the emphasis it gives to the environmental and ecological aspects of its lending operations. An environmental department and regional units have been reinforced to ensure that these considerations are properly reflected in the bank's overall lending and policy objectives. We are in regular contact with the bank on its policies in this area through our executive director's office and his participation in board discussions of policy and specific lending proposals. To the extent that environmental considerations arise in IMF programmes, we adopt a similar approach. The IMF and the World Bank do, of course, co-operate closely.

ENERGY

Departmental Staff

Mr. Sean Hughes: To ask the Secretary of State for Energy what are the latest available figures for his Department in the London pay area of the number of vacancies by grade and the proportion this is of the grade complement in London.

Mr. Parkinson: The table lists grades where vacancies against complement exist as at 1 October 1988.

Grade	Vacancies	Percentage of complement
Grade 7	2·0	2
Higher executive officer	8·5	9
Administrative officer	5·5	5
Administrative assistant	18·0	24
Personal secretary	7·5	14
Typist	11·0	37
Senior messenger	1·0	20
Security officer	1·0	12
Senior professional and technical/senior scientific officer	4·0	28
Assistant scientific officer	1·0	100
Reservior evaluation specialist IV/V	9·5	33
Petroleum specialist IV	3·0	18
Senior engineering inspector	1·0	25
Mapping and charting officer	2·5	42
Reprographics officer	4·0	80
Senior economist assistant	1·0	20
Senior assistant statistician	2·0	67
Senior information officer	1·0	10

Mr. Sean Hughes: To ask the Secretary of State for Energy if he will provide the latest available figures for his Department for *(a)* numbers of staff in receipt of local pay additions, by grade, *(b)* location of those offices awarding local pay additions and *(c)* annual cost.

Mr. Parkinson: The latest available information on local pay additions (LPAs) for the Department of Energy is as follows:

(a) Staff in receipt of LPAs, by grade

	Number
Administrative assistant	38
Administrative officer	114

(b) Location of offices involved:
Thames House South, Millbank, London SW1P 4QJ
Croydon, Surrey
(c) Annual cost: £70,600.

Radioactive Leakages (Sellafield)

Mr. John D. Taylor: To ask the Secretary of State for Energy how many radioactive leakages there have been at Sellafield in the current year; and if he will make a statement about the leakage reported on Friday 7 October.

Mr. Michael Spicer: There have been three incidents at Sellafield this year in which small amounts of radioactive material have been detected. All three occurred within buildings at the plant. One of them was the specific incident to which the hon. Member refers. The leak penetrated the soil below the building and has since been stopped. There was no over-exposure to any member of the work force and there was no risk to the public.

All three incidents were reported to my Department in accordance with the revised reporting arrangements announced by the then Parliamentary Under-Secretary of State for Energy on 30 April 1987, columns 203-204.

The incidents were also reported to the nuclear installations inspectorate of the Health and Safety Executive and to Her Majesty's inspectorate of pollution. Details of all such incidents are included in British Nuclear Fuel plc's regular Sellafield *Newsletter*, copies of which are available in the Library of the House.

TRADE AND INDUSTRY

Spirituous Beverages

Mr. Sims: To ask the Chancellor of the Duchy of Lancaster what recent action Her Majesty's Government have taken to press for the removal of discrimination in rates of alcohol tax and value-added tax on spirituous beverages in Portugal.

Mr. Alan Clark: At the Government's request the European Commission made a formal approach in May to the Portuguese authorities about discriminatory rates of VAT and alcohol tax. The Commission is holding talks with the Portuguese in Lisbon in early November to discuss this issue.

Mr. Sims: To ask the Chancellor of the Duchy of Lancaster what recent action Her Majesty's Government have taken *(a)* to press for the removal of Greek value added tax discrimination against, inter alia, Scotch whisky in favour of certain locally produced spirits and *(b)* to ensure that the Greek Government complies with its previous commitment to remove all remaining discriminatory taxes on spirits with effect from 1 January 1989.

Mr. Alan Clark: The European Commission's infringement proceedings against the Greek Government are still in progress in the European Court and we continue to keep a close watch on developments. In addition, the Government made an official request to the European Commission earlier this year to monitor taxation measures in Greece after the abolition of the Greek "special consumption" and "regulatory" tax on 1 January 1989.

ATTORNEY-GENERAL

Detective Inspector Lee Marvin

Mr. Austin Mitchell: To ask the Attorney-General whether he intends to proceed against former Detective Inspector Lee Marvin for publication of confidential information about public figures in *The Sun* newspaper.

The Attorney-General: The Director of Public Prosecutions has asked for police inquiries to be made into this matter. No decision as to whether or not any prosecution should be brought can be made until those inquiries are complete.

Public Order Act 1986

Mrs Ann Taylor: To ask the Attorney-General how many cases have been instituted and how many cases concluded under section 18 of the Public Order Act 1986; and how many cases are still pending; and how many of the concluded cases led to convictions.

The Attorney-General: Since Part III of the Public Order Act 1986 came into force last year, one prosecution under its provisions has been brought. That prosecution has not yet concluded.

HEALTH

Erythropoietin

Sir Michael McNair-Wilson: To ask the Secretary of State for Health in which hospitals clinical trials of erythropoietin are being carried out; and how many patients are involved.

Mr. Mellor: Clinical trials of erythropoietin are currently under way in 38 hospitals in the United Kingdom and 132 patients are participating. They have all given their consent to take part. Representatives of the clinical investigators have asked that no details of the trial sites should be published to avoid the risk of direct publicity disturbing arrangements between patients and investigators which could in turn lead to delay in completing the trials and to other difficulties.

Elderly Persons (Care)

Mr. Allen: To ask the Secretary of State for Health what action his Department will consider arising from the Northwick Park hospital research on the cost-effectiveness of caring for the elderly in the community as opposed to in hospitals.

Mr. Mellor: It is already Government policy that elderly people should be cared for in the community whenever this is possible and appropriate.

We are currently giving careful consideration to Sir Roy Griffiths' recommendations on the whole issue of care in the community, taking account of the independent review of residential care chaired by Lady Wagner, and of the numerous representations we have received.

Community Care

Mr. Pike: To ask the Secretary of State for Health if he will list the representations he has now received following the publication of the Griffiths report on community care; and if he will make a statement.

Mr. Mellor: We have received formal responses to the Griffiths report from the following national bodies:

Age Concern England
Alcohol Concern
Association of County Councils
Association of Directors of Social Services
Association of Residential Communities for the Retarded
Audit Commission for Local Authorities in England and Wales
BMA (General Medical Services Committee)
COHSE
Community Care Now!
Community Psychiatric Nurses Association
Disablement Income Group
Independent Hospitals Association
Institute of Gerontology
Institute of Health Services Management
Institute of Housing
The King's fund
Leonard Cheshire Foundation
MENCAP
MIND
National Council for Voluntary Organisations
National Demonstration Services in Psychiatric Rehabilitation
National Housing and Town Planning Council
National Schizophrenia Fellowship
Parliamentary Mental Health Group
RESCARE
Regional Health Authority Chairmen and General Managers: Inter Regional Secretariat
Royal College of Psychiatrists
Shaftesbury Society
Social Care Association
Society of Family Practitioner Committees
Social Security Advisory Committee
UK Central Council for Nursing, Midwifery and Health Visiting

In addition, we have received representations from:

58 local authorities
18 health authorities
12 Community Health Councils
10 Family Practitioner Committees
18 Professional bodies
20 other voluntary organisations
31 members of the public.

NHS Pay

Mr. Wray: To ask the Secretary of State for Health what is the latest estimated total cost of pay increases in 1988-89 for *(a)* nurses, *(b)* doctors and *(c)* ancillary staff in the National Health Service.

Mr. Mellor: The information requested is as follows:

National Health Service England

Cost of pay increases 1988-89	*£ million*
Nurses and midwives	[1]731
Doctors and dentists	255
Ancillary staff	[2]52

[1] The figure follows the recent announcement of additional funding for the Nurses Clinical Grading Review.
[2] In addition a reduction of one hour in the standard working week from 12 December 1988.

Aids

Mr. Robert G. Hughes: To ask the Secretary of State for Health whether he has any plans to change the funding arrangements by which central Government grants are provided to local authorities in respect of AIDS-related problems to take into account the fact that the great majority of people with AIDS live in a relatively small number of local authorities.

Mr. Mellor: I am very pleased to announce that we propose to introduce in 1989-90 a new specific grant to support expenditure on personal social services to enable resources to be targeted on the small number of local authorities facing the greatest pressure as a consequence of AIDS. £7 million of grant, paid at 70 per cent. of total expenditure under the powers available from the Local Authority Grants (Social Needs) Act 1969, will be distributed to those authorities facing the severest pressure. Although the precise details of the arrangements

have yet to be worked out, we intend to monitor the payment and use of resources under this grant very carefully.

Nurses (Pay)

Mr. Frank Field: To ask the Secretary of State for Health what estimate he has received from each regional health authority of the cost of the nursing regrading exercise; what is each region's estimate of their total nursing pay bill in 1988-89; and what is each region's current allocation in respect of nursing pay.

Mr. Kenneth Clarke *[holding answer 19 October 1988]*: I am today announcing additional financial allocations to English regional health authorities to meet in full the estimated final costs of the nurses clinical regrading exercise. The first column of the table gives each regional health authority's estimate* of the basic assimilation cost of its proposed regrading. The remaining information gives the distribution by region of the additional £98 million now being made available (including provision for London pay supplements where appropriate); and the total of £731 million which has now been provided to meet the cost of this exercise in England. Regional estimates of the total nursing pay bill in 1988-89 are not available; and current allocations to regions do not separately identify an element in respect of nursing pay.

Region[1]	*Percentage assimilation cost*	*Additional allocation £ million*	*Total*[2] *allocation £ million*
Northern	16·4	6·3	43·6
Yorkshire	16·2	5·5	47·0
Trent	16·3	7·2	58·7
East Anglia	17·1	4·2	26·3
North West Thames	16·4	5·2	56·8
North East Thames	16·9	7·3	70·8
South East Thames	17·4	8·4	61·9
South West Thames	17·2	6·8	49·8
Wessex	17·6	8·4	39·6
Oxford	18·3	6·8	31·7
South Western	17·8	9·9	46·6
West Midlands	16·2	7·5	66·8
Mersey	16·2	4·9	34·9
North Western	16·7	9·9	61·3

[1] In order to ensure consistency all Regions were asked to calculate the cost of their proposals upon the assumption that all staff would move from the midpoint of their existing scale to the midpoint of their proposed new grade. We and the Regions recognised, however, that because of the present incremental distribution such a method would overstate the cost. Accordingly three Regions, which had the data available, calculated the cost taking account of actual points on scales and grades. This comparison showed in those Regions that on average the midpoint method overstated the cost by 0·6 percentage points. To reflect this, all Regions accepted that their midpoint-to-midpoint estimates should be adjusted by a common factor of 0·6 percentage points.

[2] These figures do not include the provision made for special health authorities and other bodies.

University College and Middlesex School of Dentistry

Mr. Alfred Morris: To ask the Secretary of State for Health what representations have been received from patients and others about the future of the University College and Middlesex school of dentistry and its associated dental hospital; what replies have been sent; and if he will make a statement on the consequences of closure for patients.

Mrs. Currie *[holding answer 19 October 1988]*: The Department has received some 90 inquiries from members of the public and staff affected by the closure of the dental school at the University College and Middlesex school of dentistry. The replies to the inquiries explained that there would be a possible serious oversupply of dentists in the future unless the present rate of increase of students admitted to United Kingdom dental schools was reduced. They also indicate that decisions on the funding of individual dental schools are the responsibility of the University Grants Committee.

The provision of dental services provided by University College is a matter for the district health authority. As closure of the dental school will be phased over the next five years there will be time for the authority to arrange for planned transfer of services.

SOCIAL SECURITY

National Insurance

Mr. Austin Mitchell: To ask the Secretary of State for Social Security whether he will publish in the *Official Report* a table showing for those contracted in and for those contracted out, the national insurance contributions rates, including the class 2 and class 4 contributions and the reduced rate, in 1988-89, together with *(a)* the total number in each category, their sex and their marital status and *(b)* the aggregate contributions in each category and the earnings to which they relate.

Mr. Peter Lloyd *[holding answer 27 July 1988]*: Full details of the current national insurance contribution rates can be found in leaflet N1208 "National Insurance, Statutory Sick Pay, Statutory Maternity Pay—rates from 6 April 1988" a copy of which has been placed in the Library.

Estimated numbers of National Insurance contributors in 1988-89

	Millions		
	Males	*Females*	*Total*
Class 1:			
Contracted out			
Standard Rate	6·3	2·7	9·0
Reduced Rate	—	0·3	0·3
Not Contracted out			
Standard Rate	5·2	4·2	9·4
Reduced Rate	—	0·7	0·7
All			
Standard Rate	11·5	6·9	18·4
Reduced Rate	—	1·0	1·0
Total	11·5	7·9	19·4
Class 2	1·9	0·2	2·1
Class 4	1·45	0·15	1·6

Reduced Rate	—	2	2
Not contracted out			
Standard Rate	57	25	82
Reduced Rate	—	4	4
All			
Standard Rate	142	50	192
Reduced Rate	—	6	6
Total	142	56	198
Estimated total assessed earnings of self-employed in 1988-89			
Self-employed	22·5	2·5	25

Estimates by marital status are not available.

Mr. Austin Mitchell: To ask the Secretary of State for Social Security what is the current reduced rate of national insurance contributions for *(a)* married women and *(b)* widows; how many are still paying contributions at this rate; what is his forecast for 1990-91; how many would otherwise be paying at the rate of 5 per cent. and 7 per cent.; and what is the estimated cost to the national insurance fund in the current financial year in each case.

Mr. Peter Lloyd *[holding answer 27 July 1988]:* The current reduced rate contribution for both married women and widows is 3·85 per cent. and it is estimated that around 1 million women are contributing at this rate. It is further estimated that 750,000 women will still be paying at the reduced rate in 1990-91.

If the reduced rate were abolished, around 0·3 million of the women now paying it would pay contributions at 5 per cent., 0·25 million at 7 per cent., and 0·45 million at 9 per cent. The cost of this concession to the national insurance fund in 1988-89 terms would be £200 million.

Mr. Austin Mitchell: To ask the Secretary of State for Social Security what has been the increase in the number and annual value of national insurance contributions since 1986 as a result of the reduction in unemployment; and what is the division between full-time and part-time employment.

Mr. Peter Lloyd *[holding answer 27 July 1988]:* It is not possible to identify the effect of the reduction in unemployment on the numbers paying national insurance contributions.

Mr. Austin Mitchell: To ask the Secretary of State for Social Security whether he will publish in the *Official Report* a table showing the number of nationally insured male and female workers in manufacturing and non-manufacturing, respectively, together with his estimate of average earnings in each case in 1987-88 and his forecast for 1988-89.

Mr. Peter Lloyd *[holding answer 27 July 1988]:* I regret that information in the form requested is not available.

Mr. Austin Mitchell: To ask the Secretary of State for Social Security whether he will publish in the *Official Report* a table showing the latest estimated income of the national insurance fund from national insurance contributions in the current financial year, the income which would accrue if the upper earnings limit on all contributions was removed and the income which would be lost in each case if *(a)* the contributions rate for single persons was reduced to 5·5 per cent., *(b)* the rate for married persons was dropped to 4 per cent., *(c)* £3,000 were deducted from earned income for contribution purposes, rising to £6,000 for a contributor with a non-earning spouse and *(d)* if the reductions in *(a)* to *(c)* were in operation at the same time.

Mr. Peter Lloyd *[holding answer 27 July 1988]:* The amount of national insurance contributions due to the national insurance fund in 1988-89 is estimated to be £27·3 billion of which £11·85 billion is employees (primary) contributions.

The table shows the estimated effect of the proposals in the question:

	£ Billions	
Current 1988-89 estimates	27·3	
If Upper Earnings Limit removed for[1] employees contributions	28·6	+1·30
If single person's rate reduced[2] to 5·5 per cent.	25·55	−1·75
If married person's rate reduced[2] to 4 per cent.	22·15	−5·15
If £3,000 deducted from earnings[2] for contribution purposes (£6,000 where spouse is non-earning)	23·50	−3·8
If all proposals were in existence[2] at same time	18	−9·30

[1] Assumes that current upper earnings limit remains for the purposes of contracted-out rebates.

[2] Assumes that secondary contributions and contracted-out rebates would be unaffected and that all losses are from gross primary contributions ie. no adjustments for NHS allocation.

Mr. Austin Mitchell: To ask the Secretary of State for Social Security, pursuant to the reply dated 25 March 1987, *Official Report*, columns *199-200*, concerning reduced rate national insurance contributions, if he will provide figures for the gross and net contributions, taking into account the figures supplied on the same date in reply to a question asking for an update of table 40.13 of social security statistics 1985, 25 March, *Official Report*, column *200*.

Mr. Peter Lloyd *[holding answer 28 July 1988]:* It is estimated that an average of 1 million female contributors will be paying the reduced rate of national insurance contributions in 1988-89. The full year cost of this concession in 1988-89 in terms of lower contribution revenue will be £200 million.

Benefit Claimants

Mr. Lester: To ask the Secretary of State for Social Security if he will publish a table showing the number of people claiming *(a)* supplementary benefit-income support *(b)* rent-rebate-allowances *(c)* rate rebates and *(d)* family income supplement-family credit, in each year

since 1975, including estimates for 1988, distinguishing between pensioners and those of working age and between certificated and standard housing benefit.

Mr. Peter Lloyd *[holding answer 29 July 1988]:* The information is set out in the tables.

The tables stand alone: figures for particular years cannot be added together to provide a total number of people, as individual recipients may receive more than one benefit.

Supplementary Benefit/Income Support Recipients
(November/December of each year)

	[1] Working age	[2] Pensioners	[3] Total
1975	1,113	1,679	2,793
1976	1,274	1,687	2,960
1977	1,253	1,738	2,991

[1] Prior to November 1982 householders on supplementary benefit received assistance with rent and rates through the supplementary benefit scheme.
[2] A new housing benefit scheme for householders not receiving supplementary benefit was introduced from April 1983.
[3] Not available.
[4] Subject to rounding.
[5] Estimated impact of the New Scheme of Housing Benefit introduced in April 1988. The terms "certificated" and "standard" housing benefit no longer apply and have been superseded by receipt and non-receipt of income support.

AGRICULTURE, FISHERIES AND FOOD

Milk

Mr. John D. Taylor: To ask the Minister of Agriculture, Fisheries and Food, pursuant to his reply of 26 May, *Official Report*, columns *263-4*, how many of the 4,500 milk producers who were contracted out of production had applied for milk quotas to his Department prior to 31 July; and when they were advised that they should apply by 31 July.

Mr. Donald Thompson: It is not practicable to invite applications for milk quota from former producers until the criteria against which they are to be judged have been established. I have received many inquiries on this subject, which can be effectively answered only when the Commission's proposals for dealing with this matter have

been fully considered by the Council of Ministers. In the Council discussions so far I have made known my strong reservations about the proposed 31 July application date.

Departmental Staff

Mr. Sean Hughes: To ask the Minister of Agriculture, Fisheries and Food if he will provide the latest available figures for his Ministry for *(a)* numbers of staff in receipt of local pay additions, by grade, *(b)* location of those offices awarding local pay additions and *(c)* annual cost.

Mr. Donald Thompson: The information requested is as follows.

(a) The numbers of staff currently in receipt of local pay additions by grades are:—

	Numbers
Executive Officers	101
Administrative Officers	555
Administrative Assistants	444
Typing Managers	19
Senior Personal Secretaries	26
Personal Secretaaries	117
Typists	158

(b) The locations of offices awarding local pay additions, by London Borough or local authority area, are:—
Camden, City of London, City of Westminster, Hillingdon, Wandsworth, Kingston upon Thames, Guildford, Reading, Runnymede, Vale of White Horse and Cambridge.

(c) The estimated annual cost of these payments is £692,000.

Research and Development

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food (1) if he will give details of proposed cuts in the funding of agricultural and horticultural research and development recently circulated to sectors of the industry, and if he will make a statement;

(2) whether the proposals to cut Government funding of agricultural and horticultural research and development, recently circulated to sectors of the industry, include the cuts for 1989-90 and 1990-91 already announced in the expenditure plans of January 1988; and if he will make a statement;

(3) if he will outline the estimated employment effects of implementing the proposals to cut Government funding of agricultural and horticultural research and development as circulated to sectors of the industry recently, in total, by sector and by institute, including Government departments, respectively;

(4) what proportion of those cuts in the Government funding of agricultural and horticultural research and development already published have yet to be implemented; and if he will provide figures to show the projected effects in cash and employment terms in total and by sector of the industry, respectively.

Mr. Ryder: The £20 million reduction in planned expenditure on R and D by Agriculture Departments, which was announced in January 1985, was implemented during 1986-87 and 1987-88. The further £10 million reduction announced in November 1987 will be implemented in 1989-90 and 1990-91. Decisions on further amounts by which Government funding of near market research and development from the Agriculture Departments' programme will be reduced, will take into account the reductions already implemented and planned. The information which has been circulated to sectors of the industry is illustrative of the work which is considered suitable for industry funding and I am arranging for copies to be placed in the Library of the House. It is not possible at present to estimate effects on employment.

Mr. Ron Davies: To ask the Minister of Agriculture, Fisheries and Food how many people were employed in Government-assisted agricultural and horticultural research and development at the latest available date in the United Kingdom in total, by sector and institute, including Government Departments, respectively.

Mr. Ryder: The information requested is not kept centrally.

Bovine Somatotropin

Mr. Ingram: To ask the Minister of Agriculture, Fisheries and Food what advice he has received from the Veterinary Products Committee concerning the milk production hormone, BST; and if he will make a statement.

Mr. Ryder: I refer the hon. Member to the answer I gave to the hon. Member for Carlisle (Mr. Eric Marlow) on the 20 October 1988.

ENVIRONMENT

Rating Reform

Mr. Baldry: To ask the Secretary of State for the Environment what resources he is making available to charging authorities in England for the cost of preparing for the community charge in 1989-90.

Mr. Ridley: After discussions with the local authority associations, I have concluded that half the provision of £110 million being included in the rate support grant settlement for 1989-90 for the current costs of preparing for the community charge will be met through a specific grant. This grant will be made to all charging authorities on a formula which reflects the number and relative mobility of chargepayers in each area. The remaining half of the expenditure will be supported by rate support grant in the normal way. My Department is today providing authorities with details of the amount of grant to be paid to them; copies of the letter to the authorities and a list of the estimated amounts of specific grant to be paid to charging authorities have been placed in the Library.

Capital allocations for 1989-90 will include specific allocations of £135 million for the capital costs of preparing for the community charge and there will be further discussions with the local authority associations on the method of allocation so that the details can be announced following the autumn statement on public expenditure.

Open Spaces (Development)

Mr. Cox: To ask the Secretary of State for the Environment what plans he has to ensure that all costs of planning appeals for development of green belt or urban open space land should be borne by the developer and not by the ratepayer.

Mr. Chope: The parties to a planning appeal normally meet their own expenses. Awards of costs at a public inquiry can, however, be made on grounds of unreasonable behaviour.

House Prices

Mr. Pike: To ask the Secretary of State for the Environment if he will list those local authorities in which the average house price is £20,000 or less.

Mr. Trippier: The information about house prices collected by the department identifies only the county, metropolitan district, or London borough area in which the dwelling is located. For the period July 1987 to June 1988 in none of the 108 such areas was the average price of dwellings purchased with a building society mortgage £20,000 or less.

Vacant Private Housing

Mr. Pike: To ask the Secretary of State for the Environment if he will list those local authorities in whose area more than 6·5 per cent. of the private housing stock now stands vacant.

Mr. Trippier: About 80 per cent. (293) of English housing authorities have provided estimates of the number of empty private dwellings (owner-occupied and private rented) in the 1988 housing investment programme returns. Of these, the following 25 authorities reported more than 6·5 per cent. of the private housing stock in their areas as being vacant at 1 April 1988:

Allerdale
Breckland
Burnley
Camden
Hackney
Hammersmith and Fulham
Haringey
Hove
Hyndburn
Islington
Kensington and Chelsea
Lambeth
Leicester
Lewisham
Norwich
Pendle
Peterborough
Rossendale
South Derbyshire
Southend-on-Sea
South Shropshire
Southwark
Tower Hamlets
Westminster
Winchester

Council House Sales

Mr. Pike: To ask the Secretary of State for the Environment if receipts from council house sales will be released to discretionary housing use by holding local authorities in the forthcoming parliamentary Session.

Mr. Trippier Under the Local Government Planning and Land Act 1980, local authorities may augment their prescribed expenditure allocations in any financial year by an amount equal to the prescribed proportion of their in-year and accumulated capital receipts. The prescribed proportion currently applicable to receipts from sales of council houses in England is 20 per cent. Proposals for a new statutory framework for the capital programes of local authorities were published by my right hon. Friend on 7 July. These proposals would require legislation and would not take effect before the financial year 1990-91.

Inner Area Programmes

Mr. Pike: To ask the Secretary of State for the Environment if he will list the inner area programme bids submitted for 1988-89, indicating which have been approved; and if he will make a statement.

Mr. Trippier Inner area programmes for 1988-89 have been submitted by all 57 local authorities invited to prepare them and all have now been approved. Urban programme expenditure allocations to support the projects in each IAP have also been confirmed.

Water Privatisation

Mr. Pike: To ask the Secretary of State for the Environment how much his Department has spent during 1987-88 to the latest available date in relation to proposals to privatise the water industry.

Mr. Moynihan Estimates of expenditure in 1987-88 by the Department in relation to proposals to privatise the water industry are as follows:

	£
DOE Staff and Office Services	710,000
Advisers Fees	622,000

These figures do not include certain other costs, such as accommodation, which are borne centrally. The first item includes the cost of the present system of financial control of the water authorities.

Housing Rental Purchase

Mr. Pike: To ask the Secretary of State for the Environment if his Department currently has any proposals with regard to housing rental purchase schemes.

Mr. Trippier We believe that rental purchase has been used as a means of circumventing the Rent Act. The new assured tenancy regime set out in the Housing Bill, which will enable landlords to charge market rents, should reduce the incentive to establish rental purchase schemes. We are awaiting the results of the survey into rental purchase carried out by the Association of Metropolitan Authorities

London Docklands

Ms. Gordon: To ask the Secretary of State for the Environment what plans have been considered, or approved by the London Docklands development corporation for further development on Heron quay in the Isle of Dogs enterprise zone, stating the approximate areas in respect of each proposed use.

Mr. Trippier: The LDDC is currently considering a mixed development proposal by Tarmac Brookglade of approximately 2 million sq ft, the use of which would be broadly as follows:

Residential—49 to 62 per cent.
Commercial—14 to 27 per cent.
Retail—4 to 6 per cent.
Business suites—2 to 4 per cent.
Hotel—16 per cent.

Housing Associations

Mr. Batiste: To ask the Secretary of State for the Environment what further proposals he has for encouraging the setting up of new housing associations in rural areas.

Mr. Trippier: My right hon. Friend the Secretary of State announced in July that the Rural Development

Commission planned almost to treble its funding for the national agricultural centre rural trust in 1988-89, and that the Housing Corporation would provide for a steady expansion in its programme of housing association schemes in rural areas. It is, however, too early to give any further details of these bodies' funding proposals for the coming years.

Water Supply (Failures)

Mr. Pike: To ask the Secretary of State for the Environment what is the number of significant failures of water supply arising, by water authority, for each year since 1979; what was the number of significant serious failures, by water authority for 1987; and if he will make a statement.

Mr. Moynihan *[holding answer 19 October]:* Information is not available centrally for all authorities on a comparable basis. However, information has been made available regarding the existence of levels of service from their publication in the PAC report "Monitoring and Control of the Water Authorities, 1985" (Ref. No. H.C. 249) and in specific circumstances in answers to subsequent parliamentary questions.

TRANSPORT

British Rail (Investment)

Mr. Pawsey: To ask the Secretary of State for Transport if he will set out in the *Official Report* details of the major British Rail projects which are receiving funds from his Department.

Mr. Portillo: British Rail will invest £3·8 billion over the next five years. Within that total all investment in British Rail's Network South East and provincial sectors is funded by the Government through the public service obligation grant, either directly as a charge on the revenue account or through depreciation charges.

Twenty-five major investment projects have been approved by Ministers since Government objectives were first set in October 1983, worth some £1,390 million in all (1988-89 prices). Within that total projects which have received funds from this Department include:

Tonbridge-Hastings electrification
149 EMU vehicles (43 sets) for London commuter services
Bishops Stortford-Cambridge electrification
150 lightweight DMU vehicles (75 sets)
100 mediumweight DMU vehicles (50 sets)
Waterloo resignalling
240 mediumweight DMU vehicles (120 sets)
"Windsor" rail link, Manchester
Snow Hill Tunnel Link, London—including 240 EMU vehicles
138 lightweight DMU vehicles (69 sets)
228 mediumweight "Sprinter" DMU vehicles (114 sets)
Bournemouth-Weymouth electrification including 120 EMU vehicles
Rail Link to Stansted Airport including 20 EMU vehicles
Royston-Cambridge electrification
184 EMU vehicles (46 sets) for Great Eastern Lines
204 Class 158 "Express Sprinter" DMU vehicles
48 Class 456 EMU vehicles (24 sets)
Portsmouth-Southampton electrification
200 Class 319-321 EMU vehicles (50 sets)

In addition to these projects British Rail continues investment in the electrification of the east coast main line and is funding improvements connected with the Channel tunnel which do not receive PSO grant.

M45-A45 Slip Roads

Mr. Pawsey: To ask the Secretary of State for Transport if he will announce the start date for the slip roads scheme between the M45 and the A45, together with the latest estimate of its cost.

Mr. Peter Bottomley: Draft orders will be published early next year. This is later than I had hoped. We hope to start work within the following 12 months. The latest estimate of cost is £1·1m.

Fornham St. Martin cum St. Genevieve (Bypass)

Sir Eldon Griffiths: To ask the Secretary of State for Transport why, as of mid-October, he had sent no reply to the Fornham St. Martin cum St. Genevieve parish council's letter of 31 August regarding the disagreement between Suffolk county highways department and his Department about the proposed bypass of this village; when he expects this new road will be built; if it is his intention that it should continue as a trunk road; and whether private enterprise can play any part in financing its construction.

Mr. Peter Bottomley: The parish council's letter of 31 August was received by the Department's eastern regional office on 15 September. A reply was sent on 7 October.

A bypass scheme for Fornham St. Martin, on the A134 principal road, is the responsibility of Suffolk county council as highways authority. It has programmed the scheme for a planned start of construction in 1990-91.

In December 1987 proposals were published for trunking the A134 from Bury St. Edmunds northwards. We are considering with the county council how best to provide a bypass for Fornham St. Martin and trunk the A134. We understand it is the county council's intention to apply for 100 per cent. grant aid for the bypass scheme. An offer of private funding would be given serious consideration.

Settle-Carlisle Railway

Mr. Pike: To ask the Secretary of State for Transport if he will publish in full the market research he has in his possession, including passenger attitudes towards *(a)* the desirability of keeping open, *(b)* the desirability of keeping open in the public sector and *(c)* the major purpose in closing the Settle-Carlisle railway; and if he will make a statement.

Mr. Portillo: We have studied carefully the report from the Transport Users' Consultative Committee which was submitted in 1986 and of which a summary has been published. We look forward to receiving a further report from it by 30 November. We have also seen the results of a survey undertaken by Cumbria county council into the usage of the line. It does not, however, cover any of the issues mentioned by the hon. Member. It would be for Cumbria to decide on the publication of its survey. British Rail has recently submitted its up-dated financial case for wishing to discontinue services on the line.

EMPLOYMENT

Community Programme

Ms. Armstrong: To ask the Secretary of State for Employment what advice he has given to organisations,

including community task force, about redundancy payments for workers whose contracts are to be terminated because of the end of the community programme.

Mr. Nicholls: The Training Commission sent comprehensive instructions on redundancy payments to all its area offices in August 1988. These instructions explained that the commission would reimburse the employer's share of all statutory redundancy payments due to community programme employees by virtue of their employment on the programme (and earlier temporary employment programmes). Commission area offices were instructed to pass on this information to all their CP agents and sponsors.

Training Schemes

Mr. Wray: To ask the Secretary of State for Employment what is the total cost of all training schemes funded by Her Majesty's Government for each year since 1975.

Mr. Cope: Since 1975, expenditure on training programmes by the Manpower Services Commission, acting on behalf of the Secretary of State for Employment, has been as follows:

	£ millions (rounded)
1975-76	172
1976-77	256
1977-78	292
1978-79	374
1979-80	451
1980-81	560
1981-82	749
1982-83	869
1983-84	1,050
1984-85	1,144
1985-86	1,257
1986-87	1,441
1987-88	1,613

These figures include all related administrative costs, net of receipts.

Mr. Wray: To ask the Secretary of State for Employment (1) what is the total number of people who completed training schemes funded by Her Majesty's Government for each year since 1975;

(2) what percentage of the unemployed attended and completed training courses funded by Her Majesty's Government for each year since 1975.

Mr. Cope: The table shows the number of people in Great Britain who started training courses funded by this Department for each year since 1980. The figures include those who joined courses for a second or subsequent time. Numbers starting training courses prior to 1980 and numbers completing courses could be obtained only at disproportionate cost.

It is not known how many of these trainees were unemployed at the time they began their training course.

Numbers of starts

Year ended March	*(thousands)*
1980	95
1981	92

INDEX TO THE

PARLIAMENTARY DEBATES

OFFICIAL REPORT

SIXTH SERIES **VOLUME 138**

SESSION 1987–88

25th July–21st October 1988

SCOPE OF THE INDEX, ARRANGEMENT AND ABBREVIATIONS

This index is derived from the House of Commons Library's Parliamentary On-Line Information System (POLIS), and the subject terms used are based on those used in POLIS. There are often changes in column numbering, etc, between the daily part or weekly Hansard (which simply collects together the daily parts without revision) and the bound volume. The index for the bound volume is revised to take account of these changes.

Scope and arrangement of the Index

Oral and Written Parliamentary Questions are indexed under subject headings and the names of Members asking and Ministers replying to them. Questions are not listed under the names of Departments replying. Departmental listings can be arrived at indirectly by looking under the names of the Minister(s) of that Department. There are, however, the headings 'Northern Ireland', 'Scotland', and 'Wales' under which one can find not only most Questions answered by the Northern Ireland Office, Scottish Office, Welsh Office but also Questions about these areas of the United Kingdom which are answered by other Departments. Ministerial statements are indexed under subject headings, under 'Ministerial statements' and the names of Ministers making them and Members speaking on them. General debates are indexed under broad subject headings and under the names of all Members and Ministers taking part. Debates on legislation (Bills, Orders, Regulations etc.) are indexed under the name of the Bill, Statutory Instrument etc, under subject headings and under the names of those taking part.

Rulings and Statements by Mr. Speaker and his deputies are brought together under the heading Speaker's rulings and statements.

Other contributions by Mr. Speaker and his deputies appear under the heading Speaker.

Opposition Day Debates, Estimates Day Debates and Standing Order No. 10 applications are listed under those respective headings and under subject headings too.

The date of each item except Parliamentary Questions is inserted immediately before the reference.

Members' names are given in the form by which they prefer to be known and are printed in bold italics. Under their names, entries are arranged under one of the two headings *Debates etc* (to include interventions on statements, points of order and so on) or *Questions*.

Abbreviations

Bills 1R = first reading, 2R = second reading, Money res = money resolution, Com = Committee stage, Rep = Report stage, 3R = third reading, amendt/amendts = amendment/amendments, * = matter taken formally, without debate.

Column numbers followed by the letter W refer to Written Questions. These appear at the end of each daily part or volume with their own sequence of column numbers printed in italics.
